case upon all its facts. The Government argued that this Court, by considering the question of a breach of the Convention, arrogated to itself jurisdiction over a foreign power, and they cited numerous cases with a view to proving that a British Court had no authority to exercise such jurisdiction. The Plaintiff was beating the wind so far as he alleged the general proposition—the defendant had not contested so indubitable a rule of law, but while this Court's want of power to bring a foreign Government within its jurisdiction in an original suit was admitted, it was contended that when a foreign Government sued a British subject in his own Court, that subject had a right to bring a cross suit against the foreign power, and the Court, in which the original suit was instituted, would assume jurisdiction, by refusing to hear the original suit, unless the plaintiff submitted to the jurisdiction in the cross suit, and thus enabled it to render a judgment, that would do justice on the whole case see *Rothschild v. Queen of Portugal*, 3 Y. & C., Ex. 594; *Gladstone v. Musurus Bey*, 1 H. & N. 465; *Duko of Brunswick v. King of Hanover*, 2 H. L., Ca. 1; *Hullett v. King of Spain*, 2 Bligh, N. S. 47,—where it was determined that a foreign state, coming for the aid of a British Court in the assertion of its rights, must sue in a form which makes it possible for the Court to do justice to the defendant, that by suing in such a Court a foreign state submitted itself to the jurisdiction of the Court, and that a cross bill might be filed against them). The remaining point in the plaintiff's argument requiring to be answered was the assertion, that the cross bill could not be entertained, because it was filed for damages, and not a liquidated sum. It was only necessary in support of the counter-claim to refer to the Rules of this Court. Rule 56 was to the following effect:—"Where a defendant in his answer raises any specific defence, being established he may be entitled to relief against the plaintiff in respect of the subject matter of the suit, the Court may, on the application of the defendant either before or at the hearing, if under the circumstances of any case it thinks fit, give liberty to him to file a counter-claim by a cross petition in the same suit, asking for relief against the plaintiff, and may make such order for the hearing of the suit and counter-claim together or otherwise, and in such manner and on such terms as to costs and other matters as seem just, and may, if in any case it seems fit, require the plaintiff to give security to the satisfaction of the Court (by deposit or otherwise), to abide by and perform the decision of the Court on the counter-claim," and the case of *Walsh, Hall & Co. against Pitman* tried before Judge Goodwin in 1874 was a precedent in which a cross bill for damages and not for a liquidated sum was entertained. The rules and precedent referred to overrode any authorities at home, which were at variance with them, if such existed. On the whole case he contended that the contract existing between the parties was to be found, not in the so called "title deed" only, but in all the conventions, regulations, and other documents referred to by the plaintiff in his argument, relative to the settlement of foreigners in Japan, that in that contract an indubitable implication arose that the Japanese Government had ceded its right to permit foreigners to dwell outside the limits prescribed them by the Arrangement of 1870 until

all the ground then allotted had been occupied. It was admitted on the record that foreigners did live outside the concession with the permission of the Government, while only a fraction of the ground so allotted was occupied. He maintained that such permission, whether tacit or express, on the part of the Government, materially affected the value of the defendant's property. The extent of the loss she had thus sustained would form a subject of enquiry at a subsequent sitting, after the legal questions bearing upon the case and which he had just dealt with, had been decided.

The Court reserved its judgment.

In the U. S. Consular-General Court.

Before Gen. T. B. VAN BUREN, Consul-General.

Tuesday, April 3rd, 1877.

E. B. WATSON vs. WALSH, HALL & Co.

This was a case in which plaintiff sued defendants for \$16,000, damages for having delivered a quantity of bags inferior to the quality they were represented to be.

Mr Dickins appeared for plaintiff, Mr. Ness for defendants.

This case was resumed from the 16th ult.

On the Court assembling to-day Mr. Ness continued his cross examination of Mr. Wilkin, who stated:—I do not remember Mr. Walsh saying the bags were new. He guaranteed them. By opening one bag I do not think I would have ascertained that the whole of the bags were second-hand. By opening half it would not have rendered the whole of the lot unmerchantable. Mr. Watson told me he bought the bags for the purpose of putting rice in them. I know that he did not buy them to sell again. Opened bales were unmerchantable because they could not be moved about. They were to be brought from Kobe to Yokohama and Tokio. The term "unmerchantable" is not inapplicable if the bags were used by himself. It does not strictly mean "unsaleable." The opening of these goods was to such an extent as was usually done for inspection, and certainly would not render them unmerchantable. Under ordinary circumstances only one bale need be opened. I do not know that had one of each lot been opened it would have been sufficient. The goods, had all the bales been opened, would have been "unmerchantable" in the sense that they could not have been removed or stored. Messrs. Browne & Co. wrote us that a few damaged bales had been rejected before the balance was taken. I have some recollection that the number rejected was about 2000 bags. Some bags were refused in Yokohama. I am not a bag expert. I cannot say whether rice is shipped in second-hand bags or not. I stipulated expressly for new bags, though I did not use the word "new." The 28,500 only were to be second-hand. The word "new," though not expressed, was understood as a matter of course when the others were designated as second-hand.

To Mr. Dickins:—I do not know that the bags rejected by Browne & Co. were paid for. I know of no instance of rice being shipped in second-hand bags home. Personally I should not object to shipping rice home in selected good second-hand bags. If the bags had been twice or thrice used, I should

imagine they would not be suitable. I have seen the Survey Report. In a lot of bags such as described in that survey, one bale in each lot would not have spoken for the whole. The bags varied greatly. When defendants authorised me to write the letter of the 25th of January, they did not tell me that any of the bags besides the 28,500 were second-hand. They said nothing by which it could be implied that the rest of the bags were second-hand. In effecting the sale I acted as broker to the defendants. Mr. Watson told me the bags were for rice and defendants evidently knew that. I only saw three or four damaged bales, which were eaten by acid. One of the bales was partly damaged, and I took it on allowance. I purchased some bales from defendants about January 1875. None of them were impregnated or stained. I saw no marks on them. I paid 20 cents a piece for them. I am under the impression that I asked defendants if they had any more like those I had bought. They told me they had. I understood that they were the same kind as I had previously bought, though I did not know that "Hessian" and "Gunny" bags were the same. When the samples were sent to me I did not notice any stains or impregnation except on those that were marked second-hand. Just before the commencement of the trial Mr. Walsh examined some of the bags at my office and noticed some stains on them. He told me the bags were turned inside out. The samples were sent to me by Messrs Walsh, Hall & Co. and examined by me. After the sale was completed Mr. Watson's Chinaman came and took some of them away: the rest remained loose in my office. When the difficulty arose I gathered them together, some from my own office and some from Mr. Watson's, and sent them to Kobe. I collected all of them, with the exception of three which I could not find, or which the tags had been lost from. This was in August and since that time I have not had them. The bags, while in my office, lay on the floor in my muster room so far as I remember. While lying there they were liable to damage from the splashing of water when the floor was washed.

Mr. Dickins said that was his case.

Mr. Ness called John G. Walsh, who, having been sworn, stated:—I am one of the defendants in this case. I recollect the sale of the goods in question. The description of the goods was as per exhibit 4. I furnished samples for all except in two sets, and they were described as similar to lines of which samples had been given. The samples of the goods in dispute in my estimation fully represent the bulk of the goods complained of as they are described in the survey. Some goods have been complained of, of which samples were supplied and have not been produced in Court. The samples not produced fairly represent, I believe, the bulk of the goods they represented. There was no concealment practised by my firm as to the state of the goods. Neither Mr. Watson nor Mr. Wilkin stipulated for the whole lot to be new bags. There was no stipulation about it whatever, except what is contained in exhibit 4. I never assured either of them that these goods were new. I gave them samples and a written description of the lot. The goods were at all times open to their inspection. I did not warrant the bags to be fit for rice purposes and was not asked to, though I had a general notion the plaintiff was about to ship rice. I cannot say that I had a positive knowledge that the bags

were intended for rice. Mr. Watson was talking at that time of shipments of rice to England, Australia, California, China and elsewhere. There were general conversations about it, and I am not sure but there were some shipments being made at that time. I should say that all the second-hand bags mentioned in the Survey are fit for the shipment of rice. I did not for any purpose turn any of the sample bags inside out. The bags have every sign of having been used before, and I should say that it was clear to the senses that the second-hand samples were second-hand. The prices in exhibit 4 do not necessarily indicate that the bags were new. I don't think the weight would have anything to do with the bags being new or not. When Mr. Wilkin first spoke to me and referred to his previous purchase I replied that we had some similar to those; also some others. Mr. Watson was quite aware that others had an interest in the goods besides myself, for I told both him and Mr. Wilkin so. The price on the descriptive list clearly indicated they belonged to different owners. Mr. Watson finally settled the contract, paying 17 cents for our lot and 14 cents each for the other consignments. The conversation I had with Mr. Watson and Mr. Wilkin indicated an absolute knowledge of our being the owners of the 17 cents lot and not the others. Because of their knowledge that we had to remit the proceeds of part of them, and my telling them that payment in sterling would do, it was arranged that payment should be in sterling. The payment in sterling represented the 14 cent parcel less our charges. Exhibit 11 was furnished to the plaintiff before the contract was completed. W. H. & Co. represent Walsh, Hall & Co.; the initials L. & Co. represent Levy & Co., M. & Co. represent Morrison & Co. in Dundee. These people were the owners of the goods. The price obtained for the goods opposite the initial L. & Co. and M. & Co. was 14 cents. For those opposite Walsh, Hall & Co. 17 cents were obtained. We kept part of the money we got from Mr. Watson and sent the balance to the owners. This was immediately after delivery was completed. Part of the Yokohama goods were rejected before full payment was made. Part of the Kobe goods were rejected; as well as I can remember 1,000 or 2,000 bags were rejected. I know this from our correspondence. They were rejected before payments were completed. The customary time for inspecting the goods is when delivery is taken. In order to inspect them it would have been necessary to have opened one or two bales in each lot and if they were not equal to sample to open others; and if all were not equal to sample they would have a perfect right to refuse them. I have read the survey of the goods complained of; and judging from that survey one bale in each lot would have been sufficient to open. The opening of that bale would certainly not have made the goods unmerchantable. I think a bag that has been used for bone-dust may be fit for carrying rice; and I think the bone-dust might be shaken out, but cannot say from experience. The bags complained of have never been returned to us.

To Mr. Dickins:—A demand was made that we take back the bags and repay the price and expenses, with which demand we refused to comply. I have never seen bone-dust shaken out of a bag. Previous to last August I cannot remember whether or no I ever stated the names of any of our alleged principals. I never stated before the 18th or 19th of

August their names in writing, but I gave the initials. We have had bags from Levy & Co. I swear that we received those bags marked in the list from Levy & Co. I don't know whether we have any invoices signed by Levy & Co. We may have. (Some of the invoices were shown.) Those invoices are signed by Henry and Edward M. Levy & Co. The initials L. & Co. on the list I should say were not quite sufficient to indicate to Mr. Watson that they represented the firm of Levy & Co. Unless therefore I made a verbal communication to the plaintiff, he had no means of knowing who the owners of the goods were. I consider that Mr. Watson's remedy, if any, is against the alleged owners, and not against us. We had invoices of the goods alleged to have belonged to Morrison & Co. I don't remember that the heading of Morrison & Co. and Levy & Co. are of a similar kind. (Invoices from Morrison & Co. produced) We have no duplicate invoices of these goods. I cannot say from whom we got the 17 cent bags. I think they were described rice or grain bags, but am not certain. They were not consigned to us but ordered. We are interested in the Eastern Agency Company; I mean individuals of the firm are shareholders. None of the 14 cent bags came from that company. I don't know what E. A. marked on the 14 cents bags means. I don't know whether Henry and M. Levy are bag makers or not. Had I known nothing further I should not have known what L. & Co. meant. I do not know that Morrison & Co. are bankrupt. I know they were in difficulties. In the invoices from Levy & Co. and Morrison & Co. none of the bags are described as second-hand except the 28,500; and those are mentioned in the invoices from Morrison & Co. The bags complained of are from Levy & Co. Mr. Wilkin acted as broker for us and Mr. Watson. I don't remember that I ever told Mr. Wilkin that other bags than the 28,000 were second-hand. I don't think I mentioned anything about stains or bone dust to Mr. Wilkin. I did not know that any of the bags were impregnated by bone dust. I don't remember ever looking at the bags. I did not imagine that we were selling bags impregnated with bone dust during the negotiations. I intended to only sell the goods of which samples were given. I sold the bags on sample. The answer to the petition is entirely true. The plaintiff was not obliged to take the goods if they were not according to sample; and the guarantee was the same as is usual in such cases. My intentions were that the goods should be equal to sample. I did not suppose that the goods were impregnated with bone-dust or second-hand except the 28,000. Had I known so I should not have concealed it. I understood in a general sense that the bags were to be used for shipping rice. I mean "by general way" by what Mr. Watson said and from general report. Mr. Watson might have said the bags were for rice. I informed Mr. Watson that the bags were grain bags. If I had supposed the bags were not fit for packing rice, I would not have concealed the fact from the plaintiff. I supposed that Mr. Watson considered the bags were fit for packing rice in. There may be something in the prices in list 4 to indicate that the bags were second-hand, if they show anything, although no weights were mentioned. When Mr. Wilkin came to me I told him some of the bags were similar to what he had bought before, and that they were a mixed lot.

At this stage the proceedings were adjourned until 10 a.m. to-morrow 4th inst.

Wednesday, April 4th, 1877.

E. B. WATSON vs. WALSH HALL & Co.

(Continued from Yesterday.)

A. O. Gay, sworn, deposed:—I am one of the defendants in this case, and recollect the negotiation which took place and resulted in the sale of the bags in question. To the samples and descripture list I added nothing as to the quality of these goods. The description of the goods sold is to be found in exhibit 4 put into Court.

Mr. Dickens objected to the style of the examination of the witness, alleging that the Counsel for the defence was putting leading questions. The Court supported Mr. Dickens.

Mr. Ness asked His Honour to take a note of his objection to being prohibited from asking the witness whether he had warranted the goods to be fit for rice purposes, as he was entitled to do from the fact that the other side had alleged that the goods had been warranted.

The witness continued:—No conversation ever took place between me and Mr. Watson in which I stated the bags were fit for rice purposes. Some objection was taken, as reported by the Kobe house, to 1,900 bags.

Mr. Dickens objected to the question. The objection was overruled.

Witness:—The last instalment of the money was paid after the rejection of the bags in Kobe. The accounts rendered to Mr. Watson show this.

Mr. Dickens admitted that the last payment was made after some of the bags had been rejected.

Witness:—The main payment was made after the delivery was taken at Kobe and we were advised of the rejection of some of the bags. I have read the survey, and have examined the samples in Court of the lots complained of, of which samples have been produced. These samples fairly represent the bulk of the goods described in the survey. In my opinion second-hand bags are fit for packing rice in if in good order, and I should not hesitate to use them. Some of the samples are stained. Some conversation took place between me and Mr. Watson relative to some of the bags belonging to other persons. I told Mr. Watson, after it had been arranged that sterling drafts should be taken in payment, that it would not be convenient altogether to us, for the reason that part of the goods belonged to others and had been received through a Bank, and that for those cash would have to be paid, and that it would be more convenient to receive cash for our own. Mr. Watson said he had already made arrangements with the Oriental Bank for the payment in sterling drafts. I told him we would take the sterling drafts as far as possible; and at the same time I told him that we could not negotiate the drafts either for our own account, or for the payments to be made to the Deutsche Bank, except at a difference in exchange of an $\frac{1}{4}$ of a penny. Mr. Watson agreed to make that allowance on all sterling drafts. Besides this he agreed to pay cash the amount of our charges in account sales and also the charges of our own bags. I think that was all that was said. The principal charges were godown rent, insurance, duty. I did not have any conversation with Mr. Watson about the prices until after the sale. It is usual to examine goods when they are taken delivery of. In such goods as these, the opening of a few bales would be sufficient in each lot, unless some objection was taken to them. In lots of about 20 bales of new bags I

should probably be satisfied with opening three or four bales if they were found in good order. With regard to second-hand bags I should be more careful.

Cross-examined by Mr. Dickens:—Bales that are not damaged on the outside should be opened to see if they corresponded with the sample. I should not consider it necessary, so far as samples were concerned, to open more bales that showed external damage than bales that showed no damage externally. If purchasers bought goods from our own firm they would take our representations at their own risk. The bales are of considerable size, containing from 400 to 500 bags, and I suppose they would weigh from 600 to 800 pounds. It might be difficult to put the iron hoops on again if once they were taken off. But I believe a large number of the bales had the hoops off them. If the bags had been rejected the expense of repacking them would have to have been sustained by us. It would not have made much delay in the delivery to properly examine the bags. I should think to examine one bale of bags in the condition of the bags delivered here it would not take over fifteen minutes. It would take considerable time to open and repack a bale with iron hoops on. We treated the whole of the bags, so far as the payment was concerned, on the same footing. I probably never used the words that we had "no interest in the 14 cent bags." I don't know that I had any conversation about the 14 cent or the 17 cent bags, and don't know what Mr. Watson might have inferred. The parties to the contract are Walsh, Hall & Co.

Mr. Ness objected. Mr. Dickens asked the Court for permission to press the question. The Court sustained the objection of Mr. Ness.

Witness:—I never threatened legal proceedings against Mr. Wilkin or Mr. Watson. I recollect Mr. Wilkin saying something about a threat. I feel quite certain I never made any such threat. My firm frequently ship rice home. Stained or bone bags I should say might be fit for packing rice, though I cannot say unless I saw the bags. After the last payment was made, the plaintiff declined to take delivery of some of the bags—a few hundred. There might have been a thousand, I am not prepared to swear there were not. Probably Mr. Wilkin might have said the bags were unfit for his purposes. After the first rejection it was understood between us and Mr. Wilkin that the bags should be overhauled and if necessary repaired. They were not accepted finally, nor so far as I know examined. A large proportion of the bags were mended and rejected without any examination. I did not say anything by which Mr. Wilkin could have inferred that I threatened legal proceedings. I told him that he might force us to put this matter in the hands of our Counsel. I did make in one instance an allowance for some of the bags.

Recess till 1.30 p.m.

On the Court resuming in the afternoon, Mr. Dickens continued his cross-examination of Mr. Gay.

Witness:—I did not select the samples personally from the bulk, neither did I examine them before they were transmitted to the plaintiff. I cannot say whether the samples were stained or impregnated with bone dust. I have not personally examined the goods complained of in Kobe. I know the samples fairly represent the bulk of the goods from their description in the survey

report. I don't think the report specifies that the goods are impregnated with bone dust. In looking at the report I find two lots are stated to be impregnated with white dust, and the rest are mentioned as stained and mended. The description of the bags in exhibit 4 does not mention that they are stained or impregnated with bone dust. What I mean by saying that the sample represented the bulk, was that the sample agreed with the description given in exhibit 4. I have the account sales of the 14 cent bags. All the bags are mentioned as arriving in the spring of 1874, and some of them are represented as second-hand besides the 28,500.

To Mr. Ness:—If the goods on inspection are up to muster, the seller has nothing to do with repacking them. I have read the survey report, and examined the samples produced in Court; and those samples fairly represented the description given in the survey. The allowance spoken of was made before payment.

This closed the hearing of the case.

Mr. Ness then addressed the Court:—He said the evidence adduced was simply a record of the carelessness which had characterised the plaintiff in the transaction out of which these proceedings arose. Mr. Watson sued the defendants for the value of 100,000 bags, being a portion of a larger lot purchased from them, and which portion he alleged to be inferior to the quality contracted for. The defendants replied that the goods answered to the full, the description given in the contract: that apart from that fact they sold them for principals in England to whom they had remitted the proceeds before any complaint was made, and they could not be held responsible whatever the bags might now appear to be: that the plaintiff was guilty of *laches* in neglecting to inspect the goods for 3 months, and this delay, especially in view of the fact that he knew of the interest of others before taking delivery, and that the proceeds were being remitted to consignors, exempted the defendants from responsibility even had there been a variance between the sample and the bulk. He did not dispute that a purchaser had to disclose his principal's name if he were to keep himself free, but he argued that the position of a seller was altogether different. While the policy of the law required the divulging of the principal's name in the former case, so as to entitle the seller to follow his goods and recover their value from the receiver of them, the same necessity did not arise in the case of a selling agent to whom no credit was given but who delivered the goods on payment or on credit extended to the purchaser. He referred to Story on Agency, quoting a passage to the effect that a purchaser had no remedy against a selling agent, if the latter, before complaint was made, had parted with the funds to his principal, on the ground of *laches*. He urged that it was the duty and the custom of a purchaser to examine goods on taking delivery, and that to postpone the inspection for three months was unreasonable in any case, but it was ridiculous in the present case, where such a delay took place, in the face of the fact known to the plaintiff, that the goods in question belonged to others, and where the payment was made in a manner to admit of the transmission of the funds to London immediately after delivery was taken. Mr. Ness then pointed out that, as a matter of fact, the goods had been inspected before payment was made, or, at all events, representations as to inspection had been made by the plain-

tiff, inducing the defendants to believe that the bags had been duly examined, and that the defendants were justified in dealing with the funds as if the goods had been found to be in terms of the contract. Certain bags which appeared to be loose and drawn from several bales were rejected, and the payment postponed until these were arranged for. This fact again was evidence of the plaintiff's, or rather his agent's, carelessness; for these loose bags disclosed that the goods complained of were second-hand and formed an index to the quality of the bulk. Each of these defences formed in itself a full answer to the action viz. the defendants were in fact agents, and held no funds of their principals when complaint was made the delay in examining the goods, and that too with a knowledge of the defendants' position was negligence, the consequence of which must be visited on his own head,—and the rejection of a portion which implied approval of the rest. But apart from these positive defences, the plaintiff had conspicuously failed to establish that the goods differed from the description given in the contract while the evidence actually established that they did not differ. The goods were sold by samples accompanied by a descriptive list. It was true the plaintiff desired to add to these, certain representations by the defendants that they were new and fit for rice purposes; but he failed to prove them. He had only a nebulous idea that they were made, while the defendants contradicted his belief, a contradiction in which they were corroborated by the fact that the samples were second-hand. The remaining question was, did the bulk answer the samples and list? They did beyond all doubt. The list was silent as to whether they were new or old—it described some as “new” and some as “second-hand” and thus excluded any implication about the rest. The samples produced of the lots complained of, it was clear to the senses, were second-hand,—they were marked, stained, and mended just as was the bulk complained of; of the other lots the samples were not produced, and the assumption was they too represented their bulk—no evidence was adduced by the plaintiff showing that the samples and the bulk had been compared, and it was idle in the absence of such evidence to ask a variance to be inferred. He then referred to Chitty on contracts to show that when a sale was concluded by sample, a warranty was excluded except as to matters which could not be judged of by sample; and pointed out that the fact of the samples being second-hand was here obvious to the senses. After some remarks as to the fitness of the goods for rice purposes and the absence of any warranty that they should be so, he concluded by asking that the petition should be dismissed with costs.

Mr. Dickens then addressed the Court, and remarked that in the case in question the plaintiff disclaimed that there had been any concealment on his part, while on the other hand he charged the defendants with having used concealment in regard to the names of their principals. The object of the plaintiff in entering into the transaction at all was to do the defendants a good turn. The first point he, the learned gentleman, would deal with would be that of agency. When a person does not show in any way that he is an agent or acting as an agent, it is perfectly legitimate to premise that he is a principal; and on this point both the English and American law did not differ in

any respect, as he would show further on. In a leading case, viz: that of *Thompson vs. Davenport* there were two rules laid down respecting the responsibility of an agent, which showed that where no agency is specifically mentioned, the agent is held to be the principal. And the rules referred to, Mr. Dickens stated, were not made for one party more than the other, as the law was framed for both. He contended that when an agent does not disclose his agency and say that he is acting as an agent, it follows that that person must be regarded as a principal. As to the two rules cited it might not be necessary for him to make any lengthy comments on them, though it might be incumbent to show that the agent himself is not exonerated from all responsibility in every instance. Lord Tenterden remarked in one of the cases quoted, that the Court laid down that, where one of the parties was an agent and did not know the name of his principal, he was liable to be regarded as the principal. The learned gentleman next referred to the case of *Parker vs. Winslow*, where there was a charter party in dispute. This document had been signed by “B,” who was the agent of “A,” but though the document stated that “B” was an agent, nevertheless he was held liable as the principal. There were many other cases of a similar character which would bear out the position he, Mr. Dickens, maintained, but he would not take up the time of the Court in reciting them. There was one, however, which he might mention as it was a very strong case, so strong as to be quite extraordinary, namely that of *Pace vs. Walker*, which, though an English case would no doubt be taken in an American Court. In the case at issue Mr. Dickens desired the Court to remember that a contract had been entered into between his client and the defendants and that all the parties interested were on the spot. It could not be doubted for a moment but that his client had given credit to the defendants. By “credit” he explained that he meant that when a purchaser took goods from a seller, he credited the representations of the goods as reliable. In Kent's Commentary, page 838 of the second volume, precisely the same rules were laid down, though the learned gentleman thought it would be unnecessary to read them. He then went on to say that the fact of the defendants in the present case not having disclosed the names of their principals they were liable to be supposed to be such and treated as such. They had not throughout the whole transaction asserted in express terms that they were agents, but had merely left it to be inferred from marks and initials; though if the plaintiff's attention had been drawn to it there probably was sufficient in the initials &c., to show that others were interested in the goods besides the defendants. Thus the plaintiff had received nothing by which he might have inferred that the defendants were agents, and there really was nothing to show that they were agents. The letter of the 5th of February which had been quoted by his learned friend, Mr. Ness, really amounted to little or nothing. Stress had been laid on the fact that the goods had been received on consignment, but this was no proof of agency, as it simply showed others were interested in the goods. This being clearly demonstrated he would proceed to consider what the contract actually was. It was very necessary to find out what the intentions of both parties were in connection with it, and there was abundant evidence to show that both parties had engaged for, one for the sale and the other the purchase

of, new bags; and the statements of the plaintiff in regard to this were substantiated by the evidence of Mr. Wilkin. Moreover it was plainly apparent from the statements of all parties that the goods were to be fit for packing rice in. It might be asked what he, Mr. Dickens, founded his case upon, and his reply was, upon documentary evidence; and those documents were the letters dated respectively January 25th and Feb. 11th, the latter being the acceptance of Mr. Watson of the conditions imposed by the defendants. These documents were the basis of the contract; and if those documents alone were taken they were sufficient in themselves to show that the plaintiff contracted for the purchase of new bags, with the exception of the 28,500 which were specified as second-hand. With reference to the conversations which had taken place between the parties, the results were on record, and the learned gentleman asserted that His Honor would be able to gather from them as to whether the goods were to be new or second-hand. His learned friend had contended that the goods were not to be new goods. But the defendants themselves admitted that they had no intention of selling other than new bags, except the lot that were represented to be second-hand. Mr. Walsh had said so, and a number of similar statements had been made by Mr. Gay; and under those circumstances it was absurd to suppose that one party was under the impression he was buying new bags and that the other party was of the opinion he was selling second-hand goods. Then again, the price asked for the bags led to the assumption that they were supposed to be new. At first 19 cents each was asked for them, which would be an utterly ridiculous figure to ask for old bags. Then the evidence of the defendants pointed out the fact that Mr. Wilkin had purchased bags from them a year or so previously at the rate of 20 cents a piece; those bags were new, and the circumstance that the lot purchased by the plaintiff had remained a long time in the market took something off their value, and made the price paid by him equivalent to that paid by Mr. Wilkin. The learned gentleman then remarked that he had come to the question as to whether the bags were really suitable for the purpose for which they were required. If the bags were new, then they were undoubtedly fit for the packing of rice; and it was evident from Mr. Wilkin's testimony that the bags were to be suitable to contain rice. It must therefore be taken for granted that the bags were purchased for the express purpose of shipping rice to Europe. At the time the contract was entered into the plaintiff could have imported new bags suitable for his purpose at the rate of 14 cents, and that fact alone justified him in assuming that the price asked by the defendants was a warranty that the goods were new. A further proof of the fact that they were supposed to be new was, that the lot purchased by Mr. Wilkin were new, and when the negotiations took place for the second purchase on behalf of the plaintiff, it was specially stipulated that they should be similar to those purchased by Mr. Wilkin for himself. And now, for the samples. His learned friend had said that the samples produced in Court were up to the goods referred to in the survey report, but that was not the point. The question was, were the samples produced in Court equal to those supplied to the plaintiff? The Counsel for the defence had also referred to some of the samples being stained and to marks etc. But the very fact that marks were inside a bag was a sufficient excuse for his client

not observing them. And those marks were not even known to the defendants until two or three days before the trial. Then the plaintiff was not liable to blame for not perceiving the holes, and that the tags had been lost, any more than the defendants were. And bags that are supposed to be new must be looked upon as such, even though they turn out to be second-hand afterwards. To the assertion that there was no evidence to show that the goods were in perfect order, he submitted that both of the defendants had acknowledged that they did not know they were imperfect. And now the learned gentleman said he had come to a most extraordinary circumstance. Three intelligent persons had contended that bags impregnated with bone-dust were fit for the transportation of rice. Why, they would scarcely be fit to carry dirt in! The bags in Court were stained, and yet it was argued that they were quite up to those in the survey. It was only necessary to consider the question for a moment to see that it was impossible that any person would accept such bags to ship rice in—possible, perhaps, but highly improbable. It was not what the bags turned out to be that should be looked at, but what they were represented to be. There was nothing on the outside of the bags which would lead any one to suppose that they were second-hand; then, if the bags turned out to be not what they were represented and were not up to the sample, the seller would, even if an agent, be responsible. And it was absurd to suppose that the bulk of the goods in question were up to the samples which had been produced in Court; and when the samples were sent to the plaintiff they were supposed by all parties to be new and to represent new bags. The learned gentleman dealt next with the question of inspection. The argument of the opposite side, he said, was that ample time had been allowed for the examination of the goods, and that the plaintiff had no excuse for not doing so. The answer to that was very simple and amounted to this, that the difficulties placed in the way of the plaintiff by the defendants prevented him from doing so. They, the defendants were so anxious to get the money that they would hardly allow a day to pass, and therefore Mr. Watson was bound to take delivery of the goods without giving them a very searching examination. There could be no doubt that if four bales out of every twenty were examined it would have taken some considerable time; and if that had been done the position of the defendants would have been most risky, as the bags might have been rejected, and so subjected them to considerable loss of time and money. The excuse of the plaintiff was that one of the terms of the contract expressly stipulated that delivery should be taken at once, and payment made as soon as possible afterwards, and that had been done. A little delay took place at Kobe, through the inclemency of the weather, in taking delivery, in consequence of which his, Mr. Dickins', client had been scolded by the defendants. Nor could the defendants assume the position that no notice had been given of the inferior quality of the goods; for, according to their own admission, representations had been made to them of the condition of the bags. The learned counsel then commented on the question of payment. He contended that the defendants must have known that some of the drafts were at six months: therefore they had had plenty of time to telegraph and stop payment. The assertions of the defendants relative to pay-

ment did not at all bear out the argument of his learned friend, who tried to make out that the plaintiff had been aware that some of the goods belonged to other parties. But his argument fell to the ground when it was shown that not only was a portion of the price of the 14 cent bags paid in drafts, but also a portion of the payment for the 17 cent bags. He then proceeded to show that if any persons were responsible for the loss attached to the transaction, those persons were the defendants. It would be monstrous, he argued, for the defendants to assume that the proper course for the plaintiff to pursue was to sue the parties alleged to be interested at Home, especially when it was admitted that one of those parties was in pecuniary difficulties. Referring again to the delivery, Mr. Dickins contended that the only assumption that could be arrived at on the evidence, was that 17 cents had been paid for new bags and 14 cents for second-hand. The plaintiff had taken the bags at a higher rate than he could have got them elsewhere, because the defendants at one time had rendered him some assistance. The Counsel for the defence had argued that a portion of the goods was not mentioned in the invoices as either first or second rate, therefore the only inference that could be drawn from such a contention was that those goods referred to must have been either third or fourth class quality. But the necessary inference, after viewing the letter of January and the conversations that had taken place, was that those bags, not described as second-hand, were new. Not only that, but it was a fact that the majority of the bags were expressed as new; and those that were not mentioned as such were about the same price; and any person looking at the list would very naturally conclude that the prices represented new bags. Leaving the question of agency, Mr. Dickins summed up his remarks by saying that the whole affair was an unfortunate one for his client and would have the salutary effect of making him more cautious in the future how he credited the representations of goods. Taking the whole of the facts of the case it was plainly evident that the fault in the present instance rested entirely with the defendants. There was nothing to prevent them from disclosing the names of their principals, and as they did not do so, it was not to be wondered at that they were taken to be the principals. They could not blow hot and cold at the same time, nor clothe themselves in the garments of principals when they were only acting as agents. Moreover they had threatened to take legal proceedings, which proved plainly enough that they did not think of denying they were principals until after it had been found out that the bags were bad. And it had been clearly shown that when the goods were found out not to be according to representation, notice was given to defendants. There had been no time to examine the goods before, on account of the extreme anxiety of the defendants to complete the transaction. He contended that it was not usual in Yokohama to open the bulk of the goods. Mr. Wilkin, who had been Chairman of the Chamber of Commerce, had given his opinion that it was quite unusual, but he, Mr. Dickins, would also appeal to the general knowledge of the Court. In a mixed lot it might be right, but in a case like the present it would have been an impropriety on the part of his client. It was absurd to say that the samples delivered to the plaintiff were impregnated with bone dust; and that the contract was other

than represented by the plaintiff. The learned gentleman then commented on the quality of the evidence, and said that all the assertions of the defendants were of a vague character, and in reality bore out the statements made by the plaintiff. He considered that the defendants by holding themselves up as principals had incurred liabilities which were wholly unnecessary. There could be no question but what the intention of both parties was that the bags should be perfectly new and equal to the samples. He claimed on behalf of his client that the defendants were liable as principals:—as such they had entered into a contract for the supply of new bags for exporting rice; that 97,000 of those bags had turned out bad; and that the plaintiff was entitled to have the price of that number returned with all charges. He left his case confidently in the hands of the Court.

His Honour reserved judgment.

The conclusion of Mr. John G. Walsh's cross-examination by Mr. Dickins was omitted above, at the commencement of page No. 24. It runs as follows:—I always told Mr. Watson and Mr. Wilkin that others were interested in the bags as well as we. There were different interests in all of the bags, and I told them so. I told them that the 14,000 belonged to us and the balance to other parties. I never intended to keep the names of my principals secret. We were never asked for the names, and we had no reason to give them as it was a cash sale. It is customary to abstain from giving the names of principals in such instances. I think exhibit 4 was written at the commencement of the negotiations, but do not know if it was written specially for Mr. Wilkin or Watson. Exhibit 11 was written on the 19th January 1876 especially for Mr. Watson and Mr. Wilkin. The column headed "account of" was intended to point out that some of the bags belonged to Walsh, Hall & Co., while the remainder belonged to others. It was our intention from the first not to take any responsibility, after the delivery, for the 14 cent bags. I don't know that I ever told Mr. Wilkin or Mr. Watson that I disclaimed all responsibility for the 14 cent bags. Exhibit 17 is a letter from Mr. Wilkin to us. I observed the phrase "sold for you." I never objected to that assumption on the part of Mr. Wilkin, who wrote the letter. I think we never stated ourselves as agents in writing or signed any letter until the 19th of August. Mr. Wilkin knew that we were agents on the 25th of January, as I told him that 74,000 were ours and the balance belonged to other people. I don't remember stating to him that I had no interest whatever in the 14 cent bags, that is in so many words. It was not under the circumstances a natural impression, on the part of Mr. Wilkin, that others were interested in these bags besides ourselves. I did tell Mr. Wilkin that the 14 cent bags belonged to other parties. I do not recollect using the word "commission" to Mr. Wilkin. Consignments are very often on joint account; but I cannot say that they are more often so than on commission. The reason why a higher price was asked for our own bags, was because Mr. John Robertson suggested it; and partly on account of the difference in the quality. The 74,000 were entirely new and all of the same kind, therefore they were worth more than a mixed lot would be. I believe they were all bought from

Levy & Co. They were all new bags; and judging from the price Mr. Wilkin paid for them they were worth 20 cents each at the time they arrived in Yokohama. I don't know whether they were of better quality than the bags referred to in exhibit 4. Part of the consideration on which Mr. Watson agreed for 17 cents for the bags, was on account of the fact that I had assisted him in shipping rice. (Invoices of Levy & Co.'s consignment were put in and marked exhibit 19.) All the samples delivered were drawn from the bulk, and I know therefore that the missing samples fairly represented the bulk. I did not draw them myself, and therefore have no personal knowledge that they were drawn from the bulk, and I never compared them. Neither have I any personal knowledge of the whole of the samples having been drawn from the bulk, inasmuch as I did not draw them myself. Not having examined the bales I did not see anything to lead me to judge as to the quality of their contents. The 14 cent bags arrived in the spring of 1874, and were then worth 18 cents or 20 cents a piece. In buying goods on sample I should take steps to see that they were according to sample, unless I had some special guarantee. If I did not know that the goods were a consignment and was dealing with a respectable house who represented them to be up to a certain mark, I might take them without comparing them with the sample, but it would be at my own risk. I would have allowed Mr. Watson to open as many bales as he liked and have taken them back if they were not up to sample. The reason why we treated for payment to be made immediately on the delivery of the goods was because a part of the goods belonged to other parties. We have copies of the account sales in our office. Part of the drafts on London were on Walsh, Hall & Co., but I do not recollect on whom the balance were drawn. The payments in some instances if not in all included probably the prices of the 14 cent and 17 cent bags. The money to Levy & Co. was remitted through the Eastern Agency I think. We remitted the money that way because it was convenient for us to do so. The consignment was made through the Eastern Agency; and therefore it was natural to remit the money through them. I think we got a letter from Morrison & Co. complaining of our sending the remittance through the Eastern Agency. We did not remit through the Eastern Agency to protect our own interests. We might have done so to protect the interests of the Eastern Agency though. I cannot say for certain. The letter dated 9th May, 1876, is from Morrison & Co. to us. (Letter put in and marked exhibit 20.) A considerable portion of the price for the 17 cents bags was paid by drafts.

In H. B. M.'s Court, Kanagawa.

Before H. S. WILKINSON, Esq., *Acting Law-Secretary.*

Tuesday, March 27th, 1877.

KONDO HIKOYEMON and HAKII SEIJIRO vs. J. E. CARTER.

(Adjourned from the 14th instant.)

This was a claim for the return of \$360, money delivered to defendant by plaintiffs as security for the carrying out of a contract which was never fulfilled.

On the last day of hearing this case was adjourned at the request of the defendant in

order that further steps might be taken to find out the men whose evidence was so material.

This morning Koboyashi Masanori was called, who deposed:—I am a dealer in piece goods. I do not know anything of the defendant. I do not know Koboyashi Hidetaro. Until about five years ago I was called Koboyashi Hidetaro, but about that time changed my name. I was arrested by the police in Tokio on suspicion of being concerned in this case. The result of an investigation was that I was released. I know nothing of the present case, neither am I acquainted with a man by the name of Koboyashi Hidetaro. I cannot say whether the name is a common one or not.

The defendant stated that he had no questions to ask the witness as he had had nothing to do with the case.

The plaintiff also testified that the witness was not concerned in the transaction.

Another man, name Kawamura Hideharu, was then put in the box, but the defendant on being questioned said that, though he knew the man, the witness had not had anything to do with the transaction. The witness himself said he went on one occasion to the house of Hakii in company with two persons named Hanawa Kaijiro and Murata Seijiro, but it was not in connection with the contract with Carter but for pleasure. He deposed further as follows:—I was acquainted with Hanawa Kaijiro, but did not know anything of Murata Seijiro before. I have been examined relative to this case by the police. Hanawa may have gone to Sendai or Hakodate, though I have no reason for supposing so, except that his father lives in Sendai. I also heard that Murata Seijiro had gone to Hakodate. I only went to the plaintiff's house on one occasion. I did nothing then but look at some pictures and walk about. No conversation of any importance took place. There was some talk about borrowing some money from an Englishman in Yokohama, but the name of the person referred to was not mentioned. Nothing was said about it except that the houses were to be given as security for the money which was to be got from the Englishman. We called at Kondo's house before going to Hakii's, and he, Kondo, went with us. From what I saw I judge it was Kondo's first visit. Murata appeared to be acquainted with Kondo. I was personally acquainted with Murata Seijiro before the occasion referred to. I should say Murata has gone along with Hanawa. I never heard Hanawa call himself Koboyashi Hidetaro. I am still under the surveillance of the police.

The plaintiff, Kondo, was asked by the Court whether, on the occasion of the visit referred to by the witness, he had seen anything of the three men before. The witness, he said, was represented as Carter's banto.

Hakii, the other plaintiff, said the witness was the man who came with the other two at the beginning of the transaction.

The witness Kawamura said that he was unacquainted with the defendant.

Mori Shigesbiko, a police officer, stated:—Enquiries have been made for Koboyashi Hidetaro. The first the police knew of the affair was when the plaintiffs came and lodged a complaint against Carter. I explained to them the best course to pursue, and gave them a form of complaint. After that I knew nothing of the case until receiving a letter from the Consulate on the 5th instant, requesting that the missing men should be searched for. On the receipt of this letter, enquiries were set on foot. Up

to the 14th nothing was heard of the whereabouts of the three men. After that, the man who goes by the name of Koboyashi Masanori, was found to have been formerly called Koboyashi Hidetaro. I did not think there was sufficient evidence to warrant his being compelled to come from Tokio to Yokohama, but as he came on private business, the opportunity was taken to examine him. Afterwards a clue was found to the whereabouts of one of the other men, and a policeman was despatched to make enquiries. He could not be found, but a friend of his was interrogated; and in the tobacco pouch of this friend, a piece of paper was found with the address of Kawamura upon it. This address was not his actual place of residence but was the address of a place where he usually resorted; and, by the aid of the metropolitan police, he was ultimately arrested. I communicated with my brother officers in Sendai, and the man will be examined but I cannot say when. I can telegraph to Sendai if it is necessary.

The Court asked the defendant if he wished for the case to be further postponed for the production of the witness from Sendai. He replied that he would ask for the case to be dismissed as it had been adjourned four times already.

Neither the plaintiffs nor defendant had any further evidence to bring forward, so His Honour announced that he would give judgment at 10 a.m. to-morrow (28th.)

JUDGMENT.

The conclusion I arrive at upon the evidence is that Murata Seijiro and Hanawa Koichiro, calling himself Koboyashi Hidetaro, falsely represented themselves to the plaintiffs as acting for the defendant and to the defendant as acting for the plaintiffs, and that the plaintiffs and defendant believed and acted upon these fraudulent representations; that Koboyashi Hidetaro fraudulently misinterpreted the conversation and mistranslated the writings which passed between the plaintiffs and the defendant. I find that neither of the parties was prepared to carry out the contract as understood by the other, and I therefore consider that the plaintiffs are entitled to recover the deposit. On another ground, moreover, I consider they are entitled to recover. I find that the defendant refused to complete the contract unless the plaintiffs produced the two men, Murata Seijiro and Koboyashi Hidetaro, being no doubt under the impression that these men were the agents of the plaintiffs, while the plaintiffs could not find them and believed that they were respectively the agents and servants of the defendant.

It appears to me that, however wise a precaution it might have been on the part of the defendant to have the two men in question present at the completion of the loan, he was not justified in making their presence a condition to the fulfilment of the contract, and I consider that the plaintiffs were justified in considering the contract rescinded, and are entitled on this ground also to recover the deposit.

It is to be observed, moreover, that the defendant has in no way been damaged by the misunderstanding. He has not parted with his \$1,000. If he had paid it through the intervention of the so-called Koboyashi Hidetaro, the probability is he would have lost it altogether; if he had paid it direct in the face of the notification of H. M.'s Chargé d'Affaires, of the 11th of June, 1872, it is probable he would at least have had great difficulty in realising his security.

I do not consider that this is a case for interest and there will be no costs.

Let the defendant within ten days pay to the plaintiffs the sum of 300 yen and deliver to the plaintiffs the promissory note for 60 yen delivered to him by the plaintiffs, or failing then pay to the plaintiffs a further sum of 60 yen.

In the Judicial Court of Kanagawa.

Before Mr. ASAINA KANSUI, Vice-President.

Wednesday, March 28th, 1877.

C. BRAUN vs. KAJIRO SHOKITSU.

The plaintiff in this case claimed that the defendant be compelled to take delivery of certain goods to the value of \$6,000.

Mr. Dickens appeared for the plaintiff.

The hearing was continued this afternoon from the 26th instant.

His Honour said the defendant argued that, according to the plaintiff's admission, as the goods were made by machinery there would be a difference in some of the pieces, but that as he, defendant, had agreed to purchase goods according to a certain sample, they should not differ in any respect.

Mr. Dickens said that what he had admitted on the last day of hearing was, that there might be a difference in one or two pieces out of a thousand. And as to the remark about purchasing according to sample, that did not apply in this instance as the contract was not made by sample but by a special brand. If the defendant would produce the 500 pieces he had bought and compare them with the 5,000 pieces, and if there was any actual inferiority in the larger number to the smaller, then the plaintiff would withdraw the case. In selling 5,000 pieces they never intended that they should all be equal to the best piece that might be taken out of the 500, but according to the average.

The defendant said that it was quite true that the 5,000 pieces were not to be up to the best of the 500 but merely according to the average. But if there was no sample in existence how would it be possible to ascertain whether they were equal to the 500.

Mr. Dickens explained that the answer was simple enough. The contract was made for the 5,000 pieces to be according not to one piece in particular but to the whole of the 500 piece.

The defendant contended that, if that was the case, it would have been necessary for him to keep the 500 pieces until the arrival of the 5,000 pieces.

Mr. Dickens remarked that that was the defendant's look-out. The understanding was that the 5,000 pieces were to be of the same size, quality, and brand as the 500 which the defendant had purchased formerly.

The defendant contended that it would be impossible for him to keep all the 500 pieces; therefore a sample had been kept and was in his possession. And if the plaintiff would produce 5,000 pieces according to that sample he was willing to take delivery of them.

Mr. Dickens gave an unqualified denial to the statement that a sample piece existed. It was not customary to sell such goods according to sample unless they were in the godown. They were usually sold by weight and marks; and in the present instance no sample had been used. He then produced the original contract for the 500 pieces and wanted to know how the price could be settled if there was no sample.

Mr. Dickens explained that it did not need a sample in order to fix the price, as the

goods were well known, and of course the price was a matter of arrangement between the buyer and the seller.

In answer to a question put by Court as to whether the plaintiff admitted that there was a slight difference in some of the goods, Mr. Dickens replied that it was impossible to make two things exactly alike in every respect.

A witness for the defence stated that he had called on the plaintiff on the 13th or 14th of January and that he, plaintiff, said there was no difference in the goods, and if he liked witness and another who was with him could go to the godown and examine the goods for themselves. They went to the godown and the Chinaman opened some bales and they then saw that a number of the pieces were bad. The bad pieces were shown to the plaintiff, and he then demanded that a sample of the 500 pieces which were formerly sold should be produced. The witness remarked that if he did so the plaintiff would keep the sample and not return it to him. However a sample was ultimately sent for and shown to the plaintiff. They pointed out to the plaintiff that there was a difference in the quality of the goods and the sample. He admitted that there was a slight difference, but said that it would not amount to more than half a cent. per piece. They said there was more than that difference in the value of the goods and the sample; and ultimately the plaintiff offered to take off 25 cents. per piece. The plaintiff then walked away and shortly afterwards the banto came and said it was better to make some compromise. On the 30th the witness said he got a letter from the plaintiff's banto saying it would be better to come to some arrangement, but not being very well he did not accede to the request. The letter referred to was then read.

The Witness, to Mr. Dickens:—I can tell which is good and which is bad if two pieces of shirtings are put into my hands. I have had transactions with Mr. Braun, but not in my own name, therefore Mr. Braun might not be personally acquainted with me. I saw him upstairs on one occasion. I told Mr. Braun that as the goods were inferior I would like to see them. I examined the goods before I saw Mr. Braun. It was before twelve o'clock when I saw the goods. Mr. Braun was not present when the goods were examined in the godown. There was no one in the godown except myself and the Chinaman at the time. Mr. Braun did not say anything to me personally on the 13th of January. Mr. Braun said in my hearing that he would allow a reduction of ten cents. He said so to me and also to Chiusike. Mr. Braun offered five cents at the beginning of the interview but afterwards he promised a reduction of ten cents. Kashiwo would not accept the reduction of ten cents and I do not recollect that Kashiwo suggested a further reduction should be made. Mr. Braun was present when the bulk of the goods were compared with the samples. I bought 500 pieces of shirtings and have sold all but three pieces. I did not get quite 500 pieces; there were one or two kept back, but what for I cannot say. I have not any pieces left now. I had three but have disposed of them recently. There was no difference in the width but there was in the colour, one being a little dirty while the other was clean, and there was an apparent difference in the texture. About the middle of January the price of shirtings fell slightly. I don't know that the market

had fallen 30 cents per piece. If the market was such that I could have made a good profit by taking the shirtings, I would not have taken them.

The plaintiff's banto was now examined and explained about the sending of the letter to the last witness. In reply to questions put by Mr. Dickens the witness said:—On the 29th of January I wrote a letter in compliance with a request from Mr. Braun to the defendant, threatening legal proceedings. I recollect Maiyeda coming to No. 30 on two occasions. I never heard Mr. Braun offer a reduction of five rin or ten cents. to Maiyeda. Mr. Braun did not authorise me to write the letter put into court, neither did he acknowledge it after.

Mr. Dickens said that he wished the court to understand that the plaintiff disputed what had been said by the last witness for the defence. He never offered any reduction, never had anything to say to the witness, and was not present at any examination of the goods in the godown. He did examine some of them up stairs and those were in good order. Kashiwo brought some from his own house, which was part of the 250 he had already taken delivery of, and objected to them. These Mr. Braun examined and found to be of good quality. Some more were brought up at the same time from the plaintiff's godown, but whether Kashiwo objected to them or not he could not say; but they were quite good at all events.

The case was adjourned *sine die*.

Friday, March 30th, 1877.

G. GONDAREAU vs. SATO ICHITARO.

The plaintiff sued for the recovery of \$600 alleged to have been lent to the defendant.

G. Gondareau stated:—In the month of June last year I lent the defendant the sum of \$600 at an interest of $2\frac{1}{2}$ per cent per mensem. The principal was to be returned in August. I received in security for the money a quantity of porcelain. When the money fell due the defendant was unable to pay it, and I granted him a month further. At the end of that time, as the money was not paid, I applied to my Consul for permission to sell the porcelain, which was granted. But defendant came and petitioned for a further respite which I granted to him, though I had prepared to send the goods to auction. In order to obtain the last delay, defendant handed me a bill of sale, according to which the porcelain had been sold to another person, but I believe this to have been a fictitious document. On the 14th of November I sent the porcelain to auction, and it realised the sum of \$290.20. Defendant then promised to pay the balance at the rate of 60 yen per month, but he failed to keep his promise. I therefore demand that he be ordered to pay interest at the rate of $2\frac{1}{2}$ per cent per month from the 15th of November on the 600 yen, godown rent, and other expenses to which I have been. At the time I loaned the defendant the money a clause was inserted in the bond by which he made himself responsible for any part of the money. He said there were others concerned in the transaction.

The defendant's Counsel then made a few remarks and said that he had witnesses to prove his statements. His Honour said that he would adjourn the case until Thursday, 5th instant, when the defendant's witnesses would be examined.

Monday, April 9th, 1877.

G. GOUDAREAU vs. SATO ICHITARO

The first hearing of this case was on the 30th ult., when the plaintiff asserted his right to the recovery of \$600, money he had lent to the defendant, and for the security of which he had accepted a quantity of porcelain. The money not being returned, the porcelain was sold realising only \$290, and the present action ensued.

To-day the case was continued, and the plaintiff produced several witnesses to prove that he never opened the boxes until the goods were sent to auction; and when they were opened a quantity of the porcelain was found to be broken.

The defendant's counsel said that his witnesses were far away at the present time and could not be produced to-day. He contended that the plaintiff was responsible for the broken porcelain. In connection with this argument he produced a counterclaim for \$496, which he alleged was the value of the goods damaged while in the possession of the plaintiff. Some of the pieces of porcelain, which had realised 80 cents at auction, in this contra account were valued at \$15 each. As the whole of the porcelain only realised \$290, His Honour declined to entertain the counterclaim.

In reference to the responsibility of the plaintiff for the breakage, he, plaintiff, denied it. He admitted that he was responsible for any damage that might have occurred through fire and that was all.

After hearing all the evidence His Honour announced that he would reserve judgment.

About half-past five o'clock yesterday afternoon, Commander Joseph D. Marvin, of the U.S. Navy, and in command of the sloop-of-war *Alert*, shot himself on board his vessel. The ball penetrated just above the right ear, and, passing through the head, came out on the opposite side. An inquest was held on board in the evening, but the proceedings have not been made public. The deceased was buried this afternoon with the usual honors; and the flags of the shipping have been at half-mast all day. Commander Marvin was about 40 years of age, a native of Ohio, America. He entered the navy in 1856, and was valued as a highly efficient officer. On his returning home from this cruise he would have been about the first on the list for promotion.

Shipping.

Per Frch. str. *Tanais* for Hongkong:—Messrs. C. Deisenheimer, J. W. Gottze, J. Bruinier, Ch. Dres-er, Mornat, Thomson, Joquel, Sara Gallet, Barthelet, Mönier, Vaquez, Barberot, A. B. Berggren, and Tong Chung.

Per Brit. str. *Sunda* for Hongkong:—Mr. H. E. Browne; and 2 Chinese in the steerage.

REPORTS.

The American steamer *City of Tokio* reports:—Left San Francisco 3rd March, with 22 Cabin, 1 European, and 160 native steerage, passengers, 1,439.40 tons Cargo; \$371,030.32 Treasure, and 24 packages U. S. Mails.

The British steamer *Belgie* reports:—Sailed from Hongkong, at 3 p.m., on Tuesday, April 3rd, 1877. Fine weather and light N. E. moonsoon to Turnabout. Thence to Yokohama variable but for most part light easterly winds and rain. Approaching the coast thick weather and fog. At 7.04 p.m. passed Sagami. 7.56 p.m. passed Kanonaki. 9.10 passed Treaty Point. 9.30 anchored in Yokohama harbour.

Yokohama Market Report and Prices Current.

STAPLE IMPORTS.

Since our last report, dated 29th ultimo, the market has been quiet, with some little enquiry for 28/32 Water Twist, other counts being almost entirely neglected. Goods now arriving have cost much more than those in stock, and as a consequence holders are much firmer, and decline selling except in cases of necessity. Shirtings show an improvement to the extent of about 10 cents per piece for certain chops, but the offers are still too low for business. The steamer which sailed for Shanghai on the 8th instant was quite full, a large quantity of imported cotton goods having been forwarded on to China. Sugar shows an advance; and a fair business has been done at quotations. Arrivals of Iron are largely in excess of demand.

The barques *Laurel*, with coal from Cardiff, and *Punjab*, with general cargo from Liverpool, and the steamers *Radnorshire* and *Viking*, with general cargo, from London via Hongkong, have arrived. Transhipped cargo ex steamers *Hesperia* from Hamburg, *Craigforth*, *Euphrate* and *Nepaul* from London, and *Djemnah* from Marseilles is also to hand.

ARTICLES.	PRICES.	REMARKS.
COTTON PIECE GOODS.

Yokohama Market Report and Prices Current.

STAPLE EXPORTS.

SILK has been very quiet during the past fifteen days, and only some 250 native bales have been sold at a trifling reduction on last quotations. The selection on hand is very poor, and the season may be looked upon as closed. The Stock in dealers' hands is about 3,000 native bales.

TEA.—Our market may be considered as closed for current season, settlements being quite nominal and arrivals for the present almost suspended. The weather continues fairly favorable and first samples of New Crop may be expected about a fortnight hence.

DESCRIPTION.								PRICES PER PICUL.	REMARKS.

The Japan Gazette

MAIL SUMMARY, SHIPPING AND MARKET REPORT.

PUBLISHED TWICE A MONTH.

Per P. M. Str. "City of Tokio."

YOKOHAMA, SATURDAY, APRIL 21ST, 1877.

Single Copy, 25 cents.

THE

"Japan Gazette" MAIL SUMMARY.

FROM 12TH TO 20TH APRIL, 1877.

DEATHS.

On the 13th inst., at his residence No. 133, Bluff, suddenly, WILLIAM RANON, a native of British India, aged 46.

On the 16th February, at Brook street, Hawthorn, Melbourne, SAMUEL PARRY, Engineer, late of Yokohama, Japan, aged 68 years.

OUR last Mail Summary was despatched per O. & O. Steamer *Belgio* which left this port at daylight on the 13th instant. Since the date of publishing we are in receipt of the following mails:—

	DUE.	ARRIVED.
French Mail	April 15.	April 12.
American "	—	April 13.
English "	April 17.	April 18.

Latest dates are:

London.....	Letters	Mar. 2.

New York ...	Letters	Mar. 12.
	... Telegrams	Apr. 19.
San Francisco	Letters	Mar. 21.

Summary.

SINCE we last wrote, the insurrection of Satsuma samurai has not been suppressed, far from it; but it has assumed an entirely new phase. The garrison of Kumamoto, after fifty-two days siege by the insurgents, who in their turn were said to be completely surrounded by the imperial forces, effected, by means of a sortie of three hundred men headed by Colonel Oku, communication with General Kuroda's army. As it turned out the intervening country was entirely open, having been vacated by Saigo's men some days before. The insurgents, either finding that they were experiencing a resistance for which they had not looked, or no longer attaching the same importance as before to

the capture of the fortress, in spite of the encircling armies of imperialists, withdrew, by a concerted movement, from the forts and positions they had occupied around Kumamoto. Not only were they not obstructed; but their movements appear to have been entirely unknown to their foes; and they have had plenty of time to retreat to and encamp among the rocky fastnesses of the mountains of Kiyama in the province of Hiu-ga, between Kumamoto and Kagoshima. Here it is evident that they mean to make a fresh stand; and a long and bloody conflict must ensue before they can be dislodged. Should they find themselves pressed too hard they will have two courses open to them, either to vanish, as they have recently done, but to reappear on the scene of their former resistance, or to fall back upon Kagoshima, where it is asserted that the very stones will rise against an armed invasion of the soil. It is painfully apparent that, after all the blood shed and treasure expended in the campaign which has closed with the withdrawal of the insurgents from the siege of Kumamoto, the imperial cause is as far from a decisive triumph as it was when the civil war commenced. Meanwhile the hospitals are encumbered with wounded men, the killed may be counted by thousands, the money expended is unknown but must be enormous, and the injury wrought to the industries and advancement of the country are incalculable and will take long to repair. Now even more than ever a compromise is to be desired, and all are agreed that if concessions on the part of the government would stop the strife—such concessions as it is supposed Saigo has asked for—they should be granted. It is worth more than passing notice that the government with which the once most loyal, but now insurgent marshal, was before the revolt in earnest communication, have not made known what he asked for, and why, with such fearful results, his demands were refused. And so long as nothing is said to eradicate the belief among natives and foreigners that all he required was some needed reforms, and a change from what has become all but a personal to a representative government, so long will sympathy be felt with the Satsuma chief while he is in the field, and compassion for his discomfiture should he be overthrown. Fresh levies of troops continue to be made

throughout the empire, and all available men, soldiers, police, and now volunteers, are forwarded to the South, where a renewal of the carnage which has ceased for a breathing time appears inevitable.

THE Committee of the Yokohama Racing Association, in view of the inconvenience attending the holding of two race meetings each season, submitted to the Yokohama Race Club a proposition for an amalgamation of the two Racing Societies. This was considered at a meeting of members of the Club, when it was decided that an amalgamation before the now rapidly approaching meetings was impossible; but that a scheme would be prepared for consideration after the next general meeting of the Race Club or in about two months time. So that the Club and the Association will again have separate races in May.

CASES HAVE been heard in the British Provincial Court, against the Captain of the *Viking*, arising out of damage sustained by inward cargo in that vessel. Reports of these cases and our comments upon the point which they involve will be found, the former in the law reports and the latter in an article headed "The Bill of Lading," in this summary. The ruling of the Yokohama Court was that the express condition, "received in good order," may be re-opened as between the ship-owner and the shipper, the consignee, without valuable consideration, standing in the place of the latter.

PAYMASTER Charles P. Thompson, U. S. N., who only arrived in Japan per *City of Tokio* on the 30th ult., has made an attempt, fortunately frustrated, upon his own life at Kobe.

THE U. S. Flagship *Tennessee* is now in this harbor. The French corvette *Talisman* has gone to Kobe, having been replaced in Yokohama by the *La Clochette*.

THE old American Legation Lot, ground and buildings, on the Bluff brought only \$2,100 at public auction.

UPWARDS of \$3,400 has been collected, in Yokohama and Tokio, in aid of the Shantung Famine Relief Fund.

EIGHT horses and one hundred merino sheep, rams and ewes in equal proportion, have been imported from San Francisco for the government stock farm at Shimosa.

THE P. & O. steamer *Massilia* has been chartered by the Mitsu Bishi Company.

RACING.

OUR contemporary the *Japan Weekly Mail*, having broken the ice of reserve with which the subject of racing has been covered during the past six or seven months, we have but little hesitation in following so good an example. The "storm in a tea cup," or in plain words the squabbling of the rival race clubs, has for sometime past been unanimously scouted, even as a subject of after dinner conversation, but in view of the influence which the sport has upon the younger members of this community for very little good and very much evil, it becomes the duty of a newspaper to represent as faithfully as it can, the opinions of those whose experience lends weight, and whose disinterestedness gives influence to remarks, which are well worthy of being deeply considered and carefully followed. In doing this, we have no wish to write a homily, to quote mock sentiment, to condemn the sport of racing as injurious to morality, or to favor any one set of views over another. It is also absolutely unnecessary to trace the origin of the Race Club, or the grounds of the dissension which, taking its rise in 1870 or 1871, was surely and steadily fomented by the supercilious and imperative manner with which the majority of the old body vetoed every proposition for reform urged by the minority of the Yokohama Race Club, and which ended by the secession of some of the most popular and respected members, who speedily and easily formed an Association now increasing so rapidly in strength as to ensure the dissolution of the older body, and the establishment of the reforms to which years of labour were vainly devoted. That the Association has inaugurated reform, where reform was immensely wanted, very few right-minded, impartial men will deny, but at the moment we are inclined to think with our contemporary that the time has arrived when the major principles being secured, the minor differences might, with advantage to the public, be dropped out of sight and the Race Club become merged into the Race Association.

The blots which have stamped their curse upon a noble sport in Yokohama have been the selling lottery system and the indiscriminate scratching of ponies without even an hour's notice. Every resident will remember, and if he should not do so let him refer to any old race book, the regularity with which large stable owners entered their entire stud for each event: how before the races the lotteries were held in clubs and hotels: how the green men bought blanks and the knowing ones prizes: how the order of the running depended upon the purchases at the preceding day's lotteries: how men (*in vino veritas!*) have openly accused individuals on the race course of having scratched all the ponies they could not secure for themselves, and staked the honour of their stable and colours upon a horse, which, looked upon as a rank outsider and known to be inferior in every respect to the others entered, was sold for a mere song and purchased by the owner: how the names of men, in otherwise excellent repute and standing, have been associated with innuendoes of the most dishonorable class; and how, whether true or untrue, well-founded or without foundation at all, a certain amount of credence was attached to the rumours; and a general air of dissatisfaction, an increasing shadow, over-spread each successive meeting. At last public opinion grew decided, and lotteries fell into disfavor. A movement was set

on foot which abolished the practice of holding lotteries in the United Club, a practice, which afterwards restored, was subsequently again, and let us hope finally, discontinued. Relegated to hired rooms in hotels, and organized by speculators, lotteries made a last stand, and now, weakened to the last degree by the scenes which took place at the late autumn meeting, they may be looked upon as moribund, if not absolutely dead and of the past. The Racing Association, representing a majority of those members of the community at all interested in racing matters, dealt, however, the chief and most deadly blow at the lottery system, by adding to their rules three additional by-laws*, the importance of which was not at first seen or appreciated. We have italicised the last half-dozen words in the third by-law, and our sporting readers will readily understand why we have done so. The declaration or alternative provided for in the first and second by-law *must become public* on the evening of the day before the races are held, and, consequently, before the lotteries are drawn: he who is not in the mysteries of the expected performances of the following day, will at least have the satisfaction of knowing the *first* event for which each of a batch of ponies must run to be qualified to win at all, and, protected in this respect, he has no further ground of complaint, but rather excellent cause for rejoicing, that the ponies he buys against the owner or his agents, are not certain to be all "dead heads." It is rumoured that the by-laws we have quoted are a stumbling block in the way of amalgamation, but this we are disinclined to believe: we are foolish enough probably to cling to the notion that amateur racing men are a class distinct from professionals, and race for honour and not for money. Certainly, the past is calculated to shake our faith in this respect, but we look forward with confidence to the future for its complete restoration. It is also rumoured that the system of ballot should be again introduced if the two clubs amalgamate. We can only say, if the Race Club should make this condition a *sine quâ non*, union is absolutely impossible. The absurd distinctions of class in a general community of traders have been carried much too far: in racing, boating, athletics, cricket and every manly amusement, this abominable system exists, and forces us to the conclusion that the exclusiveness which needs such carefully devised protection from the outer snobs, must be of a painfully fragile description. The aristocratic horror of the Norfolk-Howard, who should catch a crab in presence of his fellow clubman Smith, or be bowled out by Jones, is perhaps for something in its origin. It is time these barriers against common sense, good feeling, and fellowship should be removed,—peaceably, if possible—but removed; and, in discarding the principle that the race ground could be held by a few who should admit others upon sufferance, the Race Association only reflected the determination of a body resolved to assert itself

at last. It is therefore fairly evident that a better future is before the Racing community, and a chance exists of the settlement being purged of the slanderous accusations which we have alluded to; but it is evident that the rules of the Association are so sound, and rest so securely upon public opinion, that their continuance is certain. The Committee who framed them are still in office; and, while thanking them for what has already been done, we can assure them of the warm support with which their policy will be endorsed by a public meeting of the members of the Yokohama Racing Association.

THE EFFECTS OF THE RELIEF OF KUMAMOTO.

THE news of the raising by the Imperial troops of the siege of Kumamoto has been confirmed; and the fact is now placed beyond a doubt. The operations which culminated in this unquestionable strategic success for the government arms have been reported in detail; and we learn now that prompt measures are being taken to re-establish the affairs of the province of Higo in the condition in which they were before its occupation by the insurgents. The Kencho has been re-opened in the town of Kumamoto, order is being restored, and Prince ARISUGAWA-NO-MIYA, Commander-in-Chief of the imperial armies has himself, probably, by this time taken up his residence in the castle, which will henceforward be his head-quarters, and the basis of his future operations against the rebels. The latter, it is apparent, have entirely evacuated the province of Higo, the roads and passes of which have been the scenes of so many sanguinary battles, and retreated towards the mountains of Kiyama in the province of Hinga, South-East and a considerable distance from Kumamoto.

As for the relief of the castle itself, it appears to have been effected with but little difficulty at last. Virtually, the siege ceased on the 22nd March, when the rebels, under the cover of a heavy fire from their cannon, attempted to carry the place by assault. Meeting with a staunch resistance, and finding the best efforts of their men unavailing, and resulting only in a terrible carnage among them, the insurgent leaders withdrew their forces, and for some days remained inactive behind their entrenchments. Then, by a concerted movement, they deserted Uyeiki and the forts around the castle, and, apparently unknown to the imperialists, effected an unobstructed retreat to the mountain fastnesses of Kiyama. The most has been made by the native journals, under the instruction of the censors of the press, of the march of Colonel Oku with some three or four hundred men of the garrison to Uto, and his junction there with the army of Kuroda; but the accounts of the operation themselves bear witness that it was accomplished with little difficulty, and in the face of no resistance. We read that "three lives were lost," and that a few prisoners were taken by Colonel Oku's command. The lives were doubtless forfeit to the swords or spears of a few desperate guerrillas whom, instead of the insurgent forces, the troops met on their march; and the prisoners were probably stragglers or persons who could give no account of themselves. The junction of the imperial troops, so long kept at bay by the insurgent besiegers of the castle, and the beleaguered garrison, might have been effected days before it was actually accomplished. In stating this, we have no wish to disparage the success attained by the

* I.—If any pony is entered for several races on the same day, the owner of such pony must declare to the Committee of the Y. R. A., not later than 6 p.m. on the day previous to such races, the first event for which the pony will compete.

II.—If no declaration is sent into the Committee of the Y. R. A. it will be compulsory for such pony or ponies to run for the first event for which they are entered, or be disqualified from running for any race during that day.

III.—All declarations to be made in writing to the Committee and addressed to the Honorary Secretary, who will immediately make them public.

imperial arms; or to suggest that the imperial commanders did other than wisely in refraining from making an attempt which might have entangled their troops in places which they had reason to suspect might conceal murderous ambushes of their foes. But we do say that it is passing strange that the army of fifteen or twenty thousand men under Saigo, so frequently reported as entirely surrounded by the government armies, should have been allowed to have effected their escape *en masse*, to have disappeared unobstructed and their flight unknown, to another locality where they will be in at least as good a position as they were before to carry on that peculiar style of warfare which has already proved so fatal to those to whom they are opposed. If the rebellion was to be crushed at any cost of life and treasure, it seems that the end might have been better gained as the opposing armies stood three weeks since, than it can be now, when the rebels by a masterly retreat have extricated themselves from the meshes in which the imperial commanders fondly imagined that they were entangled, and have established themselves in quite another district, where to encounter them another campaign, probably more harassing and deadly than the last, will have to be entered upon.

This is what the relief of Kumamoto means. With the gain of a certain amount of *prestige*, which may be taken just for what it is worth, and after the expenditure of an amount of treasure of which no account will ever be rendered, but whose withdrawal from its proper objects will cripple the resources of the country for years: after a loss of life known to be enormous but the extent of which, too, will never be made public: after incalculable suffering undergone by both imperialists and insurgents who have survived the strife but who encumber the hospitals and ambulances, and, maimed, halt, and blind, will be a burden to themselves and their families for years: after the affairs of government have been impeded, national progress arrested, projected reforms nipped in their bud, schools closed, education killed, agriculture hindered, domestic trade half strangled, and foreign commerce all but annihilated:—after so many sacrifices made and so much mischief wrought, the government find that they have to send their armies on another expedition, which bids fair to be as long and productive of as much carnage, suffering, and expense as the one just ended. Saigo, finding that the capture of Kumamoto was impossible, has, as if with a wave of his hand, transported his armies through or over the forces said to have hemmed him in, and has selected the *venue* of a future campaign, if his foes should choose to follow him, in a mountainous and difficult district, a hundred miles at least from where he was before. Who can say that this *hegira* did not enter into his combinations? The plan of the imperialists, as it has been allowed to be published, is to follow the insurgents by divisions, to repeat in fact in Hiuga the operations which resulted in the relief of Kumamoto in Higo. In the country now occupied by the insurgents, in addition to the passes and other natural strategic points of vantage, there is a castle-city, Sadowara, which, though said not to be commandingly situated, will be of great service to the insurgent leaders, who, by the way, when they find themselves again hard pressed and surrounded by the imperialists, may reverse the movement which they have so recently

effected, and return with such of their adherents as may escape slaughter to the province they have just vacated. True, nothing certain has been heard of Saigo for some time; but he is none the less dangerous for that. Nothing was heard of him during the period which preceded the fact becoming known that he was at the head of the samurai, who, after taking the arsenals, had left Kagoshima. At this latter place great excitement appears again to prevail. Certainly, the mission of the imperial envoys thither does not seem to have been productive of any great result favorable to the imperial cause. It is thought that if the expeditionary troops—the whole of the imperial army so to speak—succeed in forcing the new positions of the insurgents, the latter will fall back upon Kagoshima. The Government are unable to garrison this place; but they are concentrating their men-of-war in the neighboring waters. Should this forecast prove correct Kagoshima will be the scene of a deadly struggle. The sympathies of the entire population, men, women, and children are with the insurgent cause. During the very visit of the envoys, the most efficient aid was being rendered to it there. Arima, an old servant of the Navy Department, was appointed by Saigo director of the arsenal after its seizure. Day and night he has been busy manufacturing ammunition, and making and repairing arms for his chief. He suspended his operations while the envoys were in the neighborhood, and withdrew himself for the time; but he had a large supply of the necessities of war ready to hand over to Beppu and Yetsumi when they arrived from Saigo's camp. Then, strictly quiet as Shimadzu has kept himself, there can be little question that his sympathies too are with, and his moral support given to, the insurrection.

All things indicate that unless arms are to be laid down by both sides the end of the strife is likely to be remote. Fain would we see it hastened. One of Shimadzu's sons is now at Kioto, the bearer of a memorial from his father. If even now a compromise can be come to it should be hailed with gladness. If representative institutions and a constitutional government are given to the people through this insurrection, the struggle will not have been in vain. But, if they should be denied, and the efforts of those now in power to crush Saigo and his followers should prevail, peace will follow; but what a peace! A hollow amity, a period of heart-burning in which ancient feuds are secretly nourished, and ancient wounds caressed: a time of months or years in which fresh resources are gathered and new lessons learned, to be held in reserve until the hour is ripe for a new revolt, and the seed of the wind is reaped in the tumult of the whirlwind and the storm of internecine strife.

This, at least, can be done. The government owe to the nation an account of the blood shed, the evil wrought, the treasure expended, in this dire strife. They know what demands have been made of them, and compliance with which would have averted the war. And this also the nation should know. Let them then make public, honestly and without reserve, what Saigo asked for in the name of the country and why he was refused. If these demands were such as should not be made by one aspiring to the lofty reputation of a patriot, and which it was the duty of an honest administration to refuse at all risk, even that greatest of all, the risk of a civil war, the truth will be at once recognized, the blame will be shifted from those who now bear it to him by whom it should be borne,

and Saigo will be proved and acknowledged worthy of those epithets which are so lavishly heaped upon him by a fettered press, the chief concern of whose writers at this moment must be how to pen an honest line which shall not be expunged by the ruthless pen of the censors.

THE BILL OF LADING.

CONSIDERABLE confusion appears to exist in Yokohama as to the respective rights of the holders of bills of lading, and of the liabilities of the master and owner under that contract. In a recent case tried before the assistant Judge, the plaintiffs were holders of a bill of lading drawn to the order of the shipper and endorsed in blank: it was admitted that no property in the goods passed to the endorsees, and the plaintiffs were consequently nonsuited on the ground that the action was misconceived. No appeal against this decision was made, and the soundness of the law upon which it was based is open to doubt. We, however, think that the decision was right, as the Bill of Lading Act upon which so much stress has been laid, distinctly states that the holder, to be in a position to sue, must be a "*bona fide* holder for value": the first section provides that "Every consignee of goods named in a bill of lading, and every endorsee of a bill of lading to whom the property in the goods therein mentioned shall pass, upon or by reason of such consignment or endorsement shall have transferred to and vested in him all rights of suit," &c., and it has been held over and over again, in strong support of the decision rendered in this Court, that "Where by the bill of lading the goods were to be delivered for the consignee, and in his name, to the consignee, and no question of agency could arise, the consignee having, at the time of shipment, no property in the goods, it was held that an action in the name of the latter for damage done to the goods was misconceived." It would therefore appear from the decisions which have been rendered, and upon a correct construction of the 18th and 19th Vict. C. 111., that the mere endorsee of a bill of lading to whom the property in the goods therein mentioned has not passed for valuable consideration, or, who, in the exact words of the Act, is not a *bona fide* holder for value, possesses no right of action against the master or owner, in respect of damage or non-delivery.

This view is supported by a recent decision rendered by Sir ROBERT PHILLIMORE in an action for breach of contract of carriage and short delivery of cargo. The plaintiffs, who were bankers, alleged in their petition that they were holders for value of the bill of lading under which they sought to enforce delivery of the specified amount of cargo. The "value" in respect of which they became holders of the bill of lading, was a debt due from the assignor who had transferred the bill of lading in part payment, and it was contended by Counsel that "Even if the plaintiffs hold this bill of lading as security for advances, they have only a lien upon it, and that does not give them a right of action against the shipowners." The question of "consideration" was therefore before the Court, and was disposed of as follows:—"With respect to the objection as to want of consideration given by the plaintiffs, I am of opinion that the bill of lading was assigned to and taken by them in part payment of a debt due to them from the assignee, which is a sufficient valuable consideration."

This being seemingly the state of the law there is no excuse for the persistency with which consignors ship in their own name and merely pass the property for delivery to their agents, the consignees, by an endorsement usually in blank. With this question the Chamber of Commerce might certainly have dealt with advantage; but although they touched upon the matter it was allowed to drop—a fate too common to all subjects of public interest or importance to foreigners in Japan. In bringing it once more forward we recommend the subject to the immediate and earnest consideration of the Committee, in the hope that a high legal opinion may be taken in London for the future guidance of shippers and consignees.

We have entered into the right of the consignee to sue somewhat at length for the purpose of drawing the attention of our readers to the unsatisfactory position the majority hold under the ordinary bill of lading, exemplified more particularly in the late actions against the *Viking*. The evidence in the first of these suits showed that a number of cases of window glass were shipped: that a bill of lading with the customary receipt of the glass in "good order and condition" had been granted: that the shipper was merely the agent of the consignee; and that the damage was the result of contact with fresh water. These facts were settled by the learned Law Secretary, and in deciding the case he held that the bill of lading not being conclusive as between the shipper and master as to the quantity of goods shipped, it was equally inconclusive as to the condition of the goods when taken on board the vessel. If this ruling is to be considered binding, the bill of lading, unless endorsed to an innocent third party for valuable consideration, becomes merely a receipt for an indefinite quantity of goods, the question of the actual quantity and quality of which may be reopened at any time between the parties to the contract, and the document will have lost half its virtue. The case of *Bates v. Todd* referred to in the decision was "an action against the owners of the ship *Thames*, on a bill of lading, signed by the master at Singapore, for 890 bags of pepper; the declaration alleged that 890 bags were shipped, and that some of them had been lost. The defence was, that only 790 bags had been shipped, and that the captain had been induced to sign the bill of lading for 890, by the fraud of the plaintiff's agent at Singapore. It was contended for the plaintiffs, that the bill of lading was conclusive, and estopped the defendant, who was owner of the ship; but Chief Justice TINDAL said he was of opinion, that, as between the original parties, the bill of lading was merely a receipt, liable to be opened by the evidence of the real facts, and left the question to the jury, whether, in fact, 890 bags, or only 790 were shipped." If the ruling quoted is really the law and the ship owner is not responsible for the quantity of goods specified in a bill of lading, *a fortiori* he cannot be held responsible for their quality: the former he could check and ascertain to his own satisfaction before signing the receipt: the latter he could not. The case of the *Ida*, on appeal from the High Court of Admiralty does not, however, support the corollary. It runs as follows:—"Persons constituting the firm of shippers identical with the members of plaintiffs' firm. Damage to cargo—bill of lading 'quality and quantity unknown'—burden of proof.

"A bill of lading stating goods to have

"been shipped in good order and condition, 'but indorsed by the master with the words 'quality and quantity unknown,' does not admit as against the ship owner that the goods were shipped in good order and condition.

"There is no rule of law by which the consignee of goods under a bill of lading, stating goods to have been shipped in good order and condition, but containing the words 'quantity and quality unknown,' is bound to show that the goods were shipped in good order and condition, or fail in his suit against the shipowner for damage done to the cargo; but, failing proof of the condition of the cargo when shipped, the consignee is bound to show that the damage which it sustained is traceable to causes for which the shipowner is responsible" (Privy Council, March 1875.) It will be observed that considerable stress is laid upon the clause "quantity and quality unknown," as governing the liability of the master to deliver in the like good order and condition as the goods were in when laden on board, and it seems a fair inference that the absence of those words in the case quoted would have seriously affected the ruling; thus, "a bill of lading stating goods to have been shipped in good order and condition, but indorsed by the master 'quality and quantity unknown,' does not admit as against the shipowner that the goods were shipped in good order and condition." In the case *Haddon v. Parry* the Court declared that the words 'contents unknown' rendered the bill of lading "no declaration of what the chest of dollars contained; it was therefore no evidence at all;" and Lord Chief Justice MANSFIELD had previously said in the course of the same argument, "If the master qualifies his acknowledgment by the words 'contents unknown' he acknowledges nothing." The learned judge who tried these causes (*The Ida* and *The Prosperino Palasso*) added, "by appending these words the master cancelled any admission he would otherwise have made as to the quality and condition of the goods when shipped." (The italics are used by us.) From this we gather that where there is no qualifying clause there is an admission by the master of the quality and condition of the goods when shipped, as between him and the shipper or consignee, and that he is responsible for their delivery in the like condition, perils of the sea alone excepted.

The consequences of the decision in the *Viking* suit will be serious. Shipmasters are averse to the admission of any claims upon them, however just and well founded they may be, and if for the future it is to be understood that the express condition of the contract, "received in good order and condition" is not an acknowledgment on the part of the master to the shipper, a revision of the form is absolutely necessary. If the community is satisfied, and the judgment in the case of the *Viking* is to remain undisturbed, the shipowner will be relieved of the great obligation attaching to him to deliver the cargo in good order: the restrictive clauses in the ordinary bill of lading are sufficiently framed for the protection of the shipowner: they have been denounced from time to time as vexatious and one-sided, but the framers of them have not gone so far as to add a clause avoiding the ship's liability to deliver goods in the same good order as received from the shipper.

The other cases against the same vessel were dismissed on the ground of damage being caused by sea perils: surely the master was to be excused for the same reason given

in *Rohde v. Castle*. If the damage is proved to be the result of contact with fresh water (although steam-pipes are used for heating purposes through all large steamers) the ship is absolved, because the express terms of an express contract have no significance, and are merely used to delude the shipper into a state of false security: if the damage results from other causes the ship is not responsible for losses arising from perils of the sea. We will conclude with a definition of the term "perils of the sea," first mentioning, however, that the loss claimed by *Beato and Hudson v. Castle*, was caused by a leak in the compartment where the goods were stowed, which admitted over eight feet of water, a fact only discovered upon inspection." Lord Chief Justice COCKBURN, reviewing and reversing a judgment of Mr. Justice BRETT in the suit *Nugent v. Smith* said in reference to the term "Act of God:—" "In our own law on this subject judicial authority, as has been stated, is wanting, and the text writers, English and American, with one exception, afford little or no assistance. Story, however, in speaking of the perils of the sea, in which storm and tempest are, of course included, and, consequently to a great extent the instances of inevitable accident at sea, which come under the term, 'Act of God' uses the following language: 'The phrase "perils of the sea" whether understood in its most limited sense as importing a loss by natural accidents peculiar to that element, or whether understood in its more extended sense as including inevitable accidents occurring upon that element, must still in either case be understood to include such losses only to the goods on board as are of an extraordinary nature, or arise from some irresistible force, or from inevitable accident, or from some overwhelming power which cannot be guarded against by the ordinary exertions of human skill and prudence. Hence it is that if the loss occurs by a peril of the sea, which might have been avoided by the exercise of any reasonable skill or diligence at the time when it occurred, it is not deemed to be in the sense of the phrase such a loss by the perils of the sea as will exempt the carrier from liability, but rather a loss by the gross negligence of the party. Story it will be observed, here speaks only of ordinary exertion of human skill and prudence, and the exercise of reasonable skill and diligence.' "And" added the Lord Chief Justice, "I am of opinion this is the true view of the matter."

IMPORTED HORSES AND SHEEP.

The arrival of the O. & O. S. S. Company's *Gaelic*, brings to our shores the first instalment of thoroughbred horses from California,—bought by the commissioners sent to America for the purchase of thoroughbred stock,—consisting of three horses, three fillies, and two large draught stallions. There are also fifty pure merino rams and fifty ewes, fine animals; but it was the horses which most commanded our admiration.

The first horse shewn us was the grey Bradley, four years old, by Norfolk; he by Lexington, dam Novice; she by Glencoe: Bradley's dam grey mare Margaretta: she by Lexington dam, Margrave (see American stud book.) This horse Mr. Faylor, the trainer in charge, tells us has one of the best three year old records in California. He won the one mile and a half dash at Sacramento, in the splendid time of 2 minutes 30½ seconds; and has also run other remarkable races in California. His fastest mile

as a four year old, was run and won at the mile and repeat race at State Fair, in 1 minute 41½ seconds, and 1 minute 43½ seconds. He started in the four mile and repeat race on the 22nd of last February, when the commissioners saw him run and bought him for Japan. He ran second to the noted mare Molly McCarthy. Molly is the best mare that America has ever produced, at all distances from one mile to four. She has never been whipped or spurred, or lost a heat or race. She is sired by Monday: he by Colten out of Molly Jackson. Her dam is Hannah Farro, the best brood nag in America and acknowledged to be so by all breeders in the United States.

The next horse shewn us was Ralston, the pride of the coast, which as Mr. Faylor informs us is the best of them all. He is a fine three year old bay, two white hind feet, one white fore fetlock, white star in forehead, and is 15 hands 2 inches high. He is sired by Norfolk, dam Hannah Farro. He ran in a field of twelve two year old colts, last fall, at State Fair, and won with all ease, in the remarkable time of 1 minute 46 seconds, the best time ever made by any two year old colt. He is half-brother to Molly McCarthy, one year younger, out of the same dam.

The next is the horse Regent, a six year old, with two white hind feet, small star in forehead. He is by Lodi: he by imported Yorkshire, dam Glencoe: Regent's dam, Eva Combes, by Billy Cheestham, dam, Ruby. He was entered as a four year old in the 30,000 dollar four mile race at San Francisco, and was thought well of, but broke down in his near hind leg in training, and did not start in the race. He was raised by Captain Geo. A. Johnson, of San Diego, California.

Coming to the next we find Clara McGeary. Mr. Faylor says this is the horse that brought him to this country, as he could not part from the filly: she is full sister to Ralston, two years old, a chestnut sorrel, 2 white hind feet, with star in forehead, about 15 hands high, but very large, and has the look of a tip top race horse.

The next is Balance. She is the picture of her family, being by "Norfolk," dam "Ballarette," by "Ballareele," dam Hanna Farro. Great grand-sire Blair Athol. She shows the Blair Athol blaze in the forehead. She is two years old this spring. The next is a small filly, Jessie Forel, two years old, by Norfolk, dam Maggie Dale by Owen Dale, dam Margaretta by Lexington. This finishes the list of thoroughbreds. Of the big ones, the first is a fine large Clydesdale stallion, Langdon, 5 years old; 17½ hands high, weighing 1,700 pounds, blood bay, with one white foot; and the milk white Norman stallion Amador, 8 years old. He weighs about 1,400 pounds, stands 16 hands high, and is Mr. D. W. Ap Jones' favorite.

With this string of fine horses for the country, and such a competent man in charge as Mr. Faylor, who comes highly recommended to the government, Japan ought in a few years to have as fine a family of horses [as any other country can boast of.

There cannot be too much praise given to Mr. Faylor for the splendid condition in which he lands his beautiful charges.

Mr. Faylor bears the highest testimony to the kindness and attention of Captain Kidley, and his officers, who, during three days of very rough weather, did their utmost to protect the stock from danger.

THE SATSUMA INSURRECTION.

From the *Japan Gazette*, April 11th.

Finding that the troops already in the field are insufficient to put down the insurgents, and that the withdrawal of the soldiery from outposts in drafts of combatants destined for the seat of war, leaves other parts of the empire unprotected by military, the Prime Minister at Kioto, has ordered a fresh conscription of ten thousand men and has also directed the enrolment of the veteran soldiers of the Imperial Guard, at present living in private in the Yamaguchiken.

The fears which we expressed that, unless the rising were promptly suppressed, force failing, by a compromise, the insurrection would spread, have turned out to be only too well founded. The samurai of Nakatsu, in the province of Buzen, are now in open revolt. The *Osaka Nipho* says that about one hundred shizoku in that place have taken up arms against the local authorities. They attacked the branch Owake kencho at Nakatsu and killed all the officials there, the office being quite unguarded. The insurgents then marched on the Bungo road to join the insurgents in Kumamoto. A number of Kagoshima men had come to Nakatsu from Waifu, and excited the samurai to follow their example.

The *Hochi Shinbun* writes: A telegram from —, despatched at 10.50 p.m. on the 4th inst, announces that notwithstanding the orders of the local authorities, some shizoku in Nakatsu wandered about the town wearing swords, under the pretence that they intended to protect themselves and the town from an attack by the enemy. About — shizoku in the counties of Shimoge and Usa formed themselves into a force armed with swords, and set the houses of the district officials on fire. Besides this other places are much excited. A large force of police has been despatched to quell the rising.—A telegram from the South-West, sent at 11.55 p.m. on the 4th instant, says that, on the 3rd, the *Asama-kawan* left Umano-seki in order to cannonade the village of Beppu, under the jurisdiction of Owake ken, occupied by insurgents. Before her arrival on the coast, however, they had retired.—A telegram from Kioto, despatched at 1.30 p.m. on the 5th, announces that a party of rioters in Nakatsu had attacked the Owake-kencho on the 2nd. The town was set on fire and an engagement followed between the police and the rioters. The latter were dispersed in the evening. As they retreated to Beppu, they set the government offices on fire. They arrived at Beppu at about 12 o'clock in the night of the 2nd.—Another despatch from Kioto, dated at 7.50 a.m., the 6th inst., announces that the insurgents in Nakatsu had attacked the Owake kencho and police station, and killed Mr. —, a well known individual. The ranks of the insurgents are gaining numbers. Half a battalion of infantry and a force of police left Sakana-shi and encamped at Tsuku-takeda on the 5th instant, to meet the Nakatsu rebels.

The *Nichi-Nichi Shinbun* of the 10th April publishes the following letter from the seat of war:—

The first division of the Imperialists is commanded by Lieut-General Nodzu and Lieut-Colonel Okayama: the second division by Lieut-General Oyama (brother of the ex-governor of the Kagoshima-ken) and Colonel Nodzu, who have their head-quarters at Nanamoto, and fight at Kidome, Uyeki, and Torinosu, the very centre of the seat of war:

the third division by Lieut-General Miura and Colonel Kajih, who are encamped at Yamaka and keep the insurgents in check at Waifu, and guard the ground between Nanamoto and Takase: the fourth division by Lieut-Colonel Shinagawa, protecting Igura, Ohama, and Haragura, as the reserve corps of Kidome. The second division was at first commanded by Lieut-General Miyoshi, but he having been wounded in an engagement at Tawarazaka, his place was filled by Lieut-General Okayama. General Kuroda, commanding in chief the reserve corps, has his head-quarters at Yajiro, south of Kumamoto castle. The first division of the reserve forces is commanded by Lieut-General Kawaji, and the second by Lieut-General Yamada. These landed simultaneously at Hinaku and Yajiro and attacked the rear of the insurgents. The result of this enterprise is as yet unknown. A large force, composed of police, occupy Nigutoge on the Bungo road, where skirmishes have taken place several times. It is not yet known where Saigo the rebel commander is stopping. The following is an account of the number of the Imperialists at the seat of war:—2 battalions of the 1st division of the Imperial body guards, 2 battalions of the 2nd division of the same body, the 1st and 3rd, two battalions, of the 1st division of the Tokio garrison, the 1st and 3rd, two battalions, of the 2nd division of the same body, and the 3rd battalion of the 3rd division of the same corps, the 1st and 3rd, two battalions, of the 6th division of the Nagoya garrison, 1 battalion of the 7th division of the same, 3 battalions of the 8th division of the Osaka garrison, 3 battalions of the 9th division of the same, 2 and a half battalions of the 10th division of the same, 3 battalions of the 11th division of the Hiroshima garrison, 1 and a half battalion of the 12th division of the same garrison, 3 battalions of the 13th division of the Kuma-moto garrison (these are in the castle) 3 battalions of the 14th division of the same (one of these battalions is also in the castle) 31 battalions of infantry in all, Besides these, 3000 police are also in the field, and one battalion each of artillery of the Tokio garrison and Imperial body guards, one and a half battalion of artillery from the Osaka garrison, and 2 battalions of the Kumamoto garrison, 5 and a half battalions of artillery and one quarter of a battalion of engineers of the Imperial body guards from Tokio, Osaka, and Kumamoto garrisons respectively.

As was mentioned in a recent issue, says the *Nichi-Nichi Shinbun*, Osu-Tetsuzen, *Gonchu-Kioshei*, a Buddhist priest of the Monto sect, was persecuted by the Kagoshima insurgents. On the 24th March he was summoned to appear at the Imperial palace in Kioto, where he was examined before the ministers and other high officials as to the condition of Kagoshima, and ordered to record his experience in a document, which runs as follows:—

In October of the 9th year of Meiji, (1876) members of the Monto sect were allowed to practice their religion in the Kagoshima-ken, and I and others were sent there to preach the Buddhist doctrine. We strove to the utmost of our ability to inculcate loyalty to the government on the one hand, and by the preaching of our tenets to instruct the people to advance in civilization on the other. To our great wonder, the Gakko-to distrusted us very much, and spread the idle rumor that Osu-Tetsuzen came to Kagoshima to act as a spy by private order of H. E. Mr.

Kido, *Naikaku-komon*, and to hold secret communication with the government. Most of the *kucho* and *kocho* throughout Kagoshima were also confederate with these treacherous fellows. They obstructed us in our duties everywhere and persecuted the Buddhists in the ken. We could do nothing in which we were not interfered with, and those who were not converted also acted against us. We found ourselves in a most difficult and dangerous situation. But it is the duty of missionaries to make the wicked good and to civilize the savage. So we were not at all afraid, or anxious to leave Kagoshima, but we continued our work, in spite of their opposition, which excited the traitors more and more to hostility to us, and we could do nothing to pacify them. At length, on the 31st January of this year, they forced their way at the same time into the two arsenals, one belonging to the War and the other to the Navy Department. The inhabitants throughout the entire province became much excited. On the same day, a certain number of *shizoku*, armed with swords, penetrated into our lodging. We escaped and they pillaged all our property. On the following day, when we were at a temple which we had selected as a temporary refuge, they followed us there and insulted us. At night they forced their way into the temple and destroyed everything in our presence. Nothing was left standing. The native Buddhists advised us to leave Kagoshima to escape violence from the rebels. But as I was regarded as a spy of the government, I could not leave it; or, if I had done so, they would have been certain that we were spies, and our hard work of introducing civilization during half a year, might have been lost to the people and country. So we determined to remain in Kagoshima, at the risk of our lives, and petitioned the governor to protect us from them. This was on the 5th Feb. At about 1 p.m. on the following day, about thirty men, each dressed in police uniform, entered the temple and arrested us, eight in all. Four others, who happened to be out at the time, escaped being taken by them. We were immediately taken to the first police office, where a large number of officials and *shizoku* surrounded us and talked evil against us. They beat us on the face and back as if it were sport for them. *Osu-Tetsuzen* was first examined as to whether he had received secret orders from the government or not. Nothing else was asked of him. The others were similarly questioned. At about 11 p.m. the same day, we were put in a jail, where robbers and other criminals were imprisoned. We were very badly treated there. On the following day, we were again examined on the same subject as before, and on the 9th Nakahara and others were obliged to seal their confessions.

The *Hochi Shinbun* writes:—A telegram from Kyoto, despatched at 4 p.m. on the 8th instant, announces that the troops now in the island of *Yezo* will be sent quickly to *Yajiro*. The *Taikei-maru*, which was anchored in Kobe, had left for the island at noon on that day in order to take troops on board.

The *Choya Shinbun* says:—A telegram from Kyoto, despatched at 5.30 p.m. on the 7th April, announces that *Beppu* and *Yetsumi* attacked the Imperialists at *Yajiro* in the rear with 1,500 men newly raised in Kagoshima. The Imperialists were fewer in number, but they fought with desperation, and held the strong strategic position of *Motome-gawa*.—Another telegram from the seat of war, received at 2 a.m. on the 10th,

says that on the 9th, a great battle was commenced at *Kidome* and lasted for many hours.—(number blank) policemen were killed.—About 200 policemen in the *Yamaguchi-ken* have been sent to the field.—One battalion and thirty officers, commanded by *Lient.-Colonel Kazama*, leave in the *Hiogomaru*, which also takes large quantities of gunpowder, to-morrow.—About 1,000 men of a party, named—, are said to have joined *Saigo*; and the natives of Kagoshima recently made a present of 15,000 yen to that commander.—A few days ago, about seven insurgents of *Fukuoka* forced their way into the hospital in that town, and killed about eleven wounded men.

April 12th.

The *Nichi-Nichi Shinbun* publishes the conclusion of the narrative of *Osu-Totsuzen*, on the subject of the trouble in Kagoshima, the first part of which we gave yesterday:—

On the 26th of February a new prison was completed, close to the *Kencho*. Fifty-six prisoners in all, including ourselves, were removed there. On that day wrestling matches happened to be going on on the open ground before the castle of Kagoshima. When we and the other prisoners were passing in rank close to the place, thousands of spectators laughed at and abused us. Seven of us were placed in one room about fifteen feet square; and here we were a little better treated by the gaolers. On the 9th of March, we saw, through a small window in the prison, coal smoke in the harbor, and knew that steamers had arrived. Having been in jail for about thirty days, we knew nothing of their coming being expected. At about 10 a.m. on the following day, we heard the sound of trumpets in the distance and we were then first aware that the Imperialists had landed near to us. At about 1 p.m., on the same day, *Nigiribi, Shokeishi*, at the head of a number of his subordinates, came before the prison, where he released *Nakahara* and twenty-one others, who had been more or less severely tortured. We leaped for joy. At about 11 a.m. on the 11th March, we, with thirty others, were taken out of the prison by a body of police, and were asked at the *Kencho* the reasons for our having been arrested. Here we first heard about the fighting in *Higo* between the imperialists and insurgents. At 4 p.m. we were allowed to go to a hotel. *Yamazaki-Shoten*, one of our company, had been in the island of *Tanegashima* preaching the Buddhist doctrine. When some of *Saigo's* confederates went there in the steamer *Neisei-maru*, in order to raise troops, they brought him back to Kagoshima. During the voyage he repeatedly attempted to throw himself into the water; but was prevented. He, too, had been released by the imperialists and joined us now. We embarked on board the *Korio-maru*. The faithful Buddhists endeavored to persuade us to remain longer in Kagoshima. We took leave of them, however, and left Kagoshima at 3 p.m. At 12 on the following day, we landed at *Nagasaki*, where we were placed in charge of the police. That night we were visited by government physicians. On the 16th we embarked on board the *Nagoya-maru*, and arrived, on the 19th, in *Osaka* where we were set free on the 20th.

24th March, 1877.

The *Hochi Shinbun* says:—A telegram from *Nagasaki* despatched at 10.55 p.m. on the 9th instant, informs us that, on the 5th,

the insurgents attacked the imperialists in *Yajiro*. A great battle was fought on the river *Kumagawa*. On the evening of the 7th, the insurgents were totally routed and fled by the road of *Hitoyoshi*. On the following morning they again advanced against the imperialists on the hill of *Kibara*, but they were soon driven back with great loss.—A telegram from the North, sent at 9.50 p.m. on the 9th, says that a certain *Atobe, shizoku* of the *Akita-ken*, had collected about sixteen or seventeen *shizoku* under the pretence of joining the Imperialists in the South-West. But his real object was discovered by the *Kencho* authorities, and he and his colleagues were brought to the office, where they confessed their desire to aid *Saigo*. Details will follow by letter.—A telegram from *Nagasaki*, sent at 9.40 a.m. on the 10th, announces that the steamers waiting to leave for *Uto* with troops, could not get away owing to a strong gale.—Battles at *Torinosu, Kidome*, and *Nabeta* were fought on the 9th without decisive result.—A telegram, sent from the South on the 10th, states that *General Torio* arrived at *Takase* on the same day. No battle took place at *Kidome* that day. A body of imperialists on the *Yamaka* road has captured *Maifu*; and an engagement has taken place at *Ishikaga* on the same road.

April 13th.

The trouble in *Buzen*, close to *Shimonoseki*, is becoming serious. The *Hochi Shinbun* reports that communication has been effected between *Kumamoto* castle and the Imperial troops in the field. It says that a telegram from *Nagasaki* announces that at about 2 p.m. on the 8th instant, *Lient.-Col. Oku*, at the head of one battalion of the *Kumamoto* garrison, made a determined sortie from that castle and fought his way to the Imperial headquarters at *Uto*, through the insurgents. The state of the garrison is now well known. There is no want of provisions. A telegram from *Uto*, sent at 5.30 p.m., the same day, states that the castle of *Yajiro*, held by the imperialists, was attacked by superior forces of insurgents. The engagement lasted for about six hours. At length the insurgents were totally routed and driven back in disorder as far as *Furumoto*. The victorious troops in *Yajiro* were joined by *Lient.-Col. Okazawa's* division, and the united army advanced in pursuit of the insurgents to *Ogawa*. Many of the rebels were killed or taken prisoners. A telegram from *Kioto* says that on the 10th instant, a battle was fought at *Waifu*. After a desperate struggle the insurgents broke ground, and the imperialists took entire possession of the town. No battle took place at *Uyeki* or *Kidome* on the same day. At 4 a.m. on the 11th, one battalion of infantry was embarked at *Kobe*, on board the *Kanagawa-maru*; and at 8 a.m. the same day, one more battalion was sent to the south-west in the *Tsuruga-maru*.

The *Choya Shinbun* says that a telegram received on the 12th instant is to the effect that the imperialists under the command of *Lient.-General Kawaji* had expelled the insurgents from *Kosa*. About 1,300 men will be sent to the south on or about the 20th instant.

April 14th.

The *Hochi Shinbun* publishes the following letter dated 2nd instant, from *Nakatsu, Buzen*, relating to the rising in that castle-city:—During the night of the 31st March, a

number of insurgents assembled at Rino-no-hama, where they formed into several minor parties. They attacked the houses of the local officials; and one party, stronger than the others, at the same time assailed the branch Owake kencho, which stands within the walls of the old castle of Nakatsu. They killed an official and seized large quantities of ammunition. This was about 12 o'clock at night. Another party made an attack upon the police station, where a policeman was slain; and others broke into the house of a rich merchant, named Harimaya. He is a contractor for the branch kencho and had charge of the government funds. A few days ago before the rising of the insurgents a large sum of money had been sent to the Owake-ken. In his place however the assailants only found about 300 yen. They also forced their way into many other rich houses in the city and obtained more or less money. It was now about 4 o'clock a.m. The city, which is situated far north from the seat of war, was unguarded, and the rioters, armed with guns and other weapons, ran about violently throughout the entire city, where they found no resistance. The poor citizens were awaked from their sleep and fled in terror, the strong carrying the weak and aged on their backs, and removing as much as they could of their furniture and clothing. At dawn all the rioters assembled at Sabuyado, about one ri east from Nakatsu, and threw up a signal rocket. All the parties of insurgents in the neighbourhood then joined them. But they only numbered about one hundred (*sic*) in all. The principal of the local authorities, Mabuchi, was killed, and his head was exposed on the top of a pole. On the 1st March, no local offices were opened. The rioters, proclaiming themselves "the party of the new government," left in *rikisha* for the Owake-ken, with the intention of joining the Kagoshima rebels in the province of Higo. Their manifesto runs as follows, the asterisks denoting when the pencils of the censors have obliterated objectionable words or phrases:—

"Now we have considered the condition of the Jin-shu, (country of gods) and find that the Russians have ejected their saliva upon Hokkaido, while the English are watching for an opportunity in the East of the Pacific Ocean. Both Russians and British have been selfishly anxious to satisfy their appetite for aggrandizement in the East for many years past. And the Americans have no wish to advance our interests; and, then, since our Formosa expedition, the Chinese, close to us, hold us in enmity. The condition of Japan becomes gradually * * * and we ought now to preserve tranquillity at home on the one hand and to extend our power abroad on the other. Notwithstanding the wants of the times, * and * refuse to hear the wise commands of His Majesty the Mikado and oppress the whole people and act selfishly * *. They flatter * and caring simply to gratify themselves they have lost *, and deprive people of their freedom and their right, just as they please. They are such low-minded men that they feel no shame for *'s disgrace and *'s enmity. Large streams of money pour out on the one side, while the national debt is increasing on the other. Our country, which has preserved its independence for 3530 years, or since the time of the descendant of gods appeared here, will shortly become * *. Mr. —, ex-Sangi, is much distressed at this state of affairs and desired to reform the constitution of the government. But he was unfortunately regarded by the authori-

ties, as *, and he was killed. Now, again, they desired to * Their Excellencies Saigo-Takamori, Commander-in-chief of the army, Kirino-Toshiaki, Lieut.-General, and Shinohara, Lieut-General. Thus they act unlawfully and treacherously towards us. They are rightly said to be the *, who sell the country belonging to *. It is our duty as retainers to reform the conventions with foreigners, and to promote the welfare of the country by * them. H. E. Saigo was going up to Tokio, but * * * obstructed him on his way. We are the people of the patriotic nation of the Jin-shu and we cannot endure to remain quiet under such treatment, so we have risen and turned our faces towards the east, where we will cut off * of * * and *, in order to restore our rights and make our power illustrious in the eyes of foreign countries. Whether our conduct is good or bad will appear when reflected in heaven's own mirror.

"SHINSEI-TO."

(NEW GOVERNMENT.)

The *Nichi-nichi Shinbun* extracts the following items from a letter from an officer at Yajiro:—The imperialists at Yajiro are expecting to effect a junction with the garrison of Kuma-moto castle. The insurgents have nearly exhausted their ammunition; and most of their breech loader snider rifles are spoiled, and many of these are left on the battlefields. Two thirds of the insurgents are not armed with rifles, but with swords and lances.—Fuchibe, one of the rebel commanders, has returned to Kagoshima to raise new troops.—Owing to the approach of the imperialists, the insurgent wounded in hospitals in Kawajiri were removed to Kosa, which is one of the strategic positions on the Hiuga road. But on the 10th inst. this place was attacked and taken by Lieut-General Kawaji.—The insurgents of Nakatsu are commanded by the proprietor of the *Inaka Shinbun*, named Masuda. He had worked in his office as usual till the day before the rising. He is a young man of many accomplishments and great ability.—The imperialists, stationed at Kokura, could not attempt to suppress simultaneously the insurgents in Nakatsu and the agrarian rioters at Usa, the latter of whom set the Kuchō's and Kocho's houses on fire.

The *Akebono-Shinbun* writes:—A small force of insurgents is encamped near Uto, and the town of Kawajiri has been evacuated by the rebels.—A telegram from Kioto, sent at 1.30 a.m. on the 13th, announces that the rebels, who were expelled from Yajiro, are encamped on the river Sakai. They consist mostly of aged and very young men, newly raised in Kagoshima. About three hundred dead bodies of rebels and two cannon were left on the field of battle at Yajiro. A telegram from Mibune, despatched at 12.15 on the 13th, says that the 3rd division of the imperialists at Kataashida advanced towards Mibune at about 4 a.m. on the 12th instant, by three roads. The right flank, commanded by Major Yagi, marched via the Umegi road: Lieut.-Colonel Shimada from the Gongenzan; and Lieut.-Colonel Mima from Ito-ishi. Besides these a force of artillery, commanded by Maruta, cannonaded the rebels at Mibune from the hill of Toda, and Lieut.-General Takashima marched at the head of two battalions on Yoshida. At about 7 a.m. an engagement was commenced, and lasted three hours. After a few minutes past 10 a.m. the victorious imperialists became masters of Mibune.

April 16th.

An extra of the *Mainichi Shinbun* this afternoon says:—A telegram, sent from the castle of Kuma-moto, by Lieut-Colonel — at 4.35 p.m. on the 15th instant, announces that a terrible fire was seen from the castle in the direction of Kawajiri at about 10 a.m. on that day. The insurgents around the castle seemed to become much confused. So, at about 2 p.m., we crossed the river Yasegawa. No rebels obstructed our advance, and we found all their camps empty. We marched direct to the castle, and joined the garrison.—Another telegram, this time from Uto, despatched at 7.30 p.m. on the 15th, and addressed to U-Daijin, says that at dawn the Imperialists, under the command of Lieut-General — and Colonel —, crossed the river Midorigawa. At noon they entered Kawajiri, where the insurgents were totally routed, and expelled from the town with loss. About 2 p.m. Lieut.-Colonel —, at the head of half a battalion, entered the castle of Kumamoto.

April 17th.

The *Choya Shinbun* writes:—A telegram from Kioto despatched at 8.25 p.m. on the 13th April, announces that, on the previous day, a pontoon bridge was built across the river Kawajiri by troops under Lieut-General Yamada. Having crossed the river they marched to the town of the same name. Lieut-General Kawaji obtained possession of Mibune, close to Kuma-moto. A detailed account is given of the sortie of the battalion under the command of Lieut.-Colonel Oku, which fought its way from Kuma-moto, and joined the imperialists in the field on the 8th instant. At about 3 a.m. a battalion of troops was formed in rank in the castle, which they left before dawn. They crossed the Uchi-no-hashii and marched through Toricho in the city. Then they turned to the right and waded the upper part of the river Shirakawa, because the bridge to the South was occupied by the insurgents. The troops in the castle kept up a fire upon the besiegers, and diverted their attention from the escaping force. The latter, having met with little resistance through Nakamuta, Rokkason and Mibune, waded the river Midori. Close to Waifu they fell in with a body of loyalist scouts and marched to Uto along the range of hills of Sakura, until they joined the imperialists. During their march from the castle to Uto, only three lives were lost, while twelve insurgents were taken prisoners.—The insurgents, stationed on the hill of Hanaoka, west of Kumamoto castle, are very busy making intrenchments. It is said that before the Kagoshima rebels rose, Saigo had made a communication to every foreign government. Out of 800 well disciplined men, whom the commander selected as his body guard, about 200 have been killed.—The same paper, quoting the *Saikio Shinbun*, says that the insurgent army is manoeuvred in accordance with English tactics, and that three or four Englishmen are to be seen among the rebels. On the 10th inst., two sons of Shimadzu and seven others, belonging to the same clan, arrived in Kioto.

The *Hochi Shinbun* says:—A telegram from Kokura on the 13th instant announces that, at about 6 a.m. on the same day, a battle was commenced on the mountain road of Sakanashi in the Owake-ken. The police force drove out the insurgents from their entrenchments. The insurgents fled in disorder for Uchino-meki leaving arms and ammunition behind them.—A bounty of thirty yen each has been given to the soldiers

recruited recently.—It is rumored among the imperialists that the rebels' ammunition will not be exhausted for a long time. The shizoku in Tsurusaki are said to threaten revolt against the authorities.—A telegram from Nagasaki, sent by Kuroda, "war spectator," to Iwakura, *U-Daijin*, at 12.30 p.m. on the 16th, announces that, as already reported, the imperialists entered Kumamoto castle at 11.26 a.m., where they found Lieut.-General Tani and others all well. Large quantities of food and ammunition have been brought into the castle. On the 13th instant,——in Osaka sent the following intelligence:—Fuchibe, Beppu, Yetsumi, and others of the rebel leaders, recently returned to Kagoshima, where they spread much excitement among the people, and daily attend at the Kencho to issue strict orders to raise new troops. It is desirable to send about one battalion of infantry and 500 police to Kagoshima, whither a new governor should also be sent immediately. All the houses in Kagoshima which were visited by the Envoy and his suite, have been entirely destroyed, and all buildings belonging to the government authorities were set on fire. During the engagement at Yajiro on the 6th instant, Kirino, late General, fought desperately, but was obliged to retreat. Before he left the fortress, he sent for reinforcements to Saigo, who is said to have replied that the difficulty of fighting against the whole army of the empire had been calculated on beforehand. No reinforcements were sent.

The *Mainichi Shinbun* says:—In the bloody battle at Torinosu on the 9th inst.,——Imperialists were killed and wounded and —— snider rifles were taken by the insurgents. When the rebels first penetrated into Kuma-moto on the 21st February, they forced their way into the Mitani Bank at Takase and took away all the money, amounting to about —— The Osaka Kucho is well provided with fire-arms, swords and other weapons.—A telegram from Kuma-moto, despatched by Lieut. General —— at about 1.25 p.m. on the 16th, announces that the imperialists from the Yajiro road had entered Kumamoto castle on the 15th, and other troops from various directions had also effected an entrance. The insurgents retreated in the direction of Hagiya and Yabe.—Another telegram, sent from Kioto at 6.30 a.m. on the 16th, says that no rebels are to be seen in Uyeki or its neighbourhood or on any road leading to the castle.—The insurgents in Uyeki and Kidome had set their camps on fire to impede the imperialists in their pursuit, and fled in disorder towards the hills of Tachida-Yama.—It was expected that the rebel forces, who relinquished the siege of Kuma-moto, had fled for the province of Hiuga. But they obstinately held their ground on the range of hills of Hanaoka, where they have established their head-quarters, and extended their camps to the South and North. They seem to be determined to fight desperately to the last.—Mr. Itagaki, late Saigi, is expected to leave shortly for the seat of war at the head of about 4,000 shizoku of the Kochi-Ken. Out of all the forces sent to the South-West, the imperial body guards, the police, and the soldiers of the Tokio garrison troops, are most favorably mentioned for their valor. The contingent from the Hiroshima garrison, have also been well spoken of. The last mentioned have fought about twenty battles; but have not once given way before the insurgents.

April 29th.

The *Hochi Shinbun* says:—A telegram from Kioto on the 18th instant announces that, no

despatches having been received there from the South-West, Lieut.-Colonel Shino sent a telegram inquiring into the condition of affairs at the seat of war. The following reply was made by Colonel Ozawa:—The insurgents have assembled at Kiyama, Yabe, Mibune, and other places, which they are ready to defend. The imperialists are now maturing their plans of attack. Details will be communicated shortly.—A telegram from Kioto, sent at 7.15 p.m. the 18th instant, announces that on the 17th about 600 policemen, attached to the 3rd division of the army of reserve, were sent to attack the rebels at Mibune. During their march the insurgents kept up a continuous fire upon them from the bank of the river, and the police, in consequence of the inferiority of their numbers, could not keep their ground, and retreated as far as the banks of the Yasegawa in the evening.—A telegram from Kumamoto, sent by Yamagata and Kawamura, "war-inspectors," at 6.55 p.m. on the 18th, says that Kiyama, Yabe, Mibune, Otsu, and many other places are each occupied by about one or two thousand rebels. They seem to have no intention of retreating upon Kagoshima.—A telegram from Nagasaki, despatched at 1.40 a.m. on the 19th, states that since the rebels retreated from before Kumamoto, nothing has been heard of their commanders. But Ikenokami, Nagayama, Kawaminami, and a few other distinguished insurgents certainly committed suicide when Mibune was first taken by the imperialists.

NAGASAKI.

(From our own Correspondent.)

March 27th, 1877.

From the latest intelligence procurable here, on which any reliance can be placed, it would appear that the Imperial forces are slowly but surely advancing on Kumamoto, and the area occupied by the Satsuma men is gradually being reduced. But as the distance from the castle is lessened, so in proportion will the struggle increase; and the insurgents, as they find themselves hemmed in, will resist, if not with the energy of hope in a cause which is doomed, at least with the ferocity which despair will create. From all accounts but few rebel prisoners are taken; those slightly hurt bind up their wounds if able to do anything further in the fray, while those severely wounded or incapacitated, take their own lives sooner than stand the chance of falling into the hands of the Government troops.

The number on the side of the Satsuma men is estimated still at about eleven thousand but they are said to be in some strait, for not only ammunition, but food and clothing. On leaving Kagoshima they had only 3 or 4 yen each, and having spent that, they now make requisitions on the farmers and others as they go on their way, and in payment issue paper money, "payable when able." Within the last week or so upwards of 5,000 Imperial soldiers have been landed south of Udo, in the Otento Sama Sea, at or near Hinaga, and are now forcing their way north in order if possible to coöperate with the main body north of Kumamoto in the relief of the castle. Up to yesterday evening, no news of the southern force having got so far as Udo had been received. Saigo is reported as being still at Kawashiri, while Kirino, having been severely wounded, is said to have retired to his own country, where he died.

About 150 wounded officers and men—sol-

diers and policemen—have arrived here from Higo within the last four days. Some are located in Walsh, Hall & Co's bungalow, on the hill; and one of the tea-firing godowns in the settlement has been engaged as a hospital. The Japanese hospital is also full of wounded men, I believe. Most of these men are wounded by ball and only few comparatively with sword cuts. The distance of the forces to the north of Kumamoto on Sunday last, the 25th, was said to be 2 *ri*; and the southern body must be at least 15 miles from the castle; and as every foot of ground now will be strongly contested, and the nature of the ground will prevent anything in the shape of a decisive battle being fought, and as it is evidently the aim of the insurgents to fight under cover wherever possible, it is not probable that the fighting will be over in less than 15 days if even so soon. The new levies of Imperialists taken from the working classes, seem to make very fair soldiers, being much more amenable to discipline than most of the samurai are. They look cheerful and willing to do their best, and are generally more useful than the martial class of olden times, when needed.

The Government is still apprehensive of some of the insurgents escaping the forces now acting against them, and succeeding in getting across to Shimabara and so on to Nagasaki. Gunboats are constantly on the look out for this contingency.

There was a rumor here that there were many wounded soldiers and policemen in Hakata without a sufficiency of medical aid. How far this is true it is difficult to judge. The Government has refused offers here of foreign assistance in this line: perhaps eventually they may be glad to accept them, if there are many serious cases among the wounded.

28th.—No news as yet to day. Nor has any intelligence reached here of the relief of the garrison of Kumamoto castle, which has now been surrounded for some 33 days, if not more. The northern Imperial forces are reported still about 2 *ri* from that place where they have been for some days past; and their onward progress seems very slow. They expected to signal the castle on the 25th or 26th; and sanguine enthusiasts anticipated that the northern army of Imperialists would fight their way up in time to coöperate by the end of the month. The few miles that lie between Udo and Kumamoto are hilly and wooded, and the only roads are small bridle paths, where bodies of determined and well armed men, can keep an army in check for days together, and every step of the 15 or 20 miles will have to be forced as long as there are any Satsuma men to fight, for they apparently do not intend to surrender.

29th.—From the last report from Higo, the advance of the Imperialists towards Kumamoto is still very slow. The insurgents are burning all the villages in which it is possible for the Imperial troops to get shelter.

There is a rumor to-day of a rising in Chikusen in the vicinity of Fukuoka and that a small engagement had taken place near there. This has not, however, been confirmed yet.

The *Tama-ura-maru* arrived last night with some fifty wounded, and others are expected shortly. The last arrivals for the hospitals look as if they were satisfied with their little experience of war and its consequences, and glad to find themselves away from the busy strife. They appear to be very well treated in every respect.

LIGHTING THE SWAMP CONCESSION.

MEMORANDUM ADDRESSED TO THE DOYEN OF
THE DIPLOMATIC CORPS BY THE SWAMP
RESIDENTS.

TRANSLATION.

Whoever has followed attentively the development of the relations between foreigners and Japanese since the first treaty, due to American diplomacy, in 1854, to the present time: whoever has studied with care the different treaties or conventions which, at longer or shorter intervals, followed the conclusion of the treaty of Commodore Perry, must have been struck with the care which the different European negotiators took, without any exception, to reserve for their countries, in case of ulterior treaties, the treatment of the most favored nation.

This is a mode of action which, as much through a spirit of wise foresight as through courtesy, all civilized nations have adopted. We would even venture to think that in the degree of civilization attained to at this day by the greater part of the nations, the non insertion of this clause in a treaty would not prevent the contracting parties from acting, if occasion should arrive, exactly as if the clause had not been omitted.

Is it possible that the negotiators in stipulating, on behalf of all their nationals, for the advantages, privileges and immunities, which were or would be ultimately accorded to foreigners in Japan, foresaw that their nationals would not enjoy at Yokohama the advantages which would be accorded to them in the ports opened later? We cannot believe it, and yet such is the case.

By virtue of the principles inscribed in the treaties, the pioneers of civilisation in Japan, the earliest foreign residents at Kanagawa, had the right to expect that, on the opening of new ports to trade, the immunities which should be granted to the future residents in those ports, should be extended to them, if they did not already enjoy them themselves.

However, it has not been so, and not only can we see, by what follows, Hiogo and Osaka better treated than was Kanagawa, but also we have had the sorrow to bear witness that the first and most important of all the stipulations subscribed to by the Japanese government, in favor of the municipality of Kanagawa, Yokohama, was trampled under foot by the Japanese authorities from the moment of the signing of the convention which contained it.

Indeed (see subjoined document No. 1) the first document which we quote in support of our allegations has: "Art. V. . . . 'The proceeds of any such sales (of Swamp lots in Yokohama) shall constitute a municipal fund under such conditions as the Consuls may conjointly agree upon;'" and document No. 2, Art. V says. . . . "The proceeds, arising from such disposal (of Swamp allotments) to be added to a municipal fund which shall be employed for the making and drainage of roads, &c., and keeping them in repair."

But, who has ever heard, in Yokohama, of a municipal fund created and fed according to the tenor of these articles? No one certainly. The truth is that the Japanese government have collected, contrary to this convention, the whole of the proceeds of the sales and the total of the ground rents: that they have never made any outlay properly controlled for our municipality: that those which they have made have only been effected after many demands; and that the works

which they have condescended to undertake have been so badly done, that it has been necessary to begin them over again constantly.

Article XII of the same convention has . . . "to avoid all further discussion about the keeping roads, drainage, cleaning of the streets, and other municipal objects for which hitherto the Japanese local authorities have been held responsible in view of the high rental paid by all foreign leaseholders, it has been agreed that the objects shall henceforth be secured by the foreign land-renters themselves, and towards the expenses that must be incurred annually there shall be a deduction of 20 per cent from the yearly rent paid by all lands leased to foreigners, to be paid into the municipal fund."

Well, we ask any person having no interest in the question, what do these words "and other municipal objects" placed after the enumeration of road works mean, if they do not comprehend, in their general sense, the lighting of the streets, in so far, be it understood, as this lighting should become possible? Surely no one would dare to maintain that the plenipotentiaries of that day, the representatives of England, France, the United States of America, Holland and Japan, had the intention of inserting in this convention words void of sense. Should we not, on the contrary, admit that, if our representatives did not put the word "lighting" in their convention, it is solely because, then, the Japanese Government, not having the material means of lighting their own streets, could not reasonably be asked to light ours?

On the other hand, is it not logical to admit that our ministers thought they were acting wisely in employing this rather vague formula, which would leave the field open to the action of their successors, in the case when, the towns of Japan arriving at the enjoyment of the advantages possessed by the regularly governed (*policiées*) towns of the whole world, there would be an opportunity to claim the benefit of it for Yokohama at a favorable time?

Document No. 3, "Arrangements for the establishment of Foreign Settlements at the port of Hiogo and at Osaka," says, Art. III. . . . "The Japanese Government are willing that foreigners of those nations having treaties with Japan should enjoy at Osaka the same facilities for leasing ground and building houses as are secured to them by treaty at the ports."

It was then understood that the residents at Osaka should enjoy the facilities which we possessed. Was it not understood that, in our turn, we should enjoy those which we did not possess, and which might be accorded to them?

The seventh article of this document says: "All the ground leased to foreigners at Osaka and Hiogo will be subject to the payment of an annual rent, calculated at a rate that will be considered sufficient to meet the expenses of keeping in repair the roads and drains, the cleaning and lighting of . . . &c."

This document bears the date of the 16th May, 1867. At that time kerosine began to arrive from America, and it was easy to foresee that gas, already in favor at Shanghai, would not be long before it was introduced into Japan; and so the representative of Great Britain, always anxious to seize the opportunity of rendering service to his nationals, hastened to propose to his colleagues to bring forward the question of lighting the streets of Hiogo and Osaka.

Is not this fact sufficient to prove that lighting—having become possible—was, in the mind of the first contracting parties, the first thing to be obtained among these "other municipal objects," thus vaguely designated solely because the future alone could show those which it was possible to claim.

And now, in granting to the residents of Hiogo and Osaka the lighting of their streets, have charges, *ad hoc*, been imposed upon them which we ourselves do not sustain?

Document No. 4, which has the force of law, says, Art. III:—"The upset price of land to be thus leased at Osaka and Hiogo shall be eight bus per tsubo, of which six bus shall be retained by the Japanese government, in reimbursement of the money already expended by them in preparing the said sites, as building ground for foreigners, and the remaining two bus shall be transferred by the Japanese government to a municipal fund to be formed at each settlement, and to be used for the construction or repairs of roads and drains, lighting the streets, or other municipal purposes. The Japanese government consent to relinquish for the uses of this fund a moiety of all money that may be realized at the public sales of land at Osaka and Hiogo over and above the aforesaid upset price."

This is the manner, then, in which were formed the first funds of the municipalities of Hiogo and Osaka, and in consequence how the municipal funds of Yokohama, levied by the Japanese government, should have been formed. But who here can tell that the Japanese authorities have devoted to the formation of a municipal fund the quarter of the upset price of our lots, plus half the excess of this upset price?

On the subject of rents we read (in the same document, Art V):—"The annual rent of the said ground at Osaka and Hiogo shall be one bu per tsubu which shall be paid in advance into the municipal fund of each place, and shall be appropriated to the repairs of roads and drains, lighting the streets, or other municipal purposes—subject however, to a first charge of one thousand five hundred and twenty four bus at Osaka, and one thousand six hundred and forty one bus at Hiogo, which sums shall be paid annually to the Japanese Government, as the ordinary land tax due on the said ground."

In the first instance we remark that the assessment of rent at Osaka and Hiogo is one hundred silver bus per hundred tsubus: here we pay twenty seven dollars and ninety seven cents for the same area. Thus the difference is not very perceptible, and we do not think that an argument could be drawn from it to explain the concession of a serious advantage not possessed by us. But where the remissness of the Yokohama municipality appears to its greatest extent is when we see the smallness of the sums subtracted, by and for the Japanese Government, from the total amount of the ground rents of Hiogo and Osaka. In point of fact, in these towns, the Government is content to take, at Osaka 15, and at Hiogo 5, per cent. only of the rents: the remainder is left entirely to the municipality.* Thus, then, at Osaka and Hiogo

* These figures are thus explained. At Osaka the foreign concession contains 7,746 tsubus, for which an annual ground rent is paid plus one third of a bu per tsubu for the maintenance of the police: total paid annually to the municipality 10,320 bus. From this sum the government take 1,520 bus, and the remainder is left at the disposal of the municipal council.

At Hiogo, the concession, containing 40,247 tsubus, pays to the municipality yearly, also at the rate of 1 bu per tsubu, 52,672 bus, out of which

the municipality has at its disposal, 1st, the quarter of the upset price of the lots sold; 2ndly, the half of the excess of this upset price; 3rdly, eighty-five at Osaka, and ninety-five at Hiogo, per cent. of the annual rent of the lots; and these resources are amply sufficient to satisfy all the requirements of the municipalities of these places.

Why should it not be the same here? At Yokohama, the municipal revenues are collected entirely by the Japanese government. By what right is it that the government do not do for us what a foreign municipality would do, if it had given us the means to have one?

In 1865 people wished to have a municipality; but, in spite of the efforts and devotion of Messrs. Gay, Piquet, Wilkin, Boyle and Hegt, appointed members of the committee of the municipal council, nothing permanent could be effected, the Japanese authorities having reserved to themselves the lion's share in the division of the proceeds of the sales. On the 18th February 1866 (document No. 5) the members of the committee assert that it is probable that the outlay proposed to be made in this year (1866) if they are properly divided, will suffice "to mend the roads, keep the concession in good order, light the principal streets, &c." We see from this that at all times it has been recognised that lighting devolved upon the municipality.

On the 7th June 1867 (document No. 6) it is decided that the funds allowed by the municipality (twenty per cent of the rent!) are not sufficient to provide for the municipal expenses; and a committee of three members is elected to propose the adoption of new measures.

On the 13th June 1867, the municipal council (document No. 7) regret to have to declare that the funds placed at their disposal are not sufficient to provide for the urgent wants of the concession: they propose a subscription.

This subscription scheme not having come to anything, the municipal council decide on the morrow (document No. 8) that nothing remains for them to do but to dissolve, and to address to the proper persons a memorandum explaining their decision.

Finally on the 18th of the same month the municipal council declare that the body is dissolved (document No. 9)

After this decision the control of the municipality was handed over to the Japanese government, and on the 4th November, 1867, a convention was arranged, accepted by Mr. Ogasawara Iki-no-kami, regulating the position of a municipal director, chosen from among the foreigners, but attached to the Governor of Kanagawa, and paid by the Japanese government (document No. 10.)

Resting upon this convention and in concert with the Japanese government, the representatives of the powers decide on the 4th June, 1868, (document No. 12) that the municipal director shall be elected by a majority of votes of the foreign residents that he shall have \$350 a month and be considered as Vice-Governor.

Thence forward it was well understood that the Japanese government, having obtained full possession of the ground rents would again become solely responsible for all municipal expenses, be they what they might.

Such in an epitome of the history of the short-lived municipality of Yokohama.

In an article of the 26th June (1868) the

the Government deduct 1,641 bus for themselves, and 500 bus for the maintenance of a public garden: total 2,141 bus. All the balance belongs to the municipality.

Japan Gazette thus speaks of it (document No. 12). . . "The Japanese, charging a very heavy quit rent for the land that they have alienated to foreigners, in it acknowledged that they included the charge of lighting, cleansing, making the roads of, and protecting the settlement, but they did it so badly, that, at length, a municipal committee was formed, which having no real foundation quickly fell to the ground."

The rents of the lots conceded to foreigners at Yokohama (Bluff not included) bring annually to the Japanese government \$32,000 in round numbers. We are fully convinced that this sum is more than sufficient for the needs of our town, lighting included, and we are especially of opinion that if the works to be effected were offered to the tenders of European architects, engineers, or contractors, compelled to employ an engineer, not only would these works be much more durable than they are generally, but they would cost the government much less than all those of the same kind which have been undertaken up to the present time.

Nor can we allow that the Custom House at Yokohama which, according to the last statement of H. E. the Minister of Finance, alone brings to the revenue three times more than all the Custom Houses of the other open ports together, should not be called upon to participate in a fair proportion in the municipal charges borne by a town, which for these Custom Houses is a fowl of golden eggs.

We are not ignorant that the very rapid development of civilization in Japan has created some financial difficulties for the state, and we should be unwilling that the claiming of what we think we are entitled to call our rights, should either hurt the legitimate susceptibilities of a friendly government or bring any serious disturbance into their monetary receipts; and so after this statement of the grounds of our claim, we will only say to the Japanese government:—

1st:—When in 1860 the first lots of land were conceded to foreigners these lots were divided into three zones, namely:—The land close to the sea, or from the Bund to Water Street; from Water to Main Street; and from Main Street to the Homura Road. These lots having been considered with perfectly good reason to have a decreasing value in the order indicated, that is to say according to their distance from the sea, they were taxed with an assessment, the higher in proportion as the tenants were closer to the water. Later, when the Swamp Concession was made, although the value of lots therein is nearly one half less than that of those which preceded them, they were not classified and the rate of rent paid for them was and is the same as that of the lots on the Bund and in Main Street

2ndly:—From the first the work of drainage, cleaning, etc., etc., was done in the first concessions. In the Swamp, up to the end of the year 1870, our streets were left in such a state of deterioration and filthiness that they were often closed to circulation.

3rdly:—In conclusion, it is matter of public notoriety that our lots are of small or no value, and that, in consequence, it is materially impossible for the inhabitants of the Swamp to pay for the lighting of their streets, in addition to the enormous rents they already pay.

On these grounds, and leaving on one side, if you please, the question of right, we beg you, as a compensation for the state of neglect in which you have left us during more than ten years, to be kind enough to grant us the lighting of our streets.

YOKOHAMA RACE CLUB.

SPECIAL MEETING.

An extraordinary meeting of the Members of the Yokohama Race Club was held on the afternoon of the 18th instant, at the Grand Hotel, for the purpose of taking into consideration the propositions made by the Yokohama Racing Association for the amalgamation of the two clubs.

The following gentlemen were present:—Messrs. J. Dodds, M. Kirkwood, E. B. Jones, J. P. Mollison, A. Evers, J. Thurburn, H. O. Jeyes, E. Abbott, C. Braun, E. B. Watson, F. A. Cope, A. Mitchell, W. J. Cruickshank, A. Winstanley, A. Glennie, E. Wheeler, M.D., C. H. Haswell, J. Walter, A. H. C. Haselwood, H. Barlow, J. F. Pinn, J. A. Fraser, C. G. Dunlop, F. Pugh, W. M. Strachan, W. R. Bennett, &c.

Mr. Fraser was voted to the chair.

The Chairman said they had met in order to comply with a notice calling an extraordinary meeting for the purpose of taking into consideration the advisability of the amalgamation of the Club with the Association. A communication had been forwarded by the Association to the Club, which they had no doubt read in the daily papers. He might mention that the present meeting would not be called upon to discuss the rules of the Club: therefore it would be unnecessary to refer to them. He now called upon Mr. Foster to read a statement which had been prepared by the Committee.

Mr. Foster accordingly read as follows:—

Mr. Chairman and Gentlemen, — At a Special meeting of the Club held in October last, a statement was put forward by the Committee (our predecessors in office,) setting forth the differences which led to the formation of the Yokohama Racing Association, and explaining the pretensions of the so-called Trustees appointed by a number of the foreign Consuls—pretensions, it is needless to remind you, which were entirely repudiated by the Club. At that meeting a Resolution declaratory of the continuance of the Club was unanimously passed by the members then present. After a most successful Autumn Meeting, the yearly business of the Club terminated with the retirement of the old Committee and the appointment of the new Stewards, who have since the 20th Dec. last continued in office, and who now crave your attention to a brief review of the chief events which have claimed their care up to the present moment.

The question raised as to the custody of the Race Course remains undecided, necessarily, until a Title Deed shall have been issued by the Japanese Government to the representatives of the various Treaty Powers. Notwithstanding the anomalous position occupied by the so-called Trustees, an amicable understanding was arrived at between the Club and the Association, and the Course has continued to be used by them both upon perfect terms of equality, although it is worthy of mention the Association has seen fit to claim full right to the enjoyment of property created by the Club.

Early in the year, your Committee arranged an interview with the Committee of the Association for the purpose of resolving upon some plan for the joint maintenance of the Course; at the same time your Committee intimated their earnest desire to fairly discuss the misunderstandings alleged to exist between the two Clubs, with a view of securing the coalition of the two bodies if pos-

sible, and thus put an end to the somewhat unfriendly feeling which appeared to be gaining ground among the patrons of racing generally in the Community. To the latter proposition the Committee of the Association consented so far as to appoint a special Committee from their own number to confer with delegates from your own Committee. Regarding the joint maintenance of the Course, the Association professed their willingness to share the expenses attending the same, but required first to obtain the consent of the "Trustees" before pledging themselves. This consent was subsequently granted, and it was agreed the Clerk of the Course representing the Club should, with the co-operation of the Hon. Secretary of the Association, continue to manage the affairs of the Course, all expenses of which were to be borne equally by the two Clubs.

It should be understood at the outset, that in initiating these negotiations your Committee had no intention of assuming any responsibility which they were not fully entitled to bear. On the contrary, their object was to ascertain from the Association how far they were disposed to respond to the Committee's proposal of a fair discussion of all existing differences. Had a satisfactory understanding been reached, your Committee would have commended to the consideration of the members such a plan for the amalgamation of the two bodies, as, in their opinion, would have comported with the dignity and general welfare of the Club. Unfortunately no such desirable understanding has been attained: for at an early conference it became quite manifest to your Committee that the Association was disinclined to recede in any respect from the position they had assumed, but required the Club to subscribe to their Rules in their entirety. An effort was then made to frame a programme under which the two Clubs might join forces at the Spring Meeting: but your Committee regrets to report that these further endeavors were alike fruitless. At this stage of the proceedings, the Committee of the Association advocated a new plan, less open to objection than their previous proposals and one which your Committee took into serious consideration; but before any action upon it was possible, the Committee of the Association withdrew it. It being apparent, therefore, that the Association were animated by no liberal spirit of concession, all negotiations were suspended, and your Committee turned their attention to the drawing up of the programme for the Spring Meeting, and they think the members are to be congratulated upon the promising aspect of the approaching events.

Having persistently abstained from yielding any one point to which the Club might fairly have tendered an equivalent, the Association now comes forward with what they term "fresh" proposals for an amalgamation: but your Committee is forced to declare in self defence that these new proposals which have been so particularly brought to your notice, embody no single proposition which has not already been the subject of deliberation between the Committees of the two Clubs.

The communication of the Association having been laid before the public with the object, it is to be presumed, of arousing their sympathy, your Committee could no longer hesitate to call an Extraordinary Meeting of the members, for the purpose of explaining the circumstances attending the whole of their negotiations with the Association. Your Committee were furthermore impelled to pursue this course that they might not remain

under the imputation (should such be made) of displaying any indisposition to consult the best interests of all lovers of true sport in this community.

Your Committee refrain from any comments upon the proposals in detail, but beg to remind the members that the Association will demand a complete and entire acceptance of the terms they have dictated. It has even been intimated that if an unconditional acceptance of them is not now made, the Association will cease from further efforts to propitiate the Club. The Club is called upon, therefore, to surrender its existence forthwith, for in your Committee's opinion a compliance with the plan proposed is tantamount to an absorption of the Club into the Association, under another name it is true, but with a complete abandonment of the principles for which the Club has hitherto contended. If the separate existence of the Club is no longer possible, the most dignified course for it to pursue would be to dissolve of its own volition. Your Committee will not admit that such a step is necessary or desirable.

When convening the present Meeting, your Committee were quite aware that no definite action could, under the Rules of the Club, be taken upon any proposition affecting its constitution. They nevertheless felt warranted in thus consulting the wishes of the members; and having laid before you an account of all that has transpired, they request your instructions to enable them to deal with the propositions presented by the Association.

Before taking leave of the subject of an amalgamation of the two racing societies, your Committee are desirous of expressing their conviction that a combination is highly desirable if it can be attained in a satisfactory manner. That it can be effected in a way acceptable to all true and earnest friends of sport your Committee does not doubt.

Your Committee respectfully submit the result of their labors, taking this occasion to assure the members that they have always endeavored, to the best of their ability, to maintain the integrity and dignity of the Club.

F. E. FOSTER,

Hon. Secretary.

C. BRAUN.

E. B. WATSON.

W. J. CRUICKSHANK.

AUG. EVERS.

The Chairman said he thought thanks were due to the Committee for the full report they had drawn up. He considered that it would have a tendency to dispel the idea prevailing among the public, that the Club had not endeavoured to bring about an amalgamation. He did not think the meeting would be inclined to an amalgamation at the present time, and thought that it would be better after the forthcoming race meeting to re-open negotiations relative to an amalgamation of the two Clubs.

Mr. Bennett asked that the whole of the correspondence which had taken place between the Club and the Association be read by the Hon. Secretary.

The Hon. Secretary said the Committee had not considered it necessary to read the correspondence, as it did not show fully all that had transpired between the Association and the Club, several verbal communications having taken place.

Mr. Bennett then propose

"That the Secretary read the entire correspondence that has taken place between the Yokohama Racing Club and the Yokohama

Racing Association, relating to what had been done to bring about an amalgamation of the two Racing Clubs." Mr. Middleton seconded the proposition.

Mr. Mollison proposed, as an amendment

"That the statements of the Committee just read by Mr. Foster be considered sufficient by the members present to enable this meeting to be proceeded with."

Mr. J. Walter seconded this.

The Chairman put the amendment first to the meeting.

The motion having been put, the amendment was declared duly carried by a majority of four.

Mr. Dodds remarked that he thought the Committee had done well to call the present meeting, as by so doing it had been shown that the Club had not altogether been to blame for the failure of an amalgamation between the two racing societies. He was in favour of an amalgamation, but not upon the terms dictated by the Association. He would propose that it be:

"Resolved that the Committee be instructed to inform the Stewards of the Yokohama Racing Association in reply to their propositions for an amalgamation of the two Societies, that no action can be taken upon said proposition prior to the approaching Spring Race Meeting or before the General Meeting of the Race Club to be held one month later. But that the Committee, at the same time, assure the Association of their desire and willingness to effect a coalition of the two Societies upon a mutually satisfactory basis."

Mr. Thurburn seconded the proposition.

Mr. Kirkwood proposed an amendment.

"That if an amalgamation be illegal, and therefore impossible, before the coming Spring Meeting, then, that, the two Clubs run together under a joint programme to be settled by the two Committees, and the prizes to be subscribed equally by each Club."

Mr. Bennett seconded the amendment.

Mr. Mollison remarked that, before the amendment was put to the meeting, he would, as an owner of ponies, object to it, as he thought it quite unconstitutional.

Mr. Cope said that he thought the Committee had not acted fairly to all members. They had made four races exclusively for a certain number of ponies that had been imported by private subscription, and the members who had imported China griffins were debarred from competing in the same, although the supposed subscription had never been made open to all members.

Mr. Foster said that the question of a joint programme had been considered by the Committee, and they had come to the conclusion that such a course of action was not feasible.

Mr. Strachan protested against the amendment being put to the meeting. The Committee had framed a programme and they were bound to carry it out; in fact they were not in a position to withdraw if they were so inclined.

Mr. Bennett thought if the members were really desirous of bringing about an amalgamation, they could make the two programmes into one and increase the value of the prizes.

Mr. Foster was of the opinion that the members had no right to dictate to the Committee as to how they should act. He thought the amendment was out of order.

The Chairman said that, after consideration of what had been said, the amendment was out of order. The meeting had gathered

for a certain purpose and it could not be alleged that the object was not made public. As the meeting had been called and its purpose specified, he considered it a slur on the Committee that such an amendment was put. He would rule it out of order.

Mr. Kirkwood asked the Chairman under what rule of the Club the present meeting had been called.

The Chairman replied that he did know that there was any rule for the calling of special meetings; but it had been called at the request of a certain number of members.

Mr. Kirkwood asked the Chairman another question, but he, the Chairman, declined to answer it, and intimated that he was not to be coerced into giving an explanation of his reasons for ordering the amendment out of order. (Applause.)

Mr. Foster having explained that the Committee had framed a scheme for the amalgamation of the two Societies, and that it would be submitted to the Racing Association after the forthcoming meeting, a vote of thanks was passed to the Chairman and Committee, and the meeting dissolved.

Miscellaneous.

On the 12th inst. at 2 p.m., a fire broke out in Tokio, at Yotsuya, Shinjiku, Kami Machi, No. 16. A very high wind was blowing at the time, so the efforts of the firemen would have been of little avail if there had been much to burn. Fortunately, however, the situation was well outside of the city, and the direction of the wind also was such as to carry the flames across the road at right angles instead of along it, so that they soon came to an end at the open fields. As it was, between one hundred and sixty and two hundred houses were burnt. The godowns suffered more severely than usual, most of them being very badly damaged and some entirely destroyed.

The lad, George Harvey, who was recently killed on board the U. S. S. *Alert* by a fall from the main yard, was a great favorite with his shipmates, whose esteem he had gained by his willingness to oblige, and still more by his filial care for his mother, an old woman, deaf and dumb, whom he supported out of his pay. To mark their esteem for his memory, and to prevent his mother from feeling too severely the pangs of poverty in addition to the grief she must bear for his loss, they have subscribed among them the handsome sum of upwards of \$400 to send to the old woman. A tombstone to Harvey's memory will be erected in the cemetery, and the cost of it will also be borne by the officers and crew of the *Alert*.

We received by last mail a copy of the Annual Directory of the City and County of San Francisco for 1877, compiled by D. M. Bishop & Co., and published by B. C. Vandall. A valuable work, carefully collated and well arranged, and containing all conceivable information, statistical and other, relating to the great mining and commercial centre of which it treats.

It may not be altogether without interest to some of our readers to observe the importance of the business of marine insurance now carried on in Great Britain. We have before us the annual reports for 1876 of six of the limited liability marine offices doing business in Liverpool, the British and Foreign, Union, Maritime, Standard, Sea, and Imperial, the

three latter being comparatively new and small companies. In round figures the gross value of the property insured by these companies in 1876 was £81,650,000 sterling, of which sum the large proportion of 80.3 per cent., or £64,800,000, had arrived or been accounted for at the close of the year, leaving 19.7 per cent., or £15,852,500, at risk. The premiums received amounted to £910,015, or equivalent to £1.26½ per cent, while the claims paid only amounted to 8 shillings and 5 pence per cent., or £339,320. The subscribed capital of these offices amounts to £3,550,080 of which £813,302 are paid up: the accumulated funds after payment of dividends amount to £1,860,160; while the reserve fund is equivalent to 41 per cent. of the whole paid up capital. The dividend payable on 1st January last, varies from 2½ per cent., declared out of interest on investments of the Imperial, a company only one year old, to 25 per cent., paid by the British and Foreign, now in the fifteenth year of its existence, the average dividend being 12.58 per cent. Unfortunately, we are not in possession of the exact reports of six other marine companies doing business in Liverpool, but we can state their gross insurances would add over £120,000,000 sterling to the sum already mentioned, giving a gross total of property covered by marine insurance, in Liverpool alone, in the year 1876, of £201,650,000, or say one thousand million dollars.

THE M. B. M. S. S. *Shario-maru* has been sent to the Bonin Islands with rice and stores.

THE other day five Satsuma men were arrested at the Shinbashi Railway Station, and thirteen more were taken into custody in Uyeno Gardens. It is not known of what they are accused or suspected.

THE steamer *Raiden-maru*, belonging to the out Kaitakushi has recently been handed over to the Navy Department. Her repairs have been completed at Yokoska dock. She will be employed as a transport in the inland sea.

AT about 1 a.m. on the 12th inst. a fire broke out in the city of Miyagi, Sendai, and was not extinguished till about fifty houses were burned. At about 8 a.m. the same day a fire declared itself at Haramachi, Tokio, and burned about one hundred and fifty-five houses.

PAYMASTER Charles P. Thompson, U.S.N., who only arrived from San Francisco by the *City of Tokio* on the 31st ult., and had just assumed charge of the U. S. Naval Stores at Nagasaki, the other day tried to commit suicide by cutting his throat. The attempt was fortunately frustrated, and the wound inflicted on himself by the officer was slight, and is now in course of being healed. No reason is assigned for the act. There is a theory however, that Mr. Thompson, the late Captain Marvin, and many other officers, have felt much hurt at the recent harsh action of Congress towards the Navy; but that is certainly not sufficient excuse for high-minded men, in positions of trust and honor, to lay violent hands on their own lives. They should remember that they are the servants of a great nation, rather than of a not too perfectly constituted governing body, and leave to the sure justice of time their vindication, individual and collective, from unmerited blame.

THE shizoku who were arrested in the Uyeno Gardens on the 12th instant, are said to have confessed that they had formed a design to effect an entrance into the residence of —, an ex-daimio, at Negishi, where they hoped to

obtain a large sum of money said to be in possession of the nobleman. Then they intended to make for the mountains of Nikko, there to raise the standard of revolt. On the morning when these conspirators were arrested, Itahashi, Enotsu and other shizoku paid a visit to the house of a friend of theirs, named Uta, who happened to be absent from home. They adjourned, therefore, to dinner at the Gannabe restaurant, near the temple of Kiyomidzu, where they were arrested by the police. Uta was afterwards also taken into custody in his house, where swords, and documents said to inculcate him were discovered.

THE report that a portion of the Kumamoto garrison had cut their way through the be-seigers' ranks and arrived at the imperial head quarters, is confirmed by the native papers. It is said that Saigo is now in the field in person—he appears so far, in accordance with the wishes of his people, to have abstained from active fighting —, and that his presence inspires the most boundless confidence in his followers.

LOT No. 27, the American Legation, was sold at auction by Messrs. Bourne and Co., on the 12th inst and brought only \$2,100.

THE following letter, sent by the Committee of the Racing Association to the Yokohama Race Club, has been handed to us for publication.

To the Stewards of the "YOKOHAMA RACE CLUB."

GENTLEMEN:—We beg to address you in the hope that a fresh effort on our part may induce you to consider the question of an amalgamation of the racing interests of this place, which will do away with the present anomalous and unsatisfactory condition of affairs.

As there would seem to be an unusual interest taken by the foreign residents in the sport of racing this Spring, we feel convinced that the present is the period at which such an arrangement can be most easily effected.

To simplify matters, we proceed at once to lay before you the terms upon which we consider the proposed amalgamation can take place, which we think will be supported by the members of the Association which we represent, as well as commend themselves to the good sense of your Club.

First.—That the present members of the Yokohama Racing Association, and Yokohama Race Club, constitute themselves a Society, for the encouragement and general good of racing in Yokohama, and for the support and use of the present Race Course, and that to this Society, all foreign residents in, and Japanese officials of this country, have access, upon payment of an annual subscription of \$10, or a half-yearly subscription of \$5, towards the expenses of keeping the grounds in proper order and the buildings, fences, etc., in proper repair. For such subscription they shall have free entry to the Course and enclosure at all times, and shall be allowed to ride at races and to enter ponies in accordance with rules provided for in proposition No. 2.

Second.—That a Jockey Club be formed for the purpose of drawing up rules for race meetings in the spring and autumn of each year, and for generally managing the affairs of the Race Course.

Third.—That the Members of the two Committees of the Yokohama Racing Association and Yokohama Race Club constitute a nucleus for the formation of the Jockey Club, and that they Ballot for the first twenty applicants who may desire to become members; thereafter the Ballot to be general by members of the Jockey Club.

Fourth.—That the rules of Newmarket and of the Jockey Club of England govern all matters connected with the actual sport of racing in Yokohama.

Fifth.—That the Jockey Club draw up additional By Laws applicable to and necessary for the good of racing in Yokohama, to be taken from the rules at present existing of the Yokohama Racing Association and Yokohama Race Club, but to embody in any case the additional By Laws of the Yokohama Racing Association relating to the declaration of intending runners at the races of each day.

Sixth.—That the funds of the two present institutions, as well as all funds collected and to be collected from all members of the Society (of which the members of the Jockey Club must individually form part) whether general subscriptions or entrance and other fees, shall be placed in the hands of a Committee to be elected by the Society, from among the members of the Jockey Club, which Committee shall expend the funds to the best of its ability for the good of racing and the proper maintenance of the Course itself, and shall be accountable for such expenditure to the whole body of subscribers.

Seventh.—That the Jockey Club shall have general control of the Race Course, but that no important changes in the present rules or in the management of the Course shall take place without the same be submitted to a general meeting of subscribers, who themselves shall not be empowered to make any alterations without at least fifty of them be present at such general meeting.

Eighth.—That a fixed programme be drawn up by the Jockey Club, which shall remain in force until any change may be made in accordance with proposition No. 7, to be in force for and after the next Autumn Meeting, but that for the present Spring Meeting, the Committee of the Y. R. A. and Y. R. C. shall together draw out, upon the basis of the present published programmes a programme for four days racing, such programme to embody at intervals during the four days (in fairness to all persons who have been induced to import so called China Griffins upon such understanding) at least six races for China Griffins only, in which races all bona fide China Griffins shall be allowed to enter.

These proposals, we would wish you to believe, have been only made after due consideration for the interests of all concerned, and as the time is drawing near for the Spring Meeting and the matter is one requiring prompt action, we shall thank you for a reply at the earliest possible moment.

For the information of Members of this Association, and of the public in general, we purpose forwarding a copy of this letter and of your reply to one of the daily newspapers for publication.

(Signed) R. DE MONBEL,
" EDWARD FISCHER,
" E. DE BAVIER,
" HENRY ALLEN, JR.,
" S. J. ELDER.

Committee, Y. R. Association.

Yokohama, April 9th, 1877.

SOME TIME during the night of the 16th, a godown in the settlement was broken into; but never did a burglar fall into a warmer trap than on this occasion. After effecting an entrance through the window by forcing aside the iron bars, he quietly placed his foot in an open vessel of oil of vitriol. We do not know which to pity most, the would-be thief or the proprietor. In all probability the strong corrosive substance burned the flesh to the bone before relief was obtained. The effects of the acid seem to have effectually diverted the thief from his purpose, as no loss was sustained beyond the spilling of the acid and the damage done to the window.

The house of Mr. Martin, No. 239 Bluff, was broken into on Saturday night, the 14th-15th instant, probably soon after midnight. A parlor clock with its marble stand, a tablecloth, hearth-rug, and several small articles were carried away. The thief or thieves made their entrance through one of the windows which they forced open. The burglary was not discovered till Sunday morning when the family rose.

We have to acknowledge the receipt, from the Senior Vice-Minister of Education, of the second annual report of the Educational Department, being for the seventh year of Meiji (1874.) The report itself is a volume of nearly eight hundred pages. It is accompanied by a small pamphlet in English briefly noticing the educational results of the year under review.

BETWEEN one and two a.m. on the 17th, a fire commenced at Tokio, Fukagawa, Kuroycho. Although but little wind was blowing the flames were not got under until daylight, and a large area was burnt.

A slight shock of earthquake was felt early on the morning of the 18th instant.

THE imperial commanders, are, there is no doubt, about to employ balloons for reconnoitring the rebel positions. The apparatus and spheres of several are being made in Tokio, and a well-known foreign chemist in this town is busy preparing the water-proofing solution with which they are to be coated.

A LARGE number of residents visited the Public Gardens on the evening of the 17th inst. in the expectation of seeing, as promised, the horses imported from San Francisco for the Japanese Government. The trainer in charge received at the last moment a message from one of the directors of the Kangio rio, who in sending it either must have been ignorant of the announcement which had been made, or, knowing it, was guilty of grievous rudeness to the public, ordering that on no account the horses should be moved from their stables until he himself came down from Tokio. For ourselves, we have nothing to do, but to express sincere regret for having been made the means through which an appointment with so many people was made, only to be broken.

On the 17th, a large concourse of people, natives and foreigners, visited the Uyeno gardens to see the flower show. The weather was fine in the morning, and the visitors, of whom there were many from Yokohama, were delighted. A military band was in attendance, and played at intervals in the grounds of the Seyoken establishment, where H. E. Count Fé d'Ostiani entertained at dinner eighty guests including the principal Japanese officials in Yedo, notably Prince Higashi-Fushi-no-Miya, and their excellencies Iwakura, Terashima, Mate-no-Kuji, as well as the Foreign Ministers and the principal members of their staffs, the officers of the French military mission, and, last mentioned but not least important, several ladies. The day was the Matsuri, or anniversary of the death of the Siogun Iyeyasu, the avenue to whose temple was lined with flowers, not of the choicest description which were there exposed for sale. The appearance of the gardens brilliant with flowers, and the trim walks thronged with merry well-dressed crowds of Japanese of both sexes and of all ages, dotted here and there, with foreigners separately or in groups, was, at least while the sunshine lasted, gay in the extreme. During the afternoon, however, the sky clouded over, and in the evening rain, light at first but afterwards in a heavy downpour, fell and caused the guests who had lingered to make the best of their way homeward.

Owing to want of good arrangements, or rather through proper announcement not having been made, many hungry visitors were unable to get dinner, which was only served to the public between the hours of three and five p.m. So that many gentlemen of Tokio who had invited parties of guests to dine with them at the restaurant at a later hour found that no meal of any description could be had. One hospitable Amphitryon had six famished convives dependent on him for dinner, and he had to take them elsewhere. There is little fear, however, that they went to bed fasting. Experience teaches; and if Spring flower shows are, as would be desirable, to become annual, the management of the Seyoken will no doubt

learn from the unexpected demands made upon them to be better provided in future. The number of visitors yesterday was much greater than was expected, and the exhibition may be pronounced a success.

HAKODATE, April 3rd, 1877.—The American barque *Annie W. Weston* arrived on the 1st instant from Yokohama. The Kaitakushi steamers *Komei* and *Shimbei* are running alternately every two or three days between this and Awomori. The Swedish barque *Hedvig*, which came in on the 28th inst. from Shanghai, leaves to-morrow for that port. The Japanese schooner *Efuku*, recently reported lost, was got off the rocks on which she struck, and has been repaired. Another Japanese schooner, the *Misho*, capsized in the harbour on the night of the 27th—28th inst.

Range of temperature for past fortnight 32° to 46°. Heavy gale on 27th, 28th and 29th, commencing at E. and shifting to S. W. Barometer fell to 26.86. A small fore-and-aft schooner was launched to-day. Three others are building.—At 5h. 15m. p.m. on the 27th, there was a smart shock of earthquake.

HAKODATE, April 13th, 1877.—The American 3-masted schooner *Roving Sailor* arrived on the 6th instant from Yokohama. The Swedish barque *Hedvig* left on the 5th instant for Shanghai. The Kaitakushi steamers *Komei* and *Shimbei* are running alternately between this and Awomori. The Kaitakushi steamer *Hakodate*, which sailed on the 11th instant for Otaru, took on board the "military settlers," brought hither a few weeks since from Sapporo to garrison the fort. It is reported that she will take on board those remaining at Sapporo and Otaru, and proceed with them to Nagasaki.

Range of temperature since 1st inst., 31° to 48°. Weather for the most part fine with variable winds. A shock of earthquake was felt on the morning of the 11th instant at 8h. 30m.

DURING the night of the 16th instant a burglar broke into the Mitsui Bank in Yokohama and abstracted thence a large sum, said to be about thirteen thousand yen. He was arrested on the 18th instant. The native papers which report this omit to state whether the money was or was not recovered.

THE authorities of the Kangio rio, on taking over the horses bought by their commissioners in San Francisco and imported in the *Gaelic*, have expressed their satisfaction at the excellent condition in which they were delivered, and made a small present to the trainer in whose charge they were brought over.

Nippon Notes.

(From the *Choya Shinbun*, April 8th.)

AFTER the Press Regulations were established, it became customary to insert circles in the newspapers when it was desirous to suppress the publication of anything. But since the new regulation has come into force, which prohibits the publication of a journal until its contents have been examined by the police authorities in Tokio, and the kencho officials in the provinces, these circles have been used profusely; and frequently large blank spaces have been left or been filled up with other matter of no material import. Sometimes not a character has appeared in a whole column; and the space thus left is as useless as the *Sorencho*. In other columns

blank lines appear as numerous as the masts of the shipping anchored off the shores of Shinagawa. This has created a great revolution in newspapers; and is one of the most surprising regulations that have been framed either in ancient or modern times.

The clever editors of the *Akebono Shinbun* were the first to introduce circles in lieu of the names of high officers, and their example was speedily followed by their contemporaries. The small circles referred to may sometimes indicate the name of the person which has been suppressed, but nothing can be understood from blank spaces, which only have a tendency to excite the public. When the public perceive in the newspapers a number of blank spaces as well as a number of circles, their curiosity is aroused, and they fill the vacant columns from their imagination. A common feeling among mankind is to desire to see forbidden things, and to hear what is being said in secret. So, as our countrymen observe the circles and blank spaces in the papers, they at once begin to conjecture what the items were that were marked out, and suggest one to another that this blank has contained the number of wounded on the imperial side, while that blank on the opposite side of the paper has had an announcement, before being subjected to the official revision, showing great loss on the part of the troops, or a rising in Fukuoka and other places. It may be very foolish and create ridicule that persons should entertain these ideas, but it is only natural. During the course of a day no one is afraid to walk abroad in the streets or through the mountains, but at night nervous persons frequently mistake a tree on the roadside for some kind of monster or ghost on account of being overcome by fear. Now is the time when telegrams and express letters are received from every direction; and the blanks and circles in the papers create suspicion. True reports from the South-West we cannot obtain; and the public begin to doubt the constant cry of "Victory of the Imperialists, which is heralded daily by the papers."

(From the *Choya Shinbun*, April 11th.)

When a person only perceives what is plainly obvious to his vision at the present time, and attempts to penetrate into the future to ascertain the probable results of a certain course of procedure, he will most likely be surprised if his anticipations have not been realised. Before undertaking to carry out any enterprise, it will, therefore, be better for him to calculate beforehand what benefit or evil will be likely to accrue to himself and the public ere he embarks in it; otherwise he may at his leisure repent that he had acted without counting the cost.

Recently we have distrusted the system adopted by the Government for the levying of troops. In a late issue we commented on the action of the government in levying a body of police to send to the South, and showed the evils that were likely to arise from such a policy. The anxiety we feel for our country is not caused so much on account of the difficulty experienced by the Imperial forces in subduing the rebels, as by the fact that other than the same class of men are engaged to suppress them. The Imperialists have only to contend with one party of insurgents, who have no means of receiving re-inforcements—and though they are numerous and renowned for their prowess, the regular, well disciplined troops are sufficiently strong to suppress them without the aid of police. We have repeatedly asserted this in our paper.

According to a rumour which has been in circulation, the government have commenced

raising recruits among the shizoku of Chugoku and Nankaido and do not intend to stop until they have succeeded in obtaining 10,000. We suspected this: and when notification No. 9 was issued by the *Daijo Daijin*, we found that the rumour had some foundation; and our distrust in the whole scheme increased considerably. We fail to observe the utility of organizing such a force, when the insurgents are gradually being driven into smaller space, and have become much discouraged; and we do not understand the motives of the government.

Why is it that the government have thought proper to change the former method of levying troops? It was seen that for the whole army to be composed of samurai only was not good for the country, and in consequence a new regulation was established and the army was put on a foreign basis. It is now about five years since this new regulation came into force, and the army has been raised to 50,000 efficiently drilled troops. Since the rebellion has broken out however, the government have changed their plan of operations and are again collecting in the Solhei. In foreign countries volunteers are frequently raised in time of war; but volunteer corps will not answer in Japan as all the volunteers will consist of one class of shizoku; and on the suppression of the rebels they will be likely to cause considerable trouble from the revival of the feudal spirit.

NOTIFICATION No. 2

It is hereby notified that the Tokio Kaisei-Gakko and the I-Gakko under the jurisdiction of the Monbusho, are amalgamated, and the new institute is called the Tokio Daigaku (University of Tokio).

TANAKA FUJIMARO,
Vice Minister of Monbusho.

12th March, 1877.

THE Vice Minister of the Monbusho has also notified that the Eigo-Gakko in Tokio, under the jurisdiction of the same department, is to be called the Tokio Daigaku-Gobimon, and will depend upon the university of Tokio, in future.

A SCHOOL of midwifery has been opened for female students in the "Jugen Bio-in," Japanese Hospital at Nogé. The regulations for the admittance of twenty students to a three years course have been promulgated by the Governor of Kanagawa.

MR. FUKUCHI, manager of the *Nichi-nichi Shinbun*, has been for some time at the seat of war, as special correspondent for his journal. He recently returned to Osaka, where he was commanded by H. E. Kido to report the state of affairs in the field to H. M. the Mikado. On the 6th April, the talented writer was accompanied to the Imperial palace in Kioto by Mr. Uyemura, Mayor of that city. H. M. the Mikado, Their Excellencies Sanjo, Kido, and many other ministers and nobles were waiting for him. Mr. Sugi, Vice-Minister of the Kunaisho, escorted him to the room where the Mikado is accustomed to listen to reading. There the manager held forth on his experiences of the war for two hours from 10 a.m. until noon. When he had finished, he was hospitably entertained, and a present of 50 yen and two rolls of crape (*chirimen*) was made him on the part of the Mikado.

THE Governor of the Tokio-fu has prohibited the sale of those flaming prints, issued by some of the newspapers, purporting to represent "The penetration of the Kagoshima Insurgents into the Kuma-moto ken!" "Explosion of a mine filled with powder at Kuma-

moto!" "Bloody engagement in Kuma-moto!" and so on.

MR. NAKAMURA, editor of the *Bisaku Shinbun*, has been condemned to 15 days' imprisonment, and a fine of 12 yen, for having published an offensive letter in his paper.

H. E. COUNT Fé d'Ostiani, Italian Minister, being about to leave Japan for his new post in Brazil, will shortly proceed to Kioto in order to take leave of H. M. the Mikado.—*Hochi Shinbun*.

DURING the night of the 9th, one hundred and twenty-four houses in Tokio were entered by robbers; and the robbers of forty of the houses were armed with swords.

FOR the past few days strong winds have been blowing and fires have declared themselves in four different places in Yokohama, viz., 6th Street, Bentenbori, 3rd Street, Minami Nakadori, Bashamichi, and 4th Street, Sumi-yoshi-cho. They were extinguished, however, before much damage was done.

THE *Hochi Shinbun* says that His Majesty the Mikado, and Their Majesties the Empress and Empress Dowager, are likely to stay some time longer in Kioto, as their summer clothing has been sent from Tokio.

THE Nobles' Club is now going to establish a hospital in Hakata, Chikuzen, for the wounded Imperialists.

MR. Watanabe Nobori, Governor of Osaka-fu, has issued a notification respecting the levying of fresh troops, in which he announces that, by order of His Majesty, the Mikado, applications to be enrolled, from all shizoku or heimen between the ages of 17 and 40, residing permanently or temporarily in Osaka, who have formerly served in the army and may be desirous of bearing arms in the present struggle, will be received until the 20th instant. At the bottom of the notification is a paragraph urging quick dissemination of its purport among the people under the jurisdiction of the Osaka-fu.

H. E. YANAGIWARA, late messenger to Shimadzu, has been ordered to attend at the Imperial palace in Kioto. During his absence Saito Toshitsura will act for him.

SIX subordinate officials of the *Daijo-kuwan* have been appointed censors of the press in Tokio. Their office is to examine the proof sheets of newspapers before publication of the same.

Two battalions of volunteers will soon be formed in Tokio.

SIXTY-TWO soldiers of the Osaka garrison, who deserted on disembarkation at Kobe, have been arrested, and, on the 6th instant, they were escorted to the Osaka barracks by a body of police.

NO PICTURES representing scenes from the insurrection are allowed to be sold in Osaka until after they have been approved by the censors.

ABOUT 500 shizoku, formed in Hakura into a corps for the defence of the city, are said to have disappeared.

H. E. Mr. Sanjo Saneyoshi in Kioto will shortly return to Tokio, and H. E. Mr. Iwakura will take his place in Kioto.

THE nobles of Tokio will soon leave for Kioto to inquire after the health of H. M. the Mikado.

SEVEN of the retainers of the ex-daimio Tokugawa Iyetatsu were sent by their lord to study in America. Six of them returned to Japan in the course of last year. The seventh, by desire of his teachers, remained to complete his course of instruction in painting, and has

already become a proficient in his art. One of his pictures was purchased by a certain official the other day for eighty yen.

H. E. IWAMURA, the new governor of the Kagoshima-ken, has left for Nagasaki, where a temporary district office is to be opened. Mr. Watanabe, chief secretary of that ken, and about fifty subordinates, will follow him shortly. They are to stop in Nagasaki till the rebellion is totally suppressed.

THE *Hochi Shinbun* says that private telegraphic communication will soon be allowed to be resumed throughout Tokio, and from the railway stations between Tokio and Yokohama.

On the 14th instant a fire broke out at Yonemachi, Awomori, which was, however, extinguished before much damage was done.

On the 16th instant, Mr. Kukuma, of the *Hochi Shinbun*, was ordered to appear before the Tokio Saibansho.

(From the *Choya Shinbun*, of the 17th April.)

What are the ideas of our countrymen on reading the extra of our paper, issued on the 16th? The castle of Kumamoto was first laid siege to by the insurgents on the 22nd February, and it was surrounded for fifty-two days, till the 10th of this month, when the rebels were obliged to raise the siege. The small garrison was beleaguered, and several battles were fought between the imperialists and besiegers. The resistance of the garrison caused great trouble to the insurgents, who could not march with their entire power against the imperialists by the various roads; and the imperialists at length arrived in the castle without much difficulty. The rebel troops, who are not much afraid of death, are less in number than 20,000. During the defence of the garrison in the strong and commanding castle of Kumamoto, the insurgents were impeded in their operations against the imperialists who were trying to relieve it. The troops on the Uyeki, Yamaka, Yajiro and other roads advanced with daily victories. It is right to say that the 3,000 soldiers in the castle considerably aided the imperialists outside in their efforts to arrive thither. They supported all sorts of hardships in the fortress for fifty-two days. Notwithstanding this, they held their ground, and no rebel was allowed to take one step in the castle. Their constancy has prevented the rising of discontented shizoku throughout the empire. The defence of Kumamoto was as important as that of Waiyo (China) by Chokio, and as that of Kongo-zan by General Kusunoki. When the insurgents first burst into the Kumamoto ken, it was at once apparent that the cause of the imperialists depended on the keeping of the castle; and the conduct of the discontented shizoku scattered throughout the empire, who were in communication with the Kagoshima men, might well have been expected to be decided by the fate of the castle. If the brave Satsuma rebels, numbering more than 15,000, who have no regard for their lives, had marched directly with their entire power against Kumamoto, the imperialists would at once have been obliged to retreat before them. But fortunately the insurgents were obliged to divide their forces, in order to attack the castle on the one hand, and to fight against the armies sent against them on the other. When they saw that they could not take the castle by force, they determined to wait for the exhaustion of the provisions. The imperialists by various roads, heedless of their unfavourable positions and their great loss, advanced over the bodies of their dead comrades, wishing to join the Kumamoto garrison as quickly as possible, because if the castle

were to be taken by the rebels, the suppression of the latter would be no easy task, and the whole island of Kiushu would be thrown into disorder. When the rumor of the fall of Kumamoto was heard a short time ago, the editor of the *Nichi-Nichi-Shinbun* and ourselves said that it was a matter of no importance that the fortress should have fallen into the power of the rebels. We wrote in this strain, however, wishing merely to still that excitement among the people which was provoked by the false rumor. But who was there who was unaware that the fate of the war depended upon the preservation or the fall of the castle? If what we heard a few days since is true, when Lieut-Colonel Oku fought his way out with one battalion of the garrison troops, the provisions in the castle were not enough for ten days, and the hardships of the garrison were unutterable. Fortunately for the imperialists, the insurgents had become greatly discouraged, while the armies on the Uyeki and Yamaka roads were marching along victoriously, giving no time to the rebels in their rear to take advantage of the paucity of their numbers. Thus they made their way as far as Kawajiri, and effected a junction with the garrison. Ten days more of siege, and the castle must have surrendered. However brave our soldiers, they cannot fight without food. Such are the narrow issues upon which the fate of great wars depend.

Now that the imperialists have joined the garrison, the insurgents have no hope of gaining the fortress as a stronghold to which to retreat, and on which to base their operations. Their strength is of no avail but to enable them to fight their one last battle. But a mighty beast, thought deprived of its lair, cannot be prevented from going to and fro, a terror to many. So the insurgents, who find themselves in the situation of those doomed to destruction, will inflict more or less injury upon the imperialists. Is not the question of how best to deal with the remaining rebels a most important one, and one demanding the very serious consideration of the government? If the imperialists really desire to spare as many as possible of the insurgents, even those who had made up their minds to fight to the last may be induced to surrender. We should not wish that the Government would punish all the confederates of the insurgents.

A LETTER translated below has been addressed to and published by the *Choya Shinbun* :—

Editors of newspapers! You have repeatedly written evil things against the shizoku, and said they are a crowd of useless eaters of rice and hangers-on. Now consider how they have fought in the engagements which have taken place in the South-West! Are not the imperial body guards and police force composed of shizoku; and are not those corps renowned for their valour on the battle field? Was not ——— published in the papers at such a time? and has it not been proved that at such a time heimen are good for nothing? Hand-to-hand fights cannot be sustained by cowards, but men of courage will struggle desperately. If the provincial garrison troops, which consist of several classes, were not aided by shizoku, ——— might have been ———. When the war is ended a reformation will take place in the method of levying troops; and the shizoku will again become the recognized defenders of the empire. Fifty days have now elapsed since the contest commenced at Kumamoto, during which time the imperialists have not suffered a defeat; but on account of the valour of the rebels, who are shizoku, they have not been able to join the Kumamoto garrison. You newspaper writers, therefore,

should not denounce the shizoku as useless eaters of rice or hangers-on. And if you repeat such insolent remarks we will decapitate you with our swords which we have preserved.

THE Club of Nobles in Tokio has already presented about 28,000 yen in money and about 230 kuwan weight of lint for the use of the wounded imperialists in the South.

MR. JAMES, in the employ of the Navy Department, has made a present of one yen to each of the sufferers by the fire which occurred in Shinagawa on the 7th instant.

A REPORT from the military hospital in Osaka has been forwarded through General Saigo, Acting War Minister, to H. E. Iwakura. It states that up to the 16th instant 1,724 wounded imperialists had been received into the hospital. Fifty-five of these are officers. Twenty-four, of whom only one was an officer, have died.

MR. Sakuma, of the *Hochi Shinbun*, has been fined twenty yen, for having violated the fifth article of the law against slander.

THE first party of about 380 volunteers, shizoku from Kawagoye, was sent to the seat of war on the 12th instant. A second party of volunteers, consisting of men between 17 and 50 years of age, has now been formed in the Sakitama ken. Most of them are primary school teachers. During their absence many of the primary schools will be closed.

On the 17th inst. Mr. Kanagaki, editor of the *Kanayomi Shinbun*, had to appear before the Tokio-Saibansho, where he was fined 5 yen for having violated the law against slander.

MR. MAYEDA, ex-lord of Kaga, has presented 5,000 sleeping gowns to the military hospital in Osaka.

At dawn on the 17th inst., a fire broke out simultaneously at two places in Tokio, namely, at Shinagawa and Fukagawa. That at the former place was not extinguished till about nineteen, and that at the latter till about two hundred and fifty houses, were destroyed.

THE *Akebono Shinbun* says that an experiment has been made before Prince Higashi Fushimi-no-miya, General Saigo, and others at the Engineering College, Tokio, with a balloon which has been constructed by the students. The balloon failed to ascend, however, and the cause of the failure is assigned to the fact that the filling of the sphere was imperfect. The experiments were postponed in consequence.

(From the *Hochi Shinbun* of 14th April.)

When it became known that Saigo was in command of 15,000 troops, much anxiety was felt respecting the course that would be pursued by Shimadzu, his sons, and the shizoku of the Kagoshima-ken; and we found it very difficult to obtain any reliable information concerning their movements. Soon after the rising of the rebels, however, their Excellencies Yanagiwara and Kuroda were despatched as imperial envoys to Shimadzu; and were escorted to Kagoshima by naval and police forces. At that time many fears were entertained that something terrible would follow the mission to Kagoshima; and it was greatly wondered at that the envoys accomplished their business in peace. Now it became evident from this that the insurgents consisted only of the Gakko-to, and the public were much relieved in consequence; and distrust of Shimadzu's clan, as well as of the shizoku who remained in Kagoshima, ceased to

exist; and the fact that the imperial envoys were permitted to accomplish their errand in peace had great influence in dissipating doubts till then entertained of the loyalty of those to whom they were sent.

As the Kagoshima insurgents only consist of members of the Gakko-to, who, then, are the troops under the command of Kishima-Utaro? According to some reports we have heard, Kishima held opposite views to those of Saigo; and his party was entirely separated from that of the Gakko-to. But ultimately Kishima united his forces with those of Saigo, Beppu, and Fuchibe, and, with a force of 15,000 men, hastily raised in Kagoshima, these commanders advanced on Yajiro. It is wonderful how they contrived to raise such a large army in the course of a few days, seeing that Saigo had already left Kagoshima with a similar number of shizoku. Still Saigo's orders are obeyed in Kagoshima, though Yanagiwara and Kuroda were permitted to transact their business in peace. It is considered that the envoys were deceived, and that the people only assumed loyalty to the Imperial Government. However, no blame can be attached to the envoys for this. Shimadzu's loyalty is confirmed, by the manner in which he entertained the representatives of the Government; and we suppose that the insurgents will not molest him for his faithfulness. When the rebels marched to Kumamoto we became distrustful of Shimadzu. But Saigo had usurped his power and influence in Kagoshima, and his orders were obeyed by both shizoku and heimin: so Shimadzu was rendered powerless to act for the Mikado.

SOME thirty women, members of the families of the retainers of the ex-daimio Aidzu, are said to have petitioned the government to be employed as nurses for the wounded in the South.

THE *Mai Nichi Shinbun* says:—A telegram from Kioto, sent at 3.20 p.m. on the 17th, announces that Tabata, Chief Secretary of the Kagoshima ken, has been deprived of his rank and office. On the 16th instant, Shimadzu Chinhiko, fourth son of Shimadzu, presented himself at the Imperial Palace in Kioto, whither he was sent by his father, who forwarded by him a memorial to the ministers.

Mr. Yamaoka, *Daijo* of the Imperial Household will soon leave for Kioto to replace Mr. Sugi, who will return to Tokio.

THE *Hochi Shinbun* writes:—Rebels force their way every night into the lodgings of imperialists in Futsuka-yeki, Chikuzen, and Matsuzaki, Chikugo. They have stolen ammunition and fire-arms.

About 10,000 volunteers have been raised in the Yamaguchi-ken.

A CERTAIN heimin, named Uyeno, of the Kanagawa-ken, and one associate, purpose to export timber for buildings and ships to Tientsin, China. They have formed a company for that purpose called the Shinshisha and opened an office at Nichome, Horidome, Tokio. A branch office is to be established in Tientsin. A sailing vessel of foreign construction, of 350 tons burden, will ply from Yokohama six times a year, taking each voyage about 1,000 pieces of wood. The capital of the company amounts to about 150,000 yen and the shareholders are three thousand in number.

It is related of Saigo that when Beppu and Yetsumi went to him with 1,500 recruits consisting of old men and boys, he was very angry, and at once sent back all the boys to Kagoshima, ordering them to study there and to endeavor to become good servants to the Empire.

RACING.

To the Editor of the *Japan Gazette*.

DEAR MR. EDITOR:—The *Mail* had an article in its last weekly issue headed "*Equo ne credite Teuceri*," which censures both the Y. R. C. and Y. R. A., the former for being conservative, and the latter for being ultra-liberal, and recommending an amalgamation by mutual concessions—the Y. R. C. to become less conservative, and the Y. R. A. less liberal. This appears to be a novel way of settling the existing controversy between the two clubs to the satisfaction of the community. I can understand "inveterate" conservatism to be a fault in any representative body, but I cannot accept the liberalism as an evil. A community club, if its rules are good, cannot be too liberal; its rules ought, however, to be based upon the principle of preventing malpractices, and they should be thoroughly enforced. The cause of the disagreement between the two clubs is simply, that the Y. R. A. has added some rules to those in practice in the Y. R. C. which are intended solely to enforce, so far as possible, fair racing for racing sake, rather than for speculation or gambling: to prevent advantage being taken by keen calculating men of the unwary, who, in their simplicity, suppose that a horse entered for a race is always intended by the owner to compete in it if possible. There ought to be no ill-feeling on this account. The Y. R. C. ought to consider that rules and laws are not made for honest and well conducted men, but as a check on the dishonest and badly conducted. The Y. R. C., perhaps, does not require to adopt the additional rules of the Y. R. A., but the latter cannot well do without them as its members are self-elected and not admitted by ballot, and these rules have been carefully considered as necessary to enable the Y. R. A. to expel those who may infringe them, as a counterpoise to its inability to reject any who may wish to join the Association. In fact, the principle of the Association is to eject any member infringing its rules, rather than to refuse admittance to men who may be supposed capable of breaking them. The "liberality" of the Association ceases on admission to membership, and its rules must be considered more stringent than liberal. The suggestion is a little apart from the subject of this letter; but *Equo ne credite Teuceri*, would be an excellent motto for the Associate Clubs. The Trojans owed their downfall to the importation of a horse from the Greeks; and the attainment of the real ends and aims of racing in Japan is obstructed by the importation of foreign cattle. *Equo ne credite Teuceri!* put not your trust in Chinese griffins, ye racing foreigners of Yokohama, but race only with the native animals. If you heed this counsel, you will render real service to the cause to the advancement of which racing in any country should be subservient, the improvement of the breed of native horses. You would also stand a much better chance than you now do of enlisting the sympathy with, and competition in, your sport of the gentry of the country in which you reside, a laudable object of ambition, and one which if gained will do much toward the establishment and maintenance of cordial friendly relations between sporting men of Japanese and foreign

nationality. The most pleasant friendships are those which arise out of enjoyment shared.

A word to the wise,

From

CASSANDRA.

April 11th, 1877.

To the Editor of the *Japan Gazette*.

DEAR SIR:—My sympathies are with Cassandra; but the stable she undertakes to purge might well have daunted Hercules himself. She has concisely stated the ideal object of horse-racing; but how many of those who go in for it here give a thought to that view of the subject? Owners of racing-ponies in the East, as a rule, propose to themselves one of two things,—enjoyment or profit; and if these two *desiderata* can be combined, so much the better. They care neither for the improvement of the breed of native horses, nor for the establishment of cordial relations with the native gentry. They run their ponies to win, and, say what she may, Cassandra must admit that their object, if not laudable, is at least natural, and not necessarily sinful. Her preaching will never succeed, however earnest she may be, or however good an example she may set. Does she not remember how her refusal to fulfil her promise to comply with the desires of Apollo, angered that god? And his virtual revocation of the gift of prophecy he had bestowed upon her, by ordaining that she should obtain no credit? She predicted to the Trojans the ruin that threatened them, but they didn't believe her: she was looked upon as a mad-woman, and it is even related that she was put under restraint, and guarded. Had she lived in Yokohama, I am afraid she would have fared no better; some Ajax would be found to tear her from the sanctuary,—some Agamemnon to win her in a lottery. To this day Cassandra has no credit with the Trojans. The two clubs are like the loud and soft stops of a harmonium. Pull wire A., and Y. R. C. is silenced; pull wire C., and Y. R. A. still buzzes, but gives no clear sound. They must manage to combine their forces in some way, or farewell to all hope in Yokohama of that healthy competition which is the soul of true sport.

Yours despondently,

PRIAM.

Yokohama, April 12th, 1877.

PROFESSOR YATABE'S LECTURES.

To the Editor of the *Japan Gazette*.

SIR,—The lecture delivered by Prof. Yatabe of the Imperial University may rightly be viewed, I think, in the light of a challenge to the foreigner to defend that religion which he seeks to propagate in Japan. It has been somewhat loudly contended that Christianity is unworthy of acceptance by a philosophic and incredulous people like the Japanese.

1st:—because of certain "*facts*" which are opposed to it, and

2ndly:—because of the philosophic absurdity of its doctrines.

In a former letter I have shown that the alleged facts are, to use a mild term, mere misapprehensions, sometimes indeed, very gross ones too; while, further, even if true, none of them have any logical relation whatever to the real question at issue, "*Is Christianity true or false?*"

Metaphysicians of a certain school have often been accused of laying little stress upon

mere facts, and perhaps we may find that the strength of the philosophers of Japan as represented by the worthy Professor, lies not in the dry empirical world around them, but in the loftier region of pure speculative thought which they so grandly claim. Let us see, then, what they have to show there to vulgar eyes, through the medium of a Kaisei Gakko professor; and while, in stating Prof. Yatabe's argument, I desire to do him every justice, remembering that he laboured under the disadvantage of using a foreign language, I would also, on the other hand, claim some slight consideration on account of my absolute ignorance of the philosophy of Japan!

The speculative reasons adduced for the rejection of Christianity were two; and these I shall now proceed to consider in their order. It was first objected, that God is represented in the Christian writings as *resting* on the seventh day; and that this implies exhaustion. God, therefore is represented in Christianity as a *limited* being, and therefore he cannot be believed in and worshipped by the Japanese.

Probably some professional theologian may deal with the views urged by the lecturer on different grounds, and in a more satisfactory way. As for me, a layman, I seek simply to examine the argument from the stand-point of the professor himself, namely, the speculative or philosophical one.

Now, when the argument is analysed, it will at once be seen that the starting point is the assumption that a limited being (limited either in his own nature, or in our own conception of him) is not to receive worship or obedience: cannot, in short, be God. This starting point then, of a philosophical refutation of Christianity is a contradictable one! A limited God, that is to say, is speculatively conceivable, and I now therefore call on the professor in turn to make good his assumption on philosophical grounds, before his argument can have any weight whatever.

If he shall say, I argue with Christians only, then I reply, I hope I am a Christian and a peculiarly orthodox one too; yet I entirely disbelieve, and now dispute, the position which he so unwarrantably assumed.

Why might we not reverence and obey, why might it, indeed, not be our very highest duty to obey, and our very dearest privilege to love, a being, whom though we might know as limited, he might still be the purest and best, the most beneficent and powerful, the very loveliest being in the universe? We acknowledge the authority of sovereign or parent, we feel ourselves compelled to love wife and children, to serve our lord with entire affection, undoubting loyalty; and why, I ask, should we refuse to render equal or even greater homage to one, who, on the hypothesis assumed, might have vastly greater claims than theirs? Can we wonder if an argument reared on such an unsubstantial foundation should in itself be weak? I believe the objection I have made to be unanswerable, on speculative grounds at least. But, if unanswered, then Professor Yatabe's formidable works have been countermined, and with one whiff he and all his ponderous artillery are lightly blown into the air.

On the other hand, I would note, that, if the assumption is correct, then the explanation of the alleged repudiation of Christianity by the Japanese on the ground that its God is limited, is rendered not a little absurd by the fact that the gods still worshipped by the Japanese are much *more limited* than the Christian God.

To give concrete illustrations of this point would perhaps only expose me to the charge of

seeking to ridicule my opponent's national religion, which would hardly be polite.

Again, the argument now being examined goes on the assumption, not only that a really limited Supreme Being is not to be worshipped—the quite opposite of which is conceivable,—but also *assumes* that a *conception of an unlimited God is possible*. Here, remembering the frank admission of a rising legal luminary, who lectured on the same evening, that the Japanese are somewhat deficient at least in observation, I would by way of warning quote the wise words of one of the truest and keenest of modern speculative thinkers.

"In resorting to philosophy, says Ferrier, 'there is no safety except in the *closeness* and *completeness* of our observations.' * * * Overlook perhaps, but a single fact, and our reason, otherwise our faithful minister, may 'be converted into a brood of fiends to baffle and destroy us.'—(My italics).

Now I believe that Prof. Yatabe has simply overlooked the one important little demonstrable fact pertaining to all thought—not to human thinking only,—that no conception can be formed containing less than the elements subject *plus* object. So that, in a *strictly philosophical* sense, we can not think *any thought* of God, or any thing or being else, in which our own or another subjectivity does not play a limiting part. By this universal and necessary law of thought, therefore, our conception, nay, any conception, of God must be *limited*. It must, in short have the elements God *plus* subject. Even if I strenuously strive to think Him, in solitary self-contained perfection before things were, still my shadow haunts His awful throne.

Without this limiting subjective element of thought, in fact, you may as well try to think of an angle formed by one straight line, or of a stick without two ends.

I regret that I should thus be compelled by the stringent laws of thought to the rudeness of supposing that even the professor's knowledge of philosophy is limited.

Besides the above, there is a logical sense in which the term 'limited' is commonly used by philosophic writers; a sense, too, equally fatal to the objection that the Christian conceives of God as limited. An object to which two qualities are ascribed is logically more limited than that which can claim only one, and yet really the quality belonging to the first, and which the second wants, may just be freedom from limitation. In proportion as any being is conceived of as near perfection, so much the more will the conception be limited by increase of attributes.

Our notion of the poorest piece of dull, dead clay will therefore be logically less limited than that of the noblest hero, the wisest statesman, the loftiest poet. Hence too, each infinite quality ascribed to God limits every other. So far from logical limitations then proving defect, it is only by a series of them that we reach to the highest conception of perfection attainable by us. In short, while the intension (to use logical terms) is least, the extension is great. On the other hand, we narrow and thus enrich and heighten a conception, just in proportion as we increase its marks—as we deepen its intension—while, as we have seen, the reverse process empties and impoverishes it, till perhaps nothing is predicated at all but bare existence—that it is, but not what it is.

If we carefully note, therefore, the *magnitudo et vis conceptus*, it is easy to understand the relative practical values of a conception of God as the merely Absolute, Eternal, &c., and that presented to us concretely in the Christian Revelation as now active, now passive, now

moved with hate of sin, now yearning with love for his children. Only twice in the Bible is a metaphysical definition given, and then only in answer to the importunity of human unwisdom; but the reply in both cases was far too profound ever to be comprehended, although apprehensible, by limited minds like ours:—

"I am that I am," and,

"Before Abram was, I am."

Can it be that the "philosophic" Japanese have passed through a rationalistic revolt from metaphysically abstract ideas of the Deity, and have reared tiny shrines in each humble abode, the flickering rush-lights of which the ignorant and superstitious foreigner may nightly see as he passes by the open street-fronts. Fit symbol, their dull glimmer, of the unsteady, earth-born light of reason, with whose guidance only they have sought the truth? Is it from the same reactionary cause that the crowded streets of the enlightened metropolis have become lined with palm-trees and fortune-tellers, and its spacious temples crowded with the sick and blind or maimed, who, instead of seeking scientific aid, fondly pat a grimy, noseless image, somewhat less like man in his spiritual majesty and loveableness than that august Being before whom alone the poor Christian bows?

The learned professor's *assertion* that rest implies exhaustion is not quite sufficient to constitute it so. Gymnastics must be successfully studied in the university to enable any one to take such a vast leap as that. A stone 'rests' on the ground; a cloud 'rests' on a mountain; an engine 'rests' when its work is accomplished; yet we do not think of any imperfection as being thereby implied. On the contrary, it is said, "Rest in physics is 'the equilibrium of power, and so the maximum of power (*re-sto, re-sisto*). Motion is the 'yielding or letting out of power, * * a 'dispersing or spending of that static energy 'which was in the quiescence.' Moreover, the original Hebrew word translated by *rest* is held by scholars to mean *cease, cease doing*, while if refreshment after fatigue had been meant, another Hebrew word expressive of that idea was available, and would have been employed, a fact which either Professor Yatabe purposely suppressed, or was entirely ignorant of. Again, to have the idea of action set clearly before us, we must have, in contrast with it, that of rest. Either term alone, and without implied reference to the other would be an empty sound. I cannot see how we could form any idea of God's activity without its contrast, *passivity*, being also thought.

If, as Professor Yatabe's philosophical objection implies, we are not to think of God at all except as *acting* to the utmost of his infinite power, we land ourselves in inconceivable absurdity which no language can express. In short, according to this conception, *each moment and each infinite part of a moment, the Deity must be hurling countless myriads of worlds into infinite space, and ever peopling them*. Which is most intelligible, this or the scriptural conception which has been condemned?

Such rest as is meant in the Bible, with still stored up infinite power remaining, implies no shadow even of imperfection at all. Such was held at least as true, by even unchristian philosophers like Aristotle; and no other limitation, I believe, is, or was ever held, to be implied in the term, by any Christian.

The second objection to Christianity, raised by the speculative thinkers of Japan, is "that 'the doctrine of the Tri-unity of God makes '1=3 and 3=1, an arithmetical absurdity'!" I have looked a good deal at these terrible symbols, which seem to the acute professor to en-

sure such a rapid and thorough demolition of the Christian superstition, nay, I believe it to be true and valid sometimes even arithmetically, for I would again call the attention of this more than usually unobservant Japanese philosopher to the omission of an important little fact in his reasoning, namely, that such symbols in themselves have just no meaning at all. Let us look at them however as expressive of something. Say, let 1 stand for foot; and the symbols then may stand $1=1 \text{ plus } 1 \text{ plus } 1=3$. Q.E.D. Here the term sometimes means 1 foot in the sense of cube, sometimes 1 foot in length, another time in breadth, again in depth. If you take it thus, the formula is good, and expresses universal and necessary arithmetical truth. Many other examples could be given did space permit; but of what value are they in supporting the Christian doctrine? Precisely of the same value as the similar one used destructively by the lecturer, that is—of none at all. The terms are not in the same category throughout: and therefore no logical deduction can be made from them at all. As to the doctrine itself, which is a question in theology I have pledged myself not to discuss, it can be, and has been, defended on the profoundest philosophical grounds. To many minds, indeed, as to that of one of world's greatest philosophers, Hegel, it contains the very pulse and movement of all thought; and popular objections to it seem only products of the gross inadvertencies of human thinking. I am, as I have said, no theologian, but can we think God at all in the solitudes of eternal space, without having within himself that basis of all spiritual happiness, which in human language we call society? If so I would sceptically call on Professor Yatabe to construct and show me a satisfactory conception of God, capable of enduring speculative criticism, which does not contain the element of otherness, or difference, in unity. If he fails, and I await his answer, then his failure becomes so far a demonstration that the Christian idea of the Trinity is not a philosophical absurdity, but is an eternal and necessary truth.

In dealing with this entire question, the professor has shown his utter inability to place himself mentally in the stand-point of those he assails—a quality fatal to the pretensions of any one who would assume the serious role of philosopher. His scepticism, too, exceeds its function and destroys itself by seeking to build, and that without foundation. He must be content therefore to be assailed in turn; for he gives us a conception of God which is not,

Something which can be known, nor
Something which we may be ignorant of, but
Something which cannot be known.

But this then is the absolutely unthinkable, i.e. the absurd, non-sense=nonsense. This, then, is the intellectual fetish before which the modern philosopher of Japan, donning cap and solemnly tinkling bells of sounding brass, would prostrate himself in a blind, unthinking adoration even more pitiful than the narcotic poisonous Nirvana of his countrymen! For, if that which is limited cannot be God, then, either there is no God, or he cannot be known. But that which cannot be conceived, is as that which is not, nay is the absurd, the absolutely inconceivable. This is the fatal trap into which the valiant professor has so deftly and with such a triumphant, shall I say angry, snap, shut himself up. And there, like imprisoned mouse, he must for ever revolve, till either in despair of reason he shrinks into the narrower and darker cell of atheism, or faith in Emmanuel, GOD WITH US, bursts his bonds and sets him free. This is the one sole desire for himself and countrymen, with which these

words of friendly criticism have been penned by their foreign friend and brother,

F.

Tokio, April 13th, 1877.

To the Editor of the Japan Gazette.

SIR:—Having heard that a lecture on Evolution was to be given at the Kaisei Gakko in Japanese by Professor Yatabe (whose speciality I understand is a branch of Natural Science) I went to hear it with considerable interest, and an anxious desire to do justice to any arguments that avowed anti-Christian champion had to adduce in favour of a doctrine, which, whatever can be said in its favour, certainly would seem to 'limit' God fully as much as Christianity does. There was a large and intelligent audience, chiefly of the student class. Some gentlemen spoke vigorously on subjects which I need not mention here. I would only remark on such gatherings that an engine has been set agoing which may yet prove religiously and socially quite as powerful, and perhaps not be so easily put down, as the newspapers have been. The working of this institution, therefore, thoughtful observers of the progress of this people will find yet, I am persuaded, to be a profitable study. I am happy to say, further, that foreigners seemed to be treated with perfect courtesy.

It is well, for many reasons, that such an enterprise should be associated with a metropolitan university. This ought to have a tendency to prevent mere vulgar crudities from being obtruded into notice, should in time give more tone and dignity to the addresses; and when, as is clearly inevitable, it becomes a political lever, the cry for liberty and sincere reform will be that of a comparatively educated and thoughtful class.

It is with deep regret that I have to remark of Professor Yatabe's address that it was taken bodily, even to details, patches as well as pants, table and diagrams, from Huxley, who lectured last year on the same subject in America, and who is fully reported in the *Popular Science Monthly*. A witty allusion of Huxley's, which evidently the "lecturer" no more understood than his audience, sounded exquisitely funny, when appearing in this form. All this was done without the slightest acknowledgement, explicit or implied, of the source from which the "lecture" was bodily appropriated.

This is hardly excusable even in the champion of a higher morality and purer theology than is found in Christianity; and I have no doubt will excite due disgust and condemnation in the minds of many of his audience, who were evidently capable of going to the original sources from which the professor's plumes were stolen. To their tender mercies, like the painted jackdaw, I must now consign Professor Yatabe of the Imperial University of Japan, and have no intention of encumbering your columns by any further mention of him.

Your obedient servant,

F.

Tokio, April 14th, 1877.

THE HORSES EX GAELIC.

To the Editor of the Japan Gazette.

SIR:—With reference to an article which appeared in the *Japan Weekly Mail* of the 14th instant, and was copied into the *Japan Daily Herald* of the 16th, on the subject of the horses imported under my care from San Francisco in the *Gaelic*, I beg you to publish

the following facts, which will be a sufficient refutation of the glaring exaggerations contained in that article.

1st.—The grey stallion *Amador* cost \$600.2nd.—The bay Clydesdale stallion *Langdon* cost \$450.3rd.—The *Norfolk* family, five in number, *Ralston*, *Bradley*, *Clara McGearry*, *Balance*, and *Jessie Ford*, were bought from Mr. Theodore Winters of Sacramento, California, for a sum which in that market—I know nothing of Japan or England—was considered dirt cheap, namely (in silver) \$15,000.4th.—The dark bay *Regent*, which is evidently the writer's fancy, but which to my knowledge is the worst horse of the lot, cost only (in silver) \$750.

The sapient writer of the critique, who I should imagine must have learned what he knows about horses here or in Shanghai or the Fiji Islands, if not in a cow shed, says of *Amador* "he has an exceedingly coarse neck, is very 'faulty in the quarters, and has literally no body,' 'all of which defects are but too apparent in 'the native pony.'" I can only answer this by recommending the critic to take another look at the horse, and if necessary to put on his glasses before he does so. If he likes to come and visit him, he can bring a tape, or I will lend him one, and he can measure the horse. Further, I have no objection to weigh the animal if asked to do so, confident that these tests will show whether the horse has literally no body! For purposes of comparison, I would mildly remind the critic that *Amador* is a Norman draught horse, and not a "Grand National" Cup horse. Of his kind he has been pronounced by competent judges, in America, where there are one or two, to be almost perfect. He and the others, I have no doubt, will not "find their way to any temple, 'there to pass the remainder of their lives in 'inglorious ease, &c.,' and the future will show that they are not 'useless for breeding purposes.'"

In conclusion, as I do not wish to take up too much of your space, I will only mention that the horses of this importation are not intended for crossing with the native breed or inferior Chinese ponies, but with improved stock now on the farm at Shimosa.

Recommending the critic some other subject than "horse-talk" on which to exercise his pen,

I am,

Yours truly,

JOHN J. FAYLOR.

"CURTIS' HOTEL," No. 61,

Yokohama, April 17th, 1877.

SMALL CHANGE.

To the Editor of the Japan Gazette.

SIR:—The inconvenience of being unprovided with small change when perambulating the native city, is very often experienced by thoughtless foreigners. Two gentlemen the other evening were strolling round for amusement; and coming opposite a native theatre were importuned to enter. They did so. Scarcely had they taken seats, than a drunken door-keeper rudely demanded a dollar from each. Not feeling inclined to submit to being fleeced in such a manner, the foreigners turned out their pockets in quest of small coin. The result of their search was the exhuming of a ten cent satz, but no more. This was presented to the irate door-keeper, who grew quite enraged and frantically insisted upon a dollar being given. Seeing there was a likeli-

hood of trouble, and objecting to the exorbitant demand, the foreigners rose to depart. But this was not so easily accomplished, as the drunken door-keeper laid violent hands upon one of them, and a dozen of his *confrères* gathered round. The proper charge was tendered, provided change would be brought, but nothing short of a dollar would pacify the clamorers. After some trouble the foreigners managed to work as far as the entrance, the Japanese making one final attempt to detain them, which almost resulted in a *fracas*. The moral to be learned from this is, that when gentlemen go abroad and visit theatres they should at least have sufficient small coin to pay the usual price of admission.

Yours truly,

BROWN JONES.

Yokohama, April 12th, 1877.

SAIGO A PATRIOT.

To the Editor of the Japan Gazette.

SIR:—A letter having appeared in the *Japan Herald* of the 5th instant, accusing His Excellency Marshal Saigo of having in his native province set up an *imperium in imperio*, and comparing him to "a prowling tiger in the mountains, a man void of all honor and integrity, continually scheming and inciting others to insurrection for his own personal ambition, &c., &c.," is so totally at variance with the true facts as scarcely to need refuting.

The letter was undoubtedly written by one who is over anxious to exonerate those conscience-stricken officials, who are responsible to the civilized world for the terrible civil war that now deluges this fair land with blood.

It is well-known to every unbiassed mind, and particularly to those who know anything of the antecedents of His Excellency, that a more loyal, upright, trustworthy subject of His Majesty the Mikado is not to be found in all the empire. In January last, when despatches were continually arriving from Kagoshima, accompanied by repeated petitions from the people, addressed to the head of the Central Government at Tokio, His Excellency Marshal Saigo wrote to His Majesty the Mikado:—"I desire nothing for myself, I resign all the honors and favors which Your Majesty has so generously bestowed upon me, and I prefer, if my duty to my country will permit, to live quietly and peaceably at my home; but I cannot close my ears, I cannot stifle my inward thoughts, against the constant and continued sufferings of an oppressed and down-trodden people.

"I pray the Gods that Your Majesty may be endowed with the wisdom of your great ancestors to relieve and redress the grievances of the people, and protect the country from the avarice and ambition of wicked and evil counsellors, who speak sweet and gentle words to your ears, while their hearts are full of lies and deceit, who by their wantonness and extravagance in administering the affairs of government are disgracing us in the eyes of all nations, and causing the people to lose rapidly all thoughts of filial duty and of reverence for Your Majesty's sacred person. I am full of sorrow for my country. I humbly pray Your Majesty to dismiss those who have traitorously deceived you, and to relieve and protect your people, or the end will be the ruin of Dai Nippon."

Are these not the words of a sincere patriot, of one who has no selfish or ambitious desires

to gratify, and who is at this moment enduring every hardship, and bravely battling against a perfidious foe for freedom and the country? Truly, his great name will be written in letters of gold, never to be defamed or calumniated by idle or mercenary writers. It will forever be preserved with love and reverence in the hearts of a grateful people. The pension which His Majesty the Mikado conferred on His Excellency, and which, much against the recipient's wish, he forced him to accept, was never applied to his personal use; but hospitals and schools were established at Kagoshima, in which all the students were taught, before anything else, to be obedient and well conducted, and loyal to their sovereign and country.

Jealous of such a good man, who was beloved, respected, and honored by all, one so noble, honest, and true to his country, whom no money could bribe, no position in the gift of his sovereign could tempt, a conspiracy was entered into by some person or persons in authority to assassinate him. That this is true there is not a shadow of doubt.* It is firmly believed at Kagoshima, and His Excellency Oyama-Tsunayoshi, Governor of Kagoshima ken, before whom the conspirators voluntarily confessed their guilt, believes, and knows it is true, and hundreds of others are firm in the same belief.

It is unnecessary to recapitulate the facts of this deplorable atrocity. Suffice it to say that no apology can lessen, no time can efface, the stain of this foul crime, which, though fortunately not consummated, will remain in its intention as an indelible blot upon the memory of those who conceived it.

Those who, by their reckless contempt of the grievances of the people, provoked this fratricidal strife, are now reaping the whirlwind with a vengeance; and, although in their conversation with strangers, they seem to make light of this trouble, yet behind the scenes it is acknowledged that a compromise will have to be made to stop the terrible carnage.

Indeed many of our self-made high officials are quivering in their beds, not knowing whom to trust, and expecting in every man to meet an assassin. So much for an evil conscience.

In conclusion, allow me to recommend our friend of the * * * (who seems inclined to get muddled when he commences to write of the gossip and gup which he has bottled up for the last three years) not to take for granted all he hears, even if it does emanate from "native officials and others of some intelligence;" and as for his extract from the *Choya Shinbun*, it is too ridiculous to require comment, and plainly shows a superficial knowledge of the noble, generous spirit of the people of Dai Nippon.

* ——— *

Yokohama, 14th April, 1877.

THE RACE CLUB MEETING.

To the Editor of the Japan Gazette.

SIR:—The proverb "We live and learn" was probably never more strikingly illustrated than at the meeting of the Yokohama Race Club, held this afternoon at the Grand Hotel for the purpose of considering the advisability of an amalgamation of the Yokohama Race Club and the Yokohama Racing Association. A long statement of the doings of the Committee of

* We would point out to our correspondent that very grave doubts exist upon this subject: that, in fact, it is now almost beyond question that the so-called "confessions" were extorted—very probably, we will admit, without Saigo's knowledge or concurrence—from the wretched men who signed them.—Ed. J. G.

the Race Club for the last four months had been carefully drawn up, printed, and was read to the meeting by Mr. Foster, who acted as Secretary; but the suggestion of Mr. Bennett that the whole correspondence as to an amalgamation between the Committees of the two bodies was indignantly rejected by the Secretary on the grounds that "very little correspondence had passed between them," but that they had held a good many "quiet meetings." The minutes of these private meetings were also withheld (but we think that one, if not more, of the members present could have given the meeting a good idea of what had occurred at these private meetings), and the Chairman expressed his horror at Mr. Bennett proposing a thing, which he regarded as a vote of want of confidence in the Committee. The consequence of all this was that the correspondence was not read. Doubtless the Committee have confidence in their actions, and some of the members present (Query, were all qualified members?) supported them in their refusal to produce the required information. I cannot, however, but think that their self-confidence was somewhat shaky, and the statement read may have been perhaps a little one-sided. Of this people will be able to judge better when the Committee of the Yokohama Race Club publish their account of what has been going on.

Mr. Kirkwood proposed an amendment to Mr. Dodds' proposition, which seemed to fall like a bomb-shell in the midst of the horror-stricken "pony-owners" of the Yokohama Race Club, and the Chairman very graciously allowed them a long respite to recuperate their shattered ideas. Mr. Mollison and Mr. Strachan finally came to the rescue with indignant protests, and equally foolish assertions as to the ponies and non-ponies of the Committee; and finally the Chairman refused Mr. Kirkwood's amendment with the contempt and scorn, which perhaps, in his own idea, it merited. I have certainly seen many strange things at Yokohama meetings, but never before have I been present at one where the most important information was withheld from the meeting, and the mover of the only sensible proposition brought forward so ruthlessly snubbed. Surely there is something wrong somewhere.

Yours,

PICKLES.

Yokohama, April 18th, 1877.

Law Reports.

In H. B. M.'s Provincial Court at Kanagawa.

Before H. S. WILKINSON, Esq., Acting Law Secretary.

Saturday, April 7th, 1877.

ANNIE THERESA GARGAN vs. BRIDGET WALKER.

The plaintiff sued the defendant for the return of a cloak, or its value, \$50.

Annie Theresa Gargan, sworn, stated:—I reside at 52, Bluff, and am a dressmaker and milliner. I lost a cloak last July, which was stolen by a jinrikisha coolie, and did not see it again until last Saturday, a week to-day. I then saw it on the defendant in the street. I am certain it was the same cloak.

His Honour, to defendant:—Have you any questions to ask the witness?

Defendant:—Yes. This lady came to my house and accused me of stealing the cloak.

I never saw her before but once, when she was walking in the streets in a state of intoxication and leaning on the arm of another woman for support. She told me she recognized the lace on the cloak.

His Honour:—That is hardly a question. Have you any questions to put to the plaintiff.

Defendant:—I have no questions. This is the cloak (cloak produced.)

Plaintiff:—That is not the cloak.

Defendant:—It is; you said you recognized it by the lace on it.

Plaintiff, to Court:—That is not the cloak I saw on the defendant last Saturday.

His Honour, to defendant:—You say that Miss Gargan was intoxicated.

Defendant: Yes, she was, and had to lean on the arm of the lady she was with for support.

Plaintiff, excitedly:—I was not. (Turning to defendant.) Be careful, now; be careful, or you may get into serious trouble. (To Court) I was not intoxicated and never have been in my life. The young lady who was with me was Miss Foote; she is only about 13 years of age and to-day is at school.

His Honour, to defendant:—Was any one with you at the time you met the plaintiff?

Defendant:—No one but my two children.

The proceedings were stayed for a short time for the production of Miss Foote, for whom a messenger was sent.

Elizabeth Foote, sworn:—I reside at No. 87, Main Street. I remember Miss Gargan having a cloak last summer; it was a black cashmere cloak, trimmed with lace. I think it was last June I saw it with Miss Gargan. I saw it again last Saturday in Homura Road. It was on the defendant. When I saw her she was coming out of a furniture store. I recognized the cloak. Miss Gargan asked the defendant where she got it from, and she said from a Chinaman. Miss Gargan offered to pay for it if she would give it up. It was a different cloak to the one produced. By cloak, I mean a cape. I would know the cloak again if I saw it. I am quite sure that that cloak is not the one. I do not know the value of the cloak. Miss Gargan on that occasion was perfectly sober. First Mrs. Walker said she bought it from a Chinaman, but afterwards said she had had it made by a Chinaman. The cloak was a plain one, not figured like the one in Court. I went to Mrs. Walker's house on Monday last, with Miss Gargan. I saw a gentleman there, but do not know his name. Miss Gargan asked to see Mrs. Walker, but he said she was gone out. Miss Gargan then asked for the cloak. The gentleman said we had better go to Court. Miss Gargan said she would rather not, but would willingly pay for the cloak. There were two Japanese policemen outside of Mrs. Walker's house. I was leaning on Miss Gargan's arm at the time we met defendant in the street.

Miss Gargan, to Court:—The cloak is worth \$50. I made it myself, and the lace and trimming on it is worth \$30, and the material about \$2 per yard. It was nearly new when I lost it. I reported the loss to the Japanese police at the time.

Bridget Walker, sworn, stated:—I live at No. 131, Yokohama. When Miss Gargan spoke to me I had the jacket on; the one produced in Court. I never had a cloak and no one ever saw me with one on. I had a shawl on my arm when I met Miss Gargan. I am quite sure that is the jacket I had on; I have not got another with lace on it. No one was with me at the time I met Miss Gargan, except my two little children.

His Honour said that as the evidence was so conflicting, he should order the case to be put down for trial, by jury, on Friday, the 20th instant, at 10 o'clock in the forenoon.

Saturday, April 14th, 1877.

Messrs. CARL ROHDE & Co. vs. G. L. CASTLE, master of the Brit. S. *Viking*.

The plaintiffs claimed the sum of \$70, for damage done to goods on conveyance.

Carl Rohde, sworn deposed:—I had consigned to me from London, by the steamer *Viking*, about 500 cases of goods, the invoice of which I produce.

The defendant admitted the bill of lading.

Witness:—On Saturday last 200 cases were on the *Hatoba*, and I was informed they were in bad condition. In consequence of this information I wrote to Messrs. Walsh, Hall & Co. (Copy of letter produced and also the reply of Messrs Walsh, Hall & Co. The letter asked for a survey, and the reply requested plaintiff to take delivery of those cases that were in good order and let the others remain). On Saturday afternoon the captain of the *Viking* and myself visited the goods and opened some of the boxes. Captain Castle, however, declined to admit his liability to damage. As the next day was Sunday, it was agreed that a survey should be held on Monday morning; and that I should take 140 boxes into my godown until the survey. I wrote to Messrs. Walsh, Hall & Co. (letter produced) informing them of our having taken the cases of glass into our godown. On Monday we surveyed the goods, and both surveyors agreed that the boxes were stained; and that the stains were caused by fresh water. The cases were rendered in consequence unmerchable. The captain still declined to admit my claim, and it was arranged to wait until the other 360 cases were landed, which was not done until yesterday afternoon. As I saw from the newspapers that the steamer was advertised to leave on Friday, I wrote a letter to Messrs. Walsh, Hall & Co., asking them if they were prepared to entertain my claim after the departure of the steamer (letter produced). I received a verbal reply to this letter, refusing to entertain the claim, as the captain denied his responsibility in the matter. I then wrote another letter (produced) informing them that legal proceedings had been taken. I had sold the whole of the cases "to arrive" to Japanese at \$3.75 per case; and the buyer objects to take delivery of the glass on account of the damage. I consider my claim a just one, as the bill of lading is signed by the captain; and it states that the goods were received by him in good condition, and I am entitled to receive them in the like good condition. The damage done is about 50 cents per case. The cases are stained outside and are wet inside. I cannot in anyway account for the damage being done by fresh water.

The defendant had no questions to ask the witness.

H. Francke, sworn, deposed:—I was called upon to make a survey on some window glass. I saw 140 cases in Mr. Rohde's godown which had arrived per British Steamer *Viking*. I held the survey in company with Captain Scott, and found that the cases were more or less in bad condition, and had signs of having been thoroughly wet, both inside and out. The straw was saturated with water. According to my opinion the damage must have been done by fresh water. The goods, in the state in

which I saw them, were unmerchable; and I think the claim of 50 cents per box a just one.

To defendant:—The glass itself is not damaged, but the goods are unmerchable from having been wet. The cases were not wet on the outside, but stained. I don't know that the glass was packed in wet straw or that straw is liable to steam. The cases appeared to be new ones, and were quite full, so far as I saw. The cases would probably have been unmerchable if the straw was dry inside, as they were stained outside. I cannot say that the cases were broken. They were all wet, but some more than others. The price of the glass at the time I examined the goods, I cannot say; neither do I know if it has gone down since. The cases are not quite useless after the glass is used.

R. Reiff, sworn, deposed:—The value of the glass in question is lessened through damage by water. I have experienced inconvenience myself, from the same cause, in disposing of goods to the Japanese, who refuse to take delivery if the straw is wet. The claim of course varies in accordance with the amount of damage done, and a reduction of twenty or thirty cents has often been insisted upon. But in some cases an indemnity of 50 cents is not considered excessive, especially if there is a fall in the market.

To defendant: I cannot say what the market value of the glass was when the *Viking* arrived, but the market has declined of late. Window glass rarely arrives entirely free from damage. I have never known damage to be done by fresh water. If the packing and cases are damaged the goods become unmerchable.

To Court:—I just glanced at the cases; but cannot say what damage they have received from being wet.

Felix Beato was the next witness called; and he testified that glass damaged by water was unmerchable.

The defendant called D. Scott, who was sworn, and deposed: I examined the cases in question and found they were stained on the outside. I cannot say that the damage was caused by fresh water. I did not see any fresh water, but there was some salt water, in the same part of the vessel where the cases had been stowed. The cases were properly stowed. I have heard that, when the market declines, merchants sometimes wish to leave the goods on the vessel. Sometimes cases are stained when they arrive, but not always. I saw a portion of the glass taken out of the vessel.

To plaintiff:—I could not distinguish whether the water in the case was salt or fresh. There was no salt lining on the outside of the cases. I would not take delivery of such cases without first examining them.

To Court:—The water might have been fresh, but I would not like to say for certain. I should think they could not have been damaged by fresh water on board. The cases were partly broken and did not appear to be new. My opinion is the damage was done to the goods before they were put on the vessel. If I were stowedore I would not take goods on board in the condition these were in. There was nothing on the ship which could lead me to suppose that fresh water could get in the hold.

Thomas Clegg, sworn, stated: I am chief officer on board the *Viking*. There was no possibility of fresh water getting into the hold. A portion of the glass was stored in the bottom of the hold. Another lot was stowed among dry goods on the lower deck.

There was no water near any of the cases. There was a little salt-water damp in the lower hold.

To plaintiff:—I was not on board the *Viking* when the glass was shipped.

To Court:—I took part of the cargo in while the steamer was lying in Victoria Dock. The sheds were close alongside of the ship. My attention was drawn to these goods when they were being discharged. Some of the cases seemed to be a little stained. Had I received them on board in that condition, I would have mentioned in the receipt that they were stained. I cannot say in what way the cases became stained; neither can I say from the outside of the cases whether the damage was done by salt or fresh water. The hatches were opened several times during the voyage; but the water could not have got through them. None of the other goods near the glass were wet. I conclude that the damage must have been done before the goods were shipped.

Carl Rohde, recalled:—My agents in London received instructions from my agents in Hamburg, to ship the glass by the steamer *Viking*. The glass was sent from Belgium direct to London.

The defendant began to address the Court, but, his statement amounting to evidence, His Honour informed him he could, if he wished, give evidence, with the permission of the plaintiff.

G. L. Castle, sworn:—The cases were not stained as they are now when they were taken on board. Some of them were stowed in the hold, and some on the lower deck, where it was impossible for fresh water to get at them. I think the straw must have been damp, and fomented by heat on the passage out, and so stained the cases. The straw was not saturated as has been stated, but only damp; and the cases outside were quite dry. I told the plaintiff that I would pay for any of the boxes that were broken, but would resist his claim for damage by water.

To Plaintiff:—It was winter time when the goods were shipped. I saw the cases brought on board, and they were not so stained as they are now. There have been some petty claims against me for ship damage. I allowed a claim of \$10 to Messrs. Van Ordt & Co. for the "sweating" of some copper.

To Court:—It occurred to me, when I saw the goods coming on board, that the cases were stained, and I informed the chief officer to mention it to the shippers. It appears he did not do so. The chief officer then was not the same I have now. I would not have signed the bill of lading if they were in the same condition as they are now. I account for the stains on the outside of the cases by the straw sweating and the damp oozing out. I recollect one instance of some cheese being damaged in consequence of being packed in damp straw.

This concluded the evidence in this case; but as several other cases of a similar character were awaiting the decision of the Court in the present instance, His Honour decided to hear them all before giving judgment.

After all the cases had been heard, His Honour, in giving judgment, held that there was sufficient evidence to prove that the glass had been packed in damp straw, and the damage to the glass was in consequence thereof. He therefore exonerated the vessel from responsibility and blame, and dismissed the case.

FELIX BEATO vs. G. L. CASTLE.

The plaintiff claimed \$153.75, being value of certain goods which had been damaged by water.

the steamer *Viking* for him and not delivered. The articles deficient were 25 cases of gin, 2 cases of brandy, 11 bottles of brandy and 6 bottles of gin.

The defendant stated that the two cases of brandy would be landed that evening; and for the bottles of gin and brandy he was willing to pay. His defence in reference to the 25 cases of gin was that the ship was not liable inasmuch as the non-delivery of the same was caused through stress of weather. He gave evidence to the effect that shortly after leaving the Channel a severe storm overtook the steamer; and when it had abated somewhat, a strong smell of turpentine came from the hold. An inspection showed that the ship had sprung a leak in the compartment where the gin was stowed, in which there was over eight feet of water. By the rolling of the ship, the dunnage gave way, underneath some turpentine, driers, paints &c., which consequently fell down and commenced to knock one against the other. The cases of gin also fell in with the turpentine and paints and all rolled about together until they were completely smashed. The cases of gin were completely broken, and their contents mixed with the sea water and turpentine, and in consequence had to be thrown overboard. When the vessel arrived at Penang a survey was ordered, a report of which was produced in Court.

The defendant called Captain D. Scott, who stated that he had surveyed the *Viking*; and that the cargo had been properly stowed. He was of the opinion that the damage might occur even though the goods were properly stowed.

The Court gave judgment as follows:—In this case I find that the damage and loss were occasioned by the leak in the stern of the ship. The cargo appears to have been properly stowed, and there is not sufficient evidence to show that the vessel was unseaworthy when she left port. I find therefore that the damage and loss were occasioned by a peril or accident of the seas, for which the master is not liable, and dismiss the case.

MESSRS HUDSON & Co. vs G. L. CASTLE.

The claim of the plaintiff in this case was similar to the last, though for a larger amount, viz:—\$427.75. The cargo not delivered was 210 packages, containing driers, white lead, and turpentine.

The defence was exactly the same as in the previous case, the goods having been stowed in the same place as the gin, and destroyed in the same manner and at the same time.

His Honour said that his remarks in the previous case were applicable to the one at issue, and dismissed the claim.

Before RUSSELL ROBERTSON, Esq., Consul.
Tuesday, April 17th, 1877.

John Smith, John Glennie, R. Robieson, Adolf Tonges, Charles Essen, Edward Regan, W. Birkett, Ed. Mills and Charles Winburg, seamen on board the British barque *Punjaub* were charged with combining to disobey the lawful commands of the master.

Edward Mills, as spokesman, said that last night they worked till after six o'clock, and he went on deck about a quarter past and asked the chief mate if it was not time to leave off. The mate said there was still a girder to be discharged, and the ship had a list and must be trimmed. We had worked from six in the morning and had no warning

see no occasion to trim the ship, myself, we said we would not work after six for any man.

Ed. Alvers, chief mate, stated:—Last night Mills came to me a little after six o'clock and said something about knocking off work. I said the ship must be trimmed and there was a Japanese Government boat lying alongside waiting for another piece of machinery to fill her, and as she had two tons more on one side than the other I thought it necessary to have it looked to, and ordered the men not to stop. The ship wanted trimming and was not safe for the night. The men refused to work and I had to get the coolies to unship the girder.

To Edward Mills:—It would only have taken about 15 minutes to trim the ship. I tried to trim her before six o'clock. All hands were busy. She has not, by a foot, so much of a list now as she had last night. I did not consider it necessary to warn you at six o'clock that there was more work to be done.

To Edward Regan:—The girder was ready slung and it would only have taken 15 minutes to get it out of the ship.

I. Jelovitz, sworn, stated:—I am a stevedore. I have not much to say, only that these men refused to work about 15 or 20 minutes past six o'clock last night. The *Punjaub* brought out bridge work for the Railway. A boat wanted only one girder to put it right. This girder was put in afterwards by the coolies. The ship had a list of about 2 feet. The weather was not threatening at that time.

John Black, master of the *Punjaub*:—I went on board the ship last night at eight o'clock and the chief officer reported this circumstance to me. I made an entry in the log book (read). I did not see the circumstances myself.

One of the men explained that six o'clock was the usual time to leave off working and when the men were required to do anything after that they were usually warned at six o'clock. In this instance they were not informed and at a quarter past they stopped.

The chief officer, in answer to his Honour, said that he was never accustomed to go in this way and beg the men to work. It was about supper time and they would have had their supper when their work was done. The weather was not threatening then, but being so changeable the ship was not quite safe with the list she had last night.

Another of the accused remarked that the ship was not a bit unsafe and she had still a list, though on the other side. Nothing had been said to them about the girder or the Japanese boat.

His Honour said that from the evidence given he considered the refusal to do duty on the part of the accused was reprehensible, and he quite concurred in the opinion of the chief officer that with a boat alongside which had two tons more on one side than on the other and only wanted this girder, already slung, to put it to rights the men had no right to refuse to discharge it. He believed Mr. Mills to be spokesman and leader in this affair, was he not?

Mr. Mills.—I am, Sir!

His Honour:—Then, in slight recognition of your talents I will send you to prison for one week; the others are discharged.

Before H. S. WILKINSON, Esq., Acting Law-Secretary.

Thursday, April 19th, 1877.

Asmus Backman was charged by R. Talbot, master of the British schooner *Alerta*

R. Talbot, sworn said:—I am master of the *Alerta*, and the prisoner is mate of the ship. I gave him liberty on Sunday, and on Monday morning he came on board evidently the worse for drink, though he persisted in saying he was sober. At four o'clock in the afternoon, I went on board and found him very drunk. The police were on board trying to arrest the second mate at the time. Finding the mate was unfit for duty I sent him to his berth. He was very abusive and ultimately smashed a door. He then left the ship in a sampan, but I ordered the sendos to bring him back, and again put him in his berth, but he would not remain there. About half-past eight at night I told the watch to haul the side-ladders up and then turned in. Shortly afterwards I heard a noise on deck and on going to see what occasioned it, found that the mate had again left the ship. He returned on board sometime during the night; and the following morning I called him aft and asked what he had to say for himself, and told him he might lose his certificate. Instead of expressing sorrow for what he had done he gave me insolence. He said that he considered, from what had passed, that he was free of the ship, and that he would not do any more work. I ordered him to go on tallying the cargo, but he would not; and when I and Captain Martin were down in the hold he escaped out of the ship. I came and reported him at the Consulate. He was out of the ship all day and returned about eight o'clock at night. In the morning I ordered him to come on shore with me, but he refused, so I came without him. He left the ship about a quarter of an hour after I did; and as he did not appear at the Consulate, I offered a reward of ten dollars for his apprehension.

The prisoner acknowledged what the captain had said to be true; and though he had persisted in saying he was not drunk to the captain, he was willing to acknowledge it now. He was sorry for what had occurred and was willing to return on board to his duty. He was about to return on board when he was arrested; and had not been twenty-four hours out of the ship.

In answer to His Honour, Captain Talbot remarked, that he did not believe the prisoner had any intention of deserting.

His Honour said it was a charge of desertion that he was hearing and that only, but gave liberty for the charge to be altered to "absence without leave," which was accordingly done.

Sergeant Loxton deposed to arresting the prisoner at the hatoba; and that he had a sampan ready engaged to take him to the ship.

His Honour addressed the prisoner and told him that his conduct as the first officer of a ship was most reprehensible. By the captain consenting to take him on board again, he would probably avoid a naval enquiry, the result of which would be the forfeiture of his certificate. He would be fined \$10 and costs.

REGINA vs. P. GERHARD HANSEN.

On the 16th instant, Mr. Ness, Counsel for the prisoner, applied to His Honour for leave to postpone the trial of the prisoner for forgery for a period of fifteen days. The application was granted, and the trial was set down for Wednesday, the 2nd of May.

Yesterday Mr. Dickins for the Crown moved, upon his affidavit, that the order, made in the above matter on the 16th instant, be

vacated; and that the trial of the prisoner be set down for a day not later than the 21st instant.

His Honour ordered that both counsel should appear before him at two o'clock this afternoon, when he would hear Mr. Dickins motion.

The proceedings were private, but the result is that the trial has been again postponed, this time until the 8th June next, in consequence of the absence of an important witness for the crown.

Shipping.

ARRIVALS.

- April 12, Brit. schr. *Tori*, Williams, 55, from Bonin Islands, &c., General, to Captain.
 April 13, Brit. str. *Gaelic*, Kidley, 2,652, from San Francisco, Mails and General, to O. & O. Co.
 April 13, Brit. schr. *Alerta*, Talbot, 250, from Takao, Sugar, to Walsh, Hall & Co.
 April 14, Am. ship *Hase*, Wilkinson, 862, from New York, General, to R. Isaacs & Bro.
 April 14, Ger. barq. *Jacobine*, Holmann, 417, from Takao, Sugar, to Netherlands Trading Co.
 April 16, Dan. barq. *Catarina*, Fischer, 340, from Takao, Sugar, to Chinese.
 April 17, Brit. brig *Leonore*, Crichton, 250, from Takao, Sugar, to Jardine, Matheson & Co.
 April 17, Frch. corvette *La Clocheterie*, Capt. Reynier, 2,000 tons, 10-guns, from Kobe.
 April 18, Brit. str. *Bombay*, Smith, 1,325, from Hongkong, Mails and General, to P. & O. Co.
 April 18, Ger. brig *Otto*, Adamsen, 231, from Takao, Sugar, to Jardine, Matheson & Co.
 April 20, Brit. barq. *Wandering Minstrel*, Sievwright, 361, from Takao, Sugar, to Chinese.
 April 20, Brit. 3-m. schr. *Syringa*, Partridge, 242, from Takao, Sugar, to Grosser & Co.
 April 21, Am. str. *City of Tokio*, Maury, 5,050, from Hongkong, Mails and General, to P. M. S. S. Co.
 April 21, Jap. str. *Nagoya-Maru*, Conner, 1,914, from Shanghai and ports, Mails and General, to M. B. M. S. S. Co.

DEPARTURES.

- April 13, Brit. str. *Belgic*, Metcalfe, 2,627, for San Francisco, Mails and General, despatched by O. & O. Co.
 April 13, Brit. sloop-of-war *Egeria*, Captain Douglas, 894 tons, 4-guns, for Hakodate.
 April 13, Brit. barq. *Caspar*, Davies, 830, for Manila, Ballast, despatched by Captain.
 April 14, Brit. str. *Gaelic*, Kidley, 2,652, for Hongkong, Mails and General, despatched by O. & O. Co.
 April 15, Brit. str. *Viking*, Castle, 2,558, for Kobe, General, despatched by Walsh, Hall & Co.
 April 16, Jap. str. *Saikio-Maru*, Vroom, 2,145, for Shanghai and ports, Mails and General, despatched by M. B. M. S. S. Co.
 April 17, Frch. corvette *Talisman*, Capt. St. Hiliare, 1,400 tons, 6-guns, for Kobe.
 April 18, Frch. str. *Menzelch*, Pasqualini, 1,008, for Hongkong, Mails and General, despatched by M. M. Co.
 April 18, British gun-boat *Hart*, Comdr. Royse, 584 tons, 4-guns, for Hongkong.

PASSENGERS.

Per Jap. str. *Saikio-Maru* from Shanghai and ports:—Mrs. D'Iffanger, Mr. and Mrs. Faulkonet, Miss King, Miss Vincent, Mrs. and Miss Burns, Miss Freeman, Mrs. Yokohama, two Misses Honda, two Misses Funamoto, Paymaster Baughman, U.S.N., Capt. Fletcher, Lieuts. Krietmann and Chalmet, Messrs. Hanabusa, Honda, Coullant, La Groix, Kirkwood, Aldrich, E. Graves, A. Graves, Kirby, Meyer, Ward, Mighton, Burnett, Cox, Ford, Reed, Schumacher, Ozawa, Tsuchiya, Shimada, Okamoto, Takeda, Itow, Marinaga, Dunn, Tanaka, Satow, Kobayashi, Mayeda, Yamamoto, Murayama, and Sakamiye; 8 Europeans, 289 Japanese, and 4 Chinese in the steerage. For America: Capt. West and Mr. Salter.

Per Frch. str. *Tibre* from Hongkong:—Mrs. Cowles, Mrs. Morrison, Messrs. Streichts, Morrison, Vanek, Siches, Hodgkin, and Harcourt.

Per Brit. str. *Gaelic* from San Francisco:—Messrs. Ng Choy, A. Jamieson, A. Beauchamp, Jno. Fayler, J. Myers, 1 Japanese, and 1 Chinese. For Hongkong: Messrs. W. MacFarland, F. Wooster, C. Hill, Capt. J. H. Cromwell; and 120 Chinese in the steerage.

Per Brit. str. *Belgic* for San Francisco:—From Yokohama: G. H. Noerzli, Lieut. Lompre, Captain Orcil, Messrs. M. Bollenhagen, Hutchison, Dryland, E. L. Ryder, A. A. Meyer; and 1 Chinese in the steerage. From Shanghai: Messrs. A. E. Salter, W. A. West. From Hongkong: Mr. and Mrs. Ede and child, Capt. R. W. Cairns, Messrs. Bernard Schaar, M. S. Tonnochy, A. M. Hayward; and 1 European, and 601 Chinese in the steerage.

Per Brit. str. *Gaelic* for Hongkong:—Gen. T. B. Van Buren, U. S. Consul-General.

Per Jap. str. *Saikio-Maru* for Shanghai and ports:—His Excellency Okuma, Minister of Finance, Mr. Iwamura, Governor of Kagoshima-ken, Messrs. E. de Mortier, J. F. Kelly, H. Ludwig, Jameson, J. H. Dunn, Ng A. Choy, O. Meuser, H. Kniffier, and 50 Japanese in the cabin.

Per Frch. str. *Menzelch* for Hongkong:—Baron Von Siebold, Messrs. Karasaki Gerou, Filippi, F. Ducrot, R. Kirkwood and Lamarque.

Per Brit. str. *Bombay* from Hongkong:—Mr. J. F. Cruickshank, M. Choy Chee, wife, and child, Mr. Cheang, and 13 Chinese on deck.

Per Am. str. *City of Tokio* from Hongkong:—Captain Barker, Captain Lenney, Messrs. M. A. Rotschke, M. C. Murray, M. J. E. Cass in the cabin; 13 Europeans, and 1,111 Chinese in the steerage.

Per Jap. str. *Nagoya-Maru* from Shanghai and ports:—Mr. and Mrs. Dumaresq, Mr. and Mrs. Cobden, Messrs. W. Coyle, J. Whyte, Ohbrich, Robertson, Wheeler, R.N., Goerke, J. H. Tillson, Dr. McLeod, Tenant, Pereira, Moorse, Rig, Oyama, Narabara, and 10 Japanese in the cabin; and 3 European, 2 Chinese, and 203 Japanese in the steerage. For America: Mr. and Mrs. Farnham, Mr. and Mrs. Metcalfe, Miss Metcalfe, Mr. and Mrs. Macmakin, Mr. and Mrs. Chalmers, Mr. and Mrs. N. A. House, Mr. Denlon, Mrs. Bassett and Mrs. M. B. Paul.

REPORTS.

The British steamer *Gaelic* reports:—Left San Francisco March 21st, at noon. Had light westerly winds to the Meridian; then strong North West and West to arrival at daylight, on the 13th inst.

Yokohama Market Report and Prices Current.

STAPLE IMPORTS.

For a few days after the departure of last mail there were some signs of activity in imports which, however, speedily ceased. The market continues very dull and inactive, and quotations are quite unreliable as holders will not sell at the prices given in our table of quotations.

The ship *Haze*, with kerosine and general cargo has arrived from New York. Transhipped cargo ex *Copernic* and *Peshawar* from London, *Glaucus* from Liverpool, and *Iraouaddy* from Marseilles is also to hand.

ARTICLES.	PRICES.	REMARKS.
COTTON PIECE GOODS.		
G. E. Grey Shirtings—		
7 lbs., 38½ yds. 39 in. per piece.	\$1.30 to 1.60	Importers holding for an advance. No immediate enquiry.

Yokohama Market Report and Prices Current.

STAPLE EXPORTS.

SILK:—Business in silk is almost suspended. Buyers are alarmed at the aspect of European affairs, and will not operate except at considerably reduced prices: dealers are anxious to sell, and willing to accept almost any offer. All quotations are purely nominal.

TEA:—Operations in this staple have almost come to a stand still, supplies of Old Crop having ceased to come in, and the season being rather late. Only one or two musters of New Leaf so far have been shewn, but these only represent "garden musters."

No amount of Tea can be expected to go forward before steamer leaving this at the close of May,

BIRTHS.

On the 22nd April, at No. 107, Bluff, the wife of Captain E. W. SIKEMEIER of a son.
On the 22nd April, at Takanawa, Tokio, the wife of ALFRED MILNES, Esq., B.A., (Lond.) of a son.
On the 28th April, at No. 55, the wife of Mr. E. W. HOHNHOLZ, of a son.

MARRIAGE.

On the 16th instant, at H. B. M.'s Consulate, Hiogo, by A. A. ANNESLEY, Esq., H. B. M.'s Acting Consul, and afterwards at the Union Protestant Church, by the Reverend H. J. FOSS, CHARLES HENRY COBDEN to FRANCES HELENA PEERS GREEN.

DIED.

On the 30th ultimo, at the residence of her son, Takanawa, Tokio, Madame Goro Moyo, aged 62 years.

Summary.

OUR last MAIL SUMMARY was despatched per P. M. Steamer *City of Tokio*, which left this port at daylight on the 22nd ultimo. Since then we have received the following Mails, namely:—American, per *City of Peking*, on the 23rd ult: French, per M. M. Steamer *Tanis* (due on the 25th ult.) on the 27th: English, per P. & O. Steamer *Malacca* (due on the 1st inst.) on the 30th ult. Latest dates are:—London; letters, March 16th, telegrams, May 8: New York; letters, March 24th, telegrams, May 8: San Francisco; letters, April 3rd. The M. M. *Menzaleh*, with the Marseilles Mail of March 25th, and the Oceanic with San Francisco Mails of the 16th ultimo are hourly expected.

For several days after the date of our last no news of active engagements was received from the scene of insurrection. It appeared that the imperial forces and those of Saigo, alike wearied of strife, were taking

some hardly earned repose after the campaign which ended in the relief of the siege of Kumamoto, and the withdrawal of the insurrectionary armies from the province of Higo into Hiuga. The war news published in the native papers was confined to narratives more or less highly colored, like the war prints in the picture-shops, according to the fancy of the narrator, of events which had occurred during the famous siege, and little anecdotes of the achievements of such and such a warrior. Now, however, fighting has recommenced. Another campaign, which is likely to be as lasting as the former one, has been opened. The imperialist forces occupy Kagoshima town and fortress; and imperialist men of war float in the waters of the harbor and its approaches. Several actions are reported to have taken place already in the neighborhood, in which the imperialists are credited with what advantages have been gained. Meanwhile disaffection appears to be spreading rather than diminished. A serious rumor assigns to Itagaki, late sangi and a very influential nobleman of Tosa, the design of marching to the capital at the head of an army of reformers, with a view to persuading the government to institute a representative assembly. It he cannot gain his end he is willing, in his own words, "to be a martyr for freedom." All things point to this, namely; that until representative government is instituted this unhappy country will be a hotbed of discontent, dissension, and revolt.

IN order to induce defection in the rebel armies the imperial Commander-in-chief has promulgated offers of amnesty to insurgents deserting their banners. A scale of rewards for the arrest of insurgents, or information leading to their arrest, has also been published. Neither measure seems to have been productive of great results.

GENERAL Saigo, Acting War-Minister, has left for Kioto. General Kuroda has resigned his command in the South, on the pretext of resuming his duties as President of the Agricultural Department. He returned on the 8th instant to Tokio, where he was received with great pomp.

THE Emperor is expected to return from Kioto to Tokio very shortly. He will make the journey from Kobe hither by sea. The Empress Dowager left Kioto for the modern capital on the 7th instant, and is travelling by easy stages along the Tokaido.

WHEN the P. M. S. S. *City of Peking* was twelve miles from her anchorage in Yokohama harbor, which she had left at daylight on the 24th ultimo, to go on to Hongkong, she ran aground, in foggy weather, off Rubicon Point. The U. S. S. *Alert*, and the P. & O. S. S. *Massilia*, were sent to her assistance. Their aid was not required, however, in float-

ing her, as she was lightened, and got off without difficulty by her own engines at high tide.

THERE have been several movements among the foreign men-of-war on this station. H. B. M. S. *Audacious*, the flag-ship of Admiral Ryder, and the German Frigate *Elisabeth*, have arrived in this harbor. The U. S. S. *Alert* has suddenly received orders to go down to Australia. She will probably leave to-morrow.

PROFESSOR VANEK, the conjurer, has been performing in Yokohama. The amateurs of the *Tennessee's* crew have given two performances to crowded houses, in aid of the Temperance Hall funds.

ATHLETIC sports have been held:—of the Yokohama Amateur Athletic Association in Yokohama, of the Kobe Regatta and Athletic Club in Kobe, and of the Amateur Athletes in Tokio. The Yokohama Rowing Club have held a meeting. The Cricket Ground is open for the season, and Cricket and Baseball matches have been arranged. Two race meetings are to be held, in the course of the two next weeks. The Band of the *Audacious* and *Tennessee* occasionally perform in public; so that of out-door amusements there is no lack.

A RACE in which great interest is evinced, is arranged to be rowed on the 12th instant, between the barges of the two flag-ships, H. M. S. *Audacious* and U. S. S. *Tennessee*.

ROBBERIES, and attempts at robbery, are becoming unpleasantly frequent. Fires are still reported, more or less destructive in extent, but as the spring advances they become less numerous.

A FAREWELL banquet has been given to Count Fé d'Ostiani, Minister for Italy, and to Mr. St. Quentin, late *Chargé d'Affaires* for France. The former, whose successor is on board the *Menzaleh*, has further received the decoration of the first class of the order of Meiji.

MR. ELI T. SHEPPARD, who arrived in the *City of Peking*, has assumed the duties of his post as adviser to the Foreign Office.

SOME of the Japanese newspapers express anxiety as to the designs of Russia in this direction. When intelligence of the declaration of war between that country and Turkey was received, one native journal, at least, said that acquisition of some of Turkey's territory by Russia might be followed by schemes of Russian conquest in Japan.

THE Staff of the Foreign office, who since the burning of their handsome building on the 1st February have occupied offices in the Public Works Department and the Ohamagoten, successively, will shortly take possession of the offices formerly devoted to the use of the Educational Department.

PERSIA AND BAGDAD.

THE claim, curtly noticed in latest European telegrams, said to have been advanced by Persia to Bagdad, makes another link, and a badly twisted one, in the tangle which the thread of the Eastern Question has become, and which under the bungling fingers of Western diplomates has been so unravelled that now the swords of Muscovite and Mussulman are drawn, one on each side, to cut it.

The pachalic of Bagdad is a triangular strip of territory, having its apex to the South-East on the Persian Gulf. It lies between latitude 30° and 38° N., and between longitude 40° and 48° E.: is bounded on the North by the pachalics of Diarbekir and Van: on the West and South by Syria and Arabia; and on the East by Persia. Its extreme length is 550 miles: its extreme breadth 350 miles; and its population is estimated at 2,000,000. The rivers Tigris and Euphrates, which join their time-honored and historic streams at the town of Korna in latitude 31° N. and longitude 47° E., water what were once its fertile valleys. The territory is divided, under the present rule, into three parts. 1. East of Tigris, comprising the districts of Khuzistan (Susiana) and Khurdistan (a part of ancient Assyria). The former country is still rich in grain and fruit. 2. West of the Euphrates, a barren, uncultivated tract, sparsely peopled with nomad tribes, and losing itself in the great Syro-Arabian desert. 3. The district between the two rivers, the northern portion of which is known as Algesirah, or the Island (the ancient Mesopotamia), and the Southern as Irak-Arabi, ancient Chaldea and Babylonia. The last of these divisions, which is now a desert tract, was in ancient times luxuriously fertile, the seat of mighty empires and inhabited by industrious and wealthy populations. It has claims to be considered the cradle of our race, and has witnessed some of the most stirring scenes in the old world's eventful history. Misgovernment and the incapacity of its rulers during a long succession of centuries have reduced it to its present condition. In the better cultivated districts of the pachalic rice, wheat, maize, barley, hemp, flax, and tobacco are produced in some quantities; while Bagdad dates, so well known to commerce, are brought to great perfection. The population is composed of Turkomans, Armenians, Turks, Jews, Arabs, and Kurds; and the life of open violence led by the two last races, their contempt for all law and order, their sanguinary mutual wars, have rendered their names notorious, and made them, one would think, undesirable subjects for any weak government. Its principal cities are Bagdad, Bassora, and Mosul.

Bassora, though not a seaport town, is the water outlet for the trade of the pachalic. It is situated on the western bank of the Euphrates, about midway between the mouth of the Tigris and the Persian Gulf, from which it is distant seventy miles. The population is about 60,000. To the town the river is navigable for vessels of 500 tons.

As for the capital, the city of Bagdad, it is built on both banks of the Tigris, and its population is estimated at 40,000. Travelers have over and over again dilated upon the beauty of its external aspect, its verdant circling groves of date trees, with domes of minarets and mosques glinting through the foliage, and the disappointment which follows a closer inspection, and a walk through its filthy and malodorous streets.

What picturesque and fairy-like associations are not connected with the names of Bagdad and its famous ruler, the Caliph Harun the just! Their poetry, however, vanishes with the distance which lends enchantment to the view. Its bazaars are still famous, and well stocked with the produce of Eastern and Western marts, but its trade has greatly decreased since Persia began to trade with Europe by way of Trebizonde on the North and by the Persian Gulf on the South. Notwithstanding this, and though Kurds and Arabs still lurk on the roads which issue from the city, to waylay and rob travellers and caravans, Bagdad still carries on an extensive traffic with Aleppo and Damascus, and has valuable manufactures of red and yellow leather, silks, and cottons. Steamers ply on the majestic waters of the Tigris to and from Bagdad, whose greatest interest after all to England centres in the fact that here is one of the principal stations of the Anglo-Indian telegraph.

Such is the country of Bagdad, which, under a powerful and intelligent government, might have become one of the most prosperous in the world, a garden almost as beautiful as that of Eden, which lay in or near it. It would hardly benefit by cession to Persia, notoriously one of the weakest governments in the world. Still Turkey could ill afford to lose it, as by its loss, apart from the deprivation of a valuable pachalic, she would be bereft of all communication with the Persian Gulf.

That such a claim as the one of Persia to Bagdad, if put forward at all, has been advanced by the Shah, who is generally understood to be much under the influence of Russia, in obedience to an impulse having its origin in the Court of St. Petersburg, can hardly be doubted. The objects of Russia in urging such a move are not hard to find. Turkey's embarrassments would be increased in Asia, and her power in Europe consequently weakened if the demand of Persia were insisted on. And with Persia as an ally Russia would be able to meet the Turk in Asia. Whether, as a dimly foreseen or hoped for ulterior result, Muscovite diplomatists, by this move, are working towards an outlet for their country in the Persian Gulf may be matter for speculation; but is hardly worth considering at present. The annexation of Persia by Russia would hardly be allowed. At present what is most evident is that this claim, which does not appear to have any support from justice or reason, has introduced another complication into a difficulty, the solution of which appeared sufficiently remote and puzzling without it.

THE RUSSO-TURKISH WAR.

FROM the telegrams to hand by the mail from Hongkong per *Gaelic*, it will be seen that fighting between the Russians and Turks has commenced in earnest. As was expected, the Russians were the first to commence hostilities; and they seem to have sustained a severe check in the pachalic of Kars. This territory has before now been the scene of struggles between the two nations which are again in arms against each other. The famous defence of Kars by the Turkish soldiery for six months, from June to December, 1855, under General Williams, was one of the most brilliant passages in the history of the Crimean War. In 1828 the dependency was wrested for a time from the Turks by the Russians under Paskievitch. The pachalic is

about one hundred miles North-East of Erzurum in Asiatic Turkey, close to the Russian border; so that the Muscovite forces have on that side invaded the enemy's territory. The Turks with their formidable ironclad fleet have not been inactive. Poti, which they are now bombarding, is a fort of Asiatic Russia, in the government of Trans-Caucasia, and a military post of great importance, besides having a large export trade in wine, honey, wax, wool, silk, and skins. It is situated close to the embouchure into the Black Sea, and on the South bank, of the Rion river. Guirgevo, which the Russians are occupying is situated on the left bank of the Danube directly opposite Rutchuck, and forty miles South-West of Bucharest, of which town it is the port. It is no stranger to the clangor and horrors of war. It was the scene of a signal victory gained by the Turks over the Russians on the 7th July, 1854. The Dobruscha is the North-Eastern district of Bulgaria, occupying the important military position between the Black Sea and the Danube. It, too, has long been a famous battle ground, from the times of the Roman and Byzantine campaigns to those of the Crimean war.

Thus it appears that one Russian army is trying to advance through European Turkey, and another through Asiatic Turkey, with the intention no doubt of converging upon Constantinople. The latter army, which is spoken of as having already crossed the frontier at Alexandropol (Gumri), is the one which has been routed at Batoum, and it has five hundred miles of hostile territory to march through before it can arrive at Scutari. Who can say that it or its successors ever will arrive there? It may be true that the invading force numbers 150,000 men, but it will have opposed to it, in addition to the Turkish armies, the hundreds of thousands of a martial and fanatic population. As for the invasion of Turkey in Europe, should, as seems probable, the Russians have succeeded in passing the Danube to the East of the Turkish positions on that river, they will be in a country which their forefathers have often reddened with their blood; and the Turks of to-day are ready to offer as strenuous a resistance to the invader, as Suwaroff experienced from their great-grandfathers. Be the result of the war what it may, it will only be arrived at after a desperate struggle, and one which the diplomatists of the powers did wisely, if they wrought futilely, to try to avert. It is hard to say what complications may or may not be thickening the political atmosphere of Europe at the present moment. While sincerely hoping that the spread of the quarrel, and the implication of other nations in the war may be avoided, we cannot but recall the comment of the *Times* which we quoted some weeks ago, "If there is to be war, there must be a great war, and "any power that interferes must be prepared to wage a great war." Of course there will be no interference so long as other interests are not attacked or menaced; but it would be hard indeed to guarantee that in the heat of strife they shall neither be assailed nor threatened.

We have just published in pamphlet form the text of the Convention of Yedo, June 25th, 1866, including a revised tariff, and appending the Bonded Warehouse regulations and a tariff of storage charges. This will be found a most useful desk companion, as it shows in the tariffs all the alterations and reductions, many of them very important ones, to the date of publication.

A CLOSE SEASON.

We have repeatedly drawn attention to the fact that the shooting regulations are of little value in providing for the preservation of game, if the Japanese authorities will not enforce a close season in the markets. On the very morning of the 1st of May, two months after most foreigners by tacit consent discontinued shooting, and six weeks after the expiry of last season's licenses, the market was stocked with pheasants. Is not this too bad? It appears, however, evident that Japanese sportsmen would not continue to shoot or snare birds for public sale if foreigners would not buy them. As the authorities do not appear to care to do anything more than they have done in gaining their point of making foreigners take out and pay for shooting licenses, we make one more despairing appeal to housekeepers, caterers, and even French cooks at the principal hotels to put their veto on the slaughter. We will not draw odious comparisons; but will assume for the residents of all the foreign nationalities a *solidarité* in the gastronomic barbarism of eating pheasants out of season. Who knows but that the feverish colds, headaches, and lassitude which are now so prevalent among those who have and those who have not pheasants at their tables, may be brought by the dust-laden south wind, as a general vengeance for the infraction of one of the first prandial laws by some among us? Those upon whom the Tower of Siloam fell were not the most exemplary of sinners in their town and time. Perhaps the editor of the *Echo* thinks that his fellow-citizens are among the prime offenders in the matter of encouraging the intempestive massacre of pheasants. Without expressing any direct opinion ourselves thereon, we will translate his remarks for the impartial benefit of "all whom it may concern."

The Japanese Government have promulgated shooting regulations. They have bound all foreigners who choose to follow this amusement to furnish themselves with a license, passably dear, and which only conveys the right to shoot during the period in which the destruction of game only in a certain measure tends to the destruction of the different kinds. So far nothing could be better. They are masters in their own country, and although one may be permitted to think the cost of a license exorbitant, especially for this year, in which one has been compelled to pay for three months the price which one will probably henceforward have to pay for six, there is not much to be said on the subject, since the measure taken is perfectly legal. But what residents can hardly understand, and what they find thoroughly unjust as well as awkward, is that, while their shooting is prohibited during the hatching and brooding time, a thing perfectly rational, the native authorities tolerate on the part of their subjects what they forbid in foreigners, who, let us take care to admit, have always had the good sense not to attempt to kill game in Spring and Summer. And if even it were only a question of a stray shot fired here and there in defiance of prohibition, we might pass the matter by in silence. But it is not only of sporting derelictions in the close season that we want to speak here. That to which we wish especially to call the attention of the authorities, is poaching with nets and snares, which is carried on to such an extent that every day the Yokohama market is abundantly provided with game of all kinds. If the Japanese government had in view, by their game laws, the prevention of a rapid destruction of game, we must concede that their negligence

in regard to the enforcement of this law is most prejudicial to the end they wished to attain. We are here but the echo of a concert of complaints on the part of all the community. We are persuaded that our *confrères* of the English press will not fail to support our legitimate observations; and we are pleased to believe that the government, informed of what takes place, will take measures to put a stop to an abuse which is in all respects deplorable."

There is nothing in this which we have not repeatedly urged ourselves, in our comments from time to time upon the game question, and our assertion of the imperative necessity, if the breed of pheasants in Japan is not to become extinct, of a rigidly enforced close season. Seven weeks ago we pathetically deplored the fact that pheasants were being murdered out of time to stock the market, and implored foreign residents not to encourage the evil by the indulgence of a depraved appetite. The grievance is not one whit abated even at this day; so for more reasons than one we are pleased to reproduce the somewhat tardy but much needed remonstrances of our French contemporary.

STRANDING AND FLOATING OFF OF THE "CITY OF PEKING."

A passage having been kindly accorded to our representative on the 24th ulto. by the Captain of the U. S. S. *Alert*, he proceeded in that vessel in the afternoon to Rubicon Point, where the *Alert* arrived shortly after half-past five. The *Massilia* had arrived some time previously. Captain MacDonald, Lloyd's Surveyor, Mr. Harman of the Pacific Mail Company, and Mr. W. L. Merriam of the Imperial Japanese Post Office, were also passengers in the man-of-war, and Mr. F. E. Foster, general agent of the company, was in the *Massilia*. The big steamer was found lying end on to the shore, the stem pointing almost south, on a smooth bank of sand. Her time as taken from Captain Tanner's log is as follows:—The *City of Peking* got clear of her buoy at 5.19 a.m. on the 24th instant. At 5.25 actually left the harbor: at 5.37 passed the light-ship: at 6.28 made land ahead, and at 6.30 took ground inside of Rubicon Point.—So that the time between the vessel leaving the light-ship and getting aground was exactly fifty-three minutes, in which period she had run fourteen miles.

The morning was very foggy; but Captain Tanner and the officers of the *Alert* both agree in stating that the fog lifted just as the steamer left, or in the six minutes which elapsed between her clearing the buoy and leaving the harbor, and but for this break the captain would not have left when he did. He was well clear of the shipping, and had got his course set before the fog thickened again. The real cause of the accident was that the ship had travelled faster than she was given credit for, having in fact covered fourteen miles when she was thought to have gone only twelve; and just before land was made the engines were slowed and the course was about to be altered. The fog then lifted again and the rocks off Rubicon Point were made on the port bow. Had the helm been ported here the vessel must have gone on the rocks; and this the Captain saw at a glance. The engines were reversed, the helm put hard a-starboard, and the monster vessel was grounded gently upon a shelving but perfectly smooth bed of sand. So imperceptibly

was the ground taken that the passengers imagined that the ship had been stopped by the captain to take in despatches. Intelligence of the accident was at once taken to Yokohama by the chief officer of the ship, and help was sent as stated in our notice of the matter yesterday.

When the *Alert* came to the vessel four large lighters were alongside, and cargo was being rapidly discharged by an army of coolies under the direction of Mr. Brown and other servants of the company. Captain Tanner expressed his satisfaction at having such efficient help at hand as that at his disposal in the man-of-war; but also said confidently, that when the ship should be lightened and the tide was at its highest his own engines would bring him off. This opinion was certainly not shared by all on board; but it turned out to be correct notwithstanding. In the course of the night eight hundred tons of cargo had been discharged into the lighters and four hundred tons of water taken from the tanks. Then the plan and time of action were decided on. It was settled by Captain Tanner, in concert with the captains of the *Alert* and the *Massilia*, that an attempt to force the vessel off should be made about three p.m., when the two aiding vessels should be ready, if necessary, to attach hawsers and aid the *City of Peking's* engines in a supreme effort. It may be easily imagined, when the large stake at issue is taken into consideration, that much anxiety was felt on board, and a restless night passed by those interested even as mere spectators. By three o'clock all was ready on the big ship, and the *Alert*, which throughout was handled in a most masterly manner by Captain Barker, her new commander, was close by, under steam, ready to pass on board and make fast the sixteen inch hawser with which she was provided. The P. & O. tug was alongside the *City of Peking* ready to take off to the *Massilia* another hawser of equal size. These precautions were unnecessary, however, but owing to a misunderstanding which, with Captain Rand's explanation is quite conceivable, the *Massilia* remained at anchor till the last moment. This vessel, by-the-by, had great difficulty in finding a safe berth, and at last had anchored two cables lengths off the stranded steamer in thirty fathoms of water, and necessarily had an immense quantity of chain cable out. Immediately that the tide served, the *Peking's* powerful engines were set going at full speed—reversed motion—; and without apparent effort she glided from her sandy bed as smoothly as though she were being successfully launched. Those on board did not at first even realize that she was moving. The immense hawser with which she was moored to a two-ton anchor at some distance from her stern, slackened so rapidly, though it was being wound on a winch, that it was believed to have parted. All doubt was however set at rest in a brief moment. The great ship was bearing down, stern on, with alarming rapidity to the port broadside of the *Massilia*. The action of the engines was instantly reversed, and the damage, no longer altogether avoidable, from the imminent collision, reduced to a minimum. The *City of Peking* no more felt the shock that followed than she would have felt the impact of a feather, but the crackling and rending of timber and iron, and the smashing of glass, on board the *Massilia*, testified that that ship had not escaped scatheless. Very fortunately, however, the paddle-box was not touched, and the wheel was unhurt, the destruction

being confined to the deck houses, about seven in number, on the port side forward of the paddle boxes. One of the strong iron supports of the sponson was torn in two, and the lamp room was in much the same condition as the traditional china shop when the bull has finished his gambols. In addition to the ship's ordinary lamps this room contained a great number, some seventy or eighty we believe, of lamps newly purchased by the Mitsu Bishi Company. All these were reduced to shreds *statim et instantur*. This damage was the only *contretemps* which occurred during the most successful operation of getting the *City of Peking* off the beach. It is certainly not serious; and is principally unfortunate that the *Massilia's* services were really not required, and that, while she had been at first ordered to return to Yokohama at midnight, she had ultimately, in reply to a request telegraphed to Mr. Rickett, the agent, been allowed to remain by the grounded vessel till morning. As soon as the *Alert* discovered that the *City of Peking* was again in deep water, and that the *Massilia* required no assistance, her head was turned towards Yokohama. On her way back she met the flagship *Tennessee*, with Admiral Reynolds on board, on the way down to render aid if required. On the *Alert's* report of matters, however, the flag ship steamed round and the two vessels returned in company to this harbor whither they were quickly followed by the *Massilia*. The loaded lighters were towed to Powhatan Bay; and thither the released big vessel steamed and in the course of the day took in again her cargo, resuming her interrupted voyage towards Hongkong at 4.30 p.m., having providentially escaped a very serious danger. All on board seemed pleased to testify to the coolness and judgment of Captain Tanner, of whose seamanship and ability to command a large steamer also the officers of the *Alert*, some of whom have sailed with him—the Captain is a U. S. naval officer—speak in the highest terms of praise; but the question still remains whether even twelve knots an hour in these waters on a foggy morning is not a dangerous rate of speed.

We omitted to mention that, on hearing of the accident, M. Conil, the agent of the M. M. Company, immediately offered the services of the *Tibre* to the P. M. S. Co.'s agent, Mr. Foster, and Mr. MacRitchie, on behalf of the Light-house Department, was no less prompt in placing the *Meiji Maru* at the disposal of the company. We cannot better show how complete has been the narrow escape of the *City of Peking* than in quoting Captain MacDonald's report of the result of a survey held by him the morning the vessel was taken off the beach. He writes:—

"Being informed that the P.M.S.S. *City of Peking* was stranded on the mainland, inside and about half a mile from Cape Kanonsaki in this Gulf, I yesterday came on board and found her lying on the beach, bows on, having got on shore during a fog. She was on hard sand and took the ground evenly fore and aft. I remained on board during the night, and after they had lightened her by about 1,200 tons in cargo and water, succeeded in getting her off at half-past three o'clock this a.m. I sounded the compartments fore and aft half an hour after she floated, and found she was making no water; and from the position in which she was on the ground, together with the water being perfectly smooth, I am of opinion she has received no damage to her hull,

and consider her to be a first class risk to prosecute her voyage.

"On board the *City of Peking*,

"off Yokoska, Yedo Bay,

"April 25th, 1877.

"WM. MACDONALD,

"Surveyor for Local Offices.

"Govt. Surveyor for British Shipping
"at Yokohama."

AMATEUR ATHLETIC ASSOCIATION OF YOKOHAMA.

FIRST DAY.

The Spring Meeting of the above Association commenced on the afternoon of the 27th of last month. The weather was not all that could be desired, as the rain clouds which threatened in the morning had not blown off, and the wind was occasionally boisterous. Still, the rain which fell the previous day and during the night laid the dust and left the running path in very good order. After the last Autumn Meeting it was proposed to send an invitation to Athletic Societies in the other open ports; and at the annual business meeting, held in the latter part of December last, the proposal took a definite shape, and the Hon. Secretary was instructed to communicate with the Societies at Kobe, Nagasaki, Shanghai and Hongkong, which he accordingly did. But the overture was a failure, as excuses were tendered from all the societies. This is much to be regretted; for if a few athletes from elsewhere had come to contest the honours, the interest of the meeting would have been greatly enhanced. The alteration of the second rule of the society so as to admit non-resident officers of the army and navy as competitors on payment of the usual entrance fee, partly counterbalanced this, however, and resulted in bringing out some naval athletes. This also made up for the non-appearance of one or two local amateurs who have from various causes been prevented from competing at the present meeting. The attendance at first was not large, but as the afternoon progressed more visitors arrived on the ground. After a few events had come off the Grand Stand was tolerably well filled, many ladies being present and taking much interest in the sports. During the afternoon the Secretary announced the receipt of a letter from Lady Parkes, kindly consenting to be present at to-morrow's meeting and to give away the prizes. The usual concourse of natives lined the fences, and seemed to be highly pleased with the proceedings. The excellent band of H. B. M.'s S. *Audacious* contributed its share of amusement by playing at intervals the various pieces in the programme published in our issue of yesterday. The following is a summary of the different events of the day.

1.—100 YARDS FLAT. Handicap.

Two Prizes.

FIRST HEAT.

A. J. Smith ...	7 yards ...	1
F. C. Pike, R.N. ...	4 " ...	2

Two out of the four entries only came to the post. Smith had three yards advantage over his antagonist, which he increased somewhat after the first few yards had been travelled, owing to Mr. Pike tripping. The latter quickly recovered himself, but failed

to overtake his opponent who won by about 2 yards.—Time 11 seconds.

SECOND HEAT.

A. J. Watson ...	Scratch ...	1
E. B. D'O. Aplin, R.N.,	3 yards ...	2
A. H. Dare ...	2 " ...	3

This heat resulted in a victory for Mr. Watson. The time was better than in the previous race by half a second. Time 10½ secs.

THIRD HEAT.

F. Walker ...	5 yards ...	1
E. F. Kilby ...	6 " ...	2
J. Dodds ...	6 " ...	3

This was a gift to Mr. Walker. Mr. Dodds ran well for more than three parts of the distance, and then gave up struggling, allowing Mr. Kilby, who had been running a couple of yards behind, to take second place. Time, 10½ secs.

C. P. Hall won the 100 yards at the last Autumn Meeting in 11½ secs., but we hope to see better time to-morrow in the Final Heat.

2.—THROWING THE HAMMER, 16 LBS. Handicap.

One Prize.

A. J. Smith ...	Scratch ...	1
A. Lingham, R.N. ...	Scratch ...	2
A. Owston ...	8 feet ...	0
H. A. Vincent ...	10 " ...	0
E.B. D'O. Aplin, R.N.,	8 " ...	0

The contest in this event lay between Mr. Smith and Mr. Lingham, the two scratch men, who tied at 68ft. 3in. It was agreed that all should throw again, which was accordingly done. Those who were handicapped stood no chance, as both Smith and Lingham exceeded their previous throws, the former winning with a throw of 75 ft. 8in., the latter throwing 74ft. 5in.

The last time the hammer, 16 lbs., was thrown was at last Spring Meeting, when F. J. Smith won with a throw of 79 feet 8 inches, having 10 yards given him.

3.—150 YARDS FLAT. Handicap.

Two Prizes.

FIRST HEAT.

F. Walker ...	5 yards ...	1
A. T. Watson ...	Scratch ...	0

Mr. Walker got much the best of the start in this event, and Mr. Watson, after running a few yards, gave up. His competitor, finding he had the race in his own hands, eased off, though he passed the post in 16 secs.

SECOND HEAT.

A. Lingham, R.N. ...	5 yards ...	1
E. F. Kilby ...	8 " ...	0

Two started for this race, and Mr. Lingham succeeded in winning by a couple of yards. Both athletes ran slowly at first, but soon put on steam, the winner doing it in 16½ sec.

This was won last autumn by F. Walker in 16½ secs.; and we fancy him in the final heat to-morrow.

4.—GRIFFINS' RACE. 440 Yards Flat.

A. Barry, R.N.	1
H. A. Vincent	2
F. Vivanti	0
F. O. Pike, R.N.	0

All the Griffins who had entered but one came to the post. At the start Mr. Vivanti made the running at a rattling pace, and in the first hundred yards succeeded in establishing a strong lead, Pike running second, Barry third and Vincent last; but before the race was half over several changes had taken place, and Barry assumed the lead. Vivanti and Pike began to show symptoms of dis-

ss, and Vincent took second place. Still never stood a chance of winning, as Barry d by this time gained a long lead which he maintained to the last, winning in 63½ sec.

We were glad to see this race in the programme, and think there should always be such a scratch race, which is an invaluable guide, for future events, to the handicappers.

5.—THROWING AT WICKETS.

Throwing at the wicket is certainly not one of the things that our local athletes are proficient in. Many were the vain attempts to knock down the stumps. At length Mr. Walker took one of the outside sticks. Shortly afterwards Mr. Scott succeeded in flooring a stump. These were the only two who hit the wicket at all, and they had three more throws when they each succeeded in scoring. In the final throw off Mr. Scott took the wicket and won, his opponent missing.

H. J. Snow won this last Autumn, and D. Scott, Junr. (the present winner) in the Spring of 1876.

6.—LADIES' PURSE. 600 Yards Flat. Presented by the Ladies of Yokohama. Entrance free. Handicap.

A. T. Watson	... 25 yards ...	1
A. H. Dare	... Scratch ...	2
A. Owston	... 30 yards ...	3
E. F. Kilby	... 40 " ...	0
F. Walker	... 15 " ...	0
A. J. Smith	... 50 " ...	0

This event was the next on the programme, and the race of the day, and brought a good field of six to the post.

The race was an excellent one. In passing the post the first time, Smith was leading; Walker spurted down the straight, and got up to within a few yards of the leader, evidently intending a "fank," which did not succeed, as he was immediately passed by Watson and was nowhere afterwards. Watson here made the pace very hot. Passing the dressing-room, Dare looked dangerous, and in the next hundred yards ran through his competitors. But by this time Watson had established a strong lead which he maintained to the finish, winning by about fourteen yards. A splendid race ensued between Dare and Owston for second place the former securing it by about a yard. Time 79½ secs

At the close of the race the purse was presented to the fortunate winner by Mrs. Cobden, who expressed the pleasure she experienced in presenting it. Though a stranger in Yokohama, she had heard of the Yokohama athletes, of whom by the next meeting she hoped to be able to speak as "our" athletes.

Mr. Watson replied that he had no idea while in the race that such an honor was for him. When, however, he came to the home stretch, and saw so many fair faces in the Grand Stand, enthusiasm gave wings to his feet, and brought him, he could hardly explain how, in the fortunate first.

7.—100 YARDS. Race for Boys under 12 years of age. Entrance free.

Three Prizes.

The boys' race brought about twenty little fellows to the post, and some trouble was experienced in getting them off. At length they started Tommy being first, Bragu second, and Charlie third.

E. Brooke was the happy winner last Autumn.

8.—120 YARDS HURDLE RACE; over 10 flights.

A. Barry, R.N.	... 10 yards ...	1
A. H. Dare	... Scratch ...	2
A. J. Smith	... 3 yards ...	3
A. Lingham, R. N.	... 5 " ...	0

This was a capital race. The jumping was first-class. Barry, who had 10 yards start from the scratch man, ran well. Dare caught up well, however, both jumping the last hurdle together; but Barry recovered himself first, and in the run in managed to put a couple of feet between him and his antagonist, which the latter failed to recover. Time, 19½ secs.

F. J. Smith, with 10 yards start, won in the Spring of last year in 20½ secs.

9.—HIGH JUMP. Handicap.

J. Martin, R.N.	... 7 inches ...	1
A. J. Smith	... Scratch ...	2

The high jump only brought out two competitors. Smith succeeded in jumping 5 feet, but having to give 7 inches to his opponent, who jumped 4 feet 6 in., he lost the prize.

H. J. Snow, with 7 inches given him, was the winner last Autumn, and cleared 5 feet 4 inches, including his allowance.

10.—880 YARDS FLAT. For Non-Commissioned Officers and Men of the men-of-war in port. No entrance fee. Five entries or no race. Three prizes.

R. Pinfield	... H.B.M.'s S. Audacious...	1
J. Ruse	... " "	2
J. Johns	... " "	3
A. Keats	... " "	0
E. Botting	... " "	0
J. Gilbert	... " "	0
H. Clement	... " "	0
J. E. Sullivan	... U. S. S. Tennessee ...	0
D. McDonald	... " "	0
J. P. Johnson	... " "	0

This was a well contested race. At the start the lot went away at a rattling pace, which soon caused a couple to fall out of the race altogether. When about three parts of the way round the first time Ruse took the lead and Pinfield second place. A capital race ensued between these two all the way from that point to the goal. In coming into the straight on the run home, Pinfield challenged the leader, and after a struggle deprived him of first place, and raced to the finish in capital style. Time 2m. 31½s.

The last time the Association gave a prize for this distance to non-commissioned officers and men serving on board the men-of-war in harbor, was in the Spring of 1875, when M. Logan of the U.S.S. *Monocacy* won in 2 mins. 30 secs.

11.—HALF-MILE FLAT. Handicap.

Two Prizes. First Prize, "The Secretary's Cup." Presented.

A. H. Dare	... Scratch ...	1
F. Walker	... 20 yards ...	2
A. Owston	... 40 " ...	3
A. J. Smith	... 60 " ...	0

This was the last race of the day and one of the best. Walker was apparently the favorite. The pace was a hot one from the start, Walker and Dare forcing the running. In passing the goal the first time, Walker was leading, Owston second, Dare third, Smith having given up. When opposite the Stand in the second round, Dare deprived Owston of second place, and ran close up to Walker. In crossing the bottom of the course, Dare went to the front and was never afterwards collared. A capital race ensued down the stright for second place, which Walker secured. Time, 2m. 10½s.

The Half-mile race last Autumn (Ladies Purse), was won by F. Walker, but no time was taken. Last Spring this distance (prize also a Ladies' Purse) was done in 2 min. 8½ secs. by A. H. Dare from scratch.

To-day's meeting must be pronounced a very successful one, having come to a close without a single hitch or accident. In concluding our report we have only to add that Mr. Jeyes officiated as Starter, Mr. Dodds as Judge, and Mr. Pinn as Time-keeper.

SECOND DAY.

The pleasure of witnessing the sports on the second day was considerably enhanced by the improvement in the weather, which, with the exception of the occasionally boisterous wind and the dust it raised, was delightful. The attendance yesterday—in the latter part of the afternoon—was moderately good but to-day it was exceeded greatly, the stand being crowded with ladies. Sir Harry and Lady Parkes arrived after the second race had been run. At the close of the sports Her Ladyship, according to promise, gave away the prizes to the successful competitors.

12.—FINAL HEAT. 100 Yards flat.

F. Walker	... 5 yards ...	1
A. J. Watson	... Scratch ...	2
A. J. Smith	... 7 yards ...	0

The final run off for the 100 yards flat was the first event of the day, and, as was anticipated, it excited considerable interest. This was looked upon as a certainty for Walker, as he had such an easy thing of it yesterday, making the same time as Watson, who had to-day to give him five yards. The result proved that the prognostication was a correct one, for Walker got well off at the start and soon collared and passed Smith. Watson lost ground at the commencement, and was never dangerous, though he succeeded in securing second place. Time 10½ secs.

13.—FENCING.

One Prize. Presented.

A. Lingham, R.N.	... " ...	1
A. J. Smith	... " ...	2

Only the two above named gentlemen put in an appearance for the fencing bout. Mr. A. F. Nègre had entered but did not contest. Mr. Smith was evidently overmatched, and did not touch his man until he had himself been hit three times. After that the bout was rapidly fought through, Mr. Lingham touching apparently whenever he pleased. At the close he had scored nine touches to his opponent's three.

14.—FINAL HEAT. 150 Yards flat.

F. Walker	... " ...	1
A. Lingham, R.N.	... " ...	2

As both competitors started on even terms, with the exception of three yards penalty imposed on Walker as the winner of the 100 yards race, it was not difficult to single out the winner, for Walker yesterday did the distance with perfect ease in 16 seconds, while Lingham at his best pace took 16½ seconds to accomplish it. In these short races Walker seems to be let in too easily; but his style of running while training and when competing are so different that it is impossible to say whether he has improved since last meeting, or been overlooked in the handicapping. The race itself was scarcely worth calling a race, for Walker recovered the three yards he had given his opponent in the first twenty paces, after which he went easily, evidently waiting for Lingham, who finally gave up. Time, 16½ secs.

15.—THROWING THE CRICKET BALL.

One Prize.

C. P. Hall	1
F. Walker	2
A. J. Smith	0
E. F. Kilby	0

Walker was the first to throw and threw the ball such a distance that neither of his competitors succeeded in passing it in their first attempts. Hall, however, in his second throw succeeded in beating it by several feet. Walker in his third beat his first; but Hall won by a foot and a half. The throwing cannot be considered good, especially when a strong wind in favour of the throwers is taken into consideration, and was afterwards beaten several yards by Lingham and another gentleman. The distance covered by Hall was only 80 yards.

H. J. Snow, with a throw of 91 yards, won this last Autumn.

16.—440 YARDS FLAT. Challenge Cup.

Two Prizes. 1st Prize, Champion Cup. Presented by J. J. Dare, Esq. Open to Members of the Association only. To be won three times at half-yearly Meetings of the Association before becoming the property of the holder. No Handicap. A Silver Medal will also be presented to the winner at each meeting.

A. T. Watson

This was the first race of the kind for which a prize has been given by the Society, and was the result of a suggestion made by Mr. Watson at the last annual meeting. The best runner is frequently overhanded, and races of this kind should bring the best athletes together. Thus it was a very great pity that this, the first Challenge race, should have been a failure, as it actually was from the fact that only Mr. Watson came to the post. Mr. J. J. Dare was prevented from competing, having met with an accident, and the remaining athletes most probably thought that after Watson's exhibition in the Ladies' Purse yesterday they stood but little chance of winning. We hope that races of this kind will not fall through in future in consequence of the failure to-day. Possibly a law precluding the possibility of a walk over would be a good interpolation in the Association's rules. Watson ran all the way but no time was taken.

17.—150 YARDS FLAT. Handicap. For Honorary Members of the Association and Visitors. One Prize. Entries taken on the ground.

Dodgson	7 yards	1
Harcourt	Scratch	2
Armstrong	3 yards	0
Court	3 "	0
Hodgkins	5 "	0
Anson	5 "	0

This race brought the above to the post. A good start was effected, but Dodgson, who was limit man, was never reached by the others, and won with plenty to spare. Time 17½ secs. Harcourt second.

In a similar race last Spring the time was 17½ secs.

18.—ONE MILE FLAT. Handicap.

Two Prizes. 1st Prize, presented by Lady Parkes.

F. Walker	Scratch	1
A. Owston	25 yards	2
A. J. Smith	75 "	3

Great regret was manifested at Mr. Dare having scratched for this event. Owston was considered by some as the probable win-

ner, though Walker was the general favourite. Smith started but after the first round sat down to rest a while. Walker in the run down the back straight the second lap took the lead which he maintained to the finish, though in the run home the last time Owston made an effort to wrest it from him; but his opponent had too much "go" in him, and putting on a spurt won by several yards. The time was very bad, being 5 m. 30 sec.

F. Walker was the winner of the mile race last Autumn also, doing it in 5.17½ secs. from scratch.

19.—LONG JUMP.

For this event there were no competitors.

20.—TUG OF WAR. Open to Teams of 12 Men from the Men-of-War in port.

This was rather an amusing affair, especially to the Japanese, who roared again when the *Tennessee* men appeared with foolscaps on their heads, and their features decorated with burnt cork. Twelve men from the *Audacious* were the first to contest for the honours with their American cousins. After a brief struggle, however, the niggers got their opponents on the run, and amidst the plaudits of the spectators pulled them over the line. Twelve men from the *Vigilant* were then brought against the *Tennessee*, but they also gave way and the men from the American flag-ship were declared the winners.

21.—CONSOLATION. Once round. For all who have started but not won a prize at this meeting. Entrance free. The prize to be subscribed for by the winners at this meeting.

E. B. D'O. Aplin	1
Pike	2
Dodds	0

This event was a gift to Mr. D'O. Aplin, who won by about 20 yards. Time, 60 secs.

This race is always "once round." Why not change it sometimes? However, we like to see some scratch races, for it makes it better for future handicaps, giving the handicappers some data to go upon. The Consolation is further generally a good race, and sometimes is done in excellent time, as for instance in the autumn of 1875, when it was won by A. T. Watson in 57½ secs. the quickest time on record.

22.—STEEPLE CHASE. Handicap.

Two Prizes.

A. Lingham, R.N. ...	60 secs.	1
E. F. Kilby ...	60 "	2
A. Owston ...	60 "	3
A. Barry, R.N. ...	80 "	0
A. H. Shirley, R.N. ...	80 "	0
F. Walker ...	60 "	0

An immense mixed crowd gathered around the water jump to witness the steeplechasers take the leap. On the pistol being fired Barry at once went to the front and took the jump very prettily followed by Walker. Only one of the others succeeded in clearing the leap; and he unfortunately slipped and fell on landing. The remainder took the water as if it was their natural element. On returning Barry was the first to make his appearance, closely followed by Shirley. He took the hurdle bravely, but did not attempt the water leap again, plunging into the pool and struggling through. Shirley was second and Owston third. Lingham, however, entered a protest against Barry on the ground that he did not go over the course. The dispute was finally decided in favor of Mr. Lingham.

At the conclusion of the Steeple Chase the prizes were distributed by Lady Parkes who expressed the deep interest she felt in the proceedings. Her Ladyship complimented the successful competitors, and hoped that the present would not be the only occasion when they would have the honour to carry off prizes. The gentlemen thanked Her Ladyship, after which cheers were given for the ladies, and the officers of the *Tennessee* for permitting their excellent band to attend, and a most successful meeting was brought to a close.

THE YOKOHAMA AMATEUR ROWING CLUB REGATTA.

Aquatic sports are apparently but little appreciated in Yokohama by the general public, if we may judge from the interest manifested in the racing on the 3rd instant and, indeed, it must be admitted that the programme this year has not been of a very enticing character. This is owing to several reasons, some of which we are acquainted with, and others which we can only surmise. Some months back an effort was made to get up an interport race, which, if it had been attended with success, would have increased the pleasure of the present meeting a hundred fold. But, unfortunately, this attempt fell through, owing to uncontrollable adverse circumstances; though the challenge which had been sent to the respective neighbouring Rowing Clubs, was accepted by one, viz: that of Hongkong. However it was ultimately found absolutely necessary to give up the idea.

The weather was everything that could be desired for the occasion; but at the appointed hour for starting there were no visible signs that anything unusual was about to take place. The English hatoba presented its usual aspect—a few foreigners loitering about, and two or three score of Japanese coolies lying half asleep on the wall or standing in knots of twos and threes, who arousing themselves occasionally, however, fixed their gaze upon the Boat House, this being the only symptom by which a stranger might have anticipated that something uncommon was going to occur. Along the Bund were a few stragglers; but there were few if any lady spectators. We regret this because the efforts of the various societies in the community to afford an agreeable diversion from the monotonous routine of every day life, deserve the sympathy and countenance of the public, even though the programme offered should not be a very liberal one; and in nearly every instance, when the public turn out *en masse*, is it a foreshadowing of a series of successful meetings.

FIRST RACE, FOR CANTON FOUR.

WHITE BOAT.

C. P. Hall.
G. W. F. Playfair.
F. E. Lewis.
H. O. Jeyes, (stroke.)
J. Rickett, (cox.)
Colours, Red.

BLACK BOAT.

E. F. Kilby.
J. S. Van Buren.
A. H. Towse.
A. Milsom, (stroke.)
H. B. Henley, (cox.)
Colours, Blue.

Shortly before four o'clock signs of life appeared about the Boat House, and a few minutes after that hour the crew of the white boat took their seats and rowed gently towards the starting point. When opposite the hatoba they rested on their oars for a brief space, as if waiting for the appearance of their competitors in the black boat, and then resumed their journey. Shortly afterwards the crew of the black boat made their

appearance in Messrs. Whitfield & Dowson's steam launch, with their boat in tow. The course marked out for the different events to be rowed over was supposed to be a mile in length, but it was evidently considerably more. The starting point was about a quarter of a mile beyond the Pacific Mail Coal Sheds, where two boats had been moored; and the goal was opposite the English hatoba between the P. M. lighter and a boat, on which the judge was stationed, moored on the inside of it.

About twenty minutes to five o'clock the contending boats were in position, each being kept there by a line attached to the moored boats and held lightly by the respective coxswains. All preliminaries having been arranged, and the challenge of the starter responded to, the word "go" was given. The lines were simultaneously dropped and away sped the Canton Fours. Thinking they would be easily overhauled, the steam launch was allowed to fall considerably in the rear, and consequently found it a difficult undertaking to come up with the racers. The black boat was on the inside, and so had a slight advantage, as the water was a trifle smoother there than where the white boat was rowing. It soon became evident that the race was going to be a tight one. Both crews were rowing 31 strokes to the minute, but after travelling some distance this was increased to 32. Still no change took place in the position of the boats, and when they were opposite the Grand Hotel they were racing bow to bow. Both boats had all the way on it was possible for their crews to give them and the pace was a hot one. Soon after this, however, symptoms of fatigue became manifest in both crews, more apparent, if anything, in the black boat, and the white boat managed to show a trifling lead. Still the race was by no means decided, for the black spurted and recovered a little, but again relapsed and finally lost a well contested and pretty race by half a length. Time 7 minutes 20 secs.

SECOND RACE.

CHAMPION PAIRS.

C. P. Hall,	H. A. Towse,
H. C. Litchfield.	H. O. Jeyes,
H. B. Henley, (cox.)	J. Rickett, (cox.)

The contest between the Canton Fours being over, the crews for the second and last race of the day took a passage in the steam launch, with their boats in tow, to the starting point. Mr. Litchfield was the only fresh man out of the four, he not having contended in the previous race. Mr. C. P. Hall took bow oar in one boat, with Mr. Litchfield stroke and Mr. Henley coxswain. In the other boat Mr. H. O. Jeyes took the bow oar, Mr. H. A. Towse stroke, and Mr. Rickett coxswain. A good start was effected, and both boats went away at 34 strokes to the minute. They kept on even terms until nearly opposite the Coal Sheds, when Mr. Henley's boat forged slightly ahead. This lead was increased to a length shortly afterwards, through the stroke of the other boat unfortunately "catching a crab." He quickly recovered himself, but some seconds passed ere the craft sped on its way with that steadiness which was noticeable before. The speed of the boats now increased, both rowing 35 to the minute, but though Mr. Rickett's crew made some determined efforts to wrest the lead from their opponents they never once succeeded. About a quarter of a mile from the goal, the bow oar of the last boat held out signals of distress, and it was evident that the previous race had taken a good deal out of him, for it was with the greatest difficulty that he

contrived to keep time with the rapid stroke of Mr. Towse, who rowed with much dash. The other crew were on better terms with each other, and eventually won the race by a little over two lengths. Time 10.05.

This event closed the sport for the day. Mr. Dodds acted as starter and time-keeper, and Mr. J. J. Dare as judge.

CALIFORNIAN INDUSTRIES.

THE following extracts from a letter recently received by a gentleman in this town from a former resident of Yokohama who is now in San Francisco, will be found of interest.

SANTA CRUZ, CALIFORNIA,
March 6th, 1877.

I have acquired all the information necessary, and I'll now enlighten you and our friend as to the conclusions I have arrived at as to this being a desirable place of settlement for us Easterns, and English, or rather British, at that:—

The climate is delightful, and varies only six or seven degrees during the year; but a warmer or colder temperature may be obtained by going south or north, or further back among the hills. The seasons are dry, the summer being without rain, and the ground then becomes brown, dusty, and parched up. Stock then subsists upon the dried up herbage, which is not bad for sheep as they thrive best on dry, scanty pasture. Farmers depend for their crops upon the wet season or winter, which begins about October. Very little rain falls, and irrigation is resorted to where practicable; and the heavy dews coming in from the sea serve to start the crops and pasture, so that during the winter the country wears a green coat and is park-like and beautiful. Thus winter is the most enjoyable time of year. During this period sheep and lambs should fatten, and the lambs obtain strength to stand the short feed of the dry season. Should the wet season prove dry, stock die off unless they can be driven to other pasture; but as California is now overstocked and there are no unoccupied pastures, the result of a dry season is death of the stock. The present season has been very dry, but very light showers of rain having fallen, and grain which should have been put in in January is in many places not yet sown; and should there not be some very considerable rains the crops will be small. Stock owners have destroyed their lambs when born, as there is no hope of rearing them through the absence of pasture, and the certainty of there being a poor hay crop, and a deficiency of summer feed. Sheep are being sold at from 10 to 75 cents: in fact sheep farmers are taking what they can get.

Californian wool fetches a very low price, being very greasy and catching up much dirt in the summer. Clover bur, which they eat during the summer, is also very injurious to the wool and detracts from the price. Again, two shearings have to be made during the year owing to the change of feed from green in winter to dry in summer, which causes a break in the staple or two kinds of wool in the one fleece: there is consequently double cost for shearing.

Sheep farming has been a good thing when they could be pastured on free land, but all lands worth anything are taken up, and Arizona is looked to as the future stock country when the Indians are disposed of. There is an immense quantity of land in California utterly worthless, being the mountain ranges, bleak, arid, and snow covered. The valleys and gulches are very rich and are productive of great crops of grain, but these are all taken

up and are held at from \$25 to \$100 an acre. The farmers generally work their own lands and work like coolies too. As to their wives and families, hired labor is too expensive, so my host, who has 320 acres of hill land, with his son drives the plough, milks the cows, feeds the pigs, cuts down his timber which he splits into logs and sells at about \$3 a cord in Santa Cruz. A farmer here is a laboring man, and such only does it pay to farm; nineteen out of twenty make only a bare living from the farm produce, the soil producing nearly all their requirements, and the natural increase in the value of the land, owing to the continually increasing population, makes up for the loss of profit from the farm. Farm lands at \$50 an acre do not pay for cultivation. Fruit, vine, and raisin culture pays in some instances, but last season many grapes were thrown to the pigs, and it is no use making wine which nobody buys. Of course wine-making is in its infancy, and, in course of time, practical vignerons who make it a speciality may succeed. The same with raisins: there is an immense market; but, to obtain prices, a certain standard is necessary. Here in California everybody is on the experiment; a man no sooner succeeds in some speciality than it is overdone and the quality depreciated, or the production is too large for the local markets; and when it comes to competing in foreign markets the producer must accept a very low price from the exporter, as it only pays the latter to export because he gets his goods for next to nothing.

Hog farming I believe is the safest thing to go into, and answers best on the reclaimed or *tulé* lands on the river banks. The *tulé* being of natural growth and good food, pigs are allowed to root for themselves, are then fattened on corn, and sent to market. *Tulé* lands, however, are good for other purposes, and where they are leveled and protected from freshets are worth \$100 an acre. But ranches are always for sale, and anyone desirous of going in, could readily procure suitable land at a reasonable rate. Hog raising does not require that the land should be secured by levees, as being only used as a hog run, there would be nothing for a flood to destroy.

The farmers are, as a rule, a very low class, being in fact laborers, and are no society except for themselves. Of course there are shrewd intelligent men among them, but I should not care to have no other society. I cannot say that I am favorably impressed with Californian manners and customs. In an interview I had with the secretary of the Farmers' Association at San Francisco, he admitted that nineteen out of twenty farmers were not paying expenses.

Our Consul, Mr. Lane Booker, advised as the best investment, to deposit sums in the Savings Banks; their system is an exceedingly safe one and they pay interest in the shape of a half-yearly dividend according to the profits realized, 12 per cent has been the prevailing dividend per annum for several years past (originally 15 to 18 per cent) but rates are now down to 8 per cent. One to one and a half per cent on money may be made per month, but then one must be on the spot to look after matters.

—, who used to be in Yokohama, are running exchange shops in San Francisco just as the Chinese do in Yokohama. These shops are very numerous here owing to the varied price of money and currencies.

The conclusion I have arrived at as to settlement in California is unfavorable, as far as sheep farming is concerned. Australia or New Zealand is preferable; and should I settle in that pursuit one of those countries shall be my choice.

NEW STREETS AND NEW TRADESMEN.

(From the new Tokio Hanjoki.)

Since the restoration of the Imperial authority, many new things have been introduced into this capital, and they find increased favor from day to day, and month to month. The most remarkable among them are the newly opened streets for traders. Formerly the total number of streets in the capital was not more than eight hundred and eight, but there are now, according to recent calculations, one thousand three hundred and seventy three streets. Thus, five hundred and sixty-five are newly constructed ones.

Since the new regulations for the land tax have been enforced, every lot of land, however small, possessed by private individuals, being subject to the tax, many wide lots, owned by daimio, are now partitioned out with new streets and lanes through them. Atagoshita, where formerly stood the noble yashiki of great daimio, and of smaller vassals of the Bakufu, with no tradesman's house among them, now contains the most populous of the streets newly opened for trade, and no trace of former magnificent structures is visible between Shiba Kiridoshi and Shinbashi, now wholly occupied by various shops, built as closely together as the teeth in a comb. Ogawa-machi and Jimho-cho are the next in importance, and Kugigara-cho and Hama-cho are very prosperous, being situated in the centre of the capital. Besides these, there are many more in Yamanote, the hilly part of the town, Honjo and Fukagawa. In the time of the Bakufu, all the yashiki of the daimio and nobles were brilliantly decorated and strictly guarded; no tradesman was allowed to enter the gate without a passport, but now all such old customs are entirely abolished, and a new policy is adopted; the main as well as the outside buildings of a yashiki are let to tradesmen and laborers, while the landlord is compelled to reside in one corner.

Therefore, the watch-house close to the front gate is occupied by cart-drawers, and such like laborers; and the innermost apartments, formerly used by noble ladies, is the dwelling of carpenters and masons, while the pond and artificial hillocks are inclosed in the gardens of a new restaurant, and the wide drawing-room is taken possession of by countrymen who sojourn in the capital. The armory has been converted into a pawnbroker's godown, and the fencing room into a theatre. Buck-wheat sellers go out of the front gate, ringing bells, and shampooer come in by the rear gate, whistling unceremoniously. The watch-tower has been changed to a beef-shop, and the pleasure house is owned by showmen. The stable has fat horses no more in its stables, but contains cows which are milked daily, and the kitchen has good meats, but they are for sale. Vegetables grow thickly where stood the tea drinking hall, and mulberry and tea trees are planted, where the stage for lyric performances was formerly erected. Thus no ground is left unused, and the altered view of a yashiki is complete.

As to a petty kazoku, his wife takes a broom herself to perform domestic duties, having no other servants than one man and one woman.

Trade appears very brisk in those new streets, but the tradesmen are almost all shizoku and kazoku, who have no experience in it. So there are many who go away,

after losing their entire fortune in the new profession. This is owing also to the reason that they wish ambitiously to gain a large profit, without the least knowledge or fixed purpose. It is not rare to see a shop opened to-day and closed to-morrow.

A new tradesman sits in his shop, leisurely reading newspapers and histories, for he has nothing close to do. His account books and abacus are on a shelf, covered with cobwebs. Having tired of reading, he slumbers, his arms round his knees; and yawns, stretching his arms, when he is startled by the noon day gun: then he stands upon his legs and winds up the large clock, hanging on the wall: then he duns his wife for dinner, and orders the maidservant to cook the beef. He finishes his drinking and eating, but no customer calls for his goods which are half buried in dust on the shelves. However, very late in the afternoon, a samurai stops for the first time before the shop asking, "have you such and such an article, and what is the price?" The tradesman is very loath to bow down his head, but sits quietly, as he answers proudly, "yes, I have; but it is not very cheap, so you may buy it if you like." "Don't put on a false price, banto," says the customer, "you can surely make it cheaper. Make it so and so, without cheating me." The other feels very indignant at such words, and says to himself, "you may be a samurai, but so am I. I shall not degrade myself for you, though I have become a tradesman;" so he cries out angrily, "I don't urge you to buy anything that you don't want. You may go to any other shop, if you like, but don't speak to me too rudely, since my goods are not much dearer than others."

"I am perfectly at liberty to go to other shops," replies the other, smiling, "without your advice," and turning round as he goes out continues, "your proud features and foreign-ent hair, convince me that it is not long since you became a tradesman. Indeed, you are the perfect model of an obstinate and reckless samurai. You fool! you will lose your entire fortune if you go on in that style!"

Next comes in a woman, saying, "give me some paper." So he is obliged to give her the article demanded, but does it very unwillingly, and mutters as he grasps the one sen left by the customer, "I sell a thing worth one sen, and get a profit of only one rin. How hard it is to trade. I am insulted by a woman for a single sen!" Thus he complains equally in either case, whether he sells anything or whether he does not. His wife confines herself in one room, where she consumes hours together at her toilet and dress, which shows that she still assumes the air of a high-bred lady. She has her *osau* maid-servant, whom she orders about, even to pick up her chopsticks, which she lets fall at dinner. Also, she reads novels, then, tiring of them, plays the samisen, and takes tea and baked potatoes; and, unconscious that her fortune is vanishing, says to her *osau*, very discontentedly, "don't you hear that the theatre at Shintomicho is very good this time, attracting thousands of spectators? And our lady (meaning her late mistress) has already been there. Really, I am jealous of her. Ten years ago, I used to go to the theatres every time when they changed the performances: but such is the change of the world, that the wife of a samurai is now compelled to examine the rice box herself. Sad, is it not? Certainly my life will be shortened," she continues to murmur, "if I continue in this toilsome routine. I think I had better sell my hair ornaments and go

to the theatre once more." "No, we must not think about theatres," puts in the husband with a frown, "you know that the fund which I received from the government, on giving up my pension, has been more than half spent already, and the remainder is converted into these goods, which are sleeping in the shop, and I have not sold as yet as much as one tenth of the whole. Really, I don't know how we can live soon, and I feel as if my breath were getting shorter. I think," continues he gloomily, "that trade is what I can not do well, so, if I don't abandon it, now, we shall be starved to death at last."

"Very well then," replies the short sighted wife, "let us sell all the goods we have, and with half of the sum thus obtained you can manage to get a situation in the government service, which can be easily obtained, I hear, according to the amount paid for it, and not according to the man's qualifications. Do try it, as it is the easiest!" After such a consultation, the poor couple sell their goods, close their shop, and the man goes from friend to friend, praying for their magnetic influence, to get him a situation; but, before any good result is produced, his fund is entirely spent during his wandering about, and he finds himself utterly exhausted in courage, despair stricken, his clothes torn, food scarce. He again seeks a dwelling in a house in a newly opened street, but, this time, he is compelled to live in a *uradana* (back street). Next he is a jinrikisha-man, who draws in his carriage a tradesman, whom he once had looked upon with contempt, while his wife goes out to buy some *miso*, (food made of beans) with a basket in her hand! Thus, for the first time, they are awakened from the dream of idle life, and they find the difficulty of self-support. A proverb says, "Be in trouble once, and send abroad your dear son." Good, indeed, I see the truth of this in the case of this new tradesman.

A SKETCH OF LIEUT.-GENERAL TANI.

(From the *Akebono Shinbun*.)

Lieut.-General Tani Kanjo is a native of Tosa, Shikoku. In his early years he was named Moribe. He learned the Confucian doctrine in the school of Mr. Yasui of Yedo. He was a boy of great ability and talent, and was well taught and much liked by his instructor, who treated him as his own son. And the boy, the future brave defender of Kumamoto Castle, regarded the kind teacher as his father. All his acquaintances admired his good conduct and prompt improvement. Having completed his education, he was allowed to return to his native country, where he was appointed Shokansatsu (sub-inspector) of police by his lord Yama-nouchi-Yodo. After a few years, he was ordered by his lord to travel through every province and report upon the systems of the various daimio giving full information. He rendered great service to the public affairs with which he had to do. This was the time in which the retainers of Mito killed I-i-kamon-no-kami, Prime Minister of the Tokugawa Shogun, at Sakurada-Gomon, Yedo. Fighting was then about to commence between the Mito and I-i clans. Much excitement prevailed in Yedo and the neighboring towns. Mr. Tani, the future Lieut.-General, being in Yedo, was sent by his lord to the Karo of the late Prime Minister. He completed the difficult mission with which he was intrusted, and induced the Karo to cease from his unreasonable conduct towards the Mito house. Ow-

ing to his ability, bloodshed between the two large clans was averted. In 1867, when the Imperial edict was issued against the Tokugawa Shogun, and the Daimio raised forces for the Mikado, Mr. Tani as Lieutenant, followed to Osaka the troops which were ordered to march for the Eastern provinces on the Tosando. He arrived in the city of Kofu with a company of artillery on the 5th March, 1867. On the following day a bloody battle was fought at Katsunuma, where he assisted in routing the Tokugawa retainers of Shinchogumi, commanded by the famous General Kondo. Afterwards he fought many battles with the Tokugawa men at Nibu, Yasutsuka, Okuwa, Imaichi, and several other places in Owu. In one campaign, he marched victoriously as far North as the boundary of the Aidzu dominion, where he captured a fortress on the mountainous road of Honari, guarded for the Tokugawa party by the united armies of the Northern Daimio. He was the first man to enter the castle-city of Aidzu. On the restoration of tranquility, a large pension was awarded him for his brave conduct, and he was promoted to the rank of Lieut.-General, and appointed governor of the castle of Kumamoto. In March of the 7th year of Meiji an insurrection broke out in Saga close to Kumamoto. There were only two battalions in the castle. Lieut.-General Tani sent one to Saga, and stopped in the castle with the other. At that time, much excitement prevailed in Kumamoto and other ken throughout Kinshu. The shizoku of Kumamoto were, then, anxious to join in the Saga rebellion, but they saw that they could take no arms, as long as the Lieut.-General was stopping in the castle. So they concocted various schemes which they hoped would oblige him to leave the fort, and sometimes they talked evil against him. Notwithstanding all, however, he remained in the fortress which was strictly guarded. He said to the Governor Yasuoka that he was sorry he could not leave the castle for Saga, but if he did it would be taken by the shizoku in his absence; and upon its preservation depended the peace of the whole of Kinshu. Thus the shizoku could do nothing; and the entire province of Higo was kept in good order by his talent and ability. This last time, he checked the insurrection, by defending himself in the castle. Further, his meritorious services in Formosa are well known by everyone. At the close of the expedition, he resigned the military service. But he was again appointed Governor of Kumamoto castle on the death of Lieut.-General Taneda, who was killed there by the rioters last year. He fought for about fifty days with the insurgents, and his resistance is rightly held to have principally contributed to the suppression of the insurrection. He is not only a good soldier, but also an accomplished master of Japanese and Chinese literature.

A SKETCH OF NAGAYAMA YAICHI.

THE *Akebono Shinbun* gives the following outline of the life of this distinguished rebel:

Nagayama Yaichi, who committed harakiri at Mibune, was one of the men most renowned in Kagoshima for physical strength. He was formerly named Nagayama Mansai, and served the Shimadzu clan as an instructor in the art of preparing powdered tea. Oyama Tsunayoshi was employed in the same service with him. He was an adept in the art of fencing, and could draw a

long sword while sitting, a very difficult feat to perform. He could do this, divide a rain drop falling from a roof, and put the sword back into the scabbard before the following drop fell from the roof. All the preparers of tea, who are compelled by law to shave their heads, wished to emulate his brave conduct and abandoned the priesthood. Nagayama, who was in addition to his above accomplishments, a man of ability and talent, made himself conversant with the arts, and his proficiency in handwriting and his skill in various subjects were matter of common report. When Choshu first rose in Kioto against the Tokugawa Shogun, he was there with Kirino, and served to the utmost of his ability the cause of the Mikado and his country. During the civil war between the Mikado and Shogun, he was a war inspector of the fourth division of Shimadzu's troops. He gained many battles. He used to rush into the fight regardless of what was before him. In the first engagement at Shirakawa, he was severely wounded and obliged to leave the seat of war. He was cured at the hospital in Yokohama. Having become convalescent, he again took the field in Owu. Tranquility having been restored throughout the empire, he returned to Kagoshima, where the future rebel commander, Saigo, was then *daisanji* of the Shimadzu clan. By him Nagayama was appointed colonel. He was afterwards in the service of the Agricultural Department, as commander of troops in Yezo. He returned to his native country, owing to the ill health of his mother. On her recovery he returned to Tokio and resumed his duties. About this time a popular desire to declare war against the Coreans prevailed, and Saigo, Kirino, Shinohara, and many other high officials, natives of Kagoshima, resigned their posts and returned to their homes. Many of the troops stationed in Tokio followed them to the South-West. But Nagayama held opinions different to those of Saigo and others. His brother, who then followed Saigo, came to take leave on his departure, and then the elder Nagayama tried to dissuade him from "going back to our native country with Saigo and the others." But after a few months, he himself was obliged to return home on private business and to resign his post in the government. In Kagoshima, he did not keep company with the *gakko-to*. Kirino was his intimate friend. A few days before the latter took up arms overtly, he sent two eloquent men, Fuchibe and Etsumi, in order to persuade him to join Saigo and his party. Nagayama refused peremptorily and sent the messengers back, forbidding them ever again to enter his house on a similar errand. When this was reported to Kirino, he visited Nagayama in person and succeeded in inducing him to take part with him. During the siege of Kumamoto, he commanded one battalion of the rebel army. On the raising of the siege, he retreated to Mibune, where he committed harakiri with two other distinguished insurgents.

THE TWO SIEGES OF KUMAMOTO.

On the 15th of April the castle of Kumamoto was relieved by the imperialists. The provision of food was not then more than enough to support the garrison for five days. On the 22nd March, a desperate battle was fought there, and at one moment the castle was in danger of being taken by the insurgents, who seemed to have considered that supplies were already exhausted in the castle.

Since that day, no battle took place at Kumamoto, round which the insurgents remained at a safe distance. About 450 of the garrison troops were killed or wounded. Skirmishes were fought daily. Lieut.-General Tani, governor of the castle, was for the second time in his life in the same position of difficulty. During the Saga rebellion he was in command of the Kumamoto garrison. Only two battalions were then with him in the castle. One half of them were sent out to meet the rebels in Saga. Lieut.-General Tani remained there with one battalion of infantry, consisting of Saga men. Many soldiers were deserting the castle to join the rebels; so the governor closed the gates, and allowed nobody to pass them. At that critical moment, a rumor to the effect that the ex-lord of Kumamoto was to be taken to the castle, as a hostage, provoked much excitement among his retainers. Many thousand of the latter assembled at his residence, and a few hundred shizoku joined the garrison. But, on that occasion, the governor was not so hard pressed as he was this time. The strong castle of Kumamoto was built by Kato, who fought many bloody battles with the Coreans and their Chinese allies. He was in the service of the Tokugawa Shogun, Iyeyasu, and built the castle as a rampart against the Shimadzu clan. This was about 300 years ago. He might have foreseen that his castle would be attacked by rebels in the present day.

MISCELLANEOUS.

On the 20th ult. a fire broke out at Bizencho, Tokio, at about 1 p.m. There was no wind blowing at the time, so that the firemen were able to extinguish the flames in a comparatively short space of time; not, however, until more than fifty houses had been destroyed.

THE *Cosmopolitan Press* of the 11th ultimo, made its appearance upon paper of a bright yellow color, conspicuous indeed but unpleasant to eyes unaccustomed to such brilliancy in journalism. The cause of the anomaly is thus explained by our contemporary:—

"Having lent our Japanese friends the stock of paper we had in hand, and which they were unable to return as they promised in time for our own requirement, we are obliged to use that within our reach. Notwithstanding the color of the paper, our opinion is not jaundiced when we say that a little more attention might have been paid to our request for a modest supply from our neighbors. *De minimis non curatur.*"

The Editor in another paragraph comforts himself with the hope that other sheets may look blue some day.

THE *Hochi Shinbun* says that the Finance Department had on the 21st ultimo expended yen 7,900,000 in expenses connected with government resistance to the insurrection in the south.

ROBBERIES or attempts at robbery are again becoming frequent. On Sunday morning, 22nd ult.—it is thought between four and five o'clock—Mr. Van Oordt's house, No. 23, on the Bluff, was broken into. The wine cellar was entered and a few bottles of wine and brandy were stolen, the thieves getting away with their inconsiderable booty undiscovered.

THE *Mai-nichi Shinbun* writes:—A telegram from Kioto, received at the Port Admiral's office in Yokohama, announces that the insurgent troops show signs of great dis-

couragement. Their principal camps are at Otsu, Yabe and Kiyama. About 2,500 insurgents were buried in the neighborhood of Kumamoto, and about 5,000 or 6,000 at least, were wounded more or less severely. The rebels on the Hinaku road, about 25 ri south from Kumamoto, were pursued by the victorious imperialists as far as Hitoyoshi. Their complete discomfiture is expected shortly. A despatch from Nagasaki says that insurgent bands have appeared in the rear of the imperialists, and a battalion and a half of Imperial troops were sent toward Hagihara, Miyanohara and Mukaizaka at dawn on the 17th instant to meet them. An engagement took place near the mountainous road of Mukaizaka. The insurgents were driven back as far as Kawadoko, where they were finally routed with great loss, and fled in disorder, leaving three cannon and large quantities of ammunition on the field. Thirteen imperialists were killed and wounded. The victorious troops camped for the night at Hagihara. A telegram of the 22nd ult. from Nagasaki announces, that at about 8 a.m. on the 20th, three brigades left the castle to attack Mibune from three directions; a force under Lieut.-General Kawaji from the rear: one under Lieut.-General Yamada on the right: and the third commanded by Lieut.-General Takashima from the front. The insurgents at Mibune held their ground with desperation. But at about 9 a.m. (next day?) they were driven out and many were killed or taken prisoners. At 12 m. Lieut.-Generals Yamada and Kawaji marched along the river Togawa to attack the insurgents in Kiyama.—Mr. Hayashi, Vice Home Minister, has been ordered to proceed to Kumamoto.

We very much regret to have to record an accident to the fine steamer *City of Peking*, which left here on the morning of the 24th ultimo for Hongkong. About one o'clock the same day news was received to the effect that the steamer had touched the ground off Kanonsaki. It appears that the vessel left her anchorage at 5 a.m. weather being very misty though calm; while steaming slowly down the bay she took the ground off Kanonsaki and remained. Assistance was sent for, and the chartered steamer *Massilia*, of the Mitsui Bishi Co., was at once despatched, and was followed by the U. S. ship *Alert*. The *Massilia* towed down two large lighters and another was sent with the Company's tug boat, the object being to discharge cargo forthwith and to use every effort to get the vessel afloat without loss of time. The *City of Peking* is a vessel of 5079 tons gross measurement; 423 feet in length by 48 feet beam and 30 feet depth of hold. She is commanded by Captain Tanner, and had on board about one thousand tons of through cargo from San Francisco, and sixty from here. Passengers numbered 5 in cabin, and 166 steerage. Several wild rumours have already been spread over the settlement, but so far as is known at present the position of the ship is not dangerous if the weather remains calm. (The particulars of the stranding and floating off are fully reported above, page 3.)

DURING the night, of the 24th ultimo, in Tokio, at about 11 o'clock, a fire commenced at Fujimi-cho, Kudan. The flames, however, were quickly extinguished, four or five houses only, it is stated, being burnt.

ANOTHER seige of Kumamoto is threatened by bands of insurgents.

THE *Mai-nichi Shinbun* states that the native traders of Yokohama have formed a Chamber of Commerce, whose meetings will be held once a month.

THE attendance on the second night at Professor Vanek's magical entertainment was unfortunately not so large as the first; but the prestidigitateur sustained the fame which he has acquired and so richly merits. The programme was, as promised, an entire change from that of the first performance. The entertainment commenced with "The Wonders of the Electric Repertoire," which excited the admiration of the audience, who marked their appreciation by frequent rounds of applause. The statement in the professor's hand-bills that his marvellous experiments of the mystic art must be seen to be believed, is not at all an exaggeration. The decapitation illusion was executed with consummate skill. The spectators, to many of whom it was new, regarded it with a mixed feeling; and, sooth to say, it is a ghastly exhibition—one, however, which must always be viewed with interest, and will bear repetition, and so we hope that Mr. Vanek will repeat it.

GENERAL SAIGO, Acting War Minister, accompanied by his Military Secretary and suite, left on the 28th ultimo in the *Nagoya Maru* for Kobe, whence he will proceed to Kioto.

MR. DE GEOFFROY, Minister of France, Madame de Geoffroy and two children, Monsieur de Montherot, Secretary of Legation, and the personal suite of the Ambassador, landed on the morning of the 26th ultimo from the M. M. steamer *Tanais*. No salutes were fired; and the landing was effected in a very quiet manner. The ministerial party are for the present located at the Oriental Hotel in this port, no suitable establishment being ready for their accommodation here or in Tokio.

THE "Centennial Wanderers" scored a complete success at their entertainment on the evening of the 26th of April, which was so well attended that the hall was considerably too small for the number of visitors. It is very easy to be wise after the fact, and to say that so and so would better have been done than what was done. Probably had so large an audience been expected as actually attended the performance of the "Wanderers," the Gaiety Theatre would have been secured: those who obtained seats or only standing room, the latter being a considerable proportion of the whole, would have been more comfortably located: many who actually went away from the door would have gained admission; and nearly all would have had a better view of the stage. The Hall which serves admirably for a concert or lecture room, is not adapted for spectacular representations with large audiences, its limited space being practically reduced by nearly one half when a stage is projected from the rear wall into the room. We incline to think that, after the experience of the 26th and the popularity which the performers then made for themselves, a mixed performance in the Gaiety Theatre, such as they gave on that occasion, would draw a good house, and produce a respectable treasury in aid of any charitable institution which they might wish to benefit; and probably no local institution is in greater need, as certainly none is more deserving, than the Temperance Hall. The opening chorus, given by the troupe of ebon minstrels, was sung in excellent tune and

time, and with real taste and feeling; and some of the subsequent songs by individuals would certainly not have disgraced any company: while the colloquy between "Brother Bones" and "Mr. Johnson" was amusing, and tinted and rendered piquant with well adapted local "gags." The Irish character songs, Professor Slab's remarks on the Eastern question, and Mr. Irving's "Echoes from the Rhine," elicited much mirth, and earned applause both fast and furious. The two comic trifles "Looking for employment," and "West on the Walker," are well within the strength of the company who presented them, and who certainly show good taste and sense, as well as modesty, in selecting such pieces instead of more ambitious ones in which failure might result. Mr. Cuthbertson was kind enough to give his services, and his piano accompaniments were very well executed. We can only hope that the financial management of the Hall is as well satisfied with the pecuniary result of the experiment, as performers and audience have occasion to be with entertainment.

THE approaching return of H. M. the Mikado from Kioto to Tokio is announced in the native journals, which state, further, that preparations are being made in Yokohama, at the Port Admiral's office and elsewhere for his reception.

THE news from the seat of war is very meagre. No fighting is reported since the 21st instant, on which date the imperialists are said to have carried the town of Otsu, and to have driven out the rebels from Kiyama. Six battalions are to be sent, as soon as transport can be secured, to Kagoshima. Shimadzu Hisamitsu has been summoned to Kioto. The report of the death of Shinohara has been contradicted. The medical staff appears to be quite insufficient for the care of the wounded, of whom there are now 2,000 in Nagasaki, where also eight or nine men are buried every day.

By kind permission of the officers of the U. S. Flag-ship *Tennessee*, Mr. and Mrs. Vertelli gave a mixed entertainment on board that vessel. Mr. Vertelli first performed on a trapeze suspended from the mainyard-arm, 65 feet above the water, in full view of all the shipping, after which he gave an exhibition in magic, mystery, and ventriloquism. The officers and sailors were highly pleased with the entertainment, and gave substantial evidence of their gratification by presenting their entertainers with a purse of \$150.

THE regulation compelling the managers of newspapers to submit proof sheets, before publication, to the delegated police authorities will be no longer enforced, at least for the present.

THROUGH the kindness of Mr. L. T. Farr, Acting Superintendent of Foreign Mails, we are enabled to inform our readers that the Postal Union treaty will come into effect as regards Japan from the 1st June next, instead of from the 1st of January, 1878, as previously stated.

It would appear as though Saigo himself did not look forward to any very prompt termination of the Civil War, particularly if it be true, as stated by a correspondent of a native journal, that he told his family when bidding them farewell that he expected to return to Kagoshima in about three years time.

MR. ST. QUENTIN, first Secretary of the French Legation, and until the arrival of Mr. de Geoffroy *ad interim* Chargé d'Affaires, sailed for Europe by the mail of the 2nd instant, on leave of absence.

We have received the first number of a new journal, named the *Tokio Sakigake*, published by the Yushinsha company, No. 6, Sakaicho, Tokio. The subscription is moderate enough: for one copy, one sen, for one month nineteen sen, and for three months forty-eight sen.

It seems a little strange that to warn persons, of more than, say, seven stone weight, against riding down the steepest of the Bluff hill roads in jinrikisha, with one weak coolie drawer, should be necessary. In spite of the frequent accidents, some of them really dangerous, some merely ludicrous, which have proved the peril of the practice, it still continues. Three capsize, the final one resulting in some cuts and bruises, were necessary to induce one gentleman of mere medium weight to walk instead of riding down Hegt's hill. A famous Russian songstress of very pronounced proportions, after descending the same hill like an avalanche, was propelled through a Japanese shop, which she and the carriage demolished, at the foot of it, and remained unconscious for a long time from the effects of a shock which seriously injured her; and one very weighty and influential still resident male member of the community, if report tells truth, had a narrow escape with his life from a similar accident. Few people who frequently walk up or down that hill, but must at some time or other have seen a hand-cab master of its drawer, careering towards Homura with the velocity of a sledge down a "Russian mountain," the coolie straining and panting, and barely able to keep his refractory vehicle in the road, while the fare, white with apprehension and clasping the seat with either hand, can do nothing but sit and meet his fate. If the jinrikisha gets too much way at the top of the hill the unfailing practice of the drawer is to take it, shafts on, into the bank to his right, when naturally an overturn is inevitable, with but rarely very serious results. In the great majority of cases, however, the carriage does not become uncontrollable till lower down the slope, when the bank resource is no longer available, and then the coolie has no alternative open to him. He must only try to keep the middle of the road, yell, as loudly as his sorely tried lungs will allow him, to people to get out of the way,—which it is only rendering them justice to say they do promptly enough,—and take his chance of clearing the corner by the fish pond, which accomplished he is safe, and his passenger can breathe once more. In such a ride a long period of agony is compressed into a few seconds; and the wonder is that people who have once experienced the trial ever again run the risk of it. That they do so and frequently is only another to add to the many proofs already existing that the love of gambling in some form or other is one of the most tenacious of human affections. All this is *à propos* of the fact that a jinrikisha recently overpowered its drawer, became the driver in fact, in descending that same hill, and, being overturned somewhere near the bottom, precipitated the fare, a lady, on to the road, with sufficient violence to bruise her seriously, and leave her with scarcely breath enough to enable her to reach her home.

Attention is drawn to the translation in our Nippon Notes of a thoughtfully written

article in the *Nichi-Nichi Shinbun* on the subject of ship-building. *Rem acu tetigit*. If the Japanese wish to create a commerce of their own they must discontinue the effete system of junk building, except, as the native writer indicates, for river traffic, and construct vessels on approved foreign models. They are about to export timber for ship-building to Tientsin: let them turn their attention to ship-building at home.

The following will illustrate the wonders of telegraphy:—

A telegram was forwarded through the Great Northern Co. at 6.30 p.m. on the 27th to Europe by a firm here, who on the morning of the 28th ultimo at 11 a.m. received the reply dated 27th ultimo 3.30 p.m., the answer apparently having been sent before the telegram was written. The difference in time here and in Europe—9 hrs. 20 min.—explains this anomaly, but the actual time between the despatch of the message and receipt of the reply, sixteen hours and a half, shows how closely the telegraph now connects the most distant parts of the globe, and reflects great credit on the working of the Great Northern line.

The Yokoska arsenal, which has been so well established by the French officers detailed for the service, is passing entirely into Japanese management. None of the engagements of the principal foreign officials are being renewed on their expiration. A few of the very subordinate members of the French staff will be retained in an anomalous position, as advisers, for a few years longer. The other day Mr. Francois, who was at the head of the construction department, left the service; and now among the passengers by the *Tibre* for Europe we notice the name of Mr. Thibaudier, Naval Engineer, who since the departure of the director, Mr. Verny, has been virtual chief of the department. A few days ago, Mr. Thibaudier was admitted to an audience with Mr. Iwakura, who, on the part of His Majesty, testified to the retiring officer the appreciation in which his services had been held by the Government. The decoration of the Japanese order of merit has recently been conferred upon Mr. Thibaudier.

A LETTER from Sapporo, published in the *Akebono Shinbun* and dated 9th April, states that throughout the entire island of Yezo, at the time the letter was written, good order prevailed and business was in a prosperous condition. Heavy falls of snow still took place, and the thermometer registered between 35° and 40°. Ever since the commencement of the insurrection, the Kaitakushi in Sapporo has been guarded by a body of troops and police; and Hakodate and Otaru have also been well guarded. The cultivation of waste lands in the island has progressed considerably, and various kinds of corn and vegetables, the seed for which was sent from Tokio, are thriving. The prosperity of the silk manufacture in the capital is almost equal with that of Tomioka, in Yoshu: and the manufacture of lager beer has become a success since last winter, when it was first attempted; so much so, indeed, that the manufacturers are anticipating an extensive sale in Tokio after this month. Further, mulberry wine and some other liquors are about to be manufactured. The factories now in course of erection will shortly be completed. The price of rice is about six yen per koku. The education of the young is being looked after, [several schools having been established.

A primary school in Sapporo has a daily attendance of about 600 of both sexes. The season for herring fishing has commenced auspiciously; and it is expected that a noticeable change for the better will be observed throughout the island.

A DARING attempt was made recently by some would-be thief to enter the residence of Mr. Elfin, No. 109, Creek side. He first forced open the shutters of one window and then attempted to take out a pane of glass, but failing, he tried another. Not succeeding in this either, the next thing he evidently did was to wrench off an iron staple, used for keeping the shutters open, and with that instrument he endeavored to prize open the window from the bottom. Failure again attending his efforts, he turned his attention to another window, going through the same process and with a like result, the window being too strong. With a perseverance worthy of a better object, the midnight marauder forced open the shutters of a third window; and, with the assistance of the lever he had used before, contrived to break open the window itself. Unfortunately for him, this window had a heavy weight attached to it; and on being released from its clasp the sash flew up with a loud bang, awaking Mr. Elfin who instantly rose, and the thief made off without any spoil.

THE international barge race to be rowed next Saturday between crews from H.M.S. *Audacious* and the U.S.S. Flagship *Tennessee*, promises to be the most exciting contest ever witnessed in Asiatic waters. Both crews are hard at work and may be seen taking long stretches in the outer harbor morning and evening. A marked difference is noticed in the stroke of the respective crews, the *Audaciouses* rowing as high as 45 to the minute, while the *Tennessees* never go beyond 36. In this connection it is remarked by old "stagers" that the British crew show about the same style of rowing as the crew of the fast shell-cutter of H.M.S. *Ocean*, who were champions of the Station in 1869-'70; while the Americans seem to have adopted the stroke of Admiral Rodger's famous barge *Daring*, belonging to the U.S.S. *Colorado*. Neither of the last named boats possessed finer lines than those of the boats used by the contestants in the forthcoming match. As the *Audacious'* crew have thus far shown the highest rate of speed, and as they have also the advantage of rowing sixteen oars against the *Tennessees'* fourteen (the latter receiving no time allowance) the former are the favorites, at slight odds, among the shipping—the men of the *Tennessee* and *Alert* excepted. The most friendly feeling exists between the two crews; and as the race is sure to be honorably contested, it will, whoever prove victors, serve to strengthen the spirit of generous rivalry which should ever exist between British and American sailors.

THE *Viking* left for Amoy on the afternoon of the 6th inst. taking the large cargo of 38,000 piculs of rice.

A PORTION of the native press, in noticing the war between Russia and Turkey, expresses anxiety as to how it may affect Japan. The writers formulate the fear that should Russia succeed in overcoming the Turks, she will then turn her attention towards the extension of her territory in the East, and swallow up Japan!

ON the recommendation of Captain Jas. A. Greer, U. S. N., now commanding the *Lackawanna*, and formerly commander of the *Tigress* during the cruise of that vessel in the Arctic Seas in search of the *Polaris*, Mr. George R. Willis, at present yeoman of the *Tennessee*, has received a medal of honor from the Navy Department. The medal is granted in recognition of a gallant service performed by Mr. Willis during a furious gale off the coast of Greenland, a service for which none of the watch would volunteer, and which he, as quarter master of the watch, successfully accomplished, probably, at the risk of his own life, saving the vessel and the lives of his comrades.

A WRITER in the *Akebono Shinbun*, in an article translated into the *Japan Mail*, revives the question to which of the two countries, China or Japan, Loochoo is tributary. In this connection the writer suggests the old remedy for domestic strife, namely, a foreign war. He says:—

"There is still another trouble which foreign intercourse has brought upon us, in which Japan is more directly involved. Okubo visited China in 1874, and there settled the differences which existed between that country and Japan with regard to Loochoo, it being then admitted that China had no claim to the vassalage of that state and should leave it unmolested for the future. But we now hear that the question we thought settled has been re-opened, and that China puts forward her old claims to tribute from Loochoo.

"Now I am unacquainted with the details of the discussion which took place at Peking in 1874, but it will not be out of place to say a few words on the general question. If the Chinese Government were at present to put forward any unreasonable claim, is there no course open to Japan but to combat it by mere discussion? Of course, if China were in the right and we were in the wrong we should have to frankly admit it, and so the matter would end; but if China should persist in endeavouring to force us to submit to such unreasonable terms as she chose, there would be no honourable course open to us but to take to arms and defy her.

"Now such is the state of the Loochoo question at present, and I am therefore led to point out to our people that we should do our best to finish our suicidal civil war and amalgamate our forces in readiness to resist a foreign enemy.

"Turkey is a feeble nation, despised by other Powers, but when another nation acts towards her in such a way as to affect her dignity as an independent country, her people fly to arms, their Sovereign places himself at their head, and they hasten to meet the foe. Then let our people show a similar disposition, in order, at least, to show that they are not a jot less patriotic than the Turks."

ROBBERIES in the settlement have become rather frequent of late, and the robbers are bold enough to commit their depredations in open day. On the afternoon of the 7th instant some thief walked into Christ Church parsonage, and entered the bedroom of the Rev. W. F. H. Garratt, whence he took a Brahmin cash-box and its contents. The community would do well to be on the alert and place valuables out of the reach of thieves as far as possible.

H. E. COUNT FÉ D'OSTIANI, Minister Plenipotentiary of H. M. the King of Italy in Japan, has received from H. M. the Mikado the rank and decoration of the first class of the Japanese order of merit.

Mr. U. S. Consul Shepard writes from Hankow under date of the 14th April, that he arrived from Ichang at 11.30 a.m. that day, having come in a native boat. He accomplished his mission successfully. He received the utmost courtesy and attention from the Chinese authorities and the people.

Nor a word of disrespect was heard from any quarter, but every kindness was shown to him. He left the U. S. S. *Monocacy* at Ichang, as the river was falling daily, and she could not come down. Mr. Shepard arrived at Ichang on the 1st at 10 a.m., and the port was that day formally opened by the native authorities at 11 o'clock. On Monday he called on the Fan-tai, and on Tuesday on the Tao-tai, and three other officials returned the call. The Tao-tai agreed to secure on shore a house for temporary use as a Consulate, asking a day's time in which to find one,—put up a flag-staff and issue a proclamation. Having thus done everything, Mr. Shepard went on shore at 11 a.m. on Tuesday accompanied by Capt. Fife of the *Monocacy*, and a party of his officers and the Band. They were met by the Tao-tai and four officers, and at 11 o'clock the flag was waved, the band playing "The Star-spangled Banner," and the *Monocacy* firing a salute. On Friday Mr. Shepard left Ichang in a native boat and was given the escort of a native gun-boat to Hankow. No other flag was represented at the formal opening of the port.—*S. C. & China Gazette*.

NIPPON NOTES.

(From the *Nichi-nichi Shinbun*, April 25th.)

Our country, Japan, is situated in the eastern ocean and consists of a group of several islands. Not only has nature provided conveniences for the transport of merchandise, but the richness of the soil enables large quantities of various articles to be raised; and we have a right to say that it is a country resting under the favour of heaven. Notwithstanding these advantages, our shipping is so coarsely and badly constructed, that the vessels are not able to withstand the storms which occur at sea, and so are prevented from traversing the ocean. Living on such lovely islands as we do, is it not sad that our miserable system of constructing junks is not improved upon?

In the middle ages the constitution of our government, as well as our knowledge of the arts and sciences, was scarcely worth mentioning, and certainly not to be compared to that of the present time. But in regard to ship building we excelled, as is easily proved by tradition and history. When the Tokugawa clan held entire power, and its influence swayed the whole of the empire, the third Shogun, Iyemitsu, issued a proclamation regulating the building of large vessels as well as the navigation of the seas. This was probably done from political reasons; but it had the effect of checking the enterprise of the people in regard to navigation and the construction of ships, which caused considerable injury to the country. But it is of little use to advert to that now as it belongs to the past, that which at present concerns us most is the gradual improvement of our shipping, the construction of which should be regulated by law. Will our readers please read our remarks and say whether they are right or not? How is it possible for the natural productions of a country to be augmented if there is no convenience for its export? And how can such a country become rich and prosperous? The foundation of the wealth of a nation is the facilities it affords for transport. Every country differs in its requirements, but one of our greatest needs is an improvement in the mode of building ships. By looking at the fifth annual report of the Postmaster General, it will be observed that between Jan., 1875, and Dec. of the same year, four hundred and fifty-seven vessels

—including those of foreign construction—were wrecked in the Japan seas, and one hundred and eighty-eight men were drowned or rescued from floating wrecks; but among these only three lives were lost through vessels of foreign construction being wrecked. Some proportion of these wrecks may be attributed to the unskillfulness of the navigators, but the majority were caused through the feebleness of the vessels which were not sufficiently strong to withstand the fury of the waves. Alas! many valuable lives were sacrificed and many bodies buried in the bellies of the fishes, and large quantities of useful and costly articles were lost in the depths of the sea. Our greatest desire at the present time is to see the Government pass a law prohibiting the construction of junks, according to the present system, in the future, and make it compulsory on the people to build vessels according to foreign style. Some persons may say, in refutation of our argument, that if junks were abolished, great injury would be done to the country: that shipowners would lose their capital: carpenters and all others engaged in the construction of junks would be thrown out of employment; and the benefit that would be derived from the reformation would by no means counter-balance the injury that would result from the abolition of junk navigation. We do not mean it to be inferred that we advocate the sudden abolition of traffic by junks, but think that ten or fifteen years should be taken to effectually put a stop to it. At the expiration of that period, no junk should be permitted to traverse the seas, though they might be allowed to navigate rivers; and a junk constructed this year might be serviceable for river navigation ten or fifteen years hence. But those vessels requiring to be repaired this year should not be permitted to navigate the ocean. If provisions regulating the construction of vessels are not enforced at the present time, no improvement will take place in our shipping for many years hence.

Now, supposing that the present shape and feebleness of Japanese junks were changed, the benefit that would be derived would by no means be inconsiderable, for, 1st. The facilities for the transportation of merchandise would be increased so that the productions of the eastern and western corners of the empire might be obtained in any part of the country at a reasonable cost. 2nd. The number of lives which are annually sacrificed would be greatly reduced, as well as the quantity of merchandise which is lost. 3rd. Our people would become skillful in navigation from a desire to compete successfully with Europe and America. 4th. Vessels strongly constructed might, in time of need, be converted into temporary men-of-war. Now is it not foolish to attempt to frustrate the achievement of four such benefits?

The transformation in the construction of our ships would probably interfere with the employment of carpenters for a time; and shipowners would very likely lose some of their business. But the former would soon become accustomed to the new work which they would find to do, for it has been sufficiently demonstrated that Japanese carpenters can, under an able director, build large and handsome European houses, and they would learn the art of ship-building as readily. And the loss that would result to the ship owners might in a measure be met by the Government. On some other occasion we may more directly deal with this part of the subject. If the arguments we have adduced are correct, then it is obvious that no great disadvantages would result from a complete reformation in our shipping, but on the contrary four great benefits

would be derived from it. Why, then, shall the government not promptly issue regulations for the construction of ships, and so lay the foundation of the future prosperity of the empire?

THE *Akebono Shinbun*, referring to the resignation by General Kuroda, of his post of "War inspector" writes as under:—General Kuroda, Sangi and President of the Agricultural Department, petitioned His Majesty the Mikado to be allowed to resign his post of War inspector because he saw that his services in that capacity were no longer of any value to the Mikado and country. Since his appointment at the commencement of the civil war, he had escorted the imperial envoy to Kagoshima, where he did his best for the advancement of the government cause. On his return, he left at the head of troops for Yajiro, intending to attack the insurgents in the rear and effect a junction with the Kumamoto garrison from that direction. As he had hoped, he routed the rebels in many battles and relieved the garrison at a critical moment. Having completed this great work, he thinks that it is time for him to return to the discharge of his responsible duties in the Agricultural Department.

According to the *Nichi-nichi Shinbun*, General Kuroda returned on the 18th ultimo, to Nagasaki whence he sent his petition to the government.

SAIGO is said to be very busy establishing his head-quarters on the summit of the Takachiho in Hiuga, where he is building fortifications.

GENERAL SAIGO, Acting War Minister, will shortly leave for Kioto and is expected to visit the seat of war.

OFFERS of amnesty have been held out by the imperial generals to those of the rebels who may desert their own standards, and embrace the imperialist cause.

AN official scale of rewards to be paid to persons giving information which may lead to the arrest, or themselves arresting rebels, has been issued from the imperial head-quarters at Matsubashi.

THE branch office of the Daijo-kuwan in Osaka was closed on the 19th ultimo.

THE wife of Mr. Minami, Consul for Japan in London, went to San Francisco in the *City of Tokio*, en route to London.

THE visit of Shimadzu's son and his followers to Kioto was undertaken merely to thank His Majesty the Mikado for having sent an envoy to Kagoshima; and nothing was said in reference to the insurgents. On the 16th inst., the Prince sent the following short document to the Mikado:—"The desires of H. M. the Mikado have been communicated to our people with great respect. But, notwithstanding instructions to the contrary, many have left their homes. In our present situation we could do nothing to oblige them to remain. This reply we make to His Majesty the Mikado with great respect."

A FORCE of 206 policemen newly enlisted in the Niigata-ken, arrived in Tokio on the 22nd ultimo.

DURING the civil war between the Mikado and Tokugawa clan, twelve battalions of infantry, one battalion of cavalry, and one battalion each of artillery, engineers and commissariat, retainers of the ex-Daimio Ki-i, served on the side of the Mikado with great credit. They were well disciplined. Orders

have been sent to enroll them again, and Lieut.-Colonel Shirage has left for the province of Ki-i in order to organize them. They are to garrison the castle of Osaka, which is at present unguarded.

HER Majesty the Empress Dowager is expected to return to Tokio via the Tokaido during the first decade of May.

ABOUT 100 imperialists in the military hospital in Osaka, who had been wounded but not seriously, having expressed great anxiety to return to the seat of war have been allowed to do so.

DURING the summer months the office hours of the Home and Finance Departments commence at 8 a.m. and end at 2 p.m. daily.

THE resignation of General Kuroda, "War inspector," was accepted by the Mikado on the 22nd inst. The General resumes his duties in connection with the Kaitakushi (Agricultural Department.)

AT about 2.30 a.m. on the 24th ultimo, a fire broke out at Zaimokucho, Shidzuoka, on the Tokaido, and was not extinguished till about twenty houses and one godown were burned to the ground.

NOTICE has been given that Her Majesty the Empress Dowager left Kioto for Tokio on the 7th instant.

DURING the absence of General Saigo, Acting War Minister, who would leave for Kioto in the *Nagoya-maru*, his duties will be discharged by General Ida.

A BALLOON ascent was to have been attempted on the 25th ult. at the Engineering College, Torano-mon, Tokio. We have not yet heard with what success the experiment was attended.

MR. KAJIYAMA, ex-Governor of the late Kagawa-ken, is very busy enlisting about 20,000 shizoku in the Yamaguchi-ken. About 500 raised in the Akita and Miye districts are expected to arrive in Tokio within a few days.

A DIVISION of the imperialists has been ordered from Yajiro to Kagoshima.

SEVEN military hospitals have been established in Kumamoto, and about one hundred nurses sent there from Osaka.

ON the morning of the 24th ultimo a fire broke out at San-chome, Tokio, which destroyed about twenty-five houses.

THE Club of Nobles propose to open a bank with a capital of 18,000,000 yen in Tokio. The proposed site of the establishment is at Kobikicho.

KATSURA YEMON, a former governor of the Miyazaki-ken, has styled himself Governor of Kagoshima, and issues orders on behalf of Saigo.

THE *Mai-nichi Shinbun* says:—A telegram, sent by Lieut.-Colonel Tanaka in Kumamoto to Mr. Ando, Chief of police in Tokio, at 3.50 p.m. on the 25th, ult., announces that on the same day Mr. Kawamura, War inspector, and Lieut.-Generals Oyama and Takashima, left Kumamoto for Kagoshima at the head of a large force of imperialists.—An insurgent who was taken prisoner by the imperial troops, asserted that on the 2nd April all the hospital patients and staffs were removed from Kawajiri to Kiyama and Mibune. About 1,800 wounded rebels were transferred; and 400 or 500, who were considered past recovery, were decapitated.

ON the 26th ult. a fire broke out at San-chome, Tachibanacho, Tokio, and destroyed two hundred and eleven houses. One life was lost. A large sum of money was subscribed on the spot by some nobles and gentlemen for the sufferers.

GENERAL KURODA, President of the Agricultural Department, has arrived in the *Genkai-maru*.

ABOUT 700 policemen, newly enrolled from among the retainers of the ex-daimio Mayebashi, and Kawagoye, are expected to arrive in Tokio.

ITAGAKI-TAISUKE, ex-Sangi, has been ordered to attend at the imperial palace in Kioto.

SINCE the commencement of the war in the South-West, 18,652 rifles are said to have been expended.

THE man-of-war *Chikuba-kwan* left for Kagoshima harbour on the 25th ultimo, and the *Seiki-kwan* followed next day.

THE *Akebono Shinbun* states that Katsura Yemon, the distinguished rebel commander, who established himself as Governor of Kagoshima in place of Oyama, and succeeded in raising 3,000 recruits, is a member of one of the three highest houses in the Shimadzu clan. He is the third son of Shimadzu Seyemon and became connected with the Katsura clan. At one time he occupied the responsible position of private secretary to Shimadzu. He did not take an active part in the late civil war; and after peace was restored he was appointed Governor of Miyazaki ken.

Tabata Tsuneaki, late Chief Secretary of the Kagoshima ken, and who committed suicide, was kareai to Katsura. Although not distinguished for any great deeds, still he was a good statesman. When Saigo left the city of Kagoshima at the head of his army, Tabata thought that he, Saigo, was acting rightly and rendered him all the aid that lay in his power. But on the arrival of the Mikado's envoy in Kagoshima, he found that he had been deceived by Saigo, and expressed great regret that he had been induced to assist him. Afterwards his ex-lord, Katsura, returned from the seat of war and enlisted a large number of men and established himself Governor over Kagoshima. He compelled the Secretary to work under his instructions. He felt that if he lived he could not refuse, because he had in former times received many favours from Katsura, so he committed suicide.

(From the *Hochi Shinbun*.)

NOTIFICATION No. 17 B.

To Fu and Ken.

When the Kagoshima insurgents penetrated into the Kumamoto-ken, the local officials began to remove the Government money in their care to a safe place. Before all the paper money was transferred, however, the insurgents approached the office, and to prevent its falling into their hands it was destroyed. It consisted of one, two, five and ten yen notes, numbers unknown, amounting to 37,500 yen in all. They were cut in pieces and covered with mud. But it is reported from the Kumamoto-kencho that the hide was discovered by the insurgents, and it is expected that the pieces of the notes have been joined together, and the notes thus restored put into circulation. Persons are informed that the notes were cut into three pieces which were then torn in two by hand; and those through whose hands notes which have been apparently so treated should pass are requested to communicate with the Finance Department, with a view to tracing them to those who issued them.

MATSUKATA MASAYOSHI,

Acting Minister of the Finance Department.

25th April, 1877.

THE *Choya Shinbun* has the following letter addressed to the Kumamoto garrison during the siege, and shot into the castle, attached to an arrow, from the insurgent camp:—

The government authorities have wished to assassinate us, and have violated the law of the country. Now Saigo Takamori, Commander-in-chief, and two other leaders, have arrived here (Kumamoto) at the head of large bodies of men to judge them for their crimes. You, the garrison troops, do not know the righteousness of our motives, and you obstruct our march by closing the gates of the castle against us. We shall kill you all within a few days. But still we sympathize with you. So if you should not use your firearms against us, we will spare you. All the Imperialists on the Yamaka, Takase, and other roads have already been routed; and arms have been taken up against the government authorities in several provinces throughout the country, as well as by the bees whose nest has been disturbed. Still, notwithstanding this, you are defending, at the risk of your lives, a small castle where no reinforcements can arrive. We hope that you will promptly make up your minds.

FROM THE

CAMP OF THE SATSUMA MEN.

March, 1877.

THE *Choya Shinbun* states that a full meeting of ministers and other high officials was held on the 27th ultimo.

ENLISTING soldiers and police in the Akita and Owake ken, in the North, has ceased. Those recruits who have recently arrived in Tokio from various ken have been ordered to return to their homes.

At about 10 p.m. on the 27th ult. a fire broke out at Sanchome, Minami, Shinagawa, and destroyed thirty three houses.

H. E. OKI, Minister of Justice, has been, with Prince Arisugawa-no-miya, Commander-in-chief, deputed to conduct the trial of ex-Governor Oyama and other offending officials of the Kagoshima-ken.

THE *Choya Shinbun* writes:—A telegram from Kumamoto, sent by Lieut-General Kawaji at 3.40 p.m. on the 27th ultimo, announces that out of 900 policemen commanded by Shirayama, 300 remain in Kumamoto castle, and the rest had been sent back to Tokio in the *Tokio-maru* on the 28th.—A despatch from Kobe says that Kuroda, President of the Agricultural Department, Yasuda, Chief Secretary, and others arrived in Kobe in the *Gen-kai-maru* on the 28th instant.—Saigo, now in the province of Hinga, is very busy raising money to renew the war.

THE *Hochi Shinbun* says that H. E. Uyeno, Minister for Japan in London, sent a telegram at 2 p.m. on the 24th ultimo, stating that the *Kongo-maru*, one of the three men-of-war, ordered by the Japanese government in England, had been successfully launched.

ABOUT 600 shizoku in Inaba were enrolled in the imperial forces. A few days before they were to leave for the South-West 200 of them deserted. Ikeda, their ex-lord, was sent on the 24th to instruct them not to swerve from their loyalty.

A HALL intended for public meetings has recently been completed in Tokio. At one o'clock p.m. on the 28th ult. it was officially opened. Mr. Chida, Chief Secretary of the Tokio-fu is chairman, and the members consist of kucho, kocho, and secretaries.

On the 28th ultimo a great farewell banquet was given by the Japanese government to Their Excellencies Count Fé and

Monsieur St. Quentin at Ohamago-ten, Tokio. His Excellency Iwakura, *U-daijin*, and the Ministers and Vice-Ministers of various departments were present.

H. M. the Mikado is about to present two medals to H. M. the Emperor of Russia in token of the friendship existing between them.

THE *Hiroshima-maru*, which recently arrived in Yokohama, had among the passengers a policeman of the second-class, who was fettered and guarded by six policemen. As the boat in which he was being landed from the ship neared the English hatoba he sprang into the water. As his hands were bound, he sunk instantly. Several sailors jumped in after him and succeeded in bringing him to the shore. He was immediately transferred to Tokio, where he will be tried on a charge of being an insurgent spy.

A review of troops was held in the extensive plain of Komaba, close to Tokio, before Prince Higashi-Fushimi-no-Miya on the 30th ultimo.

Mr. Sakuma, of the *Hochi Shinbun*, appeared before the Tokio-Saibansho.

On the 26th ultimo Their Majesties the Empress and Empress Dowager visited the exhibition in Kioto.

A COLLISION took place between the *Neisei-maru* and *Risho-maru*, close to Uchi-seto, in the Inland Sea. No serious damage was done to either vessel, and the former has arrived in Kobe.

Mr. K. Narutomi, Vice Consul for Japan in Sakhalin, will shortly leave for his post.

A LETTER from Nagasaki says:—About 300 wounded Imperialists arrived in the *Sumida-maru*. A surgeon from a British man-of-war in port was permitted at his own request to visit them, and expressed his approbation of the treatment they received.

THE *Osaka Nippo*, started in Osaka during last year, has greatly improved. Its ordinary circulation is 2,000 copies daily. But lately so many officials and soldiers have been stopping in Osaka, besides about 7,000 wounded imperialists who are quartered there, that 9,000 copies of the journal are published daily.

On the morning of the 29th ult. two fires broke out in Tokio, one at Iwamoto-cho, Kanda, and the other at Babacho, Shinagawa. The former was not extinguished till about 338 houses were burned. The latter was not so extensive.

THE *Akebono Shinbun* of the 26th ultimo, publishes the following letter under the heading of "Friendship with Foreign Countries":

Who will not favour his native country? Who does not desire to see his country increase in wealth and prosperity? If there is such a man he must be a fool, void of the instinctive feelings of a human being, and unable to distinguish between right and wrong. Both civilized and uncivilized people stand up for their native country; and they should be industrious so that its prosperity might increase. Moreover, one of the first duties of a nation is to promote its independence, which should not be neglected for a single second. Having expressed these sentiments we will now record our opinion relative to the friendship between Japan and foreign nations, a subject which is not to be considered unimportant.

It is now about 2,500 years since our empire was established, during which we have never been reproached with living under foreign jurisdiction, to our honour and renown be it said. But after it was agreed that our country should be opened for trade with foreign

countries, the civilized nations of Europe and America came to us and introduced various arts and sciences. On the one hand, therefore, we must consider that we owe our present state of civilization to our connection with foreigners; but on the other hand this connection has brought about a sad state of affairs. In considering the relations between Japan and other nations, we find that large sums of gold and silver have poured out of the country. Clever foreign merchants deceive tradesmen in the interior, and extract a very large profit from commercial intercourse with them. They also oblige us to concede to them advantages in many other things; and, besides, they show how they despise us by holding the power of justice in their own hands by virtue of the extra-territoriality law. In other words, foreigners profess to be friendly with us, but in reality took upon us as a set of barbarous savages, if not as their subjects: and they are evidently waiting for the decline of our country, their individual avaricious desires to extend their dominions being only obstructed by the fact that if any one nation were to attempt a conquest it would at once draw upon itself the animosity of other nations. But the only way in which we can maintain our independence is to augment our productions, obtain the power of administering justice, and improve the condition of our shipping so as to be able to navigate the oceans and trade with Europe and America. The people should not rely upon the government to effect all this, but should individually contribute to the prosperity of the country.

THE *Mai Nichi Shinbun* says:—Katsura Emon, who made himself governor of the Kagoshima ken, is now very busy raising money and rice in the provinces of Satsuma and Osumi, and manufacturing gun-powder and rifles. During the middle decade of April, he sent out about 1,500 bags of rice and 3,500,000 cannon and rifle balls to Nabeoka; Hiuga, on the Takanabe road. During the siege of Kumamoto, food and salt could hardly be come by, and fire-wood was entirely exhausted. Two wooden towers within the inner walls of the castle were pulled down, and the pine trees in the enclosure were cut down to make fire-wood.

About seven oxen, having an average value of from 25 to 32 yen each, are daily killed in Kumamoto for food for the government troops stationed there.

THE Ministers, who removed a short time ago from Osaka to Kioto, will re-open a temporary office in the former place. Mr. Iwamura, the new governor of Kagoshima, and his staff, who have been remaining in Osaka during the last month, have finally left for the scene of their duties.

THE *Choya Shinbun* writes:—A telegram from Kumamoto announces that Lieut-General Kawaji left for Kagoshima on the Ajigita road on the 28th ult.—A despatch from Mr. Yamagata, War-Minister, states that the insurgents on the Yajiro road occupy a strong and commanding position about half a ri from Sashiki. The latter place is occasionally visited by a number of rebels who reconnoitre the camps of the imperialists. No place, south of Hinaku, is left unoccupied, and the rebels on the Yabe road have outposts in the village of Suge. The Imperialists are in possession of all the strongholds, and carefully reconnoitre, in their turn, the insurgents' positions.

THE *Akebono-shinbun* states that on the 27th ultimo, Admiral Kawamura, War-Inspector, and Lieut-Generals Oyama and Takashima, landed at Kagoshima.

THE Hochi Shinbun says: A telegram from Nagasaki, despatched at 10 a.m. on the 30th, announces that at dawn on the 29th, the *Kasuga, Riujo, Chikuba, Seiki* and *Thabor*, arrived in Kagoshima, where about 7,000 troops have landed. Arimatsu (who is he?) has been arrested. The rebel troops are encamped at about ten ri distant from Kumamoto. All is quiet in Nagasaki. The whereabouts of the insurgents, who retired from Yabe, is unknown.

Five shizoku and about fourteen heimin in Matsumoto, Shinshu, were arrested on the 24th ultimo, having been discovered in some conspiracy against the existing order of things.

THE Choya-shinbun publishes the following letter, written by Mr. Shinagawa, of the Naimusho, who was in the castle of Kumamoto, during the siege:—

On the 18th of February of the 10th year of Meiji, I landed at Koshima, which is under the jurisdiction of the Kumamoto-ken, and arrived at the Kencho at about 10 p.m. the same day. The insurgents had then advanced as far as Sashiki. I immediately sent a telegram to Kioto, addressed to the *Sangi* Okubo and Ito, stating that an expedition against the rebels should be speedily organized. At about 11 a.m. on the 19th Feby. a fire broke out accidentally in the castle, and all the towers and other buildings in the castle were burned to the ground. About 800 koku of rice, as well as large quantities of various other kinds of provisions were destroyed. Many of the local officials had been very busy gathering together the rice and other things for the garrison troops, which they purchased at extremely high prices. Six or seven boys who were in the service of the garrison deserted during the confusion caused by the fire, and it is suspected that they were the cause of the conflagration. There was no time to repair the damage done as the rebels were close at hand; and three cannon were fired in the castle as a signal to the people that trouble was coming. The kencho, whose office was situated at the south of the castle, was removed to Mibune. On the morning of the same day, I received a telegram from Kioto, announcing that an expedition to Kagoshima was ordered by H. M. the Mikado, and that Prince Arisugawa-no-miya was appointed commander-in-chief. On the 20th, the rebel troops arrived in the town of Kawajiri, two ri south from the castle. The entire city of Kumamoto was afterwards entered and set on fire, and it continued burning for about two days and two nights. The bridges at the entrance to the city were cut down by the Imperialists, in order to obstruct the way of the insurgents. The next day, about half a battalion of the garrison was sent to expel the rebels from Kawajiri, where the first battle was fought between the imperial and insurgent troops. The former were driven back in a short time. I again closed the temporary kencho at Mibune and entered the castle with Tomioka, governor of the Kumamoto ken. At this time the telegraph wire was cut, and Izaka of the kencho was sent to the branch telegraph office in Kurume. On the 22nd February, the castle was entirely surrounded by the insurgents; and, in the first attack made upon it, Lieut-Colonels Hanayama and Yogura were wounded. The latter afterwards died in hospital.

It was the 22nd February that the insurgent forces first attacked the castle. A severe battle was afterwards fought at Fujisaki, which is to the west of the castle. Utsunomiya, the rebel commander of the seventh bat-

talion, was killed in that engagement, and two Lieut-Colonels, Hanayama and Yogura, were wounded. The latter was mortally wounded and afterwards died in the hospital. Awoyama was sent from the castle to Minami-no-seki in order to despatch telegrams to Kioto and Tokio concerning the battles which had taken place. He found that place completely surrounded by rebels and was obliged to return to the castle without accomplishing his mission. At 3 a.m. on the 23rd March, the attack on the castle was renewed from the South-West, and continued throughout the whole of the day, ceasing about 5 p.m. During the same day, the garrison troops placed some cannon on the summit of the Hanaokayama, which is a hill situated at about ten cho West from the principal part of Kumamoto castle. The entire castle and the city can be seen from the summit. General Kato, the founder of the castle, is said to have allowed the citizens and others to take away stones and sand from the hill, hoping it would eventually be carried away. Tents were established in an extensive plot in the neighbourhood of the principal towers of the castle which were destroyed by the conflagration on the 18th February. I and other civil officials were stopping there. An attack was made from the West and East during the night of the 23rd. At dawn on the following day, the insurgents commenced to bombard the castle from the hill Dan, and at about 8 a.m. they approached to Fukisaki and opened a tremendous fire upon it. About sixty soldiers were wounded up till that day. During the night, two officials were sent out to attempt communication with the imperial men-of-war, which were anchored off the coast of Kojima; and Awoyama was again sent to Minami-no-seki. On the 25th February, the rebels encamped by godowns and clay walls in the city, which had not been destroyed by the fire. Some of them were seen to be armed with bows and arrows. The supply of sake was already exhausted in the castle. The soldiers repeatedly endeavoured to seize some that was stored in the godowns in the city, but they were prevented by the besiegers. Thirty-seven soldiers had been killed by the 25th. On the 20th firing was heard in the direction of Uyeki, which lies about two ri North from the castle; and the same evening tremendous firing was also heard along the coast. During the night fire-works were displayed to keep the soldiers from going to sleep. On the 27th a number of soldiers went out of the city as far as Kiomachi, where they seized twenty-four casks of sake and three bags of beans. At 3 p.m. half a battalion, consisting of soldiers and police, rushed from the castle and attacked the entrenchment of the rebels in Tsuboi, east of the fortress. They succeeded in destroying it, and after accomplishing that feat retreated. Major Ohaku was slightly wounded, and Ikebe, police officer, was killed in this affair. The following day about twenty bags of rice were captured at Aramuma. All the beef had been consumed, so horses were killed and eaten. On the 1st March the rice in the castle was examined. About 600 koku were found, which was considered enough to support the soldiers for twenty-three days; about 29 koku being used daily. On the 2nd March, about 50 bags of rice were seized in Tsuboi and Kiomachi. The insurgents from Hanaokayama kept up a continual bombardment upon the castle. From the commencement of the war, fifty-two soldiers were killed up to the 5th, and 182 wounded, more or less severely. Skirmishes took place during the 8th, 9th and 10th. At about 5 p.m. on the 12th, an attack

was made upon the insurgents stationed on the hill of Dan, and lasted until 3 p.m. on the following day. It was a bloody battle and the rebels were finally driven back with considerable loss. About 100 bodies were found dead on the battle-field. Four men were taken prisoner, and 200 rifles and many other things were captured by the victorious troops. About 90 of the latter were killed and wounded. On the 14th the castle was again attacked. The following day a body of the garrison made an attack upon the enemy's camp at the monastery of Honmioji, where the temple was set on fire, and the troops then returned to the castle, having seized about 150 bags of wheat and buckwheat meal. On the 16th, about 130 bags of rice were again captured by the imperialists. The following is a list of the killed and wounded from the 22nd Feby. to the 19th March:—120 were killed. Out of these, 10 were officers, 38 police, and the rest soldiers. 349 were wounded more or less, of whom 9 were officers, 92 police, and 247 soldiers. A strong wind blew on the 21st and no battle took place. A man, named Furuki, was sent to the imperialists at Minami-no-seki, in order to inform them of the condition of the castle. A body of police, who rushed out of the castle on the 20th, returned after three days bringing satisfactory information of the condition of the imperialists outside. On the 27th one battalion attacked the insurgents at Kiomachi, and their entrenchment was destroyed and the rebels driven out in disorder. On the 28th, a messenger from the imperialists arrived in the castle and informed us that they were to join us within five days. The insurgents dammed up the water of the rivers Tsuboi and Imogawa, which run to the West and East of the castle. The building of the kencho was nearly destroyed by the bombardment. On the 7th April, the supply of food was nearly exhausted; but the soldiers were not discouraged, hoping that the Imperialists, who approached them as close as two or three ri, would unite with them in a few days. On that day, the water of the rivers Tsuboi and Imogawa was found swollen about twelve feet high, and prevented the garrison from rushing out by the West, South, and Eastern roads from the castle. And the Uyeki road on the North was guarded by a large number of the rebels, who had constructed several entrenchments. Thus the garrison could not go and collect any food from the outside of the castle. On the 7th, it was found that there was sufficient food to support us for eleven days by making it into gruel. We ate gruel for breakfast and supper, and millet for dinner. On the following day, one battalion of the garrison was sent out to join the imperialists on the Uto road, in order to decrease the population in the castle. On the 14th, the castle was rescued from its critical position. The garrison gave expression to the joy they felt so loudly that their cheers resembled the rumbling noise of thunder in the distance. On the 15th April General Yamagata and many others entered Kumamoto. All the kencho officials are well.

THE Choya Shinbun publishes the following letter which bears the signature of Mr. Akita Takamori living at Sanju-Kenpori, Tokio:—

Ye newspaper writers! I beg leave to tender you a little advice. Since the war was commenced in the South-West, all of you at all the newspaper offices take the utmost pains to report the various items of news concerning the war in your daily papers. I express my congratulation for your thoughtfulness for your readers. But during the seventy days

which have elapsed since the commencement of the war between the imperialists and insurgents, nothing else has been published in your daily columns. These contain cruel and blood-thirsty narratives from first to last. I become so tired of them that I am compelled to yawn. It is not proper to mention only the events which are occurring in a corner of the South-West. Is there nothing else throughout the empire which is worth discussing in the papers? Now, I wish your consideration to be directed to that point. I do not mean that the war news is of no consequence. The most important and credible intelligence from the seat of war should be published in your papers without hesitation. But it is very annoying to know that the journals will be filled with nothing but accounts of battles. If you find my words unpalatable, I beg your pardon for them.

THE *Choya Shinbun* says:—A telegram sent from Kumamoto, on the 30th ultimo, announces that the Kagoshima kencho officials were busily engaged enrolling troops to be sent as reinforcements to Saigo.—The imperialists, who effected a landing there on the 29th, arrested five or six officials, to take the places of whom, newly appointed officers were then momentarily expected. The management of public affairs had been undertaken by the imperialists. No insurgents appear as yet to have returned to Kagoshima.—Kuroda, *Sangi*, had an interview with H. M. the Mikado in Kioto on his return from the South-West. He gave an account of the battles which had been fought; and a dinner was given in his honor. Kataoka, the Mikado's chamberlain, who was sent to the South-West, in order to inquire after the health of the wounded imperialist soldiers, returned with Kuroda.—Since Prince Arisugawa-no-Miya, Commander-in-Chief, promulgated his edict that those who deserted the cause of the insurgents would be pardoned, about three hundred are said to have laid down their arms, and joined the imperialists.—On the 28th ultimo, Shimadzu's sons and their suite left Kobe for Nagasaki.

On the 1st inst. a fire broke out in two places in Tokio, one at Hongo and the other at Hanakacho, Kanda. Both of them were extinguished before much damage was wrought.

In Kumamoto and the neighborhood, paper money issued by the insurgents is current. The local edict prohibiting its circulation is disregarded.

Two branch telegraph offices are to be opened in Mumanoseki. About twenty operators have been detailed from Tokio for the service.

On the 23rd ultimo, funeral rites in honor of the imperialists killed in Fukuoka were held at Matsubara, Hakozaki.

THE *Mai-Nichi Shinbun* states that during the night of the 27th ultimo, three foreign men-of-war were discovered anchored in the harbour of Bimitsu, Hiuga. (This is evidently absurd.)

It is rumored that the staff of the War Department is to be removed from Tokio to Osaka.

EACH of the officials of the War Department having received instructions to contribute lint of the weight of 300 *monme*, the amount has been supplied by each individual, and the whole quantity will shortly be sent to the South-West.

(From the *Nichi Nichi Shinbun*, April 17th.)

The imperial forces have accomplished their first attempt to suppress the insurgents, and

have established communication with the Kumamoto garrison, as our readers will have learnt from our issue of the 16th instant. A period of fifty days elapsed from the first bloody engagement until the siege of Kumamoto castle was raised. Shall we not congratulate the Empire of Japan, the Mikado, authorities, generals and soldiers on the result?

In taking a passing view of recent events we may state that the castle of Kumamoto was garrisoned by a division of imperial forces during the siege, who were momentarily expecting succour. The imperial troops on the Minami-no-seki road, fought many desperate battles in their attempts to relieve the castle; but the commanding positions occupied by the insurgents enabled the latter to obstruct the advance of the former, though they were only a short distance from the castle. Notwithstanding the fact that day after day passed without bringing the hoped for relief, the garrison of the castle were not at all discouraged. But their provisions began to run short, and they had but sufficient to last them a few days. In this extremity, as it became very important to reduce the number of occupants in the castle, Lieut.-Colonel Oku, a shizoku of Togatsu, led a battalion of the garrison out of the castle and fought his way through the rebels to the imperial camp. Who can help being astonished at such wonderful intelligence? Now that the castle has been relieved, plenty of provisions have been conveyed to it.

Previous to this a detachment of imperial troops landed at Yajiro, in the rear of the insurgents. Generals Yamada, Takashima and Kawaji, marched respectively along the Uto, Mibune and Kosa roads. The roads being wide and the ground level, the forces suffered much at the hands of the insurgents, who made sudden attacks as the troops were marching. Besides this, Fuchibe, Beppu and Yetsumi made their appearance in their rear with about 1,500 men, whom they had raised in Kagoshima. Notwithstanding these impediments the generals continued their march. General Yamada was the first to arrive at Kumamoto, having in the meantime been joined by Lieut. Colonel Oku with a battalion of the garrison of the castle. The other generals soon followed him. From the accounts which have come to our ears, it appears that the imperialists did not suffer much as they approached the castle, for the insurgents at Kidome, Todorogi, Mukaizaka and Torinosu had left their camps; and the road to the castle was entirely undefended, it being supposed that they fled before Yamada to Hiuga.

It cost the imperial troops many bloody battles to effect communication with the castle, but at length the insurgents left their camps without any suspicion of their having done so being entertained.

In our opinion the rebels retreated to suit their convenience, and if so, it is time the imperialists re-knotted the strings of their helmets. What are the intentions of the rebels? As we have already remarked, they will unite their forces to oppose the imperialists; and in that case they will be as terrible an enemy in the future as they have been in the past. If they should not, then their retreat has been the result of the death of Saigo, who may have been killed in battle or committed suicide. Again, if the retreat was through fear, then it has been with a view of joining forces with Fuchibe, who raised about 2,000 men a short time ago. We trust that the imperial troops will soon pursue the insurgents and not allow them the opportunity of entrenching themselves. It is no time for them to be taking rest in Kumamoto.

(From the *Choya Shinbun*, April 19th.)

We find that we have been greatly mistaken in our opinion that Saigo would fight his last battle at Kumamoto. Traitors in ancient times when they became discouraged through repeated failures, and when their power was exhausted, would have a final battle and then perish. How is it that the veteran traitor Saigo, whose talents have rendered him a formidable foe, has not followed such examples? Our opinion that he would fight his last battle at Kumamoto has proved to be wrong. When the veteran beleaguered the castle of Kumamoto on the one hand, and successfully opposed the efforts of 30,000 imperial troops to effect communication with the castle on the other, the general opinion was that he would ultimately fight a decisive battle and leave his dead body upon the field. It was not thought that he would endeavour to retreat; and the imperial troops were of the opinion that communication with the castle was cut off until most of the rebel troops had fallen; and the day in which communication with the castle would be established would be the last of the insurrection. But when the imperial troops advanced upon the castle they were surprised to find that the enemy had left their camps empty, and that the birds were quietly in possession of the trees. We are not yet very well acquainted with the geography of the seat of war, but it seems that while the imperial forces were marching on Kawajiri and thence to the castle, the insurgents who were besieging Kumamoto were joined by the other rebels who had occupied the various roads and beat a successful retreat. They were scattered over a large area of ground, yet they contrived to unite and retreat in good order, carrying all their ammunition, fire-arms and wounded soldiers with them: nothing was found by the imperialists. No doubt the rebels saw they could not successfully check the advance of the imperial troops, and so resolved to beat a retreat. This unexpected move caused some to entertain the opinion that Saigo was dead. But how could this be? It is much more difficult for an army to retreat than it is to advance. The insurgents were scattered over a large area of country and if they had not been under the command of a skilful soldier, they would undoubtedly have been thrown into confusion in retreating. We feel sure, therefore, that Saigo is not yet dead. According to telegrams from the South the insurgents retreated along the Hiuga road. Are they determined to make a stand against the imperialists at this place, and excite the people to revolt, or will they proceed to Kagoshima? Doubtless they will do one or the other. The imperial forces are very fatigued from their efforts to unite with Kumamoto castle; and the insurgents are now many *ri* from them, and their suppression will cause a great deal of trouble yet. What is the best plan for restoring tranquility in the South-West. An ancient sage has remarked that to allow an enemy even the respite of a day, is productive of serious consequences.

THE *Hochi Shinbun* publishes the following letter received from the South-West:—

During the administration of Mr. Yasuoka, late Governor of Kumamoto-ken, who was murdered by local rioters last year, the Min-ken-to—a popular independent association, formed for the purpose of advocating the institution of a representative government—petitioned him (the Governor) to elect the *kucho* for the ken by the votes of the people, but he would not accede to the request. Shortly

afterwards the Governor called a public meeting for the purpose of considering the question of increasing the salaries of the Kucho and Kocho. The meeting was decidedly against the proposition, on account of its constituents having lost confidence in those officials. Notwithstanding the fact, the Governor took upon himself the responsibility of going against the wishes of the people and did increase the stipends of the officials. This act on his part caused much discontent. The people became more and more excited; and their ill humor was increased by the alteration of the land tax which took place at that time; as well as by the extreme power given to the police authorities, whose arbitrary conduct, combined with other grievances, caused the people to look upon the government authorities as a pack of wolves. Most of the kucho and kocho are shizoku who retain their former power and influence: and no accounts of expenditure of public money are placed before the people for their inspection. The Minken-to continually condemned the administrative policy of the authorities, and so excited the distrust of the people. In the meantime rumours were circulated respecting the doings of the Kagoshima shizoku, and the people of Kumamoto sympathised greatly with them; and when the insurgents first penetrated to Kumamoto they were cordially welcomed. But they soon lost popularity on account of their exaction of money and other things from the citizens, who returned to their allegiance to the imperial government.

An ancient sage has remarked that neither the barking of a dog nor the crowing of a chicken is to be heard in a neighborhood where war has been waged, and the truth of this is exemplified in Kumamoto, nothing of which remains but the castle; and the visitor trembles with fear at the terrible scenes presented to him. The residents of the city are scattered all over the ken, having taken with them a few articles of clothing and some necessary pieces of furniture. On a junction being effected with the imperial forces by the garrison, the people began to return to the city, only to find their houses destroyed, no trees in the gardens, while the godowns, in which they had placed their valuables before deserting their homes, had been broken open and pillaged during their absence. Nothing escaped the ruthless foe; and the people wander in and about the ruins the very picture of gloom. We are anxious that relief should be afforded these persons with the quickest despatch.

One day we happened to be in a room where a number of Kumamoto kencho officials of low rank had congregated together, and they all expressed the opinion that all the shizoku in Kumamoto who had in any way assisted the insurgents should be arrested and killed. They argued that it was desirable that none should escape lest they should again revolt. They also stated their conviction that it would be much better to kill the wounded insurgents who were lying in the hospitals. No sympathy is shown for these by the imperialists.

The Assistant Secretary of the Home Department, Mr. Ishii, and a number of others are busily engaged extending relief to the homeless in Kumamoto.

The *Hochi Shinbun* publishes the following letter from the seat of war, giving an account of the engagements which took place on the Uto road prior to the relief of Kumamoto:—

At dawn on the 19th March, six men-of-war arrived off the coast of Sunokuchi, Higo,

and opened fire upon the rebels. A strong imperial force of soldiers and police, commanded by General Kuroda and Lieut.-Generals Takashima, Yamada, and Kawaji, landed at Hinaku, which was guarded by about 300 insurgents. A division of the imperialists occupied the strong and commanding position of Hatoyama and fired upon the rebels, who scattered in disorder without making any resistance. At about 1 p.m. the same day, the imperialists entered the castle city of Yajiro, without loss of life. Early on the morning of the following day, half a battalion of the imperialists was sent to each of the villages of Miyahara and Kagami. The insurgent forces were encamped along the northern bank of the river Hikawa. At about 4 p.m. the same day a battle commenced, and lasted till dark. On the 21st it was renewed, and after a desperate struggle the imperialists crossed the river and expelled the insurgents with loss. Many houses, north of the river, were burned. On the 22nd a skirmish was fought. Having taken advantage of the foggy morning on the 23rd, the insurgents attacked and captured Matsu-moto and Hashi-shita, which the imperialists retook after a desperate contest. No battle was fought on the two following days. On the 25th the imperialists marched as far as the river Sunagawa and passed the night in the village of Ogawa. They met with no resistance. On the following day they passed along the mountainous road of Toyofuki and entered the village of Hisagu. In the latter place, they found themselves surrounded by insurgents. It was now too late to retreat. The rebels, armed with swords and lances, hewed their way into the imperialist ranks with the terrible vigour of wounded tigers. None could stand before them and the imperialists retreated in disorder and with considerable loss to Ogawa. No engagement took place during the following two days. On the 30th the imperialists separated into two parties, one leaving for the Shabagamiyama and the other for Toyofuku. Both parties advanced victoriously and re-united at Hisagu, where they were routed on the 27th. On the following day a battle was commenced at Shimoku, close to Hisagu. The insurgents gave way without showing much resistance. On the 1st April Lieut.-Generals Yamada and Takashima marched along the main road, and Lieut-General Kawaji by a by-way. They entered Uto in pursuit of the insurgents. The insurgent hospitals in Kawajiri have been removed to Kosa, and a large number of the wounded insurgents were ready to be transported to Kagoshima by sea. Two or three junks, containing a considerable number of the wounded, were found sailing off Koriura by one of our men-of-war, which fired upon and sunk them, and with them the poor wounded rebels. On the 2nd, the imperial headquarters were removed from Kagami-mura to Matsu-bashi. On the following day a division of the imperialists marched about one ri South from Uto, where about 500 insurgents barred their way in the strong position of Kuma-no-sho. No active operations were tried between the 3rd and 11th April. At dawn on the 12th, the imperialists divided into two parties, commanded by Lieut.-Generals Yamada and Takashima respectively, marched. One crossed the river Midori and a bloody battle followed. The other division also crossed the same river, but lower down. The advanced posts of imperialists fired upon them before the crossing had been effected. So, the insurgents at Kawajiri understood that the im-

perialists were upon them; and so prepared to make a desperate resistance. If the fire had not been opened, the imperial troops would have relieved the garrison of Kumamoto before the 15th. About sixty (*sic*) imperialists were killed and wounded.

The *Hochi Shinbun* writes:—The number of the insurgents, who withdrew from around Kumamoto on the 14th instant, is as follows:—8,000 left by the Uyeki road, 3,000 from Kawajiri and 2,000 from Kumamoto. About 2,000 insurgents are encamped at Kiyama and the others at Yabe, Otsu, and Mibune. Saigo is said to be in the Kiyama camp. No battle has taken place since the 19th instant.

It appears that active fighting has been resumed.

The *Hochi Shinbun* writes:—A telegram from Katashita, despatched at 3.5 p.m. on the 21st instant, announces that at dawn on the 20th instant the Imperialists there were sent against the insurgents' fortresses in various directions. They re-united at Mibune at about 12 m. The commanding and mountainous positions of I-ida, and Kumizaka were captured by the Imperialists. The insurgents were expelled with great loss. Many were taken prisoners. Seven of the victorious army were killed, and thirty-seven were wounded more or less severely.—A despatch sent from Osaka at 2.15 a.m. on the 22nd says that on the 21st inst. the Kumamoto garrison troops attacked and seized Takenomiya. The insurgents at Otsu were also routed by General Miura in a night battle on the 20th, and General Oyama has taken Hotakubo and Shin-nambu.—A telegram sent from Kioto on the 21st announces that Tabata, ex-Vice Governor of the Kagoshima ken, has committed suicide. Katsura-Emon, at the head of the Finance department of the insurgents, has recently returned to Kagoshima to raise money. About 3,000 men have been enlisted there by an order from the Kencho, and were sent out to join Saigo on or about the 19th instant. Before the rebel troops withdrew from the siege of Kumamoto, their wounded soldiers were sent back to Kagoshima, which they leave again for the seat of war as their wounds are healed. The Kencho has issued several edicts, for raising soldiers and money for the insurgents.—Another telegram from Osaka, despatched at 11.20 a.m. on the 22nd, states that Lieut.-Generals Nodzu and Miyoshi at the head of the 1st and 2nd divisions attacked Kiyama on the 21st and carried it at night. The routed insurgents fled in disorder for Yabe.—The man-of-war *Moshun* *kawan* left for Saga in Hinga, where the insurgents seem to have established their headquarters. Their Excellencies Okubo, Minister of the Home Department, Kido, *Naikaku-konin*, and Ito, *Saigi*, who have been in Osaka, left for Kioto, where they will open a temporary office. The conduct of the veteran commander of the insurgents is worthy of admiration. All the deserted rebel camps around Kumamoto and other places were found in good order and nothing was destroyed there. His orders seem to be well obeyed throughout the insurgent army. Two men-of-war are cruising off the coasts of Sadowara, Hinga, and the island of Sakura.

The *Mai-nichi Shinbun* says:—The Imperialists, who were encamped at Kinoha, were sent back as far as Mumanoseki on the 17th instant. The insurgents are said to be marching for the province of Bungo along the Hinga road. In that case, they will attack Mumanoseki and Uwajima. During

the 18th and 19th instant, about 543 wounded Imperialists were brought to Osaka from the South-west. About 50 of them are officers. Lieut.-General Tani, commander of the Kumamoto garrison, will shortly arrive in Kioto with Mr. Yamagata, War Minister, in order to report upon the state of affairs in the castle during the siege.

(From the *Choya Shinbun*, April 17th.)

In referring to the question as to whether "the province of Satsuma is part of Dai Nippon and therefore part of the dominions of His Majesty the Mikado, we cannot reply without a great deal of consideration. Previous to the treacherous conduct of the Kagoshima insurgents, we were aware that they selfishly held special power; and that neither Government orders nor the laws of the nation were observed if contrary to their wishes; and we repeatedly drew attention to this, as our readers will probably remember. We were surprised to hear from a Buddhist priest who has recently returned from Kagoshima the following account of the customs and habits of the people. He says: "Everything in Kagoshima is executed and dated according to the ancient calendar, with the exception of the Government affairs transacted by Oyama; but though he worked according to the new calendar, his wife observed the old. The shizoku regard heimen as so much dirt; and the latter are not allowed to wear high clogs or build a house of two stories. Fortunately for them, the special privilege of the shizoku to kill heimen on the slightest provocation was abolished on the foundation of the present Government. But the privilege is still accorded to them of beating and kicking the heimen. The latter consider themselves very fortunate in being allowed to live, and submit to the kicks and cuffs. Notwithstanding the prevalence of such barbarous customs, people speak of establishing representative institutions. Neither shizoku nor heimen care anything for the central government, and they look upon Shimadzu and Saigo as their sovereigns. Each shizoku shows in his haughty face that he thinks that the present Government was established through him and his fellows. Since last January, the shizoku have been very busy repairing swords, lances, and fire-arms. They were much incensed against the Government for having killed the traitors, Eto and Mayebara." Are these men not subjects of Japan? We know not by whom they were invested with influence so much greater than that wielded by others.

The officials of the War Department, have subscribed to a common fund and sent 15,000 pounds of tobacco, 15,000 salmon and 10,000 bottles of beer and spirits for the use of the imperial forces in the South.

A temporary court of justice is to be opened in Fukuoka.

ONE of the three "directors of the war" will soon leave Kumamoto at the head of a corps of police, newly recruited in Saga, for Kagoshima, by land; and another will take passage for the same place with two battalions of soldiers and 500 police in the *Jinjo*, *Nisshin*, and *Kasuga-kawan*.

Mr. Watanabe, Chief Secretary of the Kagoshima-ken, will leave for Osaka with about one hundred subordinate officials on or about the 23rd inst. A temporary office is to be opened at Nichome, Imabashidori, Osaka. About eight hundred police are to be enrolled, with whom and with his personal suite, Mr. Iwamura, Governor of the Ken, will leave for Hakata. Each of the civil officials has been ordered to take his sword with him.

THE *Hochi Shinbun* says that a certain foreigner has stated that on the 6th instant Saigo died from dropsy.

SUMITOMO, a wealthy merchant of Osaka, has discovered large quantities of antimony in his mines in the province of Awa.

A HALF-HOLIDAY was given yesterday in the War Department to the officials, who received presents of sake and fish in recognition of their good services. This is the first holiday observed in this department since the outbreak of the Kagoshima insurrection.

THE *Hochi Shinbun* says:—A telegram from Kioto, on the 1st instant, announces that a despatch sent by Kono, judge of the Fukuoka Saibansho, says that, of the ringleaders of the Fukuoka rising, four were condemned to decapitation, ten to hard labour for ten years, and 350 to hard labour for periods varying between one year and ten years. Another message from Kioto, states that the insurgents at Sashiki and Hinaku on the Yajiro road show a very bold front. Lieut-General Yamada has marched at the head of the 3rd and 4th divisions against them. Yabeguchi and Mamibara are occupied by the imperialists.

THE *Choya Shinbun* gives the following numbers of the police officers killed in the South-West:—3 at Futamata, 14th March; 3 at Twarazaka, 15th; 1 at the same place, 17th; 2 at Nijutoge, 18th; 3 at Kurokawa-guchi on the same day; 2 at Tawarazaka 20th; 2 at Yajiro-guchi the same day; 1 at the same place on the following day; 1 at Tawarazaka, 23rd; 5 at Yajiro-guchi the same day; 1 at the same place on the 30th; and seven at Katashita on the 3rd April, 31 in all. The following is a list of police privates, killed in battle:—9 at Kinoha, and Kawabata on the 14th March; 13 at Tawarazaka, 15th; 2 at the same place 17th; 27 at Kurokawa, 18th; 7 at Nijutoge the same day; 9 at Tawarazaka, 20th; 8 at Yajiro, 21st; 25 at the same place, 23rd; 8 at Tawarazaka the same day; 2 at Yajiro, 26th; 1 at Tawarazaka 28th; 3 at Muromi 30th; 12 at Katashita, 3rd April; and 12 at Mibune, 12th; 124 in all.

THE expense of the Japanese Section of the Paris exhibition of 1878 is estimated at about 150,000 yen.

THE *Hochi Shinbun* says that private telegraphic communication throughout the empire is allowed to be resumed.

ON the 30th ultimo, a fire broke out at Ichome, Omachi, Awomori. A strong wind was blowing, and the flames were not arrested till about 400 houses were destroyed including the telegraph office. Seven Japanese junks anchored in the harbour, were also burned. There is said to have been a large loss of life; but to what extent is not stated.

THE residences of Their Excellencies Sanjo, Okubo, Kido, Ito and others in Osaka, are all guarded by police.

H. E. Mr. Okuma, Minister of the Finance Department, will return from Kioto to Tokio in a few days.

THE *Hochi Shinbun* says that the sum of 12,275,981 yen had been expended by the Finance Department in connection with the expedition to the South-West up to the end of last month.

HIS Majesty the Mikado is expected to return to Tokyo in June.

It is rumoured, says the *Choya Shinbun*, that the Koreans have assaulted some of the members of the Japanese Legation in Fusan; and seized a quantity of rice stored in the godowns of the Legation.

A number of Loo-Chooans of high rank have deserted their homes and gone to China.

THE *Choya Shinbun* writes:—According to a telegram from the South-West, four men-of-war and two transports arrived in the harbour of Kagoshima at about 11 o'clock p.m. on the 26th April. Seven battalions of soldiers and police landed. Numbers of the rebels are coming back to Kagoshima, where much excitement prevails. The imperialists are in sufficient force only to garrison the castle of Kagoshima. But as they will effect no good by remaining there, more troops are to be sent, and on their arrival the imperial army thus re-inforced will advance on the Oguchi and Akume roads in order to attack the insurgents.

THE *Mai Nichi Shinbun* says that nine soldiers who were afraid of being sent to the front inflicted wounds on themselves. They were sent to hospital. While there, they began to quarrel among themselves; and each one reproached the others with their cowardice. They were tried by court martial, and on the 28th ultimo were shot.

THE Navy Department intends to enroll about 500 marines before the 10th June next.

THE Fifteenth National Bank, established by the Nobles' Club, will be opened on the 15th or 16th instant.

THE kuwazoku school building belonging to the Nobles' Club, at Sanchome, Kanda-Nishikicho, Tokio, is nearly completed. The expense of the construction was first estimated at about 60,000 yen. But it is expected that about 130,000 yen will be required to finish the building. Mr. Mori, ex-lord of Choshu, *Jusanmi*, will be its director. Seven Japanese and two or three foreign teachers are to be employed there. The monthly expense is estimated to be 3,000 yen. On the return of Their Majesties the Empress and Empress Dowager, the ceremony of opening the school will take place, it is expected in their presence.

GREAT FIRE IN SHIMOTSUKE.—THE *Hochi Shinbun* publishes an account of a great conflagration in the province of Shimotsuke, in the east of this island. An extensive area, about three *ri* in length, and one *ri* or more in width, recently covered with forest trees and villages has been laid waste. This terrible fire originated in a charcoal kiln, on the hill Okazawa, belonging to a resident of the village of Awano, Togogori, Shimotsuke. Its proprietor was working there on the 11th of April. At about 3 p.m. he took off the cover of the kiln, in order to see whether the fire was in good order or not. At that very moment a gust of wind blew into the kiln and scattered the fire here and there. It immediately lighted the shrubs and trees close to it. In a few minutes the hill, which was well planted with valuable trees, was covered with flame. About 150,000 or 160,000 trees, hinoki, sugi, and others were burned. Sparks of fire flew as far as the village of Kasuwo and destroyed forty-four houses, one Shinto temple, three Buddhist temples, and one water mill. One life only was lost. Many policemen and firemen came to the fire from distances of five or six *ri*. About 3,000 men were employed in extinguishing the flames, which were got under by about 6 p.m. the same day. The Kencho has ordered the sufferers to be supplied with food for two weeks.

A MR. YOSHINO, a native of Tsushima, who returned from Corea to Tokio on the 27th April, writes in the *Nichi Nichi Shinbun* on

the subject of Corea as follows:—

The rumors that the Coreans are turbulent are quite without foundation: the people are at peace throughout the country. Owing to the bad crops last year, rice is very dear, as much as thirteen yen having been paid for one koku. Out of about two hundred Japanese trading establishments in Fusan, only two, the Okura and Tomiya companies, are from Tokio: the rest are from Tsushima, Nagasaki and Hakata. Our settlement was surrounded by a strong fence until last year, till after the making of the treaty of friendship between the Coreans and ourselves. Before that no Japanese was allowed to cross the fence, the three gates in which were strictly guarded by Corean authorities. But they are now removed, and both Japanese and Coreans pass to and fro through them freely. Fusan has become a very bustling place. According to the convention, Japanese residents in Fusan can go as far as the city of Torafu, which is within treaty limits. But we are often annoyed by the natives on our way to that city, who stone us, and obstruct our road by putting long sticks across. The women, who used to hide from us, have become accustomed to our sight. Everything imported from Japan, is purchased by the natives. They are very fond of Japanese rice, muslin, silk, painted pictures, portraits and other things. Merchants from Osaka, Shimonoseki, Hakata, and Nagasaki bring over large quantities of rice in Japanese junks, about twenty of which were anchored in Fusan harbour when I left. They take many days to sell off their cargoes, because no larger quantity than 100 koku of rice can be purchased by one native tradesman. The export of gold-dust and silver was prohibited. But owing to the famine, the Corean government was obliged to allow traders to pay those articles away to Japanese. "Seiki-sui," an eye medicine made by Mr. Kishida of the *Nichi Nichi Shinbun*, has obtained a good reputation throughout the country. Large quantities of it are to be sent to Fusan.

THE *Hochi Shinbun* says:—About 2,000 insurgents deserted their camp at Mibuno on the 21st April. Most of them are shizoku of Kumamoto. They were commanded by Ikebe, who is said to differ in opinion from the Kagoshima rebels. Since that day, the insurgents have shown much discouragement and about sixty of them are said to have committed harakiri, seeing that they had no chance of success. A letter from Kumamoto, dated the 24th April, states:—The rebels, who have no courage to attack the imperial troops, are encamped at Otsu, Yabe, and Kiyama. Saigo is spoken ill of among them. He is looked upon as a mere puppet. Kirino and Beppu issue all orders. About 2,500 insurgents were buried in Kumamoto.—No place in the province of Higo but has been the scene of a battle. About 25,000 houses were burned in Kumamoto. Of the Kencho authorities, five were killed by the rebels, and many others are absent, and it is not known what has become of them.

THE Higaji-Honganji, principal monastery of the Monto sect of Buddhists has sent five priests to the South-West with about 100,000 yen and many useful things, to be applied to the relief of those whose houses and property have been destroyed in the war.

H. E. Mr. Matsukata, Vice-Minister of the Finance Department, has been appointed director of the Japanese section at the French exhibition of 1878.

ABOUT 527,500 yen have been expended in enrolling new members in the police force.

THE sick in hospital at Fukuoka have been removed to Nagasaki, where the Joto Saiban-sho, the Ei-Go Gakko, the Normal School and all the temples are turned into hospitals.

THE *Choya Shinbun* says:—A private telegram was received from Kumamoto on the 3rd announcing that the insurgents had all withdrawn to Hiuga, where their forces are encamped in Hitoyoshi and Miyako-no-jo. On the 2nd, the fourth division of the imperialists was sent to Kagoshima. On their landing there, all the imperialists in Kumamoto will march in pursuit of the rebels. No operations will be undertaken before that time.

A TELEGRAPH line has recently been completed between Tokio and Niigata, and a branch telegraph office established in the town of Takasaki.

A GREAT festival was held in honour of Shiura-jonin, founder of the Monto sect and the Higashi Honganji monastery, in Kioto for eight days from the 22nd to 28th April. On the 25th, Mr. Yanagiwara, the Mikado's chamberlain, was sent to the monastery, taking as a present from His Majesty one roll of brocade.

A HEAVY rain, lasting for three days, fell in Owari at the close of April. The banks of the river Kisogawa were overflowed for a distance of about 600 yards. About twenty-seven villages suffered more or less by the inundation. Many houses were destroyed, but no lives were lost.

THE *Nichi Nichi Shinbun* says that His Majesty the Mikado will leave Kioto for Tokio on or about the 18th inst.

THE *Choya Shinbun* publishes the following curious paragraph concerning the reading of a document for the repose of the souls of the "potato eaters," as it calls the insurgents:—

On the — day of — in the 10th year of Meiji, I am holding a wooden cup, filled with water, in one hand, while in the other I retain the branch of a tree. Oh! Oh! The potato eaters of the South-West, lawlessly and wickedly rose up against the imperial authorities and have left an offensive and reproachful name behind them which will not be wiped out for a hundred years. I now offer a sacrifice for the repose of the souls of those troublesome fellows who were killed. Alas! what wretched fellows you were. Were you not content with the authorities? and did you forget the favours you received from His Majesty the Mikado? Were you fond of killing men, regardless of law and order? What was your intention when you acted so unreasonably. Your dead bodies now lie and rot along the roadside, while your souls are, perhaps, wandering to and fro over the potato yard in the South-West. If you say that you are brave and will fight to the last, unlike the cowardly heimen, I have nothing more to say. But as you formed part of the 35,000,000 of people who populate our country, I sympathise very much with you, and am sorry that the honour and renown you acquired by faithful service to the Mikado, have been lost; and that the stain on your names will not be washed off for a thousand years. I would desire, however, to rescue your souls from eternal torment, and so read my document before your spirits. I am very sorry for you.

NANASHI YUKAN,
Residing at Teppodzu, Tokio.

NOTIFICATION No. 490.

Notice is hereby given that information has been received from the Minister of the Imperial Household, that Her Majesty, the Empress Dowager, will leave Kioto and return to Tokio by the Tokaido on the 7th instant.

NOMURA-YASUSHI,

Governor of Kanagawa Ken.

4th May, 1877.

THE *Hochi Shinbun* says:—A telegram, received at 10.20 p.m. the 3rd instant, announces that, according to the statement of some coolies who were employed by the rebels at Hitoyoshi, the road between Hitoyoshi and Mamihara, for a distance of twenty ri, is strictly guarded by the insurgents. They built a fortress on Gomayama, which is about five ri from Mamihara. A large number of rebels are in Hitoyoshi, where they are very busy manufacturing gunpowder and ammunition and repairing their cannon and rifles. The third division of the Imperialists advanced as far as Minamata on the 2nd instant.

THE Kanagawa Kencho has received a notice from Kioto to the effect that His Majesty the Mikado will leave Kioto for Tokio by sea.

A number of Imperial Naval officers arrived at Yokohama in the steamer *Tonegawa-Maru*, and visited H. B. M. S. *Audacious* on the 4th instant.

THE *Choya-Shinbun* writes:—Yabe, the place where many of the insurgents are encamped, lies about eleven ri south of Kumamoto; and Hitoyoshi, another insurgent camp, is about twenty-six ri South-West from the castle.

On the 27th April a number of prisoners were released from the castle of Kumamoto and ordered to return to the rebel camps. A letter was given to the released men to take to the insurgents, the contents of which were to the effect that they, the prisoners, would explain satisfactorily the action of the imperialists during the rebellion.

A TELEGRAM from Kioto, despatched at 5 p.m. on the 4th instant, says that a large number of rebel troops are assembled at Kamakajiki.

THE foreign office, which now occupies a part of Ohamagoten, will shortly be removed to the building lately occupied by the Monbusho, close to the Kanda-bashi.

On the 4th inst. the editor of the *Kanayomi Shinbun* was condemned to pay a fine of five yen for violating the press laws.

FROM the Military arsenal at Koishi-kawa, Tokio, have been sent to the branch office in Osaka, from the 16th February to the 26th April, 26 cannon, 22,478 cannon balls, 25,644 rifles and 38,166,963 rifle cartridges. Besides this large quantities of fire-arms and ammunition from the branch arsenal in Osaka were sent to the South-West. About 150,000 cartridges are made daily at the principal arsenal.

THE *Hochi Shinbun* writes:—The castle city of Shitoyoshi in Higo contains only about 800 houses, and lies about 16 ri distant from Yajiro. Communication between Shitoyoshi and Yajiro is held only by the rapid river Kumagawa. To go down stream from the former to the latter place takes only one day; but three days are occupied in the reverse journey. There is no road between

the towns, except a very narrow and bad one, close to the bank of the river, which is not available for the passage of large bodies of troops. Besides this, the road between Hitoyoshi and Saso for about 13 ri passes through a very mountainous country. About 5,000 insurgents, commanded by Hirino and Murata, are in the strong and commanding position afforded by the castle-city.

THE *Akebono Shinbun* writes:—A telegram from Kioto, despatched by General Saigo at 5.5 p.m. on the 5th instant, announces that about 1,000 insurgents are advancing for Gamo and 1,000 more for Kajiki. They are thought to have been in Yokogawa. The fourth division of the imperialists, which arrived in Kagoshima on the 4th, was ordered to land at Higetami, and to make an attack upon the rebel troops in Kajiki. This was reported by Yamagata in Kumamoto. But no telegram from the South-West has been received announcing the recommencement of war.—Another despatch says that Mr. Iwamura, the new governor of Kagoshima, and his suite, landed there on the 5th instant.

THE *Choya Shinbun* says:—A telegram from Kumamoto castle announces that the commanders of the rebel army have established their head-quarters at Hitoyoshi and that their forces are encamped at various strong and commanding places on the Okuchi road. They appear to have regained courage. The third division of the imperial troops left the castle for Kagoshima on the 3rd instant.

A JAPANESE post-office will soon be opened in Fusan, Corea.

OUT of 350 rebels in Fukuoka-ken, who were condemned to hard labour a few days ago, 50 will be sent to Osaka, 63 to Sakai, 80 to Wakayama, 73 to Shidzuoka, 36 to Hiogo, and 48 to Kanagawa.

ON the 5th instant about 40 shizoku of the Ishikawa-ken arrived in Tokio to join the police.

A SAILING vessel named the *Shiramine-maru* has been built by the Agricultural Department at Hakozaki, Tokio. On the 4th inst., she made a trial trip in the bay of Shinagawa. She will soon be sent to Hokkai-do.

ON the 30th ultimo, two Japanese junks were wrecked off the coast of Kishiu. Several lives were lost.

THE *Hochi Shinbun* says that a large and strong fortress has been erected by the rebels on the boundary of the provinces of Hinga and Bungo.

ON the morning of the 5th instant a fire which broke out at Kubota-machi, Yonezawa, was not extinguished till about thirteen houses were burned.

THE *Akebono Shinbun* says that H. E. Mori Arinori, Japanese Minister in China, will leave Peking for Japan on or about the 17th instant.

HIS Majesty the Mikado will return in the *Meiji-Maru*.

THE city of Kagoshima is filled with various idle rumors. On the landing of the imperialists there, the citizens became much excited and feared that Kagoshima was to become a scene of strife. Many of them have deserted their homes, taking their household goods and clothing with them. The shops are all closed, to the great inconvenience of the imperialists.

THE *Mai-Nichi Shinbun* says, that a few days ago, a robber forced his way into a Chinese house on Lot No. 171, in the Settle-

ment, and stole about 2,838.82 yen in paper money, 141 yen in silver, and 100 dollars. The tracks of muddy shoes were found on the floor of the house where the robbery was perpetrated.

H. M. the Empress Dowager visited the Buddhist monastery of Nishi Honganji in Kioto on the 3rd inst.

HER MAJESTY the Empress Dowager left her palace in Kioto, en route to Tokio, at 8 a.m. on the 7th, and arrived the same day on the town of Otsu on the Tokaido. The weather was delightful. Large crowds of both sexes assembled on the roadside to see the procession.

Mr. Sakuma, editor of the *Hochi Shinbun*, has been condemned to fifteen days' imprisonment for having violated the twelfth article of the press regulations.

LAW REPORTS.

IN THE DANISH CONSULAR COURT.

Before E. BAVIER, Esq.,

Saturday, April 21st, 1877.

RICHARD CONNOR v. E. EWALT.

This was a claim of \$20 for damages done to the pilot boat of plaintiff on Friday the 13th instant.

Plaintiff said:—My statements can be proved by witnesses whom I intend to call. My principal standpoint is that defendant's boat had none of the lights which it should have carried according to regulation.

James Cook, sworn:—I was in charge of Mr. Connor's boat at the time and was on board. I am in his employ. On the evening of the 13th, about 12 miles from Cape Idzu, a pilot cutter ran into us and carried away my jib-boom and did other damage. I thought it was the *White Cloud* and found I was right in my conjecture; for next morning I passed close to him. He showed no lights when he ran into me.

To defendant:—I only found out next morning that the boat was yours. It was in sight all the while. I endeavoured to avoid collision by luffing up. There was something to prevent us steering a straight course, because you crossed our bow.

To Court:—We could, although it was dark, see the loom of her sails.

Examined by plaintiff:—Our masthead light was hoisted directly after sundown. The collision took place between half past seven and eight. The red light was visible. The boat was on the larboard tack, and to leeward. If we had not luffed, the *White Cloud* might have run into us amidships. I saw no light on board her after collision. I could have seen it had there been one.

Plaintiff's head Japanese boatman stated that on the evening of the 13th instant the boat *White Cloud* collided with the *Eddie* and carried away the jib-boom. The *White Cloud* seemed to be going to pass clear but changing her course suddenly the collision was inevitable. The *Eddie* tried to keep clear but failed. The *White Cloud* showed no lights. They saw her coming. The collision occurred through this sudden change of course.

Richard Wilkinson, master of the American ship *Haze*, sworn:—I saw these two boats run right under the ship's bows. One of them had lights the other had not. I was afraid the ship would run foul of them, and I ordered the man at the wheel to put

her hard down and luff her up. The wheel was then turned up again so that the ship would not round altogether. In the meanwhile one of the boats hailed me and almost immediately afterwards the pilot came on board. It was defendant, and he took charge of the ship. In a few minutes the other man came on board and claimed that he had hailed me first and wanted the other man to go. I had engaged the *Dane* however because he got on board. The collision I did not see nor did any one on board the ship. Plaintiff went back to the boat that had the light, so I suppose it was his.

Charles Albert, seaman on board the *Haze*, sworn:—Two pilot boats hailed us on the 13th April, one of them, Connor's, having lights, the other none. The one with the light hailed once, the other did not, though the owner came on board first and piloted the ship up to port. Defendant's boat had no light.

Two of plaintiff's *sendos* now gave evidence, much to the same effect as that of the other boatman.

This closed plaintiff's evidence. Defendant called

Zenchino, *sendo* on board the *White Cloud*, who stated:—Both boats left Nanatsu on the 13th instant at 4 o'clock. We saw a ship at some distance and sailed in her direction. When about 1 *cho* from the ship we both steered straight for it. The *Eddie* got in our way and we ran foul of her. The collision took place about seven o'clock. Our boat had no light up because it was not dark enough. We were about 50 feet from the big ship at the time of the collision. I did not look for lights on board her. I did not hoist a light after the collision. I saw a lamp on board the other pilot boat. We were in sight of each other up till the time of the collision.

Another Japanese sailor corroborated the testimony of the previous witness in every particular, except with regard to the light. He did not know whether the other boat had a light or not.

Judgment reserved.

IN THE JUDICIAL COURT AT KANAGAWA.

Before MR. ASAINA KANSUI, Vice President.

Saturday, April 21st, 1877.

C. BRAUN vs. KAJIRO SHOKITSU.

The plaintiff claimed that the defendant be compelled to take delivery of certain goods to the value of \$6,000.

Mr. Dickens appeared for the plaintiff.

This case was resumed this morning from the 28th of March, when it was adjourned for the production of a witness for the plaintiff.

On the Court assembling, Mr. Dickens expressed his regret that the case should have taken so long, and on behalf of the plaintiff he was willing to abide by the decision of an arbitrator if the defendant was equally bound, if the Court should think fit to make such an order. The witness for whose presence the case had been suspended was now in Court and could be examined if necessary.

The proposition made by Mr. Dickens being put to the defendant he declined to entertain it.

The Japanese witness, Echizenya, was then examined and deposed that Kashiwo had offered to take the goods if a reduction of 25 cents was made. The witness told him that he himself had no power in the case, but he would report the offer to the plaintiff, which he did, but he, plaintiff, would not entertain such a considerable reduction. He said that he had seen the goods and compared them with the sample produced by Kashiwo and they were on the whole as good, though some four or five out of fifty might have been inferior. He corroborated the statement about the goods not being purchased by any single sample, but by the average of the 500 pieces. It was very difficult to get a large quantity of shirtings without any difference.

The examination of this witness concluded the evidence.

Mr. Dickins' arguments, which were in writing, were to the following effect, viz., that in this case the only question was, were the goods tendered of the kind contracted for? It was plain that they were. The contract said "goods same kind as those bought in July 1876." Those bought in July 1876 were of the same mark, same weight and were by the same manufacturer, as those in question. There was nothing said in the contract about "quality," and the plaintiff had nothing to do with quality; nor was any mention made of any sample, so that it was ridiculous to contend that the goods were bought on sample. But even if the plaintiff was concerned as to quality and had sold on sample, the defendant was in no better position. The defendant had even then to prove that the goods tendered were not equal to sample, and on that point he had given no evidence whatever. He had said that some of the goods tendered were not equal to one particular piece, which he alleged was a piece taken out of the 500 pieces bought in July 1876, but which he did not produce. Neither did he attempt to prove that the piece in question was taken out of the 500, and the plaintiff denied that it was. When the 500 pieces were bought there was no thought of the present contract, and why, then, should a piece out of that lot be retained to compare with those bought under a contract not then contemplated? But even if the piece in question really was one of the 500 the defendant's position was no better. It certainly was not true that the present contract was made on that or any other one piece—even if by sample—but on the whole 500 pieces, or at least some 50 or a hundred taken at random out of the 500 should be produced for comparison with the goods now tendered; and if those now tendered were on an average below those brought for comparison, then if the contract was on sample let the plaintiff lose, in the reverse case, let him win. The defendant had said that it was a hardship that he should be required to produce the whole or a great number of the 500 pieces for comparison, but it was a much greater hardship for the plaintiff to have the goods he tendered refused because they did not happen (if such was really the case, which had not been proved) with one single selected piece, probably an accidentally superior piece, for in all masses of goods there are invariably a few pieces here and there much better than the rest. Besides, the defendant could not complain of his own contract composed and written by himself. He had got what he chose to contract for, shirtings of a certain mark, weight, etc.; any how he must prove that the shirtings offered were not what was contracted for. It was plain that he was the only person who could

prove anything about that matter, as the 500 pieces of shirtings passed into his hands. As to the alleged offer by the plaintiff to make an allowance, Mr. Dickins said, that in the first place he never in any way admitted any inferiority in the goods tendered; and, next, what he had said was that he would abide by any allowance Echizenya might think proper if the defendant would bind himself to accept his decision. But the defendant had refused this. The offer of the plaintiff was made, not because of any inferiority because none existed, but simply because it is always better to compromise a dispute than fight it out in Court; and also because he felt some compassion for the defendant as the market had gone down very much. The evidence of Nazomi was almost entirely false as shown by the statement of Echizenya and the plaintiff. As to the letter of the *banto*, the plaintiff had nothing to do with it. He never authorized it, and never even knew that it was written until quite lately, and the *banto* had stated that it was written in the defendant's own house and under the defendant's influence; and the fact that he had placed the matter in his lawyer's hands before the letter was written, showed that he could not have authorized any such letter. Besides, after all, the letter meant nothing. It simply referred to the possibility of some allowance being made. Nothing was easier, and it was a common trick all over the world—than to repudiate a contract in a falling market by saying the goods were not up to the sample, etc, but in all such cases the repudiator is bound to prove by ample and certain evidence that the goods were not up to sample; and of this there was absolutely no proof whatever offered by the defendant.

The plaintiff regretted very much to have had to bring this case into Court, and was quite willing if the Court should think fit to nominate Echizenya as arbitrator to accept the decision of that gentleman, the defendant being equally bound to accept such decision. The want of confidence felt by foreign merchants in Japanese merchants, owing to the constant practice of the latter of repudiating contracts whenever the market falls, was very serious and greatly injured trade. It was to be hoped that the firmness and justice of the Court would deter the Japanese merchants of Yokohama from continuing so baneful and dishonest a practice.

Judgment reserved.

Friday, May 4th, 1877.

CHARTERED MERCANTILE BANK OF INDIA, LONDON AND CHINA v. TONG HING HONG.

This was a claim for \$5,000 and interest, on a bill of exchange.

Mr. Montague Kirkwood appeared for the plaintiffs, and the defendant appeared in person.

On the Court sitting, His Honour announced to Mr. Kirkwood that the defendant's answer to the petition had been forwarded to him, through H. B. M.'s Consulate, but Mr. Kirkwood replied that he had not received it and asked for a copy. This was not produced in English, but His Honour explained that the defendant's answer amounted to this: that he had been about 10 years in commercial relation with the drawer of the bill of exchange, which was endorsed on the understanding that its equivalent was to be forwarded in goods, which goods were never received. He had received a notice from the Bank, but under the circumstances he did not think that he should be held

responsible for the bill. The Bank had accepted his refusal to pay the amount, and in compliance with a request from the Bank he had written a letter to the drawer.

Mr. Kirkwood replied that the defence was no defence at all. The Bank had never promised to release defendant from responsibility, but had told him to get the money from the drawer, if possible.

The Court asked Mr. Kirkwood to explain the circumstances of the case in connection with the drawing of the bill of exchange, which he did. It was, he said, for \$5,000, dated, 19th February, payable 30 days after sight, and so falling due on the 24th of March. It was accepted by the defendant on the 19th of February. When it fell due it was duly presented to defendant for payment, under instructions from H. B. M.'s Consulate. The reply then was, "I no can pay." At the request also of the Bank it was presented to the defendant through the Governor. When requested by H. E. to pay, his reply again was "I no can pay," in evidence of which Mr. Kirkwood produced a document signed by the Governor in the presence of two witnesses.

The defendant said that his stamp to the document in question was only an acknowledgement that he had seen it, and did not amount to an acceptance of the bill. But he would ask the Bank to take into consideration his inability to pay, and request that the drawer in Hongkong should be made to pay it. To his letter to the drawer no reply had been received.

He finally admitted that he was liable for the payment of the amount, but pressed for clemency from the Bank, as he was entirely out of funds from the heavy demands he had to meet of late.

Mr. Kirkwood informed the Court that his instructions were to press for payment from the defendant. If, after judgment had been given against him, his effects did not realize the amount due to the Bank, then he should institute proceedings against the drawer, Quen Fat Hong, in Hongkong, for the balance.

His Honour informed Mr. Kirkwood that judgment would be given in favour of the plaintiff, a notice of which would be given him in writing; and the date of the judgment would be from the time it was given in due form, which would be to-morrow at eleven o'clock.

IN H. I. R. M.'s CONSULAR COURT.

Before A. PELIKAN, Esq., Vice-Consul.

Messrs. VAN OORDT } Assessors.
ALEX. BOGOMOLOFF }

E. EBELL, Interpreter.

Wednesday, April 25th, 1877.

George Hansen, one of the men implicated in the Hongkong and Shanghai bank-note forgery of last January, and who at the time represented himself to be a Swede, but afterwards was proved to be a Russian subject, and whose real name was Johan Frederick Hellston, was brought up for trial.

Mr. Ness appeared for the prisoner. All witnesses except Mr. Walter, Manager of the Hongkong and Shanghai Bank, were requested to leave the Court.

The charge of attempting to utter forged notes was read over to the prisoner, who pleaded not guilty.

Mr. John Walter was examined and stated that he had been sworn in the British Court. He then testified to the arrest of Williams.

In answer to Mr. Ness:—He had no personal knowledge that this prisoner ever attempted to pass a forged note.

Mr. A. H. C. Hazelwood was next examined and said that of his own knowledge he could not say that the prisoner had passed any forged notes, as he had not seen him do so.

Anton Williams on being called testified that he knew that the prisoner went one day to Tokio to try and get a \$500 note changed, but he did not know whether he got it changed or not. He was acquainted with the fact that bank-notes had been forged; and prisoner knew the same. He knew that prisoner knew it, because Bennett had shown them on one occasion when Hansen was present.

Mr. Ness objected to the manner in which this witness was being examined, as answers were being put in his mouth.

Witness continued and gave evidence concerning Bennett giving him a note to change, and five others to Hansen. He said he knew that the prisoner had received them because he had said so.

Mr. Ness said this was not admissible evidence, and requested the witness to state what he knew and not what he had heard.

On being cross-examined, the witness said that the prisoner was told on the evening of the 6th by Bennett that the notes were forged. He became rather confused about the date when the prisoner went to Tokio to change the notes, but finally said it was after dinner on the 6th.

The Court put a question to the prisoner, but Mr. Ness objected, remarking that he appeared for the prisoner.

The cross-examination of the witness was then continued, and he admitted that he had been charged with attempting to pass a forged note. Mr. Ness asked him if he had any expectation of being released if he gave evidence against Hansen and the other prisoner, but he declined to answer; and on the prisoner's counsel pressing the question, he said that he expected he might get released if he got the others convicted because he had less to do with it than the others.

To the Court the witness said that he had stated in the British Court that the prisoner knew the notes to be forged when he attempted to utter them; but could not say how it was that he had received a good note first and the forged ones afterwards.

In answer to a question put by Mr. Ness, the witness said that he knew the notes were the same as Hansen had taken to get cashed, but he could not point out any mark by which he could distinguish them: finally he admitted that he did not know whether the notes were the same that the prisoner took to Tokio.

Anton Kirchhoff was the next witness, and stated the circumstances attached to the prisoner leaving the *Tennessee*. He said that he had given him five bank-notes to change, but he did not change them. There was no one present at the time he gave the notes to the prisoner. He did not tell him that the notes were "forged," as at that time he (witness) did not understand the term, but he told him that he had made them himself. The prisoner was a friend of his. It was about eight days before the attempt to cash them that the notes were shown to Hansen.

In answer to a question put by the Court, the witness stated that he had shown the notes to the prisoner just as a curiosity and nothing more. The prisoner asked him for the notes on the day he, witness, was ar-

rested, and said that he wanted to get them changed.

In cross-examination the witness said that it was not on the 6th of March when the notes were shown to the prisoner. The day they were shown was eight days before he (witness) was arrested. He admitted that he met the prisoner on several occasions; and that it was Gerhard Hansen who gave Hansen the real note, but he had no knowledge of Hansen trying to pass a note other than the five. As to the prisoner attempting to cash the forged notes, the witness had no personal knowledge respecting it. The prisoner had received some notes previous to the time when he, witness, gave him the five, but he could not say whether the prisoner was aware that they were forged. Anton Williams had one of the notes, and two were hidden in the house. In respect to the first notes that the prisoner had received, the witness stated that he had received them back, and probably they were among the five that he subsequently received; and the reason why he gave the prisoner the five notes was that he might get them changed.

The prisoner made a statement to the effect that he never received more than five notes from the witness.

Witness said that prisoner had told him while in prison that he had torn some notes up, but the prisoner denied ever having spoken to him while in custody.

The witness stated that when the prisoner returned from Tokio after trying to sell the photographic apparatus and change the notes, he did not ask him whether he changed the notes, because he did not feel sufficient interest in the matter. He alleged that the prisoner was to receive \$500 if he succeeded in cashing the notes; at all events he had said so himself. On being asked how far the prisoner was concerned in the forgery, the witness said that he did not know that he had anything to do with it, so far as he understood the word "forgery." The real bank-note from which the forged ones were made had been changed by the prisoner according to his own statement.

Anton Williams was recalled and questioned about the reason for showing the notes to the prisoner, and replied that they had been shown for the purpose of ascertaining if they were good enough to pass. The conversation meant "business" and they were not joking about it. Witness did not know whether the notes were sufficiently good to pass, because he had never seen a good one.

Recess till two o'clock.

On the Court resuming at two o'clock,

Yong Pou King, a Chinaman, was produced as a witness, but attempts at an examination in English as well as in Japanese utterly failed from his ignorance of both languages, so he was allowed to leave the Court.

George W. Elmer was then examined and testified to helping to arrest the prisoner together with the others implicated in the forgery case. He said that when Williams was arrested he, Williams, did not at that time say anything about the prisoner at that time. The witness here explained that he had made a mistake in saying that he had assisted in arresting the prisoner: he had assisted in arresting the others but not the prisoner, though he had searched the prisoner's things. After explaining what occurred at the time of arresting Bennett the witness was allowed to go, the prisoner's council having no questions to put to him.

Walter Loxton, sergeant of police, corroborated the previous witness's statements concerning the searching of the prisoners and the arrest of the others. He did not arrest George Hansen.

Police Constable Toms then testified to arresting the prisoner. Afterwards

Peter Gerhard Hansen, to the request of the Court to state what he knew of the case, replied that he was a crown prisoner and declined to say anything likely to criminate himself. He was then asked to give a general statement, and said he did not know where to commence. Finally he related how he became acquainted with the prisoner through an introduction from Bennett. When Bennett and Williams were arrested, the prisoner had told him that they were arrested for attempting to pass a forged note. He recollected giving the prisoner a \$500 bank note to change, but could not say what the number of the note was. The witness then explained to the Court how it was that he had engaged Hansen to change the \$500, having been induced to do so on Bennett's representation. He refused to say whether George Hansen knew that the notes were forged.

The Court asked the witness how it was that he had been afraid to change the \$500 bank-note himself, and he replied that he had his reasons, but did not think he was called upon to explain those reasons to the Court.

In answer to a question put by the prisoner's Counsel, the witness stated that he had never offered Hansen \$500 to change forged notes. He made a statement to the Court that Bennett had been asking George Hansen to swear in the English Court that he, witness, had offered him \$500 for the purpose mentioned.

J. Mansbridge, turnkey in H. B. M.'s gaol, was examined as to the probability of the prisoners holding communication with each other, and stated that every precaution had been taken to prevent anything of the kind, though he would not swear that they had not spoken to each other.

Bennett was recalled, and on being questioned relative to having a conversation with the prisoner while in gaol, denied it. Gerhard Hansen remarked, "Oh! you cannot believe what he says; he will say anything."

A Japanese witness repeated his statements made at the British and Danish Courts respecting the prisoner taking a \$500 bank-note to him for the purpose of getting it cashed, and his reason for declining to accede to the request was because he had not sufficient money.

Another Japanese identified the prisoner as the person who called at his shop in Tokio for the purpose of buying a watch, and who tendered a \$500 bank-note in payment. He had not seen the prisoner from that day until the present time, and finally admitted that he was not quite certain that the prisoner was the same man, though he was very like him.

Peter Claussen, a public house keeper, was called and the Court remarked that, as he had been subpoenaed at the instance of the prisoner, Mr. Ness was at liberty to examine him.

Mr. Ness replied that he was not aware the witness had been called at the instance of the prisoner, and had no questions to ask him.

The witness stated to Court that he had seen George Hansen several times during the 6th.

The Japanese witnesses already examined were recalled, one of whom stated that he was quite certain he had seen the prisoner between 5 and 6 o'clock in Tokio on the evening of the 6th; and the other said he had seen him between 4 and 5 o'clock on the same day.

Mr. Ness informed the Court that Williams had stated in his evidence that he had met the prisoner not later than 5 o'clock.

Williams was recalled and stated that he had not said that he saw the prisoner about 5 o'clock on the afternoon of the 6th.

Mr. Ness asked His Honour to refer to his notes and he would find that the witness Williams had said that he met the prisoner at the time stated.

His Honour complied with the request and found that the statement made by Mr. Ness was correct.

This concluded the evidence, and on Mr. Ness being asked if he had any remarks to make, he stated that on account of the difficulty in speaking a language not understood by His Honour and which had to be interpreted, he preferred putting his remarks in writing.

The Court agreed to this and proceedings were stayed until 2 o'clock the following day.

Thursday, April 26th, 1877.

In the case of John Frederick Hellston, alias George Hansen, charged with attempting to utter forged Hongkong and Shanghai bank-notes, the Court resumed its sitting at 2 p.m. this day.

The argument of Mr. G. P. Ness, Counsel for the prisoner, which had been handed in writing, had been considered. It is as follows:—

To justify a conviction it is necessary to prove two things against the prisoner; 1st, an attempt to utter a false note, and 2ndly, a knowledge on his part that the note alleged to have been presented for exchange was false. In both of these points the case has conspicuously broken down. On the first point no note is produced and recognised by any one as having been presented for exchange by the prisoner; and whether he presented any note or not it is impossible to say that he attempted to utter a false one. It is true that some Japanese witness says he saw the prisoner in his shop and heard him enquire about exchanging a \$500 note, but whether that note was good or bad he can't tell. It has not been produced in evidence, nor has it been in any way traced. If it had been traced, and had the Japanese witness been able to say definitely, which he refused to do, that the prisoner was the man who passed it, doubtless it would have turned out that the note in question was the good one Gerhard Hansen gave him. Another Japanese witness states that the prisoner went to his house also to exchange a note, but in this instance also the note was not identified, and indeed the witness says he does not know it to be false; and this, too, was no doubt the good note referred to. But it seems from the evidence of these two Japanese that they have mistaken the man: they both say they saw him on the evening of the 6th, while Williams and Claussen both testify to his being in Yokohama at that time, and in this respect confirm the prisoner's statement. On the second point, that of attempting to utter false notes, knowing them to be false, if (as I maintain it has been shown) he did not attempt to utter false notes at all, of course he did not utter them knowing them to be false; but I would nevertheless

point out that by the evidence he never had any knowledge of the existence of false notes until after the arrest. The only testimony tending to show any such knowledge is Williams', but his may be dismissed with the remark that he is interested in a conviction, for it depends he says upon the conviction of the prisoner and others whether he himself is released or not; besides, his statement shows that the prisoner's knowledge of the existence of false notes dates from the interview with himself and Bennett, being posterior to the alleged attempt to utter. The only statement in Bennett's evidence tending to prove such knowledge is the allegation that the prisoner told him Gerhard Hansen had promised him \$500 for exchanging notes, but this is flatly denied by Gerard Hansen and the prisoner, and it seems in the highest degree improbable that so large a sum would have been offered. The only evidence which the Court can look at in considering the question of the prisoner's guilt or innocence is that which has been produced in Court before them to-day. That evidence fails to prove the existence of false notes at all, it fails to connect any notes, good, bad, or indifferent, with the prisoner, and it fails to establish any knowledge on his part even of the existence of false notes previous to the date of the alleged utterance. On one and on both of these grounds the prisoner is entitled to claim his release.

In answer to questions by the Court, the prisoner stated that he had tried to change a note in Tokio; but he did not know that the notes were of the Hongkong and Shanghai Bank, or that they were forged. He had nothing further to add.

The Court found the prisoner guilty of trying to change a note knowing it to be forged, and sentenced him to three months' imprisonment from date of sentence.

IN THE FRENCH CONSULAR COURT.

Before M. PIERRET, *Consul*,
Messrs. REYNAUD and GERARD, *Assessors*.

Saturday, May 5th, 1877.

DOURILLE vs. BOUVET.

This was a claim for \$40, with interest, for arrears of rent of a property No. 164, for the months of March and April last, detained by the defendant on the ground that a wooden house, said to belong to Messrs. Hecht Lilienthal & Co., close to his leasehold, was an obstruction to him, and that measures for its removal should be taken by the proprietor of the lot for which rent was claimed.

Mr. H. Degron, who holds the plaintiffs' power of attorney, and instituted the suit, appeared for plaintiff. Defendant appeared personally.

A letter, dated 30th March, from Mr. Bouvet to Mr. Degron, was read in which the former requested that the wooden shed adjoining the property which he occupies should be removed, and expressing wonder that the Japanese authorities tolerated its existence. At the risk of being ordered to pay the rent by a court of law he would decline to pay until it was removed.

Mr. Degron having stated his claim,

Mr. Bouvet, the defendant, read a statement to the effect that the wooden shed was a nuisance to him and an injury to his business. He held that if the attention of the Municipal Director were drawn to it it would be removed, and that it remained through

the neglect of the proprietor's agent. In conclusion, he begged that his proprietor should be ordered to pay him an indemnity of \$50 for the prejudice done to his business by the existence of the shed in question, and \$50 a month until the cause of offence be removed.

Mr. Degron urged that the rent due should be paid; and that, afterwards, if Mr. Bouvet had any claim against the proprietor, it should be made the subject of an action, if necessary. Meantime it had nothing to do with his claim. In support of his view he cited several analogous cases which have been decided lately, in various Consular Courts here, in which the tenants of certain houses refused to pay rent on the ground of alleged grievances. In each instance they had been ordered to pay their arrears, and to seek their remedy, on the other hand, in proper course; and a similar judgment, he argued, should be given in this instance.

The Court, having retired to deliberate, in a short time returned, and gave judgment for the plaintiff \$40, the amount of two months' rent due, and costs of Court.

J. J. DARE vs. SALABELLE.

This was a claim arising out of the refusal of the defendant to bear the expenses of the transfer of lot No. 155, Bluff, to the plaintiff.

Both parties appeared personally.

In June last year Mr. Dare purchased from Mr. Salabelle the Bluff property No. 155, and handed a cheque for the amount agreed upon as purchase money, \$1,500, to Mr. Huot, acting for Mr. Salabelle, who was unwell at the time. He did so with the understanding that the costs of the transfer in the French Consular Court should be borne by the seller. This Mr. Salabelle denied, and, while expressing his willingness to execute the transfer, held that, according to the French Code, the purchaser should pay the costs. The Court gave judgment upon a letter from Mr. Dare, admitted by defendant, in which it was implied that all costs should be borne by the seller. Mr. Dare having paid into the Consulate the costs of the transfer, the Court ordered that that amount should be refunded by Mr. Salabelle.

IN H. B. M.'S COURT AT KANAGAWA.

Before H. S. WILKINSON, Esq., *Acting-Law Secretary*.

(Tuesday, May 8th, 1877.)

EDGAR ABBOTT vs. JOHN BAIKIE.

The plaintiff claimed the sum of \$99, commission on chartering the schooner *Ching Too* from Yokohama to Hakodate.

Edgar Abbott, the plaintiff, was sworn, and deposed that, on the 2nd of May, the defendant called at his office in company with Captains Partridge and Sievwright and asked him if he could do anything in regard to chartering his vessel. Witness requested to be informed if his vessel was consigned to any one else, and received a negative answer. Upon his making enquiries, one of plaintiff's constituents informed him that the vessel had been offered for charter by another firm. On defendant calling again at plaintiff's office he, plaintiff, accused him of putting the vessel into other hands. Defendant then, in the presence of two witnesses, declared that his vessel was entirely free. Upon this representation plaintiff endeavoured to obtain a charter, and was so far successful as to receive a tele-

gram from a firm offering to charter the vessel. He then communicated with the defendant who, however, never took any notice of his communication. The vessel being placed entirely in the hands of plaintiff, he considered that defendant had no right to give her over to others.

In answer to the Court, the witness stated that defendant did not obtain employment through him. But the vessel having been placed entirely in his hands, he concluded that he was justified in making his present claim. He based his claim of \$99 on the ground that he charged 5 per cent commission for obtaining a charter, but in the present instance he had reduced his claim considerably. The charter witness believed was for \$2,500; and the reason he had reduced his claim was that the case might be tried summarily.

Richard Partridge, Master of the *Syringa*, stated that he recollected being in the plaintiff's office on two occasions in company with Capt. Baikie, but confessed that he had forgotten the exact conversation that took place on the first occasion. On the second occasion he, witness, informed plaintiff that the defendant had placed his vessel in other hands. The defendant was present and stated that he had not done so, and that his vessel was entirely free. The witness stated that he did not think it was right for a captain of a vessel after putting his ship in the hands of an agent, to give her into other hands.

At this stage of the proceedings the case was adjourned at the request of the plaintiff untill two p.m. in order to enable him to produce another witness.

On the Court resuming this afternoon, His Honour announced that he thought that, as the defendant would shortly be returning from Hakodate, it would be advisable for the case to be tried by a jury. He should not give his reasons for making such an order, as he had no desire to influence the jury one way or the other.

An order was then made that the case be put down for trial by jury on a day to be named on application of either party.

The plaintiff asked His Honour for permission to produce the testimony of Capt. Sievwright this afternoon at four o'clock, as he was going away to-morrow morning, and that both his and Captain Partridge's evidence be read to the jury on the trial. Application granted.

IN THE JUDICIAL COURT AT KANAGAWA.

Before Mr. ASAINA KANSUI, Vice-President.

Wednesday, May 9th, 1877.

F. A. COPE vs. ASAYA MOCHIMON.

The plaintiff claimed damages for loss sustained by him through the re-sale of goods purchased by the defendant at auction on the 20th March and not taken delivery of.

The plaintiff was asked by the Court if he had anything to add to the statements made in the petition, and replied in the negative.

His Honour then read the petition to defendant, and questioned him concerning the case. He made a statement to the effect that, on the 12th and 13th April, he went to the plaintiff's office with the money. On both occasions the plaintiff was not there; but he explained to the boy in charge of the office what he had come for.

Mr. Cope said he had a witness in Court who would prove that the defendant had not

called at the office on the days mentioned. Moreover, when an article was bought at auction it was the universal custom to take delivery of it at once, and not to wait for a period of twenty days before doing so; and, besides, on the 12th and 13th he, plaintiff, had been engaged in the office from early in the morning until evening. The following day was the 14th, and he believed that the defendant, or some one else, did call on that day. However, he had left word with his boy to tell him, if he called, that the goods had been sold and he, plaintiff, intended to sue him for the deficit. It was compulsory on his part to sell the goods before the departure of the mail. They were sold privately, not by public auction, for the largest amount that could be obtained for them.

The defendant said that he could produce a witness who accompanied him to the plaintiff's on the days mentioned by him.

His Honour then informed the plaintiff that the case would be postponed until the 12th instant at 10 a.m., and requested him to then produce any witnesses he might have; as well as a copy of the auction regulations.

Mr. Cope replied that the regulations referred to had already been forwarded to the Court through H. B. M. Consulate.

TRAINING NOTES.

After sundry attempts, and with the assistance of the watchman on duty, I have been able to reach the course in time to see some ponies at work, and will report in the order they appeared. A little before daylight the sporting Doctor took his two bay ponies for their gallop, and, notwithstanding the whip, &c., as far as I could judge in the imperfect daylight, they need not be feared. Next came *Tallapoosa*, and although he was reported lame and blistered last week, he did his work in masterly style, simply sailing round the course in 2.23, and, according to my book, this pony cannot be beaten this meeting at anything over three quarters of a mile. Then came *Mavis*, who has also been reported groggy forward, and did his work, twice three quarters of a mile, in very good form. He looks the very pink of condition, and ought to be hard to beat for short distances. Next *Hoolet*, and an old favorite of the same string. The old pony galloping on the grass made but a poor show against *Hoolet*, notwithstanding the fact that the latter was kept on the outer circle by the rails. He gallops in fine style and is in perfect condition; and, I think, although he did nothing in Shanghai, that this is the best pony in the country this Spring up to a mile and a distance, and that the two trial plates in both race meetings are a gift to him. Next in order came two China griffins, who went very well indeed, and are certainly the pride and the pick of the private subscription squad. Then came *Lintie*, who looks as strong as a house and goes in capital form. He will take a deal of beating at any and all distances. In fact, this stable ought to carry everything before it in China pony races this spring. The natives of this string will also be well represented by sundry and numerous griffins, who do good time, especially one small bay who shews both speed and staying qualities; and I hear is expected to take the place of the *Little Man*. *Jim Hills* has improved very much, and will make it very hot for the old cracks in the long distances. *Typhoon* is so so—may be all right or all wrong—so I don't intend putting my money on him. Then came *Tartar Emetic* and *The Squirt*, and

really it would be hard to say which went best; but certainly both deserve a prize for their perseverance. Next in order came the "Cherry and Black" ponies. One was reported sick, and was left at home, and two were said to be lame and put on the course, but were very humanely sent back again to the stable. Next in order came *Little Fish* and his stable companion, who gallops like an overgrown calf, and I am certain that neither of them will even burden their owner with cups or plates. Yet I certainly think their jock deserves great praise and credit for his courage and perseverance. The *Devonshire* colt then put in an appearance, and unless he is spoiled by too much attention and food will decidedly win something. What with his strength and fine dashing style, in a three mile and repeat race he ought to be hard to heat.

Mr. Nicola's ponies, as usual, are in fine order, and as fit as fiddles, especially *Moscou*. This pony seems to improve every meeting. *Lodi* looks and goes in his old easy style, and *Mohstolz* looks better than he has done since he ran second for the Champion. The China griffin in this stable moves in fine form, and is more like *Yankee Doodle* than anything I have seen here since those days.

The *Mongolians* next came under my eye. The dun still is the pick of this flock. Although *Consolation* has evidently improved since last meeting, yet this pony seems to lack that dash which leads to victory. *Transit* and *Uncas* I have seen nothing of; but I suppose their wary trainer has a surprise in store for us with them both. In addition, this stable has three China griffins. The brown one seems to stay best, although the small white one has the best way of going; but I think they will hardly be fit to do much damage this meeting. *Stalemate*, and a fine plucky little Japanese griffin that goes straight and ought to pull off the Griffins' plate, complete their lot, but one, their pride and chief joy, *South Mongolian*, a very dark pony indeed. The "Blue and White" nags came next. Amongst the old ones, *Dibs* certainly looks too fat, and altogether too big, as he will have a better class of ponies to meet this time than he had last, and unless he is reduced by one half in good time you may expect to see this good old pony defeated. *Favori* never was a first class pony in my opinion; but he is going as well as I ever saw him. *Mandarin* takes merry spins occasionally, and seems to go well but he will have tough work in beating such cattle as *Mavis*, &c. *Gladiator*, had he been shot a year ago, I think, would have saved his owner some money and his trainer a deal of trouble. The griffins in this stable seem even more backward than the others, and are I think but an ordinary lot. Perhaps the quantity may make up for the quality of them. Mr. Sinbad's string look well. I have not seen *The Judge* gallop, but he looks very nice indeed, and is likely to cause some more surprises. The *Raven*, too, looks well, and with his short legs and stout barrel ought to suit this course; but he has more work cut out for him this meeting to beat *Bracmar* and *Tallapoosa* than he ever was able to accomplish, in my opinion. There are some really useful griffins in this stable, which will make some of the old mokes travel, if they are brought out fit on the day. I certainly never had a good idea of the Japanese pony *Daimio*, and I do not think he has improved at all since last meeting. The "Cliff" stable have some good looking ponies, which are said to go well; but as I was either too early or too late to see

them at work I cannot say anything further about them, but would question much their ability to win in good company. A sad sort of gloom seems to have come over the "Red and White" Stable. They are very much fewer and finer than ever, yet I should rejoice, and I know many would join me, to see the old ponies *Tilleded* and *Trustee* come to the fore again. I certainly would not approve of trusting a Japanese betto out of sight to train ponies, nor allow him to gallop them with blankets, two months before racing them. The new stable "Yellow and Black" has two fine racing-looking ponies, which certainly shew speed, but I think lack condition for this meeting. I had almost forgotten the "Blue and White" native ponies, who all look very fair indeed. The *Doctor* goes very well one day, and very badly the next which is unsatisfactory. The *Moor* and *Nick* I think look best, and although they do not shew a great turn of speed, they are in good order and should win something. *Oyama* I do not think up to his last year's condition. He has, I hear, been seedy; and the griffin I don't like. He seems heavy and does not take kindly to his work, and shews a decided affection for timber. I hear of a very fine China griffin from Tokio, of which great things are expected, but have not seen him. There are several other outsiders, but nothing very dangerous; and last but not least are the string under the care of the Colonel. The chesnut looks a useful pony, and although he does not make good time has a very dashing way of moving; and the grey griffin has improved immensely and ought to make his mark in some of the mile races. *Sovereign* and *Doncaster* look too fine and light to face the hill, and certainly have not the speed for the shorter distances; but there is no knowing what they may do under the able guidance of the Colonel.

As I said before, two of the old *Mongolians* are dangerous. I mean those that have carried the colours to victory on former occasions; yet I shall pin my faith on the "Tartans," whenever they shew forth in the programme. For choice of griffins for short distances I take *Maccaroni*, and for long distances one of Mr. Sinbad's lot: next a *Mongolian*. *Shizoku* is first favorite for the "Native Griffins," and *Jim Hills* is best amongst the old ponies, although Mr. Nicolas' lot will take a deal of beating. I was nearly omitting a very old favorite, *Crusader*. He looks and goes as well as ever—once round in 2.25, some say 2.23, I say 2.28; and he is altogether so very handsome. Praying for fine weather, I look forward to witnessing the best meeting ever held in Japan; and promise to keep you posted should I learn anything further.

DAYLIGHT.

THE INSURRECTION.

Rumors of trouble, no longer confined to Satsuma, are published in the native papers: The *Choya Shinbun* says that the shizoku of the Kochi ken are agitating for the establishment of a representative assembly and are ready, if necessary, to support their demands by force of arms. The government officials in Kioto hold daily meetings to discuss the best means to preserve peace among them:—The *Mai Nichi Shinbun*, on the same subject, quoting the *Gakumin-shinshi*, reports that Itagaki-Saisuke, ex-Sangi, of Kochi, has commenced recently to collect all the men of the same opinion with himself, and has an-

nounced the determination to proceed with them to Kioto in order to urge the government to establish a representative assembly. If the government should refuse to comply with his desire, he will, he says, be a martyr for freedom. Those who share his views are said to number already about 1,000 in his country, Tosa.

The insurgents of Kagoshima have built batteries along the naturally strong and commanding mountain range between Hinga and Bungo.—Of the police in Kioto, about 200 will soon be sent to the South-West.

The *Hochi Shinbun* writes:—A telegram, sent from Kobe on the 6th, announces that according to information from Kagoshima, the insurgent troops, encamped at Okuchi, about 3,000 in all, had marched to Ibiki, Tonikata and other places. About 1,000 are encamped at Yamo. They are thought to be concerting an attack upon Kagoshima, which is now occupied by the imperial forces. The fourth division of the imperialists, who arrived there at dawn that same day, have been ordered to remain there.—A later despatch from Kioto says that about 2,000 rebel troops had advanced as far as the villages of Oyamada, Ishiki, Takeda, and Kamimura, close to Kagoshima. Large numbers of the insurgents had also entered Kajiri, Kuniwake, Shikine, Fukuyama, and other places. Some of the imperialists in Kagoshima will soon be sent to Akune by ship, whence they will attack the insurgents in their rear. At Demidzu on the 4th about eighty shizoku surrendered to the Imperial forces.—A telegram from Kumamoto, on the 7th, states that on the morning of the 5th a battle was fought at Kagoshima. The imperialists had built a fortress on the summit of a hill, in the rear of Kagoshima castle. A strong fence was erected about half way up the hill. The imperialists did not fire till the rebel troops had approached the fence, when a tremendous discharge was opened upon them and their commander, Nosé, was killed. They were driven back with considerable loss. A district of about one ri and a half in length of the castle city of Kagoshima has been destroyed by fire by the imperialists, a destruction which appears to be as cruel as useless.

One more telegram from Kioto, despatched on the evening of the 7th instant, announces that at 4 a.m. on the 5th, about 2,000 insurgents crossed the river Kofu in Kagoshima, and about 500 others attacked the imperialists simultaneously on the hill Shojo and the shores of Murishiro. At noon, they were repulsed with considerable loss and fled in disorder for Ishikidake. The imperialists had only two men killed. Yet another despatch from Kioto, on the 8th, says that Major Shidzuma had engaged the rebels at Yamano in the Kagoshima ken at about 11 a.m. on the 6th. The insurgents were routed at about 2 p.m. the same day. Ten rebels were captured and many were wounded, while the imperialists lost only three men.—A telegram from Kumamoto on the 8th states that on the 4th a battle was commenced at Ishizaka on the border of Satsuma, and was gained by the imperialists after about one hour's contest. The imperialists will march towards Kagoshima by this road.

SHANTUNG FAMINE RELIEF FUND.

The following letter from the Honorary Secretary of the Shantung Famine Relief Fund at Shanghai has been sent to the Honorary Secretary of the fund here, by whom it has

been handed to us for publication. It will be very gratifying to the contributors to know that the Relief Committee have now "ample funds on hand and in prospect to meet the wants of the people:" that "thousands of lives" have been saved by timely charity; and that good harvests are anticipated, which will afford relief more lasting than that of foreign help to a distress which has been grievous.

Shanghai, 20th April, 1877.

A. J. WILKIN, Esq.,

Hon. Secretary,

Shantung Relief Fund,
Yokohama.

DEAR SIR,—Yours of 7th inst. has come to hand, informing me of the telegraph of a further contribution to the above fund from your place of \$1,200.

Mr. Cameron, our honorary treasurer, has also advised me of the receipt of the telegram.

Your inclosure of the list of subscriptions has likewise been received, and I have sent it to the *Daily News* office. It will appear in to-morrow's paper, I believe.

Your Committee and the Community in Yokohama have done nobly, and your kind action in the matter is warmly appreciated.

There is every prospect of a good harvest this year in many parts of the country, and in the course of two months we expect the burden of the affair will have been got over. Meanwhile we seem to have ample funds on hand and in prospect to enable us to meet the wants of the people, and we have the gratification, acknowledged on all sides, of having saved thousands of lives.

The appeal from every quarter has been of the most liberal kind, far surpassing our expectation, but not greater than the exigency of the case. We doubt not much good will come out of it, and it is to be hoped that the Government and the country at large will recognize that we are really their best friends. Hereabouts the natives express far greater confidence in us and in our form of working in this instance, than in the authorities. It is well perhaps that such an occasion has been furnished for doing what we have done, though it is dreadful the sufferings through which the people have passed.

In due time all our operations will be published, and at present we are most thankful that our friends in Japan generally have been so helpful, and responded in such an excellent manner to our appeal.

I am, Dear Sir,

Yours very truly,

WM. MUIRHEAD,

Hon. Secretary, Shantung Relief Fund.

Shipping.

ARRIVALS.

- April 22, Ger. 3-m. schr. *Friedrich*, Hoyer, 396, from Copenhagen, Gen-ral, to Order.
- April 23, Brit. str. *Viking*, Castle, 2,558, from Kobe, General, to Walsh, Hall & Co.
- April 23, Am. str. *City of Peking*, Tanner, 5,079, from San Francisco, Mails and General, to P. M. S. S. Co.
- April 23, H. B. M.'s flag-ship *Audacious*, Capt. P. Colomb, 3,774 tons, 14-guns, from Kobe.
- April 24, Brit. barq. *Sea Star*, Brotherton, 690, from Newcastle, N.S.W., Coals, to Walsh, Hall & Co.
- April 27, Frch. str. *Tinai*, Reynier, 1,010, from Hongkong, Mails and General, to M. M. Co.
- April 27, Jap. str. *Hirosima-Maru*, Burdiss, 1,870, from Shanghai and ports, Mails and General, to M. B. M. S. S. Co.
- April 27, Am. schr. *Mary Jane*, Brinkmeier, 159, from Kobe, General, to E. C. Kirby & Co.

 May 10, Brit. barq. *Wandering Minstrel*, Sievwright, 361, for Niigata, Ballast, despatched by Captain.

PASSENGERS.

Per Am. str. *City of Tokio* for San Francisco:—Mr. and Mrs. Metcalf, Mrs. Denton, Mrs. Barrett and infant, Mr. and Mrs. Farnham and 2 children, Mrs. N. A. Hawes and 2 children, Mr. and Mrs. Fenton and daughter, Mrs. J. W. Paul, Miss Metcalf, Mrs. Tomots, Mrs. Wood, Mr. and Mrs. McMakin, Mr. and Mrs. Chalmers, and child, Mr. and Mrs. Allen and child, Captain Lenny, Dr. McLeod, Messrs. J. G. Gup, W. J. Tennant, J. G. Littlefield, E. Klinck, M. Giurechick, A. R. Brown, Stickler, C. Murray, R. W. Jamie, E. C. Kimball, R. J. Bull, E. B. Livingston, U.S.N., Geo. Burnett, and G. A. Cox.

Per Am. str. *City of Peking* from San Francisco:—Messrs. C. Schmidz, N. E. Pell, Marshall Bazing, I. Murata, S. Taneda, E. T. Sheppard, G. Farley, W. H. Hyde, M. A. Little, J. Cunningham, J. F. Goodfellow, Mrs. E. M. Douglass, Wallen Gay, F. Low, A. F. Freeman, E. D. Jones, J. K. Thorndike, F. Kagatoni, Miss C. Emerson, G. D. Kois, S. Lemaneffsky, J. T. Sheppard, A. A. Fisher, C. B. Bernard, R. Bourke, E. H. Parker, R. Lilly and wife, F. Norikoff and C. Westcott. For Hongkong: Messrs. A. K. Honey and J. L. Anderson.

Per Am. str. *City of Peking* for Hongkong:—Mr. W. H. Brereton and Misses Brereton.

Per Brit. str. *Bombay* for Hongkong:—1 European, and 9 Chinese on deck.

Per Jap. str. *Nagoya-Maru* for Shanghai and ports:—General Suigo, Lt. Col. Watanabe, Mr. E. C. Kirby, Revd. C. Carrothers, Mrs. Nickel, Messrs. Freeman, F. Low, Dammann, E. H. Smith, Schneider, Tillson, Dr. G. B. Hill, Captain Lemaneffsky, Captain Thorndike, Messrs. Parker, W. H. Morse, A. Little, W. W. Hyde, A. A. Fisher, G. D. Kies, C. Jubin, Endicott, Cunningham, H. R. Smith, Goodfellow, Bourke, J. J. Gray, and 29 Japanese in cabin.

Per Frch. str. *Tamais* from Hongkong:—Monsieur de Geoffroy, Minister Plenipotentiary for France, Madame de Geoffroy and 2 children, 3 servants, Monsieur de Mouterot, Secretary of Legation, Messrs. Orny, Wolff, J. Davison, C. Mallet, Doctor Boyet, Hippley, Brodie and Salvery Auguste.

Per Jap. str. *Hiroshima-Maru* from Shanghai and ports:—Sir Henry Norman, D. B. Smith, H. Mandaley, S. Scott, Mr. and Mrs. Mourilyan and child, Cunningham, Ed. Blanchett, A. Gillingham, L. Kniffler, Mr. and Mrs. Powers, J. D. Carroll, E. H. Hunter, Stanley, and 17 Japanese in cabin; and 3 Europeans, 1 Chinese, and 186 Japanese in steerage.

Per Frch. str. *Tibre* for Hongkong:—Mr. and Mrs. Locock, Mr. and Mrs. Anthony and 3 children, Mrs. Hornby Evans, Mrs. Chaplin Ayrton and child, Mr. Hodgkins, Mr. de St. Quentin and servant, Messrs. M. Thibaudier, Wachtels, Brodie, and Haeks.

Per Jap. str. *Tokio-Maru* from Shanghai and ports:—Miss Wyman, Capt. Black, and servant, Prince Ei, Rev. Mr. Wright, Mrs. Wright, Dr. and Mrs. Berry, Dr. and Mrs. Perkins, Capt. and Mrs. James, General Raben, Miss Raben, Mrs. Youd, Lieut. Nicolson, Capt. Rathbone, Messrs. C. W. Kinder, Jardine, Keswick, Duplaquet, E. Cocks, J. B. Watson, A. R. Watson, Paul Ranley, 11 Japanese in the cabin; 2 European sailors, and 140 Japanese in the steerage.

Per Jap. str. *Tokio-Maru* for Shanghai and ports:—Mrs. Hayashi and son, Rev. T. H. Gulick, Dr. and Mrs. McCartee, Miss King, Miss Minnie Crawford, Mrs. Brent, Mrs. E. de Ojeda, Mrs. Smith, Mrs. Brooke, Miss Hoar, Rev. Bishop Williams, Messrs. Inouye, Osada, Benson, Kookee, Kassai, Kookota, Kano, Cunningham, Kniffler, Ow Yuen, Bongor, Winckler, Jones, Hayashi, Okizuki, Sheppard, Cruickshank, Gillingham, and C. J. Strome.

Per Brit. str. *Gaelic* from Hongkong:—General T. B. Van Buren, U. S. Consul General, Jno. Gargan, Ten Japanese, and Two Chinese. For San Francisco:—Rev. N. A. McDonald, D. T. Bradley, D. D. Allen, Fred. Wooster, C. Hill, and 497 Chinese in the steerage.

Per Jap. str. *Saikio-Maru* from Shanghai and ports:—Mr. and Mrs. Ness, Mrs. Wachtels and 4 children, Mr. and Mrs. Mayama, Prince and Princess Yanagiwara, Mrs. Kagawa, Prince Yamanouchi, Payt. Thompson, U.S.N., Messrs. Ishikawa, Yamaguchi, Walts, Irving, Osborne, Wauchope, Kirby, Sutherland, Smith, Johnson, Machida, Katayama, Nagaoka, Asakaya, Hirano, Yasmura, Wakao, Otakasaka, Matsunami, Yokota, Kusunase, Shimizu, Katayama, Shiraiishi, Yoshizumi, Fukada, Ikeda, Ito, Takakura, Machinaga, Hayakawa; and 296 in steerage. For San Francisco: Dr. Wickoff, U.S.N.

Per Brit. str. *Malacca* for Hongkong:—Captain Black, Lieut. Dicken, Lieut. James, Lieut. Weldon, Lieut. Wheeler, R.N., Messrs. W. E. Cocks, J. Stephens, R. Primick, C. Griffiths, J. Perrott, G. Westcott, R. Fennimore, and 3 Chinese on deck.

REPORTS.

The American steamer *City of Peking* reports:—Sailed from San Francisco April 3rd, at 12.15 p.m. To April 9th had light variable winds and fine weather; then to April 17th fresh gales from S.W. to West, with head sea; then to April 19th fresh gales from S.W. veering to S.W. and West with fresh gales; and thence to Yokohama light variable winds and fine weather. Arrived April 22nd, at 4 a.m.

The French steamer *Tamais* reports:—Having experienced strong Easterly winds, a heavy cross sea with rain and fog, from noon of the 23rd till the evening of the 26th.

The British steamer *Malacca* reports a very pleasant passage throughout.

The British steamer *Gaelic* reports:—Left Hongkong at 3 p.m. on the 1st instant, and had fine weather with variable winds to Oosima, thence strong N. E. winds to arrival, at daylight on the 8th instant. The *City of Peking* arrived at Hongkong on the 1st May at 10 a.m. French mail was not in.

Yokohama Market Report and Prices Current.

STAPLE IMPORTS.

The import market is in about the most depressed condition it has been in since the ports in Japan were opened to foreign trade. The small demand existing arises out of speculation, a few native merchants taking up goods, which are in a manner forced on the market, at prices which must result in serious loss to the sellers.

The German schooner *Friedrich*, with general cargo, from Copenhagen, and the British barques *Sea Star* and *Bothwell Castle* from Sydney, N. S. W., both with coal, have arrived. Transhipped cargo ex steamers *Indus* (M. M.) and *Indus* (P. & O.) from London, *Anchises* from Liverpool, and *Sindh* from Marseilles, is to hand.

ARTICLES.	PRICES.	REMARKS.

Yokohama Market Report and Prices Current.

STAPLE EXPORTS.

SILK shows no change. During the last twenty days there has been no business whatever; prices though nominally unchanged depend for their increase or decrease upon advices from Europe. The unsold stock consists of about 3,000 native bales, chiefly Oshius,

TEA:—Our new season 1877-8 opened on the 3rd instant, with settlements of new leaf to the extent of 125 piculs at prices ranging from \$50 @ \$56 per picul. Supplies have come in freely, and total amount of new leaf settled to date must amount to 1,000 piculs. Rates are to-day slightly easier, but so far no settlement has been reported under \$43 for quality certainly not grading higher than "fair fine."

It is rather premature to pronounce on the likely quality of the first crop, but from musters already to hand it would appear much the same as last season's, with the disadvantage of having opened the market from \$3 @ \$4 per picul dearer, in comparison with prices ruling last year.

The *Gaelic* will take from Yokohama about 2,700 half-chests new crop.

In "Old Teas" there is nothing worth commenting on: stocks are exhausted.

EXCHANGE.

We have again to report but a very limited business in exchange; Business in exports, as is usual at this time of the year, has been small, consequently there have been but few Private Bills on the market. The demand for Bank Bills has been moderate. Since our last, rates have been as low as 4/0¼ for 6 months' Bank Bills, but they have recovered slightly the last few days.

BIRTH.

At Kobe, on the 6th instant, the wife of CARL RASCH, of a son.

MARRIAGE.

On the 3rd April at the Parish Church, Knaresborough, Yorkshire, by the Rev. Canon Crosthwaite, assisted by the Rev. E. J. Bamskill, GEORGE MILDWAY DARE, of Yokohama, Japan, to ANNIE DOROTHEA CAROLINE, only child of Edward Earnshaw, Esq., J.P., of The Cloisters, Knaresborough.

DIED.

On the 20th instant, at 7.30 P.M., at the "Eureka Hotel" No. 128, Capt. C. SCHMIDT, late Commander of the Imperial Japanese Steamer *Gembu-maru*, (Kuroda), age 84 years, a native of Kiel, Holstein, Germany.

Summary.

THE last MAIL SUMMARY was dated 10th inst. for despatch by the O. & O. steamer *Gaelic*, which left for San Francisco at daylight on the 11th. Since then we have received the following mails:—

M. M. str. *Mensaleh*, M'seilles 28 Mar. arrd. 10 inst.
O. & O. str. *Oceanic*, San F'cisco 16 Apr. " 11 "
P. & O. str. *Sunda*, London 30 March " 13 "
M. M. str. *Tibre* London 6 April " 21 "

And despatched the

O. & O. str. *Gaelic* for San Francisco 11th May.
M. M. str. *Tanais* " Marseilles 16th "
P. & O. str. *Sunda* " London 23rd "

THE *Flying Spur*, *Argentino*, S. S. *via* Suez Canal, and *Candia*, S. S. *via* Suez Canal, all from London with general cargo, and the *Scaufell* from Newcastle N. S. W. with coal, have arrived.

THE progress of events in the South has been summarised in an article to which we refer. Details of the occurrences meagrely reported in the native papers, will be found under the heading of "Nippon Notes." The skirmishing, so often reported as battles and engagements resulting in victory for one or the other of the contending armies, still con-

tinues with varying success. The seat of war has been removed from before, and the vicinity of, Kumamoto, to the valleys between Yajiro, the head quarters of ARISUGAWA-NO-MIYA, the imperial commander-in-chief, and Hitoyoshi, the place chosen by SAIGO for encampment.

THE return of the MIKADO from Kioto to Tokio has been postponed indefinitely. The Empress Dowager is expected to arrive in Tokio in a day or two.

OKUMA, Finance Minister, has returned to his post at the capital. It is rumoured he is about to endeavour to raise another loan, chiefly for the purpose of defraying the heavy expenditure arising from the costly war now being carried on in the South, but the report is said to be without foundation.

THE Minister KIDO, one of the MIKADO's Chief Advisers in the Council of State, is seriously ill, and his life is almost despaired of. He can ill be spared at this juncture.

COUNT FR D'OSTIANI, Minister for Italy left for Europe on the 18th instant, and has been succeeded by the Count BARBOLANI.

MR. E. PIQUET, one of the senior residents of Yokohama, took his departure on the 16th instant. His long residence and many good qualities earned for him the respect and esteem of the community, and his departure, probably not to return, is much regretted.

THE condition of business is so bad that merchants are glad of any pretext to absent themselves from their offices. The past week has therefore been devoted to holiday-making. Saturday, the 12th instant, witnessed an event which caused much excitement, not from its importance, but the unexpected result of the contest. The barges of the U. S. S. *Tennessee*, and H. B. M.'s S. *Audacious*, in friendly rivalry challenged each other to a race of about three miles. The latter's boat's crew was the favorite if there was any distinction made by those versed in aquatic affairs. The race was rowed under the somewhat unfavorable circumstances of a fresh north-westerly gale and rather lumpy sea, circumstances, however, supposed to be in favor of the heavier built boat of the *Audacious*. From the start the *Tennessee* barge took the lead, was never afterwards headed, and beat her opponent with any amount to spare.

A NOTIFICATION of some importance has been published by order of H. B. M.'s Minister. The law regulating the liability of sureties to contracts in Japan, provides that the bondsman shall not be called upon to make good his liability in event of default on the part of the principal, until three years have elapsed. By consent of the Japanese Government an express stipulation providing for immediate recourse to the surety may now be inserted in any contract or agreement.

THE 16th, 17th and 19th, were devoted to the race meeting. Beautiful weather, good attendance, and good racing made the scene as lively as could be wished on the first and second days, but on the 18th the rain poured in torrents and the last day's sport was necessarily postponed to Saturday the 19th, which closed a very successful meeting considering the disadvantage of having another to follow on the 24th, 25th and 26th instant. The Race Club refused to entertain the overtures made by the Association, hence the double meeting.

THE weather is unusually backward for the time of year; the average rainfall for the five first months of the year is far from made up, and we have before us a prospect of a wet and uncomfortable summer. On Sunday the 13th the thermometer at 2 p.m. indicated 81° Fahrenheit, and at 7 p.m., five hours later, it had fallen to 50°

A CASE of some interest has been decided in H. B. M.'s Provincial Court. The plaintiff, Howles, formerly a partner with one Black, an American, claimed \$15,000 damages from his former creditors and their assignee. The facts of the case are few and simple. The plaintiff in June 1870 called a meeting of his creditors and invited them to assist him in the settlement of his affairs. The creditors appointed an assignee who acted to the best of his ability in the protection of plaintiff's property a portion of which had been illegally removed, was afterwards restored and subsequently seized and removed by the then U. S. Consul. This and sundry other matters gave rise to much litigation, and as it was not possible to apply the Bankruptcy Act of 1869, then not in force in this place, and expenses for wages, rent, and other pressing matters were accumulating, the creditors resolved to dispose of the stock and plant of the debtor, which was done after being advertised for a lengthened period. The plaintiff never objected to the sale, but after the lapse of sufficient time to bar the creditors' claims against him, he preferred the present action to recover damages for the loss sustained by him in consequence of the illegality and oppressive nature of the creditors' acts. The jury, after a patient hearing extending over two days, the defendants calling no witnesses, found for the defendants, and judgment was recorded in their favor with costs.

A PERSON named HEINTZ, a native of Luxemburg has been apprehended and remanded by His Netherland's Majesty's Consul on several charges of fraud. The prisoner is said to have occupied a good station in life, and to have been formerly in the Belgian guards.

THE latest news from the seat of war indicate a series of small engagements, in which the imperial arms were successful.

THE JAPANESE POSITION.

THE events of the past few days call for more than the passing attention their appearance in the columns of a daily newspaper is calculated to excite. On the departure of the last mail native opinion inclined to the belief that the insurrection was at an end, that the government was to be partially reconstructed, and that an amnesty would be extended to SAIGO and his followers. His Majesty the MIKADO was announced to start on his return to Tokio on the 17th instant, and the Finance Minister OKUMA preceded him. Amongst the people a feeling of confidence in the early restoration of peace and the establishment of the government on a firmer, because better, basis, gave a somewhat mild impetus to business, and, generally, the horizon seemed relieved of some of the storm clouds which have so long lowered upon it. What intelligence gave rise to this impression, how it originated or how it was sustained, is beyond our comprehension, but it is with regret we have to record that the improvement, such as it was, was transitory, and that the present moment shows the country to be in a position similar to that she has occupied during the past three months.

A brief review of the occurrences of March, April and May shows that the ideas enunciated by this paper on the 26th February were not without a certain amount of prophetic truth. We pointed out that the southern movement was not directed against, nor even remotely intended to subvert, the constitution of Japan; we believed then, as we believe now when events have justified the opinions then formed, that the ministry of this country had to a considerable extent forfeited the confidence of an immense proportion of the people; that SAIGO's object was to present a memorial to the MIKADO praying for reforms in several departments of the state, and for some modification of the enforced commutation of the pensions of the Samurai. Immediately after this article a report was current in the capital that SAIGO had personally appeared in Kioto and presented to the MIKADO a memorial containing eleven demands, all of which were categorically refused. That SAIGO himself had waited upon the MIKADO was manifestly absurd, but that a memorial similar to that mentioned had been received, considered, and rejected by the MIKADO seems highly probable: of the nature of its contents none except the framers, and the immediate advisers of the throne can possibly be acquainted; the native press is silent on the subject—silent under the iron hand of a severe censorship, and men competent and sound in judgment, accustomed to form opinions upon current events, have carefully held their peace. On the 28th February the *Osaka-Nippo* announced that OYAMA, the governor of Kagoshima, desired to memorialise the government for permission for SAIGO to lay certain matters before the MIKADO, a request which apparently was not granted. Early in March came the improbable story of the projected assassination of SAIGO; the foundation for this accusation against the government was certain confessions said to have been made by a number of the lower classes of policemen and ex-schoolmasters, so improbable and wild that in the absence of further evidence in support the so-called confessions were unanimously scouted as slanderous and false. Towards the middle of the month of March an imperial commissioner was despatched to Kagoshima with a message to SHIMADZ', by whom he was hospitably and favourably received. On the

return of the envoy to Kioto, he took with him OYAMA, governor of Kagoshima, who, on his arrival at Kobé, was degraded from his rank and sent a prisoner to Tokio for trial. Detained in the capital and treated more in the manner of a felon of the worst class than as a man charged with a political offence, his trial has been delayed upon pretexts which may be substantial, but are seemingly inequitable and unfair. On the 4th April the *Hochi Shinbun* announced that the trial of OYAMA would be conducted by OKI, Minister of Justice, but for various reasons a subordinate officer, TAMANO, a judge of the second rank, was appointed to preside and declined the office. Up to this time the trial or examination of OYAMA is still pending and apparently far from conclusion. On the 16th April SHIMADZ' CHINHIKO, fourth son of SHIMADZ', had an audience of the MIKADO, and, according to the *Mai Nichi Shinbun*, presented to the Ministry a memorial from his father. Towards the close of April an event of unusual significance occurred; KURODA, Sangi and President of the Agricultural Department, and a major-general in the imperial army, announced his determination to resign his command. In addition to his ordinary military duties his ability and loyalty had caused him to be nominated "war inspector," and his conduct procured for him the respect of his colleagues, as evidenced by his reception in Tokio on his return subsequent to his resignation. The *Akebono Shinbun* is responsible for the reasons alleged to have been urged by General KURODA for his retirement from active service; the language is simple and quaint; there is a freshness about it quite charming, but we, in common with many others, are apt to think the interests of the Agricultural Department might well have been subordinated to the salvation of the imperial government of which KURODA is so distinguished a member. In his petition to the MIKADO he prayed permission to resign his post of war inspector "because he saw" that his services were no longer of any value "to the MIKADO and country. Since his appointment at the commencement of the civil war, he had escorted the imperial envoy to Kagoshima, where he did his best for the advancement of the government cause. On his return he left at the head of troops for Yajiro, intending to attack the insurgents in the rear and effect a junction with the Kumamoto garrison from that direction. As he hoped, he routed the rebels in many battles and relieved the garrison at a critical moment. Having completed this great work, he thinks that it is time for him to return to the discharge of his responsible duties in the Agricultural Department." In the meantime fighting has been going on. The strength of the government exerted to its utmost, and beyond the most sanguine expectations of its warmest supporters, has proved unequal to the suppression of the rebellion. News of bloody battles resulting in victory for the imperial troops have been published from time to time, but putting aside the undeniable fact that the native papers can only publish matter approved of by the government censors, there is further evidence wanting to justify any belief in the reports. A battle closed by the approach of night and the exhaustion of the contending forces, cannot be called a "victory"; and in the absence of details of the rout, pursuit, and the destruction of the worsted army, we must conclude in reason that the so-called "victories" were in reality engagements involving the sacrifice of much human treasure for a hollow and worthless result.

This abridged and necessarily imperfect sketch of the stirring events of the past three months must serve as a bridge to connect the commencement of the insurrection with the present time. We see the government of this country using its utmost endeavours for the suppression of a rebellion against it, founded on real or imaginary wrongs but its instigators still claiming a right to be heard upon the merits of their alleged grievance. We see the rebels, instead of being reduced to subjection as was supposed, still able to keep the field as belligerents of a character formidable and apparently as strong as before. We hear of the cruel waste of the lives of men who should never have fallen in the inglorious strife of civil war; of the expenditure of at least ten million dollars of treasure; of the growing discontent which is spreading over the whole country: of the qualities and patriotism of SAIGO and the course which should be followed in event of his capture and the dispersion of his armies, but still greater than these we hear of the unwillingness of the MIKADO's chief advisers to use further endeavours to stifle the popular voice by force of arms.

The movements of the insurgents announced by telegrams from Kumamoto on the 12th instant, were evidently beyond the control of the imperial forces; in a number of engagements which we hesitate to dignify by the name of battles, the insurgents were entirely successful in making themselves masters of several important positions. After the abandonment of the siege of Kumamoto, Saigo retreated southward, and after a perilous and fatiguing march he entered Hito-yoshi a naturally strong and commanding position, entirely surrounded by mountains, where he is believed to have established his head quarters. The telegrams of the 13th are not more encouraging, the imperial forces apparently meeting with a succession of small reverses. On the 14th news were received to the effect that messengers sent to Hito-yoshi by the ex-Daimio Hosakawa to instruct his retainers to remain loyal, returned after a fruitless mission. IKEBE, the commander of the Kumamoto division of insurgents had levied taxes in Hito-yoshi, and had constituted himself director of the arsenal in that place, where a supply of ammunition for two years was said to have been seized by the rebels, who were much elated in consequence. The imperial forces under ARISUGAWA-NO-MIYA are encamped at Yajiro, about 40 miles north of Hito-yoshi, and it is in the valleys which lie between the two places that the chief engagements of the second campaign are expected to take place. The intentions of the government are wholly unknown, but rumour credits them with actually deliberating upon the best method of settling the political difficulties in a manner calculated to appease the turbulent and warlike men who have placed SAIGO at their head. That early peace is probable is supported by the advice reported to have been tendered to the government by KURODA in favour of a compromise with the insurgents, combined with the fact that the utmost the government can hope to do is to confine the rebellion to the limits of the island of Kiusiu and so prevent its extension to the main-land.

It has been asserted that the tone of the foreign press in Yokohama is hostile to the government. This is an error which must be controverted. Japan has made extraordinary progress towards establishing her claim to be admitted into the comity of nations. In doing so successfully she must not complain if with the advantages of international intercourse she must accept some of the, to her,

disadvantages, amongst which may be mentioned the criticism of the press which civilized nations practically set no limits to. It is by means of the foreign press that Japan will be best known in foreign countries; it is by the same medium that her actions and motives will be brought before the world to be examined and weighed by the potent tribunal of public opinion, and it is not too much to assert that the government would be materially strengthened and supported by a modification of her own press laws, granting freedom of opinion as a vent to those excited and quarrelsome men who will otherwise relieve their feelings by turbulence and rebellion.

COMMERCIAL MORALITY, OR NATIVE VERSUS FOREIGNER.

“Thus it is evident that foreign intercourse has been a great benefit to us. Still in connection with this, when we contemplate all its bearings there are matters giving occasion for great sorrow of heart. If we examine the returns of our trade we shall find that the imports greatly exceed the exports, which is to our disadvantage, as well as that by craft the foreign merchants are always cheating our innocent traders and so get all the profits.”—*Akebono Shinbun translated by the Tokio Times.*

THERE is a certain class of individuals who delight to make assertions and to give to them the publicity which the very limited means at their disposal will permit. In doing so they display a reckless indifference to the truth of the charges they so unblushingly bring forward, which would be wholly inexcusable if their narrow comprehensions could grasp the fact that ordinary men, readers of newspapers in particular, possess the faculty of discrimination between mendacity and truth; between accusations intended for the public benefit and those which are the offspring of a diseased and prejudiced mind. The passage we have quoted is an example of our meaning. The author is evidently a young man of gushing spirit and sentimental nature. His patriotism is gratified by the fact that the safety of Japan is assured by the jealousy of each of the foreign powers acting as a check on the cupidity of the others, nor does he omit the suggestion that the military resources of the empire should be strengthened “so that we may not be despised by foreign powers.” He touches upon trade, and enunciates a theory, culled no doubt from the *Tokio Times*, and eminently worthy of the able protectionist who writes for that journal, and adds “We should likewise build many large ships and send our products to foreign countries.” Enough of these absurdities; of the sentimental and utterly false assertion that the “innocent Japanese trader” is the prey of the rascal foreigner; and of the evil influence the presence of foreigners exerts upon the innocent native. The time has arrived justifying our presumption that the people of Japan have seen so much of foreigners as to be able to judge for themselves of the wisdom of prolonging and encouraging the intercourse, which is being surely, though slowly, extended for the common benefit. The duty of a newspaper, which may not be unfairly compared to the law of any country in which the rights of liberty and property are made paramount to all other considerations, is therefore clearly to assist in the development of a proper understanding; in the correction of abuses, of wrongful or dishonourable actions, and

illegal or improper transactions; to be the medium by which the attention of the community shall be called to matters which reflect upon the general body; to be a fearless and honest exponent of public opinion, and to throw the light of publicity upon those occurrences of ordinary life which affect, not only the individual, but the people: these are amongst the most important of the burdens which the conductors of a journal take upon themselves. The law is made to support and protect the honest member of the community, not to interfere with his conduct or his affairs, and equally are newspapers limited to the same rule and principle. It is with regret, therefore, that we have observed for some years the practices of some of the foreign journals in reproducing, without a sign of disapprobation statements which, if pointed at an individual, would undoubtedly subject the author to a suit in a court of criminal jurisdiction. To stab in the dark, or to shoot from behind the protecting shelter of a thickset hedge or stone wall, is the act of a despicable coward, and we cordially recommend the *Akebono Shinbun* to either substantiate the sweeping allegation that foreign merchants are cheats or to withdraw it altogether with a sincere apology for the grievous error fallen into.

We have been forced into this dissertation by the unpleasant comparison suggested by the *Akebono Shinbun* between the commercial morality of the innocent native and crafty foreigner. In our issue of the 12th instant, we called attention to certain practices existing in Manchester justly stigmatised as dishonest, but we pointed out that those practices were confined to a few persons constituting a class of adventurers as easily distinguishable from the real merchant, as the gambler at a faro table is distinguishable from a banker. The comparison we are compelled to make is between the usages of native and foreign merchants in carrying out contracts, with their conditions express and implied, for the purchase and sale of goods. We have numerous authentic instances of transactions in which foreign merchants have been placed in positions greatly to their loss and disadvantage, of which the following are examples: 1. During a rising market with good prospective indications A, a Japanese merchant, contracted with B, a foreign merchant, for a quantity of iron; delivery to be made within seventy days. On the fiftieth day the market for iron declined and continued to do so until the seventieth day when the market price was below that stipulated for in the contract, and early on the seventy-first day the iron contracted for arrives after a voyage protracted by unusual weather. A repudiated the contract on the ground that the condition precedent as to arrival within seventy days had not been complied with. The hardship of this proceeding is not apparent at first glance, but is appreciable when the following circumstances are considered: by non-arrival of the iron in the stipulated time B, is precluded by the express terms of the contract from enforcing its performance, nor can he complain if A refuses to carry it out. So far so good; and now we will substitute a rising for a depressed market, and say that the market value of B's iron on the eightieth day is in excess of the contracted price; the iron arrives ten days later than stipulated, but A insists upon delivery. He has not a shadow of legal right—he is only an “innocent trader,”—but he insists upon delivery. B declines, and finds, that in consequence of his adherence to his contract all dealers in iron shun him for ever

more. The innocent Japanese trader takes advantage of foreign law when it is in his favor; should it not be in his favor he declines to recognize it, and enforces a self made law by an arbitrary combination against the crafty foreigner.

2.—C, an extensive Japanese broker or merchant wants a speculation. He cautiously ascertains that there is a scarcity of 8-lb. shirtings, or some other class of goods not in steady demand, and forthwith resolves upon his line of action. He instructs several of his friends who become his co-plotters, and simultaneously they enquire at the houses of foreigners for the particular goods resolved on. Finding there are none to be had they grow bolder, and offer higher prices, until the “crafty” foreigners, (whose motto is competition not co-operation) finding that a margin of profit sufficient to justify the adventure exists, severally telegraph home for a supply of the “goods for which there is a sudden demand at profitable prices.” Two months afterwards the goods arrive in sufficient quantity to enable C to carry out his scheme; the sudden demand is no more; not a purchaser can be obtained at anything like cost; the goods are stored in the hope of an improvement which is certain never to appear, until at last the holders in despair realise at a loss of from five to even seventy per cent. On enquiry it is discovered that the innocent C and his comrades are the purchasers, and that their profit lies in the difference between the sacrifice made by the importer, and the reduction from actual cost at which the consumer is willing to take over the goods.

The subject is too important to dismiss in one article, and we shall have occasion to conclude it in a later issue.

MANCHESTER GOODS IN EASTERN MARKETS.

A USEFUL lesson might be learnt by some of the Lancashire manufacturers, if they were not impervious to all teaching, from the following extract from the report of Mr. J. A. MAN, the Imperial Chinese Commissioner of Customs at Newchwang, on the trade in piece goods for the year 1875 at that port. He says:—“Complaints as to ‘deterioration in the quality of English piece goods continue, I regret to add, with good and sufficient reason. Stronger pens than mine have animadverted upon the ‘suicidal folly of the course pursued by certain unscrupulous coteries at home. In this place I venture to point their testimony. Lancashire is surely stretching to extreme tension the sole cord in which her present practical monopoly finds strength—the hatred of change that lies embalmed in the Chinese character, and gives force and meaning to the conservatism met with in all the references of daily life. No din of machinery resounds through the streets of Shanghai and Canton, and the chance of forcing honesty in work by ceasing largely to import is in the future. Yet the native merchant has a tolerably adequate remedy at hand. By no law other than the ‘old custom’ of his class is he obliged to deal in certain brands or with particular manufacturers.”

Here in Japan, where no such servile adherence to “old custom” prevails as in China, the danger run by the home manufacturers, in adhering to the “old custom,” a pernicious and dishonest one, of sending out over-sized and clay-filled calicoes and

other piece goods, of losing their trade altogether is even, one would think, greater than in other parts. Although in the past, the practice of weighting goods with thirty per cent. of dirt, which washes out in the first washing, has brought large profits to the predecessors of the modern piece goods merchant, yet now the maxim that "honesty is the best policy" is making its truth very evident in this particular trade. China has, from the early days of more extended European intercourse with that country, held the unenviable notoriety of being easily head of the class of adulterants. Tales of the sale by Chinese trader of pigs, of weight rendered fictitious by the insertion in their bodies, if dead, of "pig" lead, if living, by the copious injection of still cheaper water, are familiar as household words in the mouths of certain trade moralists, who say nothing of American speculation in wooden nutmegs, and British sale of clay for cotton. The result of the last mentioned trade, as pointed out by the *Daily News*, is briefly thus. "China, with its hundreds of millions of people dressed in cotton garments, ought to afford a splendid market for Lancashire produce. It was believed, on the conclusion of the Treaty of Tientsin, by which a number of fresh ports were opened to foreign trade, that a great and speedy development of the trade in piece goods would take place. But those expectations have not been fully realised. The trade has increased, but not in anything like the ratio expected. There is no possible doubt that the Chinese have, in many instances, given up foreign cotton goods in disgust, because they have found them so extensively adulterated. To no other cause can be ascribed the diminished favour in which they are now held." So far from the trade increasing, the consignments to China for 1875 were below the average of the preceding five years by half a million pieces. And, added to this, come the ominous facts that India is beginning to show to the front as a vigorous rival producer; and that, despite of their labouring under the disadvantage of dear and scarce labour, of navigation laws that have crippled the carrying trade, and of prohibitive tariffs, the American manufacturers have been able to place piece goods on the China market in considerable quantities. These goods, says Mr. MAN, "compare most advantageously with the adulterated, short packed rubbish that is ruining the reputation of British mills."

Again, the Commissioner hints significantly at the present absence of machinery at Shanghai and Canton. How long, if the present system of home manufacture is allowed to continue, can that absence be guaranteed to last? The *Daily News* states that already "the advisability of starting cotton mills at the former port has been discussed, and, as there is the raw material and plenty of cheap labour on the spot, the idea is by no means utopian. The cotton mills in India have been successful, and there is no reason why they should prove a failure in Shanghai."

We hold, with our contemporary, that it is to be hoped, in the interests of Lancashire, that the experiment will not be ventured upon, but some of the manufacturers of that country are certainly going the right way to work to induce the Chinese to start the enterprise. They have the means of prevention in their own hands. Even now it is not too late to recover lost ground, and strengthen their hold on the great market afforded in the Far East for good unadulterated fabrics. They should

study the wants of their customers, make cottons in the widths and of the strength required, and they would then doubtless not only retain, but largely increase, their present trade. But if they will not heed the friendly remonstrances so repeatedly addressed to them, it is to be feared that they will soon lose their virtual monopoly of the markets of China. "Both manufacturers and merchants should strive to avert such a contingency occurring, the former by carefully avoiding the use of China clay and other similar ingredients for giving a factitious value to their goods, and the latter by steadfastly refusing to receive consignments of such rubbish."

Having now pointed out the opinion prevailing in China about the quality of the cotton piece goods upon which the trade of England with that country so largely depends, it may not be amiss to correct an error which has received much more credence than it deserves, and which, if accepted in Japan, would tend to seriously affect foreign trade, already small and depressed, to a greater extent than the real facts of the matter at issue would warrant. There is a class of adventurous speculators not possessed of many scruples about right and wrong; but there is a much larger class of honest merchants who will not condescend to those practices which must eventually bring loss and discredit to the promoters. The chief market of the world for piece goods which are commonly known as "Shirtings," "Turkey reds," &c., is admittedly India: China follows, and Japan holds but an insignificant third place in the list. Small as the imports to this country are, the goods are of a make which challenge criticism in the great majority of cases, and there is no reason to suppose that the rule defining the best policy is likely to be departed from by the merchants trading in this place. The broad assertions of statisticians are sometimes based upon grounds which are weakened, if not at once removed, by the application of practical rules of business. The opinions of Mr. MAN have been formed from his observation of a particular class of business, and his desire to detect the fraudulent from the honest goods. The rule, however, is unchanged, in spite of the seeming evidence against it, that practices such as those pointed out are the transactions of adventurers, and not of merchants whose business, not alone for the moment but for all time, depends upon its being honestly carried on.

ATHLETICS IN TOKIO.

A VERY pleasant afternoon was spent in Yedo on the 7th inst. to witness some Athletic Sports, which were got up with an idea of forming an Amateur Athletic Club. The weather could not have been better than it was for recreation, and, considering the short notice the competitors had, the Tokio Athletes are to be congratulated on their "form." The stewards deserve great praise for the satisfactory manner in which everything was carried out, and we hope soon to hear of an Athletic Club in Tokio. There must be lots of spare ground in the capital where it would take very little money to form a running path. We have noticed many suitable lots of about the circumference of a quarter of a mile, and as level as a billiard table. A cinder path is not an absolute necessity—of course cinder is better than grass—but if the path has to be of the latter,

it must be carefully kept, keeping the path, or as our American Sports would say, the track, short, is of paramount importance.

The Sports were held on the vacant space opposite the Naval College, where a course of a quarter of a mile was marked out on the grass.

The 100 yards flat was a capital race, as was also the 150 yards flat. These short distances brought out fair fields; and we hope it was only owing to the shortness of time for training that as good did not compete in the longer distances. The long jump brought out a good man in Hall, who cleared 19 feet. He no doubt could have beaten this, but did not try again, as he hurt his knee slightly in the hop, step and jump. This is the best long jump on record here, in Japan. Yokohama had better look to its laurels!

Mr. St. John acted as judge, Mr. Marrable discharged his duty of starter with correctness, having only one false start, and Messrs. St. John and Johnstone were the handicappers. Great credit is due to these gentlemen for the way they brought their men together. This task is always a hard one, and where previous performances can not be referred to, the task is harder. Below, where a full return of the sports appears, the close finishes of some of the races will show that the handicappers were not far out. We wish the Tokio Athletes every success in forming a club, and hope to see them compete in the Autumn in Yokohama.

1.—100 YARDS FLAT.—Handicap.

Ward, 3 yards	-	-	-	-	1
Tempest, 6 yards	-	-	-	-	2
Esdale, 2 yards	-	-	-	-	3
Hall, scratch	-	-	-	-	0
Fennell, 9 yards	-	-	-	-	0
Gorman, scratch	-	-	-	-	0
Charlesworth, 6 yards	-	-	-	-	0
Platt, 6 yards	-	-	-	-	0
Peacock, scratch	-	-	-	-	0

7 out of the 9 started. After a very close race Ward won by 1 yard.

2.—THROWING THE HAMMER.—(16 lbs.) Handicap.

Charlesworth, 11 feet	-	-	-	-	1
Hall, 5 feet	-	-	-	-	0
Ward, scratch	-	-	-	-	0
Gorman, 4 feet	-	-	-	-	0
Esdale, 5 feet	-	-	-	-	0

The scratch man made the best throw, 78.10, J. Hall 72.10, Charlesworth 68.10, who with his handicap, 11 feet, won by 1 foot—the rest nowhere.

3.—HOP STEP AND JUMP.—Handicap.

Hall, scratch	-	-	-	-	1
Ward, 6 feet	-	-	-	-	0
Gorman, 3 feet 6 inches	-	-	-	-	0
Charlesworth, 4 feet 6 inches	-	-	-	-	0

J. Hall won, covering 40.1½, the rest nowhere.

4.—150 YARDS FLAT.—Handicap. Two Prizes.

Ward, scratch	-	-	-	-	1
Gorman, scratch	-	-	-	-	2
Esdale, 3 yards	-	-	-	-	3
Hall, scratch	-	-	-	-	0
Charlesworth, 8 yards	-	-	-	-	0
Fennell, 12 yards	-	-	-	-	0
Platt, 9 yards	-	-	-	-	0
Tempest, 7 yards	-	-	-	-	0

After a splendid race Ward won by a foot: same distance between 2nd and 3rd men.

5.—LONG JUMP.—Handicap.

Hall, scratch	-	-	-	-	1
Charlesworth, 2 feet 6 inches	-	-	-	-	2
Ward, 3 feet	-	-	-	-	0
Gorman, 2 feet	-	-	-	-	0

Hall won with a jump of 19. Charlesworth 16, with handicap 2.6, making 18.6—rest nowhere.

6.—HURDLE RACE.—Handicap.

Hall, scratch	-	-	-	1
Charlesworth, 12 yards	-	-	-	2
Platt, 12 yards	-	-	-	3
Peacock, scratch	-	-	-	0
Esdale, 6 yards	-	-	-	0
Ward, scratch	-	-	-	0

Hall and Esdale were the favorites for this, but Platt knocking down the 3rd hurdle balked Esdale who came to grief.

7.—PUTTING THE SHOT.—(16 lbs.) No follow allowed.—Handicap.

Hall, scratch	-	-	-	1
Ward, 4 feet	-	-	-	0
Gorman, 4 feet	-	-	-	0
Charlesworth, 3 feet 6 inches	-	-	-	0
Strange, 4 feet	-	-	-	0

This was won by Hall, with the best "put" on record in the East, 40.1½, the rest nowhere.

8.—200 YARDS FLAT.—Handicap.

Ward, scratch	-	-	-	1
Gorman, 3 yards	-	-	-	2
Tempest, 11 yards	-	-	-	3
Hall, 3 yards	-	-	-	0
Esdale, 6 yards	-	-	-	0
Platt, 12 yards	-	-	-	0

4 started and Ward won by a foot.

9.—440 YARDS FLAT.—Handicap.

Ward, scratch	-	-	-	1
Esdale, 13 yards	-	-	-	2
Gorman, 8 yards	-	-	-	3
Tempest, 20 yards	-	-	-	0
Platt, 23 yards	-	-	-	0

Gorman and Ward were the favorites for this; but Gorman being out of form could not "go" the pace. Ward caught Esdale about 50 yards from home, when a hard race ensued, but Ward putting on a spurt won by 1 yard.

10.—HIGH JUMP.—Handicap.

Esdale, scratch	-	-	-	*
Charlesworth, 2 inches	-	-	-	*
Gorman, 1 inch	-	-	-	0

Gorman failed at 4 feet 3 inches. Charlesworth cleared 4.4 and failed at 4.4½. Esdale cleared 4.6 and failed at 4.6½, making a tie between the latter two. As neither cared to jump again, being tired, they tossed for it, and Esdale won the toss. This is a curious way to decide. It ought to have gone to the Scratch man without tossing.

11.—POLE JUMP.—Handicap.

Charlesworth, scratch	-	-	-	1
Strange, scratch	-	-	-	2
Esdale, 6 inches	-	-	-	3

Esdale cleared 6 feet 6 inches and failed at 6.9. Strange failed at 7.6. Charlesworth won with 8 feet, 9 inches less than last year.

12.—CONSOLATION.—200 YARDS.

Tempest	-	-	-	1
Platt	-	-	-	2

Tempest took the lead and kept it throughout, winning by about 1 yard.

YOKOHAMA RACING ASSOCIATION.

SPRING MEETING.

First Day—Wednesday, May 16th.

THE first day's racing began under favorable auspices; the weather, which in the early morning was cloudy and unsettled, gave place to sunshine and genial airs, and at noon was all that the most sanguine could desire. A goodly number of spectators assembled to witness the first event, and the stand offered accommodation to a number of ladies who honoured the races with their patronage. DON MARIANO ALVAREZ and Mr. LOWDER officiated as judges, Messrs. BARNARD and BAYNE as starters, and Mr. ELDER as clerk of the Course.

The first event fixed for 12.30 was delayed until one o'clock by the fractious conduct of *Mongolian Lamb*. This pony threw his rider twice, but we are glad to announce the gentleman sustained no serious injuries.

The band of the *Tennessee* was in attendance, and filled up the intervals between each event with some very excellent music. The rain-fall of yesterday made the course rather heavy, but every hour witnessed an improvement.

The following declarations were posted:—

<i>Mongolian Brave</i>	} Scratched throughout.
<i>Transit</i>	
<i>Telephone</i>	
<i>Lodi and Sport</i>	

1.—THE TRIAL PLATE.

Value, \$100. For China Ponies that have never won a flat race here. Weight for inches. Entrance \$5. One mile.

Mr. Fiddle de Dee's <i>Hoolet</i> (late <i>Hoozee</i>)	1
10st. 8lbs.	
Mr. Robertson's <i>Chance</i>	2
Mr. Riyoshi's <i>The Snark</i> , c.c.	3
Mr. Earnest's <i>Raethia</i> (late <i>Ta Phairson</i>)	0
10st. 5lbs.	
Mr. Sinbad's <i>Davenport</i>	0
Mr. W. Fairplay's <i>Mongolian Lamb</i> , 10st. 2lbs.	0

For the first event of the season five out of the eighteen ponies entered came to the starting post; and from this lot *Chance* and *Hoolet* were considered the probable winners, though *Davenport* had some friends. *Mongolian Lamb* came out for the purpose of contesting the race, but as soon as his rider mounted, and before he was fairly in the saddle, he played up and threw him. After some trouble the jockey was once more in the saddle, but was not more fortunate than before, for the pony rushed madly behind the stables and again threw him. It was then decided to go without the *Lamb* and the other ponies were brought to the post. The start was very unsatisfactory, *Chance* getting away with much the best of it, followed by *Hoolet*. On going up the hill the latter challenged the brown pony and a neck and neck race ensued until nearing the trees when *Chance* made a valiant effort to get away from his opponent and showed in front for an instant, but an instant only, as the tartan colours again went up level, and in the race down the straight, went to the front and were never afterwards collared, winning by a couple of lengths. Time, 2 min. 14½ secs.

Mr. Robertson's *Favori* won the first event at the meeting of the Association last Nov. in 2 min. 19½ secs.

2.—THE GRIFFINS' PLATE.

A Sweepstakes of \$10 each (with \$50 added) for Japan Ponies, being *bonâ fide* Griffins. Weight for inches. Five furlongs.

Mr. Douglas' <i>The Crescent</i>	1
Mr. Robertson's <i>Rebel</i>	2
Dr. Buckle's <i>Spendthrift</i>	3
Mr. E. Jaffray's <i>Professional</i>	0
Mr. E. Jaffray's <i>Exile</i>	0
Mr. W. Fairplay's <i>Shizoku</i>	0
Major Arda's <i>Monarque</i>	0
Mr. Fiddle de Dee's <i>Dumfounder</i> 10st. 6lbs.	0

A field of eight faced the starters, and it must be admitted that they were anything but a handsome lot. *Rebel* was thought most of, but the result proved a disappointment to his backers. The start was again very indifferent, indeed, a couple of ponies getting away very badly. *Monarque* cut out the running and put several lengths between him and his competitors; but on climbing the hill the ruck came closer, and *Monarque* running to the outside of the rails lost all chance of the race. *Crescent* now assumed the lead and after a most determined contest with the *Rebel*, succeeded in just winning.

The general opinion was that *Rebel* had secured first place, and the judges' decision caused some apparent dissatisfaction. Time; 1 min. 20½ sec.

The "Griffins' Plate" last autumn was carried off by one of the representatives of the Japanese stable *San-no-he*, after a well contested race with Mr. Robertson's *Othello*, in 1 min. 24 secs.

3.—THE LUSITANIAN CUP.

Presented, value \$. For all Ponies. Weight as per scale. Entrance \$5. Three quarters of a mile.

Mr. Fiddle de Dee's <i>Braemar</i> , g.c., 10st. 8lbs.	1
Mr. W. Fairplay's <i>C. Mongolian</i> , g.c., 10st. 11lbs.	2
Mr. Riyoshi's <i>The Snark</i> , c.c.	3
Mr. Earnest's <i>Title Deed</i> , r.e.	0
Mr. Sinbad's <i>The Judge</i> , g.c.	0
Mr. Sinbad's <i>The Minister</i> , g.c.	0
Mr. Ola's <i>Mohatots</i> , bk.j.	0
Mr. Robertson's <i>Mandarin</i> (late <i>Cochecho</i>), g.c.	0
Mr. Robertson's <i>Dibs</i> , g.c.	0

Although this race was open for all ponies, Japan was unrepresented, except by *Mohatots*; the remaining ponies who confronted the starter were old favourites, out of which *Chief Mongolian*, *Braemar*, and the game little *Dibs* were reckoned the most probable to pass the judges' post first. An effort was made by the starters to get the ponies away on even terms, but their efforts were rendered futile by the fractiousness of the horses, and when they did go it was to a very bad start. *Braemar* got away with the lead and made the best of it. Just before reaching the trees, however, *Chief Mongolian* went through his horses and challenged the leader. An exciting race up the hill followed, the representative of Mr. Fairplay's stable having a slight lead. On entering the straight, *Braemar's* rider called on the pony and he answered to the appeal by at once rushing to the front. The *Chief* was put under the lash but compelled to accept second place. The *Snark* who had been running well, came in a good third.—Time 1.38½.

The "Lusitanian Cup," which was the third race on the programme last Autumn, was won by *Mandarin* with *ense*, *Title Deed* being second. The time on that occasion was 1 m. 39 secs.

4.—THE PROFESSIONAL CUP.

Presented, value \$. For Japan Ponies. Winners of any open Race excluded. Weight for inches. Entrance \$5. Half a mile.

Mr. D. de Ding Dong's <i>Jim Hills</i>	1
Dr. Buckle's <i>Spendthrift</i>	2
Mr. Fiddle de Dee's <i>Distemper</i>	3
Mr. Ola's <i>Moscou</i>	0
Mr. E. Jaffray's <i>Exile</i>	0
Mr. Robertson's <i>Nick</i>	0
Mr. Robertson's <i>Doctor</i>	0
Mr. W. Fairplay's <i>Heimin</i> (late <i>Stalemate</i>) 10st. 8lbs.	0

The "Professional Cup" took the place of the "Club Cup" run for in the Autumn of last year, and the distance was reduced from five furlongs to half a mile. On that occasion only *Doctor* and *Moscou* competed, when the latter won in 1 min. 21½ secs. To-day all the ponies entered for the event started. *Spendthrift* went away with the lead at a rattling pace, with *Moscou* and *Jim Hills* close up. Up the hill, *Jim Hills* ran up to the leader, but shortly afterwards apparently collapsed, and took third place. Down the straight, *Moscou* challenged Dr. Buckle's pony, but could not manage to wrest the lead from him. When about 150 yards from the post, *Jim Hills*, whom it was thought had shut up, came with a rush and was cleverly landed a winner, by half a length, of the best contested race, so far, of the day. Time, 63½ secs.

5.—THE ASSOCIATION CUP.

Presented, value \$100. For China Ponies. Weight for inches. Entrance \$5. One mile and a half. To be won by a Pony the *bona fide* property of a member of the Association at the date of presentation.

Mr. Robertson's <i>Dibs</i>	10st. 8lbs...	1
Mr. Sinbad's <i>The Raven</i>	10st. 8lbs...	2
Mr. Earnest's <i>Trustee</i>	10st. 5lbs...	3
Mr. W. Fairplay's <i>Mongolian Owl</i> , 10st. 5lbs.		0
Mr. W. Fairplay's <i>S. Mongolian</i>	9st. 13lbs...	0

Five ponies contested this event, and all got well away together with the exception of *Mongolian* who was left at the post and did not start until the others were nearly a hundred yards on their way. His stable companion, *Mongolian Owl*, cut out the running, with *Trustee* second, *The Raven* third and *Dibs* running an easy fourth. This position remained unchanged until passing the Stand, when the black pony passed *Trustee* and in the hollow assumed the lead, the *Mongolian Owl*, having shot his bolt, soon after subsided to the rear. Mr. Sinbad's pony, by the time he reached the five furlongs, had put a few lengths between him and *Trustee*. *Dibs* was on the quarters of latter and looking dangerous. At the half mile Mr. Earnest's pony gave place to *Dibs*, who was rapidly lessening the distance between him and the black. The latter was evidently doing his best, and it became apparent that he would have to succumb to the grey. The hill proved too much for him and *Dibs* went to the front and was never afterwards collared. *Trustee* was a good third. The *Mongolians* gave up. Time, 3.32½.

The Cathaya Cup, which was the first and only mile and a half race at the last meeting, was won by Mr. Whitney's *Sequin*, in a field of five, in 3 min. 30½ secs. By the by, one mile and a half races do not appear to be in favour with our sporting community as we observe that in the last meeting of the Y. R. C. there was not a single race of that distance.

6.—THE AKINDO CUP.

Presented, value \$. For Japan Ponies. Weight for inches. Entrance \$5. Three quarters of a mile.

Don Carlos' <i>Kickapoo</i> (late <i>Kangaroo</i>), 10st. 8lbs.	1
Mr. D. de Ding Dong's <i>Typhoon</i> 10st. 2lbs...	2
Mr. Robertson's <i>Oyama</i>	10st. 2lbs... 3

This was a splendid race and resulted in a take in for the knowing ones. The old pony *Typhoon* started as first favourite, and he seemed to be in as good fettle and as plucky as ever. *Oyama* ranked next in the estimation of the spectators, while the rather awkward looking *Kickapoo* had but few friends. He will have more in future. As an exception to the rule of the day, the start was a good one. The ponies, however, soon singled out in Indian file, with the favourite in the van, closely followed by *Oyama* and *Kickapoo* bringing up the rear. This position was maintained until the trees were reached, though the ponies had got closer together. Ascending the hill a blanket would have covered the three. Mr. Robertson's pony now fell back and gave place to *Kickapoo*, who hung tenaciously on the girths of the favourite. Down the straight a most exciting race took place, the two ponies running neck and neck, but eventually *Kickapoo* contrived to reach his nose slightly in advance of *Typhoon*, and was declared the winner. Time, 1 min. 39 sec.

7.—THE HACHI-BAN CUP.

First Prize, Presented, value \$100. For China Ponies. Winners of three Races in

Japan, in 1876, to carry 12 stone 10 lbs. Winners at this meeting, 12 stone; other Ponies, weight for inches. Entrance \$5. One mile and a quarter.

Mr. Douglas' <i>Crusader</i>	10st. 5lbs ..	1
Mr. W. Fairplay's <i>Mongolian Chief</i> , 10st. 8lbs.		2
Mr. Robertson's <i>Favori</i>	10st. 5lbs...	3
Mr. Earnest's <i>Raethia</i> (late <i>Ta Phairson</i>) {		0
10st. 5lbs.		0
Mr. Sinbad's <i>Antidote</i>	10st. 8lbs...	0
Mr. Sinbad's <i>The Dwarf</i>	9st. 13lbs ..	0
Mr. R. Jaffray's <i>Satisfaction</i>	10st. 5lbs...	0
Mr. Riyoshi's <i>Sovereign</i>	10st. 11lbs.	0
Mr. Robertson's <i>Gladiateur</i>	10st. 11lbs.	0

A good field came out to contest the Hachi-Ban Cup. Some difficulty was experienced on starting, but eventually the ponies got off pretty evenly and for the distance they had to run, at a hot pace. Passing the stand three ponies were racing neck and neck, the others close up with the exception of *Favori*, whose Jockey was evidently riding a waiting race. At the five furlongs *Favori* went through the ruck and challenged the three ponies who were racing together in front. From this out the race was well contested, *Crusader* finally winning by a short distance. Time 2 min. 54½ secs.

8.—THE CLUB GERMANIA CUP.

First Prize, Presented, value \$. For Japan Ponies. Winners of two Races at any previous meeting, 12-lbs. extra; other winners, 8-lbs. extra. Weight for inches. Entrance \$5. Five furlongs.

Mr. D. de Ding Dong's <i>Jim Hills</i> 10st. 4lbs ..	1
Mr. Robertson's <i>Moor</i>	10st. 2lbs... 2
Mr. Ola's <i>Mohstolz</i>	10st. 6lbs... 3
Dr. Buckle's <i>Sandboy</i>	10st. 4lbs... 0
Count Tristan's <i>Daimio</i>	10st. 6lbs... 0
Mr. Robertson's <i>Rebel</i>	10st. 6lbs... 0

The Club Germania Cup this year has been divided into two events, one for Japan ponies and the other to be run to-morrow for China ponies. Last Autumn this race was the opening one of the meeting, and was only for China ponies. The distance was a mile; and the race was carried off by *Favori* in 2 m. 19½ seconds. For this event to-day six started; Mr. Robertson's pair took the lead and raced neck and neck until the straight was reached. *Jim Hills* who did not get off very well was running fifth, but before the summit of the hill was gained he had lessened the distance between him and the leading ponies. Down the straight the race was severely contested by *Oyama*, *Mohstolz* and *Jim Hills*. The latter by an extra effort winner by a neck; the same distance intervening between the second and third ponies. Time, 1m. 21½ sec.

9.—THE CELESTIAL CUP.

Presented, value \$. For China Ponies, being *bona fide* Griffins at date of meeting; winners at this meeting excluded. Weight for inches. Entrance \$5. Half a mile.

Mr. Peter's <i>Skeldadlle</i>	10st. 2lbs ..	1
Mr. W. Fairplay's <i>Mongolian Wolf</i> , 10st. 2lbs.		2
Mr. Earnest's <i>Bébé</i>	10st. 2lbs...	0
Mr. Sinbad's <i>The Sheikh</i>	10st. 2lbs...	0
Mr. Sinbad's <i>The Consul</i>	10st. 2lbs...	0
Mr. Ola's <i>Maccaroni</i>	10st. 8lbs ..	0
Mr. R. Jaffray's <i>Dusty Miller</i>	10st. 5lbs...	0
Mr. Riyoshi's <i>The Snark</i>	10st. 8lbs...	0
Mr. Riyoshi's <i>The Boojum</i>	10st. 2lbs...	0
Mr. Robertson's <i>Tennessee</i>	10st. 2lbs...	0
Mr. Robertson's <i>Bravo</i>	10st. 5lbs...	0
Mr. Robertson's <i>Chance</i>	10st. 2lbs...	0
Don Carlos' <i>Telegram</i>	9st. 13lbs...	0

The last event of the day brought out the largest number of competitors and resulted in a pony winning who it was thought before the start, did not stand the shadow of a chance. The race was closely contested, *Skeldadlle* who had a Japanese mount, winning. Time 62½.

Last Autumn the Celestial Cup was carried off by *Dibs*, carrying 11st. 7lbs., without any special effort, and completing the distance, one mile and a quarter, in 3 min 06 secs.

Second Day—Thursday, May 17th.

THE exceedingly pleasant weather ensured a large gathering of the beauty and fashion of Yokohama and Tokio on the second day of the Race Association's meeting. The fine band of the *Tennessee* was again in attendance. The fractiousness of *Mongolian Lamb* caused him to be withdrawn from all his engagements after his escapade in the COMMUNITY CUP.

1.—THE COMMUNITY CUP.

Presented, value \$150. For all Ponies. Weight as per scale. Entrance \$5. One mile.

Mr. Fiddle de Dee's <i>Braemar</i> , g.c. 10st. 8lbs...	1
Mr. Robertson's <i>Dibs</i> , g.c... 10st. 8lbs...	2
Mr. Fiddle de Dee's <i>Lintie</i> , g.c... 10st. 2lbs...	3
Mr. Fiddle de Dee's <i>Tallapoosa</i> , d.c., 10st. 8lbs.	0

The Community Cup last Autumn was run for over a mile and a quarter course, and was carried off in the commonest of canter by Mr. Robertson's *Dibs* in 3 m. 06 secs. In this meeting the distance was reduced to a mile, and the race was carried off by a different stable. In a longer race the winner of this event last Autumn would have stood a better chance to-day; as it was, he gave the winner all he could do to win. As in the first event yesterday, Mr. Fairplay's *Mongolian Lamb* was entered, but he again threw his rider, in the saddling paddock, who had a very narrow escape, the pony kicking him in the mouth; fortunately the blow was a light one. With a recommendation to be shot, the pony was reconducted to his stable. The field was now reduced to four ponies, the tartan colours being favourites. The start was fair and *Braemar* immediately cut out the running with his stable companion *Lintie* on his quarters, *Dibs* third, with *Tallapoosa* at his girths. No change took place till the half mile was reached, when *Tallapoosa* ran level with *Dibs*, who put on more steam and lessened the gap between him and the leading ponies. When the trees were reached *Dibs* was called upon, and passed *Lintie*. *Braemar* was still leading, and finding *Dibs* so close upon him his rider put him to his utmost speed, and a splendid race down the straight resulted in his winning by nearly a length. Time 2.14.

2.—THE SILK CUP.

Presented, value \$. For Japan Ponies that have never won a race. Weight for inches. Entrance \$5. Half a mile.

Major Arda's <i>Monarque</i>	10st. 6lbs...	1
Mr. Robertson's <i>Moor</i>	10st. 2lbs...	2
Mr. Robertson's <i>Rebel</i>	10st. 6lbs...	3
Dr. Buckle's <i>Sorcerer</i> (late <i>Moh-ichido</i>), {		0
10st. 8lbs.		0
Count Tristan's <i>Daimio</i>	10st. 6lbs...	0
Mr. R. Jaffray's <i>Ecile</i>	10st. 4lbs...	0
Mr. R. Jaffray's <i>Professional</i>	10st. 4lbs...	0
Mr. W. Fairplay's <i>Shizoku</i>	9st. 12lbs...	0
Mr. Alexander's <i>Griffin</i>	10st. 0lb...	0
Mr. D. de Ding Dong's <i>Young Rapi</i> , 10st. 0lb.		0

At the last meeting of the Association the Silk Cup was one of the most valuable races, a handicap open for all ponies, and was won by *The Judge* after a splendid struggle with *Mandarin*. The course was one mile and time 2 m. 20 secs. To-day it was exclusively for Japan ponies. This event should have come off at one o'clock; but was delayed until 1.40. The first start was false. One of the ponies could not be pulled up until

he passed the stand; another ran nearly the same distance before being brought to obedience, and a third threw his rider. This caused a further delay of some minutes. At length they were got off, though very badly. The race resulted in a victory for *Monarque*, with Mr. Robertson's two ponies second and third. Time—62 secs.

3.—THE MITSU BISHI CHALLENGE CUP.

Presented, value \$200. To be won at two consecutive meetings by a Pony or Ponies, the *bona fide* property of the same owner or owners; to be held by the last winner at each meeting until finally won. For China Ponies. Weight for inches. Entrance \$5. One mile and three quarters.

Mr. W. Fairplay's <i>Mong'ln Chief</i> , 10st. 8lbs...	1
Mr. Robertson's <i>Dibs</i> 10st. 8lbs...	2
Mr. Fiddle de Dee's <i>Braemar</i> ... 10st. 8lbs...	3
Mr. Earnest's <i>Trustee</i> 10st. 5lbs...	0
Mr. Sinbad's <i>The Dwarf</i> 9st. 13lbs...	0

The result of this race was most unexpected, as it was generally thought it would lie between *Dibs* and *Braemar*. At the start *The Dwarf* showed in front for a short space and then was passed by *Braemar*, *Dibs* third, *Mongolian Chief* fourth. After passing the trees *The Dwarf* went once more to the front, and the *Mongolian* came up alongside of him. Passing the stand, the two were running neck and neck and *Braemar* half a length behind with *Dibs* close up; several lengths separating *Trustee* from the others. In the hollow *Mongolian Chief* took the lead, *Braemar* running second and *Dibs* a good third, and this order was maintained until the trees were reached when the three ponies got so close together that it was difficult to distinguish which was first. On entering the straight, however, *Mongolian Chief* was seen to be still in front, *Dibs* second. The run in was a capital one, *Dibs* coming up well at the finish, losing by a bare half length. Time 4.10.

4.—THE LADIES' PURSE.

Presented by the Ladies of Yokohama and Tokio, value \$. For all Ponies. Weight as per scale. Entrance \$5. Half a mile.

Mr. W. Fairplay's <i>Chief Mong'ln</i> d.c. 10st. 11lbs	1
Mr. Riyoshi's <i>The Snark</i> , c.c. 10st. 8lbs...	2
Mr. R. Jaffray's <i>Dusty Miller</i> s.c. 10st. 5lbs...	3
Mr. Earnest's <i>Title Deed</i> , r.c. ... 10st. 5lbs...	0
Mr. Sinbad's <i>Davenport</i> , g.c. ... 10st. 11lbs...	0
Mr. Sinbad's <i>Antidote</i> , g.c. ... 10st. 8lbs...	0
Mr. Riyoshi's <i>The Boojum</i> , g.c. ... 10st. 2lbs...	0
Mr. Robertson's <i>Mandarin</i> , g.c. 10st. 5lbs...	0
Mr. Robertson's <i>Tennessee</i> g.c. ... 10st. 2lbs...	0

After one false start the lot got away very badly. *The Snark* appeared in front, but was not permitted to hold that honourable place long, for *Chief Mongolian* came through his ponies with a rush and challenged the leader who immediately gave place to the dun, who won easily; *The Snark* second and *Dusty Miller* a good third. Time 60½ secs.

After the race the rider was presented to Mrs. ALEXANDER CENTER, and received the congratulations and approval of the ladies of Yokohama and Tokio, and in addition a delicate specimen of fancy work substantially lined.

The grateful recipient murmured the customary thanks in which the words "honour," "happiness," "sincere," "delighted," &c., held their usual places.

5.—THE NAVAL CUP.

Presented, value \$. For all Ponies, being *bona fide* Hacks and that have never won a flat or a hack race. Ponies entered are disqualified from entering for any other race at the meeting except for Nos. 1 and 6

on the third day. Weight as per scale. Entrance \$5. Three quarters of a mile.

Mr. Alexandre's <i>Luck's All</i> b.j. ... 10st. 2lbs...	1
Mr. Alexandre's <i>Petitpas</i> , ... 10st. 5lbs...	2
Mr. Riyoshi's <i>Doncaster</i> c.c. ... 10st. 5lbs...	3

Doncaster was the favourite for this race, but in the contest he proved to be deficient in bottom. He went away with the lead but was soon collared by *Petitpas*, and after passing the trees fell into second place and shortly after to the third. *Petitpas* now was leading but in the straight was forced to succumb to *Luck's All*, who won easily. Time, 1.41½.

6.—THE HACHI-BAN CUP.

Second Prize. Presented, value \$100. For China Ponies. Winners of three flat Races in Japan, 12 stone 7 lbs.; of No. 1 this day, and of two races at this meeting, 11 stone 7 lbs.; and of one race and non-competitors at this meeting, 7 lbs. extra. Weight for inches. Entrance \$5. One mile and a quarter.

Mr. Fiddle de Dee's <i>Hoolet</i> (late <i>Hoozee</i>) } 10st. 8lbs. }	1
Mr. W. Fairplay's <i>Mongolian Wolf</i> 10st. 2lbs.	2
Mr. Sinbad's <i>The Raven</i> 10st. 8lbs...	3
Mr. Robertson's <i>Favori</i> 10st. 5lbs...	0

Four ponies only came to the post *Hoolet* being the favourite. A very good start was effected, *Favori* taking the lead. Before the stand was reached, the favourite deprived Mr. Robertson's pony of first place; *Mongolian Wolf* third, and *The Raven* bringing up the rear. No change occurred until reaching the five furlongs, when *Favori* spurred and went to the front, but *Hoolet* soon collared and passed him. Opposite the trees, *Mongolian Wolf* challenged the leader and raced him neck and neck for some distance, but in the run in, the favourite came away easily and won hands down; the *Wolf* second, *Raven* third and *Favori* last. Time, 2 min. 54 secs.

7.—THE LEDGER CUP.

Presented, value \$. For Japan Ponies. Winners of any open race 12 lbs. extra: other winners 7 lbs. extra. Weight for inches. Entrance \$5. Three quarters of a mile.

Mr. D. de Ding Dong's <i>Jim Hills</i> 10st. 4lbs...	1
Mr. Robertson's <i>Moor</i> 10st. 2lbs...	2
Don Carlos' <i>Kickapoo</i> (late <i>Kangaroo</i>) 10st. 8lbs.	3
Dr. Buckle's <i>Sorcerer</i> (late <i>Moh-ichido</i>) } 10st. 8lbs. }	0
Dr. Buckle's <i>Spendthrift</i> 10st. 8lbs...	0
Mr. W. Fairplay's <i>Shizoku</i> 9st. 12lbs...	0

A false start sent *Shizoku* a gallop on his own account, nearly reaching the Stand before being pulled up. As soon as the runaway returned to the starting post another attempt to get the ponies off was more successful. Dr. Buckle's colours showed to the fore, but before half the distance was traversed *Sorcerer* gave way to better ponies. The *Moor* led into the straight with *Jim Hills* close up, both ponies being severely punished. The struggle was a tight one, the *Moor* holding his own gallantly until just on the post when *Jim Hills* contrived to put his head in front and won. Time, 1.38½.

8.—THE TOKIO CUP.

Presented, value \$. For China Ponies. Non-competitors and winners at this meeting excluded. Weight for inches. Entrance \$5. Three quarters of a mile.

Mr. Fiddle de Dee's <i>Lintie</i> ... 10st. 2lbs...	1
Mr. Robertson's <i>Favori</i> 10st. 5lbs...	2
Mr. W. Fairplay's <i>S. Mongolian</i> 9st. 13lbs...	3
Mr. Earnest's <i>Raethia</i> (late <i>Ta Phairson</i>), } 10st. 5lbs. }	0
Mr. Sinbad's <i>The Judge</i> 10st. 8lbs...	0
Mr. Robertson's <i>Mandarin</i> ... 10st. 5lbs...	0
Mr. Riyoshi's <i>The Snark</i> 10st. 8lbs...	0
Mr. Ola's <i>Maccaroni</i> 10st. 8lbs...	0

This event was won by *Lintie* after a well contested race with *Favori*; the latter got off very badly at the start and had to recover much lost ground. He struggled gallantly, but notwithstanding his efforts, he had to accept second place, a length behind *Lintie*. Time—1 min. 38½ secs.

9.—THE CLUB CUP.

Presented, value \$. For Japan Ponies. Non-competitors and winners at this meeting excluded. Weight for inches. Entrance \$5. Five furlongs.

Mr. Robertson's <i>Oyama</i> 10st. 2lbs...	1
Mr. R. Jaffray's <i>Professional</i> ... 10st. 4lbs...	2
Mr. R. Jaffray's <i>Exile</i> 10st. 4lbs...	0
Mr. Robertson's <i>Nick</i> 10st. 0lb...	0
Mr. Robertson's <i>Doctor</i> 10st. 6lbs...	0
Mr. W. Fairplay's <i>Shizoku</i> 9st. 12lbs...	0
Mr. Ola's <i>Mohstots</i> 10st. 6lbs...	0
Count Tristan's <i>Daimio</i> 10st. 6lbs...	0
Dr. Buckle's <i>Sandboy</i> 10st. 4lbs...	0

Soon after the start for this event an accident occurred which threw two of the horses out of the race. *Professional* crossed in front of *Sandboy* and caused him to collide with *Nick* so severely that both Dr. Buckle and Mr. Herhausen, their riders, were thrown. The latter was on his feet instantly, having escaped injury, but the former was not so fortunate as he had a shoulder dislocated. The race was won easily by *Oyama*. Time, 1.20.

10.—THE CLUB GERMANIA CUP.

Second Prize, Presented, value \$. For China Griffins at date of meeting. Winners excluded. Weight for inches. Entrance \$5. One mile.

Mr. Sinbad's <i>The Sheik</i> 10st. 2lbs...	1
Mr. Riyoshi's <i>The Boojum</i> 10st. 2lbs...	2
Mr. Robertson's <i>Chance</i> 10st. 2lbs...	3
Mr. Earnest's <i>Bébé</i> 10st. 2lbs...	0
Mr. Sinbad's <i>The Consul</i> 10st. 2lbs...	0
Mr. R. Jaffray's <i>Satisfaction</i> ... 10st. 5lbs...	0
Mr. Robertson's <i>Sport</i> 10st. 5lbs...	0
Mr. Robertson's <i>Bravo</i> 10st. 5lbs...	0
Don Carlos' <i>Telegram</i> 9st. 13lbs...	0

The last event of the day was won by Mr. Sinbad's *Sheik* in a field of nine, to the surprise of nearly every one. It was nearly dark when the race was run and therefore impossible to observe the changes which took place in the positions of the ponies. Time, 2 min. 18 secs.

Third Day—Friday, May 18th.

1.—THE HURDLE RACE.

Value \$75. For all Ponies. Over six (6) hurdles. Weight as per scale. Entrance \$5. Once round and a distance.

Mr. Robertson's <i>Doctor</i> , bk.j. ... 10st. 6lbs...	1
Mr. R. Jaffray's <i>Satisfaction</i> , b.c. 10st. 5lbs...	2
Mr. Riyoshi's <i>Doncaster</i> , c.c. ... 10st. 5lbs...	3
Mr. Sinbad's <i>Antidote</i> , g.c. ... 10st. 8lbs...	0
Mr. Robertson's <i>Tim Whiffler</i> , bk.j. 10st. 12lbs.	0
Mr. W. Fairplay's <i>Mongolian Owl</i> , g.c. } 10st. 5lbs }	0
Don Carlos' <i>Kickapoo</i> (late <i>Kangaroo</i>), b.j. } 10st. 8lbs }	0

Antidote declared 5 lbs. overweight. *Satisfaction* was the first on the course, and from the manner in which he took his preliminary jump gained a few friends, though his chance of winning was generally considered to be small. *Tim Whiffler* and *Kickapoo* were the favourites, but in the race neither were placed. All the ponies took their leaps well, and on passing the three quarter mile *Tim* led. In jumping the next hurdle, however, he nearly unseated his rider. From this either the pony or his jockey seemed to lose courage as he got all behind. Several changes took place; once *Doctor* was seen ahead, then

Doncaster, then the black again went to the front and eventually won a good race by a length and a half from *Satisfaction*, who came up well at the finish, and but for landing awkwardly at the last hurdle, would probably have carried off the event. *Doncaster* was third, and *Tim Whiffler* fourth.

2.—THE CONSULAR CUP.

Presented, value \$. For all Ponies. Weight as per scale. Entrance \$5. Three furlongs.

Mr. W. Fairplay's <i>Chief Mongolian</i> , d. c. } 10st. 11lbs	1
Mr. Fiddle de Dee's <i>Mavis</i> , br. c., 10st. 8lbs...	2
Mr. R. Jaffray's <i>Professional</i> , c. j., 10st. 4lbs...	3
Mr. Earnest's <i>Raethia</i> (late <i>Ta Phairson</i>), } g. c., 10st. 5lbs	0
Mr. Sinbad's <i>Antidote</i> , g. c., ... 10st. 8lbs...	0
Mr. R. Jaffray's <i>Exile</i> , bk. j. ... 10st. 4lbs...	0
Mr. Robertson's <i>Mandarin</i> , g. c., 10st. 5lbs...	0
Mr. Robertson's <i>Tennessee</i> , g. c., ... 10st. 2lbs...	0

Much time was lost in getting the ponies away; and after all the start was a bad one. *Mavis* got the best of it with *Professional* running him closely. The dun, however, soon ran through his horses and won with ease, beating *Mavis* by a couple of lengths. *Professional* was a good third. Time, 47 secs.

3.—THE OWNERS' CUP.

Presented, value \$. For all China Griffins beaten at the meeting. Weight for inches. Entrance \$5. Three quarters of a mile.

Mr. Robertson's <i>Chance</i> , br. c., ... 10st. 2lbs...	1
Mr. Robertson's <i>Bravo</i> , g. c. ... 10st. 5lbs...	2
Don Carlos's <i>Telegram</i> , g. c. ... 9st. 13lbs...	3
Mr. Robertson's <i>Tennessee</i> , g. c., ... 10st. 2lbs...	0
Mr. Robertson's <i>Sport</i> g. c., ... 10st. 5lbs...	0
Mr. Sinbad's <i>The Consul</i> , g. c. ... 10st. 2lbs...	0
Mr. Ola's <i>Maccaroni</i> , g. c. ... 10st. 8lbs...	0
Mr. R. Jaffray's <i>Dusty Miller</i> , s. c., 10st. 5lbs...	0
Mr. Riyoshi's <i>The Snark</i> , c. c. ... 10st. 8lbs...	0

This race resulted in a victory for Mr. Robertson's stable, which was well represented. The race was a very good one though it was evident that *Chance* could have won by a longer distance than he did. The only pony which threatened to wrest the laurel from Mr. Robertson's ponies, was *Telegram*, who lost much ground at the start through his fractiousness, though he made a very respectable third. Time, 1 minute 43½ seconds.

4.—THE SPRING STAKES.

For China Ponies. Compulsory on winners on 1st and 2nd days at this meeting. A sweepstakes of \$10 with \$5 extra for every race won at this meeting. Open also to Ponies placed second, at an entrance fee of \$5 to go to the fund. Entries to be made on the course at the close of the second day's racing. 1st Pony to receive 75 per cent; 2nd Pony, 25 per cent. Weight for inches. One mile and a quarter.

Mr. Fiddle de Dee's <i>Braemar</i> ... 10st. 8lbs...	1
Mr. Fiddle de Dee's <i>Hoolet</i> ... 10st. 8lbs...	2
Mr. Robertson's <i>Dibs</i> ... 10st. 8lbs...	3
Mr. Douglas's <i>Crusader</i> ... 10st. 5lbs...	0
Mr. Peter's <i>Skeddadle</i> ... 10st. 2lbs...	0
Mr. W. Fairplay's <i>Mongolian Chief</i> , 10st. 8lbs...	0

From his running on Thursday *Dibs* was thought most of for this event, especially as the course was very heavy; though, in fact, all the ponies, with the exception of *Skeddadle*, had numerous friends. *Crusader* took up the running at the start, with the others close to him, and kept the lead to the half mile. Then *Dibs* and *Hoolet* ran up to the leader, the first named showing in front for a brief space, but *Hoolet* snatched it from him; again *Dibs* made an effort and got slightly in advance of the white pony. On entering the straight however, *Hoolet* shook himself free of his tenacious neighbour. *Braemar* who had been

lying back now came with a rush and beat *Dibs* and *Hoolet* on the post. Time, 2 min. 55 secs.

5.—THE NIPHON STAKES.

For Japan Ponies. Compulsory on winners on 1st and 2nd days at this meeting. A sweepstakes of \$10 with \$5 extra for every race won at this meeting. Open also to Ponies placed second, at an entrance fee of \$5 to go to the fund. Entries to be made on the course at the close of the second day's racing. 1st Pony to receive 75 per cent; 2nd Pony, 25 per cent. Weight for inches. One Mile.

Mr. D. de Ding Dong's <i>Typhoon</i> , 10st. 2lbs...	1
Don Carlos <i>Kickapoo</i> ... 10st. 8lbs...	2
Mr. Robertson's <i>Oyama</i> ... 10st. 2lbs...	3
Mr. Douglas's <i>The Crescent</i> ... 10st. 2lbs...	0
Mr. Robertson's <i>Nick</i> ... 10st. 2lbs...	0
Mr. W. Fairplay's <i>Shizoku</i> ... 9st. 12lbs...	0
Dr. Buckle's <i>Spendthrift</i> ... 10st. 8lbs...	0

Typhoon was a decided favourite for this event, and well sustained the confidence reposed in him. At the start *The Crescent* got all behind, and after going a short distance pulled up. *Spendthrift* raced to the five furlongs, then showing a perceptible inclination for the rails, was pulled up. The race was now left to the other five, or, more correctly speaking, to four of the ponies, for *Shizoku* was hopelessly in the rear. Just before the trees were reached, *Typhoon* and *Kickapoo* went up level with Mr. Robertson's ponies, who had been running first and second, and an exciting struggle commenced. The favourite, however, soon shook himself free of his competitors and entered the straight with a good lead, which he increased in the run in. *Kickapoo* second, and *Oyama* third. Time, 2 min. 19¾ secs.

6.—THE TITLE DEED PLATE,

with \$50 added.

A Handicap for China Griffins having run at this meeting, to be handicapped by the Stewards at the close of the second day's racing. Winners of any race after the publication of the handicap 3 lbs. extra. Entrance \$10. One Mile.

Mr. Robertson's <i>Chance</i> ... 10st. 10lbs...	1
Mr. Sinbad's <i>The Sheik</i> ... 10st. 2lbs...	2
Mr. Sinbad's <i>The Dwarf</i> ... 9st. 10lbs...	3
Mr. W. Fairplay's <i>Mong'ln Wolf</i> 10st. 10lbs...	0
Mr. Riyoshi's <i>The Boojum</i> ... 10st. 8lbs...	0
Mr. Sinbad's <i>The Consul</i> ... 10st. 8lbs...	0
Mr. Robertson's <i>Sport</i> ... 10st. 5lbs...	0
Mr. R. Jaffray's <i>Satisfaction</i> ... 10st. 5lbs...	0

This was one of the prettiest races notwithstanding *Chance* ultimately won with ease. *Satisfaction* made the running for some distance and looked dangerous. However when the others put on all speed he collapsed. The race after passing the trees until entering the straight was so closely contested that it could not be seen with any degree of certainty which pony was first. *The Sheik* and his stable companion with *Chance* alongside, came out of the ruck. The brown pony, however, when close home was called on by his rider and instantly went to the front, winning hands down. Time 2 minutes 21 seconds.

7.—THE TOKIO AND YOKOHAMA BANKERS' CUP.

Presented, value \$. For all beaten China Ponies at this meeting. Weight for inches. Entrance \$5. Once round and a distance.

Mr. Fiddle de Dee's <i>Tallapoosa</i> , 10st. 8lbs...	1
Mr. Robertson's <i>Favori</i> ... 10st. 5lbs...	2
Mr. Robertson's <i>Bravo</i> ... 10st. 5lbs...	3
Mr. Earnest's <i>Pile</i> ... 10st. 2lbs...	0
Mr. Sinbad's <i>The Raven</i> ... 10st. 8lbs...	0
Mr. Sinbad's <i>The Minister</i> ... 10st. 5lbs...	0
Mr. Robertson's <i>Gladiator</i> ... 10st. 11lbs...	0
Mr. Robertson's <i>Mandarin</i> ... 10st. 5lbs...	0
Mr. W. Fairplay's <i>South Mongolian</i> , 9st. 13lbs...	0

When *Mandarin* was brought on the course a dog—a number of these animals were on the course—ran through his legs and frightened him so that he became perfectly unmanageable and bolted all round the course at a hard gallop. This escapade reduced his chance of winning to a minimum. He started but was nowhere. *Tallapoosa* was the favourite for this event, and though he allowed some of the other ponies to get several lengths in advance, when the straight was entered he came away and won as he liked. Time, 2.37.

8.—THE VISITORS' CUP.

Value \$. For all beaten Japan Ponies at this meeting. Weight for inches. Entrance \$5. Five furlongs.

Mr. Robertson's <i>Moor</i> ... 10st. 2lbs...	1
Dr. Buckle's <i>Sandboy</i> ... 10st. 4lbs...	2
Mr. Fiddle de Dee's <i>Distemper</i> ... 10st. 6lbs...	3
Count Tristan's <i>Daimio</i> ... 10st. 6lbs...	0
Mr. R. Jaffray's <i>Exile</i> ... 10st. 4lbs...	0
Mr. R. Jaffray's <i>Professional</i> ... 10st. 4lbs...	0
Mr. Robertson's <i>Nick</i> ... 10st. 4lbs...	0
Mr. Robertson's <i>Rebel</i> ... 10st. 6lbs...	0

Moor got off well at the start and was never collared, though *Sandboy* pushed him well at the finish. *Professional* got a dozen lengths in the rear at the start, but ran a good fourth, and with a good start would most probably have past the post first. Time, 1 min. 21½ secs.

9.—THE ORIENTAL CUP.

Value \$100. A Handicap for all Ponies. To be handicapped by the stewards at the close of the second day's racing, when entries will be received. Winners of Nos. 4 and 5 of this day excluded, and winners of any other race after the publication of the handicap 3-lbs. extra. Entrance \$10. Second Pony to save entrance fee. One mile.

Mr. Fairplay's <i>Chief Mong'ln</i> , d. c., 11st. 12lbs...	1
Mr. Robertson's <i>Oyama</i> , bk. j. p., 10st. 12lbs...	2
Mr. Robertson's <i>Favori</i> , g. c., ... 11st. 10lbs...	3
Mr. Robertson's <i>Dibs</i> , g. c., ... 12st. 5lbs...	0
Mr. Sinbad's <i>The Raven</i> , bk. c., ... 10st. 8lbs...	0
Mr. Sinbad's <i>The Judge</i> , g. c., ... 11st. 4lbs...	0
Mr. Earnest's w. <i>Trustee</i> , c. p., ... 11st. 0lbs...	0
Mr. R. Jaffray's <i>Satisfaction</i> , b. c. p., 10st. 6lbs...	0
Mr. Sinbad's <i>Davenport</i> , g. c. p., 10st. 6lbs...	0

The last event on the programme brought a good field before the starter. *Dibs* was a strong favourite, though the great weight he had to carry proved too much for him to win with. *Chief Mongolian* took the lead shortly after starting and was never headed, winning by a length from *Oyama*. A neck separating second and third horses. Time, 2.19.

BETTOES' RACE.—For China Ponies. One mile.

<i>Antidote</i>	1
<i>Bébé</i>	2
<i>Mandarin</i>	3
<i>Doncaster</i>	0
<i>Tennessee</i>	0
<i>The Raven</i>	0

BETTOES' RACE.—For Japan Ponies. Five furlongs.

<i>Nick</i>	1
<i>Kickapoo</i>	2
<i>Daimio</i>	3
<i>Sandboy</i>	0
<i>Moor</i>	0
<i>Doctor</i>	0
<i>Tim Whiffler</i>	0

A PERSON named Heintz who was apprehended in Nagasaki and succeeded in escaping from the steamer on her arrival here on the morning of the 16th instant, was recaptured two days afterwards. At the preliminary hearing at H. N. M.'s Consulate, the prisoner was remanded for further investigation.

NAVAL BOAT RACE.

The race between the Admirals' barges of the British and American Flag-ships, *Audacious* and *Tennessee*, which was expected to result in a very exciting contest, came off on Saturday afternoon, 12th instant. The *Tennessee's* barge, *Magic*, is a sister boat to the celebrated barge *Daring*, and of the two, is considered the better. She is built of oak and cypress, and was constructed by the maker of the *Daring*. Her length is 31 feet 4 in. and breadth not quite 8 feet: she carries a crew of 14 men; and while as buoyant on the water as a duck she is easily manageable. The barge of the *Audacious* is a much heavier boat. She was built on purpose for the Prince of Wales when he visited Canada. Admiral Ryder was then Captain of the *Hero*, the vessel which conveyed the Prince; and on returning to England H. R. H. presented him with the boat. She is built in three watertight compartments, and is therefore a life-boat. Her dimensions are, length 36 feet 1 inch, breadth 8 feet 1 inch, depth 2 feet 5 in. weight two tons.

The present race was brought about through a challenge from the *Tennessee*, and was fixed to take place at five o'clock on Saturday afternoon. Much interest was evinced in the contest, both boats having raced before, though not together, and both being winners—the *Magic* having never been beaten. The *Audacious* barge was beaten once in Shanghai by a French boat, but carried all before her in Hongkong. Notwithstanding the roughness of the weather, quite a number of visitors congregated on the men-of-war, amongst whom was a fair average of ladies, to witness the contest. Others braved the perils of the water, and in sampans and open boats submitted patiently to be tossed up and down and to an occasional sprinkling of salt water. As the hour approached for starting, the sides of the merchant vessels and all the men-of-war were lined with anxious spectators; whilst those who could not get a satisfactory view on deck went aloft. By half-past four o'clock both boats were manned and on the water; the *Magic* being under the guidance of Geo. R. Willis, with a crew of fourteen men. The *Audacious* barge had a crew of sixteen men, with Basant coxswain. Two finer looking crews it would be difficult to find. All equally stout, healthy and hardy looking fellows, it would be difficult for a stranger to say, with any correctness, which of the two crews was the better; and as the two boats lay tossing about on the water it was not easy to distinguish which was the better of the two.

A strong north-westerly wind had been blowing all the afternoon, which was at its height by the time the boats were ready for starting, and consequently the water was very lumpy. Two boats were moored near the flag-ships between which were the starting and winning points. Finding that the preliminaries took rather longer than was anticipated, Willis, in order to prevent his men from fatiguing themselves, steered for the German frigate *Elizabeth*, and made the boat fast until everything was arranged, when he let go and steered for the starting point. An effort was made to get the contestants away on equal terms by means of a line drawn between the two moored boats, which, however, the high wind and roughness of the water rendered completely futile, and much time was lost in the attempt. At length it was resolved to start them without the line, which was accordingly done. The starter having got them well in line, hailed the coxswains, "Are you ready?" "Yes," was the response. The word "Go" was then given, and the oars

dipped simultaneously. A wild cheer came from hundreds of throats on the *Tennessee* which was echoed from the *Audacious* and other vessels. Frantic gesticulations were made by the excited tars as they sought to encourage the contending parties.

The race had now commenced; but a dozen yards had not been traversed ere the *Magic* showed her bows in front of her opponent, and it became evident that if she lost the race it would not be through neglecting to get well away at the start. Before the shipping was well cleared, however, she had established a lead of a couple of lengths, and it was there seen that she cut through the waves much cleaner than her competitor, who laboured heavily and shipped a deal of water. The crew of the *Audacious* started on forty-two strokes to the minute and the *Magic* on thirty-eight. As they neared the lightship, which was the turning point, making the course about three miles in length, the water became rougher and broke over the starboard bows of both barges. By this time the *Magic* had established a strong lead; and it was plainly visible that she would give the other a bad beating. She turned *Treaty Point* four minutes ahead of the *Audacious*, and made for home at the same speed she had been going, still rowing thirty-eight and still increasing her lead. The crew of the other boat still kept up their forty strokes to the minute, occasionally rowing at forty-four. The *Magic* had now got nearly half a mile of a lead, and won the race nearly seven minutes in advance of her competitor. Deafening cheers greeted both boats as they arrived; and Willis then took the *Magic* under the bows of the *Audacious*, *Elizabeth* and *Alert* and received cheering compliments from each of those vessels.

Lieutenant Goodrich, of the *Audacious*, acted as Starter and Judge; and an officer from each of the flagships accompanied the boats in the steam cutter of the *Audacious*, as Umpires. The time taken in traversing the course by the *Magic* was thirty-five minutes, which, however must not be taken as a criterion of what she can do the distance in, as the roughness of the water must be taken into consideration.

ANOTHER ACCOUNT.

The race between the barges *Magic* (14 oars) of the U. S. Flag ship *Tennessee*, and *Albert* (16 oars) of H. M. S. *Audacious*, for the championship of the Asiatic Station, came off on Saturday afternoon, and resulted in a remarkable victory for the American crew. Since our first announcement of the match, lively interest has been manifest both ashore and among the shipping, the *Audacious* being the favorite until Saturday morning, when the prospect of a calm day and smooth water encouraged the backers of the American boat to offer slight odds. Towards noon, however, a breeze sprung up, and as the wind rose *Tennessee* stock fell. At 4 o'clock a strong wind, varied by severe puffs, was blowing directly across the course, and, as a disagreeable swell was running, the Americans expressed a willingness to delay the race until 5.30, which was met by objections from the *Audacious* crew, who believing their chances more favorable in rough water were anxious to hurry the event on, and finally presented the ultimatum "4.30 or no race."

Although this was half an hour earlier than the time announced in the *Gazette* of Friday and would have deprived many visitors invited by the officers of the *Tennessee* and *Alert* of the pleasure of witnessing the race, the *Tennessee's* crew reluctantly assented rather than have the match declared off. Shortly after 4 o'clock the

Magic was lowered from the *Tennessee's* quarter, and at 4.35 both coxswains reported alongside of the Starter's boat to toss for choice of position. Arrangements had been made to start the contestants by the stern from a rope stretched between two cutters anchored near the Flag-ships; but, owing to the roughness of the water, this was found impracticable, and after much fruitless effort the plan was abandoned, and the boats were brought abreast in the trough of the sea on an imaginary line at right angles with the course. At 4.58 the Starter's flag fell, and considering the state of the water both crews got to work in fair shape, but from the first a vast difference was observed in the style of rowing displayed by the contestants. Notwithstanding the desire repeatedly expressed on the part of the *Audacious* for a heavy weather race their crew seemed totally unprepared for such an emergency; starting their boat in the trough of the sea on a quick jerky stroke numbering 42 to the minute, while their opponents gathered headway on the remarkably low stroke of 28, which, taking advantage of a temporary lull, they suddenly increased to 39 and made a rush for the lead which they easily gained, and immediately settled down to a long swinging gait of 36 which they maintained to the finish.

In less than five minutes the race was virtually decided. The coxswain of the *Magic* who had won the toss for choice of position and taken the "weather guage" in starting, deliberately threw away this great advantage, after gaining a lead, by crossing the course ahead of the English boat, and taking a position on her lee bow. The sailors on board the *Tennessee* were much puzzled by this strange manoeuvre, and from her spars and rigging came loud shouts of "Keep to windward, Willis!" "Are you crazy?" &c., &c., but the tall Yankee who handled the *Magic's* tiller proved a very methodical lunatic.

The sudden disappearance of their opponents from the weather bow had a marked effect on the *Audacious* crew. Their stroke became irregular, and some of them so far forgot themselves as to look round. Their coxswain also seemed a trifle bewildered, and, instead of holding his boat to windward, steered directly after the *Magic*. A change of tactics was now observed in the latter boat: she was thrown out of the trough of the sea and headed directly for *Treaty Point*, the crew rowing hard between seas, and easing whenever their boat was about to plunge. In seventeen minutes, and forty-five seconds from the start the *Magic* reached the lightship, around which the turn was to be made, the *Albert* being at this time three minutes behind, and fully 500 yards to leeward, the British crew pulling gamely what they must have already realized was a hopeless race. The *Magic* made a splendid show at the lightship, completing the turn in 17 seconds, though their boat had 13 inches of water on board, which was increased to 15 inches by the cap of a sea which boarded them just after turning. Coming home with the wind slightly abaft the beam both boats behaved better, the *Tennessee's* men increasing their lead, and finally tossed oars at the finish 6 minutes 48 seconds ahead. After cheering their opponents, who, whatever mistakes they may have made in training, displayed pluck and endurance throughout, the *Magic's* crew rowed 200 yards head to windward at a higher rate of speed than either boat had shown during the race. The men of the *Tennessee* and *Alert* were wild with joy, and the winning crew on boarding their ship were seized and carried round the decks on the shoulders of their excited comrades. Midshipman C. M. Winslow, U. S. N., was Umpire for the *Magic*.

THE JAPANESE LAW OF SURETY.

Her Majesty's Minister having, in accordance with instructions from Her Majesty's Government, communicated with His Excellency the Japanese Minister for Foreign Affairs relative to the provisions of the Japanese law in respect to the liability of guarantors to contracts in cases where the principal has disappeared, as announced in the correspondence which was published by the Legation for the information of British subjects on the 15th of September last, and having enquired whether, by Japanese law, a surety may by special contract, waive the immunity accorded to him for three years by the law of his country, and may make a stipulation which will be recognised as binding by the Japanese Courts that he shall become liable on the default of the principal, His Excellency the Japanese Minister for Foreign Affairs has addressed to Her Majesty's Minister the subjoined despatch which is now published for the information of British subjects.

It will be observed from this despatch that, by the insertion in their contracts with Japanese of a special stipulation properly worded, British subjects may avoid the inconvenience which might be entailed by the provisions of the Japanese law first above referred to.

(Signed) AUGUSTUS H. MOUNSEY.

H. B. M.'s Legation,
Yedo, May 15th, 1877.

[TRANSLATION.]

March 21, 1877.

Sir,—I have the honour to acknowledge the receipt of your despatch dated the 30th of January last, in which you allude to the provisions contained in the Japanese Code in regard to the liability of a surety to a contract in case the principal has absconded, and state that the said provisions are not satisfactory, and you also make enquiry as to the revision of the said law, and ask whether, until such revision take place the Japanese Courts will recognise as binding any clause creating a special contract by the guarantor.

In reply I beg to state to you that the revision of the above law has not yet been fully arranged. I have, however, been informed by the proper Authorities that in the case of there being inserted in contracts between foreigners and Japanese a special agreement which contains a distinct provision that should the principal abscond the contract liability shall at once devolve upon the surety, then even before the expiration of a period of three years, judgment is to be given in our Courts in accordance with the terms of the contract.

I have, &c.

(Signed) TERASHIMA MUNENORI,
Minister for Foreign Affairs.

SIR HARRY S. PARKES, K.C.B.,
&c., &c., &c.

We have always considered it to be a rule of the press when extracting opinions from the columns of contemporary journals, to be careful to convey not a part only of the matter referred to, but the whole substance of it. The *Tokio Times* was convicted of a breach of this salutary regulation when it recently pretended to quote from the *Economist* a passage which, on examination, was found to have been garbled, and the real spirit of the sentence inverted, to suit the otherwise untenable position advanced. On a smaller scale the *Tokio Times* of May 19th is guilty of a similar offence in quoting from the *China Mail* of May 1st. Referring to the tone of the foreign press in Yokohama, the *China Mail* confesses its inability to endorse the opinions therein set forth, and fails to perceive the wisdom of a compromise between the Government and the insurrectionists which has been hinted at as not only possible, but extremely probable.

This part the *Tokio Times* reproduces correctly, but suppresses the remainder. For reference we reprint the whole of that portion of the extract, including that part which the modesty of the *Tokio Times* kept back.

AN OPINION FROM HONGKONG.—Some of the foreign papers in Yokohama strongly urge the government even now to arrange a compromise. We fail to see the wisdom of any such proceeding—at least in the way intended by the Yokohama papers. These papers have, with one or two exceptions, exhibited an unaccountably hostile tone to the existing government; the most has been made of rebel successes and the least of Imperial successes, and while Saigo and his followers have been held up as patriots, and best friends of the country, the government has been constantly represented as little better than a nest of adventurers, who recognise the claims of neither patriotism nor justice, and have no regard either for the people or the welfare of the country. The compromise which we believe one or two of these papers advocate amounts to nothing more or less than the granting of self-government to Satsuma, with all their old rights and privileges. We have before pointed out that Japan will never be free from disturbance so long as there is divided authority in the empire, and the best thing the government can do both for its own welfare and that of Satsuma is to take every care at the close of this rebellion that that province is placed on exactly the same footing as all other provinces composing the empire. To do otherwise would be to take a step backward instead of forward in civilization.—*China Mail*.—(From the *Tokio Times*.)

The *China Mail* continues:—

The *Tokio Times* has gone into the other extreme, and appears to be a fulsome supporter of the Government. If it were possible for such a state of things to exist, we should be inclined to think that the whole of the foreign papers in Yokohama were the special and paid organs either of the rebels or of the Government. That, however, can hardly be the case. We fail to see anything in the action of the Japanese Government deserving of all this hostility on the part of our Yokohama contemporaries, and we only wish there was a Government half so enlightened and progressive in China as the one in Japan.

The *China Mail* will see hereafter that the tone assumed by the foreign press in Yokohama has not been one dictated by any feelings of hostility towards the existing government of Japan. This journal was the first to propound the probable theory of this cruel and disastrous civil war being eventually settled by a compromise with Saigo. The *Japan Mail* with a tone of greater authority than we lay claim to, followed up the same idea, and it would be well if the *Tokio Times* would consider the difference between an honest expression of the opinion of a considerable section of this community, native as well as foreign, in advocacy of the presumed reasonable demands of Saigo and the people he represents, as opposed to the indiscriminate praise which that journal bestows upon all and everything Japanese, particularly when appertaining to the government. If the people of this country, more especially the governing powers, are unable to bear the expression of public opinion which will always find free vent in the columns of this paper, we are sorry for them, and regret there is no remedy. We would also point out to our esteemed contemporary, the *China Mail*, that the *Gazette's* bitterest enemies, even the *Tokio Times*, cannot accuse this paper of being subsidised by the Imperial Government, and as for any consideration from the rebels!—well, we wish they would offer it, that's all.

A sad accident occurred on Wednesday the 16th on board H.B.M.S. *Audacious*. While sail drill was going on, one of the seamen fell from the fore-topsail-yard, striking the sheet anchor, and thence overboard. When picked up it was found his thigh-bone was broken. He was sent to the Naval Hospital, where he now lies in a very precarious condition.

A SKETCH OF THE LIFE OF LIEUT. COLONEL HANAYAMA.

(From the *Nichi-Nichi Shinbun*.)

Lieut.-Colonel Hanayama was born in the house of Hashiguchi; but he was reared by the Hanayama clan in Kagoshima. In his early years he was known by the name of Kakunoshin. His elder brother, Mr Hashiguchi-kenzo, is Chukenji of the Judicial Department, and has served in the Shimadzu clan as Sanji. The second son of Hanayama senr., died in the performance of his duty towards H. I. M. the Mikado. The third son is the subject of the present notice, a brave and faithful defender of the castle of Kumamoto. During the war between the Tokugawa clan and the Mikado, Mr. Hanayama was an officer in the fourth division of the Satsuma troops, and distinguished himself on several occasions; one being during the time the imperial forces were besieged in the castle of Shirakawa. In May, 1867, he was severely wounded in a battle. After the war was over he was appointed by Saigo to the position of Denji of Satsuma.

About ten ri from Kagoshima is a popular town called Kaseda, chiefly inhabited by a set of stubborn shizoku, who were very difficult to manage. Mr. Hanayama was ordered to take charge of that town. For years he fulfilled his arduous duties most zealously, and through his assiduity a continual peace was maintained. In the course of time he became a major in the imperial army, and ultimately took command of the branch garrison in Kagoshima. He was there at the time of the Formosan expedition: and, having a desire to accompany it, he, with several others, left Kagoshima for Tokio with that object. A few days before their departure, ex-Governor Oyama entertained them at a farewell banquet. Mr. Narahara, the Karei of the Shimadzu clan, was present on that occasion, and sought to provoke a quarrel with the future Lieut. Colonel. At first his insolence was borne goodnaturedly. But the Karei carried his impertinence too far, and the upshot was that a quarrel ensued between the partisans of each. In a short time the place was in an uproar, but serious results were prevented through the judicious interference of the thoughtful Major. Soon after Major Hanayama arrived in Tokio, he was despatched to China on secret service, and rendered much valuable assistance to H. E. Mr. Soyeshima, the Mikado's Envoy. He went with the Envoy to Peking and then proceeded to Formosa through Amoy. On his arrival there, he boldly marched into the interior of the country, and had an interview with a barbarous northern chief. He reported the success of his mission to the government, and thus greatly aided in bringing about the speedy return of the expedition. During several battles which took place with the Formosan islanders in 1874, he distinguished himself greatly. When the difficulties occurred between China and Japan, Major Hanayama returned to Tokio, in company with Lieut.-General Tani, in order to present a report to the government. Again he proceeded to Peking in connection with Mr. Yanagiwara. The result of this mission was not favourable, so Mr. Okubo, Minister of the Home Department, was sent as Envoy Extraordinary and Minister Plenipotentiary. The dispute having been settled peaceably, Mr. Hanayama returned again to Formosa, where he served to the utmost of his ability in the withdrawal of the troops. He was promoted

to a Lieut.-Colonel for his good services during the expedition. In the beginning of last year, he was in Corea with Lieut.-General Taneda and other. When the Kumamoto rioters attacked the castle and killed Lieut-General Taneda, the commander, in October of the same year, he was sent there. He collected the soldiers, who were once routed by the rioters, and restored good order in the course of a few days. Since that time he remained in the castle of Kumamoto with Lieut-General Tani. Saigo, the rebel commander, seems to have considered that no force would be required to take the castle if Lieut.-Colonel Hanayama could be persuaded to join his party, and he sent a relation to him with a letter. The messenger went to Kumamoto and endeavoured to persuade Hanayama to take part in Saigo's cause. The Lieut.-Colonel became very angry at the proposition and refused to receive the letter, saying that, as long as he stopped in the castle, Saigo should not be allowed to pass through the city at the head of an armed force. And he also informed the messenger that he would not be allowed to return; but as he desired to send a reply to Saigo, he was finally sent back with the message. The Lieut.-Colonel was not at all discouraged during the siege of about sixty days, and distinguished himself in many battles.

His residence in Kagoshima was destroyed by a band of women, consisting of wives and daughters of the rebels.

WHAT ARE WE TO DO WITH SAIGO?

(From the *Akebono Shinbun* of the 18th May.)

The famous siege of Kumamoto castle has been raised and the imperialist armies are on both sides; one in front of the castle one in the rear, have joined the garrison. The angry and tempestuous wave which rolled in the south-western seas, is not yet stilled, but it has encountered a power strong enough to check it and the insurrectionary troops feel the discouragement which precedes defeat and the impossibility of resisting the forces which fight under the imperial standard. It is therefore expected that a salute in honour of victory will soon be heard, carrying the tidings of peace throughout the country, and that the imperialist armies will speedily return victorious from the south-west. It is of no importance therefore, to discuss the plan for suppression of the rebellion which is virtually over, but it is a most important matter for our countrymen to consider how SAIGO-TAKAMORI, the rebel commander, shall be dealt with on the dispersion of his armies. Some newspaper writers have already expressed their views on the same subject, and we, though foolish, are desirous of giving utterance to the opinions matured in our brain.

First, what sort of man is SAIGO-TAKAMORI? He is one of the distinguished retainers and founders of the present government. It was he who dealt the chief blow at the tyrannical government of the Tokugawa Shogun, which having lasted for many hundred years, was finally destroyed. The civilization of to-day was introduced amongst us by him, and he it was who caused us to awake from the sleep of ages and to claim a place in the comity of foreign countries with sufficient influence and power to entitle us to consideration. All these great events have been brought about by the ability and energy of SAIGO, whose services rendered to his august sovereign, and to his country are most distinguished, and were rewarded by promotion to the rank of *Shogunni* and Generalissimo of the imperial army. It is as

a man of ability, talent, and accomplishments, and great personal popularity that his illustrious name is known to foreigners in this country and abroad. These are the answers to the question, bringing in their train the solemn enquiry, what has his conduct been? Are we not justified in our surprise at his recent actions, even though there are many examples in ancient times of great men who have been led astray by false considerations. Napoleon in France raised large armies to satisfy his ambition at the expense of his country, but at length he was entirely routed and made prisoner for the rest of his life.

If Saigo should surrender, or be arrested by the Imperial army, he would be rightly condemned to capital punishment for taking up arms against the government, raising the standard of rebellion and violating the imperial laws. But he is a man of such sound judgment and ability he will eventually see his error and make atonement for it. Therefore we hope that his life will be spared without resort to the law, and that his services to his country in future will prove satisfaction for his crimes. If requisite let him be sent to some foreign country, and after the lapse of a few years let him once more be employed in the government, in order that he may redeem his past offences. In European history there are many similar cases. For example, a Hungarian leader took up arms against his government in 1848. On the failure of his attempt he took refuge in Turkey, and the Austro-Hungarian government issued an order to the effect that any person could take him alive or dead. Notwithstanding this the rebel was allowed to dwell in Turkey and was eventually recalled to his own country by the government and appointed to the council of state and made minister of the foreign office, a post he holds to this day. Now the insurrection is suppressed, we believe that a discussion how to deal with Saigo prevails among the ministry.

THE following is a translation of a letter addressed by Saigo from his late head-quarters in Kawajiri, to Oyama, in Kagoshima, when the latter was Governor of that place:—

"I have learned from Semada Kozo and another who have been sent by you that the vessels have arrived. (This refers to the visit of Yanagiwara, Imperial Commissioner.) I cannot exactly understand the matter, but I think the imperial troops have exhausted their resources and desire peace. If they lose Kumamoto castle the whole Empire will be thrown into disorder. At present they are turning all their energies to Kumamoto and it is said if they cannot win they will stop the war. If they fall into our snare we will defeat them, hooking them by shutting in the castle army as a bait. Then our victory or defeat will be decided. The nature of the place and popular feeling are favourable to us. Our troops have fought here with all their energy, traversed mountain roads and occupied 60 or 70 per cent of the field of operations. Though Mofune (a famous Chinese General) were to appear amongst their army, their power cannot be restored, and it is decreasing. But they appear to be preparing an unexpected attack while we are congratulating ourselves on their decay. It is important not to be deceived by the bulgers. I have sent you a few days ago the declaration of the Commander-in-chief. It seems that the assassination matter has been put on one side and they desire war. Their ambition is very hateful. They do not distinguish between right and wrong. Government efforts to bring about tranquillity are useless. I beg that you will act according to your principles. Victorious or defeated, I shall stand or fall for my principles. I hope you will understand what I mean.—Saigo Kikinosuke. To Oyama Tsunayoshi, March 12th."

(* We think this wants confirmation. Kossuth, Bem, Dembinski, Guyon, and others sought refuge in Turkey, and that country supported by France and England refused to deliver them up. This resolution on the part of Turkey nearly led to a war with Austria and Russia.—Ed. *Japan Gazette*.)

BRITISH CONSULAR TRADE REPORT FOR HAKODATE FOR 1876.

BRITISH CONSULATE,
Hakodate, 20th April, 1877.

SIR,—I have to express my regret at being so late in transmitting the Trade Returns of Hakodate for the past year, which is attributable to the Custom House not having been allowed to give up the returns of the last half-year until they had been approved of by the Treasury, consequently they only reached me the beginning of this month.

The Shipping and Trade Returns, in duplicate, comprise as in former years:—

- 1.—Imports from England and other countries.
- Imports from open ports in Japan.
- 2.—Exports to England and other countries.
- Exports to open ports in Japan.
- 3.—Return of Treasure Imported and Exported.
- 4.—Return of Foreign Shipping.
- 5.—Return of duties collected on Imports and Exports, together with a return of entrance and clearance fees.
- 6.—Return of British and Foreign Residents and Firms.

SHIPPING.			
	ENTERED.		CLEARED.
	<i>Ships.</i>	<i>Tonnage.</i>	<i>Ships.</i> <i>Tonnage.</i>
1875.....	36	11,785	39 12,394
1876.....	32	10,513	32 10,513
Decrease..	4	1,272	7 1,881

Foreign shipping is annually decreasing owing to the number of Japanese merchant steamers plying between Yokohama and Hakodate, no less than 104 steamers, under the Japanese flag, of 92,513 tons having visited this port during last year. Formerly all exports for China were shipped direct by sailing vessels, but now the greater part goes to Yokohama by Japanese steamer and is thence trans-shipped to Shanghai.

IMPORTS.		
	<i>From other Countries.</i>	<i>From Open Ports.</i>
1875.....	\$27,641	\$39,484
1876.....	\$27,380	\$16,540
Decrease...	\$ 261	\$22,944

The great decrease in Imports from open ports is owing, as I have remarked in former Reports, to the native merchants and shopkeepers buying very nearly all the foreign goods they require at the auctions in Yokohama and Tokio much cheaper than what they would have to pay if they got them out direct from Europe.

Not a steamer arrives but large quantities of foreign goods are brought up, such as clothing, provisions of every imaginable description, hardware, crockery and glass ware, fancy goods,—in fact there is not a thing one could wish for but it is to be had at the Japanese shops. One has to beware, however, of Wines, Spirits and Beer.

Much of the imports are bought up again by the native merchants coming from the northern provinces of the Main Island, the Awamori steamers constantly bringing over crowds of them.

EXPORTS.		
	<i>To other Countries.</i>	<i>To open Ports.</i>
1876.....	\$776,962	\$ 6,544
1875.....	\$350,734	\$45,168

Increase..... \$426,228 Decrease...\$38,624

As will be seen, the exports to other countries, that is China, have more than doubled as compared with those of 1875, whilst those to open Ports in Japan have considerably fallen off; the natives are now exporting a

large quantity of dried fish to the southern ports, the impetus having been given by the foreigners. Notwithstanding this the total exports are \$387,604 in excess of those of the previous year.

GENERAL REMARKS.

The great event of the year 1876 was the visit of the Mikado to this Island, the first time any Sovereign of Japan has ever come so far north.

After inspecting Government offices, His Majesty paid a visit to the Government School, where he stopped a considerable time questioning the pupils, and in which he appears to have taken a great interest, for he afterwards expressed great satisfaction with his visit and the readiness with which they replied to any questions put to them.

From 80 to 100 Ainos with their wives came to do homage to their Sovereign. They appeared to belong to a better class, it may be they were chiefs of different tribes, for to all outward appearance they looked more respectable and were better dressed than the deputations one generally meets in town in spring. During the procession in town they always managed, I have been told, to be in a conspicuous spot by taking a short cut whenever the Imperial carriage had passed them. This must have been arranged for them by some official, as they could not have known which route the procession would have taken.

Twice they had the honor of going through one of their national dances before His Majesty. This dance of theirs is what is termed the crane dance, the singing, if such it may be called, being an imitation of the noise caused by the chain passing over the pulley, and the motion with their feet being that of a person employed in turning the wheel of a crane. Their motions are very regular, and they keep very good time by clapping their hands. They were very much pleased with the gracious manner His Majesty thanked them for their performance, and more gratified still, I feel convinced, with the thousand *yen*, which he ordered to be distributed among them.

His Majesty's stay among us was but short, not extending over two days, during which time he made an excursion to the model farm at Nanai.

A few weeks latter on the Mikado's Cabinet Minister, likewise came to Hakodate. After having visited the schools and spending considerable time there, they extended their tour of inspection to Sapporo, going to Otarunai by steamer, and keeping on to the main road, returned to Hakodate.

Telegraph.—As I remarked in my Report for 1875, the double telegraph cable between Awomori and this Island was snapped some time early in 1876. An unsuccessful attempt was made last summer to pick up the cables and splice them. It was then found necessary to send home to Europe for fresh cables, so that we are still dependent on the Awomori steamer for telegrams.

Post Office.—The native Post Office here was remodelled on the foreign system in 1874, and began to take charge of foreign mails the year following when the P. M. S. ships ceased to visit this port.

There are no foreigners connected with the Post Office and no distinction is made between native and foreign mails, both being made up in, and distributed from, the same department.

One hour after the arrival of any mail steamer, all mail matter is ready for delivery, and if not called for, is taken to the different houses within the next hour.

Notice is invariably given eight or ten hours previous to the departure of a mail, and sometimes a longer notice if it is known when the steamer will sail.

The mails from Yokohama have come up to Hakodate within the twelve months most regularly in eight days, a steamer bringing over the mails from Awomori every other day.

Custom House.—The Custom House has undergone a thorough change during the past year, and is now conducted on the same principle as at the other ports, that is to say, more in conformity with the usages of foreign countries. The Custom House officers are very strict, at times too punctilious, and consequently dilatory; but I have no doubt, that in course of time they will learn to get through their business more rapidly.

Judicial Department.—The Judicial Department gives but little satisfaction. Cases are allowed to drag on indefinitely, so that in claims against natives the latter have every opportunity of getting rid of whatever they possess, and when they are declared bankrupts, which is invariably the upshot of every claim, they are worth nothing.

In police cases we have nothing to complain of, however; no thief or criminal can escape the vigilance of the authorities, and it is wonderful how they manage to ferret out anything, if they set their mind on it.

Education.—The boys' and girls' school at Sapporo that I made mention of in my last report, has collapsed owing to the misconduct of the Native Director. The pupils have been sent home to their parents. An agricultural college has been established there, superintended by four foreigners. At present there are not more than fifteen pupils.

At Hakodate the Kaitakushi has five Government schools with 525 pupils, of whom 446 are boys, the remainder girls. Twenty native teachers have charge of the schools. The children are taught reading and writing, geography of the world, universal history and arithmetic up to fractions. The school hours in summer are from 7 to 1 and in winter from 9 to 3, one hour being allowed for the midday meal. Besides, every hour the children are let loose for ten minutes to run about and amuse themselves as they please. Admission to those schools is obtained by application in writing to the officers of the Town Hall. Only children of the latter class are admitted. For each child there is a sum of 12½ cents per month to be paid, and where there are more than three from one family, there is no charge for the third child.

Similar schools have been erected in all the principal towns, but no returns have been received.

Besides the above there are numbers of private schools, where writing and reading only are taught. The number of pupils attending these schools, as far as I have been able to ascertain, average about fifteen hundred (1,500) daily. The charge is from 5 to 10 cents per month.

Three of the shopkeepers have combined to erect an evening school for apprentices and others who are engaged during the day. The hours will be from 6 to 10. Admission is obtained on production of good testimonials.

Age from 12 to 18. A monthly payment of 10 cents has to be made, books being found. The same branches of learning as at the above mentioned Government schools.

Lighthouse at Siriya Saki.—This Lighthouse was completed some time last autumn and lit up in October. Siriya Saki is

situated at the N. E. point of the main Island of Japan in the Tsugaru Straits. The light is elevated 150 feet above the level of the sea and should be visible in clear weather at a distance of 18 miles.

The tower, 94 feet high, is circular, constructed of brick and painted white.

Position Lat. 41° 26' 10" N.

„ Long. 114° 29' 25" E.

This light will be of great benefit to navigation, for it was much needed. There is some talk now of a light being erected on Hakodate head.

Ship Building.—Some two years ago an English shipwright built two schooners of a little less than 100 tons each after the foreign model. The native carpenters, whom he employed, were not slow in learning all they could of this foreign style of ship building, and last year they launched among themselves no less than eight schooners averaging from 20 to 80 and 100 tons, although much inferior in every respect to the models they had copied from. There are now several more such schooners on the stocks, and the English shipwright, Mr. Thompson, has repeated offers to build schooners for the Japanese, but too frequently the funds are wanting.

At one time the Kaitakushi intended starting a shipyard at this port, but they have changed their minds and have commenced one at Moruran or Volcano Bay. I am sorry to say, however, that at the latter place there are more officials than workmen or men fit to superintend a work of this description, so that I fear after much money has been expended this new undertaking will prove a failure. One practical man, who understands the business, would do more good than all those drones with their pens, paper and ink.

Farm at Nanai.—The farm at Nanai, which at first was expected to be of such great benefit to this Island, is still carried on at an immense expense, no attempt being made to make the farm pay for this great outlay. This is much to be deplored, as there is no doubt that much beneficial improvement might be derived from the extension of agriculture in this Island, for one cannot but regret, as one travels over this part of Japan, that so much valuable land is allowed to lie waste, which might with proper management be turned to profitable account. It is true, the climate so far north is ill adapted for growing rice, which is the staple food of the people, but as they are becoming more accustomed to the foreign way of living, I feel convinced there is much to be done on this Island in the raising of cattle, cereals, vegetables and fruit, for the climate so closely resembles that of England, and the soil is so rich and fertile, that with very little trouble almost anything will grow here.

At the present time the few bullocks that are required for the consumption of foreigners, the natives and the shipping, are brought from Nambu and are but sorry animals at the best, but I feel convinced, that if the Japanese were to take this matter in hand, and devote a small part of this rich pasture land to the raising of cattle, not only an immense profit might be derived but beef equal to the Kobe beef might be sold at the same price for the poor substitute we now get, and since the Japanese have of late taken so much to beef diet, to them it would be an immense advantage.

And now last but not least the *Fisheries*. The immense wealth to be derived from the fisheries of the Island of Yesso has so often been dwelt upon that I need scarcely repeat,

that if so many obstacles were not put in the way by the officials, they would long ere this have been fully developed. Fish, salted and dried, have for many years found a ready market, both in China and Japan, as the annual Trade Returns show.

Last year an attempt was made to turn the oyster beds, extending over miles near Akish, into a profitable speculation. A native of this Island engaged three Chinamen to dry oysters in Chinese fashion for the China market; but no sooner was it discovered that this might be a profitable undertaking than some flaw was found to exist in the lease he had obtained, and thus a stop was put to what might in all probability have been a very lucrative business. I now hear some officials are supposed to be desirous of carrying on the work commenced.

Last autumn another way of preserving salmon for exportation by Japanese was brought to my notice. A native residing at Nemero sent a smoked salmon and fresh salmon preserved in tin requesting me to give him my opinion on the same, and whether I thought they would be saleable articles in the market. After giving them a fair trial, I came to the conclusion that the smoked fish was better than any I had tasted in Japan, as the salmon at Nemero is much finer and richer in flavor than any caught more to the southward, and as to the fresh salmon in tin it was excellent and quite equal to, if not better than that sent out to the East from Europe or America. I was told samples had been sent to Tokio, and I feel convinced, that if they persevere and continue with it, this branch alone will be in itself a most lucrative business besides being an immense benefit to the shipping. Should this be carried on, the preserving in tin might be extended to the oyster beds, so that I am of opinion, that if the speculator can command sufficient capital with the requisite perseverance, this will turn out a grand success, as there is little chance of any foreigner having anything to do with it unless he advances the funds, and that would not be advisable with the sad experience foreign merchants have had in doing so for other produce of this Island.

I have the honor to be,

Sir,

Your most obedient humble servant,

(Signed) R. EUSDEN.

Sir HARRY S. PARKES, K.C.B.,

Her Majesty's Envoy Extraordinary,

Sec., &c., &c.

MISCELLANEOUS.

The *Benedicta* arrived on the 13th from Shinagawa with rice for Amoy.

Owing to the great expenses of the insurrectionary war, a new Japanese Government Loan is said to be contemplated.

The *Nichi Nichi Shinbun* states that the agrarian rioters who assembled in the Mio-ken last year numbered from sixty to seventy thousand men (*sic*), and that each of them has been fined from 1½ to 3 yen. A very handsome contribution this to the funds of the Provincial Government.

GEORGE HANSEN, who was tried in the Russian Consular Court on the 26th of April, was brought up to receive sentence on the 10th instant. The sentence of the Court was, that he should be imprisoned for a period of three months, dating from the latter day. When asked if he wished to appeal against the sentence, the prisoner replied that he was perfectly satisfied with his trial. Two of the men implicated in the forgery case have now been disposed of.

The Pacific Mail and the Occidental and Oriental Steamship Companies have each arranged for an extra departure from San Francisco and Hongkong.

The departures from San Francisco will be about twelve days apart until the 1st Septem-

ber, and from Hongkong from seven to ten days apart until the 1st October, when their regular sailing dates will be resumed by both lines.

On the evening of the 11th at 8.30 a public meeting was held at the Seiyoken Hotel, Tokio, for the purpose of forming an Amateur Athletic Association. The meeting was remarkably well attended for Tokio. The proceedings were as follows:—

Mr. A. C. de Boinville was voted into the chair, and a temporary committee of five of those present was elected to ballot for the names of those in the room who wished to become members of the Association. The gentlemen to whose lot it fell to thus represent the rest were Messrs. F. C. Hayes, A. C. de Boinville, F. Prowse, J. Johnstone, and G. Charlesworth.

The balloting being concluded the Chairman declared the gentlemen present to be now duly formed into an Association. The Association then proceeded to elect an executive committee of five to hold office until after the Autumn sports; and the following gentlemen were finally chosen, Messrs. J. Hall, G. Charlesworth, F. W. Strange, A. C. de Boinville, J. Johnstone.

It was now decided that the subscription fees should be \$1 per month, dating from 1st May, and that members joining after the 31st August should pay an entrance fee of \$5.

A treasurer was then elected in Mr. G. E. Gregory, and it was decided that the executive committee should choose a secretary from among themselves. Mr. G. Charlesworth was appointed.

The new Association then returning thanks to the Chairman of the evening for his efficient services, the meeting adjourned.

THE following is the score of the Base Ball Match which came off on the 11th inst., whereby it will be seen that the Tokio and Yokohama team was victorious by six runs. The band of the *Tennessee* played during the game, which was witnessed by many ladies.

YOKOHAMA AND TOKIO	O.	R.	FLEET	O.	R.

Umpire, Lieut. Rich, U.S.N.

MR. E. PIQUET, who has resided in Yokohama for nearly fifteen years, left for Europe by the M. M. Str. *Tanais*. During his sojourn in Japan Mr. Piquet has devoted much valuable time to the interests of his fellow residents; long and favorably known for his ripe experience and urbanity he does not leave these shores without being regretted by a large section of the community, who have understood and appreciated his exertions for the public good, and who feel that such men are gradually becoming fewer in a settlement sadly deficient in public spirit.

THE U. S. S. *Alert* left here on the 12th inst. for New Guinea to search for persons supposed to be on one of the islands in that neighbourhood.

THE buildings of the new German Hospital on the Bluff, close to the Italian Consulate, are rapidly advancing under the direction of the architect, Mr. Lescasse, who expects the work to be finished some time in August. The hospital when complete will be among the best situated and handsomest structures in Yokohama.

SUNDAY, 13th inst. witnessed a quite unforeseen change, as sudden as it was remarkable, in the weather. During the morning and till four o'clock in the afternoon the temperature was that of a summer day, the thermometer marking as high as 82° Fahr. At half past four the wind shifted suddenly from S. W. to E. N. E., and before sundown the mercury had fallen thirty degrees.

A "PEDESTRIAN HANDICAP" from Foote's Hotel to the "White Horse," Totska, was walked on Saturday afternoon, the 12th inst. The subscription was one dollar, and the entries for the match were twenty-five. Two prizes were competed for, the first a claret jug and the second a tankard. Messrs. Eyton and Watson were the handicappers, and the result reflected the greatest credit on their judgment. Four competitors only started. We subjoin their names and allowances, and the time at which they arrived at the goal. There was only one scratch man in the handicap and he did not compete. The start was effected at 2.45 P.M.

Name.	Allowance.	Arrived.	Time.
J. Davieson	20 minutes	4.21 P.M.	1.36 ... 1
J. S. Waite	25 "	4.26 "	1.41 ... 2
E. Perpetuo	20 "	4.28 "	1.43 ... 3
M. Sangster	30 "	4.36 "	1.51 ... 4

At the first station, the junction of the Yokohama Road with the Tokaido, the pedestrians were walking in the order in which they came in, an order which was maintained until the close. After the match the competitors and a large number of guests, who had assembled at the White Horse to witness the finish, sat down to an excellent dinner to which full justice was done. The prizes have been generously put up by the winners to be again competed for in a handicap which will be arranged shortly.

THE recent frequency of robberies is alarming, and does not say much for the vigilance of the police, who also do not seem to display much zeal or skill in the detection of the larcenies and burglaries which they fail to prevent. On the night of 11th instant a godown on the property of Messrs. Kniffler & Co. No. 54, was broken into, and several bolts of canvas were stolen, the thieves leaving undisturbed several cases which were too ponderous for them to remove, and which presumably they had no time to burst open. Two nights afterwards the office of Messrs. E. C. Kirby & Co., No. 60, was burglariously entered. That the thieves could have broken unheard into a house in so central a position as this, and have abstracted therefrom unobserved a quantity of property, may well be matter of surprise. In this case and in that of the robbery at Kniffler & Co.'s the mode of effecting entrance was the same. The padlocks securing the outer doors were in both instances cut away. The robbers must have spent a considerable time last night in Messrs. Kirby & Co.'s. They entered the sample room, to which they confined their attentions, and there lighted a candle which was found this morning almost expended. They ransacked the room and took away a number of cards on which were displayed samples of hardware. Unfortunately for Mr. Kirby, his safes were

being repainted. Hence it happened that about \$350 in Japanese bank-notes and satsu were locked up in an ordinary tin despatch box, which also contained some mortgages, title-deeds, and Mr. Kirby's will. This box was taken out and forced open, apparently on the vacant ground opposite—on the lot where the premises formerly occupied by Messrs. Lane Crawford & Co. stood, and where Mr. Kirby is now building. Here, at any rate, it was found, empty with the exception of an old letter-book, in rejecting which the thieves certainly showed some discrimination. The deeds, will, and money they took away. When they found the latter they seem to have disdained meaner spoil, as this morning, when the robbery was discovered, the vacant lot was found strewn with the sample cards which they had thrown away.

THE *Akebono Shinbun* gives the following account of the return from the South-West of General Kuroda, who is evidently in high favor:

General Kuroda, *Sangi*, and five Chief Secretaries of the Imperial Household, arrived in Yokohama in the steamer *Genkai Maru* at about 2 o'clock p.m. on the 8th instant. They landed at the English hatoba, where Prince Higashi Fushimi-no-miya, Their Excellencies Iwakura, Yamaoka and many high officials of several departments and the Governor of the Kanagawa ken, received the conqueror from the South-West. He proceeded directly to the Port Admiral's Office in a carriage, belonging to the Imperial Household, which was waiting to receive him. On his way to the Railway Station he took a short rest at the branch office of the Foreign Office, close to the Oyebashi, Yokohama. He arrived by the 3.30 p.m. train at the Shinbashi Railway Station, where many officials of the rank of Sonin were waiting for him. He proceeded in a carriage, with H. E. Iwakura, to the Daijo-kuwan where he was entertained at a great banquet. The streets between Shinbashi and the Daijo-kuwan were lined with police.

THE third day of the Association's Meeting was not very promising in point of weather, but at noon the sun broke through the clouds and a warm, cheerful afternoon followed. The handicaps did not seem to give satisfaction, or we should rather say, gave great dissatisfaction, Mr. FIDDLE DE DEE withdrawing *Hoolet*, *Lintie*, and *Tallapoosa* and Mr. DOUGLAS, *Crusader* in consequence of the weights imposed upon those ponies in the handicaps.

FROM Hakodate we have intelligence of an extraordinary phenomenon. On the 11th inst. at 11.30 a.m. the harbor being smooth and still, the sea suddenly receded, and within ten minutes rose again with a swell of fully seven feet. At intervals of about twenty minutes the water continued to fall and rise in a similar manner. Between 2.30 and 2.35 p.m. the maximum force of the wave was attained, the sea overflowing the bund and flooding the lower part of the town. From this time the rise and fall gradually diminished, and at sunset the sea was again calm and still. The greatest excitement prevailed amongst the native population; thousands of persons lined the beach and bridges and other places where the tidal wave could be observed in safety, while others were busily engaged in removing their property to the roofs of houses and godowns.

Our correspondent does not inform us to what influence this phenomenon may be ascribed in the opinion of natives of long residence in

that portion of Yesso, but mentions that a similar occurrence of less intensity occurred about eight years ago when it was discovered subsequently that the wave was attributable, or supposed to be so, to a violent earthquake which had taken place in Peru. To what terrible convulsion of nature the recent occurrence in Hakodate may be due we have no means of ascertaining at present, but may look forward to news which may account for it, within a month, or probably less, from this time.

A Sando in the employ of Messrs. J. D. Carroll & Co. was caught on the morning of the 21st instant in the act of stealing brass screws. He had contrived to secret on his person ten gross of screws when detected. No police being in the vicinity at the time, it was resolved to make an example of the thief in a rather unusual way. A board was obtained on which was written, in English, Japanese and Chinese, "This is a thief." It was fastened to the back of the offender who was then tied to a post outside the premises, where he was kept for a considerable time. Such an unusual sight drew together an immense crowd of people. Ultimately he was taken from his conspicuous position and handed over to the tender mercy of an officer of the law.

The British barque *Flying Spur* reports:—Leaving the Downs on the 12th of December last, meeting with moderate weather down the Channel, and passing the Lizard on the 17th. Heavy westerly and south-westerly gales were experienced up till the 28th December, several chain plates being broken on the 23rd. The truss of the lower fore topsail yard was carried away, and acids stored on deck, having broken loose, were thrown overboard. The *Flying Spur* met with light trade winds after passing Madeira, and called at St. Vincent on the 16th January to refit, sailing again on the 23rd. The Equator was crossed on the 3rd of February, and with light winds to the Cape, passed that point on the 5th March, and afterwards met with the usual westerly winds. Running the Longitude down in 46° S., rounded Tasmania April 2nd, passing New Caledonia on the 13th, and recrossing the Equator on the 24th caught the N. E. trades on the 28th; passed Fatsio on the 10th instant, taking a pilot on board the next day. Anchored in Yokohama on the evening of the 11th.

The British barque *Scarfell* left Newcastle, N.S.W., on the 30th March and after a favorable voyage arrived in Yokohama on the 18th instant 48 days out.

On the 19th April at 1 p.m. in latitude 2° 59' South, longitude 166° 09' East, we were hailed by an European built boat containing one white and six colored men, who stated that they had been blown away from Pleasant island, where they had been living, and had been 14 days at sea. Four days after leaving land their provisions were exhausted, and during the remaining ten days they suffered severely and were in an exhausted and famished condition. We offered to land them at the nearest island to their own, but they refused preferring to attempt the return in their own boat. Having been supplied with provisions and water, and made acquainted with their course for Pleasant island, then lying N.N.E. distant 170 miles, of which they were seemingly quite ignorant, as when discovered they were steering in an opposite direction, they parted company and resumed their perilous and uncertain voyage.

HER MAJESTY'S troopship *Tamar* arrived at Hongkong on Saturday, the 5th inst., bringing officers and crews as the reliefs for H.M.'s ships *Charybdis*, *Modeste*, *Nassau*, *Sylvia*, *Hart*, and *Audacious*. The following is a list of the officers:—For the *Sylvia*: Lieutenant A. Havergal and Sub-Lieutenant F. W. Keary; Paymaster M. D. Roberts; Assistant clerk C. H. Jones; Midshipman Arthur J. Loanes; Engineers S. Swan and R. G. Galloway; and Boatswain J. Redman. For the *Nassau*: Lieuts. A. Carpenter, G. Pirie, H. S. F. Niblett; Carpenter H. Boyer; Assistant clerk J. F. H. Campion; Paymaster H. M. Harrison; Chief Engineers J. Roswell and A. Lietch. For the *Hart*: Lieutenants B. Fulford, F. J. O. Thomas, C. Baker, and A. Balfour; Assistant clerk J. Maxwell; Engineers N. Stearn, W. Coleman, A. Watt, and James Harwood. For the *Modeste*: Lieut. J. D. Nicholls, Navig.-Lieut. G. L. Napier, and Sub-Lieut. E. J. Bain; Engineer W. R. McAvoy; Gunner F. J. Nuthall; and Boatswain J. Beer. For the *Audacious*: Commander A. A. C. Parr; Lieut. F. A. S. Scott; Surgeon H. B. Guppy; Naval Cadets J. W. M. Webb, H. H. Phillips and O. O. Browning; Engineer G. Elliott. For the *Charybdis*: Captain C. F. Hotham; Lieuts. A. W. Moore, H. N. Harvey, J. D. Deane, A. M. Hayes (R.M.L.I.), F. W. Freeman; Surgeon G. W. Farnsliang; Rev. F. S. S. Stobbing, Naval chaplain; Paymaster Alfred A. de Denne; Assistant-Paymaster Wallinann; Engineers J. D. Wood and G. Hostey; Assistant Clerk W. J. Willoughby; Naval Cadet E. C. Greenway; Carpenter T. Haster; Boatswain W. Thorngood; Gunner F. Lattimer. For H. M. 28th Regiment: Lieut. J. B. Parkinson and Sub.-Lieut. Thomas Armstrong Drought.

The steamer *Thabor* has been transferred from the Light-house to the Naval Department.

The *Mainichi Shinbun* says now that, owing to the government and other vessels being all employed in the South-West, there is none available for the service of the Mikado, who will therefore return to Tokio by way of the Tokaido, in company with the Empress.

NIPPON NOTES.

NEWS FROM THE SOUTH-WEST.

(From the *Nichi Nichi Shinbun* of the 14 May.)

The following items are extracts from a letter from Kumamoto castle, dated the 3rd instant:—

As we have already informed you, the insurrectionary armies withdrew to the south-east from Yabe, which lies on the border of the provinces of Higo and Hiuga. A body of them re-appeared in the village of Sugemura on the 29th April, but retreated in a few hours. The entire armies of Saigo left their camps at Kiyama, Mibune, Otsu, and other places in confusion and reassembled at Yabe. When they retreated from the latter place, they divided themselves into two parties: one proceeded to Hamacho, and the extensive plain of Umami-bara, through the range of the Takachio mountains, via Mitai, Miyamidzu and Nobeoka in Hiuga, which latter is distant 25 ri and a-half from Hamacho, with difficult approaches. The other passed over a mountainous bye-road to Hitoyoshi, probably the most precipitous and narrow pass in Kiushu, where men must pass in single file: notwithstanding, those who were strong and

healthy, followed the rebel commander to Hitoyoshi and those who were weak in body were sent to Nobeoka with the wounded soldiers. No insurgents remained in Yabe and its neighborhood.

The insurrectionary forces, assembled in Nobeoka, consist mostly of the poor shizoku in Sadowara, Yohi, Takanabe and other districts and we are informed of their strength. They are much discouraged and are not worthy of consideration. The city of Nobeoka stands on the coast and is not a good strategic position rendering it clear that the Kagoshima insurgents would not assemble in such an inconvenient and useless place. Hitoyoshi on the contrary is a strong and commanding position by nature, being entirely surrounded by mountains. No Imperial troops could march thither on the Yabe road, which the insurrectionary armies passed in spite of hunger fatigue and death. But there are two other somewhat level roads to Hitoyoshi, one called Sashiki and the other Yajiro. Before the insurgents reached Hitoyoshi, it was guarded by the army, newly raised in Kagoshima by Etsumi and Beppu. These officers threw out advanced posts on the Yajiro road along the eastern bank of the river Shirakawa. Hitoyoshi is a convenient place for the support of large bodies of troops, and Saigo should not be allowed to remain there long. However he could not re-enter Kagoshima his own fortress nor assemble re-inforcements, owing to its occupation by the Imperial armies. Saigo will shortly decide whether to retreat to the castle of Miyako-no-jo or to fight a decisive battle somewhere near Hitoyoshi.

The *Hochi Shinbun* writes:—A telegram from Kioto, dated the 14th instant, where it was received from Yajiro on the 13th instant, announces that the police forces were obliged to retreat as far as Ishizaka before the insurrectionary armies, which place they left again in disorder, during the night of the same day, and occupied a position at Watari. The third division of the Imperial armies joined the routed police force between Minamata and Sashiki. They intend to advance as far as Shizenji. At daylight of the same day a battle was commenced at about one ri north of Minamata.—Another despatch from the Owake ken on the 13th, received in Kioto on the 14th instant, says that the branch police station at Shigeoka under jurisdiction of that ken was attacked and destroyed by an insurgent body. Police forces are required to be sent thither as fast as possible. They are marching for the local office.—A telegram from Kumamoto, which was received at 12.50 m. on the 15th, states that about 100 shizoku in Saiki, Owake ken, attacked shigeoka and routed the police force.

Mr. Hosaka, ex-lord of Kumamoto, made a present of 100 barrels of sake to the Imperialists, when they joined the garrison on the 14th April, and 2,000 yen to the hospital in the same place. In addition he distributed about 20,000 yen among homeless citizens in his former city.

PRINCE ARISUGAWA-NO-MIYA, commander-in-chief of the army in the South-West, has issued the following Notification to the Kagoshima-ken, dated the 29th April:—

The progress of the insurrection has extended from Kagoshima to the Kumamoto-ken, causing the inhabitants much excitement. Many of them have joined the revolvers, and died violent and unnatural deaths. His Majesty the Mikado sympathizes with these people and sent an envoy to distinguish them from the more active insurgents. Notwithstanding this, they

showed increasing disaffection, and desired to carry out their designs by violence. But of late they have become much discouraged and are now completely demoralized. They have left Kumamoto in disorder and returned to Kagoshima, through the province of Hiuga, where good and obedient subjects will be injured by them. So, the navy and land forces were sent out there to protect the latter and to keep them in the right way. All people must keep tranquil and pursue their daily business. This is hereby notified throughout the ken.

The *Hochi Shinbun* says:—A telegram from Kumamoto castle, despatched at 10.25 a.m. on the 12th instant, announces that Yamagata, war inspector, left for Yajiro on the 9th instant and brought back the following news on the 12th:—The insurgents armies attacked and seized Shi-ih on the 6th and 8th instant. Taking advantage of their victory, they advanced and seized Shira-iwa, and Nakamura. On the latter day, they attacked the police forces at Kukino, who broke ground before them and were obliged to retreat to Ozeki and Kunoki leaving the insurgents masters of them. On the 9th instant, the imperialist troops at Sashiki were sent to Ebirase, where they were also routed. On the following day, the same place was attacked and the imperialists seized the commanding position of Yashiki twice, but it was retaken by insurgents on the third attack.—Skirmishes are daily taking place in Kagoshima and its approaches.—About 300 police will be quickly despatched for Kagoshima.

ACCORDING to a telegram from the North, rain fell heavily on the 11th instant. The river Kita-kami-gawa swelled about ten feet on the 13th instant, and about 264 telegraph poles and many other timbers on the bank have been floated.

H. E. OKUMA, the Minister of the Finance Department, is expected to arrive in the *Tokio-maru*.

H. E. SANJO SAN'EYOSHI, Daijo Daijin, is expected to leave Kioto for the East on the 15th inst.

ABOUT 3,000 policeman, newly enlisted, will shortly drill for one week in the extensive plain of Narashino-hara, Shimosa.

The *Choya Shinbun* says that Mr. Hagiwara, *Daikeishi* of the police office, will leave for Kiushiu at the head of about 1,500 Tokio police and 1,200, newly enrolled men, in the *Genrio-maru* of the M. B. M. S. S. Co.

MR. FUJIMURA, a famous learned man in Kagoshima, was arrested for having composed a copy of Saigo's manifesto. This provoked excitement among his numerous pupils and they threatened to retake their instructor from the authorities by force.

OUT of 2,929 patients in the hospital in Osaka, 56 are officers, 2,842 soldiers, 7 police inspectors, 18 police, and 6 coolies all on war service. During the two weeks from 22nd April to 5th May, 36 officers and police inspectors and 245 police and soldiers entered. Twenty soldiers were discharged from the hospital cured of their wounds.

ABOUT fifty or sixty shizoku of the Nagano-ken have treacherously determined to set the temporary local office, which occupies the Buddhist temple of Zenkoji, Midzu-uchi, Shin-shiu, on fire, and for that purpose they collected numbers of their confederates. Fortunately for the government, the local authorities got wind of their conduct. About eight chiefs of the confederates were arrested on the 28th ulto.

PRINCE Arisugawa-no-Miya will shortly advance from Kumamoto to Hiuga. It is now known that Saigo is in Yamo in the province of Osumi.—The *Mai Nichi Shinbun*.

THE *Choya Shinbun* writes:—A telegram from Kioto, despatched at 2 a.m. on the 18th instant, announces that on the 17th, the police forces, who landed at Seki in Saga, encountered the insurrectionary troops at Tsurusaki in Bungo, at about 11 p.m. Three of the imperialists were killed and seven of the insurgents taken prisoners. The insurgents marched for Inugai and the police force arrived at the Owake Kencho in the same day.—Another despatch from Kioto dated 10.55 a.m. 18th instant, advises that on the 8th the insurgents took advantage of the withdrawal of a body of spies at Yamano, Satsuma, and pursued them hotly as far as the border of Higo. On the 10th, they attacked the imperial forces at Midzumata, but were repulsed after a desperate battle. A standard bearer was killed and about twelve rebels were captured with large quantities of ammunition. Here several skirmishes took place up to the 14th instant. On that day, the imperial army fought victoriously and set the village of Fukagawa on fire, where the provisions for the insurrectionary troops were stored. The insurgents fled in disorder leaving a mortar, standard, and many rifles and swords behind them.—The three leaders of the Kumamoto insurgents, namely, Ikebe, Miyazaki, and Fukuda were killed. According to the reports of a prisoner, Saigo is in Hitoyoshi and Kirino and Murata are said to be in Kagoshima.

HER Majesty the Empress Dowager is expected to arrive in Tokio about the 22nd inst.

On the 19th instant, half a battalion of infantry, commanded by Captain Itakura, was sent out in the *Genrio-maru* for the South-West. Another half battalion is said to be in readiness to follow shortly.

8,369 police were sent out to the south-west up to the 18th instant, and about 6,000 police are now in Tokio.

THE *Choya Shinbun* extracts the following items from a letter from Dategori, Iwashiro, dated the 11th instant:

This year the climate is moderate for the production and rearing of silk-worms, and the mulberry trees are well furnished with thick leaves. Owing to the successes of the last year, silk-worm dealers are generally supplied with plenty of capital and intend to store up large quantities of silk. It is expected that this year their business will be equally as prosperous. Since last winter the temperature has been very equable and favorable. To-day, the 11th, the thermometer registers 71 degrees.

THE *Mai-nichi Shinbun* says:—The small island of Sarushima, which lies off the coast of Yokoska, is thickly covered with rushes and pine trees. Tradition says that some unnatural monster is living in the island and no farmers or fishermen dare to land there. A few days ago some fishermen happened to pass in a boat along the shore of the island. When they appeared there, they were first driven off by an offensive smell, but they soon plucked up courage to land and examine the place. To their great wonder they found there a large snake, cut in two pieces, about 24 feet in length and three feet in circumference. It seems that this snake had been killed about a month ago and its body was greatly decomposed. The matter was soon reported to the town hall, whence a number of coolies were sent out to remove the remains. That terrible snake is considered to have been accidentally killed in the following manner:—At the com-

mencement of this month, the French corvette *La Clochette* fired a trial shot off the coast of Yokoska, and the ball is said to have shot the poor snake. But the islanders rejoice in the destruction of this monarch of the island.

A private telegram from Kioto, dated the 19th instant, announces, says the *Hochi Shinbun*, that His Majesty the Mikado, had that morning visited H. E. Kido, *Naikaku-komon*, who is confined to his room by serious illness.

Mr. Kataoka, a distinguished man in the Koei Ken, (Tosa) arrived in Tokio a few days ago, in order to offer a memorandum to the government for the establishment of a representative assembly. In the same ken about 7,800 rifles and many cannon are preserved in a godown, belonging to the ex-lord Yamanoichi.—*Akebono Shinbun*.

THE *Hochi Shinbun* writes:—A telegram from Kumamoto, sent by Lieut-General Kawaji at 8.35 p.m. on the 19th instant, announces that he marched to the rear side of the mountain Nagaoyama and surprised the rebel armies, encamped there. At the same time, the imperial troops in the south-west of the mountain attacked the routed insurgents whose two chiefs, Kumazaki and Chiama were killed with about twenty soldiers, and the remainder fled in disorder leaving cannon and rifles behind them. Ten imperial soldiers were wounded and four killed. Since the 10th instant, the imperialists have always been worsted, but they became more courageous on the result of that engagement, which has enabled the imperial troops to keep the strong position of Midzumata.—Another telegram from Kioto, sent by General Saigo Acting Minister of the War Department, at 8.5 a.m. 20th instant, states that on the 17th instant Lieut-General Yamada on the Yajiro road seized the strong military place of Kunimiyama and erected a fort there. On the following day, he marched for Hirase, which is in the mountains.

THE native papers write:—A telegram, sent by the War Counsellor Yamagata in Kumamoto, received in Tokio at 10.30 p.m. on the 14th instant, reads as follows.—According to the ex-lord Hosokawa's messengers from Kumamoto castle to Hitoyoshi, sent thither to instruct his ex-retainers to support the Mikado's party, — and others established their head-quarters at —, where no man is allowed to enter. They are unanimous in their opinion but what their views are is not known. The messengers were unable to carry out their mission and obliged to return. Ikebe, the commander of the Kumamoto insurgents acted in opposition to Hosokawa's orders. He collected taxes in Hitoyoshi and its neighborhood, and has made himself director of the arsenal in Hitoyoshi, where large quantities of ammunition are daily manufactured. The insurgents found a supply of ammunition said to be sufficient for about two years, and were in consequence much elated. This seems to be true. The Kagoshima insurgents are again waxing more and more vigorous and the influential company, formed by —, is said to have united with Saigo's men.

ANOTHER despatch from Kumamoto, sent at 5 p.m. on the 15th instant, announces that about 300 insurrectionary men penetrated into the Owake ken from the Hiuga road on the 13th. They attacked the branch police station and Saibansho at Shimoyada. No life was lost. The rebels encamped at Takeda.—Machida, the second son of the ex-Daimio Sadowara in Hiuga, who joined Saigo with about 300 ex-retainers, is now busily engaged in Nobeoka

of same province, enlisting new men.—A telegram from Nakatsu, Bungo, despatched at 11 p.m. on the 15th instant, says that an advance of the insurrectionary armies, which penetrated to the province of Bungo on the 13th, marched within fourteen ri of the Owake Kencho, which is quite unguarded, while its branch office of Nakatsu is occupied by only about 100 police men.—Shimadzu-Hisamitsu is dwelling at Higetsudono, which is about 30 ri from Kirishima, where his son is living. He has made a present of large quantities of lint to the wounded soldiers of Saigo in Hiuga:—Another despatch from Kumamoto, sent at 5.5 p.m. on the 15th, says that a battle was commenced at Midzumata on the 14th instant, which ended in an imperialist Victory.

On the 15th instant an excited rumor was current in Tokio, to the effect that the shizoku in Chiba-ken (following examples given in the South-west) having attacked the local office, are now advancing for Tokio. This was not right. But the farmers in the same ken became greatly discontented on account of alteration of the land tax. In spite of the warning of the local authorities, many of them held meetings, and decided to complain to the Home Department themselves, without the intervention of the kencho. They marched as far as the village of Matsudo on the 15th and a body of police in Tokio was sent out to meet them.

OUT of three men-of-war, which were ordered by the Japanese government in England, two, viz., *Fuso-maru* and *Kongo-maru*, are nearly completed, and are expected to be launched in June next.

THE condition of H. E. Kido, *Naikaku-komon*, is daily becoming worse.

ON the 16th instant, Mr. Nakamura of the *Kinji Hiron* was condemned to one month's imprisonment for having violated the press regulations and Mr. Yamamoto of the late *Ehime Shinbun* to one month's imprisonment with thirty yen fine for the same offence.

A TELEGRAM from Awomori, received at 11.30 a.m. the 15th instant, announces that many of the ringleaders, of the disturbance last month, were arrested, and good order was restored.

YESTERDAY H. E. Okuma, Minister of the Finance Department, returned to Tokio in the *Nagoya Maru*.

THE *Hochi Shinbun* says:—A telegram sent by the governor of the Owake-ken at 10.10 a.m. on the 16th instant announces that on the 12th the insurrectionary troops penetrated to Shigeoka, Bungo. On the following two days about 1,000 attacked the police office at Takeda, of which they made themselves masters, and they are ready to attack the Owake Kencho. No soldiers are in the province and an army is required to be sent thither.—Another despatch, sent by the War Counsellor Yamagata at 7.20 p.m. on the 16th, announces that one battalion was sent out against the insurrectionary troops at Takeda, Bungo, and Colonel Oku with 200 soldiers to Kokura. On the 15th the insurgents were driven back with loss from Midzumata and the victorious imperialists captured a standard, one cannon, and twenty rifles.—A telegram from Kioto, despatched at 8.30 a.m. the 17th, where it was received on the 16th, states that the insurrectionary army at Takeuchi marched as far as the village of Imaichi, which is not far distant from the Owake Kencho.

THE *Sougi Oki*, Minister of Judicial Department, leaves to-day for Kioto in the *Nagoya-maru* and Kanai, his secretary, follows him thither.

THE *Choya Shinbun* publishes the following items from a letter, dated the 5th May at Kumamoto:—

We have already informed you about the war condition in Kumamoto. Repose was taken after the campaign which ended in the relief of the famous siege of Kumamoto. The first, fourth and other divisions of the imperialist armies have successively landed in Kagoshima; and it is expected that the imperialists in Higo will advance in the course of a few days. The insurrectionary troops are said to have assembled in Hiuga; but greater numbers of them are in the castellated city of Hitoyoshi, where Saigo has established his head-quarters. The imperial forces on the side of Higo are expected to establish their head quarters at Yajiro on commencing the second campaign. The road between Yajiro and Hitoyoshi is intercepted by steep hills, valleys and rivulets. Beside these natural advantages several batteries were built by the insurgents at each strong and commanding place. Some desperate battles are expected to take place there between the imperial armies and those of Saigo. The river Kumagawa runs along the side of the mountain road. This river is famous for its rapid current. The source is in the inner part of the mountainous region of Hitoyoshi and it runs into the Yajiro sea. It is about fifteen ri from Yajiro to Hitoyoshi; though communication in a boat can be had within three hours on account of the rapid current. There is great fear on the part of the imperial troops that the insurgents will dam up the water of the river at Hitoyoshi which would be a serious disaster to the imperial army and seriously impede their march along the road by the river bank. There are three other roads to Hitoyoshi. But each of them is also narrow and mountainous and there is no dwelling house for about five or six ri. During the Summer season blood-suckers and other poisonous insects abound in the mountain roads. The road between Hitoyoshi and Kagoshima is a little smoother than the others and the imperialists are expected to advance on that road. The city of Hitoyoshi contains about 50,000 population, surrounded by many villages, and produces about 25,000 Koku of rice.

NOTIFICATION NO. 12.

To Shi, Fu, and Ken.

The Imperial troops have advanced into the jurisdiction of the Kagoshima ken, where order is to be strictly preserved. It is hereby notified that no merchant vessels of Japanese or foreign form of construction will be allowed to enter, or if there to leave, any harbour under the jurisdiction of the same ken, till further notice.

Those who violate this may be arrested and examined by the officers of ships of war.

SANJO SANEYOSHI,
Daijo Daijin.

9th May, 1877.

H. E. MR. YAMAGATA, War Minister, will shortly return to Osaka from the South.

MR. HATA, editor of the *Saikyo Shinbun*, was condemned to two weeks' imprisonment and a fine of fifteen yen, for having published an offensive letter; and its writer was condemned to ten days' imprisonment and a fine of ten yen.

H. M. THE MIKADO is expected to arrive in Yokohama in the *Tukao-maru* on or about the 20th instant. The Port Admiral's office

in Moto-Benton and the Imperial palace on Isayama are ready for his reception. The *Thabor* will escort the *Tukao-maru*.

A TELEGRAPH office has been opened in Demachi street, Kumamoto.

PRINCE Arisugawa-no-miya has ordered that 180,000 yen be distributed among the people of the city of Kumamoto who were rendered homeless and destitute through the war.

A FIRE, which broke out at Ishigaki, Yonezawa, at dawn on the 8th instant, destroyed about sixteen houses.

THE shizoku in the Ehime ken, who are desirous of establishing a representative assembly, have contributed 2,000 yen towards the war expenses of the government.

FIFTY-EIGHT wounded policemen were brought from the South-West to Tokio in the *Genkai-maru*.

YESTERDAY Mr. Matsukawa, of the *Bumi Shinshi*, was condemned to three months' imprisonment at the Tokio Saibansho for having transgressed the press laws.

30,000 pairs of straw sandals are to be sent to the South-West.

SHIMADZU and his family have left Kagoshima owing to the troubles and are sojourning near the hot baths of Ubeyado.

IKEDA TOKUSHIRO, a Kagoshima shizoku, would not follow Saigo to the war, but remained at home. When Yetsumi and Beppu, rebels leaders, returned from Kumamoto to enlist new troops, they ordered him to follow them to the seat of war and take arms for Saigo. He positively refused, and so was taken by force to the insurgent camp at Yajiro, where he was again ordered to serve with the rebels. But he again refused, to the great annoyance of the rebel leaders, who killed him on the spot, cut off his head, and threw it into the Kumagawa river.

H. E. MR. MORI-ARINORI, Envoy Extraordinary and Minister Plenipotentiary in Peking, is expected to leave for Japan during this decade, arriving about the end of this month.

IN the Wakayama-ken about two battalions have been raised. Barracks have been built in the city of Wakayama. The new levies consist of ex-retainers of the ex-lord Kii who saw service in the former civil wars. They are disciplined in the German style.

THE *Osaka Nippo* reports that H. E. Kido is very ill and is getting worse (not convalescent as stated by this morning's *Advertiser*.) On the 5th instant the Empress Dowager sent him a present of two cases of wine and two boxes of delicacies, with kind enquiries after his health.

It is rumored, says the *Hochi Shinbun*, that Government taxes will in future be paid in money or rice, as may be more convenient to the taxpayers.

THE same paper states that the Finance Department had expended 11,939,600 yen on the Southern war, up to the 7th instant.

THE *Osaka Nippo* says that the Han-o (king) of Loo-choo will shortly visit Japan.

THE same paper asserts that the Japanese Government will shortly send a man-of-war to Europe to watch the warlike operations between Russia and Turkey.

ON the 8th instant, His Majesty the Mikado gave a banquet at the palace in Kyoto to his relations and high officials in his service.

ABOUT 250,000 eggs monthly are consumed in the military hospital in Osaka.

VARIOUS rumors of disturbances in Kochi-ken, says the *Hochi Shinbun*, are heard through-

out the Eastern provinces. But Mr. Itagaki, ex-Sangi, is calmly reposing in his pleasure house at Kumie, which has a fine landscape view on the road between Hirato harbour and the castle city of Kochi. He is spending his time in hunting.

A TELEGRAM from the Tsurugaoka-ken that the shizoku of Shonai, Dewa, have again become much excited, is said to have been received a few days ago by the government.

THE *Choya Shinbun* has the following private telegram from Kumamoto:—Two men-of-war sailed to Hiuga and bombarded the castle-city of Nobeoka, in that province. The insurgents were much confused and their wounded men were removed to another place. The imperialists at Yabe entered that province by the Mamihara road.

A Kinder Garten is to be attached to all the primary schools in Osaka.

THE *Hochi Shinbun* received a private telegram from Kyoto at 4.40 p.m. on the 13th, stating that the departure of H. M. the Mikado which was fixed for the 17th instant was postponed.

THE same paper says that H. E. Mori, Envoy Extraordinary to Peking, was intending to leave for Japan, but that he had received orders by telegraph from his Government to remain.

IKEDA KICHIJURO, commander of the Kumamoto rebels, who joined the Kagoshima men, differs in his opinion from Saigo. He has left the rebels and surrendered to the imperialists.

KATSURA EMON, one of the distinguished rebel leaders, has marched for Nobeoka, on the Takanabe roads, at the head of about 500 men who have been newly enlisted.

LAW REPORTS.

IN H. B. M.'S COURT AT KANAGAWA.

Before H. S. WILKINSON, Esq., Acting Law Secretary.

MESSRS. KIRBY, C. S. BLAND, F. D. WALKER, WM. GORDON, C. H. DALLAS, Jurors.

Friday, May 11th, 1877.

WM. HOWLES vs. E. C. KIRBY AND OTHERS.

The following is the Plaintiff's Petition.

Yokohama, the 3rd day of July, 1876.

Between WILLIAM HOWLES, Plaintiff, and E. C. KIRBY, trading at Yokohama as E. C. KIRBY & Co.; A. MITCHELL, trading at Yokohama as CURNOW & Co.; G. WHITFIELD (out of the jurisdiction of this Court) and P. S. DOWSON, trading as WHITFIELD and DOWSON; G. DOMONEY (out of the jurisdiction of this Court) and A. PLUMMER, trading as DOMONEY & Co.; and W. H. TALBOT, Defendants.

To RUSSELL ROBERTSON, Esq., Judge of the said Court, the petition of WILLIAM HOWLES the above-named Plaintiff,

SHEDS AS FOLLOWS:—

1.—That in the year 1870, the said plaintiff was engaged in business as engineer and boiler-maker at Yokohama aforesaid together with one Black, a citizen of the United States of America.

2.—That in the month of June in the said year the said plaintiff and Black were unable to meet their engagements promptly and immediately, and did then call a meeting of their creditors for the purpose of effecting such arrangement between them and their said creditors that they might thereby continue to carry on the said business and might be enabled in course of time to pay off the demands of their said creditors in full.

3.—That the defendants (except the defendant Talbot last mentioned) were then creditors of the

said plaintiff and the said Black and did attend and take part in the meeting of creditors summoned as in the preceding paragraph stated.

4.—That the creditors before named with others not within the jurisdiction of this Court on or about the 24th day of June in the said year appointed the defendant Talbot their agent and representative to act for them in the management of the affairs of Howles and Black, and thereupon the said defendant Talbot accepted the said appointment and assumed the title of "creditors' assignee of the estate of Howles and Black, bankrupts."

5.—That neither at this time nor at the time of the committing of the grievances complained of were the said Howles and Black or either of them bankrupts. And at the times beforementioned the estate and property of the said plaintiff were sufficient when and if properly realized to pay all the debts due by him to his creditors in full.

6.—That on or about the 4th day of August in the said year the said plaintiff by letter addressed to the defendant Talbot offered to assign to the said Talbot for the benefit of his, the said plaintiff's, creditors the whole of his property on condition and in consideration that the creditors would then exonerate and discharge him from his debts and liabilities. That the said defendant Talbot thereupon submitted the offer of the said plaintiff to the said creditors, but the said creditors refused to accept the same.

7.—That the said defendants afterwards with their agents and servants unlawfully entered upon the close of the plaintiff known as No. 107, Yokohama, then occupied by the plaintiff and ejected him therefrom and continued therein a long time and unlawfully, and against the consent of the said plaintiff sold the lease of the said close and all the interest and estate of the said plaintiff therein together with the workshops foundries offices and buildings the property of the plaintiff then being thereon to the great damage of the plaintiff in his estate and credit and whereby he was rendered unable to continue his trade and business.

8.—That the defendants afterwards, namely on or about the 14th day of August in the said year, unlawfully seized the goods and chattels of the said plaintiff namely stock-in-trade materials machinery and the tools and furniture of the said plaintiff and deprived him of the use of the same and converted the same to their own use. Whereby the plaintiff was greatly injured and damaged in his trade and credit and was thereby rendered wholly incapable of continuing his trade and business as aforesaid. And the plaintiff claims \$15,000. The plaintiff therefore prays as follows:—

1.—That there may be awarded to the plaintiff damage for the wrongs complained of with costs of suit.

2.—That the plaintiff may have such further and other relief as the nature of the case may require.

HENRY C. LITCHFIELD,

No. 12, Bund, Yokohama,
Plaintiff's Counsel.

The defendants to this petition are—

Messrs. E. C. Kirby & Co.,	No. 100, Yokohama.
" Curnow & Co.,	" 83, "
" Whitfield & Dowson	" 69, "
" Domoney & Co.,	" 17, "
" W. H. Talbot,	" 89, "

The plaintiff was represented by Mr. Kirkwood and the defendants by Mr. Dickins.

The Court called the litigants, and Mr. Dickins answered for three defendants, but on behalf of Mr. Plummer, he said that as the rules of the Court had not been complied with in the serving of the notice upon him, he should move that the case so far as Mr. Plummer was concerned should be postponed until the rules of the Court had been complied with.

His Honour asked what evidence Mr. Dickins had that the rules of the Court had not been complied with, upon which

A. Plummer was called and sworn, and testified that the notice of trial had only been served on him about nine o'clock yesterday morning.

To the Court the witness said that he had had no notice of the trial before, except a conversation that took place between him and Mr. Talbot, who mentioned incidentally

that such a case was coming on, and which conversation took place a long while ago. And on that occasion Mr. Talbot did not say anything about a petition on his behalf. He had never employed counsel to appear for him through Mr. Talbot.

W. H. Talbot was then called by the Court and sworn. He said that he received a summons of petition in this case—one he kept himself, and one he gave to Mr. Kirby or to Mr. Dickins. He was not certain that he had not received more than two petitions. He had some conversation with Mr. Plummer about employing counsel on the same day as he received the petition. On being asked whom he would like to defend the case, Mr. Plummer said that he did not care who was employed, as he cared nothing about the case. Mr. Kirby said that he would retain Mr. Dickins, so the witness told him to engage him also on his behalf.

His Honour said that he was satisfied that Mr. Plummer knew the case was coming off, but if Mr. Dickins would show him that the excluding of Mr. Plummer in the case to-day would be necessary he would make the order.

Mr. Dickins replied that the rules of the Court should be complied with; and on being asked to produce them, read them over. It was evident that eight days' notice had not been given. At the present moment his client did not actually know what were the particulars of the case. Had he known it might have been to his interest to have acceded to the request of the plaintiff. No great harm, any way, would result from the postponement of the case.

His Honour said that if the counsel for the other side had no objection he had not.

Mr. Kirkwood said that he most decidedly objected, for in that case he must ask for a postponement of the case.

Mr. Talbot was recalled, relative to a statement made in his evidence, and reiterated that Mr. Plummer had said that he did not care anything about the case.

To the Court the witness stated that he certainly understood that counsel was to be retained on behalf of Mr. Plummer. He could not say how it was that Mr. Dickins had not been employed on his behalf. Mr. Kirby had called on him and took the petition from him, stating that he relieved him of all further trouble.

Mr. Dickins said that it was impossible for him to conduct the case on behalf of Mr. Plummer, as he had not had any conversation with him relative to it. He might have some special defence or might be willing to withdraw altogether. Mr. Mitchell had a special defense as well as general one. The rules of the Court were imperative, and His Honour had no discretionary powers. It was only the other day that he had seen a report of a similar motion.

Mr. Kirkwood said that he would consent to an adjournment if Mr. Plummer would pay the costs of the adjournment.

His Honour said that could not be allowed.

Mr. Dickins further contended that Mr. Plummer was not bound to answer, as he had only received one day's notice instead of eight days which was given on the petition.

His Honour said that it was evident to him that Mr. Talbot was authorised to retain counsel for Mr. Plummer. He then asked Mr. Dickins if he considered that going on with the case would damnify Mr. Plummer.

Mr. Dickins replied that he did not think, so far as he knew the case, that Mr. Plummer would be damnified by its going on; but then it must be remembered that he had

not had any conversation with Mr. Plummer.

His Honour asked Mr. Dickins for the rules which he relied upon, which were specified by that gentleman.

His Honour ruled that considering that Mr. Plummer would not be damnified Mr. Dickins' application be refused.

Mr. Dickins requested His Honour to take a note of his exception.

The names of the Jury were then called over.

Mr. Kirkwood then introduced his case to the Court. In the year 1870, Mr. Howles, with one Black, carried on business as boiler-maker. He had been successful and accumulated some thousands of dollars. In that year he rented the premises on No. 107. He erected workshops &c. His lease was a liberal one. In the Spring, owing to having invested largely, he was unable to meet temporarily some demands which fell upon him. This was partly attributable to Mr. Black. The full extent of his liabilities were only \$3,000. He was unable to meet this, and called at the consulate, when Mr. Lowder was consul. He was informed that he, Mr. Lowder, would refer to the judge at Shanghai, as he was not quite certain about the law. He was finally advised to call a meeting of the creditors and lay his case before them. A meeting did take place, but he was not present. Another meeting was held, in which Mr. Talbot was instructed to take charge of the plaintiff's affairs. The next he heard of it was a notice in the paper that his premises were going to be sold. He then called on Mr. Talbot and told him that he did not wish the property to be sold as his business was paying very well. He further wrote a letter offering to assign his estate to the creditors which proposal was not accepted. As the notice of sale still appeared in the paper, the Consul then wrote to Mr. Talbot informing him that if he sold the premises it would be at his own risk. The next morning from what he heard he went and saw the premises were being sold; they were sold and did not fetch more than one fourth of what they had cost. Plaintiff then complained to the consul. Besides this a large portion of the proceeds had been expended by Mr. Talbot in law suits. Before the sale a long correspondence had taken place, which terminated in two letters being sent which showed clearly the opinion of those parties. The learned gentleman was then proceeding to read the letters, but Mr. Dickins objected unless the letters were proved.

Mr. Kirkwood then continued his explanation of the case of the plaintiff. He contended that the defendants had acted illegally in selling the property: He, plaintiff, did not claim the proceeds of the sale. He then specified the items which made up the total.

Some argument took place relative to "special damages," which the counsel for the plaintiff claimed, and which Mr. Dickins contended was not set forth in the petition.

Mr. Kirkwood said that he presumed there would not be any objection afterwards concerning the fact that Mr. Black was not a co-plaintiff.

William Howles, was then sworn:—He stated:—I live at No. 14 Kaigandori, in the native town. In the summer of 1870 I was keeping an engineer's shop at 107, Creek, Yokohama. The value of my business was about \$14,000 or \$15,000. There was a blacksmiths' shop, engineering shop, one moulding shop, one office, one banto's house, also a dwelling house in the centre of the allotment. I leased this property from Mr.

Allmand. The last I heard of the lease of the property Mr. Martin had it. The lease has never been cancelled. The terms of the lease were for 5, 10, or 15 years.

Mr. Dickins objected to this.

Witness continued:—I erected the buildings on 107, except the dwelling house. The value of the buildings I erected was about \$3,365, including fixtures. There were no inside fixtures included in the account. I insured the buildings for \$5,000, not including the dwelling house. The stock in trade was not insured. I was indebted about \$3,500; and I valued my stock in trade at \$14,000. I was unable to pay, because my partner's money that was expected to come from America did not come. I went to the Consul and explained I had plenty of stock in trade but not the cash. I was advised to go into Bankruptcy, but I told the Consul we did not wish to do that, but only wanted time until my partner's money came from America. I was advised to hold a meeting of creditors and appoint one as trustee.

Mr. Dickins objected to this evidence, but Mr. Kirkwood contended that his objection was too late as it should have been made before the question was answered.

Objection overruled.

Witness continued:—In consequence of what the Consul told me I called a meeting of my creditors by letter and verbally to be held at 107, where it took place. What occurred at the meeting I cannot say as I was outside all the time. When I went in the meeting was all over. I did not call any further meeting of my creditors. I saw through the newspapers that another meeting of the creditors of Howles and Black was called. I went to that meeting, but I could not hear distinctly what they said. They talked a good deal but I don't remember what they said. I was not summoned to attend at that meeting. The next I saw in reference to my property was a notice that it was to be sold by public auction. The date I cannot say. It was about two months before the sale of my property. In consequence of seeing that advertisement I went to Mr. Talbot and told him not to sell the property; and Mr. Talbot said that he would write to the creditors. I wrote to Mr. Talbot asking him to allow me to go on with the business.

Mr. Kirkwood asked Mr. Dickins to produce that letter. Mr. Dickins said no such letter had ever been received by Mr. Talbot.

The witness continued:—Mr. Talbot communicated with Mr. Kirby and showed me a letter from Mr. Kirby. The date I cannot say, nor the month.

Mr. Kirkwood applied for this letter.

Mr. Dickins said he could not produce a letter unless the date was mentioned.

Mr. Kirkwood asked for a letter written by Kirby to Talbot about the beginning of August concerning the property of the plaintiff.

Mr. Dickins said no such letter had been received.

Witness continued:—The contents of the letter read to me by Mr. Talbot was to the effect that Mr. Kirby would not give me a clear release unless he could see the amount of the assets. I did not read the letter myself. I did not take a copy of the letter. That letter was in answer to a letter written by me to Mr. Talbot.

Mr. Dickins objected to any evidence being taken respecting the letter unless it was proved that it was in existence, which required something more than the plaintiff's bare statement that he had written such a letter. He denied that such a letter had been received.

Witness continued:—I delivered that letter in the beginning of August in 1870 to Mr. Talbot. I still saw the advertisement announcing the sale of my property after I had written the letter. On the morning of the sale I went to the consulate. The sale was on the 10th of August. Previous to that I lodged an objection to the sale at the consulate.

Mr. Dickins asked for the production of that document.

Recess till two o'clock.

On the Court resuming,

Mr. Kirkwood said that in respect to the letter mentioned in the forenoon he had seen H. B. M. Consul, who was willing that it should be produced in Court.

Mr. Dickins said that any letter sent by the plaintiff to the Consul was not admissible evidence.

His Honour ruled that the document referred to was admissible evidence.

Mr. Dickins said that the letter referred to had been accidentally found among some old papers, but its existence did not appear to have been known. However, it was for his learned friend to show that the letter had been received prior to the sale.

Mr. Kirkwood read the letter.

W. Howles continued:—Mr. Hill conducted my business at the time of sale. The reason I did not go to law at the time was because I had not the means. I stayed some two months longer in Yokohama and then went to Kobe. I received the account sales from Mr. Talbot in 1872. After I received them I saw Mr. Talbot and asked him if the creditors had any ill will against me. He said, no, they had not. I said, then, "Why do they not send me a clear release?" I afterwards wrote to Mr. Talbot. (The letter was put in and read.) I don't recollect when I came to Yokohama. The value of the buildings mentioned in the first item in the account sales was about \$3,500. They were my own property and I had the option of removing them. Small drilling machine was worth \$35; the levelling plate \$35.00. Seven forges were sold at \$2 each. The value of one suage block cone and ram I could not say. Seven anvils of 3 cwt. were worth about 15 to 17 cents per lb., and so were worth about \$50 each. They were sold for \$17 each. Grindstone and trough were sold for \$1. They might have been worth from \$10 to \$50. The bench and two vices were sold for \$12. A vice would cost \$20. A shearing machine would be worth \$255 in San Francisco. It was sold for \$26. Sledge hammers were worth \$2 each. Hand hammers were worth 75 cents each. Four flogging hammers \$2 each. Tongs were worth \$1 each. 106 were sold for \$40. Pipe tongs are worth \$2 each. Four rivetting hammers would be worth \$1.00. A portable punch would be worth \$40. A drill post would be worth \$25, except it was a common one when it would be worth about \$10.

The foreman of the Jury said that if it would save time he might say that the jury had a fair understanding of the difference in the valuation of the witness and what the goods were sold for.

Mr. Kirkwood said that it was the only way by which evidence could be produced as to the value of the goods.

His Honour suggested to the jury that it would be better to allow the examination to proceed as it had been going.

Witness continued:—One lowmoor plate was worth \$64. One hand lathe \$100. A screw cutting lathe would be worth from

\$300 to \$3,000. Foundation plate of the furnace would cost from \$50 to \$60. One lot of dies cost me \$17 and another lot \$150. I never saw any of the proceeds of the sale.

To Mr. Dickins:—The buildings on lot 107, were useful for stables as well as for what I used them for. They might have been easily converted into dwelling houses. I have not read the petition; it was read to me. The statements contained in it are all true. That document is my deed of partnership (produced.) The amount of money I had in October 1869, I cannot say. My books may be able to show. I had not \$500 in cash when I entered into business with Mr. Black. There might have been that amount in the cash box. Black paid \$1,400 to enter the business. When I commenced business I had stock to over the value of \$500. I cannot point it out in the books because I am not sufficiently educated. At the date of the partnership I was not indebted to the extent of \$4,589.

Mr. Dickins then put into Court the deed of partnership and read the latter part in which it was stated that the debts of Howles amounting to \$4,588.10 were to be paid equally by him and his partner.

Witness continued:—That is the money my partner was to bring and not my debts. I have no books to show what stock I had on the 11th of November 1869. Mr. Talbot took them all. The amount of the stock on hand on 11th November 1869, was very little. Between November 1869 and June 1870 I bought a lot of stock. At the end of December 1869, I had \$9,000 or \$10,000 worth of stock. Between January and June 1870 I cannot remember how much I bought. When I bought stock I got invoices, which Mr. Talbot is supposed to have. I have no proof whatever as to the amount of stock I purchased between January and June 1870. I have no other knowledge that Mr. Talbot has the invoices except that he was appointed trustee to look after the estate. The creditors did not offer that I should carry on the business and pay the amount of the debts out of the profits, except J. D. Carroll. Between June and August I was not in Yokohama all the time. Part of the time I was second engineer in the *Shueh Ling*. I was frequently in Yokohama during July and August. There might have been a summons against me for \$196 by Bavier & Co. in May 1870. I will swear that is not my signature to that document. I will swear I did not admit the debt to Bavier & Co. and crave for time to pay it in. Early in June a suit was brought against me by Phillips for \$550. I don't know that there was a judgment. I never paid it. There was also a claim for \$70 by Mitchell which was not paid. Whitfield & Dowson's claim for \$50 was not paid. The claim of Mr. Gray for \$107, balance of promissory note for \$700, was not paid by me. In June 1870 I cannot remember that Carroll & Co. sued me for \$523. I never paid them. I saw advertisements in the papers which had reference to the meeting of creditors and the appointment of Mr. Talbot as assignee. I never objected to Mr. Talbot being appointed assignee. I objected to Mr. Sutherland being put in possession of 107 to Mr. Talbot about a week after he was put in possession. Mr. Talbot said that it was Mr. Kirby who had put him there. I objected to the party appointed to take the stock in trade as he would sell it for next to nothing. I never objected in writing to the sale either to Mr. Talbot or any one of the creditors. I took no legal steps to stop the sale.

offered to give up the whole of my property upon having a clear release given me. My creditors offered to release me if I would answer certain questions. Mr. Hill was my counsel from the 20th of June till the middle of September. I don't know Mr. Hill's handwriting. On the 24th of June, 1870, Mr. Hill was acting for me. I knew a man named Longfellow. He was in my employ. He did not walk away in June with goods belonging to the firm. He took a little that belonged to me. He did nothing wrong in taking it. He sold the property he took away. Some of it came back to the firm. The value of the property was about \$1,400. \$1,200 dollars came back to the firm and the remainder went to Walsh, Hall & Co. There was no other property taken away. I think it was in 1869 when Longfellow took the goods. I don't recollect making an affidavit before Mr. Lowder on the 20th of June 1870 to the effect that one Longfellow had taken certain goods without my consent or authority. On the 12th July I do not recollect that I made an affidavit before the American Consul to the effect that Longfellow had taken some things away. I took two policeman to 107 to take Longfellow into custody. He was not there at the time. I don't think that I swore any affidavits in respect to Longfellow. After the sale I cannot say that I wrote to Mr. Talbot objecting to the sale. In 1872 I objected to the sale, to Mr. Talbot, in writing.

Mr. Dickens then read some correspondence which took place between the plaintiff and Mr. Talbot.

Witness:—Since I received the letter in 1872 I have made no objection to any of the items in the account sales or in the list of liabilities. Kirby's claim is not correct and I have a letter which will prove it. At that time we had no money to pay our debts. I admitted in my correspondence that we were insolvent. I don't know when I was ejected from 107. I was not ejected by force. No objection was made at that time in writing, that I can remember, to Mr. Talbot taking possession. Afterwards a letter was written, objecting to Mr. Talbot being in possession. I got a letter from Mr. Talbot, dated 14th July, 1870, to the effect that the creditors would not consider what I earned as part of the estate, but as my own property. The firm of Howles & Black did no business after the 17th or 18th of June 1870. If the creditors had sold my property and given me a release, I should have been content. My objection is not founded on the fact that the creditors did not give me a release, but because they sold the property and paid no one. If I had had a release given me I should not have had any claim. There was nothing I could not have answered in the questions put to me by the creditors. I never paid any of the creditors one cent in the dollar. I cannot say that the whole of the proceeds of the sale were spent in protecting the estate. I have reason to believe that some of the items in the accounts are not correct. I object to the first item in Kirby's account. I never objected to it before during the past five years.

The Court adjourned until 9 o'clock a.m. to-morrow.

Saturday, May 12th, 1877.

This case was resumed this morning, when the plaintiff's cross-examination by Mr. Dickens was continued.

Witness: I have been employed as an engineer for the past 17 months by the Mitsui Bishi Co., at the rate of \$150 per month. I had no money when I entered their service. In June 1870 I owed \$3,665, and have not a list of creditors to whom I owed that amount made up by myself. The money with which I purchased the \$14,000 worth of stock I got while in Nagasaki and from the profits of a contract. I have no proof of this other than my assertion. The contract was entered into in 1869. I have not a copy of the contract, neither have I any proof of having received any money. I have got no receipts for payments made in 1870. About June 1870 there might have been \$400 due for rent. I never received any notice from the landlord requesting me to quit the premises. By June there was not \$600 or \$700 due for wages, and \$312 was decidedly not owing to Spiers. I did not promise to appear against Longfellow in the American Court. I cannot say when Longfellow took the goods away, but I know that he took them. There is an entry in the ledger showing that Longfellow took away goods to the value of \$1,468. I never gave him a bill of sale.

Mr. Dickens asked a question about a certain document being a certified copy of the bill of sale, but Mr. Kirkwood objected to the question and His Honour supported the objection. Finally, however, Mr. Kirkwood admitted the document, but not as a bill of sale.

Witness:—Longfellow took goods away two or three times, and no receipt was ever given for them.

Mr. Dickens then produced a copy of a document from Longfellow acknowledging the receipt of the goods, dated 21st June, and containing a proviso that the goods should be returned if there was any trouble with the creditors.

Witness:—I have no reason to suppose about \$1,100 was paid to certain creditors during the month of or previous to June 1870. None of the creditors sued me that were then paid that I can remember. In February 1870, I owed Mr. Glackmeyer the sum of \$1,700, which I never paid him. I do not owe anything now. The creditors paid themselves from the amount they took from the proceeds of the estate. Supposing they had never paid themselves out of the stock-in-trade, I should consider myself indebted to the creditors; and in that case I should only be too happy to pay them. Mr. Black is dead. I received a letter from his sister that he had met with an accident and was dead. I was frequently instructed by Black before his death to institute these proceedings, both in writing and verbally, but have lost the papers. I have not got the list of questions submitted by Mr. Talbot.

Mr. Dickens called upon Mr. Kirkwood for some correspondence which was produced. The first was a letter from Hill to Talbot, requesting a statement of the amounts due by the estate of Howles and Black. The reply showed that over \$7,000 was due; and the outstanding accounts and the property as valued was about \$4,000, leaving a deficiency of about \$3,000. Other letters were read concerning the insolvency of the plaintiff's firm, announcing their readiness to assign the whole of their property in consideration of a discharge and negotiations for a winding up of their affairs.

To Mr. Kirkwood:—The last I saw of the stock book was at 107. I did not take it away from there. It was with the other books, I believe. When I saw the advertise-

ment about the sale of the property, I went to Mr. Talbot and asked to be allowed to carry on the business. I got no answer, so I wrote to Mr. Talbot. Mr. Talbot informed me that Kirby & Co. refused to accede to my request. I never gave my consent to the sale taking place. When I received the accounts in 1872, I objected by letter to them. (Letter read). I never told the defendant, Talbot, I did not owe Kirby \$1,300. The amount I owed was about \$500. I did not owe Haskell or Mrs. Green anything. A great part of the goods that were taken away by Longfellow belonged to him. In June, 1870, Mr. Talbot told me that the amount of the debts owed by the firm was \$3,500.

Mr. Kirkwood said that he wished to prove from the records of the Court that Mitchell was a partner in the firm of Curnow & Co. in 1870, which was denied in the answer.

Mr. Dickens objected; and His Honour called for proof from Mr. Kirkwood that this would be admissible evidence.

Mr. Dickens contended that Mr. Kirkwood ought to call Mr. Mitchell as his own witness, and subject him to an examination.

His Honour supported Mr. Dickens, and Mr. Mitchell was sent for.

George Whitfield sworn:—I was in Yokohama in 1870; and recollect lot 107. At first there was only a small bungalow on the lot, after which other buildings were erected. The value of the buildings—

Mr. Dickens objected to the evidence, as the witness should have surveyed the property, and supported his objection by authority.

His Honour ruled that the evidence of the witness was admissible.

Mr. Dickens asked His Honour to take a note that he objected to the witness stating his opinion as to the value of the property, on the grounds that it does not require a skilled witness, and that there was nothing to show that these buildings had been examined with a view of ascertaining their value.

Witness continued:—The value of the blacksmiths' shop was about \$1,000 or \$1,200; the engineers' shop and foundry were in the same building, but I cannot estimate their value. I cannot remember the office, sheds &c. \$100 a month I should think was rather a high rental. The value of a small hand-drilling machine, laid down here, would be about \$25; the cost in England would be about £3.10. A levelling plate of 15 cwt, as old material, would be 1 cent per pound. To make it would cost 7 cents per pound. The 7 forges were fitted with Japanese bellows, and would cost about \$15 each. A new portable forge of small size is worth \$25; a large size would cost double that amount. New anvils are worth about \$30 each. The selling price here now would be about \$40 each. A grindstone is worth about \$10. New vices are laid down here at 12½ cents per pound. A shearing and punching machine, to buy it new, would cost \$250. To buy small hammers one would have to pay about 75 cents each. A drill post would cost about \$20. The price of a lowmoor plate would cost from 8 c. to 13 c. per pound. An average plate would weigh about 650 lbs. and would cost \$65. The hand-lathe that was the property of the plaintiff would be worth about \$250. A screw-cutting lathe was worth about \$250. A duplex punch would cost here \$100. The foundation plate was cast at our place and probably cost about \$40 or \$50.

To Mr. Dickens:—I was in Yokohama in 1870. As a rule goods that have been used

are not worth as much as if they were new. My firm bought a number of articles at the sale. At the time of the sale I did not see any of the goods.

To the Jury:—Sometimes there is a market in Yokohama for these things, but not a steady market. Sometimes there is a demand and at others none at all. In selling a machine shop at auction one would expect to stand great loss.

A Mitchell, sworn:—I have read my answer to the petition and the statements therein are correct. It is true that in 1870 I was not trading under the firm of Curnow & Co. I deny having been a creditor in 1870 of the plaintiff. A man named Page sued me in 1870, but I do not recollect the date. The claim was for \$10,000. Mr. Marks appeared on my behalf and Mr. Johnson appeared for Mr. Page. I recollect being cross-examined by Mr. Johnson as to my being a partner in the firm of Curnow & Co. I don't know that I said in that cross-examination that I was a partner. People might have understood that I was a partner. I recollect making a statement that "I am not but I was in the firm of Curnow & Co. I left on the 11th of this month." Mr. Curnow put an advertisement in the paper stating that I was no longer a partner.

The advertisement was read by Mr. Kirkwood and was dated 12th July 1870. It stated that the partnership hitherto existing between J. Curnow and A. Mitchell was that day dissolved.

Witness:—The advertisement was put in because it was understood by the public that there was a partnership.

To Mr. Dickins:—The first partnership was drawn up in 1873 between Mr. Curnow and myself, up to that date I received a salary. Curnow treated me as a partner, though there was never any agreement; and when this affair took place, the advertisement was put in the paper at my request to prevent my being in any way entangled in it. I never authorized Mr. Talbot to take proceedings against the plaintiff. The suit brought against Howles was brought by Mr. Curnow himself. Mr. Howles never objected to my name not being added as co-partner. After the 4th of August I did not enter upon the premises of 107.

This concluded the case for the plaintiff. In order to save time, Mr. Dickins said that he put Mr. Talbot in the box, but did not propose to elicit a reiteration of what had been stated, and the witness was open to any question his learned friend might think proper to put to him.

W. H. Talbot was then examined by Mr. Kirkwood on the following answers made by him to certain interrogatories put by plaintiff's Counsel.

I, W. H. Talbot, one of the above-named defendants, make oath and in answer to the interrogatories served upon me by the plaintiff in the above cause says as follows:—

1.—In answer to the 1st and 2nd interrogatories, I say:—On or about the 20th June 1870, the plaintiff asked one J. D. Carroll to whom he was indebted in the sum of about \$1,000 to interfere for the protection of the property of the plaintiff's firm which was then in an insolvent condition, which property was likely to be endangered by the action of the plaintiff's then partner, one M. M. Black, mentioned in the plaintiff's petition and of one employee of the said firm named Longfellow, and the said Mr. Carroll accordingly with the assent of certain of the then creditors of the plaintiff's firm, and with the full knowledge and approval of the said insolvents, agreed to become an assignee of the property of the said insolvents for the benefit of their creditors. On the 24th June, 1870, a general meeting of the creditors of the insolvents, at which the plaintiff attended, took place

and the said creditors requested me to accept the office of and appointed me creditors' assignee in the place of the said Mr. Carroll, by a resolution copy of which is annexed hereto and marked A. Previous to the meeting the insolvents had suspended all business, and after the said meeting and upon the day thereof a copy of the said resolution was sent to the insolvents' then solicitor, Mr. G. W. Hill, and acknowledged by the latter without any objection, and the fact of my appointment as creditors' assignee in lieu of the said Mr. Carroll was after the said meeting duly advertised in the local press. No opposition or objection whatever was or ever has been offered or made by the said insolvents or either of them or by the said Mr. G. W. Hill to any of these proceedings.

2nd.—In answer to the 3rd and 4th interrogatories I say:—Previous to my appointment as creditors' assignee the said Mr. Carroll had with the knowledge and consent of the said insolvents placed one Sutherland a British subject in possession of the premises and property referred to in these interrogatories, and after my appointment as such creditors' assignee the said Sutherland was continued in possession of the said premises and property under written order from myself as such creditors' assignee as aforesaid sealed and approved by Her Britannic Majesty's then Consul for Kanagawa. On investigating the affairs of the estate I found that one Longfellow, an American citizen, being the person referred to in the 1st paragraph of this affidavit had wrongfully taken away certain property valued at \$1,200 being part of the property of the estate of the said insolvents, and proceedings were at once taken by me in the U. S. Court to recover the same. At the same time the services of an English barrister, Mr. Ross Johnson, then a practitioner of this Court were retained on behalf of the said insolvents' estate, and thenceforth I took no step unauthorized by him. On the 1st July, 1870, it came to my knowledge that it was contemplated to remove by force part of the property of the said estate from the premises where the said insolvents had carried on business as Howles and Black, being No. 107 Yokohama, and on the 2nd July I accordingly instructed the said Sutherland to keep all doors closed and resist any unauthorized attempt to make an entry upon the said premises. The proceedings instituted in the U. S. Court as aforesaid ended in a delivery of the property sought to be recovered upon two of the creditors of the said insolvents giving a bond in the sum of \$1,200, upon which one of such creditors was eventually sued, and on the 15 August 1870 was ordered to pay the sum of \$1,278.90 to the defendant to the said proceedings in the U. S. Court, which was afterwards repaid out of the proceeds of the insolvents' estate. From the time of my appointment as creditors' assignee up to the latter part of July 1870 I was in constant communication with the plaintiff who was perfectly familiar with the whole of my proceedings as such creditors' assignee as aforesaid, and never in any way signified the slightest opposition or objection to any act of mine as such assignee. On the contrary the plaintiff was always willing and desirous to assist me to the utmost in the liquidation of the estate of the said insolvents' and on the 25th day of June 1870 he made an affidavit before the then British Consul expressly to assist the creditors of such estate, in which among other things he admitted the insolvency of himself and the said Black and that their property had become the property of the estate, meaning of the estate of the said insolvent firm in liquidation as an insolvent firm. Further on the 12th day of July 1870 the Plaintiff made another affidavit before I believe the then U. S. Consul at Yokohama by which among other things he acknowledged the insolvency of himself and the said Black, and on the 13th day of July, 1870, the Plaintiff again admitting the fact of his insolvency asked me as such creditors' assignee as aforesaid whether any money he might thereafter earn would be considered as an asset of the said estate. On the 16th July, 1870, the U. S. then Marshal made forcible entry upon the said premises No. 107, Yokohama, and despite the remonstrances of the said Sutherland and the exhibition by him of my said order to him sealed and approved by the then British Consul at Kanagawa as aforesaid forcibly carried away certain property, being part of the property of the said insolvent estate.

The expenses thus and otherwise necessarily incurred in preserving the property of the said estate constituted demands upon the same of so pressing a nature that on the 26th July 1870 the creditors authorised me by resolutions passed at a

meeting of creditors held on that day, copy of which resolution is annexed hereto marked B, to raise sufficient money for disbursements by acting in such way as I might think fit, and in consequence thereof and in view of the fact that a sale was the only available means I had of raising money I authorised, with the approval of the creditors and with the knowledge and consent of the said insolvents and their said solicitor Mr. Hill, Messrs. Furniss & Co. then auctioneers at this port to sell the lease of the said premises No. 107 and the property of the said insolvents by public auction. Sale of the same lease and property by private contract had been previously since the 14th July 1870 advertised by me with the knowledge and sanction of the creditors of the said insolvents and of their said solicitor.

The said sale by public auction, no offer of private purchase having been received in the meantime, took place on the 15th and 16th August 1870 with the full knowledge and sanction of the creditors of the plaintiff of the said insolvents and of their said solicitor, and the full value of the property sold was realised. The said sale was duly advertised in the local daily press from the 29th July 1870, up to the day of sale in the terms following (copy of advertisement here given) and no opposition or objection was offered or made to such sale by the said insolvents or either of them or by their said solicitor. The whole of the proceeds of the said sale have been duly accounted for by me as such creditors' assignee as aforesaid, and no exception has ever been signified to me by any creditor or by the said insolvents or either of them or by their said solicitor to any item of my accounts which have been made out in detail and submitted to and approved by the creditors and inspected by and at all times open to inspection by the said insolvents and their said solicitor. Further until the commencement of the proceedings now pending no objection or claim was ever made by the plaintiff or by any one on his behalf in respect of the said sale and no objection or claim has up to this day been made in respect hereof by the said Black or by anyone authorised by him in that behalf although since the said sale I have been in frequent communication by letter and otherwise with the plaintiffs and their solicitor the said Mr. G. W. Hill, and have also been in correspondence with the plaintiff himself in respect of liquidation of the said estate. No proper books had been kept by the said insolvents and the difficulty and expense of liquidation was thus greater than otherwise might have been the case. At the time of their becoming insolvent their liabilities exceeded the sum of \$7,000. Not one cent of this sum has ever been paid to or received by me for division amongst the creditors, on the contrary, in endeavouring to preserve the said insolvents' property their creditors have been obliged to spend more than a thousand dollars over and above the value of the said insolvents' estate.

The Defendant Mitchell was not in June 1870, or at any time before or while the liquidation of the said insolvents' firm was carried on by myself a member of any firm known as Curnow & Co. or carrying on any business in Yokohama under that firm nor a creditor of the said insolvents' firm and neither attended any of the creditors' meetings hereinbefore referred to or in any way directly or indirectly authorized me to deal with or take any part in dealing with the property of the said insolvents' firm.

3.—In answer to the 5th interrogatory I say:—Some such offer as that mentioned in this interrogatory was made, but whether by letter or not or at what time or whether by the plaintiff or by his then solicitor I cannot remember, but I believe it was made much later than the 4th day of August, 1870, and by the plaintiff's then solicitor and not before the said sale, and the creditors were duly consulted by me with respect to such offer.

4.—In answer to the 6th interrogatory I say:—I was instructed by the creditors to agree to the plaintiff's application for his discharge upon the plaintiff and the said Black making affidavits to the effect that they had delivered up to the creditors the whole of their, the said insolvents', property and answering by affidavit certain questions which were sent to the plaintiff and Black respectively. After some correspondence my conditions were agreed to by the said Mr. G. W. Hill then acting as solicitor for the said insolvents, but the affidavits demanded were never made and the questions sent as aforesaid to the plaintiff and the said Black were never answered in consequence of which the said discharge was never granted.

5.—In answer to the 7th and 8th interrogatories I say:—I have already in my answer to the 3rd

and 4th interrogatories sufficiently answered the matters inquired of by the said 7th and 8th interrogatories.

6.—In answer to the 9th interrogatory I say:—I have within my possession and control a number of books documents and papers relating to the matters in issue in this cause and I annex hereto a schedule marked C of such books documents and papers which being voluminous I have not enumerated one by one throughout but partly by groups.

SCHEDULE A

IN THE ESTATE OF HOWLES AND BLACK.

Friday, 24th June, 1870, 10 a.m.

Present:—Messrs. Carroll, Phillips, Townley, Elgin, McVean, Glackmeyer, Marks (in the chair) Plummer, Curnow, Talbot, Longfellow (retired).

Proposed by Mr. Phillips and seconded by Mr. Plummer,

"That Mr. Talbot be appointed creditors' assignee in place of Mr. Carroll, pending instructions from the Supreme Court Shanghai, with full powers to act forthwith without reference to creditors. Creditors' meeting be called every ten days or earlier as occasion may require.

F. W. Marks; P. pro. E. C. Kirby, & Co., F. Townley; David Phillips; C. A. McVean; Geo. Domoney & Co.; G. Glackmeyer; J. D. Carroll & Co.; J. Curnow & Co.; P. pro. W. Pitt, G. M. H. Elgin; W. H. Talbot.

SCHEDULE B

Howles & Black Bankrupts,

Tuesday, 26th July 1870, 2.35 p.m.

Present:—Messrs. Kirby, Skinner, Glackmeyer and Doctor Siddall, Assignee, Mr. Curnow, Mr. Plummer.

Proposed by Mr. Townley (Kirby & Co.) and seconded by Mr. Skinner that the report of the assignee be adopted.

Proposed by Mr. Townley seconded by Mr. Skinner. That the Assignee be empowered to act as he thinks fit and in any lawful manner to raise sufficient money for disbursements.

P. pro. E. C. Kirby & Co., F. Townley; G. Domoney & Co.; A. D. Skinner; J. Curnow & Co.; P. pro. Jenkins and Siddall; S. J. Stransome; G. Glackmeyer,

without prejudice to my Bill of Sale.

G. G.

SCHEDULE C.

Various letters from Mr. G. W. Hill to Mr. Talbot.
Various letters from Mr. Howles do do do do do Mr. Ross Johnson do
Pleadings and papers in action by Mr. Ross Johnson against Mr. Talbot for costs.

Papers and Pleadings, Talbot v. Domoney.
Letter and account sales from Auctioneers accompanying remittance of proceeds of sale.

Certified copy of Affidavit of Howles dated 25 June 1870.

Copy of Affidavit of Howles dated 12 July 1870
Deed of partnership, Howles and Black.
Copy of Mr. Talbot's Bond as creditors' assignee.
Resolutions of creditors 24 June 1870 and 26 July 1870.

Accounts and correspondence relative to the administration of the estate of Howles and Black.

Various summonses, petitions and judgments against Howles and Black, all dated May or June 1870.

1 Work Book.

2 Cash Books.

1 Ledger.

1 Bundle of Firm's papers.

The first meeting of creditors was called at the request of Mr. Carroll. He did not tell me what took place at that meeting. Of my own knowledge I can only say that Howles told me that he had asked Carroll to interfere in connection with his property. Howles did not say whether he was present or not at that meeting. On the 24th of June I attended a meeting of creditors at the request of Mr. Kirby. I was proxy for a creditor of Howles; for a man by the name of Skinner, I think. I don't know where my proxy is. I think the only proxy I had was a memorandum of the claim, which was for about \$350. No debts

were proved on the 24th of June. The door was not open to everybody. Persons could attend who were supposed to be creditors. I think the meeting was either called by advertisement or circular. I attended that meeting for the purpose of taking over the trusteeship. Mr. Marks was present as representing the landlord. I cannot say that he produced any authority. He was requested to take the chair by the persons present.

Mr. Dickens said if it would save time he would admit that the proceedings were not in accordance with the Bankruptcy Act of 1869.

W. H. Talbot continued:—Howles was present part of the time, but was requested to leave, as the meeting was in possession of some information which reflected on the firm. I was requested by the creditors to call meetings every ten days or sooner. I called them every three or four days. The creditors informed me that the attendance of Howles was not necessary. I acted under the advice of Mr. Ross Johnson the whole of the time. A watchman was placed in charge of the premises, but I never interfered with Howles living there. Howles seemed very willing for his property to be sold. He did not object to the advertisement and was aware that it was going to be put in, though he wanted the date of sale put off as long as possible as somebody from Kobe might come and buy it. In August Howles came to me and offered to give up his property for the benefit of the creditors if they would give him a clear release. Mr. Kirby declined, because Mr. Black had taken away some of the property and Howles was assisting him. For the first ten days after I was appointed Howles did everything possible to assist me in the protection of the property. The creditors authorised me to sell the property. I was authorised first to apply for tenders, and advertised the plant and business for sale for one month, but not a single application was received.

The Court at this stage adjourned till 1 p. m. on Monday.

Monday, 14th May, 1877.

This case was resumed at 1 p. m. to-day, when Mr. Kirkwood continued his cross-examination of Mr. Talbot.

Witness:—I wrote to Mr. Carroll as proxy; and if Skinner was present at the meeting of creditors, I should not have been a creditor. When Mr. Marks signed the minutes of the meeting he was acting for Mr. Allmand. The resolution was written on a piece of paper, then handed round the table for signatures. I believe the list of creditors I forwarded Howles to be a correct list, so far as the names are concerned. Dr. Siddall never attended a meeting. Lucy & Co. did not appoint me to act as their agent, Carst & Co. did not appoint me as their agent. The Yokohama Dispensary did not either, nor Haskell. They were all small creditors. Bridgens never appointed me as his agent. The Japan Mail never appointed me to act as their agent. Only the persons who signed the minutes of the meeting authorised me to act. They represented about four-fifths of the amount owing. The creditors authorised me to retain Mr. Ross Johnson; and I was instructed to act as I thought best. Sometimes I had to call meetings on very short notice, which could not be avoided. The first meeting was held on the 21st and second on the 24th. In the legal sense of the word "proved," none of the creditors proved their debts. The sale, so far as I

can recollect, commenced on the 15th and was continued on the 16th. I do not know that the sale was advertised to take place on the 15th and did not come off until the 16th. I cannot say that I can find any advertisement from the 30th of July to the 16th of August, certifying that the sale would take place on the 15th. The advertisement was inserted by my order. The answers to the interrogatories were made from my personal knowledge. Howles himself told me that he had asked Carroll to assist in protecting the property. I consider that I am responsible for the answers to the interrogatories, but not for the phraseology in which those answers are couched. To the best of my belief Mitchell was not a partner of the firm of Curnow & Co. At the time when I answered those interrogatories I believed then, as I believe now, that Mitchell was not a partner. If my attention had been drawn to the advertisement announcing the dissolution of partnership between Curnow & Mitchell, I should, probably, have modified my answer. I handed the letter received from Mr. Hill on August 19th 1870, to Mr. Ross Johnson. From that letter I presume he thought that what was being done by the creditors was wrong. I do not consider Mr. Robertson's letter an objection to the sale, nor a consent. I was guided in all matters concerning the sale by Mr. Johnson. I recollect sending a report to the creditors. Phillips went over the premises, and I think he estimated their value at \$4,500.

To Mr. Dickens: None of the creditors who were not present at the meetings objected to my acting. None of the creditors objected to the liquidation of the estate. The letter from Mr. Robertson might have been sent to my office on the morning of the 16th, but I was then at the sale and so did not see it until afterwards. I attended Mr. Hill's office to see if Howles and Black, were willing to act straight-forwardly and assist the creditors in recovering the property that had been taken away. I told Mr. Hill some of the property had been removed by Black or his agents, and stored in a godown. I told Hill also that if Howles and Black would answer certain questions and would make an affidavit that they had never concealed any of their property, I would go straight to Mr. Johnson and order him to give them a clean release. Mr. Hill never threatened to take legal proceedings against me. I found a man named Sutherland in possession of the property when I was appointed assignee. I called upon the Consul and asked if he would allow a Constable to take possession of the premises. He said that if I would give Sutherland a written order to keep the premises he would sign and seal it. I found that a large portion of the property had been taken away. A man named Longfellow took it away. On my asking Howles if he would make an affidavit to that effect, he said that he would be happy to do so as he was being ruined by Longfellow. The affidavit was made in this Consulate, the original being sent to the American Consul. I made application through Mr. Ross Johnson for all the documents to be sent to Mr. De Long. I went to the American Consul and informed him of the property having been taken away, and he said that he would have it restored by the following morning. Mr. Howles was present when he made the affidavit. Upon presentation of the affidavit to the Consul, Messrs. Carroll and Kirby made a bond for about \$1,200. I was advised by Johnson that nothing further was necessary. I next appeared to an action taken by me against Longfellow for the recovery of

the property which being then in my possession I asked permission to withdraw the suit. About the 4th July, I was informed that the American marshal had broken into the premises, and on going to see I found that a quantity of the property had been taken away. Some correspondence took place, and eventually the property was restored in a damaged condition. A quantity of boiler tubes taken by the marshal were delivered to Walsh, Hall & Co. without any reference to me. Expenses were going on and there was no possibility of raising funds. The creditors manifested sympathy for Howles and were willing to do all they could for him. With that view I did all I could to get the property sold by private contract. I applied to Mr. Dowson to buy some of the machinery and to employ Howles. He said that he would have been willing to do so if he had been able, but he neither required his services nor did he need the machinery. I had given a promissory note to Mr. Allmand for his demand for rent. The amount of the wages amounted to from \$600 to \$700 other expenses were incurred for clearing the machinery, legal proceedings &c. amounting to about \$1,100 before the sale was resolved upon. On the 26th of July the creditors gave me instructions to the effect to sell the property as soon as possible. (Instructions produced). After that, finding it impossible to realize on the property in Yokohama and getting no word from Kobe, it was deemed best to advertise it for sale. The date was fixed for the 15th of August in the expectation that some of the firms in Nagasaki or Shanghai might come and bid. Howles wished the sale to be put off as long as possible. I saw Howles very often after that, and Black occasionally. All the meetings that were called, were not called by advertisement. Neither Howles nor any one else objected to the proceedings at that time. I was informed that the Bankruptcy Act of 1869 was in force, and requested Mr. Johnson to get a copy, but one could not be obtained. Mr. Howles seemed desirous of avoiding going into bankruptcy, until September, when he wanted to file a petition, and the only one of the creditors willing to incur the expense was Mr. Kirby. I have no recollection of receiving Mr. Robertson's letter previous to or during the sale. The condition of the goods was very bad when offered for sale. There was rather a large attendance at the sale. The buildings on the lot were offered to let as godowns, but every one refused to hire them, as they had no proper fastenings and were not insurable as godowns. I never gave orders to eject by force, either Howles or Black, and never prevented them from entering the premises. The net amount of the proceeds was about \$3,200 and gross amount about \$3,400. This sum was expended in defraying expenses &c. as per my account. The list of claims against the estate were never objected to. I sent the accounts to the plaintiff in the beginning of June and never heard any more about them. I could never have told the plaintiff that the debts of the firm amounted to only \$3,500. To Glackmeyer \$1,500 was owing, and that amount was admitted by Howles and was secured by a bill of sale; Carroll was owed about \$1,300; to Kirby \$700 were due; Skinner \$350; the wages unpaid amounted to about \$700. No dividend has been paid to the creditors, because the proceeds of the sale did not meet the expenses by about \$950. Howles never, so far as I can remember, made any proposal to me about continuing the business until

some time in July, shortly before the seizure of the property by the American Consul. I told him then that it would not be possible to grant his application. In the accounts I sent to Howles the items mentioned as legal expenses, were expenses incurred in the protection of the property. I was voted for my services \$350 by the creditors, and \$30 for attending at the Courts. I had been engaged every day for three months. No objections were made to me by Howles or Black against Sutherland being put in possession. So far as I was concerned there was no underhanded work carried on. Mr. Howles had said so in a letter, and also some of the creditors, which was utterly untrue.

Russell Robertson, sworn.—In July 1870 I was Consul in Yokohama, when I took over the Consulate from Mr. Lowder. I invariably send letters out with a chit book and usually look to see that the letter has been received; and if I saw no signature, should at once institute inquiries. I do not recollect making any inquiry as to whether that particular letter was received or not (referring to the letter sent to Mr. Talbot.)

To Mr. Dickens:—I have no recollection of sending that document, and cannot say whether that letter was ever received by Mr. Talbot.

To Mr. Kirkwood:—When the petition was first drawn up it was addressed to me.

To the Court:—I have no recollection of any application having been made to me either by Mr. Talbot or by Howles or Black respecting the Bankruptcy Act. I ought to have been in a position by the middle of July to have given information about the Bankruptcy Act. The letter arrived from Sir Edmund Hornby about the Act, about the 13th. I cannot say as a matter of fact that I had the Bankruptcy Act in my possession at that time. From what I see in the record I should say that an application was made by Howles and Black for the Bankruptcy Act; and at that time the Consulate was unable to give the information.

Mr. Talbot re-examined by Mr. Kirkwood:—At the meeting on the 25th of July there were only six creditors present, which I considered were sufficient authority for me. I think ten days notice was given, either by advertisement or by circular, when the meeting was called.

To the Jury:—The questions that the creditors wished answered by Howles and Black were relative to a portion of the property having been taken away, presumably, by Mr. Black. A copy of the questions were sent to Howles and Black and also a copy to Hill.

This concluded the evidence adduced.

Mr. Kirkwood then rose and addressed His Honour and the gentlemen of the Jury. He told the Jury that they would have to consider whether the creditors of Howles and Black held the property legally and with the sanction of Howles. The defence set up by the opposite side was that Howles was cognizant of and approved all the actions of the defendants in regard to the sale of the property. The learned gentleman contended that so far from Howles approving of the sale, the letter sent by H. B. M.'s Consul the day before, requesting Mr. Talbot to stop the sale or if he proceeded he would do so at his own risk, was proof that Howles did not concur in it. The plaintiff had been a long time in the witness box and his story seemed simple and

true. When he found that he was unable to meet his liabilities he immediately went to his Consul and explained his position to him. He was advised by the Consul to call a meeting of creditors and appoint one to look after the property, which advice the plaintiff had acted upon. The meetings of the creditors which did take place from time to time were entirely informal, as they were held without the sanction of the plaintiff. And, according to the evidence of Mr. Talbot, what transpired at those meetings was only made known when it suited the purposes of the few creditors who had met together. Acting under a resolution passed at one of those informal meetings, Mr. Talbot took steps for the sale of the property, merely on the authorization of six creditors, and which he did at his own risk. Mr. Kirkwood argued that in the face of the objections of the plaintiff to the sale, and in face of the fact that Talbot acted only on the authorization of six creditors, it was impossible for the Jury to find a verdict for the defendants. He scouted the argument of his learned friend, that no action had been taken by the plaintiff until the last twelve months, as ridiculous. Going back to the subject of the letter sent by H. B. M.'s Consul to Mr. Talbot, Mr. Kirkwood maintained that it was evident the letter had been received before the sale, as it was very improbable that such an important document should have been delayed in the delivery under the methodical arrangements for the transmission of documents in force at the Consulate. Far fewer letters were apt to miscarry by the practice of sending them with chit books, than through the post office; and had the letter been lost it would have been a different thing. He said that the time of the Court had been taken up considerably with the question of damages. And he thought that His Honour would instruct the Jury that, if they found a verdict in favour of the plaintiff, they would have to assess the damages of the goods at the time of their conversion, that was to say, their value to the plaintiff at that time. The learned gentleman then quoted several cases in support of his contention, after which he remarked that he did not know what the defence actually was; but if it was contended that the defendant Talbot had acted in the capacity of a bailee, and the jury should look upon him in that light, he could only be considered as acting in trust until steps were taken in Bankruptcy for the liquidation of the estate. And if he had received the goods in trust, then he had rendered himself liable for damages in having disposed of them. It was needless for him to point out that the whole of the proceedings in regard to the disposal of the goods were illegal under the Bankruptcy Act; and if Howles did assign the goods to a few of the creditors, his act was invalid. If the Jury should find that he did assign his goods to a few of the creditors, then the question arose could he take advantage of his own wrong act? He, the learned gentleman, contended that he could do so, even though it was a fraudulent act. It must also be remembered that the defendants must have been aware of it at the time as well as the plaintiff.

Mr. Dickens objected to the expression "fraud."

His Honour remarked that if Mr. Dickens had not got the option of replying, it might be worth while to go into the question as to whether Mr. Kirkwood was entitled to use the objectionable term, but as it was it was scarcely worth while.

Mr. Kirkwood then continued his address, concluding by requesting the Jury to give a verdict in favour of the plaintiff.

Mr. Dickens then rose and addressed the Court, remarking that he appeared for the defendant Mitchell specially, Talbot and Kirby jointly, but that he did not appear for Mr. Plummer.

His Honour interrupted the learned gentleman, and informed him that it was now too late to say that he did not appear on behalf of defendant Plummer, as he, His Honour, had stated at the commencement of the case that he could not take any appearance unless it was a general appearance. Mr. Plummer had been included in the case, and His Honour had understood Mr. Dickens to say that he would appear for him; and as a point of law he must rule that he did so.

The following is the speech of defendants' Counsel in this suit.

Mr. Dickens said:—I shall first take the case of Mitchell. Even if Mitchell was a partner of Curnow in 1870, it was clear from the evidence produced by the other side, by Mitchell's statements, and by the advertisement of the middle of July, 1870, that Mitchell was not a partner when the act complained of in the petition was committed. That act is laid in 6th, 7th, and 8th paragraphs of petition as done after the 4th August, and it is clear that it was done, if at all, after the 4th August. But Mitchell was not a partner with Curnow—he had no verbal or written agreement of partnership, and was paid by a salary, having no interest either in the profits or losses of Curnow's business. When Curnow sued the plaintiff for some \$70 he sued in his own personal name, not as Curnow & Co. even, and plaintiff never objected to this. True, Mitchell in some degree, held himself out as partner, and this might be pleaded against him by any one who had been deceived by such holding out into acting as if Mitchell had been partner. But plaintiff is clearly not in this position. Besides even if Mitchell was a partner, he is not responsible for tortuous acts of co-partner unless these were done in ordinary course of co-partnership business. And the acts now complained of were evidently not acts in the ordinary course of the business of a storekeeper such as Curnow was. Lastly it is proved that Mitchell had nothing to do with these proceedings, the plaintiff in his evidence does not even allege it. Hence, I conclude, that whatever may be the position of the other defendants, for Mitchell a verdict of not guilty must be returned.

With regard to the case against the other defendants. The plaintiff is an honest, industrious, but obstinate man. He has persuaded himself he has been wronged and is determined to fight the question although nearly 7 years have elapsed since the acts complained of were committed. His demands are preposterous and absurd, without a shadow of foundation in justice, law, equity or common sense. Another week and he would have been bound by statute of limitations, but either of his own motion, or by the advice of some cunning lawyer, he has just managed to hit the moment in which while time nearly, but not quite, bars his claim, it quite bars our claim against him. This *laches* on his part, in view of the difficulty which it has imposed upon us in the matter of evidence, deprives the plaintiff of all title to consideration. Before going into the case a word is necessary as to the petition which is self contradictory. It states the plaintiff was willing to assign his property

for his debts if released from them, and afterwards complains of the property being taken from him. It is evident that all he has to complain of, if anything, is that a release was not given him, so it states the property to have been properly taken possession of in June 1870 and then in August, to have been illegally seized. The fact is, if any trespass was committed, this could not be in August, because the property had been in possession of Talbot since June. How can Talbot be guilty of illegally seizing in August, property already legally, and with consent of all interested, including plaintiff, in his possession in June? Next what damages does petitioner really claim? Not the value of the goods sold, but simply damages done to plaintiff in his "trade and credit;" where was his trade in August 1870? it had been stopped for two months: where was his credit at same time? he had none, less than none, he was overhauled and ears in debt; with claims for rent backwages, judgments, and half a dozen pending actions. The position, taken up with respect to the sale is that the plaintiff consented to it positively, and if not positively by acquiescence in it before and after it had taken place. In June 1870, he finds himself in difficulties, call his creditors and assigns his property. The proceedings are not in bankruptcy, but by private liquidation; the advantages of this plan were obvious to all and plaintiff was, as his evidence and correspondence shows, especially desirous of not being made bankrupt. The assignment is complete in equity if not at law, and in consideration for it the creditors agreed to release him from his debts. The letter of 14th July, is, in fact, a written release though not in technical form. It says distinctly that the plaintiff's after earnings are safe from attacks of creditors. Hence the property was out and out the property of creditors before sale took place, and they had full right to do what they liked with it, sell it, or eat it, with or without permission of plaintiff. They had bought it with their debts. But afterwards when a formal release was wanted they had reason to suppose that plaintiff had not carried out his bargain. He was to give all his property up; creditors were to give all their debts up. The creditors had done their part and were willing to do it over again, but they had reason to suppose that plaintiff was keeping back some of his property and they required him to answer certain questions relative to his property, which he acknowledges he could have answered, but which, for some unexplained reason, he did not answer. Then the creditors naturally and properly refused to do anything more. Hence plaintiff can neither complain of sale nor complain of no formal release being given him, a release indeed which was superfluous as he was already fully released. It must be remembered too that a good deal of money had been spent in defending the estate, especially with regard to the property taken away by Longfellow, and afterwards recovered (\$1,200 odd) on the facts of the assignment. Next, even if Talbot had no power to sell the plaintiff acquiesced in the sale before and after it was made. There is no question he acquiesced up to 15th August. Then we have the Consul's letter on that date, the only piece of evidence in the whole case in the slightest degree giving it any foundation. This letter is not from plaintiff or his counsel, but a mere piece of advice from the Consul, having no legal force whatever, and of no more account in law than a similar letter from any one else. Nor is there any proof,—no allegation even—of its having been delivered to Talbot, or if delivered, delivered before or during sale.

About it Talbot has no recollection, and, as a fact, it first turned up some few weeks ago among some old papers of Mr. Johnson. If it was really intended to stop the sale why did not Mr. Hill, who was a lawyer, take the proper legal steps to obtain an injunction. He knew all about the sale weeks before and was in no way taken by surprise. Again, what says the letter, after asserting that to carry on the sale would work most serious injury? it curiously enough assents to the sale if a release be given. The letter then was not to stop the sale, but to force a formal release from the creditors and brings us to the argument already made use of that if the plaintiff has anything to complain of it is that he had no formal release given him—that, and nothing else.

Counsel in the course of this part of the argument with reference to the point of acquiescence referred to the cases of *Dana vs. Spurrier* by *Vesey*; *Cotching v. Bassett* 32, *Beavan*; *Barkart v. Tennant* L. R. 10 *Equity* (a case with which Counsel had been personally connected) and *Crook v. Corp'n of Seaford* L. R. 6 *Ch. Appeals*.

As to the correspondence after the sale between Hill and Talbot, and that between plaintiff and Talbot in 1872, the letter of 15th August, was never referred to in it, the sale was never referred to in it, and no objection was made to the sale, or to any of the accounts, or any objection whatever, other than vague insinuations and unspecified assertions of under-handedness. The correspondence confirms, amply what has already been said, that the sale was never objected to but only the withholding of a formal release and it has already been sufficiently shown that the formal release was properly withheld until certain questions (which Howles admitted at this trial he could answer) were replied to—questions having reference merely to the plaintiff's property—to that which he was bound to hand over to his creditors. The very last phrase at the end of Mr. Hill's last letter (Sept. 6th, 1870.) is "Messrs. H. & B. (H. is plaintiff) have made no request for an unconditional discharge and do not decline to answer the questions to secure a discharge as proposed by you (Talbot) heretofore."

How, in the face of all this, the present action could be brought, passes understanding. Taking, however, the view of the case most against the defendants, what damage can Howles complain of? If what was done had not been done what would have been the result? The landlord could have seized and sold for rent, the judgment creditor could have done so, the plaintiffs in the pending actions could have put themselves in a position to do so likewise, or the creditors could have put Howles into bankruptcy. That they did not do so was purely out of consideration for him. Had they done so the property would have been sold at a still greater sacrifice in all probability, and the debtor would not have been free for three years. The sale was an absolute necessity as already clearly shown from the evidence. That a great sacrifice was made is undoubted; such a sacrifice is inevitable in such a sale, but how could it be avoided? I have already shown that his trade and credit could not suffer by the sale, because he had then neither trade nor credit; not credit enough to pay his rent or even Curnow's small claim of \$70, and I have shown too, that the absence of a formal release was no injury to him; He had the release of the 14th July, also the release implied in the action of the creditors, and when he commenced this action he had the best release of all—release, by effluxion of time.

In the interval he had been left entirely alone and kept to himself every jot of his earnings.

No doubt if the proceedings had been in Bankruptcy they were irregular, but they were not in Bankruptcy which all parties especially desired to avoid. If Howles had any cause of complaint he could at any moment for a few dollars have righted himself by filing his own declaration in Bankruptcy. So too, though all the creditors did not attend the meeting, four-fifths in value did, and the rest acknowledged the proceedings by presenting their claims, none of which, nor the accounts, were ever disputed by plaintiff or his attorney, otherwise than in the vague manner already referred to. Such acquiescence is equivalent to an acceptance of such accounts and claims. Finally the case is a most curious one; the plaintiff owed some \$7,000, and did not pay a cent; made his creditors lose a further sum of some \$900 in protecting his property after transfer to them, and now, after seven years, asks you to give him \$15,000 without producing a shred of evidence that he has, in trade or credit, or otherwise, lost a single cent by the action of his unlucky creditors. Counsel then shortly recapitulated the principal points and left the case to the jury.

The Jury found for the defendants with costs.

NAGASAKI.

One of the Directors of the Mitsu Bishi Co., Mr. Yanoski, who is now here on a visit, hearing of the Regatta immediately presented to the Committee the handsome gift of \$100 which was apportioned among the different prizes as it was found necessary. This generosity of the Mitsu Bishi has been warmly commented upon and much appreciated.—They will not lose by it.—*Cosmopolitan Press.*

Owing to the heavy fighting of the past week large numbers of wounded are expected to arrive daily in Nagasaki. Taking time by the forelock the government are erecting temporary hospitals in native town. In the meantime it would be well if a little more attention was paid to the cleanliness of the Iwamaga bungalow hospital. Indeed the majority of the patients appear as jovial and strong as their countrymen outside and in some cases more so. Convalescence will always be kept back by unwashed bandages.—*Idem.*

The S. S. *Border Chief*, being now engaged by the Government and having several officers on board, the other day captured a large Satsuma junk laden with sugar, and brought her into Nagasaki a prize. No doubt the results will be sweet for the captors.—*Idem.*

The Barge *Shamrock* having been converted into a powder and ammunition hulk was last night towed outside the limits by the *Meishin-maru*.—*Idem.*

It is currently reported and generally believed, not only in Nagasaki but in Kobe and Yokohama, that Marshall Saigo has, under the inspiring influence, and at the instigation of Shimadzu Saburo compromised with the government. Now in the face of the heavy fighting in and around Kagoshima which we record below,—looking to the fact that such a course would be a virtual victory for Saigo, and that henceforth the Satsuma

province must be considered co-equal in power and strength with the other amalgamated provinces which now form the Empire, we hesitate to give a particle of credence to a rumour which even the native press accept as true, and comment upon in no unmeasured terms. To compromise would be fratricidal, it would undo the good which has accrued from the wise and judicious legislation of the government, shipwreck the best interests of the Empire, and implant an idea of despicability in the minds of foreigners and natives alike. In European acceptance there is no panderism with revolution, it must, if the stability, progress and advancement of the country is the desired goal, be suppressed by physical force, by compulsion, and thus by displaying the power to suppress instil a feeling of confidence in and reliance on the present dynastic administration. It is no excuse to plead that the present rising is based on a firm, ineradicable belief that injustice has been meted out to the Satsuma province, that a ministerial bias exists against its chiefs, or that the full measure of exceptional privileges has been denied them. Be the origin what it may, the people must be made to understand that opposition to lawful and legitimate authority will be suppressed at any cost, and that the integrity of the Empire will be maintained despite the efforts of the most powerful disloyalist. From his antecedents none doubt the bravery, skill and heroism of the insurgent Marshal; but the country which he loves so well has and is still suffering from his determined and relentless opposition to the present ministerial regime.—*Idem.*

CONDITION OF FUSAN, COREA.

(From the *Hochi Shinbun* of the 21st May.)

Owing to the terrible famine, the Koreans are in extreme poverty. We (Japanese residents) observe the poor natives everywhere starving to death; while crowds of beggars are wandering about in search of food. They are emaciated to the last degree and reduced to dreadful extremities. Some of them are occasionally found on the point of death in our settlement. When we are landing rice, wheat, and other food from vessels in the port, large numbers of poor natives and beggars assemble, waiting for a good chance to pilfer the merest trifle. They are noisy and constantly quarreling among themselves. The Korean government has appointed the 10th, 20th, and 30th of each month for the relief of the distressed. The authorities in Torai-fu issued a ticket for which they exchanged rice in the government office on those days. Of articles of trade, rice, wheat, and potatoes are in the highest demand, and cotton cloth and toilet things come next to them. Rice averages 7 yen per koku, 5 yen for one koku of hikiwari (coarsely ground rice) and 3½ yen for the same measure of wheat. The natives are fonder of the hikiwari than barley and wheat. Exports consist mostly of gold dust, ox skins and ginseng. During February and March, about 3,500 *monme* of dust were shipped for Japan. Large ox skins have hitherto been sent to China, and the smaller to us in Fusan. Lately, they have sent us both large and small skins. The gold dust has fallen of greatly in quantity of late and the natives brought gold rings, pins and hair ornaments to exchange for rice and wheat; each of them is about 30 *monme* in weight and made of pure gold. In addition to the horrors of starvation the poor Koreans are afflicted by pestilence. No house in any town or village, is exempt from

the ravages of the terrible disease, which has commenced to penetrate our settlement. Some of our traders have already been seized by it, but fortunately owing to good treatment in the hospital, none of our names are registered yet in the kuwako-cho, a record kept in Buddhist temples, of the names of the dead. Dr. Yano, Superintendent of the hospital, said that the pestilence was caused by impurity. Dead bodies are sometimes found lying in the streets where they are left for many days. Since the opening of the hospital, many natives sought relief and about 350 have already been there from the 11th February to the 30th March.

This year the harvest of barley is expected to be good in Corea. But lately the weather is more changeable and even the largest crop could not be considered sufficient to satisfy the poor natives for one month, and they cannot be supported in future, without the importation of Japanese rice.

A GENTLEMAN recently arrived in Tokio from Kagoshima gives the following account of a skirmish. A detachment of insurgent troops when about to cross the Hototsugawa river at the south west of Kagoshima, were attacked by the imperial troops and driven back with much loss, many men being drowned. The nephew of Lieutenant-general Oyama was discovered in a half-drowned condition and mortally wounded. On being brought to shore stimulants were administered, and he revived sufficiently to state that Kirino is in Ishiki, Satsuma, and that Saigo is at Hitoyoshi, when death finally released him.

THE *Osaka Nippo* gives the following table of the wounded imperialists under treatment in the temporary military hospital in Osaka from the 2nd March to the 14th May:—

	Admitted	Discharged	Removed	Died
Officers	108	59	10	2
Soldiers	2,237	166	4	98
Keibn (police officers) ...	10	0	5	0
Police	56	0	50	0
Men for public service ...	7	2	0	0
Total treated				2,468
„ discharged				227
„ removed				69
„ died				100
„ remainder				3,072

An experimental trial of a balloon was made yesterday at the Naval drill ground at Tokio. The balloon had a capacity of 15,000 cubic feet, was made entirely by Japanese, and the experiment was conducted without any foreign assistance. The process of inflation was commenced at 9 a.m. but the pressure of the gasometer proving insufficient a fire engine was ingeniously brought into requisition, but even then the balloon filled slowly, and it was not until 3.15 p.m. that it was ready for a "captive" ascent, though then not sufficiently inflated for a longer voyage. After the first trial a student went up on each subsequent occasion, and the venture was considered by those competent to judge eminently satisfactory. The balloon was in an enclosure guarded by sailors, but foreigners were courteously allowed to enter.

On the 22nd inst., Her Majesty the Empress Dowager left the village of Fujisawa, and is expected to arrive at Kanagawa at noon, and will then dine at the Kocho's house, leaving for Tokio by the 1.25 train. Large numbers of officers from the Imperial Household and other departments will be in waiting at Tokio to receive her. Mr. Koyama, Assistant Secretary of the Kanagawa ken, attended at Fujisawa to receive Her Majesty. Every house along the roads, through which she is to pass, is ornamented with the national flag.

Shipping.

MEN-OF-WAR.

- Audacious*, H. B. M.'s flag-ship, Capt. P. Colomb, 8,774 tons, 14-guns, from Kobe.
- Elizabeth*, Ger. frigate, Capt. von Wickede, from Europe via Manila.
- Haydamak*, Russ. gun-boat, Captain Tutoff, 1,000 tons, from Kobe.
- La Clocheterie*, Capt. Reynier, 2,000 tons, 10-guns, from Kobe.
- Tennessee*, U. S. Flag-ship, Captain Young, from Hongkong.
- Vigilant*, H. M. D. vessel, Captain Ryder, 940 tons, 2-guns, from Kobe.

ARRIVALS.

- May 10, Frch. str. *Menzaleh*, Pasqualini, 1,503, from Hongkong, Mails and General, to M. M. Co.
- May 11, Brit. str. *Oceanic*, Parsell, 3,700, from San Francisco, Mails and General, to O. & O. Co.
- May 12, Brit. barq. *Flying Spur*, Croot, 735, from London, General, to L. Kniffier & Co.
- May 12, Brit. str. *Argentino*, Burneld, 915, from London via Hongkong, General, to Jardine, Matheson & Co.
- May 13, Brit. str. *Sunda*, Reeves, 1,704, from Hongkong, Mails and General, to P. & O. Co.
- May 14, Brit. str. *Massilia*, Rand, 1,650, from Kobe, Government stores, to M. B. M. S. S. Co.
- May 16, Jap. str. *Nagoya-Maru*, Conner, 1,914, from Shanghai and ports, Mails and General, to M. B. M. S. S. Co.
- May 17, Brit. str. *Candia*, Dumbrek, 2,240, from Hongkong, General, to J. C. Fraser & Co.
- May 18, Brit. barq. *Seawell*, Campbell, 488, from Newcastle, N.S.W., Coal, to Walsh, Hall & Co.
- May 20, Russ. gun-boat *Haydamak*, Captain Tutoff, 1,000 tons, from Kobe.
- May 21, Russ. str. *Courier*, Lemascheffsky, 495, from Kobe General, to M. B. M. S. S. Co.
- May 21, Frch. str. *Tibre*, de Girard, 1,009, from Hongkong, Mails and General, to M. M. Co.
- May 22, Am. str. *City of Peking*, Fanner, 5,079, from Hongkong, Mails and General, to P. M. S. S. Co.
- May 22, Jap. str. *Tokio-Maru*, Duan, 2,119, from Shanghai and ports, Mails and General, to M. B. M. S. S. Co.

DEPARTURES.

- May 11, Brit. str. *Gaelic* Kidley, 2,756, for San Francisco, Mail and General, despatched by O. & O. Co.
- May 11, Brit. str. *Oceanic*, Parsell, 3,700, for Hongkong, Mails and General, despatched by O. & O. Co.

PASSENGERS.

Per Frch. str. *Menzaleh* from Hongkong:—H. E. Count Barbolani, Countess Barbolani, Mr. M. C. Barbolani, 2 children and one servant, Messrs. Fock, Galopin, and Van Lissa.

Per Brit. str. *Oceanic* from San Francisco:—Mr. and Mrs. A. Center, and servant, Miss Hattie Cerver, Mr. and Mrs. J. Hillyer, Miss L. A. Howard, Messrs. E. C. Gill, H. Schoening, G. L. Montgomery, A. Bodeker, F. D'Ifanger, O. Focks, Wo Wing Ying, W. A. Macomber, and A. Campbell; and 6 Europeans in steerage. For Hongkong: Mr. and Mrs. C. S. Powell; and 149 Chinese in steerage.

Per Brit. str. *Gaelic* for San Francisco:—Mrs. James and four children, Dr. and Mrs. Bing, Captain Rathbone, Captain L. James, Lieut. Nicholson, Sir H. Norman, Dr. D. Smith, Messrs. Edward Millish, W. G. Brodie, R. E. Graves, H. A. Graves, L. W. Jones, Henry Maudesly, J. B. Watson, A. B. Watson, Francis Loane Stanley, A. Major, and 2 Japanese.

Per Jap. str. *Saikio-Maru* for Shanghai and ports:—Mr. and Mrs. Hellyer and child, Mr. and Mrs. Konoura, Capt. Perin, Capt. Jourdan, Dr. Schultze, Messrs. Schoening, Focks, Arao, Von Fischer, Macomber, Anderson, Campbell, Gill, Hipplesley, Wo Yeng Ding, and 32 Japanese.

Per Brit. str. *Sunda* from Hongkong:—Col. Dickens, Col. Osborne, Comd. A. C. Parr, and servant, Lieut. F. D. Scott, R.N., Surgeon Guppy, R.N., Messrs. H. J. H. Tripp, and J. Sprungli; and 6 Chinese on deck.

Per Brit. str. *Argentino* from Hongkong:—Captain and Mrs. Creagh, and Captain Dempster.

Per Jap. str. *Nagoya-Maru* from Shanghai and ports:—Mr. and Mrs. Fischer, Mr. and Mrs. Swdden, Mr. and Mrs. R. M. Brown, Mrs. Brent, Mrs. Smith, Mrs. De Ojeda, Miss Brooke, Very Revd. Dean Butcher, M.

De Bavier, Messrs. Brooke, Strome, Johnstone, Duncan, Ohlsen, Warburton, Caldcott, Webber, Wyper, Maries, Gray, Blakery, H. E. Okuma, Prince Maura, and 26 Japanese in the cabin; and 325 Japanese, and 11 foreigners in the steerage.

Per Frch. str. *Tanais* for Hongkong:—Madame Beguex, Madame Wachtels and 4 children, Madame Yaru, Messrs. E. Piquet, M. Coruchi Louis, and So-Kichi.

Per Jap. str. *Nagoya-Maru* for Shanghai and ports:—Count Alex. Fe D'Ostiani (Italian Minister), Mr. Ogi (Minister of Judicial Department), Mr. Yamao (Vice-Minister of Public Works), Mr. and Mrs. Dumaresq, and 2 children, Mrs. Gubbay and 2 children, Dr. Thornicroft, Messrs. Watanabe, Lewis, Osakura, Kondow, J. Lilburn, Hagiwara, Kino, Hirata, Shimokawa, Takakura, Hayakawa, Kaneko, Suyehiro, Ogami, Quagaki, Sada, Saitow, Kangitsu, Yo-himura, Tanaka, Sera, Shinto, Nakamura, Kanai, Duncan, Dalziel, Kusume, Von der Heyde, Wyper, Shimamoto, Chiba, Fugita, Nakamura, Takahashi, Nakagawa, Baba, Morita, Ikeda, Katow, Mishima, Yusa, Miyamoto, Nomura, Shibata, Kotayashi, Ohkawa, and Ishikawa.

Per Frch. str. *Tibre* from Hongkong:—Messrs. Kanematson, Sone, Yamaonaki, Rutherford, Rakuro-hara, Kichuchi, Kleinman, Dalmos, Lormel, Nevel, and M. St. Quentin and servant.

Per Brit. str. *Argentino* for Kobe and Nagasaki:—Mr. Wauchope, and servant, Co'n. Osborne, Mr. Rutherford, and 250 in Steerage.

Per Am. str. *City of Peking* from Hongkong:—Capt. N. B. Palmer, and Mrs. E. Palmer; and 1,000 Chinese in the steerage.

Per Jap. str. *Tokio-Maru* from Shanghai and ports:—Mrs. C. C. Clark and 2 children, Mr. and Mrs. Sutton, Mrs. Johnson, Mr. and Mrs. McNutt and child, Messrs. C. J. R. Troup, W. H. Ray, A. Thurburn, and H. Lewis. From Nagasaki: Messrs. Ida, A. Robertson, C. A. Fletcher, H. Anderson, R. Gebaner, and C. F. Goodrich, v. s. n. From Kobe: Dr. and Mrs. Doane, Dr. and Mrs. Gordon, and 2 children, Miss Takatsukasa, Mr. and Mrs. Wada, and child, Mr. and Miss Hanabusa, C. Jubin, F. Grosser, Winckler, Capt. Bold, A. W. Unthank, Iseki, Watari, Yamaguchi, Watanabe, Fujioka, Kitagata Shinjiro, Nishi, Tsuda, Masuda, and Iwagami; and 284 Japanese, 6 Chinese, and 1 Foreigner in the steerage.

Per Brit. str. *Sunda* for Hongkong:—Lieut. Scott, R.N., Messrs. Mansfield Howie, and Webber; and 5 in the steerage.

REPORTS.

The British steamer *Oceanic* reports:—From San Francisco to 180 W. had moderate variable winds with smooth sea, 180 W. to port fresh Westerly and S. W. winds with head sea. Length of passage 18 days and 8 hours.

The *Candia* reports, rain and fog during the greater part of the passage. Came up through Van Dieman Strait.

The American steamer *City of Peking* reports:—Sailed from Hongkong, May 15th, at 3.10 p.m. To May 17th had light variable winds and calms; thence to May 20th fresh gales from N. E. and head sea; and thence to Yokohama variable winds and heavy Easterly swell. Arriving May 22nd, at 1.30 a.m.

Yokohama Market Report and Prices Current.

STAPLE IMPORTS.

The reported probable return of the Mikado to Tokio, and a remote prospect of peace, caused a movement in the import market; there has been more enquiry for cottons, chiefly water twist, but prices show little if any improvement.

Arrivals have been the *Argentino* and *Candia*, steamers, and the *Flying Spur* from London with general cargo, and the *Scawfell* from Newcastle N.S.W. with coal. Transhipped cargo ex *Deucalion* from Liverpool, *Meikong* and *Ava* (M. M.) from Marseilles, *Euphrate*, *Khedive* (P. & O.) and *Copernic* (M. M.) from London, and *Feronia* from Hamburg, is to hand. Exchange is stronger.

Yokohama Market Report and Prices Current.

STAPLE EXPORTS.

TEA.—On the departure of last mail native merchants shewed a little anxiety to realise, and prices tended downwards. Supplies came in freely, and really desirable parcels grading "Finest" to Choice were obtainable from \$34 to \$38 per picul, and about Piculs 4,000 changed hands.

The immediate pressure to sell having slackened, a slight recovery took place and prices hardened from \$1.50 to \$2 per picul; but to-day they again show signs of weakness, and a steady decline may now be counted on, especially in the lower grades of which few musters have been so far on offer.

Settlements for the period amount to piculs 6,800 New Crop Teas.

To-day's rates rule as under, the market decidedly weak.

In **SILK** there has been some excitement in consequence of home telegrams, and prices, which at the moment are about unchanged, depend solely upon the keenness of foreign competition for which the natives are well enough contended to wait.

DESCRIPTION.	PRICES PER PICUL.	REMARKS.	
SILK:—			
Mayebashi } Extra	\$ 600	Excitement in the market owing to late telegrams from Europe anticipating bad crops—the market is going up, but prices are wholly unreliable, holders asking \$60 to \$80 per picul more than they would have readily accepted ten days ago. Stock about 2,500 native bales.

BIRTH.

On the 20th instant, at Shanghai, the wife of
M. M. KUHN, formerly of Yokohama, of a daughter.

Summary.

OUR LAST MAIL SUMMARY was dated 23rd
ultimo, for despatch by the P. M. Str.
City of Peking, which left for San Francisco
at daylight on the 24th. Since then we
have received the following mails:—

Per P. & O. str. *Malacca*, L'don, 5 Apr. arrd. 10 May.
„ P. M. str. *Alaska*, S. Francisco, 5 May, „ 31 May.

And despatched the following:—

Per M. M. str. *Tibre*, for Marseilles, 30 May.

THE M. M. steamer *Volga* arrived on the
31st May, from London, to take the place
of the *Menzaleh*, which left this port for
Shanghai en route to Europe, on the 1st inst.

THE *Belgie* from San Francisco is hourly
expected.

THE question of the abolition of the office
of Foreign Municipal Director has been
gravely considered by the Japanese authori-
ties, who have served on Mr. E. S. Benson,
the present incumbent of the office, three
months' notice to quit. This they had a
perfect right to do if they thought proper,
but the total extinction of an office which
is the only means of communication between
the foreign settlers and the Japanese Govern-
ment, is a totally different matter, and was
certainly not contemplated in the agreements
and conventions entered into when the post
was created. Few but the most servile and
unscrupulous of the foreign friends of the
Government will deny that the office itself
is one of first necessity, and might be ren-
dered of great service, in the absence of a
Municipal Council, to foreigners and Japa-
nese alike. The matter is now under the
consideration of the Foreign Representa-

tives; and it is uncertain what will be the
result. The probabilities, however, are in
favor of an election among such candidates
as may be willing to submit their claims to
suffrage.

H. E. MORI ARINORI, Minister for Japan
to the Court of Peking, returned to his
native land in the *Saikio-maru* which arrived
from Shanghai on the 31st ultimo. His
absence from his post will probably be
only temporary. The Government would,
perhaps, find it a difficult matter at this
moment to name a thoroughly efficient suc-
cessor to Mori, if he insisted upon resigning
his post.

REPORTS, to all appearance too well-founded,
have been circulated to the effect that tele-
grams had been forwarded some time since
from Yokohama to London, Berlin, and New
York, affirming that the insurrection in the
South-West had been suppressed. Not
unnaturally the dissemination of such false
intelligence has by some been connected with
the attempts which are thought to be making
now in European markets to float another
Japanese loan. We should be far from wish-
ing to infer that any such sinister motives
existed, or that the telegrams in question had
an official origin; but the duty of the Govern-
ment is evidently to cause them without
delay to be officially denied.

REFERENCE in the following pages to the
intelligence at our command on the subject
of the insurrection, as given under that head-
ing, and here and there in the "Nippon
Notes," will show that the unhappy strife is
still raging, and that no immediate probabili-
ty appears of its being brought to a speedy
close. The insurgents occupy strong posi-
tions in Kiushiu, and are said to be 30,000
strong in the neighborhood of Kagoshima,
which town and its imperial garrison they
are now besieging. The expense so far of
the campaign, incurred by the Government
alone, is probably not less than 20,000,000
yen. This has been met by large issues of
irredeemable paper money, and by allowing
the payment of the Kuwazoku's pensions to
fall into arrear; and the financial outlook is
most gloomy.

In our last summary we published a report
of the spring meeting of the Yokohama
Racing Association. In the present issue
we give an account of the meeting of the
Yokohama Race Club which was held on the
24th ultimo and two following days. The
races were fairly well attended, and very
successful. It is, however, more and more
evident that four race meetings in one year
are too much for the small community of
Yokohama, who are anxious to see the ter-
mination of the scission among the racing
fraternity, on equitable terms. The half-
yearly sales of racing ponies were held after
the meetings.

THE British Consular Trade Report for
Nagasaki, for 1876, is published in this Sum-
mary. It testifies, to the falling off of
trade in that part of the empire, which is,
however, more fortunate than some of other
districts in the possession of extensive coal
mines, which, if allowed to be even in part
developed by foreign capital and under for-
eign management, might be rendered largely
reproductive.

MR. R. J. BEADON, an English Barrister
in the Imperial civil service of Japan, has
been admitted to practise in the United
States Courts in this country.

A BALLOON, intended probably for military
surveying, has been constructed at the Im-
perial Naval College, Tokio. The first ex-
periment of a captive ascent was in all
respects successful. The materials of which
the balloon is made are all of native manu-
facture.

H. E. KIDO, *Naikaku Komon*, or private
State Counsellor to the Mikado, died on the
morning of the 26th instant. He was one of
the leading men of new Japan, and his loss
at the present juncture cannot but be severely
felt in the councils of the state. The first
portion of an interesting sketch of his life,
translated from a native journal, will be found
further on in this paper.

TELEGRAPHIC communication with Europe
by the Russian land lines has again been
temporarily interrupted.

REUTER'S agent here is making another
attempt to collect enough subscriptions to pay
for telegrams from Europe, relating the pro-
gress of the Russo-Turkish war.

THE Dramatic Club of H. M. S. *Audacious*
have given an entertainment in the Gaiety
Theatre in aid of the fund for relieving
the families of the sufferers by the *Thunderer*
explosion.

THE P. & O. Co's hulk *Tiptree* has been
sold to Japanese. The steamer *Candia*, which
was originally built for the same company,
has been purchased by the Mitsui Bishi Mail
Steam Ship Company. The ship *Bothwell*
Castle takes a New York cargo of tea as far
as San Francisco.

A BRAWL, of a somewhat serious nature,
originating in a dispute in a tavern, has
occurred in the settlement between some
British and Russian men-of-war's men. Se-
veral of the combatants on both sides were
badly but not fatally injured, while some
bystanders who were only on the side of
order came in for a share of the blows which
were going.

AS we go to press we are in possession of
the details of another and fatal row, this time
between French and German sailors, which
took place last night in Japanese town. One
Frenchman was killed on the spot, and
another is expected to die in the course of
to-day.

JUSTICE IN YOKOHAMA.

THE late suit of *BEATO versus the P. & O. Co.* in which a verdict was entered for the defendants by direction of the Judge, reserving leave to the plaintiff to move, has called forth some criticism which we think neither the facts, the justice, nor the reasoning of the case warrant. The same remark may be applied to the strictures upon the judgment recently given in the suit of *WATSON versus WALSH, HALL & Co.*, and in order that the merits upon which both decisions were based should be understood, we propose to state them here as briefly as possible. The facts of the first case lie in very small space. The plaintiff, BEATO, claimed a sum of \$1,024 for damage caused to goods shipped by the defendants' vessels from Southampton to Yokohama, such damage not being caused by perils of the sea. By consent the following issues were submitted to the jury:—

1. Were the goods damaged while in defendants' possession?

2. Was the damage caused by fresh water?

3. Was the damage the result of negligence on the part of defendants or their servants?

The jury answered all the issues in the affirmative and assessed the damage at the amount claimed. Upon this a verdict was entered for the defendants upon the ground that a condition in the bill of lading freed them from the consequences of the finding of the jury; leave being reserved to the plaintiff to move to enter the verdict for him.

Notice of appeal was given but has, we understand, been wisely withdrawn.

It is well understood that in general ships the bill of lading is substituted for the ordinary contract of affreightment, the charter party, and that the rules of construction applicable to the latter relate equally to the former. The bill of lading in question contained a condition upon which only the defendants would undertake the carriage of the plaintiff's goods, and upon which the delivery in good order was dependent; it is specially referred to in the body of the document, and runs as follows:—"The following are the exceptions and conditions above referred to. * * * Boilers, Steam, * * * or any act neglect or default whatsoever of the pilot, master, mariners or other servants of the company," which seems clearly to indicate the intention of the defendants to decline responsibility for the negligence of their servants. Assuming this view of the matter to be correct, it is necessary to consider whether the condition is reasonable and sustainable at law, and for this purpose

"It is important to bear in mind, that although in the earlier cases the Courts of law not unfrequently rejected, or explained away harsh and oppressive stipulations contained in agreements, thus, in effect, making new contracts for the parties, the rule acted upon at present is to give to clear and unambiguous stipulations their obvious meaning, without reference to the possible hardship of the consequences. This rule which is founded in good sense, and tends to make persons careful at the time when they are entering into contracts, is thus referred to in a recent judgment of the Court of Queen's Bench. 'We are clear' said the Court, 'that where from the whole tenor of the agreement it appears that however unreasonable and oppressive a stipulation or condition may be, the one party intended to insist upon and the other to submit to it, a Court of justice cannot do otherwise than give full effect to the terms which have been agreed upon between the parties. It frequently happens in the competition which notoriously exists in the various departments of business, that persons anxious to obtain contracts submit to terms which when they come to be enforced appear harsh and oppressive. From the stringency of such terms, escape is often sought by endeavouring to read the agreement otherwise than accord-

ing to its plain meaning, but the duty of a Court in such cases is to ascertain and give effect to the intentions of the parties as evidenced by the agreement, and though where the language of the contract will admit of it, it should be presumed that the parties meant only what was reasonable, yet if the terms are clear and unambiguous, the Court is bound to give effect to them without stopping to consider how far they may be reasonable or not.' (Stoddard v. Lee).

Here we think is the true rule with regard to the construction put upon the bill of lading by the judge who tried the cause. The defendants say in effect,—we have contemplated our liability for the negligence of our servants, and decline to accept the burden: if you are willing to ship your goods under a bill of lading containing an express stipulation absolving us from that liability, we will carry the goods for you. The plaintiff did ship under the express stipulation that the negligence of their servants should throw no liability on the defendants' and his action in substance resolves itself into a demand upon a Court of justice to intervene and set aside the express condition of a contract deliberately inserted by one party and equally deliberately accepted by the other. We have therefore no alternative but to traverse, in the most unqualified manner, the conclusions arrived at in a leading article recently published by one of our contemporaries. The decision is in accordance with English law, and it is eminently desirable that that law should not be amended; while it is certainly in accordance with common sense and the understanding of merchants who have looked at the action on its merits, and by the light of reason and justice.

Few words need be said upon the reasonableness of the condition in the *P. & O. S. N. Co.*'s bill of lading. Probably that Company knows well how great are the objections entertained by merchants to the entire form of their bill of lading, and they must soon, if they have not already done so, learn how rapidly other steam lines which have conceded the objectionable points, are leaving them far behind the time.

The next case is one we would not willingly have touched upon did it not appear that the justice of the decision is impugned. The facts are simple, and are so clearly and concisely set forth in the judgment that it is unnecessary to summarise them here. The defendants, acting as agents for the owners of the bags, sold the goods so consigned to their care in February 1876, received payment in March following, and forthwith remitted the proceeds to their principals. The plaintiff must be taken to have known that, in the absence of any stipulation to the contrary, the remittance of the money to their principals absolved the mere agents from liability, if only on the ground that it deprived them of the only security they could avail themselves of. It was open to him to stipulate that the bulk of the bags should be examined, and that any inferiority to the samples should form a liability on the owner. Had the plaintiff done this, the defendants would have been in a position to say,—we agree to your condition and will retain the purchase money for a reasonable stated time, in order that you may have every opportunity for examining in detail the whole of the goods you have purchased. But the plaintiff did not do this; he exacted no warranty as to the condition of the bags; he gave the defendants no opportunity of protecting themselves against the liability he sought to burden them with, and it is not until nearly four months after the final payment has been made, that he complains of the quality of his purchase. In the

meantime the defendants looked upon the transaction as closed, but were startled out of their belief by finding themselves involved in an action which they had then, and never had, the means of preventing. The plaintiff seeks, as in the former case, to transfer the loss resulting from his own laches, to persons who could, if the ordinary rules of business had been adhered to, have protected themselves by retaining the proceeds until the actual quality of the goods had been ascertained, and by these means the loss might altogether have been avoided. This is the only comment we can make upon the remark that "The case was such that one of two innocent parties must suffer, and in such cases justice seems to require that the sufferer should be he who might most easily have avoided loss." If this is to be considered a rule of equity, justice has been amply vindicated.

In conclusion we would point out that the Consul-General took over six weeks to consider his decision. The judgment bears internal evidence of much care and thought, and it is quite right to add that it confirmed the foregone conclusion arrived at by the majority of the foreign residents who had examined into the merits of *WATSON versus WALSH, HALL & Co.*

PAPER MONEY.

THE currency question has of late been the subject of much discussion in the columns of the local press, and it is to be hoped the cause may be advanced by urging its importance upon the community. There are, however, sufficient reasons to induce us for a time to suspend the expression of our views on the desirability of an established currency for Japan, and to turn our attention to the financial condition of the country. The *Akebono Shinbun*, in an article which we reproduced on the 16th instant, raised a question which is not easily solved, and which is now a fruitful source of anxiety to the people. We refer to the issue of paper money. In that article the debt of Japan is said to be 276,524,600 yen, inclusive of the commuted sum of the *Kawa-shizoku* pensions. The financial estimate for the year ending June 1877, shows an allowance of yen 5,551,447 as set aside for the reduction of principal and interest of the gross debt, home and foreign, and that estimate further states that the total paper money in circulation is only little in excess of 94,000,000 yen. This imperfect and wholly untrustworthy memorandum—untrustworthy as there are no possible means of verifying any of the items, and no explanations whatever are vouchsafed—shows also that the receipts are in excess of the expenditure by the insignificant sum of 1,796 yen.

It is a well understood fact that the issue of paper money in Japan is practically without limit, and that it is still being put into circulation whenever money is required. The cost of the war in the south-west has been, upon the computation of Japanese competent to form accurate opinions on financial affairs, no less a sum than 18,000,000 to 20,000,000 yen, the whole of which has undoubtedly been met by the lavish issue of paper. This alarming increase of debt, wholly uncontroverted by the Finance Minister in his so-called budget, and the rapidity with which it is daily waxing greater and more burdensome, is matter for serious consideration. The past records of the state, the condition of the people, the resources of the country such

as we now know them to be, the loose manner in which the revenue is collected and the unsatisfactory details of its expenditure, the limited trade, and the conservative policy of the government all point surely to the "thick ice" barrier of our contemporary the *Akebono Shinbun*. That barrier is national embarrassment, and already has the country been warned by the voice of its own people. An irresponsible ministry possessing power to issue an unlimited quantity of promises to pay without, however, possessing any known means of redeeming its obligations, is pouring into the country a mass of worthless notes which are now passing current with, and almost of equal value to, gold and silver specie. The eyes of the people are being opened to the dangers ahead. They begin to find themselves parting with the substantial products of the soil grown by their own labour, nay even devoting their lives to the service of the state for consideration which every day's continuance of this war is decreasing, not only in value as discountable paper, but in its chance of possible redemption hereafter. That a drunken man may be stunned into sobriety, we have the dictum of Lord MANSFIELD for asserting, and by similar reasoning there is now every probability of this infatuated people being stunned into a sense of their position. The consequences are not difficult to foresee: the first moment that an impression gains ground of the depreciation in value of *satz* will be the commencement of a panic in the country, an event of which Japan has had no experience, and which must cause the greatest distress and suffering amongst those people who least of all should suffer—the innocent and confiding subjects of the empire.

If we are not under a grievous error, we believe one of the chief demands of SAIGO's memorial presented to the MIKADO was an investigation into the financial position of the state, a revision of taxation and strict supervision over public expenditure. We know the prayer of SAIGO's memorial was refused, and that an irresponsible ministry remains in office and exercises absolute control over the public funds with complete immunity from supervision and from liability for their acts. The burdens of Japan are great, and they will soon be greater than she can bear, but what remedy has she? The people cry out and no one will hear, for is not the ministry disinclined to move? Conscience they have lost the confidence of their countrymen; they still are sufficiently unpatriotic to remain in office in defiance of remonstrance, and to retain their positions they will plunge the land into a hopeless mass of debt which they will recklessly increase so long as they are permitted to flood the country with worthless paper currency.

It does not require more than ordinary foresight to discover the difficulties lurking in the path of the new *Kuazoku* bank, if we consider the public announcement of the loan to be made by that institution to Government of 15,000,000 yen, bearing interest at 5 per cent., but for which no security whatever has been, or is intended to be given. In the finance statement before referred to, a sum of 17,705,000 yen, is set apart to provide for the pensions of the *Kuwa-shizoku*. The *Kuazoku* form a bank, with the name of at least one high minister of state connected with the chief direction. The capital is to be 17,826,000 yen, or a similar sum to the aggregate pensions due from the Government, and it would appear as if the loan of 15,000,000 yen to the Government is almost

an involuntary one. It is upon their pensions that about four hundred and sixty *Kuazoku* depend for the capital of their bank; this is therefore an excellent opportunity for the Government to say "we will borrow from you five-sixths of the money due to you, and pay you five per cent per annum interest thereon. The 15,000,000 yen we desire you to lend us, are already spent in our patriotic struggle to suppress those men in the south who want reform in the administration, a struggle in which, we are convinced, you sympathise so much that you cannot, hesitate to assist us with the sinews of war. This timely loan will be a double assistance, for, on the strength of publicly borrowing from you the money we ought to pay you, but do not, and which has already been disbursed and scattered, we can issue a further supply of paper, 15,000,000 at least, for have we not just secured a loan of that sum on the moderate terms of no security and five per cent. interest."

We do not assert that what we here foreshadow has been done, but no doubt the real facts of the commutation of the pensions have yet to be discovered to the public. In the meanwhile the manufacture of paper money is being proceeded with: it is being poured upon the country at the rate of 3,000,000 yen per month for war expenses alone, putting aside the question of the further sum necessitated by the collaterally increased expenditure, and proportionately diminished revenue resulting from civil war.

This warning is late, but possibly not too late, to do something towards a movement which must soon take effect and which only can save Japan from national ruin.

FIRE-PROOF BUILDINGS FOR JAPANESE.

TWO months ago we published an essay from the able pen of Mr. J. LESCASSE upon the subject of buildings in Japan, considered principally in connection with various theories of resistance to the shocks of earthquake.* In that essay the author showed that the system of house architecture prevailing in Japan, of light wooden structures with heavy roofs, was not well calculated to resist severe oscillations, and proposed a system of his own, by which, at a comparatively trifling cost, stone and brick buildings might be rendered secure against seismic disturbances except those of extraordinary magnitude.

When the introduction of another system of domestic architecture than the time honored-one of the country was first proposed years ago, it encountered the strongest prejudice. Wood, thatch, and paper had answered all the national requirements from the birth of the nation: why should they be replaced by other materials? At a modicum of cost they provided shelter for millions, and employment for many. It was but seldom that an earthquake shock overturned them, and they were only burned down on an average once in every seven years. In either case it was a question of little cost and less trouble to rebuild them. Why should for them be substituted another style of building—more durable, it might be true—but more costly, and involving the terrible inconvenience of other innovations which would entirely change the domestic life and social habits of the nation? Better knowledge, a larger scope of view, and the course

of time, have done much to remove these prejudices; and now, after all that has been said and written by competent men upon the stability of structures of brick or stone, and their power of resistance to earthquakes, now that the truth of their assertions and the logic of their theories has been demonstrated by the experience of many years in Yokohama and Tokio, it is gratifying to find that the objections to substantial buildings, if they have not altogether vanished, are likely soon to disappear before the convincing teaching of economy and reason.

But it is not sufficient to demonstrate to the Japanese that these structures offer as much security as do the common wooden houses against Plutonic phenomena: that they are better calculated to withstand strong winds; and perhaps most important of all, that they are a charm, so to speak, against the too familiar plague of the country, FIRE; it is essential, when all this is shown and proved, to offer to Japanese of every rank of life a house built of incombustible materials, at a price which shall not exceed their means. This subject has received the consideration of a gentleman of high official position, who possesses a large fund of practical experience and a willingness to place its stores at the disposal of those whom they might benefit. He proposes a scheme of which the following is an outline. Its simplicity, and the certainty that it would prove in practice remunerative to native capitalists, should commend it to their earnest consideration.

It is matter of fact and moment that at the present day the cost of wooden buildings increases, while that of brick or stone diminishes: and this movement is probably only at its commencement and will increase in inverse ratio. Wood as it becomes scarcer will become dearer; while stones, bricks, tiles and mortar, as they are more easily procured, and quarried or made in greater quantity, will get less costly. The natural course of events thus tends to render more and more easy the solution of a problem which once appeared insoluble.

In order to make a serious and conclusive experiment, it would be necessary to build, here or in Tokio, a district under the cheapest possible conditions: that is to say to erect rows of houses of the same height, so that they might be covered with one system of roofing. The walls should be of brick strengthened by bands and joints on the principle proposed by Mr. LESCASSE: the roofs of such tiles as those now manufactured by Mr. GERARD. Each house would be furnished, for the purpose of heating in winter, with a Russian stove with pipes passing under the ground floor so as to warm the surface of the floor. In such a district the inhabitants would be protected not only against the danger of fire but against the winter weather. They could then do without expensive go-downs, and possibly be in a position to insure at moderate rates their furniture, clothes, and merchandise. As to damp, it is not to be feared. The experienced architect, to whose essay we have above referred, there showed that silicate plasters thoroughly protect brick walls from the effects of humidity.

It is to be devoutly hoped that Japanese capitalists will make up their minds to try an experiment such as is above indicated, or that the authorities will sincerely and loyally ask for assistance of any kind, and the employment of any capital, towards the furtherance of so desirable an object, and we shall then soon see the country endowed with a potent aid to preserve from destruction the little it possesses. This first step once made in the way of indispensable innovations, the Jap-

anese will doubtless understand that they have yet to borrow from Western civilisation improvements and advances of which so far they have taken no heed.

A MUNICIPAL DIRECTOR.

THE Kencho authorities have, no doubt, been impelled by motives of economy to the step which they have taken in giving Mr. BENSON three months' notice to quit his situation. The public are sufficiently well informed of the history of the establishment of the Municipal Directorship; and the conventions, ministerial notes, and other documents which its establishment originated, and which were intended to guarantee both parties to the contract from inconvenience and loss, have been again placed before them. It now appears that as far as one party, the foreign community, is concerned, that object and intention are to be at least attempted to be disregarded. With a clumsy bungling which is not without precedent in the framing of diplomatic documents, while to the Japanese has been accorded the right of dismissing the present Municipal Director with three months' notice, no distinct provision appears to have been made, in the event of his dismissal, for a successor. It is true that the only inference to be drawn from the official documents in connection with the formation of the post, is that the Directorship shall be a permanent office, and that, in the event of the Kencho availing themselves of the clause which contemplates the dismissal of the present holder of the post, another officer shall be elected by the suffrages of the foreign residents to replace him. But why, in the name of common sense, could not the Ministers have foreseen the contingency which has now arisen to be more than probable, and in explicit terms provided for it? As they or their predecessors are alone responsible for the negligence which has caused the present question to become moot at all, at least it is now their evident duty to see that the interests of their respective nationals do not utterly fall to the ground. It is their duty to insist that the spirit of the agreement entered into between the Diplomatic Body and the Japanese Government on the subject of the Yokohama Municipality shall be fulfilled; and that a mere rigid interpretation, to suit Japanese notions of economy, of its letter, shall not be permitted to leave the foreign settlement entirely without any responsible person to look after its management, police, and government. Yokohama has no Municipal Council: it is probably the most neglected, worst policed town to be found in any part of the (civilized) world: its streets are unwatered in the heats and dusts of summer, unlighted by night, and allowed in places to fall into a hideous and dangerous state of disrepair: burglars can enter its godowns pretty much when they like, and take away almost what they please: jinrikisha coolies are allowed to mass their vehicles in whatever locality suits them, to the hindrance of other traffic, and to importune, annoy, and abuse pedestrians in whatever terms they see fit to employ. Attention has been so often drawn to these and other grievances, that, for ourselves, we find it impossible to mention them without a feeling of despair at the utter improbability of their ever being removed, and we only allude to them now to indicate that those of them which can be aggravated would be very much increased if there were no foreign Municipal Director.

We repeat that the exigency of the present case, with its gloomy probabilities if allowed to take the course upon which it has entered, more than perhaps any other which could arise, demands the interference of the Ministers, whose action in the matter should be prompt. We are not of that number who call for the interposition of their representative if their dog gets kicked by a coolie, or if one of their countrymen has been proved grossly incompetent for the discharge of a contract which he has undertaken, and has been justly dismissed in consequence: in neither of these cases would we demand that a foreign Minister should insist upon heavy damages being awarded to his subject; but in a case like this of the Municipal Directorship and its contemplated abolition, we do call upon the Representatives of Treaty Powers, collectively and individually, to look after the just rights of the foreign community—rights which in this instance can only possibly be called in question through some neglect or incapacity on the part of the Diplomatic Body.

We will not quit this subject without indicating the proper course to be pursued. We admit that the Japanese have a perfect right to avail themselves of the clause which provides for the possible dismissal of the Director with three months' notice. But we insist that a Director must be. An election similar to that which resulted in the appointment of Mr. BENSON should be held. Of course the outgoing incumbent would have a right to offer himself for re-election, and would stand his chance with what other candidates might present themselves. Probably the Japanese officials themselves, if they are to see the existence of the post Mr. BENSON has so long filled continued, would sooner have him in it than another. To them he has proved himself a faithful and useful servant, discharging in the manner they most approved of the duties of his office. And, if the foreign community judge it expedient to continue to avail themselves of his experience and judgment, an election will give them the opportunity of declaring themselves. But times and opinions change, and it is within the bounds of possibility that the majority of the foreign residents might wish to have another guardian of their interests. They might wish to appoint a Director, who they would imagine should be a little rigid in the enforcement of their claims upon the municipal funds to which they so largely contribute. They might desire to install an official who would weightily and insistently point out to the Governor of the Ken what are the duties of a municipality: that the ground rents—sufficiently burdensome upon those who have to pay them—should properly and in common justice be in small part applied to the purposes of lighting, watering, and properly protecting the streets. In brief, they might wish for the appointment of a zealous, energetic officer, Mr. BENSON or some other gentleman, who fully understands and is prepared to do his duty both to them and to the delegates of the Japanese Government. But it is for them now to see, through their representatives, that, if they obtain such a servant, he shall be allowed to discharge his legitimate functions without fear. And to secure this a change in the system, or rather in the terms of his tenure of office, is of first necessity. Such a man as the residents might wish to elect Director, doing his work as they would wish him to do it, would hold his office for precisely three months from the expiration of the first fortnight of his installation. His dismissal at three months' notice for the fault of too much zeal must

not be left altogether in the power of his Japanese superiors. As he must be an elective officer, so let his appointment be for a term. For such an office a term of three years is sufficiently long. An incumbent found to be incompetent or negligent should during his term of office be accountable to his electors, who should have the power to censure or replace him by a vote of the majority. At the expiration of his term he should be eligible for re-election.

A post so important, so necessary, and one which might be made so useful as that of Municipal Director, must not be allowed to be supposed capable of suppression for a mere economical caprice of Japanese. The misconception which has arisen is the fault of the Foreign Representatives who were parties to the agreement of ten years ago. It is the part of the Foreign Representatives of to-day to see that such misconception is not possible in the future.

In reference to a matter which is now exciting some little attention in Yokohama, and regarding which misapprehension appears to exist as to the real merits of the question of appointment and removal of the Municipal Director, we have been requested to reproduce from the *Japan Gazette* of June 10th, 1868, the notice issued by the then standing committee of land renters, inviting candidates for the post of Municipal Director. The notice contains the memorandum of the representatives of the Treaty Powers, and an enclosure from the Japanese Government defining the term of the engagement, the mode in which it may be terminated, the salary, position, and duties connected with the office. In pursuance of these regulations an election was held on the 19th and 20th June, and Mr. Benson, the present Municipal Director, was elected.

In pursuance of the arrangements made by the Representatives of the Treaty Powers in Japan, as published below, the undersigned, by the authority therein given hereby invite candidates for the office of Municipal Director to present their names to the Chairman of the Landrenters' Committee on or before four o'clock on Friday the 12th inst.

The names of candidates so presented will be published in the next issues of the Local papers, and according to the terms of the Memorandum hereto annexed, votes of all persons registered at the Foreign Consulates prior to the First Instant will be received by the committee at the Chamber of Commerce rooms, No. 59, on Friday and Saturday, the 19th and 20th instant, between the hours of 10 and 12, and 2 and 4 o'clock.

A. O. GAY,
E. PIQUET,
A. J. WILKIN,
M. J. B. N. HEGT. } Standing Committee of Land
Renters.

Yokohama, 9th June, 1868.

(MEMORANDUM.)

YOKOHAMA, 4th June, 1868.

PRESENT:—The Representatives of France, Great Britain, Italy, Prussia, and the United States.

After mature consideration of municipal matters, and the best mode of selecting a Municipal Director, the following resolution was unanimously adopted.

"That the Standing Committee of Land Renters should be informed of the arrangements entered into between the Foreign Representatives and the Japanese Government, with regard to the salary, term of office, and functions of the Municipal Director, and should be requested to take the opinion of the community on the subject of the candidate to be presented to the Japanese Government.

"That for this purpose the committee should invite candidates to present themselves, should publish their names, and finally, having given the community at least five days between the publication of the names of the candidates and the first day of voting, should proceed to take the signed

votes of all members of the community; registered subjects to be furnished to the committee by the respective Consulates."

"That on or before the 22nd June, the committee should hand over to the Consuls the result of the voting together with all lists, votes, &c., and that the Consuls should then proceed to elect by ballot one from the three candidates having obtained the largest number of votes, the candidate elected by a majority of the Consuls present and voting at such meeting to be presented by the Foreign Representatives to the Japanese Government for the post of Municipal Director."

"That the mode of election agreed upon for this occasion should be regarded only as a provisional one and be subject, therefore, to such alterations as further consideration and experience might suggest."

Signed—LEON ROCHES,
HARRY S. PARKES,
C. DE LA TOUR,
E. V. VAN VALKENBURGH,
M. VON BRANDT,

Agreed to by the Representative of the Netherlands not having been present at the conference,
D. DE G. VON POLSBROEK.

(ENCLOSURE.)

The Japanese Government will give to the Municipal Director a monthly salary of \$250 per month and an indemnity for house rent of \$100 a month.

The Japanese Government will not make with the Municipal Director a contract for a certain number of years, but engage him for an indefinite period, reserving to themselves the right of cancelling the engagement by giving him three months' notice; the Municipal Director having of course the same right. The position of the Municipal Director as far as the foreign authorities are regarded will be that of a Vice-Governor; he will, therefore, not have a right to correspond officially with the foreign authorities, but may be used by the Governor of Kanagawa for official business to be transacted in his, the Governor's name, and by his order, and under his responsibility.

His duties shall be as prescribed in the arrangement concluded between the Foreign Representatives and the Japanese Government in October last, and it is understood that he will have to devote his whole time to his official business and will not be allowed to follow any other trade besides.

THE KUAZOKU BANK.

"Out of the capital of 17,826,000 yen, 15,000,000 yen will be advanced to the Finance Department bearing interest at 5 per cent. per annum unsecured. No bank with such a large capital has been established in the East" (*Nichi Nichi Shinbun*, 22nd May, 1877.)

"Most persons know that the establishment of a bank by the nobles club will supply the government with 15,000,000 yen, and thereupon the government will re-issue the paper money formerly issued by the Daijo-kuwan and Monbusho, but recalled and preserved at the Finance Department, which is supposed to keep a reserve for contingencies." (*Akebono Shinbun*, 25th May.)

THE establishment of the *Kuazoku* bank, long expected, is said to have been accomplished on the 21st May, 1877, by special authority granted by the Government. Contrary to the practice followed in Europe and America, no information is given to the public by the directors of the bank, as to its capital, nominal, subscribed, and paid up, or of the objects the promoters had in view in the formation of the concern; and we must therefore draw upon the meagre details furnished by the Japanese newspapers, and deduce such inferences as may appear legitimate, as to the probable business and means of an institution which boasts of a capital of some 5,000,000 yen in excess of that of the Oriental Bank Corporation. Taking the subscribed capital to be the sum stated, 17,820,000 yen, we find that rather imposing figure at once reduced by a loan of 15,000,000 yen made to the Government. It has been already explained that a sum of about 18,000,000 yen is payable yearly by the Government to the *Kuazoku*, as interest upon the principal value of the real estate transferred to the crown, and it is that

sum which was intended should form the capital of the bank. The inference therefore, is that the Government finding themselves in a position rendering the payment of some 18,000,000 yen inconvenient, if not extremely difficult, performed the meritorious action of suggesting to the *Kuazoku* the wisdom of investing their money in such a manner as should insure its circulation for the common benefit of themselves and the country at large, instead of limiting it to the immediate use of their retainers. No better method of forwarding so good an object could be devised than the establishment of the Fifteenth National Bank, and to obtain the consent of the representatives of the leading nobles to the undertaking, would be no very difficult matter. The bank formed, the proprietors' inspectors appointed, and the staff organised, the government explains the position. The Government will take 15,000,000 yen of your capital on loan without security, and pay you an annual interest of five per cent. The remainder, if not already invested in public works or other useful objects, will be at your disposal.

This, apparently, is the history of the formation of the *Kuazoku* bank; and we feel inclined to express our admiration for a scheme which relieves the Government of a burden they could not meet, and enables them to come forward 15,000,000 yen richer than they were before the formation of the bank. In addition to these advantages there are others more substantial behind; the arrangement come to with the *Kuazoku* entailed the surrender by them of their property, in consideration of receiving annuities calculated upon a scale of interest in proportion to their surrendered estates. If, therefore, the *Nichi Nichi Shinbun* is correct, the Government have received the property, not for the consideration originally agreed upon, but for this year at least, for five per cent, or one-twentieth of the amount of the interest they originally promised to pay. The whole affair is too improbable for foreigners to believe. Opposed to all principles of reason and business; reducing to a mere semblance the so-called bank, and bearing upon its face the strongest evidence of impracticability, we can only form one of two conclusions;—1st, that the argument used to induce the *Kuazoku* to accept such an arrangement must have been of the most subtle character, and the emanation of a remarkably clever mind; or, 2nd, that the *Kuazoku* have displayed a patriotic feeling of the loftiest character, by sacrificing their individual rights in support of the existing state of things and the suppression of the movement in the South.

Whichever view is correct one thing is certain. The expenses of the war, estimated to amount to nearly 20,000,000 yen, will, in greater portion, be defrayed out of the private purse of the *Kuazoku*.

These are the inferences to be drawn from the statement of the *Nichi Nichi Shinbun*, concerning the formation and capital of the bank, and that journal is also responsible for the inferred result of the action of the government in borrowing from their own people the interest justly due to them upon value taken over, a sign of financial poverty extremely detrimental to any views which Japan may have formed for the extension of her credit in foreign countries. It is to be hoped that if the bank is a reality the statements of the *Akebono* and *Nichi Nichi Shinbun* are incorrect, both for the credit of the government and the commerce of the country, which latter was intended to be forwarded and assisted by the large capital first supposed to be under the control of the bank.

THE INSURRECTION.

WE alluded recently to the report that telegrams had been received on the continent of Europe and in New York, asserting that the rebellion in the South-Western provinces of this Empire had been effectually suppressed. Whatever the object of sending such totally false news, and by whomsoever such telegrams may have been sent, we cannot but denounce in most distinct and emphatic terms both the falsehoods and the person or persons who made them. The Government would act wisely, and would demonstrate their own good faith, if they would send officially to their several representatives in foreign countries, denying the statement which has been circulated and giving an honest version of the affair. The service rendered by lies to the cause they are intended to benefit is the merest bolstering at the best, temporary, and, by the reaction which takes effect when the truth asserts itself, really pernicious. It is only too evident that the insurrection is not suppressed: further, it appears that its suppression is as far off as ever. The resources in men, transport, and material, which have been massed during the last three months by the Government at and near the scene of strife, appear to be inadequate to the accomplishment of the end in view; while, if the assertions made by the now partially ungagged native press be true, or only approximately correct, the rebel forces are numerous, well organised, and if not so thoroughly armed as their opponents, occupying strong, perhaps impregnable, positions. We must not forget that a strong appearance of probability is given to these assertions by the very continuance of the strife.

We learn now from native sources that the War Department have, from the 21st instant, chartered all the small steam vessels now plying between Osaka, Shikoku, and the South-Western provinces, at a rate of 25 yen per day for each vessel. They are intended for the transport of troops and provisions from point to point on the coast. Little doubt exists of the spread of the active expression of disaffection, or in plain words of open revolt, in the Kochi-ken. A battalion has been detached from the Osaka garrison and sent to Sumoto, in Awa, close to Kochi, the probable destination of the soldiers. The police force is being largely reinforced by fresh levies of shizoku, who, as soon as they are enrolled, are sent to the South-West, and new recruits are still asked for. We read of extensive enrolments in the north. Seventy policemen left Awomori for Tokio on the 21st instant, and about one hundred more are expected to follow them shortly. Again, on the 22nd, one hundred police recruits, contributed by Sendai, were despatched thence to Tokio, where some one hundred and fifty are also expected within the next few days from Echigo.

A Japanese, recently arrived by the *Hiroshima-maru* from the seat of war, gives some details to the *Mainichi Shinbun*. He says that the insurgent lines in Yajiro extend for a distance of about eighteen *ri* (45 miles) from North to South. Kunimi-yama, which he describes as a very strong strategic position, is occupied by a force of 2,000 insurgents, said to be the advance guard of Kirino Toshiaki. Kunimi is a high mountain, on the confines of Higo and Satsuma, South of Midzu-mata. Here the insurgents appear determined to make a staunch resistance to any attacks which may be made upon them, as, if they lose the place, communica-

tion will be stopped between the insurgent armies of Hitoyoshi castle-city on the one side, and Satsuma on the other.

Meanwhile the imperial arms are credited with several successes. Thus, the *Hochi Shinbun* says that a telegram, sent from Kioto on the evening of the 26th, conveys the information that at dawn on the previous day the troops attacked and seized several insurgent batteries on the mountain passes of Yahadzu on the Demidzu road.—Another despatch from the same place on the 27th, says that on the 25th the first division, commanded by Lieut.-General Nodzu, attacked the insurgents and drove them from the strong positions which they held at Ozaka, Kudzu-hara, and Iwato. The victors encamped in a commanding situation whence they overlooked these places.—The castle of Oka in the province of Bungo is now beleaguered by the imperial armies, and a bombardment has already commenced.—On the other hand, we are informed that the insurgent forces at Beppu, Bungo, increase in numbers from day to day, and now threaten to proceed to Seki in Saga by the Yawata and Iyoji roads.—A telegram from Murata, *Keibu*, sent from Owake on the 27th, announces that at about 2 p.m. a body of police, and a detachment from the Kokura garrison, commanded by Hagiwara, marched upon the castle of Oka, and engaged the rebels in a battle which had not finished when the telegram left. The affair, so far, must have been a very unimportant action, as it is said that only one soldier was killed, and twelve were wounded.

Rumours of divided counsels in the insurgents' camps are still rife. Saigo is now said to be desirous of carrying on the campaign in Hinga and Bungo, where he would oppose the advance of the imperial armies from the North-West. Three of his associate commanders, namely, Murata, Kirino, and Fuchibe, wish, on the contrary, to wage the war in their native land, Satsuma, where their army would incur no danger of lacking provisions. We subjoin some more items from the native journals.

THE *Hochi Shinbun* writes:—A telegram from Kokura, despatched at 1.30 p.m. on the 28th instant, announces that about 300 insurgent troops on the Hinga road attacked Saiki and organised a march to Usui. The imperial forces, consisting of soldiers, marines, and police, were sent out to intercept them. Kirino is in Miyazaki (Hinga) where he is engaged in enlisting new soldiers.—Another despatch from Kioto, sent at 3.35 a.m. the same day, says that on the 25th, the police forces, commanded by Hagiwara, marched for the castle-city of Takeda (Bungo) by two roads and approached within about ten cho from the castle. They seized three batteries, joined the imperialists at Tamaki, and approached close to the castle; but the rebel troops fought desperately and in good order.—A telegram from Kokura, despatched at 2.10 a.m. on the 29th instant, announces that during the whole day of the 28th, the castle of Takeda, guarded strictly by the rebels, was severely bombarded and several desperate engagements took place but the castle was not taken.—Each of the military officers at the seat of war, is dressed in coarse cloth. Sentinels cannot distinguish officers from common soldiers, in the absence of official uniform.—Fuchibe is encamped at Miyanehi with a small number of troops.—The ex-Governor Oyama, and other offenders in connection with the insurrection have been ordered by the government to be transferred to the head quarters of the imperial army in Kiushu.—On the 22nd in-

stant about 130 wounded soldiers were brought from Nagasaki to Osaka.—Shimadzu-Hisamitsu, who has been in the island of Sakurajima in Kagoshima removed to Botsu, about eighteen or nineteen ri from the island. The principal road between Botsu and the island is mountainous and the distance by sea is about thirty ri. What his intentions are in this movement are unknown. Owing to the disturbances in the south-western provinces sniders, value yen 14,637.54, have been purchased by the police office at Tokio.—It is rumored that some foreign vessels were observed anchored off the coast of Kasedakata-Ura, Satsuma, selling machines and ammunition to the rebels. Cannon balls shot by them are found to strongly resemble Armstrong projectiles manufactured in Prussia. Such balls cannot have been preserved by the rebels and must be of recent importation.

From the *Choya Shinbun*:—A telegram from Kioto, dated the 30th instant, says that on the morning of the 29th, the imperial forces attacked and seized the insurgent batteries on Erugoyama, North-West from our fort at Yahadzu. Five rebels were found killed and and thirteen rifles and various other things were captured. The *Thabor* bombarded the rebel's camps on Mahararogi and Komenotsu. One soldier on the imperial side was killed and seven or eight wounded. Masamogi, who was wounded a few days ago, died that morning.—Another despatch from General Yamagata, received at 3 p.m. on the 30th, states that about 3 a.m. the 29th the imperialists attacked the castle of Takeda and a severe battle was fought in which the rebels charged desperately. At length the insurgents left the castle in disorder leaving many killed, and much ammunition. It was fought about 7 a.m. The routed rebels fled by the Itokata road. Many of the shizoku in Takeda surrendered to the victors.

The *Hochi Shinbun* says:—A telegram from Kioto, sent at 4.10 p.m. on the 29th instant, announces that the insurgent batteries, built in a row on Yahadzu on the Demidzu, were attacked and seized by the imperial forces on the 25th instant. On the following morning a detachment of the rebels, about fifty or sixty in all, cut their way into the batteries, with a view of retaking them, but they were driven back. One corporal and eight soldiers on the rebel side were killed and some ammunition was captured by the victors. On the 27th, the imperial troops advanced on the Terukaku road to within about twenty cho from the rebel batteries. They are now within about one ri from Hitoyoshi castle, which can be seen clearly. But the imperialists found it very difficult to march for the insurgents are encamped in several strong places.—The insurgent troops, who penetrated to Bungo, consist of four detachments: the first is commanded by Beppu, and Murata, the second by Masuda, the third by Yata and the fourth by Goto. A telegram from the Owake ken, received in Tokio at 3 p.m. on the 30th ult. states that, early on the morning of the same day the imperial forces crossed the river Kagamigawa and marched to within 7 cho from Oka castle. A desperate battle was fought and in the forenoon they were obliged to retreat, having sustained considerable loss in the conflict.—Another telegram from Kioto, dated the same day, says that on the 28th the two castles of Takeda and Kojo in Bungo were attacked and destroyed. The rebels fled by the road of Itokata. The imperial forces on the Hitoyoshi road have established their head-quarters in the village of Otsuki, which lies about 2 ri from Hitoyoshi castle. The rebels are strongly fortified in the village

of Watari-mura.—It is rumored that a desperate battle was fought at Kagoshima on the 28th May and large numbers of the imperialists were killed and wounded, but we can not be sure that this is correct for we have not received a telegram respecting it.—Machida, the third son of Sadowara, ex-Daimio of Hinga, was busily engaged levying new troops in his native province after the raising of the siege of Kumamoto. Late-ly, it is said, he has deserted his country and fled to some foreign country.—The insurgents, it is rumored, are divided into five parties, the first of which is in favour of retreating to Satsuma, the second of retreating to Hinga, third to close on Kagoshima and drive out the imperialists, the fourth to proceed directly to Kioto, taking Mr. — and the last one is in favour of surrendering.

The *Choya Shinbun* says that the *shizoku* of the Yamaguchi-ken are much excited.—To-day an artillery Company will leave for the seat of war.

—

(From a letter from Mr. Nakajima of the *Akebono Shinbun*, dated the 18th May.)

The following are the particulars of the attack upon the insurgents at Fukuyama by the imperial armies in Kagoshima on the 17th May:—

The imperial armies in Kagoshima were informed by their band of spies that large numbers of the rebel troops were encamped in Fuknyama in the province of Osumi, which lies about twelve ri north-east from Kagoshima and six ri from the castle of Miyako. It is a most prosperous town situated on the coast and inhabited by rich merchants. Many rice godowns, belonging to the Shimadzu clan, are built in the town, which is a place of great natural convenience for the receipt and shipment of merchandize. Early on the morning of the 17th, half a battalion of the 4th division, commanded by Lieutenant General Soga, and half a battalion of the 3rd division, commanded by Lieut. Colonel Tanabe, embarked on board the *Takao Maru* in the harbour of Kagoshima. Admiral Kawamura, War inspector, Vice Admiral Ito, Lieutenant Generals Oyama and Soga and many other officers of the navy and land forces embarked on board the *Seiki-kuwan*. I was allowed to follow them in the same man-of-war. At 9 a.m. we weighed anchor and arrived off the coast of Fukuyama at 10.45, where the position of the rebels on land was reconnoitred by telescopes. The *Seiki-kuwan* bombarded the rebels' camp on the coast, and the insurgents were thrown into great confusion. Meanwhile the troops on board the *Takao Maru* approached to the foot of the Fuknyama by means of many small steamers and endeavoured to land. A detachment of the rebels opposed their landing for a short time, but the *Seiki-kuwan* fired upon them and the imperial forces succeeded in landing without much loss. They divided into two parties, one marched along the sea coast and the other over the mountains. The insurgents did not attempt to drive back the imperial troops, but they set the town of Fukuoka on fire. It rained heavily at the time and the fire was arrested before much damage was done. The routed troops fled in disorder by the road to Miyakono-castle. Sub-Lieutenant Kono pursued them. When he commenced the ascent of Fukuoka in pursuit, a rebel soldier, armed with a long sword, appeared suddenly before the Sub-Lieutenant from the roadside, who would have been killed by him, if a brave imperial soldier had not been by his

side. The soldier killed the rebel with his sword bayonet. In Fukuoka, about 1300 rebels were encamped and a few days before the battle the majority were despatched to the relief of their hospital in Midzutare about 5 *ri* from Kagoshima, where the imperialists made an attack and seized some quantities of medicine and captured two physicians. Only about 400 rebels guarded the city of Fukuoka. The victors did not pursue the insurgent forces for any distance, but set four godowns on fire, where about 1,000 koku of rice were preserved. Thus at about 6.30 p.m. the same day, the victors returned to Kagoshima in the *Seiki-Kuwan* and *Takao-maru*.

THE INFLUENCE OF SAIGO.

ALTHOUGH Saigo Takamori is the public enemy of the state; although his crime is, according to the laws of Meiji, absolutely unpardonable, he is still a great man. Was it not he who overturned the despotic Bakufu, and restored the ancient imperial authority? Did he not do this with infinite exertion and the most profound indifference to the perils which beset his person? And is it not for all this that his name will be remembered by future generations, as that of the man who added a page of unwonted lustre to the historical records of Japan. Surely human glory is an idle dream or air-drawn phantom! In a moment of passion, smarting under grievances, Saigo took up arms, defied the imperial authority and sought to destroy the ministry, and by so doing his magnificent fame is sullied, and will soon become a ruin.

Though Saigo is guilty of treason for which crime his life is justly forfeit to the outraged law of his country, he is still regarded by the mass as the greatest hero in Japan, and this opinion we should do violence to our reason by altogether discarding or denying its truth. If, therefore, he is a hero to-day, what will he not be regarded as in a thousand years, when men have learned to deal with his frailties with justice and tenderness.

Who is the man who excites so much admiration? Who is Saigo? He is a plain *samurai* of Satsuma. Born of a family having no pretensions to military rank or influence, and united by no tie of blood to the great of the land, he possesses qualities absolutely his own; when he raises his standard myriads of stubborn warriors flock eagerly around it; fight for their beloved commander, die for him and rejoice in death earned in so noble a service. This quality or attribute of Saigo was not possessed by any of our ancient warriors; true, the powerful feudal lords of old trained their vassals to fight bravely and well, but they fought under stress of authority not for personal love and veneration. Truly Saigo Takamori is a great man.

The Satsuma *samurai* are not ignorant of the right principle, but they declare they cannot break faith with Saigo. Wherever he goes, east or west, north or south, thither will they follow. He has gained the hearts of his followers; they regard his person with affection, they respect him as their lord, venerate him as their father, and know no man above them but Saigo.

Our government at the commencement of the rebellion dispatched the strongest forces the empire could afford against Saigo; but he with a smaller army defied them for seventy days, tormented them sorely nor showed any sign of fear or yielding during the hottest contests ever fought in our land. The imperial army being exhausted with their struggles, newly enlisted troops were sent to the

scene of action, and they succeeded in raising the siege of Kumamoto, whereupon Saigo retreated towards the south, a movement which we now know was dictated by policy not necessity, and was part of the prearranged tactics of the veteran. Victory and defeat alternate in the career of the bravest chieftain who, equal to either fortune, is neither elated by one nor depressed by the other, being content for his fame to rest upon the result of the campaign than upon a single, or even a series, of great and brilliant victories. Koi who had strength enough to move a mountain, met his death at Uko, and Kusunoki, whose wisdom was sufficient to shake the solid earth, was defeated at Minatogawa. Thus we see success and failure are controlled by laws independent of the might of the hero. Saigo now, with his small but well disciplined army defies the whole force of the empire; none can surpass his excellent wisdom and indomitable courage, nevertheless he may be slain to-day, or he may be defeated and his army, he dispersed and destroyed to-morrow: in either event his fame is assured; it will remain forever, and in this belief he may give up life with contentment. Would that this man with his devoted followers who are being sacrificed in unholy strife with their fellow countrymen, and the treasure, which is our national blood, wasted upon internal dissension, had been used in an expedition to the Korea. There, at most, we might have challenged the adverse criticism of the world, but we should have been spared the groans of a suffering country distracted with domestic strife. In the years of Genroku and Tensho, heroes sprung up numerous as the stars in heaven, and fought bravely for their own purposes. In was not difficult then for a man of personal popularity to achieve great deeds, even as Hojo Soun controlled eight provinces and Mori Motonari, ten; but now the whole civil and military power is centred in the government against which Saigo must contend. An evil and difficult time, yet he has nevertheless succeeded in keeping his adversaries at bay, and in repeatedly defeating and disabling them. Had he lived in the period of Hojo and Mori their fame had been unknown to us, for, in a moment, and by the expression of his desire, could Saigo have trampled the whole of Kiushiu under his feet.

These, gentlemen, are truths, but say they are not, and say also that Saigo has become so influential because his followers are abject and slavish, and unworthy of their country. And say also that the absence, or present scarcity, of great men in Japan, has given Saigo an opportunity to earn for himself the title of "hero," an inevitable consummation for which you are devoutly sorry.—*Kakunin Shin-shi*.

THE FINANCIAL CONDITION OF JAPAN.

A gentleman recently remarked to us, "The distressing disturbances in the south-western provinces of Japan have continued for several months, entailing an immense expense on the government for the movement of armies. About 15,000,000 yen have already been expended by the Finance Department for the suppression of the rebels. Who will not suffer for this? But some of our countrymen consider the matter too much exaggerated, and they constantly debate upon methods for promoting the future welfare and wealth of Japan now sunk in deepest poverty. This is matter for serious consideration. Most persons know the establishment of a bank by the nobles' club will

supply the government with 15,000,000 yen, and thereupon the government will reissue the paper money formerly issued by the Daijokuwan and Mombusho, but recalled and preserved at the Finance Department, which is supposed to keep a reserve for contingencies. It may be of no moment to the government that the large sum of about thirty or forty million yen should be expended in the suppression of the rebellion, this being a good opportunity to sweep off the discontented *shizoku* throughout the empire, which would not be dear at thirty or forty millions; but this done we fear there would still be large numbers of discontented men throughout the country from one side to the other."

This gentleman is right so far as the Government is concerned. We shall be easy as long as the paper money preserves its value equally with gold and silver. To-day, we observe nothing to fear, except the discontented *shizoku* in one corner of the empire. But it is a most fearful matter for us to issue paper money with the view of relieving the difficulties of the country. Consider that the revenue of rice, wheat and other produce, which we harvest by hard labour during the hot and cold seasons, is wholly insufficient to pay off the national debt. The sum of paper money, now current, is about 94,769,700 yen. To this sum, we must add the home debt of 40,714,800 yen the foreign debt of 14,155,100 yen, amounting in all to 141,224,600 yen. Besides this heavy burden we have undertaken the capitalization of the pensions of the *Kuwashizoku* entailing a liability of more than 135,300,000 yen. This gives a total sum of 276,524,600 yen. If this sum be divided among the population of 30,000,000, it gives for each man, woman and child about yen 9.21. Therefore if a family, consisting of five men, can not pay about yen 46 the government of Japan is unable to meet its home and foreign liabilities. Now we, considering the condition of the country and its inhabitants, know unhappily that the poverty of Japan has reached the lowest depth. On all sides we hear the gloomy voice of impecuniosity both in the capital and in country districts. Our countrymen being in this miserable condition, we are going about to increase the debt by thirty or forty millions. How unlucky are the inhabitants of Japan in the Eastern ocean!

We have heard that since the establishment of the imperial mint in Osaka by the present government, three coins of gold, silver, and copper were minted to the value of 71,815,480 yen up to February of the 9th year of Meiji (1876). This is not a small amount, but in estimating the exports of specie we are sure that the new coins are insufficient to meet the excess of imports over the exports. On one side our government pays yearly 374,892 pounds (1,829,473 yen) to England for capital and interest of the loan, and exports yearly about 700,000 yen for Legations, Consulates and students in Europe and America. On the other side imports are greater than exports by at least 8,000,000 yen in any one year and sometimes about 10,000,000 yen. In addition large amounts are expended in exchanging our money with foreigners for their salary while in our service. Not the most prosperous government can support such expenditure. Thus in course of time, neither gold nor silver will be seen at home, where only worthless paper money will remain. It is with sorrow and distress we observe the poor condition of our country brought about within the past few years.

A proverb says that he who treads on frost, will soon encounter thick ice. Are we not now walking on ground covered with frost?

If any one disputes this proposition and denies the probability of meeting a barrier of thick ice, he is merely a fool with whom it would be waste labour to discuss matters of this importance. All the gold and silver coin which has remained in this country for ages is now going from us, and if a difficulty should occur between us and foreigners, where are we to look for ships, arms and other important means of self-defence.

Oh! thirty millions of fellow countrymen our path is now, in truth, covered with frost, the forerunner of the thick ice against which we have no means of protection, and which may cause us all to perish.—*Akebono Shinbun.*

SKETCH OF THE LIFE OF THE LATE KIDO, NAIKAKU-KOMON AND EX-SANGI.

(From the *Nichi Nichi Shinbun.*)

Ex-Sangi Kido, Naikaku-komon, of the rank of *Jusami*, bearing the decoration of the first class, died in Kioto on the 26th May of the 10th year of Meiji (1877). He was regarded by His Majesty the Mikado, as a rudder for steering the state by, and the people looked upon him as the "Great Bear." Now, we have lost one of the most illustrious men in the universe, it is our duty to write a brief sketch of his life. We have repeatedly been to his residence and been honoured with interviews, and we cannot refrain from rendering this tribute to his memory. Kido was born in the house of Wada, ex-Daimio of Choshu, who belonged to the Mori clan. In his early years, he was known as Kogoro, and he went under this name until he reached the age of fifteen, when he received that of Takayoshi, by which he was known till he left this world a few days ago. Before he reached his manhood he succeeded to the house of Katsura. But when his ability and talent became known his ex-lord, Mori, ordered him to join the house of Kido, which is of the same clan with Katsura. He was an adventurous boy and disobedient to his mother. When the future distinguished man was about twelve or thirteen years of age, his mother was suffering from consumption. Notwithstanding her illness he did not attend to her as he ought to have done, but continued his adventurous career to her great distress, and she became more and more unwell. Young Kido suddenly changed his conduct and waited most attentively on his mother, who, however, died in the course of a few days, leaving the boy an orphan. Her death caused the boy to reflect on his conduct and repent of his misdoings. He became very industrious and studied literature and fencing. He made rapid advancement and was frequently in the company of Yoshida-Torajiro, a man distinguished for his accomplishments, ability, and talent, and many other distinguished men in Choshu. Kido eventually left his home and sojourned in Kioto for a short time, in order to observe the difference which existed between the Mikado and Tokugawa clans. He next came to Yedo, where he became the chief pupil in the fencing school established by Saito Yakuro. He was friendly with ex-retainers of the ex-Daimio Mito, known as the Vice-Shogun. He studied the Western languages and sciences, and entered the schools of Egawa, Nakajima, and Katsu. He established a school, named Yubi-kan, in his lord's yashiki at Hibiya, Yedo, where the art of fencing, Japanese, Chinese, and Western literature were taught. He superintended this school, and soon became a distinguished man. Previous to this Commodore Perry arrived in the bay of Shinagawa about the opening of the ports for trade. Kido was very anxious to be engaged in surveying the coast

of the neighboring sea of Yedo. Fortunately for him the Shogunate Government despatched some surveyors. Mr. Kido, dressed like a coolie, petitioned to be engaged in their service. To his great satisfaction he became acquainted with the depth of Shinagawa and other waters. When he came to Kamakura on some business he was ordered by some officers to carry a riogake—two black boxes used in travelling. He was not strong enough to carry them, but if he had refused to do so he would have been dismissed and his desire would have been frustrated. An old woman at a wayside inn laughed at him and said that he was a feeble looking coolie, and was more fit to become the carrier of *sairo* (a medicine chest belonging to a travelling doctor.) Now the decline of the power and influence of the Tokugawa government had already commenced, and the loyal samurai rose in favour of the Mikado throughout the empire. Various difficulties occurred, which were considered to render an entire change of government necessary. Mr. Kido then returned to Kioto and lived in the yashiki of Chohan (his ex-lord) at Kawaramachi. He interviewed many nobles, and was friendly with loyal and active retainers of the various Daimio; and he early prepared himself to take an active part in the events of the future. At this time, high excitement prevailed throughout the country. Kikkawa Kenmotsu, a branch house of Choshu, guarded the Mikado's palace in Kioto, where various Daimio were assembled. But owing to the event which occurred there on the 18th day of the 8th month 1862 he retired to his country, Choshu, where all his retainers in Kioto followed him. Only eighteen men of ability and talent remained in the yashiki at Kawaramachi. Mr. Kido stopped there also as he was desirous of ascertaining the state of the public mind. At this eventful time, the Tokugawa government became more and more suspicious of Choshu. In 1863 the Shogun government seized his yashiki at Kawaramachi and totally routed the Choshu men, who retreated far into their country. Mr. Kido narrowly escaped being arrested and took refuge in the house of Mr. —, who is still living, who treated the runaway with much kindness. Still he did not wish to leave Kioto. But owing to the strict search ordered by the Shogunate, he was obliged to leave for Tamba. The defeated men of Choshu were met by Nagato-no-kami, at the head of a body of troops, on his way to Kioto. They joined their forces and returned to the West. Before he arrived at his castle at Yamaguchi, the wonderful news of what had occurred at Kioto had spread much excitement among his retainers, who were divided in opinion and formed themselves into two parties, viz., the Sei-to and Zoku-to. The Shogun government in the meanwhile sent an army against Choshu with Owari Daimyon, as Commander-in-chief. At this critical moment, Choshu could not successfully oppose the government, so the three karei, namely: Masuda, Fukuhara, and Kokushi committed harakiri, as a propitiation for the crimes of their lord, and their heads were despatched to the Commander-in-chief. Shimidzu, Shishido and others, who held opinions similar to Mr. Kido, were killed by the Shogun authorities, to his great sorrow. Thus many men of ability and talent of the Sei-to were killed, the Mikado's party were much discouraged, while the Shogunate Government had again somewhat restored its former power. Mr. Kido, who kept company with coolies and gamblers in Tamba to prevent his being discovered by the Tokugawa author-

ities, could not return to Choshu, where his enemies were waiting anxiously to arrest him. He could hold no communication with his friends in Choshu. At length the lord of Choshu sent a letter to him secretly, inquiring after his health and warning him to wait for a more favourable opportunity to show himself. When the Zoku-to, who were in the Tokugawa's favor, were defeated, it was determined to close the Choshu's dominion against the Tokugawa people. Mr. Kido was called back from Tamba to Choshu, where he was appointed an inspector under the Choshu Government, and charged with all the civil and military affairs of the province.

Mr. Kido, now the minister of the Choshu Government, with the assistance of Murata-zokoru, changed the military system to that of the Dutch. [Murata was afterwards named Omura-Masujiro and ex-Hiobu Daiyu, Vice-Minister of the War Department. He became acquainted with the Dutch language during his residence in Nagasaki and Osaka, and mastered the military science of Holland. When he returned to Choshu, he found that a general opinion prevailed among his countrymen to close Japan against the foreign barbarians. So he hid himself, because any one who spoke of foreign matters would most likely be injured.] Murata was placed in charge of military affairs in Choshu by Mr. Kido, who improved very much in his administration of civil affairs, in which he was greatly aided by Yamada-Uyemon and other distinguished men. Mr. Kido assisted the stubborn samurai to progress in civilization and kept up friendly communications with various noble and active daimios throughout the country. Thus, he was employed the whole year of 1864 improving affairs, and instructing the samurai to be friendly with others, and ready to serve the Mikado faithfully even at the risk of life. Previous to this time, Yoshida, whom Mr. Kido regarded as his elder brother, was killed by the Tokugawa authorities. He was a man of great popularity and all the samurai in Choshu served Mr. Kido as well as they had served him who was killed. At length, in 1865, the Tokugawa Government again sent an expedition to Choshu and despatched Ki-i Daiyagon and Ogasawara Iki-no-kami at the head of large armies, amongst whom were a number of daimio. Many battles were fought, resulting generally in favor of Choshu, who extended his dominion. The fourteenth Tokugawa Shogun Iyemochi died suddenly in the castle of Osaka, and the Mikado (father of the present Mikado) soon followed the Shogun to the invisible world. Both the contending parties now took a little repose and entered into some negotiations, which resulted in the Shogun's armies retreating as far as Osaka, while the Choshu troops returned in peace to the borders of their former dominion in accordance with an order issued from the Mikado's court. At this time a distinguished man appeared in Kochi, Tosa, who was well known by all the daimio as Sakamoto. He manifested much anxiety respecting the bad terms on which Sasshu and Choshu stood, and acted as a go-between. He first visited Saigo, Okuba, and others in the yashiki of Satsuma in Kioto, and persuaded them to reassume friendly relations with Choshu for the sake of the Mikado and the country; and he also requested Mr. Kido to exert his influence to the same effect. Kuroda and Oyama followed Sakamoto to Choshu in order to negotiate with the opposite party. Nagato Saisho, ex-lord of Choshu, sent Mr. Kido secretly to the yashiki of Satsuma in Kioto, where a document was drawn up and signed. This was really the foundation of the

revolutionary war in 1867. At this time the daimio lost confidence in the Tokugawa Government, and the Mikado's Court issued an order for the pardon of Choshu. So, Sanjo Saneyoshi and seven others of his class (koge) who followed the Choshu troops to the west on their leaving Kioto, were allowed to return to Kioto. Meanwhile, the Tokugawa government ordered the lord of Choshu and his karei to proceed to Osaka. Before they arrived, the lord of Kochi submitted a memorandum to the Shogun Keiki, persuading him to return the power of government to the Mikado's court. In October 1867 the Shogun was allowed to restore the power of administration to the Mikado. In the following month, the Tokugawa government issued an order retracting the summons of Choshu and his karei to proceed to Osaka. But in December of the same year, Mori Takumi entered Kioto at the head of a large force and joined the Satsuma troops, who were stationed in the monastery of Sokokuji.

In January, 1867, the first battle of the revolutionary war took place at Fushimi, near Kioto, between the Tokugawa troops and the allied armies of Satsuma, Choshu and the various daimio in the south-west. It ended in a splendid victory for the allies. Mr. Kido was in his native country at that time. During the same month he was called to the Mikado's court and appointed Komon of Sosai-kioku. His high and well cultivated ability and talent, which had been confined in the small dominion of Choshu, now developed greatly and became apparent throughout the country. From this time the affairs of the nation began to improve under the able administration of Mr. Kido. But he soon became convinced that it was impossible for the country to thrive greatly while it remained so much under the management of the daimio, and that a radical change was absolutely necessary. With the object of bringing about a reformation he communicated with the aged prince of Choshu, and was permitted by the Mikado to return to Choshu for a short time in order to carry out his project. When he arrived there, Kido explained to the prince that everything in Japan had become changed; the Tokugawa Shogunate Government has already fallen, and the exigencies of the times rendered a further reformation necessary, for nothing could cover the ears and eyes of the people. If some of the more powerful daimio, who had helped to restore the Mikado's power and in the destruction of the Shogunate Government, considered that the place of the latter should be supplied by them, then the restoration of the Mikado's power would be entirely fruitless. He contended that the most important consideration of the day was to seek to establish right administration and so gain popularity for the Mikado. All the disputants were reporting the prince as an offender. What was to be done? he asked. The prince's ancestor Moto-tsugu in the middle ages had served the Mikado to the utmost of his ability, as he, the prince, had also served the Mikado faithfully and helped to restore his power. If he would now act wisely the reproach which had been cast upon him would soon pass away, and he would serve to put an end to a terrible disturbance among the daimio in the future as well as make his clan distinguished. The prince of Choshu asked of Kido "What had we better do then?" Mr. Kido replied again:—"All the dominions of each daimio have been given by the Tokugawa government. Japan has never rightfully belonged to the Shogun government, though it has considered the country its rightful possession and the daimio its retainers, treating the Mikado's

court as if it was of no consequence. There is nothing else that can be done except for the several daimio to return to the Mikado all the land which has been given them by the Tokugawa government. Not to give up the entire possession and revenue of the lands, but to give over their government to the Mikado."

The prince seemed to be rather astonished at Kido's proposal and remained silent for a short time. At length having decided he replied, "All right, I agree to your proposal and leave the matter entirely in your hands." Mr. Kido was exceedingly pleased and left the presence of the prince. The latter however called him back and said:—"I have charged you with the carrying out of this affair. Now, owing to late battles, high excitement prevails among the samurai and if you hurry in carrying out your project, harm will most likely result. Do you go back to Kioto and carefully carry out your scheme, and rely upon the changes of the times for assistance." Mr. Kido resolved to follow the prince's counsel and returned to Kioto. Not long afterwards he proceeded to Tokio. Previous to this time, Saigo and Okubo came to Mitajiri in Choshu under the pretext of returning to Kagoshima, where they met with Mr. Kido and proposed to advance to the East with the united troops of Satsuma and Choshu. When the Tokugawa Government was entirely destroyed, Saigo-takamori was not in Tokio, but was acting as commander-in-chief of the army in the north-east, where many large daimio had amalgamated their forces for the support of the Shogun. Okubo was stopping in Tokio. One day Mr. Kido visited him, and among other topics, he spoke to the future Home minister about his scheme for the return of the daimios' dominions to the Mikado. When Mr. Okubo heard Kido's opinion, he quite coincided with his views. At this time, Satsuma was much distressed for want of money for the new Government and it was proposed to present one-tenth of the Satsuma incomes to it. Mr. Kido again returned to Kioto, where he found the two daimio Toshu and Hishu, on the point of negotiating for the return of their dominions to the Mikado. During January of the 2nd year of Meiji (1868) four daimio, Sashu, Choshu, Tashu, and Hishu gave over all their dominions and people to the Mikado's government. All the other daimio large and small, about 300 in all, followed their illustrious example; and the constitution of Fu, Han and Ken was established and the present system of the government was founded. The illustrious conduct on the part of the daimio was followed by the faithful lords as well as retainers of high ability and talent. Mr. Kido had the management of the most part of this affair. He expressed his opinion at that time as follows:—"Since the power of government has been seized by the samurai class, the people have been much afflicted for about 700 years under their tyrannical administration. Now, to the good fortune of the people, the power of the Mikado's government has been established, under whose administration they should rest at peace and be prosperous. But as long as every daimio holds his dominion and governs privately the people living there, the restoration of the Mikado's power is of no avail; and, in fact, it is said that many of the daimio having tried their strength against the Shogunate are now anxious to seize the reins of government. Suppose that two or three large daimio seized the supreme power and there should be no principal government, then the whole empire would be divided into various parties, who would continually be contesting against

each other, and so the restoration of the Mikado's power would bring trouble upon the people. If we desire to prevent any such irruption then we must change the system which has been in vogue about 700 years, and distribute power equally away the daimio. Nothing else can prevent the otherwise inevitable collision with the daimio. The Tokugawa government has already returned the supreme power to the Mikado's Court, and every daimio must also follow the example unless we are to be for ever contending against insuperable difficulties. * * * * This should be accomplished in good order as being rendered necessary by the exigencies of the times." Such was his opinion. But this most difficult of all the political questions to settle, created considerable excitement amongst the daimio. Mr. Kido perceived that the time to encourage them to return back their dominions and people to the Mikado had not yet arrived, so he did not press the matter too hard. In July 1868, the Mikado's Government rewarded Messrs. Kido, Okubo, Goto, and Itagaki for their great services and appointed them instructors of the Jisho-in. In September of the same year every one who had distinguished himself for the Mikado was commended. Mr. Kido was rewarded with an annual pension of 1,800 koku of rice and promoted to the rank of *Jusanmi*. At this time the daimio still retained their ancient power and had the command of large numbers of troops, to the great distress of Mr. Kido. Owing to his influence the troops of his lord Choshu were disbanded. This provoked great excitement among the soldiers, who finally seized the provincial court. Mr. Kido was in Yamaguchi at the time. The troops attacked his residence, but fortunately he was out and, as it was, he narrowly escaped as far as Umano-seki, where he met with Messrs. Miyoshi and Nomura. By their assistance Mr. Kido collected an army and a battle was fought in which he routed the opposing troops entirely. He returned victoriously to Tokio, where he was appointed Sangi in May, 1869. During November of that year he visited Messrs. Iwakura, Dainagon, Shimadzu Hisamitsu, and Mori Yoshichika, as the Mikado's envoy, requesting them to go to Tokio. Shimadzu was not well and sent Saigo Takamori to Tokio in his stead. Mr. Kido, in company with Saigo and Okubo, went to Kochi, where he instructed Itagaki to follow them to Tokio. In February 1870, about seventeen battalions of troops, belonging to Satsuma, Choshu and Toshu, were summoned to be the body guard of the Mikado. On the 25th June of the same year, all the government offices were temporarily abolished, except those of Sangi. Saigo-Takamori was appointed Sangi together with Mr. Kido and Okubo, the minister of the Finance Department. The condition of the state became now changed and Messrs. — and — were distressed about the abolition of the power of the daimio and the establishment of ken. Mr. Kido saw now that a great change had taken place in the country for the better. On the 14th July, the Mikado issued an order for the abolition of the power of the daimio and establishment of ken. This great reformation was completed without the shedding of blood.

After the famous battle of Fushimi was fought, hundreds of matters were left unattended to, and affairs generally were much entangled. The retainers of the daimio also did not cease from agitating the expulsion of foreigners from the empire, which rendered it very difficult to remain on terms of amity with foreigners. In January 1871, the troops belonging to Hioki Sateriki and

the daimio Okayama, got mixed up in a broil with the English at Kobe. It was thought that some difficulty would result, but it fortunately terminated in an amicable arrangement. On the 15th February, the Toshiamen killed eleven Frenchmen at Sakai-ura. On the 30th of the same month the Envoys Extraordinary and Ministers Plenipotentiary of the three Western Powers, England, France, and Holland, were proceeding to the Mikado's palace, when a number of the anti-foreign party attacked the procession of the former. Fortunately this matter was also settled without much difficulty. Three days afterwards, the Envoy Extraordinary for England had his first interview with the present Mikado, in his palace. This interview laid the foundation of friendship with foreign countries. Mr. Kido transacted the affairs of the empire through this difficult period, with the assistance of other highly intellectual men, and but little fault could be found with their administration. From that time the friendship between Japan and foreign countries began to progress, until at length the government decided to send an Envoy Extraordinary and Minister Plenipotentiary to every one of the treaty powers. In September H. E. Iwakura was appointed the *U-Daijin* and Envoy Extraordinary and Minister Plenipotentiary, Mr. Kido was appointed his assistant with Messrs. Okubo and Ito. They left for Europe in November of the same year, via America. In July of the following year, they completed their mission abroad and returned to Japan, having become well versed in Western politics. At this time, Saigo, Itagaki, Goto, Soyejima, Eto and others occupying high posts in the government had decided to declare war against Corea. Mr. Kido and the others who had been to foreign countries entertained quite different opinions on this question, which provoked much excitement and the authorities became divided into two parties. The question was ultimately placed before H. M. the Mikado for his decision, and he took the same view of the affair as Mr. Kido and his party. Then Saigo and many others resigned their positions at the same time. Mr. Kido remained steadily at his important post, as did also Okubo and Ito. In February 1873, Okubo left for the southwest owing to the Saga rebellion, and Mr. Kido filled his place in Tokio. Two months afterwards the Formosan question occupied the attention of the authorities. Mr. Kido was at that time very ill, but he exerted himself and forwarded the following memorandum to the government: "The outrageous conduct of the Formosan islanders towards our Loo Chooan subjects ought to be punished by an expedition being sent against them; and the insolent treatment of our envoys by the Coreans deserves also to be taken notice of and settled by sending an armed force. But we must transact all affairs in good order; if we do not, we shall be the sufferers. Nothing is more important to preserve peace throughout the country than to first obtain popularity; and it is also very important that our army should be established on a firmer basis. It is only five or six years since the foundation of the present government was established; and the reformation brought about by the change in the system of government has not yet become perfected and public affairs are not going on as well as could be desired. * * * * * Now hundreds of things are sustained by means of our import duties and the annual expenditure is very great, while the government loan both at home and

abroad is increasing. Therefore if we send our armies abroad, it will cause great complications whether we are victorious or not. And at this time it is better for us to remain peaceably at home and attend to local affairs and afterwards send troops away if necessary." In April Mr. Okubo returned from Saga and in the following month, Mr. Kido resigned his post of Sangi and Minister of the Educational Department. Shortly afterwards, he received an appointment in the Imperial household, where his duties were light. He afterwards returned to his native country partly on public and partly on private business. During the time he was in Europe, he became well versed in the customs of civilized nations; and on returning to Japan he published a book on the Science of Politics. Messrs. Okubo and Ito from Tokio, Mr. Itagaki from Kochi, and Mr. Kido from Yamaguchi, assembled in Osaka and held meetings debating about the political system of the country. These meetings were called the Osaka-Kaigi. They finally agreed upon a system and then reassumed their duties in the Government. This action on their part was the principal cause of the order, issued by H. M. the Mikado, for the establishment of a constitutional government, which order was issued on the 14th April. Provincial meetings were held in June and July, in which Mr. Kido served as Speaker. But to his great disappointment, he found the administration of the government somewhat different from the plan which had been agreed upon at the Osaka meeting. In October news from Kokuwa, in Corea, was received, which again caused a change in the ministry.

Kido was much disappointed at the administration of government affairs, which he found somewhat different from the programme decided upon by the Osaka meetings. The arrival of the wonderful news from Kakuwa, Corea, caused divided counsels in the ministry, who separated into two parties on the question of the disjunction of the then combined offices of *Sangi* and heads of departments. Most of the ministers wished that the settlement of the question should be postponed until after the termination of the Korean affair. Mr. Itagaki, *Sangi*, and Shimadzu, *Sadaijin*, were however of opinion that the separation of the offices should be effected at once; but their judgment was not agreeable to the Mikado, and they resigned their posts. This time is called the bad term of the ministry in 1875. Thus, the famous negotiations of Osaka ended without resulting in much benefit to the country. At this time Kido served to the utmost of his ability and talent in the conduct of the Korean matter, in spite of his ill health. At length, Messrs. Kuroda and Inouye were appointed envoys to Corea. Now Kido was very anxious to resign his post. But he was repeatedly urged to keep his place by —, and —, as long as the difficulty with Corea was undecided. In March 1876, the envoys returned from the west. In the same month, Kido's resignation was accepted after his repeated petition, but he was soon appointed to the office of *Naikaku-komon*. In the following month H. M. the Mikado visited him at his pleasure house in Simei, Tokio. In June Kido accompanied His Majesty on his tour to the north-east, where this distinguished man was of much service to the Emperor in explaining the condition of the country and people. In the following month, Mr. Kido returned to Tokio. Three months afterwards the capitalization of the pensions of the Kuwashizoku was ordered, at which he was much

concerned. His wish was gradually to form a constitutional government and he used to talk thus:—"The present government was firmly established by His Majesty's benevolence. If the people lose confidence in the government through misconduct, and they should come to wish for a return to the former system of government, His Majesty would be grieved. The ministry ought to promote the general welfare of the country and people. The administration of the provincial governments should not be considered as of no consequence. Now the present monarchical form of government is nearly completed. However it produces no great benefit to the people throughout the country, who would be happier under the former system than the present. What is the reason? During the times of the daimio each one of them desired to enrich his own dominions and to increase its productions. Now, the central government is not so anxious to advance the wellbeing of the whole empire as the daimio were to bring prosperity to their own dominions. So the people become more and more in want of money and find increased difficulty in maintaining themselves. Such is the condition prevailing throughout every ken. The general state of Japan may be compared to the human body, thus: the provincial ken are the limbs, the central government is the head; and the blood circulates through the whole body in the form of money. During some years past the government collected money and rice from ken, which they have not allowed to be applied to the wants of the people under their jurisdiction, who become monthly and daily poorer, just the same as if all the blood in the body was drawn to the head, and the limbs could not work. While this is so no progress can be made in civilization in the interior, and the people cannot increase their wealth. In Europe and America there is no country where a representative assembly is not established. Our countrymen have of late desired to have such an assembly in our country. But if we can find no good representatives, the measure will be injurious to us. Now it will be well for our people to establish at first provincial meetings in each ken, which should be merged into a representative assembly in the future." Mr. Kido was much distressed at the capitalization of the Kuwa-shizoku's pensions.

(To be Continued.)

YOKOHAMA RACE CLUB.

SPRING MEETING.

First Day—Thursday, May 24th.

The Spring Meeting of the Yokohama Race Club was commenced yesterday under exceptionally favorable conditions of weather. The grand stand was very tastefully decorated with flowers and shrubs of various shades, forms and colours, and presented an agreeable contrast to the blank space usually seen in that part of the stand which ladies seldom patronise.

The band of the U. S. S. *Tennessee* was in attendance and relieved the intervals between the races with airs which seemed to be highly appreciated. The services of a band at an open air entertainment are not usually valued as they should be, and in thanking the performers of yesterday for their successful efforts to entertain, we feel sure we express the feelings of the ladies present at the meeting.

The attendance though not quite so numerous as was expected, was fair considering this is a second meeting within a week of the first, but the racing was good and the day's sport most enjoyable.

Several of the new ponies were very restive and unruly rendering the starter's task unusually difficult, and causing a delay of more than an hour in getting off the first race. The principal "wins" were secured by Mr. JOHN PEEL, (who hitherto has not been very lucky, and whose present success called forth some warm congratulations) who secured the Griffins' Plate with *Sakigake*, the Challenge Cup with *Bonny Doon*, the Nankin Cup with *Liddesdale*, and ran a dead heat for the Trial Plate with *Bonny Doon* against *Hoolet*. The Ginko Cup, was won by a gentleman who has made his first appearance on the Yokohama turf, and whose popularity is great and likely to be greater, if we can judge by the enthusiasm with which his success was greeted. The Lusitano Cup was secured by *Crusader*, and presented to the successful jockey, Mr. MARLBOROUGH, by Miss MACHADO who said in clear and distinct tones, and with wonderful self possession for so very young a lady,—

"It has been allotted to me the pleasant task of presenting the 'Lusitano Cup,' I have therefore the honour of presenting it to you on behalf of the Portuguese Community with their very sincere and hearty congratulations on the occasion of your success.

Please accept it, also, their best wishes for future victories."

1.—THE GINKO CUP.

Value, \$— . Presented. For China Ponies, subscription Griffins only; weight as per scale. Entrance, \$5. Three-quarters of a mile.

Mr. Peter's Vandal	10st. 5lbs...	1
Mr. Savile Stuart's Talisman	10st. 5lbs...	2
Mr. Fiddle de Dee's Kittywake... ..	10st. 2lbs...	3
Mr. John Peel's Liddesdale	10st. 11lbs...	0
Mr. Fritz's Wilhelm Tell	10st. 5lbs...	0
Dr. Buckle's Sequel	10st. 2lbs...	0
Mr. Pringle's Pegasus... ..	10st. 5lbs...	0
Mr. Walter's Jack O'Lantern	10st. 8lbs...	0

The favourite for this event was *Kittywake*, the representative of a stable which has carried off many prizes. *Talisman's* performance in the saddling paddock and at the starting post put him at a discount. This race should have been run for at one o'clock, but owing to the restlessness of the griffins and other causes, it did not come off until a quarter past two. After a false start the unruly lot were got off on pretty even terms by the starters, *Jack* going to the front, with *Talisman* second and the tartan colours third. After passing the trees the ponies got closer together, and it was impossible to tell which would be the winner. *Talisman* made a desperate attempt to carry off the prize, but just before he reached the goal, *Vandal* came with a rush and wrested it from him, scoring a popular win as every one seemed delighted with the success of the Devonshire stable. *Kittywake* was a good third. Time, 1.38½.

2.—THE GRIFFINS' PLATE.

Value, \$150. For Japan Ponies, *bonâ fide* Griffins; weight for inches. Entrance, \$5. Five furlongs.

Mr. John Peel's <i>Sakigake</i>	10st. 4lbs...	1
Mr. Fiddle de Dee's <i>Dazzle</i>	9st. 12lbs...	2
Dr. Buckle's <i>Snake</i>	10st. 6lbs...	3
Mr. E. Mason's <i>Silverspring</i>	10st. 8lbs...	0

The result of this race was the first take in for the prophets, as well as the first of a series of victories for Mr. Peel's stable. *Sakigake* was an outsider whose chance of

winning was not thought much of, unless by those intimately acquainted with the animal. He proved, however, by his running to be composed of the real material with his heart in the right place. The *Snake* crept away at the start, but was soon overhauled and passed by *Dazzle*, who ran as if he meant to uphold the honour of his colours. But when about a quarter of a mile from home, *Sakigake* astonished the beholders by rapidly passing one after another of his competitors and challenged the leading pony. An exciting race ensued, both running neck and neck, being pressed with a free application of the lash, but a hundred yards from home the black went to the fore and won a well-earned race. Time; 1.26

3.—THE TRIAL PLATE.

Value, \$— . For China Ponies that have never won a flat race here up to date of entry; weight for inches. Entrance, \$5. Once round.

Mr. John Peel's <i>Bonny Doon</i> (late <i>Skylark</i>)	†
10st. 8lbs	
Mr. Fiddle de Dee's <i>Hoolet</i> (late <i>Hoosze</i>)	†
10st. 8lbs	

The Trial Plate only brought two ponies to the post. From the way in which the rider of *Hoolet* played with his opponent, it was evident he thought he had an easy thing of it. The pace was slow, the brown taking no notice of the white's enticements to draw him on until just before entering the straight when he was let out full speed. It must then have dawned upon the rider of *Hoolet* that he had trifled a little too much and underrated the speed of *Bonny Doon*, as he at once commenced persuading his pony and only succeeded in making the race a dead heat. This decision of the judge, as customary in such cases, did not give general satisfaction. Time, 2.28.

4.—THE SPRING STAKES.

Value, \$— . For Japan Ponies. Winners of one race in 1876, and winner of No. 2, 5lbs. extra; winners of two or more races in 1876, 10lbs. extra; weight for inches. Entrance, \$5. Half a mile.

Mr. D. de Ding Dong's <i>Jim Hills</i>	10st. 4lbs...	1
Dr. Buckle's <i>Spendthrift</i>	10st. 8lbs...	2
Dr. Buckle's <i>Sandboy</i>	10st. 4lbs...	3
Mr. Savile's <i>Drift</i>	10st. 2lbs...	0
Dr. Buckle's <i>Sorcerer</i>	10st. 8lbs...	0

Jim Hills, as was expected carried off this event with ease. He was kept in the rear until entering the straight when he was called upon and soon went to the front. Time, 63¼ secs.

5.—THE CHALLENGE CUP.

Value, \$150. For China Ponies; weight for inches. Entrance, \$5. One mile and a half.

Mr. John Peel's <i>Bonny Doon</i>	10st. 8lbs...	1
Mr. Fiddle-de-dee's <i>Lintie</i>	10st. 2lbs...	2
Mr. Savile's <i>Crusader</i>	10st. 5lbs...	0

This race, as it always should be, was well contested. Though only three ponies came out their merits were so equalised that it was easy to see which ever won would have no easy time of it. At the start *Lintie* led off, with the brown a length and a half behind and *Crusader* third. In this order they passed the Stand, though by that time they had come closer together. In the hollow *Bonny Doon* put on a spurt and took the lead, which, however, was immediately retaken by *Lintie*, who seemed determined to show that he did not intend to give up that position without a struggle. In the back stretch the brown again spurted and went to the front once more, but was almost

instantly deprived of it by *Crusader* who had rushed up from the rear. *Lintie* now fell a couple of lengths behind and the race looked as if it was going to be between the other two. After passing the trees *Bonny Doon* again showed in front, and on entering the straight up came *Lintie* with a rush and passing *Crusader* thought to head the brown. But this was not to be, for when near home *Bonny Doon* was called upon for a final effort and won by a length from *Lintie*; *Crusader* a capital third. Time, 3 min. 28¼ secs.

6.—THE AKINDO CUP.

Presented. Value, \$110. For Japan Ponies; winner of No. 4 excluded; winner of No. 2, or of any race previous to this meeting, 10lbs. extra; weight for inches. Entrance, \$5. Three-quarters of a mile.

Mr. D. de Ding Dong's <i>Typhoon</i> , 10st. 2lbs...	1
Dr. Buckle's <i>Sandboy</i>	10st. 4lbs... 2
Mr. Pringle's <i>Planet</i> (late <i>Sirius</i>) 10st. 6lbs...	3
Dr. Buckle's <i>Spendthrift</i>	10st. 8lbs... 0

Notwithstanding the penalty of ten pounds which was imposed upon *Typhoon* according to the conditions of the race, he succeeded in winning tolerably easy. The honour of second place was prettily contested by the other three ponies, a neck only separating first and third. Time, 1 min. 39¼ secs.

7.—THE NANKIN CUP.

Value, \$— . For China Ponies; subscription Griffins only. Winner of No. 1 excluded. Weight for inches. Entrance, \$5. Half a mile.

Mr. John Peel's <i>Liddesdale</i>	10st. 11lbs...	1
Mr. Savile Stuart's <i>Talisman</i>	10st. 5lbs...	2
Dr. Buckle's <i>Sugarplum</i>	10st. 5lbs...	3
Mr. Fiddle de Dee's <i>Corbie</i>	10st. 8lbs...	0
Mr. Fritz's <i>Faust</i>	10st. 5lbs...	0
Mr. Pringle's <i>Premier</i>	10st. 8lbs...	0

The fractiousness of the ponies rendered it no easy matter to get them away together; in fact the start was a bad one, and the only bad one of the day. The contest lay for some distance between *Sugarplum* and *Liddesdale*, though *Talisman* came up well at the finish and only lost by a bare head. Time, 61½ secs.

8.—THE MITSU BISHI CHALLENGE CUP.

Value, \$200. Presented by the Mitsu Bishi Company. For Japan Ponies. To be won at two consecutive meetings by the same stable. To be held in the meantime by the last owner. Weight for inches. Entrance, \$5. One round and a distance.

Don Carlos Kickapoo	10st. 8lbs...	1
Mr. D. de Ding Dong's Typhoon	10st. 2lbs...	2
Mr. Pringle's Planet	10st. 6lbs...	0

Typhoon stood highest in public opinion for this event, *Kickapoo* ranking next, though it was generally thought he would not last the distance. As for the black he seemed to have but few friends, though he proved by his running that he is a pony not to be despised. He led the others for three quarters of a mile, and though headed by *Kickapoo* was not to be got rid of easily for he hung tenaciously at his girths. *Typhoon*, on entering the straight, came with a rush, but could not succeed in passing *Kickapoo*, who won one of the best contested races of the day by a neck. *Planet* well up. Time, 2.39.

9.—THE LUSITANO CUP.

Presented. Value, \$100. For China Ponies; winners at this meeting excluded. Weight for inches. Entrance, \$5. Once round.

Mr. Savile's <i>Crusader</i>	10st. 5lbs...	1
Mr. Savile Stuart's <i>Not Proven</i>	10st. 8lbs...	2
Mr. Spooner's <i>Dick Swiveller</i>	10st. 5lbs...	3
Mr. Savile Stuart's <i>Saracen</i>	10st. 5lbs...	0

This was the poorest event of the day, it

being very apparent that *Crusader* was more than a match for his competitors. Indeed the race caused some amount of dissatisfaction from the way in which the numbers were posted. First Nos. 9 and 10 were put up and it was thought that the race would be a match between the two. Then No. 12 was posted, and after a long interval, during which much surprise was manifested at the ponies not coming out, up went No. 5, who, by the by, had been sent home and had to be brought back. This delay caused *Telephone* to be scratched. The race itself was uninteresting, notwithstanding that *Crusader's* rider allowed him to remain in the back ground until near home, when he came away and won as he liked. Time, 2 min. 22 secs.

Second Day—Friday, May 25th.

1.—THE CELESTIAL CUP.

Presented. Value, \$160. For all Ponies; weight as per scale. Entrance, \$5. Three quarters of a mile.

Mr. Fiddle de Dee's <i>Lintie</i> , g.c....	10st. 2lbs...	1
Mr. John Peel's <i>Bonny Doon</i> , b.c. 10st.	8lbs...	2
Mr. Peter's <i>Vandal</i> , g.c.	10st. 5lbs...	3
Mr. Savile Stuart's <i>Not Proven</i> , w.c. 10st.	8lbs...	0

Four Ponies only came to the post. At the start *Vandal* got behind, the others being pretty well together. *Lintie* soon assumed the lead and maintained it to the finish, *Bonny Doon* a good second, while *Vandal*, who caught up well, finished a capital third, and was gaining every stride. Time, 1.36.

2.—THE MAIDEN STAKES.

For Japan Ponies that have never won a race; Weight for inches. Entrance, \$5. Half a mile.

Mr. D. de Ding Dong's <i>Young Rapid</i>	10st. 0lbs...	1
Mr. John Peel's <i>Annandale</i> ...	10st. 6lbs...	2
Dr. Buckle's <i>Snake</i> ...	10st. 6lbs...	3
Dr. Buckle's <i>Sorcerer</i> ...	10st. 8lbs...	0
Mr. Mason's <i>Silverspring</i> ...	10st. 8lbs...	0

This was a capital race between Mr. de Ding Dong's chesnut and Mr. Peel's grey *Annandale*. The former established a strong lead soon after starting, but down the straight, the grey caught him and a neck and neck race ensued, resulting in *Young Rapid* carrying off the trophy by a head. The start was a very good one, all the ponies getting off all together. Time, 63 secs.

3.—THE CATHAY CUP.

Value, \$— For China Ponies, *bonâ fide* Griffins at date of meeting, winners excluded; weight as per scale. Entrance, \$5. Once round.

Mr. Walter's <i>Jack O'Lantern</i> ...	10st. 8lbs...	1
Dr. Buckle's <i>Sequel</i> ...	10st. 2lbs...	2
Mr. Savile Stuart's <i>Kismet</i> ...	10st. 2lbs...	3
Mr. Fritz's <i>Wilhelm Tell</i> ...	10st. 5lbs...	0
Don Carlos' <i>Telephone</i> ...	10st. 2lbs...	0
Mr. Pringle's <i>Pegasus</i> ...	10st. 5lbs...	0

Kismet caused his rider some trouble in mounting, but eventually he was subdued. With the exception of *Telephone*, all the ponies got off well together. *Telephone* started bucking and kept it up until going up the hill at the three quarter mile, when he laid down to his work, but never got near the leading ponies. The run down the straight was prettily contested by *Jack O'Lantern* and *Sequel*, the former winning by a head. Time, 2.19½.

4.—THE LADIES' PURSE.

Presented by the Ladies of Yokohama and Yedo. For all Ponies. Winners of any race under a mile at this meeting, 7 lbs. extra; winners of more than two races at this meet-

ing excluded; weight as per scale. Entrance, \$5. Half a mile.

Mr. Fiddle de Dee's <i>Mavis</i> , b.c. 10st.	8lbs...	1
Mr. John Peel's <i>Liddesdale</i> , g.c. 10st.	11lbs...	2
Mr. Savile's <i>Crusader</i> , g.c....	10st. 5lbs...	3
Mr. Osborn's <i>Grey Friar</i> , g.c. ...	10st. 5lbs...	0
Dr. Buckle's <i>Spendthrift</i> , b.j. ...	10st. 8lbs...	0
Mr. Spooner's <i>Dick Swiveller</i> , g.c. 10st.	5lbs...	0

Dr. Buckle's pony bolted twice at the starting post. Soon after a start was effected *Mavis* and *Liddesdale* put several lengths between them and the others, racing neck and neck together. The pace was too hot, however, for the grey and in the run down the straight he gave up the struggle but secured second honours. At the close of the race Miss Center presented the successful jockey with the purse and the congratulations of the ladies of Yokohama.

Mr. Abbott replied and hoped that the fair donor would ever be the "center" of attraction wherever she might be. Time 61½ secs.

5.—THE ITO CUP.

Presented. Value, \$120. For Japan Ponies. Winner of No. 4 (first day), 14 lbs. extra; other winners at this meeting, 10 lbs. extra; weight as per scale. Entrance, \$5. Three-quarters of a mile.

Don Carlos' <i>Kickapoo</i> ...	10st. 8lbs...	1
Mr. D. de Ding Dong's <i>Jim Hills</i>	10st. 4lbs ..	2
Mr. Fiddle de Dee's <i>Distemper</i> ...	10st. 6lbs...	3
Col. Forrester's <i>Grayling</i> ...	10st. 4lbs...	0
Mr. Pringle's <i>Planet</i> ...	10st. 6lbs...	0

This was the closest race of the day, and resulted in the defeat of the favourite, *Jim Hills*, by a head, while *Distemper* lost second place by the same distance. *Grayling* ran but was not in the company of the others from first to last. Time, 1.38.

6.—THE TEA CUP.

Presented. Value, \$150. For China Ponies. Winner of the Challenge Cup, and winners of two races at this meeting excluded; winner of one race 7 lbs. extra; weight as per scale. Entrance, \$5. One mile.

Mr. Fiddle de Dee's <i>Hoolet</i> ...	10st. 8lbs...	1
Mr. Osborn's <i>Grey Friar</i> ...	10st. 5lbs...	2
Mr. Don Carlos' <i>Telegram</i> ...	9st. 13lbs...	3
Mr. Savile Stuart's <i>Saracen</i> ...	10st. 5lbs...	0

This event was considered as a gift to *Hoolet*, and the result proved that it was, for he won easily from *Gray Friar*. This pony lessened his prospect of winning by bolting more than three parts of the way round the course before the start. However he contrived to finish second, *Telegram* third: *Saracen* went so badly that he was pulled up at the half mile. Time, 2.13.

7.—THE OWNERS' CUP.

Presented. Value, \$— For China Ponies, subscription Griffins only; winners excluded; weight as per scale. Entrance, \$5. Three-quarters of a mile.

Mr. Fiddle de Dee's <i>Kittiwake</i> ...	10st. 2lbs...	1
Dr. Buckle's <i>Sugarplum</i> ...	10st. 5lbs...	2
Mr. Pringle's <i>Premier</i> ...	10st. 8lbs...	3
Mr. Savile Stuart's <i>Kismet</i> ...	10st. 2lbs...	0
Mr. Fritz's <i>Faust</i> ...	10st. 5lbs...	0
Mr. Fritz's <i>Don Carlos</i> ...	10st. 5lbs...	0
Mr. Fritz's <i>Wilhelm Tell</i> ...	10st. 5lbs...	0

Kittiwake went any with the lead and was never passed though *Sugarplum* made warm work for him. Time 1.37½.

8.—THE SILK CUP.

Presented. Value, \$100. For all Ponies *bonâ fide* Griffins at date of meeting, and already entered at this meeting. Japan Ponies, 10st.; China Ponies, 11st. Winners at

the meeting, 7lbs. extra. Entrance, \$5. Five Furlongs.

Mr. Savile Stuart's <i>Talisman</i> ...	11st.	1
Mr. John Peel's <i>Liddesdale</i> ...	11st. 7lbs.	
(7lbs. extra)	2
Dr. Buckle's <i>Sugarplum</i> ...	11st.	3
Mr. Spooner's <i>Dick Swiveller</i> ...	11st.	0

Talisman won this event by several lengths, notwithstanding that when half way down the straight he shied at a policeman and almost stopped altogether. The other ponies were too much exhausted to take advantage of this incident. Time 1.19.

9.—THE CRITERION STAKES.

For China Ponies. A forced entry for all Ponies that have run at this meeting. Winners of one race 10 lbs., of two races 14 lbs. extra. Ponies that have run twice and have not been placed allowed 7 lbs.; weight for inches. Entrance \$5. One mile and a quarter.

Mr. Fiddle de Dee's <i>Lintie</i> ...	10st. 12lbs.	
(10lbs. ex.)	1
Mr. John Peel's <i>Bonny Doon</i> ...	11st. 8lbs.	
(14lbs. ex.)	2
Mr. Peter's <i>Vandal</i> ... (10lbs. ex.)	11st. 1lb.	3
Mr. Fritz's <i>Don Carlos</i> ...	10st. 5lbs...	0
Dr. Buckle's <i>Sequel</i> ...	10st. 2lbs...	0
Mr. Pringle's <i>Pegasus</i> , (7lbs. allowed)	9st. 12lbs.	0
Mr. Savile Stuart's <i>Not Proven</i> ...	10st. 8lbs.	0

Bonny Doon was first favourite for this event and *Lintie* ranked next. The latter made the pace a hot one from the first and finally won by half a length. *Vandal* crept into third place when near home. Time, 2 min. 52 secs.

This brought a pleasant day's sport to a close. The weather had been all that sportsmen could desire; the attendance was better than on the previous day, and Sir Harry and Lady Parkes honoured the meeting with their presence. During the day there were one or two popular wins, *Jack O'Lantern's* being one. On the pony returning to the saddling paddock, his rider, Mr. Pugh, received warm congratulations from the spectators.

Third Day—Saturday, May 26th.

The attendance at the third day's racing was very slender. The dry weather made the course somewhat dusty, but the racing was very good. At the close of the Merchant's Cup the owner of *Bonny Doon* lodged a complaint against *Crusader* for crossing in front, but it was overruled by the committee. The success of Mr. Pringle with *Planet* in the Nippon Handicap was a cause of much cheering and satisfaction.

The band of the *Audacious* performed.

1.—THE HURDLE RACE.

Value, \$75. For all Ponies; over six hurdles; China Ponies, 10st. 7lbs.; Japan Ponies, 10st. Entrance, \$5. Once round and a distance.

Don Carlos' <i>Kickapoo</i> , b.j.p. ...	10st. 8lbs...	1
Mr. John Peel's <i>Annandale</i> , g.j.p. 10st.	6lbs...	2
Mr. Pringle's <i>Pegasus</i> , g.j.p. ...	10st. 5lbs...	0

It is not often that hurdle races are so well contested as the hurdle race of to-day. It is true the contest lay between two ponies only—*Pegasus* was brought out, but as he had never been taken over a hurdle, and on making a bungling job of his first leap he was not persevered with—but they were so well matched in speed and took their jumps so well that it afforded a pretty and interesting sight. Both ponies took each hurdle together, though *Annandale* seemed to pick himself up quicker than *Kickapoo*. The latter, however, contrived to make up what he

lost in this respect between the hurdles, and by the time the next hurdle was reached, was up alongside of the other. Both came to the last hurdle at a splitting pace, though *Kickapoo* seemed inclined to shy. His jockey, however, soon took the bashfulness out of him and he took the leap instantaneously with *Annandale* and beat the grey in the final run in. The first and second ponies were ridden by two of the best jockeys to which in a great measure may be attributed the closeness of the race.

2.—THE MERCHANTS' CUP.

Value, \$150, Presented. A Handicap for all China Pony winners at the meeting. To be handicapped by the Stewards at the close of the second day's racing. Entrance, \$5. Compulsory. Open also to beaten Ponies at the meeting. One mile and a quarter.

Mr. Fiddle de Dee's <i>Hoolet</i> ... 11st. 7lbs...	1
Mr. John Peel's <i>Bonny Doon</i> ... 11st. 7lbs...	2
Mr. Savile's <i>Crusader</i> 10st. 12lbs...	3
Mr. Peter's <i>Vandal</i> 10st. 10lbs...	0

Hoolet was the favourite; *Bonny Doon* looked tucked too much, as he walked round the saddling paddock, to beat the white pony with 11st. 7lbs up. *Vandal* was generally thought to be too heavily weighted to stand a show, and the result proved this supposition to be correct, for he was beaten by any number of lengths, and was not in the company of the others from first to last. Passing the stand *Bonny* was first, with *Crusader* second, and the favourite third. In the hollow *Crusader* went to the front and at the five furlongs *Hoolet* took second place. Between the half mile and the trees the brown challenged the others and for an instant the three raced neck and neck, but the pace was too hot for *Crusader* and he was observed to fall slightly in the rear, while at the same moment the white pony forged slightly ahead. This position was maintained without any change until the finish, *Hoolet* winning by a length and a half from the brown, *Crusader* tried hard down the straight to recover lost ground, but his competitors were too much for him; he finished a good third. Time, 2 min. 49 secs.

3.—THE NIPPON HANDICAP.

A Handicap for all Japan Pony winners at the meeting. To be handicapped by the Stewards at the close of the second day's racing. Entrance, \$5; compulsory. Open also to beaten Ponies at the meeting. Once round.

Mr. Pringle's <i>Planet</i> 10st. 0lb...	1
Don Carlos' <i>Kickapoo</i> 11st. 0lb...	2
Mr. D. de Ding Dong's <i>Jim Hills</i> 11st. 0lb...	3
Mr. John Peel's <i>Sakigake</i> 10st. 2lbs...	0
Dr. Buckle's <i>Sorcerer</i> 9st. 7lbs...	0

The calculations of the prophets received another turning over in this race. *Jim Hills* was a hot favourite as it was considered the only pony able to compete with him had had too much taken out of him over the hurdles, and could not give him a beating with even weights. The race however fell to neither, but to a pony which has run pluckily two or three times during the meeting, but never before been fortunate enough to carry off a prize. *Planet* got the best of the start and went away at a terrific rate, followed by the bay, and the favourite. At the three quarter mile the leader had put a wide gap between him and the others. *Jim Hills* and *Kickapoo* shortly after improved their positions and after passing the trees, the favourite attempted to wrest the lead from the plucky *Planet*, while *Kickapoo* also was gaining. Down the straight a pretty race took place resulting in

favour of *Planet*, *Kickapoo* second. Time, 2 min. 15½ secs.

4.—THE SUBSCRIPTION CHINA GRIFFINS' HANDICAP.

A Handicap for all subscription China Ponies only. To be handicapped by the stewards at the close of the second day's racing. Entrance, \$5; compulsory. Once round.

Mr. Fiddle de Dee's <i>Kittiwake</i> ... 10st. 0lbs...	1
Mr. Pringle's <i>Premier</i> 9st. 10lbs...	2
Mr. Walter's <i>Jack O'Lantern</i> ... 10st. 5lbs...	3
Mr. John Peel's <i>Liddesdale</i> ... 10st. 8lbs...	0
Mr. Fritz's <i>Don Carlos</i> 9st. 7lbs...	0
Dr. Buckle's <i>Sequel</i> 9st. 10lbs...	0
Mr. Savile Stuart's <i>Talisman</i> ... 10st. 6lbs...	0
Mr. Savile Stuart's <i>Kismet</i> ... 9st. 10lbs...	0

A good field of eight came to the post. Dr. Buckle's pony led off as hard as he could go with *Liddesdale* second. In the back stretch *Premier* went to the front and kept his lead until entering the straight, when *Kittiwake* challenged and passed him and was never afterwards headed though the chestnut came again and finished three quarters of a length behind—the last hundred yards he was gaining every stride and if the distance had been a trifle longer it was evident he would have won for the grey was fagging. Time, 2 min. 15 secs.

5.—THE SCURRY STAKES

Value, \$— For all ponies; weight as per scale. Entrance, \$5. Three Furlongs.

Mr. Fiddle de Dee's <i>Mavis</i> b.c... 10st. 8lbs...	1
Mr. Spooner's <i>Dick Swiveller</i> , g.c., 10st. 5lbs.	2
Mr. Savile's <i>Drift</i> , r.j. ... 10st. 2lbs...	3

This race was a gift to *Mavis* who got a flying start and won in a canter, lengths ahead of *Dick Swiveller*, who got off very badly, being left some lengths in the rear before a hundred yards had been traversed. Time, 45 secs.

6.—THE SOLACE CUP.

Value, \$— For all beaten Japan Ponies at the meeting. Weight for inches. Entrance, \$5. Five furlongs.

Mr. Fiddle de Dee's <i>Distemper</i> ... 10st. 6lbs...	1
Dr. Buckle's <i>Sandboy</i> 10st. 4lbs...	2
Mr. John Peel's <i>Annandale</i> ... 10st. 6lbs...	3
Mr. Fiddle de Dee's <i>Dazzle</i> ... 9st. 12lbs...	0
Dr. Buckle's <i>Spendthrift</i> ... 10st. 8lbs...	0
Mr. E. Mason's <i>Silverspring</i> ... 10st. 8lbs...	0
Col. Forrester's <i>Grayling</i> ... 10st. 4lbs...	0

Distemper carried off this event by a couple of lengths, Dr. Buckle's *Sandboy* wrestling second place from *Annandale* when fifty yard from the post. The time was good being 1 min' 19 secs.

7.—THE CHINA CONSOLATION PLATE.

Value, \$— For all beaten China Ponies at the meeting; weight for inches. Entrance, \$5. Once round and a distance.

Mr. Savile Stuart's <i>Not Proven</i> ... 10st. 8lbs...	1
Mr. Osborn's <i>Grey Friar</i> ... 10st. 5lbs...	2
Mr. Pringle's <i>Premier</i> ... 10st. 8lbs...	3
Mr. Fritz's <i>Don Carlos</i> 10st. 5lbs...	0
Mr. Fritz's <i>Wilhelm Tell</i> ... 10st. 5lbs...	0
Dr. Buckle's <i>Sequel</i> 10st. 2lbs...	0
Dr. Buckle's <i>Sugarplum</i> ... 10st. 5lbs...	0
Don Carlos' <i>Telephone</i> ... 10st. 2lbs...	0
Mr. Spooner's <i>Dick Swiveller</i> ... 10st. 6lbs...	0
Mr. Savile Stuart's <i>Saracen</i> ... 10st. 5lbs...	0

The Consolation Plate brought out the largest field of ponies of the meeting. *Grey Friar* was thought most of, providing he did not bolt, but though he ran well, and led until entering the straight, he was compelled to succumb to *Not Proven*, who won by a length and a half. *Premier* ran gamely and finished a very good third, *Dick Swiveller* fourth, the remainder straggling in one after

the other, *Sequel* bringing up the rear. Time, 2.36½.

8.—THE SAYONARA STAKES.

A Handicap for all Ponies. To be handicapped by the Stewards at the close of the second day's racing when entries will be received. Winner of No. 2 (third day) excluded. Winners of the Nippon Handicap, and the Subscription China Ponies' Handicap, 7lbs, extra. Winners of any other race after publication of the handicap, 3lbs. extra. Entrance, \$10. Once round.

Mr. Savile's <i>Crusader</i> 11st. 0lbs...	1
Mr. D. de Ding Dong's <i>Typhoon</i> ... 10st. 0lbs...	2
Mr. Peter's <i>Vandal</i> 11st. 0lbs...	3
Mr. Fiddle de Dee's <i>Lintie</i> ... 10st. 4lbs...	0
Mr. Savile Stuart's <i>Talisman</i> ... 10st. 7lbs...	0

This was one of the best races of the day. *Lintie* went away with the lead followed by *Crusader* and *Typhoon*. In the stretch *Talisman*, who had been lying last, went through his horses and challenged the leader, and *Vandal* crept up a trifle closer. On reaching the trees *Typhoon* had a slight lead, all the ponies being together with the exception of *Vandal* who brought up the rear a couple of lengths behind the others. On entering the straight they began to tail off slightly, while *Vandal* came up splendidly. The race all down the straight was most exciting and cries of "*Vandal* has it"—"*It is Typhoon's* race"—"*Lintie* wins" and so forth, arose from the spectators. By a splendid spurt however *Crusader* was landed a winner by a neck from *Typhoon*, *Vandal* a capital third. This pony seems to have remarkable staying powers, though his pace is not very great. Time, 2 min. 18 secs.

9.—BETTOES' RACE FOR CHINA PONIES.

Ten ponies started and the race was won by *Kittiwake*.

10.—BETTOES' RACE FOR JAPAN PONIES.

This was won by *Distemper* in a field of six.

11.—OWNER'S RACE. HALF MILE.

OWNERS UP.

<i>Not Proven</i>	1
<i>Liddesdale</i>	2
<i>Wilhelm Tell</i>	3
<i>Jack O'Lantern</i>	0

This race caused considerable amusement, and some difficulty was experienced in settling about weights, some being in favour of 14 stone, others 13 stone, but it was finally settled to be catch weights. The race was very well contested, *Not Proven* coming in first, with *Liddesdale* close up.

SOME misunderstanding appears to prevail with regard to the real construction to be put upon the closing words of the judgment in the suit *Watson versus Walsh, Hall & Co.* Many residents are under the impression that a rule of the U. S. Courts, in Japan, precludes the allowance of any other costs beyond the costs of Court; on reference to the Consul-General we were at once informed that the whole costs of a suit are at the discretion of the presiding judge, who may award them in the manner best calculated to meet the requirements of the law and the merits of the action.

**BRITISH CONSULAR TRADE REPORT
FOR NAGASAKI, FOR 1876.**

BRITISH CONSULATE,
Nagasaki, April 30, 1877.

SIR,—I have the honour to furnish you with a report on the trade and shipping of this port for the year 1876, accompanied with the following returns.

1.—Return of the Imports from England and other countries and from the open ports of Japan.

2.—Return of the Exports to England and other countries and to the open ports of Japan.

3.—Return of the Amount of Treasure Imported and Exported

4.—Return of Foreign Shipping.

5.—Return of duties collected on Imports, Exports and Shipping.

6.—Return showing the number of British Residents and Firms, together with the Residents and Firms of each Foreign nationality.

It will be observed that the total trade of the port shows a decrease of \$661,521 on comparing it with the previous year, viz:—

	1875.	1876.
Imports.....	\$ 1,525,090	\$ 1,063,199
Exports.....	\$ 2,159,303	\$ 1,959,673
Total.....	\$ 3,684,393	\$ 3,022,872

I have endeavoured, in the following remarks, to state the cause of the decline.

Imports.—During the past year it will be observed that the Import Trade of the Port, in comparing it with the previous year, again shows a falling off. It is difficult to account for this decline, but as I understand other Ports in Japan have suffered from a similar decrease in trade I imagine that it is not entirely of a purely local nature.

The total value of Imports, including those from the coast ports, amount to \$1,063,199 against \$1,525,090 for 1875, or a balance of \$461,891 in favour of 1875. The chief falling off is noticeable in textile fabrics, the value of which reached \$440,282 in 1875, while for the year just closed they amount to only \$169,489. But the Import of piece goods in 1875 fell considerably short of those of the preceeding year, so that, if these figures may be taken as a guide, it would not only appear that foreign articles of this description are less required than formerly, but that they are comparatively going out of use in this part of Japan.

In one or two of the preceding years I have been inclined to believe that part of the heavy stocks, which had been imported, and, in many cases, sold to the Japanese merchants, much in excess of the nominal consumptive demand, were still existing, untouched, in the interior districts, and gradually supplying a portion of the present demand; but whether this opinion was correct or not at the time, these surpluses can scarcely exist at present.

For some time, after the opening of the port of Hiogo-Osaka, merchants, here commonly attributed the falling off in their trade to the transference of a portion of it to that port. They did so with justice no doubt, and had trade at Hiogo continued to flourish and develop itself the fact might still be adduced to account for one continued retrogression. The dullness and depression of trade at Hiogo, however, afford no explanation from that direction.

No manufactures that would compete, to any serious extent, with foreign piece goods,

have been produced in the country, except such as were produced formerly. Neither has the population suffered from bad crops, or other natural impoverishing causes which would diminish the ability of the lower classes to supply themselves, as freely as before, with articles of dress. The heavy land tax imposed upon the population is, however, much felt, and more so, doubtless, since its collection in money instead of in kind as formerly. I am inclined to think that to this cause, chiefly, and to the otherwise severe pressure of taxation, must be attributed the large diminution of trade which I have to record.

The decrease shows itself most strikingly in plain cotton goods, but largely also in mixed fabrics and in such articles as velvets, lawns, &c., &c., which are not so much used by the lower classes as by the grades above them. The country people in this portion of Japan, though pretty well off, so far as actual necessities are concerned, are not rich, having little profitable outlet for their surplus productions; their available funds, therefore, are soon absorbed.

Some accumulation of wealth, among the people, is necessary for their advancement, but this does not seem to take place under the present system, but rather the reverse. The trading classes, and those who receive direct benefit from their intercourse with foreigners, are but few, compared with the population of the interior, who receive little compensating advantages for the more expensive system of Government they now live under, for only a very small proportion of the revenue collected in the island is expended here, and thus returned indirectly to the pockets of the people.

In thus associating the decline of trade here with the present system of centralization pursued by the Government I might be supposed to overlook the fact that ports nearer the centre of Government are in the same languishing condition. But, in my opinion, this circumstance only suggests the consideration that in the district represented by these ports taxation also absorbs too much of the surplus earnings of the country, and that a fair share of the revenue is not devoted to the carrying out of useful practical improvements, likely to increase the national wealth and productiveness.

Exports.—The figures here do not denote so large a falling off as in the Imports, although the tendency is still towards a decline.

For the three past years the total amounts of Exports to all countries, including re-Exports to other open ports, are as follows:—

1874.....	\$2,692,875
1875.....	\$2,159,303
1876.....	\$1,959,673

Last year thus shows a reduction on the preceeding one of \$199,630, which was less than 1874 by \$533,572, or a falling off of \$733,202, more than one-third of the present export in two years.

Tea.—This article shows an increase in quantity of about 1,300 piculs of all kinds, but a falling off in value of \$138,116 which is to be accounted for by the serious decline in value tea has everywhere experienced.

I believe that the production of tea in the districts near here, has increased to a somewhat larger extent than is shown above. A considerable portion of the Kiushiu growth finds its way direct to Hiogo and Yokohama, where it frequently commands higher rates than in Nagasaki, owing to its suitability for mixing purposes. The very low prices

which have been current during the past year seem likely, however, to check any further development of this industry for the present.

I understand that scarcely any of the tea sold here this season, except the very common kind of leaf, has realized profits to the grower and native dealers, most of it showing considerable losses.

Tobacco.—The tables show a large falling off under this heading, the quantity exported during 1875 having been 13,242 piculs against 3,450 piculs for the year just closed. The low price which exporters were able to give for the leaf in 1875 has, no doubt, stopped production to some extent, but I understand there were between five and six thousand piculs awaiting shipments in foreign godowns at the end of 1876, which will account for a great portion of the deficiency. This crop exhausts the soil more quickly perhaps than almost any other, so that, unless the area of cultivation were increased, the production would be likely to diminish. Tobacco cannot be grown upon the same soil, even in alternate years, for a long period together.

Shortness of supply seems to have had a beneficial effect on the London market and it is probable, therefore, that some improvement will be the result here during the next season.

Vegetable Wax.—The quantity of this production exported in 1875 was 9,411 piculs while for 1876 it only amounts 4,583 piculs or rather less than one half. The falling off here is again to be accounted for by the great depression in value in the home markets, the price ruling in London, during the past year, having been about half what the same article was worth two or three years ago. It is evident that the price now obtainable by the natives for wax in the market scarcely pays for the cost of its manufacture, for in this neighbourhood the berries are often left to decay upon the trees.

Camphor.—Is one of the few articles that show any improvement in the quantity exported. The figures here are 2,996 piculs for 1875 and 4,293 piculs for 1876, or an increase of 1,297 piculs. The fluctuations noticeable in the value of this drug are dependent mainly upon the Formosan supply, and are, therefore, difficult to account for without a knowledge of that market. The chief portion of the Camphor exported from here finds its way to China, where it is more esteemed, and commands a better price than that from Formosa, some of this, however, is probably afterwards re-exported to Europe. It is difficult to send this article to Europe from this port direct as it injures many other kinds of produce by its strong smell, and requires to be shipped only with such as are not damaged by it.

Rice.—Shows an increase of 22,706 piculs, the export of last year being 28,403 piculs against 5,697 piculs for 1875. I understand the whole of this rice has gone forward on account of the Japanese Government.

Dried Fish.—Has always been an article of large export from this Port, and the tables will show that it still maintains its position. This trade is, however, entirely in Chinese hands and I have difficulty, therefore, in obtaining many particulars about it.

Coal.—150,841 tons were exported last year against 164,140 tons in 1875 showing a decrease of 13,299 tons. This decrease is attributable to the output of the Takashima mine having diminished through the mine igniting as explained under the following head.

TAKASHIMA COAL MINE.

Tons.
Output of Coal from Jan. 1st to June 30th...79,414
" " " July 1st to Dec. 31st...22,462

Total Output.....Tons 101,876

During the month of June alone the output averaged about 650 tons per working day. Towards the end of July a fire attributed to spontaneous combustion broke out in some of the disused workings. All endeavours to extinguish it were unavailing, and on the 11th of August coal working was entirely stopped. The mine was subsequently flooded about three-fourths full. Additional pumping machinery ordered from England arrived in December. The water is now being pumped out, and it is anticipated the yield will gradually increase until the month of May or June, when full work will be again resumed.

An independent seam of about nine feet of coal formerly worked in Japan fashion, but abandoned for want of adequate appliances for removing the water, has recently been opened out, and an additional supply of about 200 tons per day is expected therefrom in a few months.

The Takashima screened coal continued to be used by vessels of war of the French, United States, Russian and German Navies. It is used by some of the fast steamers on their voyages from China to London with the first teas of the season which speaks for its qualities as a steam coal. Shipments and sales of Takashima coal during 1876 were as follows:—

	Tons.
To Shanghai.....	16,848
„ Hongkong.....	19,517
„ Yokohama.....	2,672
„ Tientsin.....	4,740
„ Manila	825
„ Foochow	800
Sales in Nagasaki	46,647

Total.....Tons 92,049

Hashima Coal Mine.—During the past year the coal mine at Hashima has been opened out on a more extended scale than formerly, and the output from this island reached over 2,000 tons for the month of March this year. The Japanese proprietor of the mine has engaged the services of a European engineer and miner, who anticipate a considerably increased production of coal during the current year. This coal mine is the second private one in Japan worked by Foreign Machinery.

The island of Hashima is situated about three miles to the S. W. of Takashima and forms one of the group of four islands, the strata of which all dip to the N. W. at an angle of 28 to 35 degrees. These islands seem to have been thrown up at the same time as the peninsula of Nomo, the latter forcing itself through the sedimentary rock, whilst the islands were merely sufficiently upheaved to bring the underlying coal seams to the sea level. In the peninsula of Nomo no coal has been discovered.

In Takashima, the largest of the four islands here referred to, the outcrop of several coal seams is visible, the highest of which is known as the eight foot seam. This seam was the original one worked at Takashima and is the one which first made a name for the Takashima coal. This same seam of coal shows itself in Hashima, but at the sea level, and it is the one now being worked at that island.

The probabilities are that one vast coal field exists under the sea, running from the peninsula of Nomo towards Matsushima and

Hirado, and when this field is entered by safe means, through the overlying islands, an enormous extent of coal will be available. Such an entry has already been made at Takashima. From the experience of work already done at Takashima, it has been found, that the coal field, that I have referred to, runs practically level when once the boundaries of the islands have been passed, and if this level is reached at a safe depth from the sea, the working of it will prove both easy and economical.

I may add that the sale of Hashima coal has been placed under the agency of one of our English firms.

Miike Coal Mine.—Among other coal area in the Nagasaki district is the Miike Coal field, situated in the South East corner of the Province of Chikugo on the East of the Shimabara Gulf. This coal field forms a strip of about four miles wide from East to West, and runs a few miles from North to South. It outcrops on the East against some granite hills, on the West it dips gently under the sea of the Shimabara Gulf, it also outcrops to the North against some hills of clay slates. There are two seams of excellent bituminous coal, the upper one exceeding six feet in thickness, and separated from the lower seam which average five feet by a parting of stone six feet thick thus upper seam six to eleven feet thick, clear coal with no "batt."

Parting of stone six feet, lower coal of five feet with an irregular seam of "batt." The inclination of the seams is very gentle to the S. W.

These mines have been most extensively worked for a great number of years, probably more than 200, by following the seam from its outcrop down its inclination by natural ventilation, and carrying the coal out of the mine in baskets by coolies. The workings have now reached a distance of over half a mile from the outcrop of the seam where the entrances to the mine are, and this great distance has rendered European methods of working necessary for raising the water and coal and ventilating the mines. Being now in the hands of the Imperial Government, they have decided to improve the system of working by introducing modern European methods, and they have secured the services of Mr. Potter, an English Mining Engineer, for the purpose. The output from these mines last year averaged about 200 tons per day, which is about the present output, of most excellent bituminous coal.

The introduction of modern European methods of mining will enable this district to yield coal, for many years to come, economically, which could not have been done under the native method. Lately a great portion of this coal has been brought to this port for market.

Shipping.—No material change has taken place in the Foreign Shipping and calls for but few comments. 277 vessels entered of 180,243 tons, being a decrease of 19 in the number of vessels and of 96,172 tons of the total tonnage as compared with the previous year which is partly accounted for by one of the mail steamers under the American flag having been transferred to the Mitsubishi Company.

The aggregate tonnage of British ships entered and cleared shows an increase of 12 vessels and 12,452 tons, being 132 vessels of 80,243 tons against 120 of 67,791 tons of the previous year.

Three British ships of 2,644 tons sailed for England direct, and 2 vessels of 1,182 tons arrived direct from that part, with cargoes.

American ships, entered and cleared, (not including mails steamers) likewise show an increase, as compared with the previous year, being 64 vessels of 29,004 tons against 43 vessels of 22,627 tons.

Eight French ships of 2,448 tons entered and cleared—being an excess of 3 vessels and 974 tons over the previous year.

The German shipping shows a decrease of 2 vessels and 514 tons, being 17 ships of 5,150 tons in 1875 against 15 ships of 4,636 tons in 1876.

Twenty Russian steamers entered and cleared, being an increase of eleven steamers and 4,266 tons in favour of 1876.

Exchange.—Has fluctuated during the year between 3/10 and 4/6½ for six months sight Bills on London. These fluctuations are governed by so many and often such remote contingencies that it can serve little purpose to speculate upon them, more especially as the money market at Nagasaki is so small. It is entirely controlled by that of Shanghai.

General.—The foregoing report will necessarily strike you, in many respects, as a very unsatisfactory one. It cannot be expected, however, that the commerce of Nagasaki will do more than languish, as it has been doing for the part few years, so long as the Government continues to draw away the sinews of the country, at least of this part of it, without giving the people a *quid pro quo* in the shape of public improvements and healthy, inexpensive, but progressive legislation. A country so little advanced as this is, cannot, without injury to its progress, bear the pressure of an expensive form of Government.

I have so often expressed my opinion with regard to roads, as being the great requirement here before we can expect this port to make any great step in advance, that I have little left to say upon this subject.

The short one to Tokitsu, referred to in my last report, is progressing, and will, when it is finished, be a stride in the right direction. It will, I hope, be found beneficial to the town by connecting it with the traffic of Omura Bay, but nothing has been done towards connecting the place with the mainland by a road over Aba Hill, which, as I have frequently pointed out, is the only outlet of importance.

The want of roads, however, although it might account for a slow development, or even for a stationary condition of trade, can scarcely be accepted as a reason for the continual and lamentable falling off which has been shown of late years. This decline, as I have previously pointed out, can only be attributed to the impoverishment caused by too severe a drain of funds towards the Central Government.

Dry Dock.—In my report for the year 1874 I referred to the construction of a dry dock by the Japanese Government of the following dimensions. Length 460 feet, Breadth 89 feet, Depth of Water 28 feet. These works have been actively carried on during the preceding year, and it is expected if the caisson which has been ordered in England arrives in time, that they will be completed towards the end of 1877.

Corea.—Shortly after the conclusion of the Treaty between Japan and Corea a monthly service began from Nagasaki to Fusankai calling at Tsushima on the way. The time occupied by a round voyage was about 12 days and the steamer had only made three trips when she had to be withdrawn in consequence of the present disturbances in Satsuma.

The general account brought back was that the country looked uninviting and that

the inhabitants were starving. On the occasion of the last outward voyage of the steamer she was laden entirely with rice which was the commodity the Koreans would take in barter.

The prospect of a trade springing up between the two countries excited some little interest amongst the native merchants of Nagasaki before the withdrawal of the steamer. It is, however, not anticipated that the trade will assume large proportions.

The articles imported from Corea were irico, seaweed, peony bark, goose quills, sharks fins, sanshiu, dried awabi, hides and bones.

The exports consisted of rice, saffron, shirtings and dyes.

I have the honour to be

Sir,

Your most obedient,

humble servant,

(Signed) MARCUS FLOWERS,

H. M.'s Consul,

Sir HARRY S. PARKES, K.C.B.,

&c., &c., &c.

MISCELLANEOUS.

We hear that Mr. Heintz, who was recently arrested on sundry charges of fraud and remanded by His Netherland's Majesty's Consul, is under protection of the Russian authorities. It appears that the accused is a native of Luxemburg, and that extra jurisdiction over natives of that state residing in foreign countries was granted to Russia about a year ago. It is therefore probable the further hearing of this case will be before Mr. Pelikan.

Mr. Robert John Beadon, barrister-at-law, of the Imperial Civil Service of Japan, has, upon application to the Consul-General and upon the motion of Mr. J. R. Davidson, been admitted to practice as an advocate in the United States' Courts in Japan.

An esteemed correspondent in Tokio, sends us the following interesting particulars of a balloon recently constructed.

Imperial Naval College Tokio.—A trial took place on the Naval Parade Ground opposite the above named college, of a captive balloon, for the purpose of ascertaining if it was gas tight and also its buoyancy with coal gas.

The result was most satisfactory

When used in the service for which it has been constructed it will be charged with hydrogen gas and will have considerably more than sufficient buoyancy to carry two persons and a parachute. Both balloon and parachute are composed entirely of native material, even to the solutions for making the silk and seams gas tight; it contains 1,633 yards of Japanese

silk 15 inches wide, and cost, including labour and material, not quite 1,200 yen. It was commenced on the 10th of April last, and had the weather been more favourable for drying the solutions it would have been completed in about 14 days. The designers and constructors were Mr. Asso, Japanese Principal of Marine Engineering, Assistant Engineer Baba, I. J. Navy, and Marine Engineer Cadets Yamamoto (2) Moritomo and Yamaki all of the I. J. N. College, Tokio, and too much praise cannot be bestowed on these gentlemen for the skill and energy they have displayed in designing and constructing the first balloon made in Japan, and probably the first in the far east. The following are its principal dimensions and weights; Diameter 30 feet. Height 48 feet. Volume 14,000 cubic feet.

It is reported that London, Berlin, and New York are in possession of telegrams purporting to have been forwarded from Yokohama, announcing that Kumamoto had been relieved, that the rebellion was suppressed, and the civil war virtually over.

Should there be any foundation for this report the telegrams must have been despatched for purposes highly discreditable to the senders, whoever they may be, for not only are such announcements calculated to lull capitalists into a state of false security, but they convey an entirely opposite view of the condition of the internal affairs of Japan held by those best competent to judge of such matters, and which are the source of much anxiety to all interested in the welfare and progress of this country.

It would be unfair, in the absence of evidence, to connect the news transmitted, with the pressing necessity of Japan for a foreign loan, so often rumoured and as often contradicted. The inference, when made contingent upon the truth of the report, is, however, not absolutely inadmissible, and it is enough for us at the moment to confine ourselves to calling public attention to a scheme, as nefarious in its objects as mendacious in its substance.

A telegram dated Kioto 26th ult. announces that H. E. Kido, *Naikoku-komon*, expired at 6.30 a.m. on that day. This event, though not unexpected, will prove a serious loss to the MIKADO, whose Chief Councillor and most trusted adviser has passed away at a time when his sage experience and enlightened moderation, would have proved invaluable to his country at a most critical stage of its history.

THE Installation Meeting of the Nippon Lodge, No. 1,344, was held on the evening of the 26th ult. at 10, Minami Nabecho, Tokio, and was in every respect one of the most successful masonic gatherings that it has been our fortune to witness. A large number of distinguished brethren assembled to do honour to Bro. W. H. Stone, who had been unanimously elected to fill the chair for the ensuing year, and we have no doubt that many more would have availed themselves of the opportunity of being present on such an interesting occasion, had not previous engagements interfered with their intention.

The ceremony was conducted by the R. W. D. G. M. Bro. DALLAS assisted by Bros. BOTRNE,

P. D. G. M., CRANE, P. D. S. G., W. E. FREAME, D. G. S. W., WEILLER, P. D. B. G. P., A. C. WYLIE, P. P. G. S. B.

The following is a list of officers for the ensuing year.

Bro. W. H. Stone,	W. M.
" F. Prowse,	S. W.
" M. M. Scott,	J. W.
" A. Weiller,	Treas.
" F. C. Hayes,	Secy.
" H. M. Perkins,	S. D.
" E. Hansen,	J. D.
" T. Donaldson,	I. G.

After the meeting the brethren adjourned to the Seiyoken Hotel, where a banquet awaited them.

The usual Masonic toasts were proposed, honestly drunk and responded to, the intervals being filled up by music, singing and recitations, and the brethren dispersed at about midnight, after having spent an evening that will long be a pleasant reminiscence to all who took part in it.

A *serious fracas* occurred on the 27th ult. in Homura between some British and Russian men-of-war's men. It appears that some dozen or so Russians were in "The Star of Our Union" saloon when a couple of British sailors entered. Some conversation took place about the present war between Turkey and Russia, the upshot of which was that one of the two men had a tumbler thrown at his head, it striking and cutting him on the forehead, and both he and his companion were speedily ejected from the house, and the fight went on outside. Some more British seamen and marines appearing on the spot, the Russians retreated into the house and after a few minutes the others walked away into the different drinking saloons and it was thought the fight was ended. Unfortunately, a drunken English seaman was walking or staggering about the neighbourhood where the Russians were located, and whether he gave any provocation or not does not appear to be very clear, but he was attacked by five or six men. His comrades rallied round and an indiscriminate fight took place. Again there was a lull and residents in the neighbourhood hoped the *mélée* had finally ended. But this was not so, for in a few moments about forty Russians appeared on the scene armed with staves and stones. Catching an unfortunate marine by himself they at once set upon him. He was a tall, powerful man and succeeded in knocking down several of his assailants with the buckle-end of his belt, but was eventually knocked down himself. The scrimmage had now become general, for the Russians attacked all who came in their way, seamen or civilians. Three Frenchmen who were standing at the corner of the Cafe de l'Univers were knocked down; several civilians were attacked with sticks and stones. Sergeant Loxton and Police Constable Toms had by this time appeared on the scene and in attempting to quell the disturbance, were severely handled by the Russians. A civilian passing by observing a Russian sailor about to strike a British marine with a large club attempted to wrest the weapon away, but got knocked down for his pains. Another bystander saw a Russian with a drawn knife rush madly at an Englishman and was about to plunge it in his breast, when the civilian with a well directed blow from his fist knocked the Russian down. Stones and billets of wood were flying about in all directions. At length the Russians gave way and ran to the hatoba, where their boats were lying, chased by the British and a few civilians. They made a stand here for a few moments,

but their officers, who had just come on shore, at once took charge of them and got them into the boats and sent them off to the ship. Later in the evening a detachment from the *Audacious* was sent on shore to seek for wounded, but finding everything quiet and none of their comrades severely hurt soon returned on board. The affair caused quite a commotion in the settlement; and the various Consuls appeared on the spot as quickly as possible. One Russian found lying in the road by Sergeant Loxton was put into a jinrikisha and conveyed to the station out of the way, the sergeant fearing that some British sailors might find him. Several of his comrades were severely wounded and taken to the hospital.

THE following ponies were sold on the 28th ult. at No. 123, by Mr. A. Jaffray, and fetched as under:—*Antidote*, \$41; *The Judge*, \$12; *The Minister*, \$15; *Davenport*, \$13; *The Ghost*, \$11; *Daimio*, \$100; *Sport*, \$29; *Doctor*, \$143; *Tim Whiffler*, \$53; *Nick*, \$75; *Moor*, \$180; *Rebel*, \$50; *Griffin*, \$21; *Pettipas*, bought in at \$15; *Shizoku*, \$42; *Heimin*, \$22; *North Mongolian*, \$14; *South Mongolian*, \$18; *Mongolian Owl*, \$15; *Mongolian Wolf*, bought in at \$60; *Mongolian Lamb*, \$50; *Trustee*, \$24; *Title Deed*, \$11; *Mactavish*, \$10; *Last O' Mongolians*, \$17; *Sandboy*, \$43; *Sugarplum*, \$26; *Sequel*, bought in at \$145; *Sorcerer*, \$15; *Snake*, \$42; *Scamp*, bought in at \$49; *Telegram*, \$50; *Luck's All*, a limit of \$60 was placed on him, and only \$35 bid; and 3 Japanese hacks fetched respectively \$17, \$7 and \$4.

The actual sale aggregated \$1,170; ponies bought in, \$269.

THE performance on the 28th ult. in the Gaiety Theatre by the Dramatic Club of H. B. M.'s S. *Audacious* so far as the acting itself went was a decided success, but the audience was very small. The curtain rose to "A Dodge for a Dinner," in which the characters of Tom Hopkins, Simon Beeswing and Sam Hodge, a wealthy farmer, were very well sustained. But "To Paris and back for £5" was the most effectively executed piece of the evening. Mr. Feherty's representation of Mr. Samuel Snuzzle, and Sergeant Watling as Mr. Charles Markham, deserve to be specially commended; though the whole farce was very well executed and much appreciated. Indeed the performance—with one or two exceptions in which the characters were slightly overdone—gave the greatest satisfaction to the audience; and we feel confident that a repetition will produce a much larger house than that of last night. The object of the efforts of the Dramatic Corps is a charitable one, viz: for the benefit of the widows and orphans of the men who fell victims to the disastrous explosion on board of H. M.'s Ship *Thunderer*, which in itself should be sufficient to draw out the benevolence of the community. That the officers of the *Audacious* took so little interest in the proceedings as to not give more practical support, is somewhat surprising. The fact of there being but few seamen or marines present is easily accounted for by the fact of their not being allowed on shore in consequence of the quarrel which took place the evening before between the Russians and *Egeria* men. The concluding piece performed was "Sarah's Young Man," a farce capable of producing much merriment. Miss Sarah was very well represented by Mr. Dunlop; and Sergeant Watling and Mr. Feherty again played their respective parts most creditably. The very excellent band of the *Audacious*, under the leadership of Mr. Agius, was present and enlivened the rather long intervals with some delightful music.

THE Agent of the Great Northern Telegraph Co. informs us that the Russian land lines are in order again.

THE new building intended for the occupation of the staff of the Finance Department, has been commenced. It will cover an area of 363 tsuchos, and will be two stories high, and built in European style. The estimated cost of the structure is 13,250 yen.

THE first ascent of Fujiyama this season has been made by three officers of the Royal Navy. These gentlemen went to the top of the big mountain on the 22nd ultimo. During their descent they were overtaken by a snow storm, which, however, hardly impeded their progress.

A CORRESPONDENT of the *Echo du Japon* under the signature of "A WHITE (DEMOCRAT)" makes an assertion which we trust will be denied if ill-founded, or taken some further notice of if well. The writer, in our opinion, would have done better to report the assault on the spot to one of the stewards of the Race Club, than to make it the subject of a letter to a newspaper. The ill-used Japanese too, has a certain remedy through the Consul of his assailant. This might have been pointed out to him by "Democrat," who, doubtless, would have had no objection to testify in Court to what he had seen. However, subjoined is a translation of the body of his letter, with some of its strongest expressions suppressed.

"On the last day of the races, I was the indignant witness of the following event which does not lack blackness, although it might perhaps find favor before a 'Carpet bagger' of U. S. G.

"A 'gentleman of color' * * * * * was the Cerberus at the carriage entrance. Noticing a Japanese of respectable appearance and decently dressed, who was standing quietly beside me near the rail, the above named gatekeeper told him brutally in English to go away, and at the same time * * * * * struck him so violently in the stomach with the end of his stick that the poor devil of a Japanese doubled himself up like a pocket knife, and thus no doubt escaped some more serious injury.

"Now, Mr. Editor, my object in writing these few lines is twofold: 1st, to reprehend the use of brute force be it white or black; 2nd, to warn the Japanese, *e tutti quanti*, not to confound these two colors."

A BASE-BALL match "The Fleet and Yokohama" versus "Tokio," was played on the Cricket Ground on the afternoon of the 28th ult.: resulting in a victory for the latter team. Eight innings only were played, leaving the score as follows:—

		SCORE.

NATIVE merchants are moving about the settlement making brisk enquiry for yarn and manufactured cottons, but at prices so low that few foreigners are inclined to make sales. We are assured, from a trustworthy Japanese source, that the enquiry is wholly speculative, and that any goods purchased are offered against a rise in the market which natives look upon as inevitable within a short space of time.

LARGE numbers of foreign visitors are residing in or making their way to the mountains of the Hakone range, where the tea-house and bath proprietors are reaping a goodly harvest. As many as from thirty to forty foreigners were stopping the other day at Naraya's well-known hotel at Miyanoshita. At present the weather in the hills is charming—all that a tourist, even the most exacting, could desire.

THE hulk *Tiptree*, so long the property of the P. & O. Company, has been handed over to her Japanese purchasers.

THE following ponies were sold or offered at public auction on the 30th ult. *The Boojum* and *Wilhelm Tell* were offered, but did not reach the value put upon them by their owners, and so were bought in. *Not Proven*, winner of the "Consolation" at the late meeting, *Kismet*, *Drift*, *Bébé* and *Raelhia* were advertised for sale but were withdrawn. The others fetched prices as follows: *Sovereign*, \$5; *Grayling*, \$30; *Dazzle*, \$25; *Corbie*, \$20; *Pegasus*, \$23; *Primate*, \$25; *Damfounder*, \$50; *Distemper*, \$150; *Kittiwake*, \$51; *Premier*, \$57; *Planet*, \$80; *Faust*, \$50; *Don Carlos*, \$62; *Lilledale*, \$60; *Sakejake*, \$26.

THE *Mai-nichi Shinbun* has a paragraph, which upon enquiry turns out to be utterly unfounded. It is to the effect that Messrs. Carroll & Co. have been fined \$50 for the punishment they inflicted a few days ago on a Japanese sendo in their employ detected in stealing a quantity of brass screws. No such fine was inflicted. The U. S. Consul-General and the Governor of Kanagawa were satisfied with the explanation tendered by the foreign firm; and the sendo was handed over to the police authorities, by whom he has been judged.

OWING to the disturbances in the south-west, the usual annual holidays during the hot season, will not be given to the government authorities.

ABOUT 1,000 volunteers are to be formed into a body of police and sent to the South-West.

KANAGAKI, of the *Kana-yomiuri Shinbun*, was condemned to pay a fine of ten yen for having transgressed the press laws, and Nagai, of the *Yomiuri Shinbun*, to a penalty of five yen for a similar offence.

THE stirring events now passing in Europe render the incomplete political news' telegraph service, under which disadvantage we now labour, a great loss to the community. Reuter's Telegram Company, in accordance with custom, is furnishing the greater part of the East with the most important items of news: this is being done at an expense much in excess of the support received, and as we are informed that the Company's agent at this port is about to circulate a list for subscriptions to the service, we recommend it to the favorable consideration of the public.

It may not be amiss to mention in this place that it is quite beyond the means of the local

press, individually or collectively, to bear the whole amount required by Reuter's Co. for furnishing them with political messages, and it is from this reason that the telegraphic news published is always several days later than it ought to appear in Yokohama. In fact, while recognizing the importance of telegraphic general news, and the desirability of its immediate publication, we have no alternative but to explain to our readers our own inability to provide them with it, though we would gladly contribute largely to ensure a regular service to Japan.

FREQUENT complaints have been made of the absence of any tariff of charges for *jinrikisha* hire. We have been accommodated with a copy of the "Revised Regulations" issued by the Governor of Kanagawa so far back as September, 1874. Various regulations are therein contained for the governance of the men engaged in the traffic; article 8 provides, "As boards showing the tariff for *jinrikisha* fare are hung up in all the stations, on no account must more than the proper fare be charged." And the penalty under article 3 for a breach of this by-law is the forfeiture of the overcharge and five times the amount of the proper fare.

The tariff tables are too long for reproduction, but we quote the following rates to and from places in the immediate vicinity of Yokohama.

ANOTHER *jinrikisha* accident occurred on the 2nd inst., at the foot of Hegt's Hill. A gentleman was descending the hill in a *jinrikisha*, which, as is so frequently the case, overpowered the driver with the usual result. The carriage came into violent collision with the fence: the fare was thrown out, and, it is feared, has sustained serious injury.

OUR readers will have seen that among the passengers to Yokohama by the *Saikio-maru* was H. E. Mori Arinori, Japanese Minister to China, who returned according to

announcement and expectation. So much for the flippant negations of the *Tokio Times*, whose utterances, whether to affirm, deny, command, or instruct, are not worth the ink on the type which prints them.

SUBJOINED is a table of the approximate dates of departures from Yokohama of the P. M. S. and O. & O. S. S. Companies during the present season, after the 6th instant.

and afterwards about the 10th and 24th of each month.

NIPPON NOTES.

THE *Choya Shinbun* publishes a telegram dated Kyoto 6.15 a.m. 21st ult., announcing that on the 18th, a large body of the insurgent troops hotly attacked the imperial forces commanded by Lieut-General Miura, at Uwako near Kagoshima. A severe battle followed and the insurgents succeeding in worsting the imperialists who fought under every disadvantage, and barely succeeded in holding their ground. On the 20th ult., Lieut-General Miura attacked and seized Fukumatsu and Sobe, and captured a quantity of military stores.—Another telegram from Kumamoto, despatched at 8 a.m. the 21st, says that on the 14th instant, the imperial armies fought victoriously at Kenoko and marched as far as the village of Fukagawa.—About 10,000 soldiers enlisted newly in the several kens will soon arrive in Tokio, 267 from the Sakitama ken arrived in Tokio on the 19th.

H. E. KURODA KIYOTAKA, Superintendent of the Agricultural Department, says the *Nichi Nichi Shinbun*, was obliged to resign his post of war inspector of the imperial forces owing to ill-health. He became a little better on his arrival at Tokio, but a few days ago he was again attacked and confined to his room. He is not said to be seriously ill.

THE *Mai-Nichi Shinbun* says:—Messrs. Carroll & Co., lot No. 16, Yokohama, became angry at a Sendo in their service for having stolen some gross of screws; the man was fastened to a post outside the premises and a board was hung on his breast, on which was written in English and Japanese characters: "Dorobo no hito" and "This is a thief." The Sendo is wicked for stealing. But we have a strong opinion of the misconduct of Messrs. Carroll & Co. in acting as they did.

THE *Mai-Nichi Shinbun* writes:—About half a battalion of troops, commanded by Lieut-General Takashima in Kagoshima, will soon be despatched for Sadowara, in Hiuga, by sea. About 300 fishing boats in the Yajiro sea were hired by the imperialists and stationed off the coast of Sadowara.—It is reported that about 500 rebels were found in the mountain of Takana, in Chikugo; and the castle city of Kurume is now strictly guarded by the police forces.

DURING the night of the 7th ult., there was a heavy frost in the famous silk-producing province of Joshu which did not thaw until nine o'clock a.m. the following day. Mulberry leaves were much injured and rose rapidly in price. One horse-load (about 300 pounds)

of the leaves possesses an average value of 25 sen, but the same quantity is now worth about 4 yen. The mountain tops are still covered with snow and spring flowers and vegetables are not much behind time.

THE *Nichi Nichi Shinbun* writes:—A license for opening the bank established by the nobles' club was granted on the 21st ult. The bank is to be called the Fifteenth National Bank and the premises are the buildings occupied formerly by the Horaisa company at Kobikicho, close to Horabashi. The capital of the company is 17,826,000 yen and is divided into 178,260 shares of 100 yen each. The shareholders number 487. The officers are Mori-Moto-toku, president, Tokugawa-Yoshikatsu, Vice president, Yamanouchi-Toyonori, Kuroda-Nagatome, Ikeda-Akimasa, directors, Nakamura-Kiyouki, manager, Kumagaya-Takegoro, sub manager, Iwahashi, Chief secretary, To-oda, Chief Accountant, with a large staff of cashiers and assistants. H. E. Iwakura, *Udaijin*, nominated Umeveda an assistant in the bank's service, and Shimadzu, Mayeda, Mori, Hosokawa, and Tokugawa (ex-lord of Owari) have appointed men of talent and ability, to control the transaction of business. Their nominees are respectively Umeveda, Narahara, Kitagawa, Kashimihara, Kidzuka, and Mafuji. Out of the capital of 17,826,000 yen, 15,000,000 yen will be advanced to the Finance Department bearing interest at the rate of 5 per cent per annum unsecured. No bank with such a large capital has been established in the east. The capital of the Oriental bank is only about 12,500,000 yen.

THE *Bunmei-shinbun* of 21st ult. writes:—Owing to the continuation of several civil disturbances, which occurred one after another, the Finance Department found the treasury was getting empty. In consequence of this the Finance Minister Okuma, it has been rumoured, was to proceed to Europe for the purpose of negotiating a loan, for the Japanese Government. But it is stated that he has declined and the mission has been placed in the hands of Mr. Inouye-Kaoru, who is now in England; and he is said to have engaged himself to raise the loan required.

THE *Osaka Nippo* says that the disease of which H. E. Kido, *Naikaku-komon*, died was cancer.

The number of eating houses in the city of Osaka is 3,977; and hotels number 2,182.

THE same paper states that His Majesty the Mikado is expected to go as far as Mumanoski, Choshin. This movement is supposed to be connected with the insurrection.

A PUBLIC female school was opened at San-chome, Tsukiji, Tokio, on the 21st ult.

THE *Hochi Shinbun* says:—According to a telegram from Kyoto, despatched at 9.5 p.m. on the 21st ult., the imperial armies are stationed in a good position in the hills of Nagao-yama in Midzumata and have marched victoriously as far as the mountains of Oka and Takumidoshi, which lie about one English mile from the northern border of Satsuma. The imperial troops can easily march from Oka to Moidzumi on the Okuchi road leading to Kagoshima. Another telegram from Osaka, sent at 5.10 p.m. the same day, announces that on the 17th ultimo, a battle took place at Kunimiyama, in which the insurgent troops were defeated and driven from their position. The victors seized the rebel forts at Takanosu and Tsubaki on the following day. They then marched directly to the villages of Hirashi and Okutachi. On the 19th, they encamped at Okoji and Midzunashi, and thus occupy a position

commanding the Terukaku road. — Hosokawa, ex-lord of Higo, has distributed 8,000 yen and 3,500 bags of rice, value about 6,200 yen, amongst the homeless people in his late dominion. Besides this he generously offered 20,000 yen to the government to be added to the fund (180,000 yen) for the relief of the homeless sufferers.

The *Akebono Shinbun* says that the shizoku in Kurume and Yanagawa, Chikugo, are said to have become much excited.—It was currently reported that a body of the insurgents had entered Uwajima and Osu, Ehime-ken, in order to collect ammunition. A strict watch was observed there by the police; and on the 9th ult., a suspicious looking man was arrested and examined at the police station, Uwajima. He confessed that he belonged to Sadowara, Hiuga, and came to purchase gunpowder and other military stores for the insurgents. The frontier of Tosa and Iyo is strictly guarded by police and no body is allowed to pass into the Kochi-ken, without a license of Kucho or Kocho. It is therefore, considered that the state of affairs in the Kochi-ken is not very peaceful. The imperial troops in Kagoshima number about 7,000 in all. They constructed several batteries, under the cover of which they are waiting for an attack from the insurgent armies, who number about 4,000.

The *Mai-Nichi Shinbun* says that the insurgents who penetrated the province of Bungo have established their head-quarters at the Buddhist monastery of Jodo-in in the village of Takeda. The Owake-kencho has issued an order to the effect that the shizoku were to be employed to oppose them, and that 10 Sen (only) was to be given to each of them for one day. About 500 were raised in a few days.—One battalion, which was recently enlisted in Wakayama, arrived in Osaka on the 16th May, and was ordered to be despatched to the seat of war in the west.

The *Hochi Shinbun* of May 25th writes:—According to a letter addressed to the imperial head-quarters at Kumamoto by the war inspector in Kagoshima, about 30,000 insurgent troops are besieging the city of Kagoshima, where battles are constantly taking place. In this emergency he demands more soldiers to be sent to Kagoshima. The forces of Saigo are formed into three divisions: the first, commanded by Murata Shimpachi and twenty assistants, consists of about 8,000 men; the second, commanded by Saigo Takamori in person and thirty assistants, consists of about 10,000; and the third, commanded by Kirino Toshiaki and fifteen others, consists of about 8,000. The first and third divisions are expected to proceed to Kagoshima, while the second division intends to march for the north-east on the Hiuga road.

The following is a list of the names of the killed and wounded imperial Generals and Colonels in the south-west:—

Names.	Date.	Place.
Lieut.-Gen. Tani (wounded)	11th Mar.	Kumamoto.
" Miyoshi	27th Feb.	Inasa.
Colonel Fukuhara (killed)	3rd Mar.	Yamaka.
" Kajibi (wounded)	15th "	"
" Sakuma "	15th Apr.	Otsu.
" Hanayama "	22nd Feb.	Kumamoto.
" Yagura (killed)	22nd "	"
" Nogi (wounded)	—	Uyeki.
" Oshima "	— Mar.	Yamaka.
" Nishi "	—	"
" Nagai (killed)	20th "	Uyeki.
" Tsuda "	—	Yoshiji.
" Murata (wounded)	20th Apr.	Takemiya.
" Yoda (killed)	4th Mar.	Yoshiji.
" Kiyomidzu "	— Apr.	Kidome.
" Yoshimatsu "	— Feb.	Uyeki.
" Shinto "	— Mar.	Yamaka.
" Nodzu "	— Apr.	Kidome.
" Kuwahara "	6th "	Hagiseme.

On the 24th, about 1,500 newly enlisted police were despatched from Tokio to Narashi-no-hara, an extensive plain in Shimosa, used for drilling purposes. They were accompanied by about sixty drill instructors, who will put them through a course of drill for one week.

H. E. Mori, Envoy and Minister for Japan in China, left Shanghai on the 22nd May. He is expected to go to Kioto to inquire after the health of H. M. the Mikado.

The *Choya Shinbun* extracts the following item from the *Futsu Shinbun*:—On the 3rd ultimo, when the imperial troops in Higo marched for Satsuma, they fell into an ambush where a mine was placed by the insurgents. About 400 imperialists were killed or wounded more or less severely.

The *Choya Shinbun* writes:—According to a telegram from Kumamoto, despatched at 7.40 a.m. the 22nd May, a battle had been fought at the two villages of Okoji and Midzunashi, Higo. The insurgent armies were routed, and only one on the imperial side was killed. On the 20th, four of the insurgent chiefs, namely, Yoshitomi, Fukushima, Tanaka, and Sudzuki, commanders of bands of soldiers, laid down their arms and surrendered to the imperialists at Yajiro, where they are now being examined. Another despatch, dated the 23rd, mentions that on that day, the imperial armies seized numerous batteries belonging to the rebels, which stand in a row covering a range of about three ri between Ozekiyama and Imai-zaka. The insurgent troops fled in disorder leaving their killed, wounded, cannon, and many other things behind them. The victors marched with great courage as far as the insurgent camp at Ono, where they also seized large quantities of military stores. They then advanced directly on Kagami-yama. This movement created much fear in the camp of the insurgents, and a terrible fire was observed in the direction of Sashiki and Ibarase, where the insurgents are considered to have set their camps on fire. A telegram from Kioto on the 23rd announces that several batteries were constructed in Takuni, which lies south about one mile from Yamano of Satsuma. They are guarded by Lieut.-General Kawaji. During the night of the 20th the insurgent armies attacked them, but they were driven back. On the following morning no killed or wounded were found on the battle field, but it was covered with blood. According to a telegram despatched by Lieut.-General Kawaji, the insurgents have constructed forts between Yahadzu and Komenotsu. Both aged and young persons in Idzumi, Akune, Noda, and the neighbourhood have taken up arms in favour of Saigo. Mitamura and Kurigaki act as directors of the hospitals of the insurgents. Each of them were the pupils of Mr. Willis, M. D., teacher of medicine and hospital surgeon in Kagoshima, who aided them to purchase all the necessary appliances for treatment of diseases since the spring of 1875. Besides them, there are about 72 good surgeons in the service of the insurgents and about 400 assistants.

The *Mai-Nichi Shinbun* says that about 3,000 wounded imperialists are in the hospital in Nagasaki. Saigo proceeded to Bungo through the province of Higo and established his temporary head-quarters at Oka. The shizoku of Saga, Kurumo and Yanagawa are much excited and the men of the same class in Fukuoka wear swords against the order of the authorities.

From the *Osaka Nippon*:—

A telegram from Major Saito, at Shimonoseki, at 6.15 p.m. on the 17th May, says that the following information has been received

from the branch Government at Nakatsu, in Oita Ken: The rebels who appeared at Takedayeki had advanced to a place which is three ri distant from Oita Kencho by 10 a.m. on the 16th, and in consequence 50 policemen besides men from the *Asama-kwan* and *Moshun-kwan* have been got ready to meet them.

A letter from a Sangun at Kagoshima to the Superintendent of Chastisement at Kumamoto reads that 30,000 rebels are scattered about in various places in Kagoshima Ken and the number of Government troops is not small, but that if there are any troops to spare in Kumamoto, they would be welcome at Kagoshima, as there both the land and sea forces are constantly engaged.

Mr. Masuda, 7th class judge, of the Kumamoto Saibansho, arrived at Kioto on the 16th May, and is expected to return shortly to Kumamoto. It is said that he has greatly distinguished himself down there.

On the 6th May two sons of Shimadzu left Nagasaki for Kagoshima.

When the insurgents rose in Oita Ken, policemen opposed them, and soon afterwards Major Oku went from Kumamoto to Kokura and two companies of soldiers have been sent to Oita Ken.

Sixty per cent of the Kumamoto shizoku have joined the Imperial army, at the desire of Hosokawa, their ex-daimio, since the Imperialists arrived at Kumamoto.

The expenses of the Government are at present heavy, and it is said that 2 per cent is to be taken off the fixed expenditures of Fu, Ken, Shi and Kioku, and that many officials of the Railway and Post Office will be dismissed.

A report has been received from Kioto hinting at the possibility, under certain circumstances, of the Mikado going in person to Shimonoseki.

A man who has arrived at Osaka from Kagoshima reports that the people ran away to the mountains and country villages when the Imperial troops arrived there on the 3rd of May. When Iwamura, the new Kenrei, arrived, there were no people to be seen in the town. Early on the morning of the 5th, the rebels made an attack and were at once defeated by the Imperial troops, over 40 of the former being killed. They number less than 3,000 and do not seem to be familiar with fighting. They are newly collected rebels. The Imperial troops in Kagoshima number over 10,000 and there are 10 men of war commanding the sea. The battle on the 5th was the first, and on the night of the 6th the rebels set fire to the town, which burned for two nights and three days, more than half the town being destroyed. On the 7th the rebels made an attack and the Imperial troops defeated them. After this no battle was fought up to the 9th. The Ken officials are as yet unable to attend to the Ken affairs.

A telegram from Kioto, received at 3.30 a.m. on the 19th, says that the Rei of Oita Ken sent the following on the 17th ult.: Yesterday the rebels appeared to be about to attack the town, and guards, were provided at every point. The rebels then went on for Tsurusaki, and the police who had been landed at Saganoseki fell in with them and at 11 p.m. attacked them with swords. Two or three of the police were killed, and wounded and about seven rebels killed, wounded and taken prisoners. They have retreated to Iunkai. I have learned that 500 policemen who arrived to-day have been sent out.

Matsudaira (Shumgaku) went to his native province (Yeehizen) on the 19th.

When a rebel who was captured in Higo and did not know where his leader was gone

was tried at the Kumamoto Saibansho, the judge said "the head of Shinowara has fallen into the hands of the Imperialists," whereupon the prisoner was sad and did not reply. When it was told him that the Imperial army had got the head of Kirino, he shook his head, and said "Mr. Kirino has not a head to be handed over to you. Do not tell a lie." The official said "Saigo, who is looked up to by you as a god, has fallen into our hands." The prisoner smiled, and said that when the rebels left their native place, they separated the head of Saigo from his body, and that he has not two lives.

The farmers in the neighborhood of Chiba Ken and of Sumida and Mukojima are in disorder and are raising the mat flag.

31 mortars were sent from Osaka camp to Kumamoto on the 19th ult.

15 small steamers belonging to the people of Osaka and Kobe have been hired by the War Department.

A telegram from Lieut.-Colonel Shidsuma, at 1.20 a.m. on the 21st May, says that on the 18th the rebels attacked in force the troops under General Miura in Uwagoba. For a time a severe battle took place, the rebels finally being routed. At 3.40 a.m. to-day the troops under him seized Futamata and Kamongoshi, taking material and prisoners.

A telegram from H.E. Yamagata at Kumamoto, dated the 19th ult., says that on that day the following had been received from Miyoshi: Yazawa, a sergeant who was sent to Yatsushiro on the 18th, met General Yamada in Nakamura; on the 17th the rebels in a strong position at Kunimiyama were defeated; on the 18th our troops advanced to Hirase; this road is so steep that the troops have to advance as they can, and the marching is slow. The report of Miura says:—On the 18th the rebels attacked Kamibako and a battle was fought. Our troops then attacked by a flank movement from Ojikiyama and the rebels ran away, evacuating the forts in Sanjo; our troops are strengthening themselves in the rebel forts. On the afternoon of the 18th a strong advanced guard was sent out from the army of Kawaji and attacked the rebels by the back of Nakaoyama, while some others attacked in front; the rebels got confused and retreated, leaving dead bodies; Kumasaki, a rebel leader of a company, and Chiuman, a rebel leader of a detachment, have been killed; our troops also marched from the road which leads to Okuchi. Beyond Fukagawa, two engagements have been fought, and our troops entered Ono and seized two rebel forts. No report of fighting has yet been got from the army which was sent to Bungo.

A telegram from General Kawaji, at 8.35 p.m. on the 19th May, says that he, Toshiyoshi, attacked the rebels on the 18th from the rear of Nagoyama. The rebels were confused. Our troops in the front also attacked and killed Kumasaki, a rebel leader of a company, and Nakama, a rebel leader of a detachment. The dead bodies of rebels numbered 20 and our troops captured 1 rebel, 34 muskets, ammunition, &c. Our troops who had fortified the road to Okuchi heard some noise (not explained) last night (18th ult.) and entered Ono with a loss of 4 killed and about 10 wounded. Since the beginning of this month the rebels have been continually attacking and the sound of firing never ceases day or night. The people were disturbed and our troops have been in anxiety, but by to-day's battle, the power of the rebels has been much weakened. It not only brought comfort in Minamata, but restored the energy of our troops. Police affairs are well. It is desired that this be reported to Ando at Tokio.

A telegram from Kawaji at 9.50 p.m. on the 17th May says that on the 8th the advanced guards sent to Yamano in Satsuma were called back and the rebels pursued them to the frontier of Higo. On the 10th the rebels threatened Minamata and our troops fought well. Oyama Genosuke, who carried the rebel ensign, was killed, and 12 prisoners, muskets, and ammunition, &c. taken. After this battles were fought day and night. On the 14th our troops marched from the left, seized some rebel forts and burnt the kitchen department of the rebels in Fukagawamura. The rebels retreated in confusion. Our troops took one mortar, one ensign, muskets, ammunition, swords, &c., and one prisoner.

It is rumored that H. I. M. the Mikado will start for the South-West on or about the 5th June and that a notification will soon be issued.

At 11 a.m. on the 17th ult. H. I. M. the Mikado visited H. E. Kido in person to make enquiries. This is the first Imperial visit to a Minister since the visit to Kamatari. H. E. Kido is not a little illustrious. On the 18th H. I. M. the Empress sent a present of food.

ACCORDING to intelligence from the county of Imba in the province of Shimosa, the pasture ground, which was opened there during last year, is giving promise of growing prosperous and extensive. Many thousand head of sheep and horses are supplied with grazing-land and large numbers of men are busily engaged in the cultivation of the waste land. It produces Indian corn, barley, and potatoes. The workmen are dressed in the European style and put on a cap, which bears the character "Industry" in Japanese. The two Americans, viz., Dr. Latham and Mr. Ap Jones, are employed as the instructors and Iwayama is the superintendent of the working department.

At dawn on the 26th ultimo, a fire broke out at Ozawa-mura, Yonezawa, and it was not arrested until about thirty houses were destroyed.

THE *Hochi Shinbun* says:—A telegram from Kumamoto, dated 24th instant, announces that on the 18th instant, the imperial armies routed and hotly pursued the insurgent troops for about three ri, as far as Matsuo and Kambara on the Satsuma road. The victors are expected to march unopposed on Okuchi and Idzumi in Satsuma. Prince Arisugawa-no-miya, Commander-in-chief in Kumamoto, will shortly leave for Kagoshima. The river Kototsu-gawa runs through the western entrance of Kagoshima, and is strictly guarded by the imperial armies. Two or three bodies of men and women without heads or arms are daily observed floating down the river. The imperialists wondered at this, which after investigation turned out to be as follows:—the natives of both sexes in Satsuma, who are friendly to the imperialists, but not to the rebels' are wickly considered to be spies of the imperial armies by Saigo's men. The latter arrested the poor folk and cut off their heads and arms throwing their bodies into the river Kototsu-gawa.

There is a mountain, named Daimioji-oka, at about 1½ ri from Kagoshima. The insurgents constructed a fort on the summit of it, where four cannon were placed to bombard the city of Kagoshima. The *Nissinkuwan*, anchored in the harbour of Kagoshima, and fired on this fort, obliging the rebels to vacate their stronghold.

The following is a letter from Kumamoto, dated the 24th instant:—

"The imperial troops are encamped on the following positions:—The first division is at

the village of Kamidzu, the second at Sunatori, the third at Takamori in Asogori, the second of the other imperial detachments is in Kumano-sho, the third at Sashiki-machi, the fourth at Yajiro-machi, and the fifth division at Shounin-machi. The first and fourth divisions of other detachments are encamped in the city of Kagoshima, where Saigo is expected to retreat with all his troops. The entrance of the village of Omaye is guarded by about forty rebels, who have established their camp there, and about four hundred insurgents are stationed in the neighborhood. During the night of the 3rd inst. Lt.-General Miyoshi marched on, and attacked, Yamabe and Hoko, on the Hitoyoshi road. The insurgents retreated before the imperial troops without resistance, and thirty or forty insurgents belonging to the villages of the upper and lower Shiraki on the same road followed their example."

THE *Mai-Nichi Shinbun* writes:—A telegram, received yesterday, announces that on the 15th instant a battle was fought in Kagoshima. It ended in the victory of the imperial troops, who seized about 10,000 snider cartridges, 500 sniders, 1 cannon, and other trophies.

A TELEGRAM from Kioto, received at 7 a.m. on the 26th May advises that H. E. Kido, *Nai-kakukomon*, died at 6.30 a.m. on that day.

THE *Choya Shinbun* says that a telegram from the Yamaguchi ken, which was received at the Kanagawa Kencho at 3.56 p.m. on the 25th ultimo, announces that three heimin, named Kumimitsu, Matsui, and Yano, of the former ken, have deserted their home intending to excite a disturbance among people against the government. They are expected to land in Yokohama. Forty-eight of the insurgents in Fukuoka, who were condemned to hard labour for ten years, were escorted by sixteen policemen to the Kanagawa ken on the 26th ultimo.

A FEW days ago the government received a telegram from Italy announcing that Prince Kita-Shirakawa-no-miya, who was in that country for many years, will shortly leave for Japan.

(From the *Mai-Nichi Shinbun*, 29th May.)

The following is a copy of a letter from a police inspector in Kagoshima:—

"Since we captured the strong and commanding position of Tawara-zaka, on the 20th March, the insurrectionary troops have fought a number of times most desperately at Kidome and other places. On the 15th April, a band of spies joined the castle garrison. We are much ashamed at having been behind the forces which relieved the castle of Kumamoto. On the following day after that memorable event General Yamagata, war counsellor, and a number of Lieut.-Generals at the head of their troops, entered the castle, where the strains of music demonstrated the joy manifested at the timely succour. On the 15th April, we landed at Kagoshima and started soon afterwards to arrest Hana-Yama, one of the distinguished rebel leaders, with many others, who were just returned from Higo in order to enlist new soldiers. The former escaped and it is not yet known where he is. Out of the Kencho officials, Migimatsu, police inspector of the first class, Matsumoto, director of the first section of the Kencho Imafuji of the fourth section, and Minoda of the sixth section, were arrested and at their examination they confessed as follows:—

The following is the confession of Migimatsu, police inspector of the first class in Kagoshima:—

"I was director of the 5th section of the

Kencho. But since Saigo left Kagoshima at the head of his men, I was ordered to fill the place of Nakajima, ex-police inspector. Large numbers of police were enlisted by the order of the Kencho, of which I acted as director. I am not aware who it was that penetrated into the arsenals and seized the ammunition, but they must have belonged to the Shi-Gakko. I was not empowered to take any steps against them. The arrest of Nakahara and others was ordered by Nakamura, and two others, Eire and Kono examined them. I knew nothing about them until their confessions were brought to me, which I sent to the local Saibansho. When Saigo left Kagoshima, his men numbered about 20,000. About 5,000 soldiers were also raised by Etsumi and Beppu, who returned from Kumamoto, during its siege, and they were ordered to follow them to the seat of war. Out of those who returned from the north, Katsurashiro and Nakayama are the principal. I have heard that Hanayama returned also as far as Okuchi, but I do not know where he is now. Since the sudden death of Tahata (Vice Governor) there was no Governor, and the directors of each section determined to take matters into their own hands. There is no large quantity of ammunition now preserved in the ken. The rice is stored in the godowns on the opposite side of the Kencho building, but what quantity is there stored I cannot say. Since the siege of Kumamoto was raised, Saigo and others reassembled in Hitoyoshi and on the Bungo and Otsu roads. I have heard that about 800 of Saigo's men were already lost, but I do not know the number of wounded. I rendered a great deal of assistance in enlisting soldiers during the siege of Kumamoto."

The following is the confession of Matsumoto director of the first section of the same ken:—

"When Saigo and others were going to march, at the head of a large army, for Tokio, the ex-Governor Oyama ordered me to be responsible for transports coolies, and horses. I did as I was ordered by the ex-Governor, who held a meeting and gave me instructions to the effect that the large quantity of ammunition secreted in the monastery of Dairoji, Yoshino and other places, was to be transported to Saigo in Kumamoto by me. But as I could not do so myself, I replied that I would transact the business on receiving orders from Tahata, who was to remain in Kagoshima. The ex-Governor said again that the Vice-Governor was not to be obeyed, and wished me to transport the ammunition after his departure. A message from Kumamoto arrived demanding ammunition. Gunpowder was sent at various times until before the imperial armies landed in Kagoshima."

The following is the confession of Minoda director of the sixth section:—

"During December of last year, I and Kamada, of the same section, was secretly instructed by the ex-Governor Oyama that 20,000 yen, which belonged to Saigo, and 60,000 yen, which were in the hands of the kencho, 80,000 yen in all, were to be given to Saigo. When the latter left Kagoshima on the 16th February, I handed him that money. After his departure, Kamada filled the place of director, and he sent him large sums of money belonging to the government at different times. When Fuchibe, Etsumi, Beppu and many others returned from the seat of war, in order to raise money, I and Kamada negotiated with them. As large amounts had already been sent out, there remained no money in the kencho and we ordered four or five rich merchants in the city to collect as much money as they possibly could. But when Saigo left, he took away a large sum of money with him and

the citizens were suffering from the scarcity of coin. So, we issued notes to the amount of 60,000 yen. Of these 40,000 yen are already current in the ken and the remainder are in the kencho. About 39,968 yen were collected by some rich merchants in the city, which were immediately sent to Saigo through the kencho."

At dawn on the 27th ult., a fire broke out at Uomachi, Hamamatsu, on the Tokaido, and its course was not arrested till twenty-six houses were burned.

THEIR Majesties the Empress and Empress Dowager made another large present of lint, tobacco, eggs, and hospital comforts on the 19th instant to the wounded soldiers quartered at Osaka.

OUT of about seventy shizoku in the Nagano-ken, who deserted their homes, during last month, many have been arrested. Ten of them are rumored to be concealed in Tokio.

MR. FURUYA, ex-editor of the *Kofu Nichi Nichi Shinbun*, was summoned to appear before the local Saibansho on the 24th ult., where he was condemned to a fine of twenty yen for some violation of the press law.

ONE of the sons of Prince Arisugawa-no-miya left for Kumamoto on the 26th ult. He proceeds to the seat of war.

THE Risslichea (Independents) of the Kochiken have petitioned for leave to form themselves into a militia. Their request was refused by the local authorities; and this refusal is said to have created great excitement among them at first. They are now reported to be quiet, and to have admitted that they were in the wrong to dispute the orders of the authorities.

THE following figures relative to the number of killed brought to the various hospitals from the 24th of February to the end of April, together with the number of those who have been under treatment, died, discharged, &c., for the same period, have been published by the *Nichi Nichi Shinbun*.

	Killed.	Wounded.	Died	Discharged.	Remaining.
Officers	98	378	61	30	197
Petty Officers	262	1,179	121	53	743
Keibu	9	38	2	...	23
Soldiers	1,498	6,580	598	105	4,384
Police	66	280	25	27	158
Coolies	43	162	13	27	79
Miscellaneous	159	163	4	27	
	2,135	8,780	824	259	5,584

H. E. OKI, Minister of the Judicial Department, will shortly leave for Fukuoka.

On the 28th ultimo a meeting was held by the authorities of the Home Department, in consultation upon the public expenditure. The Governors of the Kanagawa, Yamanashi, Yamagata, Gunba, Chiba, and Sakitama ken were present at the meeting.

A TELEGRAPH office will shortly be opened in the prosperous town of Tomioka.

A BAD febrile disease prevails in the Kanagawa ken.

On the day of the late *Naikaku-komon* Kido's death, the rank of *Shonii* was presented to him and 5,000 yen to his family to defray the expenses of the funeral ceremony. He was buried at Shokonba in Reizan.

IWAYA, judge of the 6th class, and four subordinates, are expected to take ex-Governor Oyama of Kagoshima and twenty other political prisoners to Nagasaki in the *Hiroshima-maru*, which leaves Yokohama to-morrow.

H. E. KURODA, President of the Agricultural Department, will probably shortly remove to the island of Yezo.

THE *Mai-Nichi Shinbun* writes giving the latest intelligence of the insurrection as follows:—On or about the 23rd ult., 2,500 insurgents from Hitoyoshi castle joined the forces besieging the imperialists in Kagoshima. They are commanded by Murata.—Kushigi Hiokigori, in the province of Satsuma, lies on the road between Kagoshima and Akune, and is one of one hundred and twenty-four castles in the same province. To the east of Kushigi stands the precipitous range of the Satsuma mountains, while the sea of Hatorizaki lies in the opposite direction. This is one of the strongest and most commanding positions in Satsuma, and a famous battle field of ancient times. Here Ishu-in Tadanobe, with 3,000 men, kept at bay the large armies of Tachibana during the expedition of the Shimadzu clan under Toyotomi-Hideyoshi. And here the present insurgent armies seem to desire to hold in check the imperialists who are marching against them both from Kagoshima and Akune. The rebels have constructed extensive fortresses, which connect the range of Satsuma-yama and the sea of Hatorizaki, and have mounted many cannon on them. Further, they are busily engaged damming up the two rivers, Aragawa and Minatogawa, which flow to the north and south of Kushigi.

The following extracts from a letter from Kagoshima, dated the 20th ultimo, are given in the *Hochi Shinbun*:—The imperialists in Kagoshima have erected a strong stockade of bamboo for a considerable distance along the river Kotatsu-gawa, the bed of which is also planted with sharp pointed bamboos, in order to impede the insurgents in crossing the river. Cannon have been placed on the opposite bank. It was thought that no rebels would attempt a place so strongly defended. But some of them have repeatedly approached the stockade, and tried to sever the straw ropes binding the bamboos together.

All the inhabitants of Kagoshima, even to the women and small children, are in favour of the insurrectionary armies, and have left their homes in the city, taking all their goods. Nothing was left behind them. The imperialists allowed the aged men, and women of all ages, to pass through their lines without a pass; and three refuges have been established for the relief of the poor. Thither a crowd of destitute persons come daily, and having eaten heartily go away. Still they manifest no feeling of gratitude to the imperialists. Lieutenant-General Oyama left for Kumamoto on the 20th to direct the movements of troops.

NOTIFICATION—No. 13.

To Shi, Fu, and Ken:

A strict order has already been issued prohibiting the purchase and sale of arms and ammunition by private persons. As a rumor is current that the Satsuma insurgents have sent out some Hinga men to Shikoku and Osaka in order to purchase lead and gunpowder, strict attention is called to the said order.

SANJO SANEYOSHI,

Daijo Daijin.

27th May, 1877.

THE *Mai-Nichi Shinbun* says:—During the night of the 31st ultimo, two robbers armed with swords, who are supposed to be the men who recently broke gaol in Tokio, forced their way into the prison in Mayebashi,

Joshiu, under the jurisdiction of the Gunba-len, where about 150 convicts were confined. The two daring rascals ordered them to take up arms against the authorities, threatening to kill those who refused to do so. Each of the convicts armed himself with a club, a saw, a spade, or anything else which they happened to lay their hands on. They broke through the wooden fence surrounding the gaol and prepared to attack the Kencho, where a few officials on night-watch were waiting for them, together with twenty or thirty policemen assembled from the Police Station. By the time the convicts approached the Kencho, notice had been sent out of the threatened attack; and about eighty officials, shizoku, and heimin had come to guard the office. Learning this the convicts changed their minds and returned to the prison, which they razed to the ground; and then proceeded to attack the gaol at Iwahana. Meanwhile they commenced to quarrel and fight among themselves, and in the struggle two of them were killed and two others wounded. The two ringleaders deserted them, and the others did not know what to do. About one hundred and thirty of them gave themselves up at the police station, and good order was restored before dawn.

THE FOREIGN GOODS STORES.

(From the New Tokio Hanjōki.)

It is not long ago since foreign ships began to arrive in Yokohama, but now there are in Tokio as many foreign goods as there are hairs in a foreigner's beard, and the goods' stores are built as thick as the smoke which issues from the steamers. There are dry goods and millinery stores, wine and shoe shops. Almost eight-tenths of every street are occupied by those stores and shops, making a new and great prosperity. Why foreign goods are so numerous imported and why they are so much in fashion are questions which naturally arise, and may be easily answered. Thus the best articles are very costly, but inferior ones are very cheap; so the wealthy folks love the former because they are so costly and rare, while the poorer classes use the latter because they are so cheap and handy; and so between the nobles and the jinrikisha-men, there is no one who cannot wear a cloth made of foreign materials. Look at an intelligent native of the present time. He has a stone house, carpeted floors, chairs to sit upon, and beds on which to lie. He has also woollen clothes on his body, leather boots on his feet, a tall hat on his head, and gold rings on his fingers, while his mouth is perfumed with the fragrance of a cigar, his throat is wet with beer, and his mind is full of foreign literature; so everything on and about his person is all foreign, except the color of his skin and hair, and if he could only dye these he would make a perfect foreigner! Thus it will be seen why foreign goods stores are so popular. The red chemise worn by a native lady is always foreign crape, while the striped coat of a bantō is never made of Japanese cotton. A calico shirt has become the usual dress of jinrikisha-men, and black camlet is used for the everyday belt of an aged lady. The maid-servant's greasy body, which had been left unwashed for a long time, has been at length cleaned by soap, while the man-servant's dirty cloth, which had served him for full seven years, has given place to one of cheap muslin. The appearance of lamps has left the andon in outer darkness, and the use of matches keeps the flint and steel silent in one corner of the kitchen. The introduction of dye-stuffs has created the "quick dyeing"

(hayazomé) business, and the importation of metal types has established printing offices. Machine-knitted gloves are found to fit every body, while buttons fasten anything as one desires. The gata dealers have changed their business to that of shoe-makers, and the bow and arrow makers have turned to whip making. The cake shops have increased in number, because sugar is plentiful, and the flour merchants are very busy, because bread is in fashion. Everything has some foreign odor about it, and even those native woven goods which are noted for excellence, have come to have some foreign threads worked into them.

Of all foreign goods smaller articles, such as cups, dishes, jewelry, looking glasses, umbrellas, &c., are most in demand; so the shops where they are kept have the most prosperous aspect. Such a shop always has in front an oil-painting of a beautiful lady with half covered breast, and on the wall a large looking glass, in which every passenger along the street is reflected. The wine bottles, glasses, and dishes are heaped together in one place, glittering like snow in sunshine, while articles of yellow gold and white silver are arranged in order, close to blue and red hued precious stones.

The goods being foreign, the customers are mostly in European costume. One party discusses the qualities of the articles in the foreign language, while another makes his calculation on a slate. That youth who purchases a ring selects the smallest one; perhaps it is for his sweetheart; and the profligate priest who buys the cologne water finds out the best by testing the bottles with his nose: perhaps it too is for somebody he loves.

A countryman standing before the shop, discovers, on the opposite wall, a man exactly like himself, who nods his head and turns his face, as the farmer does. So the latter is quite puzzled or rather vexed at such a sight and says to the banto, "pray don't look at me in that strange way, but tell me who is there mimicking me?" "Why, nobody is here just now, besides you and myself, sir," replies the banto, who is puzzled at the question. "Don't try to deceive me," says the farmer, "for I hear that foreigners send us very strange things which have something Christian (meaning magical) in them. Perhaps you keep some of them. Look at that man there mimicking me. Surely this is magic! well, I will run to the Fuchō to report it directly!" "Oh, I see now!" exclaims the other at length understanding what the farmer meant. "It is your own image reflected upon the looking glass."

The farmer does not believe this easily, but stretching out his hand feels the material to his own satisfaction, and then mutters meditatively, "then Western countries are Shinto too, are they not?" "No sir," says the banto, "they are Christian, but why do you think otherwise?" "Well," replies the meditative farmer, "our Nippon is the holy land created by the kami, whose souls are but mirrors: therefore we esteem mirrors very much; but I have never seen in all my life one so large as that, and surely it is impossible for mere human beings to make such. It must be the work of several kami, or of the magic art, which deceives people. Well, I shall go to the preacher for an explanation!"

A man coming into the shop, fixes his eyes upon the pictures of beautiful ladies, as if he were quite fascinated by them. "How skilful are the Western people in the art of painting!" exclaims he, turning to a companion who has followed him in. "See what lovely faces and graceful figures! Truly art exceeds nature!" "Indeed, it is so," says the other, "but these are copied from photo-

graphs." "But do you think there is really such beauty in Europe?" "Yes of course! One picture there is one of Cleopatra, Queen of Egypt, and the other is Victoria, Queen of England. I have read about them in my 'English Grammar.'" "Don't tell me stories, grammar is different from history."

"But what I read, was an old grammar, which is out of use now." The banto who has been listening to the conversation, now suggests, "the book you read, sir, may be neither a grammar nor an English history, but one translated into Japanese." The banto has hit the very truth.

LOCAL CORRESPONDENCE.

We do not hold ourselves responsible for the opinions expressed by Correspondents.

CHINESE TENANTS AND THE KOBE CONCESSION.

To the Editor of the Japan Gazette.

MR. EDITOR:—Municipal questions being now the order of the day at Yokohama I think this a favorable time to draw the attention of the public and of those specially interested to a municipal question which concerns the Kobe Concession.

In the first place I will venture to express my belief that you will not scorn to pay some attention to the Kobe Concession because we are here in Yokohama: foreign concessions are not so very numerous in Japan, and they have, besides, enough interests in common that what concerns one of them must in some degree be of general interest to them all. And, as I know by experience that the columns of your journal are always open to questions of this kind, I sincerely hope that after mature examination, you may be able to endorse my views, and give afterwards to my feeble efforts the support which is necessary to enable them to produce some result.

You know, as I do, that there exists at Kobe what we do not possess in Yokohama, a Municipal Council. Is this a good? Is it an evil? I am disposed to say that it is a good; and, further, that it would be a much greater good if all the members of that Municipal Council were exclusively elected by the suffrage of those concerned, which is at present not the case, as the Council is composed, in the first place, of the Governor of Hiogo and of the Consuls, that is to say eight or nine voices to only three members elected by the residents.

This notwithstanding, the Municipal Council has, we must admit, rendered signal services to the Kobe community, excepting always in one instance in which it appears to me to have exceeded its functions in a manner as evident as it is unfortunate for those concerned. I allude to the prohibition to proprietors of land and houses in the concession at Kobe, to let or sell to Chinese.

Since the first years of foreign settlement in Kobe, when everything seemed to presage a future full of prosperity: when people asked themselves in what direction the growing town would be able to extend; I even then sought for the serious reason which could have induced the Municipal Council to exclude the Chinese from the foreign concession, but in vain: for even to-day I do not understand the object which was had in view in coming to such a determination.

Was it because the presence of Chinese in the concession might incommode those who thought they had landed in a veritable Eden, which certain Chinese habits and industries might pollute?

Or was it because others thought by such action that they would "put spokes in the wheels" of rivals as dangerous as Chinese were likely to prove in commercial matters?

The fact remains that the Chinese were compelled to look for abodes elsewhere than in the foreign concession, although they were themselves foreigners, and under the same category as Europeans and Americans: that is to say that they also were objects of a power having a treaty with Japan.

Perhaps the Chinese have lost something by this; but it is certain that foreigners have lost much more since the very commencement. In effect the Chinese were then authorised to locate themselves in the Japanese town, that is to say more within range of business, and from the first day they obtained possession of the retail trade to the detriment of the stores kept by other foreigners, without taking into account the damage they might do to wholesale trade. As for the proprietors, they saw a great number of good tenants escape them.

There, as elsewhere, the small fry, those who had invested their savings in a speculation which promised largely, were crushed by the great, those who disposing of fortunes which in the majority of cases did not belong to them, had only in view their personal advantage. Without doubt it was these latter, the only persons too often possessed of any influence with the Consuls, and the only persons also who had any chance of entering the municipal guest-chamber, who were the authors of a measure as arbitrary as it was prejudicial to the interests of all the smaller speculators, proprietors or traders.

I have just said that the prohibition to proprietors to let or sell to Chinese was arbitrary. That is indisputable, and to convince oneself of it it is only necessary to cast one's eyes upon the titles of property handed to the proprietors of lots in the concession of Kobe.

Article 3 says:—"That every transfer of the said lot No. — or any portion thereof shall be made to no other person than a subject or citizen of a Power having a Treaty with Japan." What is to be concluded from this, except that every proprietor has the right to sell all or part of his property to any foreigner subject of a power having a treaty with Japan. And I do not hesitate to assert that this right which is conferred by the title to the property still exists in spite of the decision of the Municipal Council, which has exceeded its functions in promulgating a prohibitive measure as regards the Chinese, just as much as it would have done had it interdicted the concession to the subjects of any other power having a treaty with Japan.

But you may say to me, Mr. Editor, "How is it that those who thought themselves injured did not then insist upon their rights?" The answer is very simple: it is that the prohibitive measure only injured small speculators—that is to say those whose influence is of no account.

I must not forget, either, to point out a flagrant injustice, namely: that those who forbade so arbitrarily the foreign concession to the Chinese, had, for the most part a large number of them in their service. Naturally these Chinese are an exception, and their masters have the privilege of being able to lodge them in the foreign concession at the same time as it is intended to prevent proprietors from availing themselves of the same right towards Japanese tenants. Nevertheless a Chinese tenant is generally worth as much as a Chinese servant, who besides is of no importance to any one but his master. In truth this pretension is ridiculous and unjust to the last degree.

However, there is pardon for every sin. But if it is never too late to do well it is often too late to amend a wrong done.

I propose nevertheless that, considering the enormous depreciation which property has undergone at Kobe during many years past, the members of the Municipal Council shall revoke a decision come to by their predecessors, and that in good faith, and without dread of being troubled by the Municipal Council, it shall be admitted and recognised once for all that Kobe proprietors have the right to let or sell their lands and houses to Chinese subjects, just as is done in Yokohama and the other open ports of Japan except Kobe. Such a liberal decision evidently could not raise the value of property in Kobe to the level of the years when all appeared so prosperous, but it would have the effect of tending to keep it up while waiting for better times.

Besides, must it not be admitted that the presence of Chinese in the concession would not bring with it any serious embarrassment. Let us see what had taken place at Yokohama and elsewhere. The greater portion of the Chinese have grouped themselves together in certain quarters: and as for those who have settled in more frequented districts they have not there in any way incommoded their neighbors, nor rendered the concession hideous by buildings less respectable than those of some of their European neighbors. It is also well known that in very rare instances only have fires originated in Chinese houses.

Beyond doubt those quarters in which the Chinese population is a little numerous are not the most pleasant to dwell in; but who can gainsay that the Chinese, by becoming possessors of property have by that very fact contributed to raise the value of landed property in Yokohama, and also that the value of property would fall considerably, if this concession were all at once prohibited to the Chinese.

The fear of fire in the Japanese town would probably bring a number of Chinese into the Kobe concession, and I am convinced that many proprietors, even among those who, at first, were opposed to what I propose to-day, would be very happy now to let or sell to Chinese the property with which they do not know what to do at this moment, and which is every year saddled with a tax equal to, if not greater than, the actual value of the lots.

If my proposition appears sensible to you, I recommend it to your care, Mr. Editor, and I am convinced that your efforts will easily overcome a resistance which should no longer exist to-day, at the same time as you will have acquired a right to the gratitude of a large number of persons concerned, among whom figures.

Your obedient Servant,

L * * * * *

Yokohama, May 30th, 1877.

POLICE REFORM.

To the Editor of the *Japan Gazette*.

DEAR SIR:—There is one fact in regard to the Municipal affairs of the foreign settlement of Yokohama which I think serves to point out in language which cannot be misunderstood the necessity of a foreign inspector or director of police for the safety and comfort of all residents in the foreign town, and not only of an inspector, but also of a larger number of foreign policemen than we have had on duty for several years past.

I refer to the inefficiency of the native police in cases where a brawl occurs among drunken men like the one a day or two ago in Homura Road. Persons who saw the beginning of that row assert that several native policemen, who were at first spectators of the fracas, as soon

as they saw that there was going to be a "big fight," scampered off as fast as their feet could carry them.

About a fortnight before this I chanced to pass the same locality one evening, when a dozen or twenty seamen were having a social "knock down" in the middle of the street. I tried to avoid them and pass by at the side of the street, but suddenly there was a charge from another direction, so that I was instantly knocked into the middle of the battle, and had to make a desperate scramble, part of the time upon all fours, before I could extricate myself. When I had finally made good my escape I saw some native policemen looking on, and asking one of them why he did not interfere to preserve the peace in the public street, he replied that there were some of the comrades of the drunken men taking care of them, and therefore it was all right! I attempted to read the policeman's numbers, thinking to report them for neglect of duty; but when they saw this they ran away, leaving the battle in the street still going on. In other cases the native police have often been known to exceed their duty and maltreat foreign residents.

This, with their notorious inefficiency to catch thieves and burglars in the foreign settlement, although they are much more efficient in the native town, goes to prove the necessity of a reasonable staff of foreign policemen with a foreign chief, for the foreign town.

I am also decidedly of opinion that the land-taxes which we pay to the Japanese Government ought to provide police under foreign control, as well as for repairs, cleaning, and lighting of the streets. I am sure that there are those in our midst who would be willing to undertake to do all this and more, if they could receive the yearly land-taxes of the foreign settlement as remuneration for such services.

Yours sincerely,

PEOPLE'S RIGHTS.

Yokohama, June 1st, 1877.

LAW REPORTS.

IN THE U. S. CONSULAR-GENERAL COURT.

Before Gen. T. B. VAN BUREN, *Consul-General*.

(Wednesday, May 23rd 1877.)

E. B. WATSON vs. WALSH, HALL & Co.

JUDGMENT.

This is an action to recover the sum of \$16,365, the alleged value of 100,000 gunny bags, interest, expenses &c., which plaintiff purchased of defendant, but which it is claimed are "old, damaged, not equal to sample, and unfit for packing rice," for which use they were bought, and are "Therefore of no value to plaintiff."

The answer sets up that the defendants in making sale of the property in dispute, were acting as agents for other parties and not for themselves. That the bags were sold by sample and were not warranted to be of any special quality or in any particular condition; that the money received for them was transmitted to the owners before the commencement of this action; and that the plaintiff has suffered no damage in the premises. The evidence establishes the following facts: That in February 1876, the plaintiff purchased of the defendants 350,000 gunny bags, a few of which were delivered in Yokohama, but the great bulk to the plaintiff's agents in Kobe; that samples of the bags were drawn in the usual manner from the dif-

ferent bales and placed in the possession of the plaintiff; that with the exception of a few loose bags rejected as being torn, stained, and otherwise unfit for use, all the bags, being in bales securely bound, were accepted by the plaintiff and paid for; that thereafter upon opening the bales a large proportion were found unfit for the uses for which they were intended. Whereupon the defendants were notified and a survey was held in November 1876, at Kobe, which established the fact that a large number of the bags were second-hand, stained or impregnated with bone or other dust.

I find also that with regard to all the bags complained of, the defendants were in fact simply acting as the agents of the owners, which fact was sufficiently communicated to the plaintiff, and that the proceeds thereof were duly transmitted by defendants to their principals with the knowledge of plaintiff, before the examination by him of the bulk of the bags. This clearly appears from the fact that a portion of the bags sold were specially declared to be the property of the defendants, and the plaintiff agreed to pay for these particular bags a higher price than for the others, and also that in the memorandum given to plaintiff, the bags now complained of are designated as sold on account of parties represented by their initials, and from the further fact that the last payment was made by the plaintiff according to his own testimony before the 23rd of March, and the complaint of their turning out bad was not made until the 20th of July following.

This perhaps might be considered sufficient to dispose of this proceeding, but it seems to me proper to examine into the merits of the cause itself to ascertain if the plaintiff has in law or equity any just claim on account of the injuries complained of. That the plaintiff has been greatly deceived and injured through his contract appears to me clear, but that this deception and injury have been caused by the defendants I cannot gather from the evidence. The shippers or packers of the goods it seems to me are alone responsible for this gross wrong.

So much of the evidence as connects itself with the samples received by the plaintiff goes to show that they were never themselves carefully examined by him and were never compared with the bulk they were supposed to represent.

His reason for this neglect is that feeling grateful to the defendants for certain kindnesses theretofore received, and having the utmost faith in their commercial integrity, he thought he was dealing in entire safety. It will be found, however, that the counsel for the plaintiff in his remarks expressly repudiates the idea that the defendants knew anything about the condition or quality of the bags confined in the bales, or in any manner knowingly and wilfully injured the plaintiff by selling him bags unfit for use; and the evidence shows clearly that they had no knowledge whatever as to the bags, and sold them as described in the invoices, which descriptions were given to the plaintiff in writing together with the samples. Upon this state of the facts, I am very clear the plaintiff could have no legal claim upon the defendants, were the latter the owners of the goods in question. The samples do not vary the written description; the plaintiff was not bound to pay for the goods until examined and found to correspond with the samples, which is the warranty implied in the sale, although it may be true as stated by him

that such examination would have lessened their merchantable value. He chose to receive and pay for the goods without such examination and thereby deprived himself of the benefit of that right unless exercised within a reasonable time after such payment, which was not done in this case.

In fact it is nowhere satisfactorily shown that the bulk of the goods differed in quality from the samples. Some of the latter when examined in Court proved to be of very inferior quality and in some cases unfit for the purposes required by the plaintiff; and others were not produced, being represented as lost.

The maxim *Caveat emptor* it appears to me must apply in this case. The plaintiff received the samples, and without examination or requiring any other warranty from the defendants accepted the goods and paid for them.

"The rule to be derived from all the cases is that where upon the sale of the goods the purchaser is satisfied without requiring a warranty, he cannot recover upon a mere representation of the quality by the seller, unless he can show that such representation was bottomed in fraud." (See Chitty on contracts, 10 Am. Edition, page 477, and cases there cited.)

In this case, as I have shown, there is no pretence of fraud on the part of the defendants; and as the plaintiff neglected to avail himself of his right to examine the goods before payment, or to exact any warranty as to their quality except that they should agree with the samples, in the language of the decisions he "cannot recover."

The complaint is therefore dismissed with costs of Court, no other costs to be allowed.

IN THE JUDICIAL COURT AT KANAGAWA.

Before MR ASAINA KANSUI, Vice President.

Thursday, May 31st, 1877.

C. BRAUN vs. KOJIWO SHOKITSU.

Mr. Dickens appeared for the plaintiff. The defendants were represented by a Japanese lawyer.

The judgment in this case reviewed at length the circumstances which gave rise to the action, but as they have already been reported it is now unnecessary to publish the lengthy summary preceding the decision, which is as follows:—

Under the circumstances, stated the sum of \$10,093 and 75 cents, the value of the goods contracted for are to be paid by the defendant to the plaintiff with interest at the rate of 1½ per cent. per month according to previous agreement between the plaintiff and defendant, from the 1st day of the 2nd month 9th year of Meiji, together with expenses of storage, fire insurance, &c., and the defendant must thereupon take delivery of the 4,750 pieces of shirtings referred to.

The costs of this suit the defendant is not to pay in virtue of existing arrangements between Japan and Great Britain.

29th day of 5th month, 10th Meiji.

Yokohama Saibansho.

IN THE DANISH CONSULAR COURT.

Before E. DE BAVIER, Esq., Consul-General,
VAN OORDT and VAN TORP, Assessors.

Saturday, June 2nd, 1877.

R. CONNOR vs. J. EWALT.

This case was resumed from the 21st April, when, it will be remembered, the plaintiff brought an action against the defendant for \$20 damages in consequence of a collision between the two pilot boats, *Hase* and *White Cloud*.

The defendant appeared personally, and in answer to questions put by the Court, admitted that he had no light on his boat at the time of the collision; and that it was in the twilight when the accident occurred. He could distinctly observe the plaintiff's boat all the time they were sailing towards the vessel; and, in fact, they were so near to each other that he could distinctly hear the conversation carried on in the other boat. He, defendant, admitted that the *Hase* had her lights up at the time of the collision.

The Court then rendered the following judgment:—

In the case of R. Connor vs. J. Ewalt, the Royal Danish Consular-General Court in Yokohama, in its sitting of second June, 1877, in which have taken part Ernest de Bavier, Consul-General, as President, C. W. Van Oordt and O. Van Torp, as Assessors, has decided as follows:—

Considering that from the evidence of both foreign and Japanese witnesses on both sides, it is clear that the two pilot boats could easily distinguish each other at the time of the collision and that therefore this collision was not occasioned through the want of a light on the *White Cloud*. Considering further that the evidence is not sufficient to show who was to blame for the collision, as both were racing to a ship, the Court therefore decides that the case be dismissed, without costs.

The Court is further of opinion that Captain Ewalt is entitled to his full pilotage, but at the same time reprimands him for not having had a light as provided by the pilot Regulations under which he holds a certificate.

HONGKONG.

Our advices from Canton state that the water is not the only element which the unfortunate people in the flooded districts have to fear. Daring robbers band themselves together, and, taking advantage of this calamity, fit themselves out in boats and attack the suffering localities, the inhabitants of which have mostly taken refuge on heights. Wherever the robbers cannot satisfy themselves with property, they carry away the young females. Many such daring exploits have been reported, and the number of young female captives are stated at between 50 and 60.—*China Mail*.

Rice is getting very dear in and about Canton just now, as, apart from the small stock in hand, the new crop has been destroyed by the flood, and unless measures are taken now to get a supply from outside, a famine may follow the flood.—*China Mail*.

The disaster from the flood in the up-country of Canton is becoming very serious, and great misery prevails. The Viceroy has despatched two Mandarins with 500 *shek* of rice and 2,000 taels in silver to the suffering districts to relieve the sufferers. The Committee of the Chinese Hospital have issued circulars inviting subscriptions. If the rain continues, the flood will extend even to the heart of Canton. The Chinese hope that the bank of the river at Song Yuen Wai will not succumb to the influence of the water, otherwise no part of Canton, it is calculated, will be free from inundation, exception the very high levels.—*Idem*.

A Dacca (Indian paper says that manufacture is in full operation in all the tea districts, and that the outturn is estimated at from 30 to 35,000 lbs.—*Daily Press*.

FOOCHOW.

A thief might have been seen on May 17th, near the Canton Joss House, suspended by both thumbs at a slight distance from the ground. The wretched man was caught perpetrating a petty theft, and after having been severely beaten by the enraged populace, was subjected to the inhuman torture above described, and then liberated.—*Foochow Herald*.

The first shipments to London of new season's tea—consisting of about 2,000 boxes and 350 half-chests—were forwarded per S.S. *Douglas* on the 15th instant, for transshipment at Hongkong. A larger quantity will, it is expected, be shipped per S.S. *Deucalion* due here in a few days, and bound for London direct—calling at the usual intermediate ports.—*Idem*.

Rather a serious affray between two rival gangs of coolies took place on May 17th, in front of a tea firing establishment near the premises recently occupied by the Great Northern Telegraph Company. It appears that the members of one of these guilds had been lately employed by the proprietor of the Tea House above referred to, and that a rival confederacy had encroached on what they conceived to be their ground. The result was a free fight, lasting nearly a quarter of an hour; with knives, spears, swords, &c., ending in serious injury to at least one man and the wounding of several others. A petty mandarin was sent for by the proprietor of the Tea House, and the mob quickly dispersed without giving any further annoyance.—*Idem*.

Shipping.

ARRIVALS.

- May 23, H. M.'s S. ship *Egeria*, Captain Douglas, 1,011 tons, from Hakodate.
 May 23, Jap. str. *Hirokawa-Maru*, Burdiss, 1,870, from Hiogo, Government Stores, to M. B. M. S. Co.
 May 25, Jap. str. *Thabor*, Pendered, 950, from Kagoshima, to Lighthouse Dept.
 May 26, Brit. schr. *John McLean*, Lucy, 196, from Nagasaki, Coal, to Walsh, Hall & Co.
 May 27, Am. schr. *Mary Jane*, Brinkmeier, 165, from Kobe, General, to E. C. Kirby & Co.

- May 27, French corvette *Talisman*, Capt. St. Iliare, 1,400 tons, from Kobe.
 May 30, Brit. str. *Malacca*, Edmonds, 1,709, from Hongkong, Mails and General, to P. & O. Co.
 May 31, Frch. str. *Volga*, Rolland, 1,502, from Hongkong, Mails and General, to M. M. Co.
 May 31, French Ironclad *Atalante*, Captain Galliard, from Hiogo.
 May 31, Brit. str. *Teviot*, Nisbet, 1,262, from London via Hongkong, General, to L. Kniffier & Co.
 May 31, Jap. str. *Saikio-Maru*, Vroom, 2,145, from Shanghai and ports, Mails and General, to M. B. M. S. Co.
 May 31, H. B. M.'s gun-vessel *Thistle*, Comdr. Pusey, 465 tons, 4-guns, from Kobe.
 May 31, Am. str. *Alaska*, Howard, 4,010, from San Francisco, Mails and General, to P. M. S. S. Co.
 June 2, Swed. barq. *Anna Cecilia*, Fischer, 328, from Takao, Sugar, to Chinese.
 June 3, Brit. str. *Oceanic*, Parsell, 3,700, from Hongkong, Mails and General, to O. & O. Co.
 June 3, Jap. str. *Meiji-Maru*, Peters, 1,010, from North Coast, to Lighthouse Department.

DEPARTURES.

- May 24, Am. str. *City of Peking*, Tanner, 5,079, for San Francisco, Mails and General, despatched by P. M. S. S. Co.
 May 25, Jap. str. *Tokio-Maru*, Dunn, 2,119, for Shanghai and ports, Mails and General, despatched by M. B. M. S. S. Co.
 May 30, Frch. str. *Tibre*, de Girard, 1,009, for Hongkong, Mails and General, despatched by M. M. Co.
 May 31, Jap. str. *Thabor*, Pendered, 950, for Shimonoseki, with stores, war material, etc.
 May 31, Brit. barq. *Seafell*, Campbell, 488, for Nagasaki, Ballast, despatched by Walsh, Hall & Co.
 June 1, Frch. str. *Menzaleh*, Pasqualini, 1,503, for Shanghai, General, despatched by M. M. Co.
 June 1, Am. str. *Alaska*, Howard, 4,010, for Hongkong, Mails and General, despatched by P. M. S. S. Co.
 June 1, Jap. str. *Hiroshima-Maru*, Burdiss, 1,870, for Shanghai and ports, Mails and General, despatched by M. B. M. S. S. Co.

PASSENGERS.

Per Am. str. *City of Peking* for San Francisco:—Mr. and Mrs. R. Power, Mrs. Clark and 2 children, Mrs. Graham, Revd. Mr. and Mrs. E. T. Doane, Miss S. Wyman, Mrs. Winsor, Mrs. Elbridge, Mrs. Johnson, Miss Gasner, Mr. and Mrs. Moore and 3 children, Mrs. Taylor and 2 infants, Miss C. B. Downing, Gen. and Miss Raban, Revd. J. S. Arthur, wife and 2 children, Dr. H. Wikoff, Messrs. W. S. Clark, M. Haroka, T. Iraya, T. Obata, C. L. Jenkins, D. R. Magretti, John Leckie, W. P. Moore, J. C. Phillips, C. P. Melly, A. Kirby, u.s.n., and Lieut. Comd. Clark, u.s.n.

Per Jap. str. *Tokio-Maru* for Shanghai and ports:—Mr. and Mrs. Counts 2 children and maid servant, Mr. and Mrs. Matsuoka and son, Mrs. Nao and child, Lieut. Fukuda, Lieut. Sayeki, Capt. Bridgford, R. M. A., Messrs. Takahashi, Yamanaka, E. Popp, G. Olson, Warburton, Wilson, Yasuda, Ichikawa, Oho, Yoshida, and Sasaki.

Per Brit. str. *Malacca* from Hongkong:—Fleet Surgeon G. F. A. Drew, T. Davis, W. H. Sandersen, C. F. Sandersen; and 16 Chinese in the steerage.

Per Frch. str. *Tibre* for Hongkong:—Madame Aymos, Messrs. Vittor Theophile, Robert Johnston, Kalis, Harada, Young and Imaizumi.

Per Jap. str. *Saikio-Maru* from Shanghai and ports:—His Excellency Mori Arinori, Japanese Minister to Peking, Mrs. Drummond, Captain Bonger, Messrs. Mackenzie, Von Fischer, Gilbert, Beddoes, Akao, Goldsmith, O. Smith, H. Andersen, Gillett, Woodall, Andrew Robertson, Tuck Chow, Lamie, J. Gray, Paymaster Burnside, u.s.n., Lieut. Noel, U. S. S. Lambard Chadwick, and 13 Japanese; and 354 in the steerage. For America: Revd. C. Hartwell, wife and child, Paymaster C. P. Thompson, u.s.n., and E. S. Harris, u.s.n.

Per Brit. str. *Teviot* from Hongkong:—Captain Percy.

Per Am. str. *Alaska* from San Francisco:—Paymaster W. W. Woodhull, u.s.n., wife and 2 children, Chief Engineer C. H. Loring, u.s.n., Messrs. H. Midzu-no-hima, Yoshida Djiro, J. Sampson, Wm. G. Sands and wife, Alex. E. Philippaas and B. Stahl in the cabin. Messrs. G. Musagami, Sugaki, M. Widse, C. F. Gooding wife and child, J. W. Milsted and 6 Chinese in the steerage. For Hongkong: Mr. F. Gillming and wife in the cabin. 150 Chinese in the steerage.

Per Jap. str. *Hiroshima-Maru* for Shanghai and ports:—Mr. Van der Pot, Paymaster Woodhull, wife and 2 children, Mr. Winslow, u.s.n., Mrs. Kami and child, Mr. and Mrs. Sands, Mr. and Mrs. Penney and child, Lieut. Kato, Dr. Novikoff, Mrs. McNutt, Messrs. O. Keil, Schmitz, Rotschke, J. Sampson, and 28 Japanese in the cabin; and 308 Japanese in the steerage.

Per Frch. str. *Menzaleh* for Shanghai:—Mr. Kraetzer.

Per Brit. str. *Oceanic* from Hongkong:—Messrs. Geo. B. Emory, J. Y. V. Shaw, J. Rouselain, Capt. Turner; and 1 in the steerage. For California: Mr. and Mrs. Coates, Miss F. H. Watson, Surgeon Major E. Baker, Mr. Wm. Johnson; and 830 in the steerage.

REPORTS.

The American steamer *Alaska* reports:—At noon of the 26th of May Lat. 35° 12' N. Lon. 158° 48' E. barometer very low and falling fast, there was every indication of a cyclone. At 12.40 barometer 29.10, wind blowing a moderate gale from the South. Let the ship come to, heading to South West, barometer 28.94 Storm path N.N.E. At 5 o'clock barometer began to rise; at 6 o'clock to 10 wind veering from W. to N. W. blowing very heavily; from 10 o'clock to midnight wind changing N. W. to N. and moderating, barometer rising rapidly—ship on her course heading W. At midnight to 6 a.m. of the 27th wind moderated to a strong breeze from the N., barometer 29.86, with a very heavy swell running from the N. E.

The above barometrical deductions are the mean of two barometers and one sympiesometer. With this exception experienced fine weather and moderate winds from the westward during the entire passage.

The Swedish barque *Anna Cecilia* reports light and baffling winds throughout the passage.

The British steamer *Oceanic* reports:—Left Hongkong, on Monday, the 28th May, at 3.50 p.m. Had moderate monsoons to Ocken Island; thence to port light variable winds, smooth sea. Sunday June 3rd, at 7.20 a.m. arrived at Yokohama. Passage 5 days and 13 hours mean time. Average steaming 12 miles per hour.

Yokohama Market Report and Prices Current.

STAPLE IMPORTS.

The import market continues dull, but some enquiry exists for goods on speculation. Prices, however, are so low that no transactions of any moment have been reported except in Yarns of low and medium quality, which the purchasers hold for a rise.

The steamers *Volga* and *Teviot*, both with general cargo from London, have arrived. Transhipped cargo ex *Ava* from Marseilles, and *Copernic* and *Bokhara* from London, is also to hand.

Yokohama Market Report and Prices Current.

STAPLE EXPORTS.

SILK.—This market is completely demoralised, and without any quotation. Future prices will depend entirely upon advices from home.

TEA.—Shortly after the departure of the *City of Peking* on 24th ulto. the Tea Market shewed signs of great weakness chiefly influenced by heavy arrivals and consequent accumulation of stocks. Prices declined from \$4 to \$5 all round except on the highest grades, which are scarce and pretty firmly held. Settlements for the period since the issue of our last Mail Summary amount to pels. 13,000, and as arrivals are coming in freely stocks are ample.

Prices rule as under, but the Market is far from buoyant.

The *Bothwell Castle* for San Francisco and thence per rail taking cargo to eastern ports only, has obtained a full cargo at 2½ cents per lb. gross. The *S. S. Teviot* for New York via Amoy and Suez has filled up her Yokohama allotment at £4 per ton of 40 cubic feet. No other open freight offering.

DESCRIPTION.								PRICES PER PICUL.	REMARKS.

Summary.

OUR MAIL SUMMARY was dated 5th instant, the despatch by the O. & O. Str. *Oceanic*, which left this port at daylight on the 6th for San Francisco, and the P. & O. Str. *Malacca*, which left about the same time for Hongkong with mails for Europe. Since then we have received the following mails:—

Per M. M. *Tanais*, M'seilles, 22 April, arrd. 6 June.
" O. & O. *Belgic*, S. Frisco, 16 May, " 7 June.
" P. & O. *Sunda*, L'don, 27 April, " 10 June.
" P. M. *City of Tokio*, S. Frisco, 29 May, " 17 June.
" M. M. *Tibre*, M'seilles, 5th May, " 18 June.
" P. & O. *Malacca*, L'don, 11th May, " 23 June.

And despatched the following:—

Per P. & O. *Malacca*, for Southampton.....6 June.
" M. M. *Volga*, for Marseilles.....13 June.
" P. & O. *Sunda*, for Southampton.....20 June.

Latest telegraphic advices from London and New York are to the 21st instant.

THE evening before the publication of our last Mail Summary, a serious assault, resulting in fatal consequences in one case, and grievous bodily injury in another, was committed by some German upon French men-of-war's men. On the evening of Sunday, the 3rd instant, a quarrel broke out, in one of the numerous low restaurants in the native town frequented by sailors, between men of the French men-of-war in harbour and those of the German corvette *Elisabeth*. The Germans had the worst of the conflict, and were driven to the hatoba by their adversaries. On the following evening the German sailors obtained leave to the number of about one hundred and twenty. A small number of Frenchmen, about twenty, and they principally belonging to the band of the *Atalante*, were also ashore. They were encountered by some

of the Germans in native town. One of them was killed, and another so seriously wounded that at first his life was despaired of. He is now, however, in a fair way to recover. A full account of the affair will be found on page 9. The *Elisabeth*, which was under orders to proceed, with the German Minister, to Kobe, postponed her departure until after the termination of a rigid enquiry which was held on board, and which resulted in four men being committed for trial. These will be kept under arrest until orders are received from Germany, whither the depositions have been sent, as to how they are to be disposed of.

THE insurrection in the South-West is not yet terminated and appears interminable. The hot weather which has now fairly set in will in all probability slacken the movements of the imperialists, and at the same time give the insurgents time to complete their organisation to obtain reinforcements, and to accumulate supplies. Intelligence from the seat of war has been very meagre; and indeed the probability is that operations have been far from extensive in the past three weeks. We read from time to time in the native journals of victorious advances by the imperial troops, of forts taken and insurgents dispersed, invariably with the most absurdly trifling results, such as the loss of one or two men, the capture of a few prisoners, the acquisition of a small number of rifles, and other trifling advantages. It is, of course, hard to reconcile these accounts with the facts that new levies are constantly called for: that the hospitals are full of wounded; and that Saigo and his lieutenants bid a bold defiance to their foes from the mountain ranges of Satsuma, Hinga, and Bungo. Disaffection, with difficulty kept from open rising, is prevalent among the samurai of other districts. The Tosa men, headed by Itagaki, are said to be clamoring for representative institutions. The Government are under very heavy, indeed incalculable, expenses, which the reserves in Mr. Okubo's budget will certainly fail to meet, and to provide for which, for the time, paper money is being freely issued. That the war should be brought to an end by the concession of reforms which are admittedly much needed is to be devoutly wished. If the demands of Saigo and his adherents are unreasonable, and such as an honest Government could not grant, we can only repeat what we have before said that those in authority would greatly improve their position by making them known. As they fail to do so, the impression prevails that the demands of the insurgents are just and reasonable; and that those in power, by protracting the strife, are betraying the interests of the country in order to keep in power men who are obnoxious, and to defer or to refuse for ever the grant of representative Government.

THE Mitsu Bishi Mail S. S. Company are adding to their steam fleet. Their latest purchases have been the *Candia*, and the *Gadshill*. On the first voyage of the former, now the *Amakusa-maru*, to Kobe, she struck a rock off Cape Diamond, knocking a large hole in her bow at the water line. She was taken to Yokoska Dock for repairs. Captain Dunn, who was in charge, has been removed from his post. The *Kiushiu-maru*, of the same company, ran on the rocks between Shimabara Gulf and Omoro Bay. She was afterwards safely beached and has since been taken to Nagasaki. A rumor is current that, after the suppression of the insurrection, whenever that may be, the Company intend to run a line of steamers to Europe.

TELEGRAPHIC advices have proved that the phenomenon of a tidal wave observed at Hakodate on the 11th ultimo, and reported in the columns of this paper was simultaneous with an earthquake shock which destroyed the town of Iquique in Peru, and with a tidal wave and other marine disturbances on the coast of Australia and New Zealand.

WITH the conviction of P. G. Hansen, a British naturalized Dane, and his sentence to twelve months' imprisonment, the prosecutions of the men implicated in a Hongkong and Shanghai Bank-note forgery perpetrated last January, have been brought to a close. The fourth and last prisoner, Williams, an American, has been discharged from custody.

MR. B. S. LYMAN, Chief Geologist and Mining Engineer to the Japanese Government, has published interesting and useful reports upon the geology and coal surveys of the Island of Yesso. Mr. H. B. Joyner, C.E., F.R.G.S., of the Meteorological Department, has issued tables of observations taken in Tokio during the past year.

A HEAVY gale commenced on the evening of the 11th and lasted till the morning of the 12th instant. H. M. S. *Audacious* dragged her anchors, and came into collision with the Mitsu Bishi S. S. *Chiri Maru*, which vessel suffered considerable damage. This the captain of the *Audacious* was willing to make good; but he has thought it his duty to resist a claim for compensation for damage, and demurrage consequent upon the detention of the *Chiri*, brought against him by the Company. A suit will therefore be heard in H. B. M.'s Court, in Admiralty Jurisdiction, in a few days. The *Audacious* was to leave for the North on her summer cruise two days ago; but her departure has been postponed.

DURING the gale the only serious accident which is reported occurred on board H. M. S. *Audacious*. The stream anchor of that vessel was hurled in board while she was in collision with the *Chiri Maru*. It fell upon Mr. Beatley, the carpenter, who was so severely injured that he died two hours afterwards.

THE COASTING TRADE OF JAPAN.

BY the conditions of the treaty between Japan and foreign countries, no foreign vessel can enter any of the unopened ports without the special permission of the government is first obtained. Foreign vessels have occasionally been chartered by Japanese for coasting voyages, and the necessary permit has been granted after some trouble and delay, but in the majority of cases the employment of the vessel has been for purposes in which the government has been interested. The establishment of the Mitsu Bishi Steam Ship Company rendered the work of obtaining permits for foreign vessels more difficult than before, and virtually only vessels flying the Japanese flag have any chance whatever of employment on the coast of Japan; while the importance and wealth of the Mitsu Bishi Company have overwhelmed all native would-be competitors, and forced the whole of the carrying trade into their own hands. By these means the Company has secured a practical monopoly of the Coast trade, and it is very generally believed that any attempt at opposition would eventually be decided in favor of the Company, supported as it is, or is supposed to be, by a considerable Government subsidy. Under these conditions it may be matter of interest to examine into the influence which this monopoly exercises over the internal trade of Japan.

The service of the Mitsu Bishi Company, owing no doubt to the limited number and small carrying capacity of their vessels, is notoriously insufficient to meet the requirements of the grain producers of the country, who, in consequence are compelled to limit their transactions, not by the quantity of produce at their disposal, but by the limited means of transport the vessels of this Company place at their command. The native merchant in endeavouring to frame estimates for the purchase of produce at one place, and its transport to, and sale at, another, encounters so many elements of uncertainty as to preclude the possibility of even an approximative result of the transaction. He must calculate upon great uncertainty as to the time when a steamer may arrive at the port of shipment: upon the small and probably insufficient carrying capacity of the vessel: upon her being partly loaded on arrival, or of her being engaged for cargo at some later port in the course of the voyage: upon the rate of freight which, varying from causes he has no knowledge of, and has no means of ascertaining or controlling, cannot be calculated upon until actually settled: upon the uncertain length of a voyage, extended or shortened as the orders of the Company, or the caprice of the master, may determine; upon the uncertainty of the *bonâ fide* delivery of the same cargo as to quality and weight, as put on board: upon the difficulty of obtaining insurance which, in the majority of cases, cannot be effected upon vessels officered and manned solely by Japanese; and upon the collateral disadvantages of loss of interest and market attendant upon an uncertain and protracted voyage.

The advantages of greater freedom in the employment of any vessels offering, will be best appreciated when it is known that the difference in freight between the highest estimated charter of a foreign vessel, and the lowest rate of freight charged by the Mitsu Bishi Company for identical voyages, is at least thirty three per cent. in favor of the chartered steamer. In addition to this important consideration of expense, the

employment of a foreign steamer would enable the merchant to calculate to a fine point the quantity of produce he can ship, and the cost per *koku* for conveyance to a port of sale: he can also depend upon the time of the voyage: upon the delivery of the full quantity laden on board without the possibility of it being mixed with other cargo; and he can in nearly every case protect himself from loss by insuring the value of his adventure. The monopoly of the Mitsu Bishi Company has driven every other native-owned vessel off the coast: foreign steamers cannot enter a non-treaty port: consequently, all the produce of the fertile regions close to the sea coast must either be transported in junks, sent overland, or shipped by the Mitsu Bishi Company's steamers, subject to all the elements of uncertainty before mentioned.

Under these circumstances it cannot be matter of surprise that the Japanese people should begin to complain of the difficulties in the way of trade, and should estimate at its true value the policy of the Government in according to one company privileges which entail a heavy burden upon a large section of the mercantile class. The opinion is rapidly gaining ground that the time has arrived when the necessity for some new provisions, calculated to assist the merchant by the additional facilities afforded for the transfer of his produce, should be urged upon the Government. To carry out reform in this respect the Government will be asked to sanction the employment of foreign vessels under restrictions somewhat of the following nature. It shall be optional for native merchants to charter ships of any nationality, for the purpose of conveying produce from and to any non-treaty ports in Japan. Notice of any such charter shall be given to the Custom House, and application be made for a permit to be issued for a term of not less than one month nor exceeding three months. Such permit shall express in clear terms the conditions upon which it is granted, and the regulations to be observed in entering, during the stay in, and on leaving, port. In addition it will set forth the penalties to which the ship will become liable for the breach of any of the regulations. For this permit, a fee, calculated in the same manner as for tonnage dues, will be levied, and upon its delivery to the master it will become part of his ship's papers, and be, in every respect, an efficient passport to be produced upon the demand of any lawful authority. When the vessel is ready to proceed to sea, an officer appointed for the purpose by the Customs will accompany her; and, on the approach of the vessel to an unopened port, he will deliver to the master a distinctive flag, to be hoisted at the fore, signifying that the vessel is duly licensed for the trade in which she is engaged. The authority to use this flag can at all times be ascertained by an inspection of the permit in possession of the master. The principal duty of the Customs officer will be to keep a log detailing the proceedings of the voyage, and to prevent the importation of smuggled goods. On his return he will report to the Commissioner of Customs if the regulations enjoined have been complied with:—should a breach have been committed, the hull of the vessel will be held liable for the satisfaction of the penalties, which must be paid before the vessel can be permitted to clear out for any other port. An intimation of a breach having been committed, made to the Consulate of the nation to which the vessel belongs, is to be considered equivalent to a detainer on the ship's papers.

Should the government consider with favor an application at once just and reasonable, an immense benefit will be conferred upon the people of this country, for it is now sufficiently evident that the growing trade of Japan suffers greatly from the protective navigation policy of the empire. The limited means of transport, and the high freights consequential upon the monopoly before referred to, exercise an almost prohibitive influence on the circulation and dissemination of cereals from the area of production to the seat of demand—the large and thickly populated cities. Legitimate business is checked: capital is rendered comparatively valueless as a commercial medium; and the interests of a very considerable section of the people are sacrificed for the benefit of a Company of steam ship owners, in which the government is, rightly or wrongly, supposed to be directly interested. The concession in favor of the employment of vessels which can carry out the terms of a charter most cheaply will inflict no injury upon the Mitsu Bishi Company beyond compelling them, by fear of wholesome competition, to carry as speedily, as fully, and as economically, as other shipowners are prepared to bind themselves to do. The existing condition of the coasting trade is far from what any other nation, except, probably, the United States, which is hampered by navigation laws almost as unwise as the treaty regulations of Japan, would tolerate, and in this respect the government appears to favor a certain number of individuals who, by demanding freight in excess of that which would be payable in event of open competition, really levy a tax upon trade, and impose restrictions upon business seriously prejudicial to the commerce of the country.

FIRE INSURANCE.

JAPANESE affairs have engrossed the public attention so much of late that matters affecting the common interest have perforce been passed over. In the early part of this year the representatives of nearly all the Fire Insurance Companies, at a meeting which was supposed to be of a private nature, but the details of which could scarcely be kept long secret, agreed to a resolution providing for the survey of all new proposed dwelling houses risks, and of all current risks renewable after the 31st December, 1877. The resolution, among other things, provided that a person nominated by the associated offices should inspect and report upon the form and construction of chimneys and stove-pipes contained in all new proposals for, and renewals of former, insurances against loss or damage by fire. Beyond a brief advertisement of the most uncertain and vague character, no notification was given to the members of this community of the new regulation, of the manner in which it would be carried out, or the Companies who had agreed to the resolution. We now understand that some few of the larger home offices, and one at least of the local offices, have treated the resolution as a dead letter, and left to the others the option of carrying it out or not as the particular nature of the risks offered to them seem to warrant.

Fire Insurance in Yokohama is a very considerable item in the calculations of a merchant, to whom, however, the burden is comparatively small to that which falls upon the proprietor of dwelling houses, or the

tenant who furnishes his dwelling at even very moderate expense. The rates now ruling had their origin in the so called "great fire" of November, 1866, which has ever since been the ready quotation of disaster urged upon those who have attempted to demonstrate the strong reasons existing for a reduction of premium. Many residents who were sufferers by that fire, and most who witnessed it, will bear testimony to the fact that the foreign settlement of Yokohama was then a collection of flimsy shanties built chiefly of wood, connecting, in numerous cases, with godowns of but slightly superior construction; the whole being joined not only to the native town, but to probably the most dangerous quarter—of overcrowded and extra-hazardous surroundings. In 1866 foreigners were not very well acquainted with the peril of proximity to an area of wooden hovels so lightly constructed that the merest misadventure with a match, a bit of red charcoal, a lamp, or any other of the commonest necessary items of domestic existence became a source of grave danger. Business at that time was prospering: "things looked square;" and there are some among us who still regret, the dirty, ill-built, undrained and unhealthy settlement then called Yokohama. In November, 1866, a fire broke out in the overcrowded and disreputable quarter alluded to, and aided by a strong breeze soon spread to the foreign settlement. It is unnecessary now to detail the occurrences of that evil day, but sufficient to say that the dirty, ill-constructed, original settlement was nearly erased from Japanese territory. The exact or even approximate losses of the Fire Insurance Companies have never been ascertained or published, and the estimates of them are so variously stated that, as practical men, we decline to place a particle of belief in the maximum, minimum, or mean. We are, however, satisfied that the loss was severe, and more so when compared with the almost insignificant returns which had been made to the offices from the establishment of the agencies until that time. News of the disaster soon reached the chief offices. Most agents of Insurance Companies being more interested as merchants than as agents, no doubt exaggerated the scene, and the bonfire, for it should properly be called no more when the late fires in Tokio are remembered, was made out to be a tremendous conflagration. The Companies wisely made the most of this, (for is not a large fire an Insurance Company's delight?) and forthwith did they—not exactly increase—but double, the premium hitherto charged. The reconstruction of the settlement was soon begun; and the most important step towards future protection was the imposition of a barrier between the native and foreign settlements. The style of building was improved: wood was discarded: in most instances elegance of design was ruthlessly sacrificed to notions of safety from fire; and ten years later witnessed the foreign settlement of Yokohama fairly and substantially built, and sufficiently separated from the native town to be free from any fire not of unusual, if not impossible, dimensions. In 1870 an adventurous China Company offered to accept risks on godowns at $\frac{1}{2}$ per cent, or a reduction of 25 per cent on the rate then ruling. After considerable delay the home offices, with one or two notable exceptions, accepted the reduced rate; and about the same time they made the munificent concession of 1 per cent on the rates in the settlement for property on the Bluff.

With the exception of lots 60 and 61 in March 1874 and Messrs. LANE, CRAWFORD &

Co.'s premises in January of this year, no fires of importance for the value of the property destroyed, have taken place. True one or two tea-firing godowns have been burnt, and one or two partial losses have occurred in godowns, while the numerous fires in dwellings and small stores, have possessed no merit to entitle them to be called serious losses. This brings us down to 1877 or nearly eleven years after the "great fire," and it is matter of curiosity to speculate upon the aggregate sum the owners of property, or those interested in it, have paid during that time as premium for insurance against fire. We think, after carefully estimating the value, year by year, of the buildings and property in Yokohama, that no less sum than four million dollars has been disbursed in providing for an indemnity against the vastly exaggerated risks of a possible fire. In view of this circumstance, combined with the excessive rates levied by the Insurance Companies, is it at all likely the community will submit without remonstrance, to a regulation so vexatious as that now entailing a critical examination and survey of the buildings which have been accepted without demur for the past eleven years? The community must assert itself; in reality it does say to the Fire Offices,—we are willing to submit to any restriction you see fit to impose upon us, but—we require some consideration from you in return. It is evident you must have either grossly miscalculated the risk anterior to 1866, in then quoting 1 per cent for godowns; or, you do us manifest injustice in now assessing the peril of the present Yokohama at 50 per cent greater than the peril attendant upon the Yokohama of 1866. We pay you premia from twenty to fifty times as great as the rates ruling in London, and the time has arrived when, instead of subjecting your constituency to new conditions, you should consider the expediency of reducing the premium now charged. In London and its suburbs the rates on dwelling houses of brick or stone construction range from $\frac{1}{16}$ th to $\frac{1}{4}$ th per cent; here they range from a minimum on the bluff of $\frac{1}{2}$ per cent to a maximum in the settlement of $2\frac{1}{2}$ per cent on similar risks. A gentleman with furnished residence representing a value of say £2000, residing in London would pay a yearly sum of £2.10s to £ 5, for the same protection from fire as costs him here £30 to £50 on the bluff or in the settlement respectively.

In giving expression to these views, we wish to point out to Insurance Companies the strong feeling amongst the community against their proposed action with regard to chimney inspection. Yokohama has been a rich source of income to the offices, and the growing opinion now decidedly is that the rates charged are exorbitant and out of all proportion to the really good average class of risks offered; and further that some movement should be inaugurated for effecting a material reduction in those rates. The losses of 1866 have long ago been covered by the proceeds of subsequent risks, and we are not now inclined to pay any further attention to the reported liability of the whole settlement to destruction by one fire; a liability vastly exaggerated and opposed to the fair inferences reasonably deducible from the facts.

After the Minister of Foreign Affairs arrived at Kioto, he, on the 11th, attended the Anzaisho. He is staying in Nikkoya, Sanjo-agaru, Kujamachi, Kioto.

EMBARRASSMENT.

IMMEDIATELY after the outbreak of the insurrection which is still so far from being suppressed, the native journals, or those of them at least which may be regarded as semi-official, announced that the Government were so fully prepared for every contingency that the rebellion would be put down within a very few weeks—five or seven. Friends of the Government, partial and enthusiastic natives, and ill advised and interested foreigners re-echoed this prophecy, pooh-poohed the strength of the insurrection, misrepresented its motives, and treated the whole movement as an illtempered, badly organized, rising, which only needed the presence of a few troops and a ship of war or two to quell it entirely. Since that time four months have now elapsed; and each succeeding week has contributed fresh testimony to the utter untrustworthiness of the vaticinations which were so industriously circulated. During four months the imperial Government have racked their utmost resources in men, ships, and money, with the result that they have been able merely to make head to the insurrection. Even those who were so confident of the rapid and complete success of the imperial arms: who hailed the report of every paltry skirmish gained by the troops as a brilliant victory: who declared the rebellion suppressed when SAIGO withdrew his forces from the environs of Kumamoto and transferred the scene of strife to another field: even they will hardly dare to say now that the civil war is at an end. For even on their prejudiced minds the teaching of facts and time must have some effect. The war still continues: the insurrectionary armies are in as great force and as good heart as ever: the flower of the imperial forces has fallen: the gaps caused by the swords of the samurai in the ranks of the Government battalions have been filled by raw levies having little or no stomach for the fight; while SAIGO, another FABIVS MAXIMUS, the DELAYER, hangs like a thunder cloud on the summits of the mountains of Satsuma, Hiuga, and Bungo, drawing unknown numbers of the disaffected to his standard, avoiding all direct engagements, causing his forces to vanish from one place only to reappear in another, tantalising the enemy with his caution, harassing them by marches and counter-marches, cutting off their stragglers and foragers, and waiting for that period of exhaustion which he knows must come to his already wearied pursuers, and which shall find for him the opportunity to treat or strike as may seem best to himself and for his cause.

It does appear, indeed, that the time for which the rebel commander is looking should not be very far distant. In a spirit, the friendliest to the country, we are tempted to say that the sooner it comes the better. For the delay of every additional day in its advent, means addition to the woful chaos which appears inevitable. How are the enormous expenses of this worse than fratricidal strife to be met, those expenses which, incurred on either side, will have to be borne by the already burdened country: expenses which at the end of April, incurred by the Government alone, amounted to not less than eighteen million yen: expenses which on the part of the Government alone are accruing at the rate of two and a half million yen per month? This is no idle question; but one of the most serious importance. Apart from the heavy cost of an army in the field, we must not forget that

every recruit to the imperial ranks is bought, if not in solid gold, at least in paper money for which the Empire is made responsible, and which is instantly put into circulation. Each recruit receives, besides his kit, on enlisting, a bounty of forty yen; and every sum of forty yen thus issued is so much more of that irredeemable paper which bids fair to become as valueless as were assignats in 1796. The Japanese Government have not even such representative value for their paper as the French Revolutionary Governments had for theirs. The latter had at least the national domains, the forfeited estates of the nobility, upon which the assignat was a preferential claim. The former are simply, in their dire distress we will admit if that is any excuse for their action, issuing notes against which they have apparently no bullion in reserve. If they wish to maintain public confidence in their paper, they should with every fresh issue notify the amount of specie in their vaults to provide for it. As it is they seem to be drawing so many cheques upon a bank in which they have no funds; and the day whereon those cheques shall be presented and returned marked "no effects," will be one of national calamity, of ruin and disaster unprecedented and undreamt of. On that day no stroke of finesse, like that which placed the Government in possession of \$15,000,000, the property of the Kuwazoku, borrowed at five per cent without security, will be available. National bankruptcy will have to be faced in all its stern reality, with all the misery, the starvation, the nameless horrors, it will involve.

We are far from insisting that such a crisis is inevitable. Even now, imminent as it is, it might be avoided; but it can only be escaped by the surcease of the present strife, and a thorough and prompt change, if not of the form of government itself, which is of first desirability, at least of the policy pursued by that Government.

This is no time for self-deception or for deceiving others. In sad sooth a veil of gloom hangs over every outlook for Japanese finance, which is dead weighted with its incubus of debt principally represented by the irredeemable paper. To reduce this, if it is to be reduced at all, as well as to meet their national expenditure in all its branches, the Government depend upon the rice crop of the country. This promises well, it is true, in the districts under cultivation; but, naturally, a much smaller area is under cultivation than would be in peaceful times. It is not too much to say that Kiushiu this year will have virtually no crop at all. Again, the harvests of other districts must be materially below the average through the withdrawal from husbandry of numbers of the adult male population to meet the imperious demands of the war. Following on a deficient crop will come the prohibition to export, of itself a serious calamity now that the balance of trade is so much and so certainly against Japan. Then a large portion of the taxes will have to be collected in paper, failing produce. Reports from the silk districts point to a deficiency in quantity and inferiority in staple, in that crop, which, even if good and abundant, could not be expected, with the existing condition and prospect of the markets all over the world, to yield within forty per cent of what last year's silk crop produced. A constant drain of specie is made on the country to meet the balance of trade. And, as if all this were not sufficient embarrassment and difficulty, the treatment of the nobles by the Government in the matter of the Kuwazoku Bank, may well

have alienated the sympathies of those who at the present moment appear to be the only possessors, to any considerable extent, of capital in the country, but whose further financial assistance, rendered voluntarily, it would be the very climax of audacity to look for.

In the foregoing estimate we have exaggerated nothing; but have represented the financial condition of the country as it, alas, exists, after four months of civil war. How much that desperate condition must be aggravated should not peace shortly shade Japan with her wings, giving time for domestic reform and a careful casting up of the nation's accounts, we leave to be inferred by foreign friends of Japan and by Japanese statesmen. If, the present state of affairs, the now raging war, the existing system of government, the prevailing methods of finance, persevered in, they can see anything but desolation rapidly approaching, they have that happy faith which "hopeth all things, trusteth all things, believeth all things," a faith which we should be glad to see justified by results, a faith which we may indeed envy them but cannot share.

THE NORTH CHINA INSURANCE COMPANY.

THE meeting of the NORTH CHINA INSURANCE COMPANY held in Shanghai on the 5th instant has taken the bulk of the Yokohama shareholders by surprise. No notice of the intention to hold the meeting, or, more important still, of the gravity of the proposed resolutions, was sent to Yokohama, and in fact the circular convening the meeting was issued in Shanghai on the 29th May, six clear days only before the appointed date of the meeting.

A full report of the meeting was given in our issue of the 13th instant, from which it will be seen that thirty-five persons, interested in the Company and in the proposed changes, attended for the discussion of a resolution, which is intended not only to alter the present form of the concern, but to reduce it to a new species of co-operative society or club, to be carried on in manner similar to the Topham and other institutions of the same class which struggle on in England with varying success.

The NORTH CHINA INSURANCE COMPANY is at present a triennial office, this being the last year of its term: in the ordinary course of events it would have been reconstituted for a further term of three years from 1878 to 1880, and in all probability the shareholders in the present company would have become members of the new. Without notifying the shareholders in the outposts of China or in Japan, the existing arrangements have been set aside by a majority of nine; fourteen voting for, and five against, the resolution. Sixteen members present apparently refrained from voting, and we are therefore justified in assuming that the measures passed will be made matter of subsequent discussion.

The substance of the proposed change in the formation of the Company to be started on the 1st of January next is that the Company shall be permanent instead of triennial: that a reserve fund of taels 400,000 shall be formed out of the one-third of the profit payable to shareholders; and that every shareholder who has not for three years past contributed enough business, the amount to be determined at the discretion of the direc-

tors, shall have his name removed from the list of members.

The reasons advanced in favor of making the Company permanent were that "it would save a great deal of routine work" and enable a larger business to be done than the present capital warrants. We fail to see the force of these arguments. It was suggested at the meeting that the Company had not the confidence of the public, owing to its too limited capital, but a member corrected this impression, and pointed out that if a larger capital were required the want might be met by increasing the amount paid up on the shares. In spite, however, of the opinions expressed the resolution was carried, and it only remains to consider how far it can be in the power of the members of a Company to remove other members who may not have complied with the condition regarding the contribution of business. It is quite competent for an institution such as the North China Insurance Company, which is unlimited and unregistered, and for the gross liabilities of which every individual shareholder is responsible to the full extent of his means and property, to frame such agreement, which, taking the place of, and virtually being, the articles of association, shall be binding upon all the signatories. In the same manner as a Joint Stock Company reserves the right to forfeiture of the shares of a member who has neglected for a fixed space of time to comply with the rules or to pay calls legally made, the new association may provide for the forfeiture of the shares of a member who may neglect, or be unable to comply with, the condition requiring him to contribute a certain amount of business to the company during a specified term. This seems sufficiently clear, but the real difficulty lies, not in expelling a shareholder, but in indemnifying him against the claims, present and prospective, on the association of which he has been and must in the eye of the law remain a responsible contributory for a long space of time after his name has been removed from the list of members. It would be a very natural objection for a member to urge that the act of his copartners in depriving him of his share of probable profits by cancelling his interest is unjust and improper, if only for the reason that he remains burdened with all future possible losses in excess of the capital stock and funds of the company.

It is distinctly laid down that:—"By the common law of England every member of an ordinary partnership is liable to the utmost farthing of his property for the debts and engagements of the firm. The law ignoring the firm as anything distinct from the persons composing it, treats the debts and engagements of the firm as the debts and engagements of the partners, and holds each partner liable for them accordingly. Moreover, if judgment is obtained against the firm for a debt owing by it, the judgment creditor is under no obligation to levy execution against the property of the firm before having recourse to the separate property of the partners; nor is he under any obligation to levy execution against all the partners rateably, but he may select any one or more of them, and levy execution upon him or them until the judgment is satisfied, leaving all questions of contribution to be settled afterwards between the partners themselves."

This doctrine of unlimited liability applies by common law not only to ordinary partnerships, but to all unincorporated Companies without exception."

When the liability of an expelled shareholder would terminate is a question too

abstruse to be entered into here; but we may remark that in all probability the founders of the present company contemplated the imprudence of incurring the continuous liability of a permanent office, to avoid which, and to set a limit to it, the triennial system was adopted. Mr. RENNIE has expressed his opinion that the new proposal can be carried out without difficulty. His reputation for legal knowledge entitles his opinion to respect, but in view of the legal difficulties and uncertainties in which the question of liability of an expelled member is involved, we should hesitate to be guided by his unsupported dictum.

Viewed in a more practical light the real object of the movement appears to be to confine the large profits made by the company to distribution among the persons who contribute business; in other words, the members will pay premia on their risks equivalent to a percentage to be ascertained by the amount of losses sustained and the expenses of carrying on the business, minus the interest on capital and reserves invested; and no person other than those who can place business in the hands of the Company will be allowed to retain shares. Under these circumstances the wording of the resolution is misconceived; it should have been somewhat in the following form:—The directors propose that on the expiration of the present year the NORTH CHINA INSURANCE COMPANY be reconstituted upon a new basis. A sum of 600,000 taels with a contingent liability of 1,400,000 additional, be paid and guaranteed by business-contributing members, who alone can be interested in the Club. Premia on insurances will, as hitherto, be paid in accordance with a fixed tariff, and the surplus funds, after payment of claims and expenses, will be returned to the members in the shape of interest on the capital advanced by them, and subsequently as a bonus divided *pro rata* on the premia contributed.

In conclusion, we point attention to the explanation of the chairman to the effect that at the close of every three years the shares will be redistributed. The shares of members who have not contributed sufficient business will be forfeited and apportioned to those whose support has been the most considerable. This is rather contradictory, and unintelligible if taken with the resolution. On the expiration of the present office the allotment of shares in the new is at the discretion of the directors, who can grant them only to business contributing members. Therefore it seems sufficiently clear that the only benefit to be derived from the change is the saving of some amount of routine work—a bad reason—and increase of the reserve fund, which, as explained at the meeting, can be done by the issue of more shares or a larger call being made upon the present number. The disadvantages of the change are numerous. The responsible proprietors will be reduced in number, and, however satisfactory this may be among themselves, it is not likely to extend the public confidence in the stability of the concern. Those members who contribute but little business of their own influence others to insure, and by these means the Company has been well supported with a much more general business than can be expected under the new and exclusive Club system.

It is said the Minister of Finance will pay another visit to Kioto on or about the beginning of next month.

A SHIZOKU BANK.

THE number of Banks already established in Japan under the name of National Banks is not sufficient for the requirements, if not of the country, at least of the Government. The latter cannot have too many channels for the outlet of their superabundance of money, too many companies which, trading under the patronage of the Government, labelled with the great "national" ticket, shall procure them credit in exchange for that money. It is true that the money is not actual value, that it is merely so much paper, for which an equivalent does not appear to exist. At all events, if it does exist, the financiers of Japan have not thought it worth while to indicate its nature. They imagine, perhaps, that the declaration is not necessary: that to make it would be a work of supererogation: that the faith of all into whose hands may fall the paper currency of the empire will accept unhesitatingly, as being as valid and weighty as solid gold, the prettily designed and artistically engraved pieces of paper, which they are issuing to such an extent that, at the present rate of progress, they bid fair in time to be of sufficient quantity to cover a province. That correspondent of the *Osaka Nippo* whom we quoted lately is not extravagant in his reasoning. He points out that from the 1st to the 10th year of Meiji fifteen National Banks have been established in Japan, each Bank with its own capital, and with grim humor draws the conclusion, "How wealthy is Japan!" His forecast that these banks will be increased in the future till their total capital will be one hundred million yen is not by any means far-fetched. The "Nobles" or "Fifteenth National" Bank has a capital, how composed we have already pointed out, of seventeen million yen. It is not improbable that the total ostensible capital of the fifteen Banks already existing is not far short of the amount mentioned by the *Osaka Nippo*. "Plenty of money!" exclaims the Japanese Editor. "Plenty of money!" says the Government. "Plenty of money! such as it is!" the public may reply. Money in notes, which would cover 455,000 tsubos of land, or 376 acres, should be an outward and visible sign of great wealth and the promise of vast future prosperity. That it is the sign of an expenditure which funds do not exist to meet, drafts against which there is no reserve, a pawning of the future revenues of the country, a sowing of the wind of embarrassment, which may be reaped in the whirlwind of national impecuniosity and disaster, is probable if not at present actually demonstrable. That the more profound thinkers among the Japanese are not ignorant of the difficulties which are impending is evident in frequent articles, paragraphs, and letters in which the truth is shown, under the thin veil of praise of Government measures, or, as in the case of the extract we have taken from the *Osaka Nippo*, a sarcastic assertion of prosperity, and which from time to time appear in the native papers. Occasionally we find a matter of fact assertion of the actual condition of affairs, and an honest looking in the face of a crisis apparently inevitable, which reflect the greatest credit upon the soundness of the judgment, and the true patriotism of the writers, who fearlessly brave the risks they run by the outspoken expression of their opinions. Thus, the *Akebono Shinbun* publishes the following plain statement:—

"The Finance Department has already expended twenty million yen in the South-

"West since the commencement of the war. The revenues of several ken in that part of the empire which has suffered injury, more or less extensive, at the hand of the insurgents, have each decreased by about eight million yen since last year. Now, supposing even that at this moment the insurrection is entirely suppressed, and the imperial armies, victorious, are on their way back to Tokio. Each man of the police force, and of the several contingents of shizoku newly levied in various ken, must be rewarded; and the families of the killed and wounded officers and soldiers must be provided for; while a great sum of money will be required for the relief of the impoverished inhabitants of those districts which have been devastated during the war. All these contingencies will bring the liabilities of the Government, so far, up to a total of not less than forty million yen. Again, if the war should continue for one month longer, it will involve the outlay of an additional sum of five million yen, that is if its expenses are only in proportion to those hitherto incurred, and so on at the rate of five million yen for every succeeding month of its duration. Further, the military stores at the disposal of the Government are very much reduced, and great numbers of cannon and rifles are worn out through service."

We have no wish to magnify the difficulties and embarrassment of the Government; but on the other hand we contend that nothing can be gained by concealing, denying, or underestimating them. The country is in a very deplorable condition; its future is very gloomy; and in the dire distress of the Government, to whose constitution and tenure of office, in opposition to the wish of the people desiring representative institutions, there can be little doubt the present war and consequent financial trouble are due, it is little to be wondered at that it should snatch at any small plank which may keep it a few moments longer on the surface of the stream which threatens to drown it. One such plank was the idea of establishing a Kuwazoku Bank with the bonds the payment of which to the nobles was overdue. Since it was availed of the waters of trouble have added weight to the Government, which accordingly wants more aid to keep it afloat. A straw, if not a plank, is in sight this time. The shizoku's bonds are overdue in part. Why should they not be applied in the same manner as were the sums due to the kuwazoku? The idea of the establishment of a Shizoku Bank follows naturally on the successful founding of a Kuwazoku Bank. The second institution will, if it is organized, in most respects resemble its predecessor. Only, if we are to believe the *Choya Shinbun*, the terms on which their money is to be borrowed from the shizoku are more favorable to the Government than those on which a similar financial transaction was conducted with the nobles. Admiration is commanded by the ingenuous manner in which the second project is introduced to the public. We are told, after an encomium on the (future) management of the Nobles Bank, that "some of the shizoku propose obtaining a license to establish a bank, and to issue bank-notes by pledging the Government bonds for their pensions to the Government, which are to be given them this year, in the same way as the nobles, with this exception, that they do not desire to receive any interest from the Government, their object being to aid in defraying the Government expenditure."

We are aware that numerous cases have occurred of well-to-do officials and noblemen

returning their pensions to the Government; but their meritorious deeds are far eclipsed by this wholesale act of patriotic unselfishness ascribed to the shizoku, in praise of whom we cannot do better than repeat the word of the native recorder of their self-sacrifice. "We much admire them for their good intentions; but if they receive no interest, the expenses of their establishments cannot be sustained."

The question of interest is, after all, a minor matter, when the capital itself is engulfed in an enterprise so disastrous as that of the civil war. The "method" of the Japanese Government is commendable and polite. Instead of "forced loans" as in Turkey, we have the establishment of class banks with Government bonds as a capital. Whether the nobles and gentry of this country will be in a better position as creditors under the one system of borrowing, than they would under the other, may be matter of opinion. Those most interested have a right to complain or to be pleased as best suits them. Onlookers, however, have some interest in the matter, and to them, when they consider the wholesale measure of repudiation which was known as the capitalization of the incomes of the *kuwazoku* and *shizoku*, the subsequent establishment of banks with part of the funds which should have been paid as a meagre compensation, will not appear extraordinary. In fact they might not be much astonished some day by a complete denial of indebtedness of every kind on the part of a Government, which is already compelled to make such havoc with its engagements.

YESSO GEOLOGICAL SURVEY.*

THE island of Yesso being destined, in the future development of its great but imperfectly known resources, to contribute largely to what prosperity may be enjoyed by the empire, it is matter of first necessity that light should be thrown upon its condition, conformation, and capabilities. The work now before us, the partial result of Mr. BENJAMIN SMITH LYMAN's labors, contains in small space a mass of information. If it is not turned to some practical use by the Kaitakushi Department, the fault will not be with the Surveyor. Judging, however, by the comparative failure of that Department to deal successfully with measures for the improvement, commercial and agricultural, of a very valuable possession, it is not impossible that Mr. LYMAN's work may first of all be turned to good account in that day, be it close at hand or far remote, when trade and settlement shall be freely allowed to foreigners. Mr. LYMAN proposes a scheme, a sort of compromise, pending the arrival of that time, whereby foreigners may be associated with natives, and foreign capital employed in the development of certain industries; but to that we shall allude further on.

Before commencing to read this little work, the intending reader will do well to make the corrections in the body of the book indicated in the table of "some of the more important errata"—a table which, by the way, itself contains at least two mistakes. That done, and the work of reading commenced, other corrections, less important perhaps, will suggest themselves *passim*. In fact the book abounds in typographical errors, which, especially in a work of this nature and one supposed to be issued under the most careful supervision, are hardly excusable. Here and there, too, the writer's style is a little slipshod and involved, as in the following sentence, which a diagram perhaps, accompanied by a foot note, might render clear; but which as it stands is all but unintelligible:—"The new post and rail fences at the government farms have been made with almost double the labor that is necessary; for the posts are the chief source of outlay in such a (three rail) fence and one half of them here are quite useless, those, namely, that are in the middle of the fence." And it is difficult to imagine a school house "finding a place" for itself, suitable or unsuitable.

These are, perhaps, the only points upon which much fault can found with Mr. LYMAN's work, which shows in almost every page acuteness of observation on the part of the author, and facility and shrewdness of inference.

The first part of the work, or eighty out of the two hundred and eleven pages forming the whole, is devoted to a "Report of daily progress of the Yesso Geological Surveys of 1875, with comments on other matters." The surveys occupied rather more than three months, from the 20th June to the end of September. The surveyor, during his passage from Yokohama to Hakodate, visited Sendai Bay, a place which before had been seldom, if ever, visited by geologists, and which Mr. LYMAN in consequence took the opportunity to explore cursorily. On one of the "eight hundred and eight" islands of this fine bay he found dwellings of unknown antiquity, "cut in the face of the steep cliffs of the soft sand rock. They are no longer inhabited; but the square topped entrances are still to be seen, and are in some cases filled now with sacks of coal." In another the soft greenish grey sand rock has been carved into a small sitting Buddha by the inhabitants of a neighboring village; and in other places the rock has been hewn into posts for mooring junks. In some places the sea has cut tunnels "through from one side of an island to the other, leaving natural bridges; and such work is favored by the fact that the rock is in layers that are not very steeply inclined, say ten or twenty degrees only."

Mr. LYMAN arrived at the conclusion, which will probably be borne out by future and more extended surveys, that the rocks of the Bay were of the same age as the coal-bearing rocks of Yesso, which he calls the Horumai Group.

Shiogama, a village of about 4,000 inhabitants on the Bay of Sendai, derives its name from the presence of the remains of four iron salt kettles, which were in use so long ago that the time is completely forgotten. With the inclination, which is so natural to lettered people, to exaggerate the antiquity of local relics, some of the villagers assert that the period of the Shiogama salt manufacture dates back to before the days of Jimmu Tenno, or say three thousand years ago; but the absurdity of such a belief is pointed out by the author. Being exposed to the rain, and to those alternations of dryness and moisture which are so favorable to the oxydation and consequent rapid disappearance of iron, it is improbable "that any traces of all of these kettles could have endured in their exposed position for any length of time; and it is even surprising that they could have lasted until their age should be so thoroughly forgotten."

Schools under the direction of the Mom-busho have been established in this and another village, Samusawa. Fishing appears to be the chief occupation of the inhabitants of this part of the coast.

In Shiogama, at the best hotel Mr. LYMAN and his party could find, the charge for lodging with two meals was only sixteen cents, a fact which fully justifies the employment of a note of admiration. It is to be hoped that the traveller did not, *more Britannico*, spoil the market for future visitors requiring meals and lodging. In a review of the "Reminiscences of Bosnia by an English Lady," one of the most recent of home publications, we read an example of a common pernicious practice of English tourists. In one place the lady was in danger from Bashi Bazouks, the too familiar bugbear of travellers in that part of the East. "The keeper of the khan, which was full of soldiers, took her to his own home where she was safe enough. For the night's lodging the honest old Turk charged a sum equal to about 5d.; and he was quite astonished when four times that amount was pressed upon him." How often have innkeepers in Japan, for the first time visited by foreigners, been much astonished to have four times their charge pressed upon them; and, prompt to learn, regulated their future bills in proportion?

Mr. LYMAN touches on the yearly diminution in the trade of Hakodate, the prominence of which town, as one of the ports open to foreigners, is fast sinking into insignificance, "from the fact that the increasing number of Japanese steamers which can visit other ports on their way coming and going, are (*sic*) making it unprofitable for foreign vessels to come so far to this one point." This is independent testimony in support of the opinion we enunciated recently upon the coasting trade of this country. Otarunai or Mororan, the writer thinks, are likely to be the business centres of the future, lying as they do at the natural outlet of the great Ishcari valley, "rich in fertile land, in timber, and in coal," while "Sapporo will always be a pleasant, healthful, picturesque and convenient place for a seat of Government."

The road from Hakodate to Mori, traversed by the surveyor and his assistants, was found impracticable, through neglect, for waggon traffic. On the way from Mori to Yamakushinai, Mr. LYMAN diverged to visit the Washinoki Oil Lands, and found that the rumors published previously of the yield of the wells had been grossly exaggerated. About 200 gallons only had been obtained in the whole of the previous year. The oil itself, which is sold in the neighboring villages, is heavy; and the yield of lighting oil on refining must be poor. "The best plan would be rather to make lubricating oil." Having visited here and at other places the oil lands, which do not appear to have a very brilliant prospect, the traveller arrived by bad roads at Iwanai; whence he indites a rough general outline of what seems to him the best means of disposing of coal mining rights in Yesso. This he prefaces with the following well deserved rebuke to those in authority, whose paltry, self sufficient, ungenerous policy it is to keep those of their employes who should be the most trusted in profound ignorance:—

"You charged me a year and a half ago not to divulge the rules by which the Kaitakushi would dispose of mining privileges to private individuals; and it has been easy to comply with the request,

* Geological Survey of Hokkaido. Report of Progress of the Yesso Geological Surveys for 1875, and Seven Coal Survey Reports. By BENJAMIN SMITH LYMAN, Chief Geologist and Mining Engineer. Tokyo: Published by the Kaitakushi, 1877.

"since I have been kept to this moment in absolute ignorance of what those rules may be, and even of any motive for not making them public. The world, however, if not the general government nor the Kaitakushi, must hold it almost incredible that a man in my position should not be consulted on a matter in which I should naturally be thought to be in some degree responsible."

Mr. LYMAN sketches, for the information of his Department, the systems prevailing in the United States and in Nova Scotia for the sale of coal mining privileges; and, after a comparison of the two, suggests the following scheme which appears both sensible and practicable.

It seems, therefore, decidedly best for the government to keep in its own hands the search for minerals and the underground mapping, which by a general geological survey and body of surveyors and mine inspectors would in the end cost the public much less than the aggregate of numerous disconnected surveys of the separate tracts. Wild speculation in lands of imaginary mineral value would in that way be prevented with its great attendant losses; and the government could at once furnish intending operators with a geological and topographical map and report of the tract to be worked. In return it would be fair enough to demand a somewhat larger fee, say, five hundred dollars for a square mile; for a payment of which fee, on the other hand, the preparation of a similar map and report within a reasonable time might be offered for any desired tract of like size. If effective mining operations should be actually begun within say a year (or two years) after the transfer of the map and report, then a lease might be made out. In order to discourage the practice of retaining a lease without doing a fair amount of yearly work upon it, a certain payment might be agreed upon as the least that must be paid every year, say a thousand dollars. That would also ensure the government from loss in the expense of inspection and underground surveys. Twenty years would seem to be a suitable enough length of time for the leases to run, if the present Kaitakushi have the right to alienate such valuable public property for so long a time. Thirty cents a ton would seem to be a fair enough royalty to exact in Yesso, and the price of coal here in the East is so high that such a rate would not discourage mining. In order to prevent the mischief that might arise at any future time from favoritism in the allotment of mining claims, and to secure to the government the profit that should properly accrue from any great demand for such privileges; they might under conditions like those just named be offered one by one to the highest bidder, to the man who would pay the largest sum down for the lease.

With regard to permitting foreigners to mine in Yesso, a permission which we have every reason to hope will not be withheld for ever, the author alludes to the idea that it is generally believed, that "there is some reluctance to allow foreigners to participate in such opportunities as may exist here for amassing wealth by mining enterprises; and many even think that, if a foreigner should be permitted to embark in an industrial enterprise and should find it profitable, the jealousy of the Government against him as an outsider would thereupon contrive such methods of hampering him as would result ultimately in his ruin." These italics are ours. To show that such an opinion can hardly be well founded Mr. LYMAN adds:—"It is hardly to be supposed, however, that any Government with the slightest pretension to enlightenment could be guilty of such childish folly as that." But, even though he would appear to attach no weight to an impression which, rightly or wrongly, has been very generally made upon the minds of foreigners, he outlines a scheme, not for the throwing open of the mines of Yesso to foreign development, but for the co-operation of foreigners with natives. He says:—

Even if there be any political or other reason for excluding foreign capitalists from operating mines

by themselves in a country to whose laws and courts they are not yet willing to submit themselves; there would seem to be no reason for discouraging the association of foreigners with natives in such enterprises. On the contrary, there are very strong arguments in favor of the plan. Besides the addition of foreign capital to native, which would necessarily tend to increase the business, the wealth, and the revenue of the country, there would be a great advantage to the native capitalists, hitherto inexperienced in modern business and perhaps timid about embarking in it alone. Associated in equal shares with foreigners well trained in the best business methods of western countries, they would without cost get the benefit of all their skill and experience. Hardly any better way could be devised for introducing into the country those excellent modern methods of business, that are the result of centuries of experiment and progress, and are so greatly lacking in Japan. The Japanese would be very greatly gainers; but the foreigners, on the other hand, would be free from harassing suspicions as to the treatment they might at any time receive from the government; for the very fact of equal association with natives would protect their capital and enterprise.

We should rejoice to see a plan, the general practicability of which suggests itself, favored by the Government, and extensive mining operations commenced without further delay.

In almost every page we find complaints of the badness of the roads in the islands. Those roads which were made at considerable initial expense, and might have been kept in good order by a small periodical outlay, have been allowed to deteriorate constantly. The only case of improvement which appears to have come under the Surveyor's notice in his extensive tours is the one due to private enterprise alluded to in the following paragraph:—

From Rubeshibe I wished to take the new road to the sea beach near Oshoro which the landlord said last October was about finished and was to be opened within four or five days; and by which the distance to Oshoro would be four ri instead of eight, without a hill as far as to the shore. I had been delighted to give the Kaitakushi great credit for making at least one such improvement in the wretched roads of Yesso; but was afterwards told by a high Kaitakushi official that he had consented to the building of the road, but that the expense had been borne by the neighboring inhabitants, who had asked leave to make the improvement!

Mr. LYMAN's suggestion of the best method for raising land revenue is so full of sound sense, that he may well hope that the Government will act upon it. He would

divide all the land of the country permanently into four or five classes according to its value; as, for example, good farming land, mountain land, swamp land, town lots, and land bordering on a great thoroughfare, say a river, the sea, or a road; and to have them always thereafter taxed each class at its own rate, but with that rate bearing a certain permanent relation to a standard that could be fixed every year, or more seldom, according to the needs of the government. In that way the excessive labor and almost inevitable errors of a minute valuation (such as is undertaken from time to time in some parts of India) would be got rid of; and yet substantial justice would be done. Whenever a farming region is opened up by new roads the lands adjoining them could easily be advanced from one class to another: and likewise in the case of building new towns. As compared with the Japanese practice of taking yearly a certain portion of the product of the land, it would greatly discourage letting land lie idle and therefore unproductive not only to the revenue but to the general wealth of the community, and in like manner would discourage inefficient and harmful methods of cultivation. Farmers would be encouraged to lay out money in permanent improvements of the cultivable land, because, although they would thereby obtain larger harvests, their taxes would not at the same time be increased. Money so invested would in fact become in a manner exempt from future taxes; but the community would gain correspondingly in its general wealth and prosperity, and its greater ability to raise the standard rate of land taxes. As new lands are taken up, either the land revenue could be increased, or the standard rate could be

lowered.—In Yesso, however, little or no revenue seems as yet to be raised from the land, and perhaps for the encouragement of immigration it is best that it should continue so. Still, enough might be raised from land owners to keep the roads in repair, if not to build new ones. But if the horses of Yesso should become the property of the inhabitants, instead of that of the Kaitakushi almost exclusively, the road repairs and even some at least of the road building could be done with equitable and easily borne taxes on beasts of burden and vehicles, which use and wear out the roads. By an extension of the same principle the schools, hospitals, almshouses, courts, police, and prisons could be supported by taxes on wines, tobacco and perhaps some other luxuries; the land survey and military expenses by a land tax; the coast survey, light-house and naval expenses by a tax on shipping or on fishery privileges; and the geological survey and mine inspection expenses by the coal royalty. Under a system of that kind the connection between a tax and the use to which it is applied would be so obvious that even direct taxes would cause no more discontent than ordinary indirect ones.

We have marked several passages in the report, which we regret that want of space prevents us reproducing. For interesting information on the schools in Sapporo, the public works in the same town, notably the Kaitakushi saw mills, and rough estimates of the amount of timber in the Ishikari valley, we refer our readers to the work itself. The general conclusion arrived at after careful perusal, as to the great source of the future wealth of Yesso, will be the same as that arrived at by the author. All interests are insignificant compared with that of coal, which, "in the little Kayonama field alone, would yield within an easy depth at 30 cents a ton, a greater revenue than all the lumber." With regard to the latter industry it appears that the great timber resources of the island are far less than has been supposed. Nevertheless the Sapporo saw mills could be supplied with plenty of work for many years, "especially if it be not thought necessary greatly to economise what timber there is."

In concluding our notice we must commend the care with which the surveys of the coal fields of Yesso have been executed, and the excellence of the maps which accompany and illustrate the reports.

METEOROLOGY.

TWELVE monthly tabular statements of observations taken at the Imperial Meteorological Observatory at Tokei last year, have recently been prepared under the direction of Mr. H. B. JOYNER, and the care bestowed upon them, together with the number of daily observations taken, commends them to all students of a science which is rapidly increasing in importance and usefulness to mankind. In estimating the worth of a series of observations the class of instruments used must necessarily receive the first consideration, for unless such instruments have been compared with some standard, and subjected to severe tests no amount of labour will render the observations of value in ascertaining the climatic influences of the country where they are taken; on this subject Mr. JOYNER gives full information. At the Imperial Observatory the barograph used is King's patent made by Casella of London, an instrument bearing a high reputation for its truthful record of the smallest fluctuation in the pressure of the atmosphere. The mercurial column, for one inch in the ordinary barometer, has a space of about 5½ inches in this, and the clock-work record is received on paper with ¼ inch space for each hour. The barograph is, however, only used at present for extremes

and diurnal variations. The standard barometer is by Casella on Fortin's principle; was verified at Kew Observatory in 1874, and is an instrument held in great esteem by meteorologists, chiefly because the index error can suffer no change from lapse of time, being independent of the loss of mercury by oxidization. The construction of this barometer is simple. The base of the tube is inserted in a glass cistern having a leather bottom adjustable by a thumb-screw, by means of which the mercury in the cistern can be raised or lowered until the surface exactly touches a fixed ivory point: this tube is mounted in a brass frame to which is attached a vernier, adjusted by rack and pinion motion, reading to .001 inch. The cistern of the barometer in Tokei is 64 feet 6 inches above mean sea level, and 2 feet 6 inches from the floor of the building in which it is placed. The thermometers are also made by Casella and were verified at Kew in 1871, 1872, and the latest in January 1873. No mention is, however, made of a standard thermometer. The length of time which has elapsed since the verification of the thermometers now in use would seem to justify an opinion, which we offer with considerable diffidence, that their early comparison with a certified standard is of importance. The direction and velocity of the wind are ascertained by an Anemograph known as Robinson's improved patent; the electrometer is not in exact working order, and the magnetometer has not yet arrived.

The frequency of earthquake shocks in Japan, and the grave attention the subject is now exciting among scientific men in all parts of the world, render any information regarding them of the utmost value. We therefore quote from Mr. JOYNER's remarks the description of the Seismograph used by him, especially as its construction and form are seemingly new and possess unusual interest.

The Seismograph is Palmieri's invention, and made by Filipe de Palma of Naples in 1873. It is divided into two distinct parts, one for registering horizontal, and the other, vertical shocks—marked by black and red pencils respectively on a paper ribbon. The most satisfactory part of this instrument consists of four glass tubes, adjusted in the direction of four points of the compass, having 45 degrees between each tube. In this case the adjustments are W.N.W. to E.S.E.—W.S.W. to E.N.E.—S.S.W. to N.N.E. and S.S.E. to N.N.W. These horizontal tubes are turned up for a few inches at each end, one end of each tube being nearly twice the diameter of the other, and are all partially filled with mercury. From the large end by means of a wire connecting with the pillar which supports the tubes, a continuous and direct communication is kept up with the zinc plate of a Smee's battery. From a separate pillar down the smaller end of the tube runs a fine platinum wire, very nearly, but not quite, touching the mercury, and connected with the platinized plate of the Smee's battery. In the small end of the tube also is a small float which rests on the top of the mercury. From it a fine silk thread is carried over a wheel and counterbalances it by a weight. The axle of the wheel carries an indicator which points to an arc divided into degrees. It is evident that when the wave of an earthquake moves at right angles to any particular tube, the float in it will scarcely be raised, but when the direction of the wave is parallel with one of the tubes, the float in that tube will be raised in proportion to the angle of deflection of such wave, and at the same time the mercury will touch the fine platinum wire, and thus complete the circuit necessary for the performance of the work of registration—such as stopping the clock which is connected with the instrument, setting the paper ribbon running, and causing the pencils to mark it.

By this instrument the intensity of fifty three shocks of earthquake which occurred in 1876 was ascertained, the most severe being that which took place at 8.45 P.M. on the 20th January, the seismograph recording

21 degrees. The next was on the 30th July at 10.8 A.M., and was more remarkable for its prolonged duration than its intensity, which is set down at 12 degrees. The remaining 51 shocks varied between $7\frac{1}{2}$ degrees, and 1 degree.

A theory, recently propounded, that a close relationship exists between seismic commotion and atmospheric electricity—that the phenomena of the one are in great measure dependent upon the conditions of the other—is gaining many adherents. An admirable opportunity of testing this theory is offered to the Meteorological Department of this country. In England meteorologists have at their disposal the most perfect instruments and means of observation; but the fortunate almost immunity of the British Isles from earthquake shocks precludes the possibility of comparison. In Japan the frequency of earthquakes invites comparison, and the proper instruments for the purpose alone are needed. We are glad to find this matter is engaging the attention of the Department and that the requisite instruments will shortly be in working order.

In addition to the instruments we have mentioned there are terrestrial and solar radiation, and solar radiation in vacuo, thermometers; hygrometers, ozonometers and rain gauges forming a very complete collection of the most useful instruments.

The position of the Observatory is in latitude 35 deg. 39 min. north, longitude 139 deg. 44 min. east, about sixty seven feet above mean sea level, and its position is thus described.

The Observatory is situated on the upper level of the city about a mile to the west of the northern extremity of the Gulf of Yedo, and between the two rivers Sumida and Rokugo; being about two miles to the south-west of the former and eight miles to the north-north-west of the latter. The open Pacific lies about 40 miles to the east across the Gulf of Yedo and the promontory of Awa, along which coast passes, as is well known, the equatorial current called the Kuro-Shiwo. Siberia extends to the north and north-west.

Mr. JOYNER points out the manner in which the readings of the barometers and thermometers have been corrected, but he does not add that the daily and monthly means have been corrected for diurnal range as recommended by Mr. GLAISHER, who remarks, in the introduction to the fourth edition of his Diurnal Range Tables, published in 1867. "To find true mean values of the several Meteorological Elements from observations taken a few times daily, it is necessary that corrections be applied dependent on their diurnal ranges." In the calculation of the mean pressure and temperature of the air these corrections are of considerable importance. Twice during the day the temperature of the air is at its mean value, and these times are nearly as follows, according to Mr. GLAISHER's calculations.

January -	10.0	A.M.	8.0	P.M.
February -	9.30	"	6.40	"
March -	9.10	"	7.20	"
April -	8.40	"	7.35	"
May -	8.15	"	7.30	"
June -	8.0	"	8.0	"
July -	8.5	"	7.50	"
August -	8.20	"	7.20	"
September -	8.50	"	7.20	"
October -	9.0	"	7.5	"
November -	9.25	"	6.45	"
December -	10.0	"	7.20	"

Local Time.

In the tables before us the monthly means of temperature are merely the means of the maximum and minimum daily observations without correction for diurnal range, which certainly cannot be properly ascertained till after years of careful observation, as for

every variety of climate there is a difference of diurnal range.

On reference to the tables the fullest information can be gathered, and we regret our space is too limited to permit of more than a few passing remarks. The atmospheric pressure is highest in January, decreasing each succeeding month until its lowest point is reached in June, showing a range between the highest and lowest monthly means of .273 inch. The low barometer in June was attended by a prevalence of easterly winds and much rain; November with a similar pressure (difference .01 inch), wind prevailing from westward, was by far the driest month of the year while September stands far in advance as the wettest with a mean barometer higher than that in June and November. The rainfall for the year must attract the attention of the observer. Of the total fall of 69 inches, 36 per cent. of rain fell in two months; June 15.7 and September 20.4 per cent. The remainder is very evenly distributed over the other ten months. The average rainfall in the British Islands is about 31 inches. It is, however, impossible to form an opinion of the probable average rainfall of any portion or district of Japan, from measurements taken at one station only; and as rain gauges are both simple and inexpensive, observations could be taken without difficulty at several places throughout the country. The returns so obtained would be of great value and interest.

The recorded temperature is next in importance, and it shows that the climate of Japan is eminently entitled to take a place of the first rank in the temperate zone. The range between the mean maximum and minimum is 18.7 degrees; between the absolute maximum and absolute minimum 80.6 degrees, while the mean temperature of the air for twelve months is 56.3 degrees, or about 9 degrees higher than the average mean at the Greenwich Observatory. The months of July and August are the hottest of the year with mean temperatures of 75° and 79° respectively, and January and February the coldest with 35° and 38° respectively. The highest and lowest temperatures were recorded on the 8th August 96°1 and 15th January 15°5, and the highest solar radiation was attained on the 8th August as 115°8. highest in vacuo on the 21st July 164°2

The tables give every information regarding dew point, tension of vapor and humidity, bearing upon the hygrometry of the atmosphere. The practical advantages which will flow from a continuance of these observations cannot be overestimated. The law of the diffusion of vapor through the air, its influence on the barometric pressure, and its relations to the other constituents of the atmosphere, are among the least satisfactorily determined questions in meteorology; and since this element is so important as an indicator of storms and other changes of the weather, and since so much remains still to be achieved it is to be hoped the government will continue to encourage the practice of this valuable science. The establishment of meteorological societies during the last twenty years, has contributed in a high degree to the solid advancement of the science which more than any other, must depend on extensive and carefully conducted observations. The United States are pre-eminent in this respect, the observers there numbering nearly 800; while in Great Britain the English and Scottish societies together exceed 200 observers. In France, Germany, Russia, and India the science is also

being widely cultivated. A knowledge of the meteorological conditions of the country is essential for the regulation of health and of agriculture; but nothing has benefitted to so great an extent by the labour of meteorologists as navigation. The knowledge thus acquired of the prevailing winds over the different parts of the earth during the different seasons of the year—the regions of storms and calms—and the laws by which storms may be predicted have saved innumerable lives and immense property. The Japanese Government, by the establishment of the Imperial Meteorological Observatory in Tokei, have conferred a benefit not alone upon this country, but upon the world at large; a benefit which will be increased by every successive issue of tables of observations.

THE EXPORT OF RICE.

RICE, by the original treaty, is a prohibited article of export, and although, a few years since, the prohibition was temporarily withdrawn, it has since been re-imposed, and the exportation of rice to-day is as restricted as it was in the commencement of our relations with Japan. Notwithstanding this, however, the Government have thought fit to allow themselves to break through their own laws, and to permit the export of rice when such export is conducted through them, the Government, as the original sellers of the grain; that is to say, any person may export rice from Japan to foreign countries after purchasing the rice from the Government at the Government price; a price which is fixed, and is in excess of the market value of the produce of the country.

When the Messageries Impériales Company first thought of running their steamers to Japan, and many years before the formation of the present administration, the then Government of Japan offered as an inducement to the Company, a certain quantity of silk for freight to Europe, and sale there on commission. The English merchants residing in this country represented to Mr. Winchester, H. B. M.'s (Chargé d'Affaires) that a transaction of this character appeared to be opposed to the spirit of the treaty of commerce with Japan, the true reading of which implied that any surplus produce, whether its export were prohibited or not, should be offered to competition at public auction. Mr. Winchester brought the matter before the Gorōjin, the result of the proceeding being that the first quantity of silk provided by the Government in terms of their offer to the Messageries Impériales Co., was offered for sale at public auction by Messrs. RICKERBY, WESTWOOD, and SEARE, a firm of auctioneers then carrying on business in Yokohama. The Government, by their agents, bought in a large portion of this silk which eventually they were forced to resell to foreign merchants at a considerable deduction from the price paid at the auction sale.

A repetition of this operation has never been attempted so far as silk is concerned, but, about 1872 the Government finding themselves in possession of a quantity of taxed rice which, if thrown upon the market here would reduce the price of grain in the hands of farmers, determined to find an outlet for it in foreign countries; and to assist in the execution of this scheme a foreign firm in Yokohama was appointed to export rice on account of the Japanese Government.

It was impossible for a matter of this sort to escape the public attention; therefore, so

soon as the details of the arrangement with the foreign firm before mentioned were known, representations were made by some of the English merchants to H. B. M.'s then Acting Minister, claiming his interference for the same reason and upon the same basis, as it was asked and obtained from Mr. WINCHESTER in the exportation of silk already referred to. The immediate result was that the surplus rice intended for export was offered by public tender to foreign merchants. This arrangement and mode of sale did not, however, exclude the Government by their agents from bidding and purchasing, whereby a much keener competition was created than was justified by the quality of the grain offered, or the state and prospects of the markets it was intended to export it to. The sales by tender during the first two weeks resulted in the purchase of rice by foreigners; but the upset price subsequently fixed by Government prevented any further competition—stifled it in fact—and the export of rice then reverted to the Government's agents as before.

The result of the operations that followed was very disastrous to the Government, who then considered it advisable to remove the prohibition to export, which was done by the issue of a temporary notification to the effect that the exportation of rice would be permitted until further notice were given. The restriction being removed, large operations were entered into by foreign firms, chiefly in Osaka, and reports reached the Government of the large profits realised on the ventures. The cupidity of the Government was excited—profits were to be gathered—thereupon they withdrew the notification, re-prohibited the export of rice, and recommenced operations on their own account, and in this month of June, 1877, it is a notorious fact that the export of rice is a GOVERNMENT MONOPOLY, granted, ostensibly, as an exclusive privilege to an individual in Yokohama, who is permitted to ship, either yearly, or within a given term, a certain quantity of surplus tax rice to the European markets: and although rice is being exported to China by different foreign firms, the permission to export is made contingent upon the purchase of the rice from the Government, and by implication, at the Government price.

Under these circumstances it seems sufficiently clear that the permission to export granted to an individual, and the conditions attendant upon the exportation of rice by other persons, are irregularities which call for earnest action, and firm remonstrance by the whole foreign community of Japan, and in bringing the matter forward we have pointed out a public abuse the further toleration of which is scarcely possible.

From the data furnished, the following arguments may with propriety be deduced.

If the silk transaction in 1865, and the rice transaction in 1872 were invalid, then the present Government monopoly is equally invalid, irregular and prejudicial to the interests of merchants, both native and foreign, and to the country at large. Either Mr. WINCHESTER and Mr. ADAMS incorrectly construed the treaty, and the Japanese Government yielded in moments of weakness on the questions of the above mentioned silk and rice transactions: or the corollary is, That, the line of action followed by Mr. WINCHESTER and Mr. ADAMS was right, and was properly accepted as right, by the Japanese Government.

In either case, therefore, it is in the power of the foreign ministers to interfere to put a stop to the present anomalous monopoly of the export of rice, and this will appear

more particularly when article XIV of the treaty is referred to; it reads:—"At each of the ports open to trade British subjects shall be at full liberty to import from their own or any other ports, and sell there, and purchase therein, and export to their own or any other ports, all manner of merchandise not contraband, paying the duties thereon as laid down in the tariff annexed to the present treaty, and no other charges whatsoever." Rice is being steadily exported by at least one British subject: consequently it is not a contraband article and may therefore be lawfully shipped, and an export permit demanded, by any other British subject. About this there would seem to be little, if any, question: nevertheless, the experience of British subjects is, that no rice bought on the market, that is, rice not bought from the Government at Government-competing prices, will be allowed to be exported. This shows that great irregularity exists somewhere; and that the present state of the trade is prejudicial to merchants, and consequently to the country at large, is instanced by the following assertions:—The Government of Japan is enabled to come forward as a trader exercising a Government monopoly of rice which may hereafter, with equal justice and propriety, be extended to include silk and tea or other native productions: and thereby the rights secured to foreign traders under article XIV of the treaty quoted above, are rendered nugatory, and their business operations are illegally prejudiced. The country must suffer by the check given to legitimate trade in the people's own produce, and by losses which the Government have sustained and may sustain from the fluctuations of an export business of which they can have neither knowledge nor experience.

This subject is of grave importance, not only as demanding the earnest consideration of the Foreign Representatives, but as affecting the interests of the people of the country. It is manifestly impossible that the Government of Japan can make a profit on any of its exports, after those exports have been submitted to the public competition of foreign merchants, whose number and whose capital, or means of capital are so vastly beyond the requirements of the trade of the place. The prices competing merchants cannot afford to pay, after cutting their charges and commissions down to an absolute minimum, must, if accepted by the Government on their own account, leave them a very heavy loss, if only through the multifarious agents they must necessarily employ to carry on the trade. In matters of this description the loss of the Government is the loss of the people, while the entire system is harassing the legitimate trade of foreign merchants, whose presence in Japan may be rightly said to be more beneficial to the country than advantageous to themselves.

We have now written enough to show that the export of rice is an entire Government monopoly, irregular and, we believe, untenable under the treaties. The importance of the subject, its bearing upon the commerce of the place, and the possible extension of the monopoly to other produce, are strong reasons why the Chamber of Commerce should have taken up the question, which, now it is brought to their notice, they should do at once, and urge it, in connected form, upon the Foreign Ministers. We are, however, gratified at the inactivity of the Chamber; its apathy having given us another opportunity to be of real service to this community by exposing the facts of "THE EXPORT OF RICE."

THE *London and China Express* of May 4th, received by the last French mail, treats, in a leading article, the subject of trade monopolies in Japan. It is somewhat of a coincidence that on the same day as that paper came to hand we should have published an article on the Export of Rice, explaining more fully the particulars of the very monopoly to which our contemporary has called attention. If the system under which the export of rice is now carried on has attracted notice in London, it is eminently desirable that action should at once be taken by foreign merchants resident in Japan, whose interests are chiefly affected, to embody the details in a memorial to be laid before the Foreign Ministers; pointing out the prejudicial effect upon trade operations generally, the presumed breach of the spirit of the treaties, and the advisability of a thorough investigation into the reasons upon which the Japanese Government is enabled to act as a trader possessing a monopoly injurious to the common interest of the whole body of native and foreign merchants.

This duty devolves, according to the *London and China Express*, especially upon the Yokohama Chamber of Commerce; and we should think so too were it not for the fact that the monopoly must have been within the knowledge of the Committee of that body for some considerable time past, from which it may safely be inferred that their inaction springs from indifference to the subject and its bearings upon commerce, or from ignorance of its gravity. Whatever may be the cause of the Chamber's neglect there is still time for prompt action; but it is obvious that if relief is desired merchants must act without reference to the Chamber of Commerce. The Foreign Ministers have always given attention to representations made by their respective countrymen relative to trade operations, and, as instanced in our article, have obtained relief and redress from the Japanese Government whenever the acts complained of have been based upon a sound foundation. That they can or will act, however, upon an article in a newspaper is out of the question, but there can be no doubt of their earnest consideration being promptly given to a memorial praying for an enquiry into the monopoly of the rice trade.

Proof of the points set forth in the *Japan Gazette* are not difficult to obtain. The substance of the representations made by Messrs. WINCHESTER and ADAMS to the Japanese Government, and the result of each, will be found in the archives of the Legation: and for the rest there are the notifications issued by the Japanese Government, the actual shipments of rice during the past eighteen months, and the personal knowledge of a number of residents. We reprint the article in the *London and China Express* to which we allude.

"We learn that advices have been received from a reliable authority that a matter of considerable importance in connection with trade in Japan, and which has already attracted attention, is likely to be the subject of public if not official notice in that country. It appears that, by a somewhat complicated arrangement, the Japanese Government have contrived to establish a complete monopoly of the export trade in rice. The Government receive the rice from the farmers, who send it to them in payment of the taxes, and the authorities are able to obtain it at almost at any price they choose to give. This advantage in the purchase—if purchase it can properly be called—is worked by a select clique of officials to their own especial benefit. In order to put a face on the matter, they employ a foreigner to sell the rice; and thus there is practically only one foreign house able to export rice from the country. Whether a trade of this character can, properly speaking, be looked upon

as legal is open to question, but there can certainly be no doubt that it is in every way undesirable and impolitic, as tending to check legitimate enterprise, without even giving any substantial benefit to the Government properly speaking. We trust that attention may be directed to the matter; and that, should the facts prove as we have every reason to believe they are, some representations may be made on the subject to the Japanese authorities. No doubt the Government of Japan is at liberty to do what it will with its own; but it is at least scarcely equitable that when it has conceded to foreign nations the right of free trade in theory it should practically render that concession abortive in respect to one of the most important staples, by stepping in and, by means of such facilities as only a Government can possess, conducting the trade itself. We make no doubt that if the subject be placed in this light before the Japanese authorities they will perceive the justice of introducing some change in the present system. The duty of remedying this evil appears to us to lie especially with the Yokohama Chamber of Commerce, and we trust that it will take the matter up, and that greater success may attend its efforts in this than, if we may take the Report of the Chamber for 1876, just to hand, as a guide, seems to have rewarded its exertions in the matter of "Drawback," "Hutoba accommodation," "Protests against passports," and the "Limits of the port," in respect to all which questions it scarcely seems to have pushed matters quite so energetically as might be wished. We are fully aware of the difficulty of keeping up the necessary energy in public bodies in places in the East; but without some real efforts it is quite hopeless for them to expect to carry measures, however necessary and just they may be, to a successful issue."

WE revert to this subject, inasmuch as misunderstanding appears to exist as to the intent of our article thereupon. It has been said that that article tends to convey the impression, if it does not actually assert, that the export of rice is positively prohibited by the Government,—that a notification forbidding such export is in force. A more careful perusal of what we wrote will convince those who think thus that they are in error. Our object, in which we think we succeeded, was to show that the Government, by the fact of their trading in rice at all, and by the facilities which they naturally possess, and which they have increased in the manner we indicated, virtually prohibit foreign trade in that important article of export by other persons than those whom they have selected to conduct their own transactions. The whole text of the article shows that rice can be exported by any firm choosing to pay the Government price. It is that price which renders the export prohibitive. All the rice available for export is in the hands of the Government; and they will not sell to anyone who is likely to compete with them in Europe. The simple fact of the matter is that the Government want all possible profit out of the market, in addition to what fair profit they may make out of the open sale of their stores in Japan.

However, finally to remove any misunderstanding of our meaning, we hasten to point out that the temporary notification alluded to, permitting the export of rice until further notice, was withdrawn in May, 1874. By a subsequent notification the free export of rice was again sanctioned by the Government from the 1st April, 1875, inclusive. If this statement would have prevented any misapprehension of our meaning, we regret that it was not made in our first article. At the same time we think that our meaning should have been quite intelligible without it. Briefly, our argument was and is: that the Government of Japan in their capacity of, and with their powerful advantages as, traders, really prohibit similar trade by merchants, who find it wholly im-

possible to compete in the European markets with so felicitously situated an opponent. Further, that the Government, by their exercise of the monopoly we have described, practically annul the permission to export granted in Notification No. 42, dated 14th March, 1875: that the export of rice is thus in spirit prohibited to any persons who cannot purchase it at prices regulated by the competition of the Government,—prices which are never made public, and are so fixed as to preclude any possible margin of profit to the outside purchaser. This we think we can say and prove without being held to declare that the export of rice is prohibited by Government notification.

FATAL FRACAS -- GERMAN AND FRENCH SAILORS.

RECENT conflicts in this port between men-of-war's men of different nationalities, which perhaps are only remarkable in that that they are more extensive and have been attended with more serious results than others which have preceded them, should impress upon the minds of the various commanders the importance, if not of restricting the leave of their men, at least of coming to some mutual arrangement which shall prevent the coming ashore simultaneously of crews which are likely to quarrel. By an unfortunate *contretemps*, a large number of the men of the German corvette *Elisabeth* were given leave on the afternoon of the 4th inst. at a time when a very limited number of the French corvette *Atalante's* crew were also ashore. The result was, as will be seen below, a collision, in which the Frenchmen were attacked, outnumbered, one of them being killed on the spot, and the other so grievously wounded, that, if even he be not already dead, no human possibility exists of his recovery. To say that these men were murdered is certainly not too strong a phrase to employ; but to infer, as we regret to see has been inferred in the *Echo*, that the slaughter of them and their shipmates was devised in a premeditated and organised scheme of butchery is going a long way too far. The facts of the conflict, and the death of the two unfortunate victims, are sufficiently deplorable. There is no occasion to add to their horror by the implication of motives which there is *prima facie* evidence could not have existed. It is sufficient that a quarrel had taken place the day previously between French and German sailors: that the former had driven their assailants from the field: and that on the following day a large body of Germans, happening most unfortunately to fall in with comparatively very few Frenchmen, fell upon them, put them to flight, and stabbed two of them to death. This of itself is quite bad enough. The fact of so many of the *Elisabeth's* men being ashore is thus simply accounted for. The corvette was intended to sail for Nagasaki yesterday morning; but was detained through the German Minister, Mr. von Eisendecker, who was to take passage in her, having business in connection with the American mail, which would not permit of his departure before the 6th instant, till which time accordingly the sailing of the vessel was postponed. Leave was given to as many of the men as could be spared previous to the vessel's leaving. We are informed on good authority that that leave would not have been given had the officers of the vessel been aware that

any of the *Atalante's* men were on liberty. It is more justice to say that the most sincere sorrow is felt by the German Consul, the German members of the foreign community, and the captain and officers of the *Elisabeth* for the calamity, into the origin and fatal results of which the most rigid enquiry has been made on board the corvette, with a view to bringing both those guilty of causing the strife and those who slew the Frenchmen to justice. And when justice is done, the duty of the commanders of war vessels of the foreign nationalities will be to arrange the simple means of preventing the future possibility of such disgraceful, murderous, conflicts. There are seven days in each week, and thirty, more or less, in each month, and an arrangement is quite possible which will prevent men of vessels who are likely to quarrel and fight when on shore together from having leave on the same day. The following is a plain statement of the events.

On the evening of the 4th, a fatal affray took place between some German and French men-of-war's men at Takashimacho. It appears that on Sunday evening (3rd.) a free fight took place between some of the *Atalante's* (French) and *Elisabeth's* (German) men; and the former being more numerous than the latter got the best of the fight and caused the Germans to decamp from the neighbourhood. The next afternoon a few Frenchmen from the *Atalante* had liberty on shore; and in the evening about one hundred and twenty Germans from the *Elisabeth* were also allowed leave. Doubtless they felt rather sore at the reception their comrades had met at the hands of the Frenchmen on Sunday night, for the majority of them deliberately marched to the scene of the previous affray. Near the railway crossing is a Japanese hotel kept by one Fukuya. Upstairs were nine Frenchmen regaling themselves, when about forty Germans rushed into the house, ran upstairs, and instantly attacked the nine Frenchmen. Some of these made for the open windows, and sprang on to the ledge of the roof of the lower story, while others were unceremoniously pitched out of the room by the same places of exit, and had as many bottles, full and empty, sent after them as their assailants could lay hands on. The fugitives ran along the street with a crowd of Germans after them, and succeeded in getting away altogether, two of their number only having sustained serious injury. This occurred about half past six o'clock. Two hours later, three Frenchmen who had been in Benten Dori all the evening, and knew nothing whatever of the collision, were quietly wending their way towards Takashimacho, and had reached the railway crossing, when they met a large number of Germans. These men were excited by what had already taken place, and, as soon as they perceived the Frenchmen, gave chase. The three men fled in different directions, one running towards Ashirabashi. He merely succeeded in reaching the bridge when his relentless pursuers overtook him and attacked him with knives. He fell wounded in several places, one of his hurts being a gash in the right side, through which the unfortunate fellow's bowels protruded. Next morning clots of his blood were scattered about the bridge, partially covered with dust. Another of the three, thinking, most probably, to double on his pursuers, ran down a narrow passage between two houses, but after running a few yards he found that there was no outlet. In an instant his enemies were upon him, and a knife was plunged into his heart. With a wild shriek he fell to the ground, dead. He also received several other wounds in the throat. The third man succeeded in making his escape, though not scatheless. The dead and

the wounded were taken to the police station; and about ten o'clock an armed detachment arrived on shore from the *Atalante* and took them to the hospital. Next morning a *post mortem* examination on the body of the dead man was made before the French Consul, when reports from constables Hazel and Toms were handed in.

During the pursuit of the Frenchmen by their assailants, some petty officers of the *Elisabeth* exerted themselves to the utmost to bring their men to order, beating, it is said, some of the most refractory so violently as effectually to prevent their doing further mischief for a time. To these petty officers one French sailor, a bandsman we believe, probably owes his life. By them he was handed over to the charge of four sober German sailors of known good character, who were held responsible for his safety, and took him out of the reach of danger.

THE INSURRECTION.

Japan Gazette, 5th June.

The *Choya Shinbun* of yesterday writes:—A telegram from Kioto, announces that a despatch from the Yamaguchi-ken (Choshiu) states that the insurgents in that ken attacked the police station in Hagi at about 11 p.m. on the 30th ult., and set it on fire.—Another states that the shizoku in Susaka were arming against the government. Six of their principal men were arrested. About thirty armed men had entered the city of Hagi, where they acted violently and destroyed the police station. Sixty policemen were sent thither from Yamaguchi.—A despatch from the Yamaguchi kencho, dated the 1st instant says that a battle had been fought between the police forces and the rebels at Sasanami, Choshiu. The latter numbered about 130 and the struggle had ended in favour of the imperialists, who captured about seventeen Schneider-rifles and were in possession of the town of Sasanami, where half a battalion arrived from Umanoseki on the morning of the 1st.—A telegram from Kioto, sent at 7.30 a.m. on the 2nd, informs us that the police had retaken Akiragi village and marched to Kasega, where all the forces are expected to reassemble and march for the city of Hagi.—A private despatch from Kumamoto, on the 2nd, announces that the imperial armies in Higo had marched as far as Kokonoka-machi in Hitoyoshi and commenced a battle on the river Kumagawa, which runs close to the castle of Hitoyoshi. The insurgents are sending ammunition to Hinga along the Kakudo road.

An extra of the *Hochi Shinbun* of yesterday says:—A telegram sent by Governor Sekiguchi of Yamaguchi ken at 11.30 p.m. on the 30th ult. announces that large numbers of the shizoku in Hagi and Sashiki, armed with guns and swords, were ready to attack the Kencho, which was also prepared to receive them.—Another telegram from the same source dated the 1st inst. announces that during the night of the 31st, a suspected person was arrested in the city of Yamaguchi. He was found to be a spy of the rebels and confessed as follows:—About 200 shizoku of Hagi, assembled under the pretext to follow the imperialists to the seat of war in the South. Their intention was first to attack the imperial arsenal of Hagiwara, where they wished to seize the fire-arms, then to proceed directly for Yamaguchi, and thence to cross the strait of Shimono-seki to Kiushiu, in order to join the Kago-

shima insurgents.—To-day, the 4th, Mr. Arima, a police officer is expected to leave Tokio at the head of about 1,200 policemen, newly raised, for Hiogo.

An *Akebono Shinbun* extra of yesterday says that out of 5,000 policemen, who were recently enlisted in several ken, 2,000 will soon be formed into five battalions. Lieutenant-General Prince Higashi Fushimi-no-Miya is expected to take the command of this force. They will leave for Kobe in the *Saikio-maru* and *Toyoshima-maru*, which are expected to arrive shortly in Yokohama.

The *Hochi Shinbun* to-day writes:—A telegram from Kumamoto, dated the 2nd, announces that on the 31st ultimo the imperial armies marched as far as the village of Katari-mura, about one ri from Hitoyoshi castle, seizing on the road several batteries, where no rebel troops were encountered. In this village the imperialists were met by large forces of rebels. A severe battle followed and the former fought with desperation till about 4 o'clock p.m. But they hardly succeeded (*sic*) in keeping their position in face of the insurgents. A despatch from Kumamoto, sent at 11 p.m. on the 2nd, announces that many severe battles were fought since the 30th ultimo. At about 9 a.m. the same day the imperial forces attacked and seized the castle of Hitoyoshi. But as it was not a good position for the victors to stop in it was deserted, and we encamped on the river Kumagawa.—A despatch from Yamaguchi, sent at 1.40 a.m. on the 3rd, states that on the 2nd, a battle was commenced, in which the rebel commander, Machida, was killed, and all the insurgents in Bitsutsugi and Akiragi were entirely routed and fled in disorder. At about 11 p.m. the police forces were sent to Hagi. Large numbers of rebels were arrested, and good order is expected to be restored within a few days.

6th June.

A telegram from the Yamaguchi-ken, which was received at 1.30 p.m. on the 3rd instant in Kioto, announces that the insurgents in Hagi were totally routed and dispersed by the police force. Many were taken prisoners. A despatch from Kumamoto, sent at 9.40 a.m. on the 3rd instant, says that the imperialists set on fire the city of Hitoyoshi, which was entirely destroyed, and the routed insurgents fled in disorder along the Hinga road.

A person writing from Kagoshima states that Saigo is in Sadowara castle at the head of a battalion of picked and able bodied soldiers. Every point of vantage in hill or valley in the neighborhood is occupied by the rebel armies. The insurgents are becoming short of ammunition, and are very busy manufacturing saltpetre and gunpowder in Hinga and Osumi. They are also in want of fire-arms. They have collected fowling-pieces from the farmers, whom they have also ordered to join their party.

The *Hochi Shinbun* writes:—A despatch from Kioto on the 4th instant announces the surrender to the imperialists in Kagoshima of a rebel leader attached to the command of Kishima.—Another despatch says that on the same day the imperial armies attacked and stormed the insurgent batteries at Ozeki, Chosac, and Monga-baba. A battle was still going on in Kiyama, when this telegram left Kumamoto. A quantity of ammunition and Snider and Enfield rifles were captured from the rebels. About forty of the victors were killed or wounded.—The insurgent troops, who retreated from Takeda castle in Bungo, have re-appeared at Miyechi, where they

have again constructed a battery. Lieutenant-Colonel Oku attacked this, but was obliged to retreat. Another band of insurgents are encamped at Usuitoge. In the latter place a force, consisting of police and local shizoku, attacked, but were repulsed by, the rebels, whose numbers increase daily. They again threaten an attack upon the Owake Kencho.

The *Akebono Shinbun* writes:—When the victorious imperial armies had entered the city of Hitoyoshi, they found the castle empty, and no rebel troops were seen throughout the city. It is surmised, says a Kagoshima man, that as Hitoyoshi is not well calculated to support large armies for a long time, the insurgent troops vacated it in good order for the province of Hiuga, before the imperialists arrived close to them. They are thought to have established their head quarters in the castle of Miyaki, (Osumi) and to have fortified the strong and commanding places in Hiuga, viz., Masauki, Takagi, Oka and others. The Kiogawa river, which is the largest in the province, runs between these strong military positions. Masauki is a rich and prosperous town, and large armies can be supported in it for a long time. It lies about ten ri from the coast. Kirino is enlisting in Miyazaki, Hiuga, men to guard these places, and the rebels seem to have determined to defend themselves in these strong positions, and not to meditate any immediate attack upon the imperialists.

7th June.

The *Choya Shinbun* says:—A telegram from Kioto, on the 5th instant, announces that after the rout of the rebel armies in Hitoyoshi, they divided into two parties, both of which erected batteries; one about two or three ri from Hitoyoshi on the Okoba road, and the other on the Kakuto road.—A despatch of the 6th, says that of the Hagi rioters in Choshu, about forty were arrested that morning, and good order was partially restored in the city of Hagi.—About 500 insurgent soldiers are assembled at Imakai in the Yamaguchi-ken. Of these 200 consist of the remnants of the Mayebara party, and 300 have crossed the strait from Bungo to Choshu. An agrarian mob rose in the village of Arimamura in the Nagasaki-ken and destroyed two school buildings; but they soon dispersed. It is thought the Kagoshima Kencho will be removed to the island of Sakurajima. About 12,000 insurgents are encamped at Tenjinbara, close to the city of Kagoshima.—Tomimaga, a famous scholar of the Yamaguchi-ken, has left for Kochi, where he was discovered organising bodies of men and inciting them to revolt. A force of police was sent out to arrest him but he has not yet been found. The castle of Takeda in Bungo, captured a week since by the imperialists, is said to have been retaken by the insurgents.

Referring to the condition of affairs in Toshiu, the following particulars are given in several of the native papers:—

The shizoku, many of them very influential men, of the *Risshisha* (Independent Association) have repeatedly petitioned the local authorities for leave to form themselves into a militia, ostensibly for the protection of their homes and the province from the Kagoshima insurgents, who frequently menace to cross over into Shikoku, and so to carry war into that island. Their requests having been refused, they were greatly disaffected in consequence, and their President, Itagaki, and a number of their leading men, went to the Kencho, where angry words passed between them and those in authority. What followed is not known with certainty; but the local Government has strictly prohibited the entry of any strangers into the

province. In Sanuki, the adjoining province, the garrison of the castle of Marugame, which was formerly guarded by only four hundred soldiers detached from the Osaka garrison, has been reinforced by about seven hundred troops from Himeji in Harima. Several villages in the neighbourhood are occupied by police. A fort is now about to be constructed at Cape Wada, Hiogo ken, and that on Tempozan has been guarded by half a battalion of infantry since the 3rd inst. in case of any sudden outbreak in Shikoku, an event considered as of the first probability. One battalion which arrived from Sendai in Osaka a few days ago, has been sent to the Sakai ken to guard the coast. About eight hundred policemen have been enrolled in the neighbourhood, also for defensive purposes.

8th June.

The *Mai-nichi Shinbun* says that, though it was mentioned in several of the native papers that the insurgent troops, who attacked the castle of Saiki in Bungo, were driven back by combined forces of police and local shizoku, in reality, according to good authority, the entire castle city was taken by the rebels, who made a large number of shizoku prisoners. The castle of Oka, in the same province, was taken by the rebels, while the imperialists at Kinu-usu find great difficulty in holding their ground before the enemy.

The *Choya Shinbun* writes:—A telegram from Yamaguchi, dated the 6th instant, announces that 106 rioters have already been arrested in Hagi. But three of the ringleaders were still at large. A despatch from Kumamoto of the same day says that at dawn on the 5th, the imperialists made a sudden attack upon the battery on Onigatako. The rebels fled, leaving large quantities of ammunition and cannon. Four rebel soldiers were taken prisoners. In the afternoon, the insurgents attacked the imperial troops who then occupied the same batteries; but they were driven back. A despatch sent by Lieut. General Kawaji on the 7th, says that on the 6th, he attacked and took the batteries at Matsuo and Utsuhara, and took three prisoners, thirty guns, and one cannon.—A telegram from Kioto, despatched at 4.30 p.m., on the 7th announces that the insurgents in Bungo increase in number. About 1,500 armed men are encamped in the strong position of Utsukine, and about 1,000 others at Higeoka. The approaches to the former place are guarded by several batteries. Most of the rebel soldiers consist of Kagoshima men, and they are all armed with Sniders. But they seem not to be provided with large quantities of ammunition. The imperial armies, despatched for Utsukine, marched along the Utagi and Miyagi roads and those for Higeoka on the Nodzuichi, Togi and Yokoichi roads. The other imperial troops were marching on Inugai, which they intend to occupy. The insurgents in Satsuma have kept up a heavy fire since last week. They left Umamibara and Yabe and encamped at Takamori. A severe battle was fought at Kamikiba, which lasted two days and nights. The imperial armies at Matsukibara and Midzumata fought desperately against the rebels, who were thought to be in possession of twenty-four pieces of artillery. Many of the imperial body-guards were killed and wounded; and two cannon and a quantity of ammunition were captured by the victorious insurgents.

11th June.

The *Choya Shinbun* of yesterday says that a telegram from the South-West, dated the 8th instant, states that on the 7th the imperial forces made an impetuous attack upon the forts in the strong places of Matsui and

Kamibara. The insurgents fled in disorder, leaving the imperialists in possession of their fourteen forts. While the victors were in hot pursuit, they were attacked by a detachment of rebels advancing from the Kuni-no road. But the imperialists routed these also with considerable loss, and marched as far as within about 8 cho from Ogawa. Another telegram announces that the third division of the imperial armies, commanded by Lieutenant General Miura, attacked and seized Gikune on the 7th instant, and were encamped at Osakoi on the borders of Higo and Satsuma. On the following day they were victorious in another battle, after which the enemy fled for Okachi, whither the victors are preparing to follow them.

The *Hochi Shinbun* says:—A telegram from Kioto, despatched at 2.30 p.m. on the 8th, announces that two messengers, viz., Fujiyoshi and Muramatsu, from the Kochiken (Toshiu) had crossed the channel to the province of Hiuga, and had an audience of Kirino. This important matter was discovered through a letter found in the possession of the insurgents, whom Lieut.-General Kawaji's troops captured on the 5th instant, during the attack upon the fort on Onigatake.—A despatch from the Governor of the Oita-ken, dated the 10th instant, says that at dawn on the 8th the imperial troops commenced to march upon the rebels in Utsukinu and other places in Bungo.—The rebel armies are encamped between Hinga and Yoshida in the Kagoshima-ken, while the imperial armies are encamped about twenty-five ri from Okosu and Kamishiba.—The shizoku of Okayama-ken (Bizen) are divided into several parties, each differing in opinion from the others. A party, headed by Ikeda, hold meetings at his house; and the shizoku of Bicchuu and Mimasaku are very uneasy.—One battalion of shizoku, newly raised in Osaka, are expected to leave for the seat of war.

The following letter from Fukuoka is published in the *Nichi Nichi Shinbun*:—

The Kagoshima insurgents, who were besieged in the castle of Takeda in the Oita ken, were entirely routed on the 29th ultimo. When they first invaded that province, they threatened to attack the Kencho, which was unprotected. But the imperial troops from Kumamoto arrived before the rebels did, and drove them back to the castle of Takeda, which is surrounded by several streams. Many of the poor inhabitants of the city had no time to leave their houses, which were set on fire by the rebels in order to check the hot pursuit of the imperialists. Many non-combatants were burnt to death.—The Fukuoka ken is tranquil; and the castle is occupied by half a battalion of infantry. Fourteen men-of-war and transports are anchored in the port of Hakata, where plenty of money is in circulation. 5,000 coolies have already been sent to the seat of war. Their wages are fifty sen per day for each man.

The *Nichi Nichi Shinbun* says that many of the insurgents, belonging to Beppu's command, encamped at Kajiki and Gamo, talk openly of surrender. Their General is much provoked, and threatens to cut off the heads of those who suggest such an idea.

12th June.

The *Mai-nichi Shinbun* writes:—A telegram from Kioto, dated the 10th instant, announces that at dawn on the 8th an attack was commenced upon the insurgent troops on several points in Bungo. The imperial armies marched as far as within one ri of Utsukine, where a battle was fought.—A

telegram from Kokura, states that on the 8th an imperial detachment, composed of infantry, marines, and police, commenced to attack the rebel troops, encamped at Usukine, commanded by Kirino. Details will follow.—According to information received from the governor of the Oita-ken, the imperial armies were engaged on the 9th inst., and the insurgents in Usukine and the village of Fukuura were entirely defeated. The city of Usukine appears to have been set on fire, which destruction is ascribed to the imperialists.—It is rumored that large insurgent bodies on the 6th inst. again attacked the castle of Hitoyoshi which the imperialists seized on the 2nd inst.—Most of the Kagoshima people who removed to the island of Sakurajima, pin their faith on three men, Shimadzu, ex-Sadaijin, Saigo Takamori, and Dr. Willis, teacher of medicine and hospital surgeon in the Kagoshima ken. The latter has repeatedly been in fields of battle, having served with the British army in the famous siege of Sebastopol. He was also engaged in a battle, fought at Hakodate between the Mikado's and Shogun's parties. His salary is 300 yen a month. When Saigo first rose, he is said to have followed him as far as Yajiro or to have returned to Osaka. The poor and foolish natives are constantly saying that "Willis Sama is expected to arrive shortly with British war-ships to aid our Saigo Sama." When an American war vessel entered the Kagoshima harbor on the 26th ultimo, they observed that she was flying a foreign flag; but they could not distinguish between the British and American colors. So, great enthusiasm prevailed among Saigo's poor adorers who mistook the American for a British vessel.—Since the siege of Kumamoto was raised, about 150 rebels have surrendered to the imperialists. Sentences more or less severe have been passed upon them.—About thirty rebels in Hitoyoshi determined to go over to the imperialists. But unfortunately for them their intention was discovered immediately on their leaving the camp in Hitoyoshi. Fuchibe, a distinguished insurgent commander, pursued them on horseback, overtook them, and cut down two of them on the spot. Many of the remainder were arrested and brought back to the castle, where they are supposed to have been killed. This is the tale told by those of them who succeeded in making good their escape.

14th June.

THE *Mai-nichi Shinbun* writes:—A despatch from Midzumata, dated the 11th inst., announces that during the night of the 10th the imperial armies separated into three divisions and marched for Demidzu (Satsuma) by the roads Hirose, Takamiya, and Nabeno. At dawn of the following day a battle was commenced, which ended in a victory for the imperialists, who captured several prisoners and munitions of war.—A telegram from Kioto, sent at 10.5 a.m. on the 12th, says that a severe battle was fought at Usukine (Bungo) on the 9th and 10th. The rebels were entirely defeated and fled in disorder on the Saiki road.—On the 9th instant, Kataoka of the Rishisha company in Toshiu appeared before the Mikado's palace in Kioto with a petition to the Government.—Water piles, which were laid through the city of Kagoshima were destroyed by the rebels before the imperialists landed.

18th June.

Telegraphic communication has been extended to Yajiro, about eighteen ri from Kumamoto. A telegram from the former place, despatched on the 15th instant, an-

nounces that the imperial armies had entered Satsuma by several roads on the 13th. The insurgent camps at Yoshida, Marekata, Kakuto and other places were set on fire. The imperial reinforcements from the Kaitakushi in Yezo crossed the Okuma range, destroying several rebel batteries. A junction of imperial troops has been effected at Okoma. Only one soldier was wounded.

The *Hochi Shinbun* says:—A telegram from Osaka, states that the *Genbu-maru* arrived in Kobe from the South-West on the 15th. The following information has been received through her:—On the 11th inst., the *Nisshin* and *Asama-kawan*, cruising in the channel between Bungo and Shikoku, fired upon the insurgents in Usukine in Bungo, at the same time as the imperial land forces attacked them. At about 12 m. the same day the insurgents fled in disorder, and re-assembled at Saiki, whither the *Nisshin-kawan* followed them; and they then retreated to Shigooka of the same province. There are now no rebel troops North of Saiki.—Another telegram from Osaka, received on the 16th instant, says that Lieutenant Colonels Nozaki and Horiguchi arrived at Saiki on the 13th inst., and established their head quarters in the village of Sodegaki. They are waiting there for the arrival of reinforcements in order to march for Hiuga. On the same day, Colonel Nodzu attacked the town of Shigooka. Details were to follow.

It is rumored that on the 31st ultimo, forty-two insurgents hired fishing boats in Saga-no-seki in Bungo, and crossed the channel. They landed about 4 or 5 ri West from the harbour of Yawata in Iyo, Shikoku. When they left the boats, they gave thirty-five yen to the sailors. This is expected to be false. But 1,100 police, commanded by Arima, who arrived in Kobe from Tokio on the 9th instant, were despatched that night to the same province.

19th June.

The *Mai-Nichi Shinbun* says that a telegram from Kumamoto, on the 17th, gives the following intelligence. The imperial forces were prepared to march on the Higeoka road on the 14th instant. But the insurgents attacked the imperial armies the night before at Kiyama and Miojiu-dani, where the battle lasted till the following morning, when the rebels were driven back. The imperial troops on the Nakatsumure road advanced as far as Okubata and those on the Mikuni road as far as Asoyama. It was then found to be too late to engage in battle. The imperialists attacked the insurgents in Kudzuha from three sides on the same day, and a great number of the rebel soldiers were killed and wounded. The victors marched again on the two roads of Hatagacshi and Mikuni, and constructed batteries at a distance of 500 yards from the rebel fort on the summit of Mikuni. Communications with the imperialists in Higo and Kagoshima are open. Nothing of importance is reported from Kagoshima.

The *Hochi Shinbun* writes:—A telegram from Midzumata, sent at 9.25 a.m. on the 18th instant, announces that on the 17th, Lieutenant Uto marched on the Akune road at the head of two companies. At about 10 a.m. the same day they were encountered by about 200 rebels, who fired upon them from their battery on Kakarashi-toge. An engagement followed and the Lieutenant captured the battery, where he found one mortar, two cannon, and one case of gunpowder left by the rebel troops. Another despatch from Midzumata, dated the 18th instant, says that a rebel commander on the Denmidzu road, named Ito Shirozaemon, has deserted to the Imperialists.

According to the *Choya Shinbun*, on the 11th instant, while it rained heavily in Kagoshima, at about 9 o'clock p.m. the insurgents suddenly attacked the imperial armies in Kagoshima. At first the latter were partially defeated; but finally the rebels were driven back.

20th June.

A telegram from Midzumata, despatched at 11.40 p.m. on the 18th instant, announces that on that day two companies of the imperialists marched for the village of Dako, on the Kagoshima road. About 300 rebels were encamped in the village, and fired upon the imperialists, who routed them and pursued them to Mikune. The victors returned to the village at about 9 p.m., having captured about seven or eight rifles from the rebels. Fourteen of the latter were killed, while none of the imperialists were killed or injured. Another telegram, sent by Murata, Keibu of police in Owake, on the same day, says that at dawn on the 15th instant the rebel fort on Mikuniotoge was bombarded. About forty insurgents were killed by the first discharge, and many others by the second. Notwithstanding such injury, the rebels made a desperate resistance, which only ended at 5 p.m. the same day. They fled then in disorder, leaving the imperialists masters of the strong fort on the mountains.

The *Osaka-Nippo* says that, on the 29th ultimo, the imperial forces in Kagoshima attacked and seized the insurgent batteries at Tanoura and other places. They were retaken by the rebels, who drove the imperialists back in disorder. Sixty-nine soldiers were wounded more or less severely, and two lives were lost on the part of the imperialists.

The Western coast of the island of Shikoku, opposite to the shore of Hiuga and Bungo, is occupied by two battalions of infantry and a large force of police.

Of the wounded soldiers in the Osaka hospital, 1,114 have quite recovered, and have been reformed into a force named the Shuseitai. Lieutenant Watanabe has been appointed to the command. On the 15th instant they were paraded on the drill ground in Osaka.

SKETCH OF THE LIFE OF THE LATE KIDO, NAIKAKU-KOMON AND EX-SANGI.

(From the *Nichi-nichi Shinbun*.)

(Continued from last Mail Summary.)

When the momentous question of the capitalization of the Kuwa-shizoku's pensions caused so much excitement among our countrymen, Kido expressed the following opinions:—"The people living under a constitutional government should have political rights, and if they have those rights, they should be ready to risk their lives for the common weal. The shizoku in our country, who still preserve their hereditary pensions, have not yet awakened from their long sleep, commenced during the prevalence of the former government system. They must be made to abandon their slothful habits and awakened from their sleep if they wish to preserve their pensions. * * * Meanwhile the spirit of the people must be elevated." Kido devoted himself to the difficult and important business of capitalization, the regulations for which were issued last year. He assisted his ex-lord Mori and his clan in the preservation of their wealth. He was not contented with the alteration in the land-tax. During December last year, Governor Oyama of the Kagoshima-ken came to Tokio and petitioned the government for some special

measure for the shizoku's pensions of that same ken. Kido informed the ministry who were debating the subject of the governor's petition, that the government had no right to purchase peace from the Kagoshima shizoku by changing a regulation or law, which would cause the government to lose credit. But his opinion did not find favour among the other members of the ministry. In January of the 10th year of Meiji (1877) he followed His Majesty the Mikado to Kioto. Previous to this time, he asked repeatedly to be allowed to resign his post, for he thought that it was of no benefit to the country and people for him to stop in the government as long as his opinions were not acted upon. But his request was not granted by the Mikado, and he seemed to have determined to stop in his situation. One day before he left for the South, he met Okubo, Sangi and Prime Minister, and finding that their opinions coincided they proposed to commence a great change in the system of Provincial Government on their return from Kioto. During the time the Mikado was in his old capital, the disastrous news of the insurrection was received from the South West. * * * At this time, Kido asked leave to remain in Kioto and to issue orders for the expedition to Kagoshima. Further, he wished the Mikado to appoint him to a responsible post in the campaign against the insurgents, stating that he would be glad to be killed by them for his country. Before the expedition to Kagoshima was ordered the Home Minister arrived in Kioto from Tokio. Live-ly discussions took place between the Naikaku-komon and the Prime Minister in the Mikado's palace on the subject of the outbreak. (We were told by a gentleman a few days ago that Okubo was of opinion that before the order for an expedition was issued Saigo Takamori should be summoned and examined as to his wishes. But Kido said:—Since the Government exists any one who takes up arms without license should be ordered to be punished, although even the Government should have no power to withstand the traitor.) His Majesty the Mikado decided on the side of Kido. On the 19th February he addressed the Naikakukomon thus:—"My faithful servant! Stop by my side and aid me!" Kido then determined to serve to the almost of his ability for the welfare of the country. But very unfortunately for us he fell ill about the end of April. He became worse and worse. On the 19th May, His Majesty the Mikado visited him in person. When the emperor entered his bedroom, Kido endeavoured to get up. But the imperial visitor stopped him and comforted him by inquiring after his health. On the 25th, the decoration of the first class was given him. As he was in bed, Ito, Sangi and Minister of the Public Works Department, in his place received the decoration from His Majesty. On the following morning he died in his forty-fourth year, passing away as calmly as if he slept. During the time he was bed-ridden he spoke of nothing except affairs in the South-West. Two days before he left for the other world he got up suddenly from his bed and exclaimed, "Saigo! Don't you yet stop in your intentions?" He was much distressed for the future of the Government, and left various last directions in connection with political affairs. After his death he was promoted to the rank of Shoni-i and buried at Reizan, Kioto, on the 28th May.

(Concluded.)

MERCHANT COMPANIES.

(From the New Tokio Hanjōki.)

Since the first year of Meiji, trade, domestic as well as foreign, has been in such a state of prosperity, as was never witnessed before. Throughout Shita-machi, Yamamoto, Honjo, and Fukagawa, new streets have been opened, new bridges built, and new stores and shops constructed. Even the old yashiki of the late daimio are converted into new shops, so that no ground shall be vacant. Why is this so? Because, the shizoku's pensions being reduced, the ranks of the merchants have been recruited from their number. Why, then, should the purchasers decrease day by day, and the sellers increase month by month? Because productions have become numerous, and manufactures have improved. Carts after carts loaded with merchandise roll by, and production after production starts into being. Although such prosperity owes its origin to our commercial intercourse with foreigners, yet, unless the Government had removed the nation's fetters, and the people enjoyed perfect freedom, no such result could have been expected. At present about eight tenths of the Tokio citizens are engaged in commercial pursuits, and some of them realize quite large fortunes in a few years, while some lose their entire capital in a few months. Indeed, this is a trying moment for merchants, and not an idle period, as that of which the proverb speaks when it says, "a lucky man waits for fortune in his sleep." They must polish their nails till they are as sharp as a hawk's talons, and strive to gain a commercial triumph over foreign countries. If they fall down, they must never get up empty handed, for, finding nothing else on the ground, they grasp handfuls of horse-dung with which to manure their gardens. Such being the prevailing state of mind, there is not even a pawnbroker's kozo who now indulges in slumber, behind the lamp, with his abacus for his pillow, nor a saké merchant's apprentice who idly rubs his hands while standing on the snowy ground. Not because they feel no cold, nor want no sleep, but it is because they too have a full desire to make fortunes, and this induces them to forget their want of sleep and ignore the cold. In such a hopeful world, no one but a perfect fool would put his fingers in his mouth, and look after something to turn up. Recent times have seen the institution of ward offices, where the people meet to discuss commercial matters, market prices, exports and imports; and the management of public constructions and the repairs of roads are all within their power.

There are shipping offices for conveyance by sea, express offices for that overland, factories of every kind, and wholesale houses for all productions. Other commercial pursuits are conducted by companies of merchants. Among these concerns the First National Bank is the largest. Next to it, the Mitsui Company at Suruga-cho, the Ono Company at Tadokoro-cho, the Shimada Company at Yoroi-bashi, and the Horai-sha at Horai-bashi are considered the four wealthiest establishments in Tokio.* They have branch offices throughout the Empire, and will soon have establishments in foreign countries.

Two fishmongers, Kuma and Hachi, put down their loads by the Yoroi-bashi to take a little rest. Kuma says to Hachi, wiping the sweat from his face, "Look at the exchange

office! I wonder at the splendour of that structure, whenever I see it. It is only a question of money, whether one must close his life in a five-storied mansion, or in a poor hut. You see, 'the torments of hell may be avoided by virtue of money, and the happiness of paradise can be obtained by it, too. Really this is a world where money is the common enemy!'"

"Since the revolution," continues he after a while, "everything has undergone a change, but the balance of power between the rich and poor has never been cast. The banks and exchange offices keep money within their hands, but no single sen falls into ours. Well, we should be quite justified in setting fire to such a hateful building as that!" "No, you are wrong there," replies Hachi, "because you might get some money, but you could not keep it for three days, as you would not abstain from drink, nor from playing cards, which you are extremely fond of; and, when you have time, you addict yourself to singing parties and others pleasures. No, the balance of power between the rich and poor, is of no moment to such a person as yourself, who are always in extreme poverty from idleness. But, for my own part, I think it very pleasant to deposit a little money in the bank and then work for more."

"Absurd!" exclaims Kuma. "Can you get drunk through having merely seen a wine cask? No, for my part, I can not satisfy myself by merely looking at money, without spending it. But I have not seen one yen satsu for these few days, and I am much tortured by the dunning of the money lender, whenever I go out, and I am annoyed by my wife's murmurs, whenever I am at home. I feel as if I were in hell, but no rich man pities me, and a hundred banks do me no good." "Poverty comes not upon an industrious man, nor wealth to an idle fellow," says Hachi, "therefore your desire for wealth, without hard work, is just as though you attempted to throw a stone into the sun. It is all in vain."

"But I work tolerably hard," says the silly Kuma. "I had to go to that miser of the side street, to borrow from him a sum of eighty sen, as an aid to my earnings, which, however, he would not lend me till I had begged it of him very hard, ten times! Now I earn some money, by running about every day, but I have to pay for rice, salt, and other everyday necessities: besides, out of it I must pay my debt, so I have nothing more than a sen or two left from what I earn by a day's work, and I am compelled to spend that little for a cup of saké, to cure my fatigue, so that I can not get a single garment made however hard I work. Really, I am leading a smoke like (dreary) life!" "Your work is not sufficient, my friend," replies Hachi; "for suppose you worked extra every evening, after you had finished your regular day's work, and got an extra twenty sen. Now lay up that money for a month, and then you will surely find some cash in your pocket. But I know you don't work more than two or three hours a day, and then you go to hear the storyteller, or to sleep in the upper rooms of a bath-house. After all, I have never heard of a man who made immense wealth, without extraordinary labour; so, if you want it, you must grudge the waste of the shortest space of time, and employ yourself constantly."

At this moment, a dog runs off with a *katsuo* in its mouth. It is Kuma's; so the alarmed fishmonger darts after it with his pole, when another dog comes and takes off another fish out of his baskets, and, while the foolish

* This was written four or five years ago.

fellow is in a great flurry brandishing his pole, and crying, "beasts! beasts!" Hachi shoulders his empty baskets, laughing, and leaves his friend behind, with the remark, "This is your punishment, for spending your precious moments in vain talking! Look at my baskets, I have sold all their contents!"

This is a smart world, for Hachi (the bee) has stung Kuma (the bear.)

ABOUT THE TELEGRAPH.

(From the *New Tokio Hanjoki*.)

Telegraphic communication may truly be called the post of civilization, for by it news from Europe and America comes to the ears of Asiatics within a few days: indeed it is as quick as the flash of lightning. So as there is not one man, who need be ignorant of what is going on in the outer world, what a fool he must be who does not know what is taking place in his own country? Well, electricity having a rapidity sufficient to go round the earth seven times in a minute, the telegraph communicates two million words in an hour to a distance of one thousand ri, so that even the swiftest winged Tengu can not surpass its swiftness. If we refer to the period of the Kamakura Shogunate, we are struck at the stupidly slow method of carrying intelligence from one end to another of the Empire. It was as if one went home to make an arrow with which to shoot a bear he had seen running. When it was necessary to despatch a message, quite a crowd of stout fellows were required to carry the messenger in a *kago*, with which they ran, yelling and shouting, day and night, like ants swarming upon a sweetmeat. This was called *hayaori* and was considered to be most rapid means of sending messages at that time, but it took ten days to travel a hundred ri, so that an event occurring at the western corner could not be known at the eastern part of the Empire until a long time afterwards. It was as slow as a heavily burdened ox going up a steep hill. Indeed, there is as much difference as between clouds and mud, between the ancient and modern systems of communications. Therefore I think this fact alone may be sufficient to startle obstinate clingers to olden custom from their stupid slumber, and make them accustomed to fresh and convenient habits. Since foreigners came to Yokohama, everything, new and convenient, has been introduced, and telegraph offices have been established at various places: and since then we feel a distance of ten thousand ri as little as if the divided places were only next door to each other; for we can hear, as we sit, the latest news of London and know the most recent events of Washington. Besides, we can converse with our friends in those distant countries, as freely as if we saw their faces before us, and as to a great fire in China, we know of it before the flame is extinguished. Very wonderful, indeed! To speak of our own country alone, an event happening at Nagasaki in the morning is heard before the evening in Tokio, without troubling carriers or horses at all. So the government is enabled to know the state of things in all the provinces perfectly well before any disturbances arise, and merchants are able to find out the market prices before the mail arrives, while almost numberless advantages are put within the reach of every individual. In our country the first telegraph offices built were at Tokio and Yokohama, but at present there are several more offices in the capital, and the construction

of others is going on through the Empire. I hear that a great telegraph cable of more than 780 ri in length has recently been laid down between England and America, after a long time and the expenditure of enormous sums of money. Is this not a glorious accomplishment? Besides, all the large cities in Europe have wires laid across the streets as thick as cobwebs; and there every large hotel has its own lines communicating with theatres and other places of public amusement for the accommodation of the guests. Our government having issued permission to the people to construct private telegraphs, we trust we shall not be long before we see similar arrangements made in Tokio, where not theatres only, but some other places will have wires of communication with elsewhere.

Besides telegraph offices we have post offices, whenever we need to have longer correspondence, to our great convenience; and also the newly introduced omnibuses, which carry thirty passengers each, plying between Shinbashi and Asakusa, six times a day, for the cheap fare of ten sen each, which is reduced to five sen half way; thus enabling any one who has any weight in his purse to run about the city without putting his feet to the ground.

One evening, while I was strolling along the street enjoying the cool breezes and the clear moonlight, I found myself unintentionally before a little tea-house by a telegraph pole, so I went in there to take a short rest. The house resounded with cheerful laughter, which proceeded from the upper story, where an aristocratic looking youth was enjoying the evening in company with two singing beauties, and soon I heard the fashionable song, sung by the male voice, accompanied by the samisen: "Carriages and steamers, though fast, are still slow for good news; the swift messenger, the wire, is what I need for my love!" Then a sweet female voice answered:—"Photograph, though I see the dear face on thee, thou hast no speech; I wish I had a telegraph to talk through to my sweetheart!"

The younger of the two girls ceased playing her samisen, and said:—"I understand the telegraph is an invention, through which intelligence is conveyed to any place, however distant, but I doubt if it is anything to be used at present in social intercourse, although every song in fashion has the name mentioned in it. Besides, I always hear our student guests speak about the telegraph, magnetic influence, and electricity, which I cannot understand. The other holiday," she continued, "when I was invited to a feast given by certain gentlemen, I heard one of them say that he was entirely deserted by the magnetic influence, and seemed very distressed, while another was much delighted, saying that he had obtained the electricity, but they had on nothing but shabby summer clothes and *haori*, and I could not see any place on their persons where the wires might have passed through. Still, I thought that, the telegraph being one of the foreigners' inventions, it might contain something strange, not visible to the naked eye. However, I suppose," she went on laughing, "I may call a man the owner of magnetic influence when his love is accepted by my sister, (meaning her fellow singer) and the loser of it, when he is rejected. Is it not so, sister? But, my gentleman," addressing her guest, "your foreign style hair tells me that you are one of the magnetic gentlemen, so surely you can tell us what the terms 'magnetic' and so forth, mean. Do so, if you please, sir." "Don't talk folly, my dear," said the elder girl, pulling the sleeve of the younger, "that is a thing you need not know."

"Well the telegraph is an instrument," explained the youth, smiling, "through which the swiftest messages can be conveyed; but a man who gets official position through flattery and other unworthy means, is called the man of magnetic influence: that is, he is drawn to the position through others' influence, but I am not well acquainted with such practices as I am one of the members of a high family." Then, holding the tiny hand of the younger girl within his own, he added, "I should wish much, if the human body be a good conductor of electricity, that we could join our hands together, and exchange telegrams perpetually with one another." The clever girl put down her musical instrument, and, presenting a cup to her gentleman, replied politely: "Since your lordship is pleased to inform us that you represent a high family, I think I shall not incur the displeasure of your lordship, in saying a little more about the magnetic subject. Well, I have read in the *New Hanjoki* that we singing girls have some magnetic power with us, and I was quite puzzled at the meaning, but after close thinking, I have found that every thing in the world, including the human being, has some quantity of it, because a merchant has the power to attract his customers by flattery: an intelligent man to attract official rank, in exchange for his talent: a learned man, to attract fame, by publication of books; and a priest, to attract the offering of cash by his preaching; while, in our society of singing girls, the three strings of the samisen are the wires to attract guests, though, for myself, a graceless face like mine cannot possess any attracting influence at all." "You sly nymph, don't say so!" interrupted the nobleman. "My lord, listen a few moments more, if you please!" and she continued:—"However, if any other lady of greater beauty than myself, should carol a soft song, between her kaido-like lips, touching the samisen with her fingers as delicate as maple leaves, the hearer, however bold a warrior or savage a monster he may be, is sure to be entirely captivated and subdued under the soft influence. This is the attracting power of our class, excited through the three wires, instead of only one, which is usually needed for a telegraph. Now, is this not good, my lord? But please to excuse my vulgar sentiments." "Excellent, indeed!" exclaimed the nobleman. "I am really surprised at your intelligence. Now, I do not wonder that your fame has spread as widely and rapidly as the electric fluid. Well, we will be the best of friends."

As I listened till this conversation was over, I could not help saying in my heart, "Ah! dreadful is the electricity of that singing lady!" And I wished heartily I could telegraph my warning at once to the young gentleman thus:—"Beware, sir! When it is once excited, all your houses and precious possessions will be burnt down, and even your pension will soon be converted into ashes. You had better erect a lightning conductor over your head!"

A TRAGIC FRAGMENT.

The following scenes are from the popular Japanese tragedy "The Battle of Ichinotani":—

The dawn was breaking upon one of those lovely spots, which enchant the traveller as he passes through the country bordered by the inland sea of Japan. The neighborhood of this place at the time of the story was in a very unsettled state through the frequent battles which were then fought between the imperial forces and insurgents, the latter being headed by the Mikado's son, who had risen in

rebellion against his father. The clan of Genji joined the rebels, and the Heiké clan remained faithful adherents of the Mikado. Of this latter clan was a young nobleman of the name of Mukan-no-Tayu Atsumori. He was of prepossessing appearance, and as brave as he was handsome. He possessed a young, beautiful, and virtuous wife, whose fidelity to her husband, when he became engaged in the strife which devastated the land, led her to go in search of him, that she might in a measure alleviate the hardships which he had to bear; and, in the event of his being wounded, be near to him and tend his wounds with her own loving hands.

This lady travelled alone in quest of her husband; and on the morning of one eventful day she was wandering along the sea shore, going she scarcely knew whither. Her features were pale from exhaustion; but her lovely yet tear-dimmed eyes betokened unshaken determination. Her slender and beautiful figure gracefully wandered along the shore; and ever and anon she raised her eyes towards the heavens, and, clasping her hands, the agony of her soul was breathed forth rather than uttered as she exclaimed:—"Heaven protect me, and guide me to my darling husband. Surely he has traversed this rugged shore, and there is hope that we may meet again soon."

While she was thus pensively walking along, the lady's attention was attracted by the noise from the hoofs of a horse rapidly approaching. She listened intently, and her heart almost stopped beating under the anticipation that perhaps the rider might be her husband. Whatever her hopes may have been in this direction they were speedily dissipated, for in an instant or two the horseman was by her side. Perceiving a female, and, from her dress and bearing, evidently a lady of rank, the horseman reined in his steed, and the beautiful Tamaorishime found herself alone with her old lover, Hirayama Mushadokoro, an officer in the ranks of the enemy. This man was a most detestable and dissipated character, without one spark of honour or true principle. As soon as he recognized the lady, a diabolical grin lighted up his ugly features, and with a grace scarcely to be expected from such an uncouth figure, the unexpected and undesirable personage alighted from his horse.

"What!" he exclaimed. "The lovely Tamaorishime! Can it be possible! Well, this is a slice of luck for me! What fortunate wind was it that blew such a fair flower across my path? My pretty dove, you have never known how the thoughts of you have been buried in the deep recesses of my heart; nor how fondly I have cherished the hope, since we met at Miyako, of one day making you my wife. Ah! you recollect, do you not, how I sent my page Gamba to obtain permission from your parents for me to marry you, and to conduct you to my residence? While my servant was absent on this mission, I made every preparation for your happiness. But you disappointed my ambition by slaying my servant as a spy. But now, my honey-sweet bee, you cannot escape me! I am sorry to inconvenience you, but, as I have no *norimono*, you must mount behind me and I will convey you safely to my home." Saying this, Hirayama laid his hand upon the lady, but she indignantly shook him off and exclaimed:—

"You are an impudent fellow, Sir, and would meet with the reward your impertinence deserves were my husband present. You cannot claim my hand under the mere pretext of having received my father's sanction. Besides, I am already married to the lord Atsumori, whom I love more than I love my own soul,

and of him I am now in quest. I will trouble you to allow me to pass on."

"Not so fast! not so fast! my cherry blossom! So you are searching for him, are you? Perhaps it may be some consolation to you to know that you need search no further for your husband. Already he is sleeping with his fathers, for it is but a little while since he fell by my own hand."

"What! my husband dead, and you his murderer!" With this exclamation the devoted wife fell fainting to the ground. She soon recovered herself, however, and, drawing a small poniard from her bosom, rushed at the murderer of her husband, hissing rather than speaking:—"Taste the blade of my dagger, thou abhorred enemy of my soul!"

A grim smile lit up the diabolical features of the ruffian, as, seizing the slender wrist of the lady, he said:—"If you are so foolish as to raise your puny hand against me, you must expect to be dealt roughly with. Fain would I caress rather than forcibly hold that lovely hand of yours. Oh! listen to my protestations of love; be rational, and come home with me, I will make you more happy than your deceased husband could ever have made you. I have lands, riches,"—

"Stop!" cried his victim, her indignation and grief overcoming her discretion. "If the world had remained as it was, such a villain as you would not been allowed to tread the turf of the fields. Such a bloodthirsty scoundrel and ruffian would not have dared to touch the hem of my robe. Beware how you vent your insolence upon me." Exasperated beyond measure the infuriated lady again attempted to drive her dagger to the hilt into the breast of her tormentor, and the murderer of her husband; but her hand was roughly stayed, and the weapon wrested from her grasp, and she was thrown on the ground.

"Ah," you would slay me, my cherub, would you?" her assailant said, savagely. "You had better be careful what you do, girl, or worse will come of it. Promise to be my wife and you shall bask in the sunshine of happiness. Refuse," and the eyes of the wretch glared like those of a tiger as he concluded the sentence,—"refuse, and you are a dead woman."

"Kill me, if you dare, you ugly beast," was the undaunted reply.

Enraged beyond measure by her persistent rejection of his offer, the monster's love seemed in a moment to be turned into the deepest hatred as he uttered the words.

"Ha! You scorn my love. I would have preferred to see you bloom in the garden of happiness, nourished by my caresses; but as your proud spirit obstinately refuses to hear me, you may give up all hope of ever leaving this spot alive."

The villain had scarcely concluded his threats, ere he drew his sword and thrust it deep into the breast of his helpless victim, who fell back with a wild scream. At this moment the murderer heard the sound of an approaching horse, and mounting his own steed hurried away.

* * * * *

The armies of Heiké, with which were the Emperor and some members of the imperial family, were all embarked in war vessels and awaiting orders to start for the field of battle, when the noble lord Atsumori, who had lagged behind, galloped towards the place of embarkation. He was unattended, and when he arrived at the beach he was mortified beyond measure to find that there was not a boat to convey him to the fleet. With his usual impetuosity, however, he forced his foaming steed into the sea with the intention of swimming to the ships. He had not proceeded

far when he was startled by hearing himself challenged from the shore. Turning back he perceived an officer belonging to the army of the enemy, who cried out, "Come back! come back, young man of the Heike! If you are not a dastardly coward, don't turn your back to an enemy, but come and try the edge of your sword against mine, I am Kumagaya Jiro Naozane, an officer in the army of Genji."

Thus challenged, the young Atsumori, without the slightest hesitation, quickly wheeled his horse about and swam towards the sandy shore. Soon the swords of the two warriors were flashing in the air; their armour glistened in the morning sun as they rushed at each other, while the clanging of their swords could be heard for a considerable distance. As length both blades broke simultaneously. Having lost their weapons they seized each other by the body; and both fell heavily to the ground, where the struggle was soon brought to a termination by the superior strength of Kumagaya who succeeded in taking captive the young lord Atsumori.

"Since you have been so unfortunate as to fall into my hands a prisoner," said the conqueror, politely, "pray tell me your illustrious name, so that your gallant conduct may be made known to the world. And if you have any message, or any thing to send to your friends and relatives, it will give me the greatest pleasure to fulfil your commands."

"The warmth of your speech makes me believe that you are not only the bravest warrior of the whole army of Genji, but also the most kind-hearted, and I esteem it an honour to die by your hand. As to your generous proposal, I do not think it is necessary for me to trouble you, as I have long since devoted my life and property to the Mikado, and been prepared for the worst event that might overtake me. However, on second thoughts, I think I will avail myself of your kindness and send a message to my parents, whose grief when they hear of my loss will be greater than I can endure to imagine. Therefore I trust you will convey to them my dead body and some words of comfort. My name is Mukan-no-Tayu Atsumori; and I am the youngest son of the Sangi Tsunemori."

On hearing that the young man lying at his feet belonged to such an illustrious family, Kumagaya instantly assisted him to rise, saying to himself that he should not be wronging the cause for which he was fighting if he allowed the young man to go. He then addressed himself to his prisoner, and told him that he had no intention of killing him, and requested that he would depart as quickly as possible before any one else came about. He had scarcely finished speaking, however, when Hirayama Mushadokoro, who had been an eye witness of the affray, though neither of the combatants had observed him, appeared at the head of a large troop of soldiers and cried out in a hoarse voice.

"Ha! Kumagaya; will you act the part of a traitor by saving the life of a nobleman of the Heiké family? If you persist in doing so, I must be under the necessity of arresting you both."

Kumagaya was astonished at being addressed thus, and had not a word to say. Having passed his word that the young man Atsumori should escape, the brave warrior was placed in a dilemma. From this unpleasant position he was released by the generous-souled Atsumori, who said, calmly:—"Knowing, that the fate of Heiké is sealed, I have no desire to live any longer. Cut off my head this moment, Kumagaya, and wipe off the unfounded suspicion of treason which rests upon you. The young man then turned his face to

wards the west, and, clasping his hands, awaited the blow. Reluctantly the bold warrior turned to perform the deed his soul loathed, but the handsome form of the youth, together with his fearless demeanour, awoke feelings of sympathy in his heart and he shook like an aspen leaf.

"Why do you hesitate?" asked Atsumori, turning his face so as to look over his shoulder, and gazing wonderingly at the old soldier, who replied:—

"Your noble countenance and form put me in mind of my son, whom I left at the camp in a precarious condition from a wound received in battle; and I cannot refrain from feeling anxious about him. I know it is but the weakness of a father, but I cannot help it; and I can realize the misery I must inflict on your parents by depriving you of life."

"Fie! You, a brave soldier, to talk in that sentimental manner! Take my head, and afterwards pray for me."

Recovering his equanimity somewhat, Kumagaya lifted his sword, and with one blow severed the head of the Lord Atsumori from his body. The warrior instantly picked up the gory trophy of his valour, and, turning to his companions, said in a voice choked with emotion:—

"I, Kamagaya Jiro Naazane, have cut off the head of Mukan-no-Tayu Atsumori, the most illustrious nobleman of Heiké."

A short distance away from the tragedy which had been enacted, lay the almost lifeless form of the lady Tamaorihime. She had been prevented from witnessing the affray, but on the name of her devoted husband being mentioned it reached her ear. With great difficulty she called out:—

"What! what is that I hear? Who has seen my lord Atsumori? I so much wish to behold his face once more before I die."

Who is the lady that asks for the fallen hero?" enquired Kumagaya, coming close up to her. "Why," he continued, "you are severely wounded; how has that happened?"

"I am Tamaorihime, the wife of Mukan-no-Tayu Atsumori. Have you seen my husband? Ah! my sight is already failing," replied the lady.

"Here is the head of your husband," said the warrior, holding it in his hand.

The dying lady pressed the gory head to her breast, and, with almost maddening frenzy, exclaimed, "Oh! my husband! my darling husband! what a sad meeting is this! I have searched long and faithfully for you, hoping to meet you alive. But, instead of my darling husband, I met that ruffian Hirayamano Mushadokoro, whose insolence and rough treatment provoked me to strike at him with my dagger. But from the weakness of my arm I failed to kill him and am mortally wounded myself instead. What a cruel fate is ours! When we last met, you sat and played the flute beside me in the castle, my darling husband. Though our life in this world has been of brief duration, we shall be joined in the next, where our life and happiness will be eternal."

Embracing the head of her dead husband the fair lady expired.

Kumagaya muttered to himself. "Sad, sad, that such a couple of promising young buds should meet with such an end as this! What stranger will linger over the grave of this unfortunate but noble pair, and breathe a word in praise of their devotion to each other?" With an earnest prayer the warrior placed the two bodies together, and covered them over: then mounted his horse and galloped away.

THE CONDITION OF THE IMPERIAL AND INSURGENT ARMIES.

(From the *Hochi Shinbun* of the 13th June.)

The power of the insurgents seems sometimes to be waning and at other times growing more and more vigorous. We cannot yet say when the insurrection will be entirely suppressed. The entire province of Higo has been taken by the imperialists; the greater part of Bungo is governed by the insurgents, while the imperialists have seized the castles of Hiroyoshi and Takeda and the rebel troops are now flourishing in Utsukine in Bungo. Now looking on the condition of Kagoshima, we observe that there has taken place no great battle between the imperial and rebel armies. Our troops in Kagoshima are considered to be defending themselves instead of endeavouring to make any attack upon the enemy from our side. Will a general attack upon the insurgents from our side entail a sacrifice of a great numbers of lives? The rebels in Utsukine were said to have been routed a few days ago, but we have not yet heard that they have been dispersed or have retreated from Bungo. The seat of war is so extensive having an area of about seventy ri in line, and the rebel armies sometimes appear at one place and sometimes at another all over the four provinces of Hiuga, Osumi, Satsuma, and Bungo. On their defeat at the South, they reassemble at the North; and if they are worsted in the East they make a stand in the West, carrying the havoc of war to whatever place they march to.

Thus the entire power of the insurrection is not confined to one place. The troops are scattered here and there dividing their power to the great consternation and inconvenience of the imperialists. Consider that the rebel armies are constantly entering the province of Bungo, placing the imperialists in exceedingly difficult situations and compelling them to guard an extensive line against the insurgents in addition to sending out several divisions to encounter them in other places. But the insurgents, have found no inconvenience in moving wherever they wished because they found rice, money, and other important things on their march, and increased their numbers by the excited shizoku flocking to their standard. * * * * * Is it because of all this we are to consider that the suppression of the rebellion is near at hand?

Now the extension of the scene of war is not caused by the prosperity of the rebel power. It is known that they cannot support themselves for any great time, and they have divided their forces for the purpose of obtaining the aid of others. Their desire has not been to separate the power of the imperialists. They are considered to have been much deceived as to the strength of their own power, so they endeavoured to cross the channel to the island of Shikoku, hoping to be joined and aided by the local shizoku there. The imperialists on the other hand desire nothing more than to be conducted to them!

Now the hot season is approaching it becomes more and more burdensome to fight a battle. The wounded will suffer more from the heat than from their wounds; and the hot and moist climate of the South-west, creates the gravest fear that pestilence will add extra horrors to the difficulties of the contending parties. * * * As we have remarked above, the rebels are now much discouraged and there are only two methods for us to pursue; and what are they? First we should

cease to attack them for some time, defending ourselves in strong places and waiting for a good opportunity to recommence the campaign, or, secondly we should commence a general attack upon the rebels, wherever they may be, previous to the arrival of the hot season, regardless of the loss of our soldiers, our object and desire being the entire suppression of the insurrection at any cost.

Now we consider that the imperialists ought to follow the second plan. The notification No. 7 which was published in our paper on the 12th instant (translation of the notification appeared in the *Japan Gazette* on the same day) assures us that the power of the rebels has considerably diminished. They are now being driven here and there; if this is the case, the imperial troops by concerted action can fall upon and crush them, or at all events they will again find the enemy's camp deserted, as on the Uyeki road before the siege of Kumamoto was raised. If we delay, some very unexpected event may at any moment occur in the other provinces. The hot season has not yet arrived and consequently no great inconvenience is felt by the imperial armies, who are anxious to engage in another campaign.

BANKS FOUNDED WITH GOVERNMENT BONDS.

(From the *Choya Shinbun* of the 15th June.)

The Nobles' Bank (the Fifteenth National Bank) has already been established, and if what we have heard about it is true, it was established under favourable circumstances, and so calculated to prove convenient to the nation and profitable to the proprietors. One reason of its success will be because the government bonds for the incomes of the nobles, which they pledge to the government as security, are not yet allowed to be sold or (otherwise) pledged: as for instance, a noble holding some government bonds to the value of one million yen, cannot sell or pledge them for a trifling sum of five or six yen, but can only preserve them in some box where they only produce a certain interest each year. But now the nobles have issued bank notes to the value of the Government bonds which they pledged to the Finance Department as security. They lent a large sum of paper money (15,000,000 yen) to the Government, receiving the interest of 5 per cent per year. All the expenditures and salaries of officers of the bank, will come out of the interest, which will exceed all such disbursement. We do not distrust this system at all, as the Government, as well as the nobles, will derive considerable benefit from it.

A few days ago we heard that the shizoku are also desirous of establishing a bank by pledging their public bonds for their incomes, and if their paper money be lent to the government, as that of the nobles' bank, it will confer a great benefit on the shizoku. * * * *

* The nobles' bank will only employ a few officers so as to reduce the expenditure; and it will be sufficient for the bankers to attend to the business and see that there is no inconvenience created in exchanging the bank-notes. Thus, there will be no danger to the business through the mismanagement of employees. Some of the shizoku propose obtaining a license to establish a bank, and to issue bank notes by pledging the Government bonds for their pensions to the Government, which are to be given them this year, in the same way as the nobles, with this exception, that they do not desire to receive any interest from

the Government, their object being to aid in defraying the Government expenditure. We much admire them for their good intentions; but if they receive no interest, the expenses of their establishment cannot be sustained.

WHAT THE KAGOSHIMA INSURGENTS WANT.

(From the *Choya Shinbun* of the 3rd June.)

A disturbance having broken out in the country, we must inquire into its origin, as, if we do not, we can have no means to form an opinion upon it. Since the Kagoshima insurgents took up arms against the imperial forces, one hundred and twenty days have elapsed. So much has been said of their movements that but little remains to be related. Referring to the origin of their rising, some say that they were much provoked to find that their opinion on the advisability of a Korean expedition did not find favour; and others say that they desire simply to change the ministry; while others again state that the insurgents are moved to revolt by the conspiracy of some of the ministers to assassinate Saigo and two others.

Now we, having examined into the conduct of the Kagoshima men during the ten years which have passed since the establishment of the present government, consider that their treachery had not its origin in the frustration of their hopes of a Korean expedition, nor in their wish to change the ministry, nor their intention to bring the government to book for having suborned assassins. They had decided on rebellion ten years ago. So, although a Korean expedition had been sent as they desired, and although many of the ministers had resigned their posts, they would still not have ceased to entertain designs of treason, and whether the street rumors be true or not, they would have persisted in their conduct. Why do we say so? Any one can easily come to the same opinion by taking the trouble to consider the conduct of the Kagoshima men during the past ten years.

The Kagoshima Han greatly aided the other daimio in the overthrow of the Tokugawa government and the restoration of the Mikado's authority. But this was not done for conscience sake. They wished themselves to succeed to the government of the Shogun. So, before the establishment of the imperial government as it now exists, they formed a league with the other daimio. But when the present system was established their schemes were opposed by some of those daimios upon whose opposition they had not counted, or thought that if it was offered it would be of no importance. Still, notwithstanding the abolition of the rank and functions of daimio, the Kagoshima Han was not changed at all. The insurgents' chief desire was to overthrow those who were an obstruction to the furtherance of their traitorous schemes. With this view they excited Eto of Saga, and Mayebara of Choshu, to rise against the government, and they worked to diminish the influence of the more powerful of the ex-daimio. And, at last, the Kagoshima men, then fearing no opposition from the other clans, took up arms against the authorities. The people of Kagoshima are subjects only of Shimadzu and Saigo, and not of the Mikado.

DR. ERMERIUS, of the Osaka hospital, returns to his native country on the expiration of the term of his agreement. A farewell banquet has been given in his honor by the native doctors in the hospital.

TWO ISLANDS.

(From a letter sent by Mr. KENYO from the Kagoshima camp to the *Hochi Shinbun*.)

Some days ago a company composed of civil officials and police visited the two islands of Tanegashima and Kikaigashima, both of which lie south from Kagoshima harbour. In the former they arrested a physician belonging to the insurgent hospital in Hiuga. The poor physician confessed on examination that, on the 21st ultimo, he landed on the island wishing to purchase some medicine there. Very unfortunately for the rebels, he was discovered and arrested when on the point of leaving the island with large quantities of medicine, consisting of the roots and barks of various trees and plants prescribed in the Chinese pharmacopœia. I obtained the following information, from a good authority:—Tanegashima is about 30 ri in length, about 3 ri in width, and contains fifteen villages. Of these Nishinoma is the most populous and prosperous. It possesses several accomplished scholars both in Japanese and Chinese literature; seventeen public and ten private schools have been established, each of which is attended by assiduous students. Out of 4,576 houses 2,200 belong to shizoku; and of the whole population of 19,026, the shizoku reach the large number of about 9,900. General excitement prevails throughout this island. About 380 of the shizoku have joined Saigo. A temporary police station was established some time since to the satisfaction of the islanders, most of whom are engaged in fishing and agriculture. They are generally honest and agreeable. According to a tradition current among the natives, they are the descendants of the Taira clan, which was destroyed about 700 years ago by the Minamoto clan.

Iwogashima contains only about 50 houses and a population of 240 persons. They are also said to be descendants of the Taira clan. The island is only about 3 ri in circumference. Potatoes and barley are the usual food of the islanders, who dress in dark colored clothes, which they fasten with a small ribbon. The principal production of the island is sulphur, of which about 60,000 pounds are taken away yearly. A Kagoshima man has all the trade in this product; and he also employs about eighty of the islanders in the manufacture of lime. The remainder of the inhabitants follow the pursuits of agriculture and fishing. During the ascendancy of the Shimadzu clan, the islanders were compelled to pay a tax of twenty rolls, worth about yen 2.30 each, of coarse cotton cloth, and 1,200 pounds of lime. On the feast of the god of sulphur in the island, the Shimadzu clan used to present him with 2½ koku of rice and a small sum of money. Since the establishment of the present government the islanders have ceased to pay the tax. A stone monument to the memory of the Mikado Antokutei is found on the island. There is no coinage or paper money. The people trade with a wooden ticket, issued by the sulphur firm, about one inch square, and bearing the inscription of a certain amount of money. Sometimes, barter is resorted to. The island is seldom visited by the people of the mainland. On the arrival of the new kencho authorities in the steamer *Naninamaru*, the astonished islanders, who had never seen a steamer before, assembled along the coast. Some of them took the steamer for the soul of the Mikado Antokutei arriving from heaven, and others for a mission from Hades. Nobody dared to accost the strange visitors on their landing. It is the old story of Columbus and the American natives over again.

GREAT CHANGE IN THE RELATIVE CONDITION OF IMPERIALISTS AND INSURGENTS

(From the *Nichi Nichi Shinbun* of 18th June.)

According to several telegrams from the seat of war, the imperial armies were victorious in a severe battle, fought during the two days of the 13th and 14th instant, in which the insurrectionary armies appear to have had no organisation to enable them to keep their position, but had to give way before the imperialists. As we have derived our information only from telegrams, we are unable to give further particulars until we receive letters from the seat of war. But we know that on the 13th instant, the 2nd division of the imperial armies, commanded by Lieutenant-General Yamada, left the vicinity of Hitoyoshi Castle and advanced on the Makiba and Tajiro roads, divided into three parties. At dawn on the 14th instant, they attacked and seized the strong batteries erected on both roads, and hotly pursued the routed insurgents. The right wing of the division seized Yoshida, the left wing I-i-no, and the centre encamped at Kakuto. The latter lies about 8 ri and 13 cho South-West from the castle of Hitoyoshi, and is a place well situated for communication and transport. Besides, it is in a strong and advantageous strategic position, commanding the two provinces of Higo and Hiuga, having mountain ranges on either side, on one side the Kasagi and on the other the Kunimi mountains. Notwithstanding its strength the imperialists advanced upon and carried it. The 3rd division, commanded by Lieutenant-General Kawaji, and another division, commanded by Lieutenant-General Miura, commenced a battle at dawn on the 13th instant, entirely defeated the insurgent troops encamped at Okawa-u-cho, and pursued them along the Okuchi road, seizing several forts during their march. It is expected that the castle of Okuchi will also be taken by our victorious armies within a few days. Thus, the imperialists having established their camps over the districts of Kakuto and Okuchi, there is no position in which the rebels can check them North of the river Sendai-gawa. Now, communication between the insurgent forces at Demidzu and Akuno has been cut off; and these rebels should soon retreat without waiting an attack by the imperial troops. So the rebel armies find themselves circumscribed, and have no fixed plan of defence. One of their divisions, which penetrated into the province of Bungo and there attacked the imperialists, was also routed and obliged to retreat as far as Saiki. They are expected to return shortly to Hiuga in disorder, and the rebellion will then be confined to the three provinces of Hiuga, Osumi and Satsuma.

These three provinces comprise an extensive area; for it is many miles from the western shore of Satsuma to the eastern coast of Hiuga. As the imperial troops occupy the city of Kagoshima and its vicinity, the rebels are expected to make their lairs in Sadowara, Miyako-no-jo and Yohi, and some other places, where they hope to bid successful defiance to the movements of the imperialists. The insurgent soldiers are well versed in the modes of fighting in a mountainous region. * * * They are endeavouring to discourage our troops by appearing here and there. How will the imperialists vanquish these desperate insurgents? The latter are said to have become greatly discouraged; but they still number about 20,000 men. The imperialists are about 40,000 strong, more or

less. They are divided into several parties, defending many miles of ground on one side and attacking the enemy on the other. They are constantly experiencing inconveniences through deficiency in their number. (Some writers say that the imperial armies in the South-West muster about 50,000. Of these 10,000 have been killed and wounded.) Why, being in such number, do they not in one campaign fight their way into the very lairs of the rebels. Why do they not pursue the routed insurgents to Satsuma and Hiuga, after having defeated them at Okuchi and Okune? Other people say that the imperialists are very slow to march. If they cannot quickly destroy the rebels in their fastnesses they will have no chance to attack them during the coming rainy and hot weather, during which the insurgents will regain courage. But we say that the imperialists are not yet in sufficient numbers, and that they ought to be reinforced to such an extent as greatly to outnumber the rebels.

According to the history of Toyotomi Hideyoshi's expedition against Shimadzu, the former collected about 150,000 soldiers in Osaka, and provisions for one year in Kokura, Kiushiu. He thought it necessary to have three times as many troops as followed Shimadzu. When he had established his camp at Taiheiji, and despatched a division of his troops to Osumi by sea, his armies numbered about 250,000 men. With such large forces he was able to subdue the rebels in six months. * * * * *

NIPPON NOTES.

It is rumoured, says the *Akebono Shinbun* that the shizoku in Toshiu threaten an armed revolt.

SINCE the establishment of the nobles' bank, 2,250,049 yen have already been sent from the bank to the Finance Department.

H. E. OKI, Minister of Justice, returned on the 6th inst. from Kioto, in the *Nagoya-maru*.

RECENTLY 130 shizoku arrived in Tokio from the Yamagata, 20 from the Niigata, and 22 from the Fukushima ken.

SIX small steam vessels, which were anchored in Hiuga, have been towed by a large steamer into the harbour of Kagoshima.

THE *Hochi Shinbun* says that a certain Akidzuki, of the Wakayama-ken, has purchased the British schooner *Flying Spur*, 190 tons, for 2,500 yen, renaming the vessel the *Tsukakuro-maru*.

ON the 28th ultimo a conflict occurred between the garrison troops and policemen at the Nakano theatre in Osaka. On the following day about thirty soldiers came to the same theatre and demanded admission without payment. When this was refused, they forced their way into the building, whence a number of policemen endeavoured to eject them. A soldier struck a policeman, whose comrades came to his assistance, and a general fight followed. The theatre was closed. The garrison troops in the barracks prepared to attack the police station, and high excitement spread through the city. At length the commander of the troops, the governor of the Osaka-fu, and many high officials, appeared on the scene of strife, and put a stop to the row, in the course of which several men on both sides were more or less badly hurt.

WE learn from the *Banmei Shinshi* that the Shigakko-to, now the insurgents, in Kagoshima, were well provided with various military

stores, medicines, and surgical instruments, and have among them about three hundred well-trained physicians. Their wounded are skillfully treated, and the killed are buried with the usual ceremonies. Stone tombs are erected over their bodies, and bear minute descriptions of the killed. Many such tombs were found in the village of Shimazaki, about 20 *cho*, from Kumamoto. But the imperial soldiers overthrew these, and thereby provoked great excitement among those of the Kumamoto insurgents who surrendered to the imperialists on the raising of the siege of Kumamoto. They took the first opportunity of deserting, and fled to Hitoyoshi to rejoin the insurgents. The imperialists in Kagoshima have also suffered great loss of popularity for their conduct in this matter, and because they constructed a battery with gravestones which they collected from the monasteries, close to Kagoshima.

THE *Nichi-nichi Shinbun* says that a prisoner now in Kagoshima has stated that Kirino has crossed the channel into Shikoku.

THE *Nichi-nichi Shinbun* writes in reference to affairs in the Kochi-ken as follows:—Nothing out of the common is going on there. Only one matter, which attracts our attention, is the memorandum addressed to the Government, by the Risshisha society. Three powerful and influential associations in Toshiu, namely; Risshisha, Saikensha, and Chiuritsusha, having decided to offer a memorial to the Government on some important subject, which is not stated, found that the opinions of each differed from the others. Men of talent and ability in the Kochi-ken interfered with them, and advised them that it was very wrong to present a memorial to the Government containing different opinions. They tried to the utmost of their ability to bring these societies to an understanding. At length Mr. Kataoka, a distinguished member of the Risshisha, brought a petition from that society to the notice of the Government in Tokio before the other companies, among whom excitement prevails, in consequence. (We have heard from a gentleman that the subject of this memorial is to establish a representative assembly, and that the bearer requested the Government to decide the matter within three weeks. Besides, it is said that Itagaki, ex-Sanji, and founder of the Risshisha, was repeatedly summoned to render public service, but has as frequently refused.)

THE nobles' school at Nishiki-machi, Kanda, Tokio, is now completed, at a cost of 130,000 yen. About 170 pupils of both sexes have already entered. Yesterday Their Excellencies Iwakura, Uchiijin, and Tanaka, Vice-Minister of the Educational Department, Tachibana, Director of the school, Mori, Vice-Director, and about twenty other nobles assembled in the new school building, and a provisional opening of the school was effected in their presence.

CONSPIRACIES of shizoku are said to have been discovered and frustrated in the Iwate and Awamori ken.

GREAT prosperity is said to prevail in the island of Yezo, owing to the successful result of the herring fisheries. Numbers of the inhabitants are said to have already made as much this season, as they generally do in the course of a year.

(Extract from a letter sent from Kagoshima to the *Akebono Shinbun*.)

THE poor inhabitants of the Kagoshima-ken, where the shedding of blood and other wicked matters are daily taking place, have become

much afflicted for the want of food. The Kagoshima-ken does not produce a large quantity of rice, wheat, and other cereals, in fact not enough for the support of the inhabitants; and so large quantities of rice are yearly imported from the other provinces for their consumption. This year, owing to the war, no merchant vessels or junks are allowed to enter or leave the Kagoshima-ken. Lately the poor people having no provisions on hand, and the imperialists, desirous of saving them from starving, issued an order to the effect that they should be supported by the Mikado's government on returning to their homes in Kagoshima, where men of above seventy years of age and boys below fourteen and women are allowed to enter without a passport.

The insurgent armies have constructed strong forts on Nishi Tayama, Iwazaki, Tani and other places, close to the city, which are mounted with cannon, but no battle has taken place during the past week. The imperial troops have nothing to do, and the soldiers spend their time in fishing, singing and other pleasures. Yesterday morning (24th ult.) the imperial troops marched against the fort on Nishi Tayama, where they were received with a tremendous fire, which was kept up for about three hours. The troops were at length driven back, leaving their commander, Nagata, dead on the field behind them, and about sixteen or seventeen soldiers were killed or wounded.

Only the city of Kagoshima and the island of Sakurajima are occupied by the imperial armies, all the rest of the country by rebels. Some days ago, Mr. Watanabe, First Secretary of the Kagoshima-ken, visited the island, and I was allowed to accompany him. It lies about three *ri* from the main land, and is about seven or eight *ri* in circumference. In the central part is a lofty mountain, whose summit was covered by clouds when we landed there. It rises perpendicularly. Many small villages lie along the foot of the mountain. The island produces only potatoes, barley, oranges, radishes, and a few other vegetables. The islanders eat potatoes and barley. We landed at the village of Furusato and took a rest at the house of the ex-Nanoshi. The Secretary ordered the principal islanders to assemble, and kindly explained to them the invalidity of a notification, which the ex-Governor Oyama issued to excite the people. Our language is not understood by them; and a Kagoshima man served as an interpreter between the Secretary and the islanders. Some wounded rebels were found and they were called upon to surrender.

H.E. Terajima, Foreign Minister, and Shioda, First Secretary of his Department, have left Tokio for Kioto.

ORDERS for the levy of 1,300 police in the Kanagawa and nineteen other ken have been issued.

H. E. ENOMOTO, Minister for Japan in Russia, has repeatedly been reported in several native papers as about to return shortly to Japan. But in a letter, dated the 4th April, he states that he will not return till the war between Russia and Turkey is over.

THE Kumamoto Kencho is building a large house, which will cover about 20,000 *tsubo* of ground, for the shelter of poor and homeless citizens.

ALL the Government troops in Himeji have removed to the camp at Marugame in Shikoku.

A LETTER from Kagoshima, dated the 24th May, says:—The head quarters of the insurgents are established in Hitoyoshi, where wounded soldiers are treated, and where Saigo

and Katsura now are. Kirino is in Eshiro, with about 300 troops: Etsumi in Oguchi with about 1,000: the wounded Murata is in the hospital in Kojiki: Fuchibe in Itsuki; and Kishima in Ishiki. In the arsenals at Yamo and Yamada in Osumi, and in five or six arsenals in Hiuga and Satsuma, large quantities of bullets and gunpowder are daily manufactured by the insurgents, who have had their numbers augmented to the extent of 3,000 men, who have recently been enrolled in Nobooka, Hiuga.

THE native papers now assert that H. M. the Mikado has decided to remain in Kioto until the total suppression of the Kagoshima insurrection.

THE Government have refused to receive a memorial addressed to them by the "Seiken-sha" (Honest) Society of the Kochi ken.

LIEUTENANT-GENERAL Prince Higashi-Fushimi-no-Miya has been appointed to the command of five battalions of newly levied troops.

THE *Akebono Shinbun* tells the following story:—The hot season is rapidly approaching, and the red bearded ones are visiting the mountains of Nikko. On the 1st instant, an English gentleman and a native servant arrived in the village of Koyama on their way to the famous mountains. The native servant had much difficulty in finding a hotel for his foreign master, who got very angry and struck the boy very rudely. The servant reported the matter at the police station in the same village. No interpreter was available; and so the boy, who speaks the English language, acted as interpreter in the case between him and the foreigner, for whom a night's lodging was procured at the instance of the police at a *kisenryado*, the meanest class of hotels.

Notification—No. 7.

Some Kagoshima insurgents have here and there penetrated into the Oita-ken (Bungo), and, as they are said to be likely to attempt to leave for the island of Shikoku, the coasts of Iyo and Tosa, which adjoin the provinces of Bungo and Hiuga, must be watched with much attention, and any vessel leaving or entering any harbour along the coasts must be strictly searched by the land or navy forces. This is hereby notified. Suspected vessels may be detained by the ships of the navy, the officers of which are authorised to use coercive measures if necessary, to enforce their orders.

SANJO SAN'EYOSHI,
Daijō Daijin.

7th June, 1877.

A TELEGRAPH wire, connecting the Kanagawa fort and the camp at Honmoku, is to be laid underground. The wire has already been laid as far as Sakuragi-cho through Takashima-cho.

ON the 11th inst. 109 newly enlisted policemen arrived in Tokio from Echigo; and 136 from the Yamagata, 35 from the Ishikawa, and 50 from the Chiba ken.

TOKUGAWA IYETATSU, heir of the ex-Shogun Keiki, with three of his retainers, took passage for Europe by the French Mail Steamer *Volga*.

ON the 1st instant, Hachisuka, of the *Futsu Shinbun*, was condemned to ten days' imprisonment and fifteen yen fine, for having violated the press regulations.

THE *Kinji Hiron*, in its issue of the 8th instant, states that no Americans will be employed as teachers in the Kuwazoku school, the professors in which are all to be Englishmen. And in regard to native teachers, no students of the Keiogijiku (a private school established by Fukuzawa) shall be employed."

THE *Hochi Shinbun* says:—As we mentioned in a recent issue, two prisoners, namely, Sekiguchi and Kato, broke out of confinement in Tokio. During the night of the 30th ultimo, they forced their way into the jail of the Gunba Ken, armed with swords, and afterwards audaciously threatened to attack the Kencho at the head of the convicts liberated by them to the number of about 150. They made a stand on a hill called Harunazan, where they were besieged by a force of police and about forty hunters. After a four days' siege about 100 of the convicts surrendered and the others dispersed. Of the two chiefs, Sekiguchi was wounded, but did not lose courage. On the 7th instant, he was discovered in the village of Tamamura, Joshiu, and arrested by the police. The other has made his escape, it is not known whither.

THE approaches of the seven roads from Fushimi, Yamazaki, Otsu, Tanba, Okayama, Hokkoku, and Hirakawa, into Kioto, are strictly watched by police, who are authorized to detain and examine every person entering or leaving the city.

SINCE the outbreak of the rebellion in the South-West, the workmen in Koishi-kawa Arsenal, Tokio, numbering about 1,900, have been busily employed. The gates are open at 6.15 a.m. and closed at 8 p.m. More than 200,000 rifle and cannon balls are daily manufactured in the arsenal and thence sent to the seat of war. All the storehouses of the War Department are now empty. The workmen receive from 10 sen to 1 yen per day each man.

THE laying of a telegraph wire between Tokio and Niigata was completed a few days ago, and on the 10th instant communication was opened.

ON the 3rd instant, H. E. Samejima, Vice Minister for Foreign Affairs, left for the hot springs of Atami and Hakone. During his absence, H. E. Mori, Minister for Japan in China, now staying in Tokio, will act for him.

(Extract from a letter, dated 6th June sent, from Kumamoto to the *Choya Shinbun*.)

THE insurrectionary armies seem to have lately decreased in number and to have become much discouraged since they raised the famous siege of Kumamoto castle. As they are now occupying a strong and strategic mountainous region the imperial troops find it very difficult, in spite of their victories, to follow their movements. The rebels are considered to have sustained a great loss of life, and do not protect their batteries regardless of life as before. This diminishes the loss of life on the imperialist side. The insurgents do not appear to have any particularly defined mode of action though they will fight till the last. Saigo, the commander, was in Hiroyoshi till on or about 30th ultimo. He, having seen that he could not remain any longer in the castle, left two days before the imperial troops entered. According to rumor, when the insurgents raised the siege of Kumamoto and retreated as far as Yabe, Saigo is said to have expressed his opinion that nothing could be done to restore his fortune, and he was prepared to commit harakiri. But Kirino and other enterprising commanders advised him to preserve his life, hoping to regain their lost power. This rumor is considered to be well founded as it is in accordance with his usual conduct. The insurgents in Bungo have no communication with those in Hiuga. They seem to be aiming at three things: first, they are anxious to raise money and rice in the fertile province of Bungo; secondly, to oblige

the excited shizoku to join them; and lastly, to seize any chance to cross the channel to the island of Shikoku. The rebel advance troops are formed of several classes of men, Higo, Hiuga, and Osumi, who wish to join the Kagoshima insurgents, while their officers are Kagoshima men. Gunpowder and other ammunition is manufactured in Nobooka and Miyako in Hiuga. The insurgents disregard the fact of their being unable to justify their conduct and threaten to kill any one who does not obey their orders.

A FEW days ago, H. E. Iwakura, *U-Daijin*, sent a circular to all the nobles in Tokio calling a meeting at his residence. His Excellency is said, according to the *Mai-nichi Shinbun*, to have addressed the meeting to this effect:—"The disturbances in the South-West do not appear likely to be put down in a short time. The Government has now in project to raise a reserve force to send to the South-West. You will greatly serve the Government by raising about 10,000 good soldiers among your ex-retainers." For some minutes, none of the nobles present opened their mouths. Okubo-Tadanori, ex-lord of Odawara, at length answered His Excellency and promised to send his Karei immediately to his former dominions to raise a body of troops. All the other nobles then followed his example, and made similar promises.

A LETTER from Kagoshima to the *Nichi-nichi Shinbun* says that Shimadzu-Hisamitsu is dwelling in the village of Yokoyama in the island of Sakurajima, while his son Tadayoshi is in his former residence in Isomura, where the naval arsenal, destroyed by the insurgents, stood. Nothing is certain as to their intention. They are guarded by 500 shizoku, known as the Safu-to. Of these, about fifty watch the residence of Tadayoshi in Isomura. Daily communication is kept up between the two places by means of a boat, which flies the flag of the Shimadzu clan. The insurgent troops, encamped on Isoyama, fire upon any boat which approach them without displaying this flag.

THE British schooner *John McKean* in the port of Yokohama has been purchased by a native merchant in Tokio for 4,000 yen. She is renamed the *Toyo-maru* and is expected to sail between Tokio, Yokohama, and Hakodate.

THE *Choya Shinbun* states that Kirino is in Hiuga at the head of about 19,000 soldiers. The shizoku in Utsukine have been compelled to join them.

THE *Hochi Shinbun* says that a telegram from Kumamoto announces that at dawn on the 13th instant, Lieutenant-General Yamada commenced to march for Okoma and Okoba, in spite of the heavy rain, and carried the two places on the following morning. He hotly pursued the insurgents whom he had routed, and destroyed their forts at Yoshida, Kaku, and I-ino.

THE other morning a fire broke out at a mat shop in Okemachi, Tokio, and its course was not arrested till eighty-eight houses were destroyed.

SASAKI, a member of the Genro-in, and Lieutenant Colonel Kitamura, were sent to the Kochi-ken on the 12th instant.

OF the shizoku of the Miyagi-ken, about 2,000 have already joined the imperial troops in the South-West. 1,000 more soldiers are to be raised in the same ken.

THE *Mai Nichi Shinbun* says:—Notwithstanding rumors of the failure of the silk crop in Italy and France the market price is very low in Yokohama. A few days ago some sales

were made. Best silk fetched about \$475, or twice as little as it brought last year. The foreign merchants are determined to discourage the natives, and to get their silk at the prices they choose to pay.

Owing to the heavy rain during the night of the 12th instant, every river on the Tokaido and Nakasendo was swollen and no communication was held during the following day.

PRINCE Arisugawa-no-miya, in Kumamoto castle, is said to have sent a telegram to His Majesty the Mikado advising him to return to Tokio. The castle of Hitoyoshi, which was considered a lair of the rebels, was taken. But the Mikado is determined to remain in Kioto until the suppression of the insurrection is completed.

Of 15,000 soldiers who are to be newly enlisted by the police office, 3,000 have arrived in Tokio from various Ken. Two divisions, each consisting of 1200 soldiers, will shortly be formed and despatched to the South-West.—*Nichi Nichi Shinbun.*

THE steam ship *Tai-hei Maru* of the Mitsubishi Company arrived in Kobe on the 6th instant, having 2000 sniders and 500 casks filled with gunpowder. Of the 2,000 sniders the barrels of about 500 were found broken. During the Saga rebellion, the local authorities damaged them from fear that they would be seized by the rebels.

AN extensive order for a somewhat strange uniform has been given by the chief of police in Tokio for the imperial soldiers in the South-West. The coat sleeves will cover only half the arms and the trousers will not extend below the knee. The insurgent soldiers are dressed in the same style and the imperialist officers have found the uniform very light and convenient for working and running.

H. E. ——— secretly ordered the ex-Daimio Aidzu to instruct his ex-retainers to form themselves into a police force; but Aidzu at once refused to comply saying that since the war in O-u during the year of 1867 his ex-retainers have become very poor and been forced to leave their homes. At length, however, he was prevailed upon to send his Karei through his ex-dominion to collect shizoku for the service of the government.

Divisions of troops, newly enlisted, will soon leave for the extensive drill ground Narashinohara in Shimosa.

On the 13th instant, the proprietors of the weekly *Bunmei-shinshi* and *Somo-jijo*, published by the Shuishisha Company, were summoned to appear before the Tokio-fucho, when they were informed that the publication of their journals was suppressed.

THE *Mai Nichi Shinbun* says:—On the 13th instant, a certain person named Ito, who lives at Mr. Nakayama's shop, at No. 107, Ichome, Motomachi, came to the foreign house No. 125, in the settlement, and said he wanted to purchase about 1,000 rifles for the War Department. A clerk shewed him the rifles in a godown. Ito requested the clerk to allow him to take away four of the rifles as samples, which was granted. A policeman observed him carrying the rifles along the street, and inquired what he was going to do with them, and not receiving a satisfactory reply took him to the police station. On examination Ito said he had been engaged to purchase some rifles for the War Department. A telegram was immediately sent from the Kencho enquiring about the matter, and an answer was received stating that no such order was given to Ito. A police inspector then went to Ito's house in Motomachi, and searched for documents, and

found a suspicious letter, dated four or five days ago, from two men residing in Fukagawa, Tokio. Two police inspectors were directly despatched to Tokio to arrest the writers of the letter. We have been told several things in connection with this affair but for the present refrain from publishing them. We will give further particulars in a few days.

THE Yokohama Saibansho staff is expected to be removed to the old building of the German Legation in Bashamichi in a few days.

At 1.10 A.M. on the 16th inst. a fire broke out at Koamicho, Tokio, and destroyed three houses.

ABOUT 150 shizoku of Takata, Niigata ken, enrolled as police, have already arrived in Tokio. Besides these about the same number of Kucho, Kocho, and teachers of the primary schools are expected to arrive shortly, having expressed a desire to follow the imperialists to the South-West.

It is rumoured, says the *Choya Shinbun*, that Itagaki, ex-Sangi, is holding meetings with the Kochi Kencho officials, Kucho, and Kocho, in the hope of preserving peace among the shizoku in that ken.

THE *Mai Nichi Shinbun* says that on the 14th inst. the *Toyoshima-maru* brought about 550 shizoku from the Awomori and Miyagi-ken to Yokohama.

THE manufacture of matches is making great progress in Japan. About 10,000 boxes of matches are daily turned out at the Shinshin-chisha company in Honjo, Tokio, where about 130 men and women are employed.

It is reported that the 6th company of police, when it entered on the first campaign of this war, was seventy-seven strong. In three actions it lost 48 men killed, and 22 wounded, leaving an effective company of seven men.

A LETTER from Kagoshima states that about fifty policemen are stationed in the island of Sakurajima, where a handful of tobacco, worth about one tempo in Tokio, costs at least 8 sen; and one egg from 6 to 10 sen, while jinrikisha charges are 1 yen for 1 ri of travel.

On the 3rd instant about fifty men were found assembled at the temple on the hill of Meyoken in the jurisdiction of the Osaka-fu.

THE hills of Tempozan in Osaka, and Yamazaki in Settsu, are each occupied by one battalion of infantry and 500 policemen.

A DARING robber, during the night of the 7th inst., broke into the residence of Uyesugi, a noble in Tokio, and took away 5,688 yen.

On the 17th about 800 newly enlisted policemen arrived in Tokio from several of the Northern ken.

(Extract from a letter from Corea to the *Nichi-nichi Shinbun.*)

The Coreans are generally unacquainted with and dull in mercantile affairs, and are not particular about the breaking of a contract and are not at all disconcerted at severe scoldings from us for breaches of faith. The Japanese merchants were, till late years, addicted to similar practices, though they did not perpetrate them so frequently as the Coreans. Some persons say that this bad custom was introduced by the islanders of Tsushima. Our tradesmen from Tokio and Osaka are desirous of inducing the natives to give up such pernicious practices. One day, a large native merchant in Torai-fu, which lies 3 ri from our settlement in Fusan, broke a contract between him and the Okura Company, and the result was that the former paid a penalty of 50 yen to the

latter for his breach of faith. Since that time the natives seem to have become a little more careful in fulfilling their agreements. Owing to the bad harvest last year, the whole country is in a most miserable condition; numbers of cattle are starving in the streets. Our houses in the settlement are forced every night by robbers; and a crowd of beggars proceed daily through the settlement begging for food and money. When we are landing rice and other things from the harbour, they assemble on the shore and hatoba looking for any chance to steal. The Japanese regard the natives as slaves or dogs. But the Coreans are dressed in the same kind of clothes, and women wear a dress, resembling that of Europeans. They are much ashamed to be naked. The islanders of Tsushima, it is rumored, are considerably in debt to the native merchants. We in Fusan are only allowed to walk about 2½ ri out of the settlement. When we go out, we are always surrounded by a crowd of natives, who look upon us with wonder, just the same as the Japanese did with Europeans about 14 or 15 years ago. So we give a certain sum of money to an officer, who walks from one street to the other like our police, requesting him to drive away the noisy crowd. Buildings are constructed very carelessly; and the houses generally are dirty and have an offensive smell.

PRINCE HIGASHI FUSHIMI-NO-MIYA will shortly leave Tokio for the drill ground at Narashino-no-hara, in Shimosa, at the head of 4,200 soldiers who have been newly enlisted.

THE following newly enlisted police from the North provinces arrived in Tokio on the 16th instant:—378 from the Miyagi-ken, 150 from Iwate-ken, 30 from Yamagata-ken, 84 from Sakitama-ken, 9 from Awomori-ken, 38 from Ibaraki-ken, and 13 from the Tochigi-ken.

On the 10th instant some suspicious looking men landed at the hatoba of Kawaguchi, Osaka. On being questioned, they replied that they were shizoku of the Owake-ken, and were removing to Osaka in order to escape from outrages at the hands of the rebels. But their explanation was received with distrust, and they were taken to the police station for further examination.

THE bearer of a memorial to the government from the Risshi-sha Society of the Kochi ken, arrived at the imperial palace in Kioto on the 12th instant. Osaki, Chief Secretary of the Genro-in, was instructed to take charge of him.

It is rumored that the prayer of the memorial addressed to the government by the Risshisha Society in the Kochi ken, which was presented by the famous Kataoka, one of the members, at the Imperial palace in Kioto, has not been granted by the government.

GENERAL TORIO is ill. He is stopping at the hot springs in Harima. He is reported to be getting worse from day to day.

THE *Nichi Nichi Shinbun* says that at about 7 a.m. on the 13th instant, some quantity of gunpowder in the Arsenal in Osaka accidentally exploded. 35 or 36 workmen were injured more or less severely; but all are expected to recover.

THE condition of the islands of Loo Choo is not changed at all; but vessels leaving and entering any harbour are examined by Japanese officials. A notification has recently been issued to the Kagoshima shizoku resident in the island. The barometer registered 83 degrees on the 20th ultimo.

MISCELLANEOUS.

FIRE AT No. 68 BLUFF.

On the night of the 20th inst., at about half-past nine o'clock the fire-bells gave warning of a fire somewhere, and for some time residents in the settlement were confused as to its direction; though to persons in the immediate neighborhood, the whereabouts of the fire was evident enough from the pungent smoke which invaded their dwellings. Eventually it was generally known that the conflagration was on the Bluff, at the Bavarian Brewery, No. 68. Dense clouds of smoke rolled out from the burning building, which led to the conclusion that the entire premises were gutted, more especially as flames burst through the roof at one end. Crowds of foreigners and natives were soon on the spot: fire-engines began to arrive from all directions; and their crews were rushing about for some time first to one well and then to another in hopes of getting a supply of water, but none was to be obtained. The well on the premises had a small supply, and an engine was soon fixed close to it, but had scarcely commenced to draw when the gear got out of order, and its efforts were rendered futile. After a long time had elapsed some one suggested the fish-pond at the bottom of Hogt's hill as a source from whence a good supply of water could be procured. With great alacrity three engines established connection with the pond, and the hissing of the much desired fluid was in a few moments heard as it poured upon the flames. In the meantime, though there was plenty of smoke from a stack of damp malt which had caught fire, the flame was burning but slowly and making but little headway. With efficient direction of affairs there is no doubt that the fire might have been extinguished before the engines began to play. As it was confusion reigned supreme: every one employed seemed to be working on his own account; and the only actual service rendered was by some Japanese who had boldly placed themselves on the roof, and fought the flames at close quarters. But after supplies of water had been brought to bear upon the burning mass, first from the fish-pond before mentioned, and next from Messrs. Copeland and Wiegand's pond in Spring Valley, and a fire party had arrived from H. M. S. *Audacious*, the flames were soon mastered and cut off from the main building, and by eleven o'clock all danger of the disaster spreading was over. For some time, however, the houses in the vicinity were in imminent peril, as burning fragments of wood borne by the breeze, fell on the roofs and remained there occasionally alight for some time. Fortunately, however, the only damage done was to the nervous systems of the occupants of the dwellings.

The origin of the fire is ascribed to the fact that malting was going on; and it is supposed that the furnace was overheated, and so caused the malt that was in process of drying to catch fire. Altogether about 150 bags of malt and the whole of the machinery, were destroyed, though but a small portion of the building fell a prey to the flames. The small amount of damage is due to the substantial character of the structure rather than to the well-meant, but mismanaged efforts of the by-standers before water was procured. The malt was not insured, but we hear that the building was

DURING the fire on the Bluff of 20th inst., an attempt at incendiarism was made upon the premises of Mr. Dillon, aerated water manufacturer, No. 88, Main Street. The incendiary had saturated a rag with Japanese oil, placed it upon a shelf in the shop, and, having deliberately lighted it, made good his retreat. The time was villainously well chosen for the attempt, while all the inmates, Japanese and foreign, of the establishment were absent. Luckily, however, as soon as the flames spread to the paper and woodwork of the wall, a passer-by was attracted by the smoke issuing from the door which the incendiary had left open; and the damage was arrested before it had time to become extensive. A Japanese servant recently discharged is suspected of this dastardly outrage.

The fine steamer *Candia* has been sold to the Mitsu Bishi Mail S. S. Company. She was built in London in 1854 for the P. & O. Company. She is a barque rigged screw steamer. Her original tonnage was 1,348 net, 1,982 gross, 1,951 under deck. Her length is ft. 317.4; breadth of beam ft. 40.5. She is a splendid vessel, as good as new; and the purchasers may be congratulated upon this acquisition to their fleet.

A FORCE of about 1,200 police arrived in Yokohama on the 4th inst.; and during the following night and next day their arms were piled in the streets, with a sentry at each stack. Some of the men appeared to be very old; while there was also a large sprinkling of youths among them. They left for Kobe in the *Amakusa-maru*.

On Sunday morning, the 3rd inst. some children who were searching for birds' nests on Hachojima, beyond Homoko, came across the body of a young Japanese who had evidently recently committed suicide by shooting himself in the mouth with a revolver. On examining the body, a letter was found giving name and reasons for the act, which must have been committed on Saturday evening, as several persons living in the neighborhood remembered seeing the deceased pass in a *jirikisha* on his way to the spot where the body was discovered. According to the statement found upon him the unfortunate young fellow, who had resided for some time in England, had returned from Shanghai last week by the *Saikio Maru*, and was living at some hotel in Benton-dori. Inability to find means to meet money engagements was stated to be the cause of suicide. He was only nineteen years of age.

Hachojima has an evil reputation, as the Japanese say that it is a notorious spot for suicides. In former years the average was said to have been one a month, and they are very frequent even now.—*Daily Advertiser*.

The unfortunate French sailor, Belleux, who was killed by Germans on the 4th instant, was buried on the morning of the 6th in the Catholic Cemetery in presence of Admiral Véron, the Captain of the *Atalante*, and a number of officers and sailors from the same vessel. The French and German Ministers, the Captain of the German corvette *Elisabeth*, the French Consul, and a crowd of residents were also present at the funeral.

DURING the continuance of the Russo-Turkish war, on the arrival of mails from Hongkong, provided the steamers come in overnight or early in the morning, we propose to continue the practice we have already commenced of issuing for the convenience of our readers an extra containing the latest telegrams.

ONE of the largest funerals which it has been our melancholy duty to attend took place on the afternoon of the 5th inst. It was that of the late Mr. Chiya, who for many years has conducted the well known Tea business bearing his name. Both native and foreign merchants have lost a friend of real sterling merit and uprightness of character, and long may his memory be green amongst us, and held up as a pattern to his *confrères*. The funeral cortege left his late residence at 3 o'clock in the afternoon, headed by a procession of about 50 bonzes or priests, all or nearly all the temples of the surrounding neighbourhood being represented. A native band, with musical instruments and the different insignia, were also in attendance. All the native merchants, with their bantos, also took part in the procession as did most of the Chinese compradores. But few Europeans attended, owing to the departure of the American and English mails. The procession wended its way up the Main Street as far as the British Post Office, and then turned down to the Homura Road, along which it proceeded to Zoto Koin, where the final ceremonies were performed. After the usual offerings had been made to the spirit of the departed, the multitude separated.—*Communicated*.

An entertainment of more than usually interesting character was given in the Temperance Hall on the evening of the 7th instant. The centre and left side of the Hall were well filled with seamen from the British and American men-of-war, while the right side was taken up by ladies and gentlemen of the community. Altogether there could not have been less than one hundred and forty persons present. The Rev. J. L. Amerman presided, supported by the Revs. G. Cockran and H. Waddell from Tokio. The first part of the programme was such as will always command the ready attention and appreciation of most audiences, being a treat of strawberries and cream; to which, it is scarcely necessary to add, ample justice was done. At the close of the feast the Chairman introduced the Rev. Hugh Waddell, who addressed the audience at some length and with much vivacity on the subject of "Home." When the Rev. gentleman resumed his seat, the fact that his remarks had not been considered dry and unentertaining was manifested by prolonged applause, which had scarcely subsided when a lady, whose deep interest in the temperance cause is well known, sat down at the piano and played and sung "Home, Sweet Home." An attempt was made by the audience to take part in the good old song, but their memories failed them, and the words could not be recalled, so after a few spasmodic efforts the trial was given up, and the lady was left to sing her song alone. Mr. Handman was then called upon for a reading, but, probably thinking a recitation would be more to the taste of the audience, he recited "The Battle of Waterloo," which, as may be assumed, was warmly applauded by the British bluejackets; nor were their American cousins and the rest of the audience behind in showing their appreciation of the piece as well as the talent of the artist. A gentleman, who has frequently taken part in such festivals at the Temperance Hall, then gave an address. We refer to the Rev. Geo. Cockran, who, on rising, informed the audience that a text had been supplied him upon which to base his remarks, which was "Stability of Character." Why that subject had been chosen for him he could not say. However, he felt sure it was a good subject in almost any place and under almost any circumstances. He considered that the foundation of stability of

character was "Piety towards God." At the close of the address Mr. Townley sang "Rataplan," and repeated it in response to a hearty encore. Mr. Handman followed with another recitation, after which Mr. Townley sang "My Pretty Jane." Coffee and cake were then handed round; and after a few more songs &c. the proceedings were brought to a termination soon after ten o'clock.

AN addition is to be made to the stock already on the Shimosa Farm by importations received from San Francisco by the *Belyic*. Mr. Ap Jones, who arrived in that vessel, has brought three mares and eleven head of yearling cattle. Of the mares two are three year old bay Clydesdales, in foal to a Percheron horse. The third is a three year old thoroughbred bay mare. The cattle are of the short-horned Durham breed, and comprise seven heifers and four bulls, which were purchased from the ranches of Mr. Jesse D. Carr of Salinas, and of Mr. Shippey of Stockton. No trouble was experienced throughout the passage with any of the animals, which to the credit of Mr. Ap Jones, and his subordinate in charge, Mr. Kay, have been landed in splendid condition.

Four horses and twelve mares purchased in Kentucky, and a further number of shorthorns, &c., are expected to arrive by early steamers.

THE man Williams, who was arrested on the charge of forgery in company with the two Hansens and Bennett, has been released by order of the U. S. Consul General, the charges brought against him having been withdrawn. His release would have taken place before, had his testimony not been thought necessary to secure the conviction of the others.

A CRICKET match was played on the 7th inst. between the "Fleet" and "Settlement," resulting in favour of the former. The weather was exceptionally favourable, and the game was very well contested, notwithstanding that the fielding of the Settlement was very indifferent. The Band of H. M. S. *Audacious* was present and played a selection of music in the afternoon. We subjoin the score, which shows the Fleet team a winner by three wickets:—

It is said that the *Kiushiu-maru* is ashore somewhere near Nagasaki, and that there is every probability of her being got off shortly.

H. E. TERAJIMA, Foreign Minister, and Iwaya and Shioda, Chief Secretaries of the same department, left on the 9th inst. for Kioto in the *Nagoya Maru*, by which steamer Oyama, ex-Governor of Kagoshima and thirty other political prisoners are sent to Kiushiu for trial before a special Court of Justice to be held somewhere in that island, probably in Fukuoka.—*Nichi-Nichi Shinbun*.

MR. LISTER, the Postmaster General, may be expected to arrive here within a month on a visit of inspection.

A TABLE of Rates of Postage, which under the new Postal Union came into force from the 11th inst. has been issued by the General Post Office, Hongkong.

AMONG the passengers for Kioto by the *Tanis*, which left this port on the 9th instant, was H. E. Mr. de Geoffroy, the new Minister for France to Japan, who proceeds to Kioto, accompanied by his Secretary of Legation, to present his credentials to H. M. the Mikado.

As stated in our issue of Saturday, the 9th instant, the British steamer *Gulshill*, Capt. James Ranton, went on a trial trip in the afternoon, for the purpose of testing the engines, boilers, and speed of the vessel. Mr. F. Krebs, Director, and Mr. Ellerton, Superintending Engineer, of the Mitsu Bishi Mail Steam Ship Company, and a few friends, were on board during the trial, which was in every respect highly satisfactory. The *Gulshill* ran from the lightship to Saratoga Spit buoy, a distance of 9½ miles, against a strong wind and current, in 51 minutes and 30 seconds, and from the buoy to the lightship, before the wind and current, in 39 minutes. Her trim was five feet by the stern, the holds being quite empty, and the vessel having only her water ballast, and 230 tons of coal in the bunkers. She returned to her moorings at 4.30 p.m., when the party, after having partaken of a collation on board, landed, satisfied with their excursion, in spite of the strong wind which had been blowing throughout.

MR. LYMAN, in his Report of the Yesso Geological Surveys has the following interesting information respecting the Ainos:—

"I find, on inquiry of the quartermaster, who is a native of Yesso, I understand, and has seen a great deal of the Ainos and knows their language, that some statements in regard to them that have lately come under my eye in the excellent English periodical called *Nature* (Vol. IX. p. 428: 2 April, 1874) are not quite correct; and some of my assistants are also able to add some information. He has never heard of the traditional origin of the Aino race represented by the picture of a woman in a cave weeping to whom a dog is bringing a red flower; and it is possibly merely the illustration to some Japanese tradition or popular fable. It is said that the Ainos of different places have quite different stories about their origin. The Ainos do carry burdens on their back, though with the help commonly of the band across the forehead. The tattooing of the lips of the women is commonly completed at the time of marriage, though begun often at a very early age; but the netlike tattooing on the back of the hands or lower arms is not an invariable accompaniment. The Ainos have stringed musical instruments of three, five and six strings; and the strings are made of the sinews of dead whales that have been cast up on the shore. The Ainos do not hunt the whale but respect it, saying that it feeds on hearing, which consequently flee before it into the shallow water near land where the Ainos take them. They say, too, that the whale eats the sardine (*iwashii*), a hundred at once.

The Ainos do go through with some propitiatory ceremony before eating the flesh of a bear or even of a deer they have killed; so as not afterwards to be harmed by its spirit. They bring the bear's head home and fix it on a pole near their dwelling; a deer's head they wrap in grass and leave behind in the woods or they set it up on a pole there. The collection of sea-weed and other fishery products for sale to the Japanese is, according to my observation, a step in their civilization above their fully wild state; just as in some villages they have learned a little of husbandry from the Japanese. But a somewhat educated Aino at Yedo once told me that there was no word in their language for "farmer" or "husbandman." The Ainos can hardly be said to have been "driven inland by the fringe of Japanese settlements all round the coast;" for the Aino villages are still mostly on the coast, and very few indeed live inland. They are said to have been driven gradually northward from at least the central part of Nippon; and are now rare in the most southern part of Yesso.

"The Ainos, it appears, have a great disgust at snakes, perhaps even a fear of them, and I saw it shown more than once this summer; yet the most poisonous of the Yesso snakes appears not to be very dangerously so. It is called the "mamushi," and according to my memory closely resembles the American rattle-snake, though smaller."

IN our issue of the 20th ultimo we published the intelligence of an extraordinary phenomenon which had been manifested in Hakodate. "On the 11th May at 11.30 a.m. the harbor being smooth and still, the sea suddenly receded, and within ten minutes rose again with a swell of fully seven feet. At intervals of about twenty minutes the water continued to fall and rise in a similar manner. Between 2.30 and 2.35 p.m. the maximum force of the wave was attained, the sea overflowing the bund and flooding the lower part of the town. From this time the rise and fall gradually diminished, and at sunset the sea was again calm and still. The greatest excitement prevailed amongst the native population; thousands of persons lined the beach and bridges and other places where the tidal wave could be observed in safety, while others were busily engaged in removing their property to the roofs of houses and godowns."

We remarked at that time that to what terrible convulsion of nature the occurrence might be due we had no means of ascertaining; but might look forward to news accounting for it, within a month, or probably less.

Our surmise was but too correct. By the last American mail telegraphic intelligence was received, dated the 12th May that Iquique, a Peruvian town of one thousand inhabitants, had been destroyed by an earthquake.

A RECENT issue of the *Mai-nichi Shinbun* contains a graphic account of the affray between the French and Germans on Monday night; and after delineating the particulars—in which, by the by, it states that the Frenchmen had broken heads, broken arms, broken legs and so forth—it goes on to state that it has heard that the French Consul had requested the Germans to pay a fine of \$3,000. The latter, however, thought this sum too great an indemnity; and so there is likely to be some difficulty about the matter; and the *Mai-nichi Shinbun* does not know how it will end. It goes on to say that the people of Yokohama are of the opinion that there is quite enough fighting going on in the interior without foreigners disturbing the peace of the country by their frequent brawls. The editor then moralizes as follows: "If they (foreigners) are so very fond of fighting, they had better return to their own countries and fight on their own soil as much as they like."

AN accident happened on the afternoon of the 6th inst. resulting in a large quantity of specie

being engulfed in the waters of the harbour. It appears that fifty-two cases of gold and silver, besides a quantity of copper slabs, had been discharged from the *Meiji Maru* into a cargo boat, which was about to start for the shore with her precious freight when the weight proved too much for the strength of the boat, and forced its way through the bottom into the water, and the whole cargo was sunk. The services of a diver were obtained from H. B. M. S. *Audacious*, and before night the most valuable part of the specie was recovered. Next day the diver resumed his task; and we understand that all, specie and slabs, has been recovered.

THE plaintiff in the case of *Howles v. E. C. Kirby* and others, on motion, has been granted permission to appeal in *forma pauperis* against the verdict given in the Court at Kanagawa. The case was tried before H. S. Wilkinson, Esq., the Acting Law Secretary, and a jury, and the appeal will now be carried to the Acting Chief Judge at Shanghai.

On the evening of the 11th inst. a severe gale commenced, lasting until early next morning. The lowest reading of the barometer on shore at the sea level was 29.35 at about half past ten p.m.; and the storm was at its height shortly after that hour. Although several fences were overthrown, some chimneys blown down, portions of roofs and verandahs carried away, and plaster stripped off the sides of houses, we hear of no personal injury having been sustained by anyone on shore. One house on Ishikawa hill, occupied by Japanese, was unroofed, and the buildings of the Old British Legation suffered considerably. Two or three small native-built houses at Noge were almost levelled with the ground.

We subjoin the readings of a barometer on the Bluff corrected to sea level and 32° F.

11th June.

7 a.m.	29.939	light airs from E.
6 p.m.	29.480	fresh breeze " W.S.W.
10 "	29.337	gale: squalls " S.W.
10.30 "	29.329	severe squalls " "

Midnight stationary—upward indication.

The first upward movement of the barometer was at 5.30 a.m. to-day.

12th June.

6 a.m.	29.351	fresh from S.W.
Noon	29.447	breeze " S.W.

The barometrical depression is passing to the eastward. If the barometer does not rise before midnight further bad weather may be looked for, especially if the wind backs. A very sensitive compensated Aneroid recorded 29.13 at 10.30 p.m. yesterday.

In the harbour all the steamers that could, got up steam, and some put out extra anchors: and the only accident which occurred was through the British flag-ship *Audacious* dragging her anchors and coming into collision with the old steamer *Chih-li*, which was lying astern. The *Audacious* had steam up, and three anchors out, but, notwithstanding this, the force of the gale was so great that the heavy vessel began to drag her moorings about half-past eight o'clock. The only vessel in her way was the *Chih-li*; and when it was observed on board of her that the distance between her and the man-of-war was gradually but surely lessening, more cable was paid out; but the *Audacious* came fast and finally struck the bow of the *Chih-li*, and continued bumping her for some time, during which it was feared on the merchant steamer that the cables would have to be cut in order to prevent her from going down. This alternative, which

would have necessitated her going on shore, was rendered unnecessary through the man-of-war dropping astern. The main damage to the *Chih-li* was the parting of a cable, cats-heads broken, a portion of the iron and wood work about the deck smashed, and the fore topmast broken. The damage to the *Audacious* herself was but trifling, being confined to the ornamental work on her stern and some slight injury to two or three boats. Unfortunately, though, an accident of a fatal character occurred on board. When she came in contact with the *Chih-li*, the bow of that vessel got under an anchor hanging on the starboard side of the *Audacious* and flung it clean on board. As it fell it struck the carpenter, Thos. Beatley, who was standing by the wheel of a gun, breaking four of his ribs and inflicting internal injuries which caused his death within two hours. This occurred between half-past eight and nine o'clock. The unfortunate man was buried ashore the following afternoon. The damage done to the *Chih-li* was estimated by an officer from the *Audacious* with a view to getting it repaired as speedily as possible, at the cost of Her Majesty's Government. The following are some of the readings of the barometer on board the *Audacious* during the gale.

6 to 7 p.m.	29.61.
8 "	29.52.
10 "	29.33.

H. E. Captain von Eisondecher, German Minister, accompanied by the Secretary of Legation, Mr. Kempermann, left on the 13th inst. for Kobe in the corvette *Elisabeth*.

THE remains of the late Mr. Beatley, carpenter of H. M. S. *Audacious*, killed while in the discharge of his duty, were buried in the Protestant Cemetery on the afternoon of the 13th with military honors.

THE *Sakigake Shinbun* states that the proprietor of the large Japanese hotel at Nichome, Bentendori, was suspected of being a robber, arrested and taken to the police station in Tokio. According to the same journal this enterprising gentleman established a money lending business in Tokio, and with the assistance of a compatriot contrived to gain admittance into several large houses, from which he stole in all about 7,000 yen.

THE preliminary inquiry held on board the German corvette *Elisabeth* into the assault with fatal results by sailors of that vessel upon Frenchmen belonging to the *Atalante*, is terminated. Suspicion of guilt has been found to attach to four men, who will be kept under strict arrest until instructions have been received from Germany, whither the depositions will be forwarded, as to how they are to be finally disposed of. Probably the order from the central authorities will be that they be sent home for trial and judgment, the Court Martial held here having, without specially delegated authority, no supreme jurisdiction in an offence of the nature with which these men are charged.

THE wounded Frenchman Lelan is pronounced out of danger. Thanks to youth and a good constitution, backed by most skilful surgical treatment, he is on the high road to recovery from hurts, two of which, in the great majority of cases, would have been fatal. To nature is due the principal credit of this cure; but nature has been greatly aided by the knowledge and skill of Drs. Eldridge and Massais.

A RUMOR, whether well or ill founded we cannot at present say, is current in the settlement, that the Tosa people have openly declared in favor of the Satsuma insurgents.

On the 15th inst. the steam cutter of H.M.S. *Audacious*, while entering the Creek, was forced to keep closer to the shore than proved to be prudent, owing to a dredge being in the mouth of the Creek; and the consequence was that she struck against the bank, a hole was knocked in her bottom, and she speedily filled. Her occupants made the best of their way to drier quarters. With the assistance of two Japanese boats the cutter was ultimately raised.

EVERY now and then some item of real intelligence comes to light showing with what fearful carnage the insurrectionary war is accompanied. On the 6th instant an engagement was fought within a few miles of Kagoshima, whence the smoke of the fire from cannon and musketry and the glare of exploding shells was plainly visible. One division of police went into action seven thousand strong. They succeeded in taking the position which they were sent to assail, but with a loss in killed and wounded of half their number.

A MEETING of the creditors of Mr. Fred. Douglass was held on the 15th in the Court room of the German Consulate, Mr. Zappe, H. I. G. M. Consul, presiding. Mr. Ferd. Knoblauch, Official Administrator of the Estate, presented his report, which showed that the debts owing by the bankrupt, after deducting admitted offsets are \$4,510, while the available assets are something under \$500, a sum barely sufficient to pay the salaries due to the servants of the late firm and the costs of liquidation. Among the claims is one brought forward by Mr. Benson for upwards of \$500, on behalf of the Japanese Government, for arrears of ground rent.

A MORE unfavorable evening for an entertainment could hardly have been than that of the 14th; but in spite of this the Gaiety Theatre was thronged with a select audience. The object of the performance was certain to secure the sale of a large number of tickets; but so large an assembly as was present could scarcely have been expected, considering the drenching rain which had continued since morning and bade fair to last all night. Sir Harry and Lady Parkes, Admiral Ryder, Captain Colomb, and other officers of the *Audacious*, the patrons of the entertainment, were present, and every nationality was probably represented among the visitors. The two principal pieces "A Dodge for a Dinner," and "To Paris and back for £5," had already been given at the previous performance of the *Audacious* Dramatic Club. On this occasion, however, the acting showed a marked improvement. Throughout the entertainment the applause was cordial and well merited; but, if there was anything to choose, the new piece, "The Area Belle," a lively comediotta of the "Box and Cox" type, was the best acted, the most amusing, and the most applauded. "Penelope" was admirable, and her three lovers were drawn to the life. The success of the evening was complete, and must be as gratifying to the actors as it was thoroughly acknowledged by the visitors.

THE telegraphic line intended to connect the Kanagawa fort with a small station at Homoko is not, as stated by the native papers, to be a subterranean one. The telegraph posts to support the line are already erected along

Kaigan-dori, the Bund, and the Bluff. The object of the line is to convey to the fort the intelligence of the approach to this harbour of vessels of war, Japanese or foreign.

A TELEGRAM has been received from Nagasaki stating that the M. B. M. S. Co.'s steamer *Kiushiu Maru* has been got off the rocks on to which she ran in the passage between Shimabara Gulf and Omoro Bay, and has been safely beached. The steamer is expected to arrive at Nagasaki on the 17th instant. All on board are well.

The accident to the *Amakusa-Maru*, late *Candia*, happened off Cape Diamond, a promontory about nine miles on this side of Cape Idzu, at five minutes past midnight on the 14th-15th instant. The weather was very foggy, and the steamer, as in the case of the *City of Peking*, rather overran her reckoning. However, when the shock occurred she was going very slowly. She appears to have struck a rock above water, as a large hole was knocked in her forward compartment just on the water line. The engines were at once reversed, and the steamer was backed clear of the rock without difficulty, but breaking two blades of her propeller. The hole was stopped with a sail, and after a reasonable delay, to see that the water did not penetrate to the other compartments, Captain Dunn made for Yokoska, keeping along the coast, and arriving at the Dockyard about noon. Next evening the *Tokio-Maru*, bound for Shanghai and way ports, lay to off Yokoska, where the *Amakusa-Maru's* mails and passengers were transferred to her.

SWISS RIFLE CLUB.

SPRING MEETING.

The following is a list of the prize-men, their scores and prizes, in the rifle matches of the Swiss Rifle Club on Saturday, the 16th instant.

CIBLE PATRIE.

1. Silver Gilt Goblet.....Perregaux.
2. Bronze and Marble Rubens Inkstand Beretta.
3. Silver Goblet.....Schinne.
4. Field Glass with 3 changes.....Brennwald.
5. Chased Crystal Wine Service.....Triulzi.
6. Morocco Razor Case.....Mottu.
7. Ivory Knife.....Hagens.
8. Ivory Pencilcase with Penknife.....P. Colomb.

CIBLE A POINTS.

1. Silver Goblet.....74 pts...Schinne.
2. Crystal Champagne Cooler...54 " ...Triulzi.
3. Large Album.....42 " ...Pardun.
4. Clock, with Inkstand and } 32 " ...Perregaux.
Compass.....}
5. Cristal Wine Service.....31 " ...P. Colomb.
6. Silver Pencilcase.....29 " ...Becker.

CIBLES TOURNANTES.

1. Silver Goblet.....69 cartons...Beretta.
2. Silver-mounted Crystal } 60 " ...Triulzi.
Centrepiece.....}
3. Enchased Silver Beer } 42 " ...Mottu.
Flagon.....}
4. Marine Telescope.....42 " ...Schinne.
5. Silver Napkin Ring.....26 " ...Brennwald.
6. Magic Gold Pencil-case...13 " ...Ziegler.

Mr. Triulzi scored the first, and Mr. Mottu the last bull's-eye before tiffin. Mr. Beretta made the first on recommencing firing, and Mr. Brennwald had the honor of making the last of the day.

In spite of the bad weather the shooting was very good, especially when the fact is taken into consideration that, in the course of the afternoon, the smoke accumulated between the stand and the targets to such an extent that the latter were almost invisible. The firing had to be closed at 4.30 instead of at 5 p.m. During the day 291 bull's-eyes were made.

H. E. MONSIEUR DE GROFFROY, French Minister, returned from Kobe in the *Tanais*, having presented his credentials to H. M. the Emperor, by whom he was most graciously received.

THE *City of Tokio* has made an excellent run, and would have arrived here even forty-eight hours earlier than she did had she not been delayed by foggy weather outside. Since Wednesday (13th) the sun was invisible on board. The coast was sighted on Friday (15th) when a good landfall was made, and the captain expected that the vessel would arrive at her moorings at midnight. The fog fell, however, and so obscured the land that the greatest caution was necessary, with the result that the harbour was not entered till the middle of the night of the 17th-18th inst.

On Saturday, the 16th instant, at 6 p.m., the *Gadshill*, the latest purchase of the Mitsui-Bishi Mail S. S. Company, ran up the Japanese flag. Her new name is *Kumamoto-Maru*. She left on the 18th for Kobe (not for Shingawa as stated in our Extra this morning), having in tow the *Bani-Maru*, late *Dumbarton*, which vessel is to be employed as a hospital ship. The price paid for the *Gadshill* by her purchasers is said to be £36,000. Under her new flag she is commanded by Captain Drummond.

THE native journals report that large quantities of Hachiogi silk were expected to arrive on the Yokohama market on the 20th.

On the 20th inst. in honor of Her Majesty the Queen's accession, the men of war in harbor and most of the merchant vessels were decorated. At noon the customary salutes were fired.

On Sunday evening 17th inst. as an artificer from H. M. S. *Egeria* was proceeding along the Bluff in a jinrikisha, a trap and pair of horses coming from the opposite direction ran into, or rather over, the jinrikisha. The frail vehicle was completely shattered, and its freight very badly injured through one of the horses treading on him. His injuries were so serious that he had to be conveyed to the hospital. It is said that the trap had no lights; and was, moreover, on the wrong side of the road.

His Excellency Mr. Kawase, Japanese Minister and Plenipotentiary to the King of Italy, returned to Japan, accompanied by Mrs. Kawase, by the last French Mail steamer after a sojourn of several years in Europe.

Our attention has been attracted by a paragraph in the *Tokio Times* of the 16th instant, referring to an article on the Coasting Trade of Japan published in this journal on the 8th instant. We certainly are not aware that the nations of Europe, with only one important exception, prohibit foreign vessels from participation in the coasting trade: on the contrary we believe almost all nations permit vessels of any nationality to engage in coast service. America stands alone, or nearly alone, in the possession of navigation laws which have proved a source of much injury to American home shipping. Vessels not built in America cannot trade between any of the home ports of the country, and if the Japanese Government were to adopt the same policy the carrying trade of Japan would be confined to the junks; for with one or two unimportant exceptions all Japanese seagoing vessels are of foreign construction.

LAW REPORTS.

IN H. B. M.'s COURT AT KANAGAWA.

Before Mr. Acting Law Secretary WILKINSON,
Saturday, June 16th, 1877.

Between ANDREW DUNCAN, Judgment-creditor,
and

NESTOR NICOLAY NORDENSTEDT, Judgment-debtor,
CHARLES JOHN STROME, Garnishee.

JUDGMENT.

This is an application for the attachment of a debt. The applicant, who is a British subject and a practitioner of this Court having obtained a judgment against a Russian subject in the Russian Consular Court, applies for a judge's order to attach a debt due by a third person, a British subject, to the Russian judgment-debtor, and for an order for that third person to show cause why he should not pay the judgment-creditor the debt due from him or so much thereof as may be sufficient to satisfy the judgment-debt.

It appears to me that this application ought not to be granted. The application is made under the 17 and 18 Vict. c. 125—the common Law Procedure Act, 1854. It ought to have been made under the Rules of Court under the Supreme Court of Judicature Act, 1875, but as those rules adopt the provisions of that Act without any change in the wording material to our present purpose, and as the Act has been the subject of judicial decisions to which I shall have occasion to refer, I shall consider the application in the first instance as if made under the Act. The sections of the Act which are relied on are the 60th and 61st, which provide that:—"It shall be lawful for any creditor who has obtained a judgment in any of the Superior Courts to apply to the Court or a judge for a rule or order that the judgment-debtor should be orally examined as to any and what debts are owing to him before a master of the Court, or such other person as the Court or judge should appoint, and the Court or judge may make such rule or order for the examination of such judgment-debtor and for the production of any book or documents." And, "It shall be lawful for a judge upon the *ex parte* application of such judgment-creditor, either before or after such oral examination, and upon affidavit by himself or his attorney stating that judgment has been recovered, and that it is still unsatisfied, and to what amount and that any other person is indebted to the judgment-debtor and is within the jurisdiction, to order that all debts owing or accruing from such third person (hereinafter called the garnishee) to the judgment-debtor shall be attached to answer the judgment debt; and by the same or any subsequent order it may be ordered that the garnishee shall appear before the judge, or a master of the Court, as such judge shall appoint, to show cause why he should not pay to the judgment creditor the debt due from him to the judgment-debtor, or so much thereof as may be sufficient to satisfy the judgment debt." These provisions may be considered as applicable to proceedings in this Court, and they have not infrequently been acted upon when a judgment has been obtained in this Court, and it is sought to enforce it. But, although I have caused the Registry to be searched for precedents, no cases can be found where they have been applied to enforce the judg-

ment of a Foreign Court. There is, it is admitted, no precedent of their being so applied in the Courts at home. But it is urged that, in view of the peculiar nature of the jurisdiction of the several Foreign Courts in this country, they ought to be auxiliary to each other in the execution of their decrees. But the question whether it would be desirable that these proceedings should be extended to cases not originally contemplated, and whether the extension of them is justified by present legislation, must be kept distinct. I do not think that it is out of place for me to say that experience has shown that it would be a great convenience to suitors in the several Consular Courts if similar proceedings to these could be taken in each one of those Courts in aid of judgments rendered in the others, and so far as Her Majesty's Courts in China and Japan are concerned it has been suggested that the necessary provisions for this purpose should be inserted in the next Order in Council. But I am of opinion that at present there is no authority for applying these proceedings to the case to which it is now sought to have them applied. The judgment in the case of *Bynard v. Simmons* (24 L. J., Q. B., 253) are decisive on the point that the statute was only intended to apply to persons who have obtained a judgment within the meaning of the 60th section. In that case a creditor who had obtained a judgment had died, and it was decided that his executor who had taken no steps to revive the judgment, or to make himself a party to the suit, could not proceed under the act to attach a debt to satisfy the judgment of his testator. Lord Campbell, C. J., said:—"This is a point without any difficulty. The enactments are, no doubt, very useful, extending the remedy of judgment-creditors, and we must see that they have a proper construction given to them. In former acts, the power to take the judgment-debtor's property was much extended, and by 17 & 18 Vict. c. 125. there is a still further remedy given to the judgment-creditor. But the proceeding is in the nature of execution, and must be governed by analogy to executions. It is admitted that no writ of *fi. fa.* could be sued out until the executor had made himself a party to the judgment for which great facility is given by section 129. of the Act 15 & 16 Vict. c. 129. Then, is the applicant a creditor who has obtained judgment within the meaning of the 60th section? His testator had obtained judgment, but he had not; and I think, therefore, that he is not within the class of persons described in that section; and all the other sections as to garnishment expressly refer to the 60th section."

Now the party proceeding has not obtained a judgment within the meaning of section 60.

It is clear from the context and from the judgment just cited, that the judgment referred to in that section is a judgment in the same Court in which the proceedings against the garnishee are taken. And the party is, therefore, not entitled to the benefit of the provisions of the Act as "he"—to use the words of Compton, J., in delivering judgment in the same case—"has not brought himself within the enactment of the 60th section." This interpretation is confirmed by a reference to the practice under the Custom of Attachment as it prevails in the city of London. That Custom is much more favourable to the creditor than the practice under the Common Law Procedure Act, as the preliminary step of having judgment recorded against the original debtor is little more than a form, but it was decided in the case of

De Haber v. The Queen of Portugal 20 L. J., Q. B., 488) by the unanimous judgment of the Queen's Bench that "the process of foreign attachment can only be duly resorted to where the cause of action arose within the jurisdiction of the Court from which it issues." We are not left, however, in any doubt upon the subject. In *Price's* case (L. R., 4, C.P., 155) where the applicants had obtained an order in a Court of Equity for the payment of money, and sought in the Court of Common Pleas to obtain an order for the attachment of a debt due by a third person to the person so ordered by the Court of Equity to pay, the Court of common Pleas refused the order; and the circumstances of that case, had a further similarity to the circumstances of this case that one of the grounds of the application was that the Court of Chancery, whose order it was sought to enforce, had not at that time the power itself to enforce its order by attaching a debt in the hands of a third party. The decision in this case has an important bearing upon the argument that this Court ought, on account of the peculiar circumstances of its own jurisdiction and of the jurisdiction of the Foreign Courts situated in the same district, to extend the provisions of the Act to the judgment of such Foreign Courts. If one of the Superior Courts of Law in England considered that it ought not to apply these proceedings to enforce an order of the Court of Chancery in England, although the Court of Chancery could not apply them itself, it seems to me it would be a strong step for this Court to disregard such a decision and apply the same proceedings to enforce the judgment of a Foreign Court. I am of opinion that the fullest comity is due from this Court to the other Courts in this country circumstanced similarly to itself. In many matters this Court requires their assistance, and that assistance when sought has been most cheerfully rendered, but it can scarcely be argued that there is a stronger reason why the judgments of those Courts are to be enforced in this Court than there was for the order of the Court of Chancery in the case referred to.

But even if I were of opinion that that case is not conclusive, it would be necessary, before making such an order, to consider the effect of it upon all the parties concerned. There is the judgment-creditor, the judgment-debtor and the garnishee; and the last of these, who is presumably willing to discharge his obligation, is certainly entitled to as much consideration as the other two. If the granting of the order were merely to result in substituting the judgment-creditor for the judgment-debtor as the recipient of the money payable by the garnishee, no great inconvenience would be caused to the garnishee. He has to pay the money in any case, and it probably does not matter to him to whom he pays it, so that he does not pay it twice. The point then which it is essential to decide before making the garnishee pay the money to the judgment creditor, is whether such payment would be a bar to a suit brought hereafter by the judgment-debtor to recover the same money. It is important in considering this point to bear in mind that a voluntary payment by a debtor to any person but the creditor, or to a person authorised by a creditor to receive it—even although the person to whom the payment is made may be a creditor of the creditor—will not discharge the creditor in an action at the suit of the original creditor. It is also to be borne in mind that before the passing of the Common Law Procedure Act, the Superior Courts could not

order the payment to the judgment-debtor. It became necessary, therefore, when that power was given to the Courts to make provision against the garnishee being held subsequently liable, and the 65th section accordingly provided that "Payment made by or execution levied upon, the garnishee, under any such proceeding as aforesaid, shall be a valid discharge to him as against the judgment-debtor, to the amount paid or levied, although such proceeding may be set aside, or the judgment reversed." The necessity for such a provision and the limitation to its effect are well illustrated by the case of *Turner v. Jones* (26 J., Exch., 262). In that case a judgment creditor had obtained such an order as is here sought, attaching the debt due from the garnishee to the judgment-debtor, and ordering the latter to attend and show cause why he should not pay the debt to the judgment-creditor. The debt due by the garnishee was on a contract for the purchase of goods by which the garnishee had undertaken to give bills payable at a certain period not then elapsed. The garnishee without waiting for any further order gave the judgment-creditor his promissory note for the amount due payable by instalments, and paid one instalment accordingly, and it was held that such payment was no answer to an action by the assignees of the judgment-debtor against the garnishee, and he was compelled to pay them the money he had already paid the judgment-creditor, and the remarks of Bramwell, B., show that he would have been equally liable if the action had been brought by the judgment-debtor himself. The ground upon which the judgment was given was that his original contract with the judgment-debtor did not compel him to pay as he did, that he had no right to substitute a different liability to that which he had entered into with the judgment-debtor, and that the statute would only protect him when he could show that the payment which he made was a payment which his original agreement with the judgment-debtor, plus the process of the court, compelled him to make. This case shows that a strict compliance by the garnishee with the terms of the Act is necessary in order to protect him against subsequent proceedings. Whether the same strict compliance is necessary on the part of the Court has not been decided. In his judgment in that case, Bramwell, B., said "It might possibly be, that if the judge ordered him erroneously to do something that he was not bound to do, his acting under the order would be a protection. Upon that I express no decided opinion." The point upon which the learned judge declined to express a decided opinion has not since, so far as I can find, been the subject of judicial decision, and as it is a point which ought to be placed beyond all doubt before a garnishee would be safe in paying under an order of the Court in a case evidently not contemplated by the Act, this Court ought not to place the garnishee in the position of having either to submit to the order of the Court, and run the risk of having to pay the same money again, or be put to the expense of appealing against the order. For this reason, I should decline to issue the order even if *Price's* case did not stand in the way. No more than the learned judge do I express any decided opinion as to whether my order would or would not protect the garnishee. It is unnecessary for me to do so. The position of a garnishee is such that he ought not to be put to the risk of my opinion upon the point being wrong. He may be sued hereafter not only

in this Court or in any other of Her Majesty's Courts in China or Japan, but in England or elsewhere, and I ought in giving such an order not only to have a decided opinion that the order would protect him in this Court, but to be convinced that it would protect him everywhere, and on this point I am not convinced. It has been urged that, as it is only a preliminary order that is sought, I ought not to refuse it, but leave the garnishee to show cause. As, however, the granting of an order under the Act is in any case discretionary I do not think it would be a proper exercise of my discretion to put the garnishee to the necessity of showing cause when I am satisfied that no final order ought to issue.

As already stated, I have treated the question as if the Common Law Procedure Act still governed the case. That has been altered. But no alteration in the views here expressed is required in consequence. The change which the adoption of the same provisions into the Supreme Court of Judicature Act has made in their application to Courts of Chancery does not in any way affect the reason of this judgment, and it has been more convenient to refer to the provisions by their place in the Act, as they are so referred to in the decisions I have cited.

IN THE DANISH CONSULAR-GENERAL COURT.

Messrs. KOLVIG AND VAN TORP, *Assessors.*

UCHIDA WAKA *versus* E. DE BAVIER.

Wednesday, 6th June, 1877.

The plaintiff claimed from the defendant the sum of \$250, being an amount of passage money from Hamburg to Yokohama, and balance of wages due by her former master, Dr. Kauffman.

Some endeavours had been made to bring about an amicable arrangement of the case, which failed; and the plaintiff stated to the Court to-day that she had used her best endeavours to produce the documentary evidence and witnesses that she had been instructed to bring at the meeting referred to, but was informed that Mr. Watanabe could not appear, though there was present in Court an official who had been deputed to act in his place, who was prepared to supply the information required by the Court. She stated that she was prepared to have the case tried, provided the Court was willing to allow the proxy to appear instead of Mr. Watanabe.

His Honour said that the proxy would only be able to testify to what he knew, and that what had been told him by Mr. Watanabe would not be evidence.

On being examined, the plaintiff stated that she was living at No. 42 (date not mentioned) when a person came and stated that there was a doctor residing with Mr. Bavier whose wife required a nurse for a child, and Mr. Bavier desired to employ her. On the strength of representations by the defendant, she agreed to undertake the voyage to Europe with the doctor. Some difficulty was experienced about obtaining a passport, and eventually she was persuaded to embark on the vessel without one, Mr. Bavier stating that it should be forwarded to her. It had been arranged that a Japanese man-servant was to accompany the family, but on plaintiff going on board she found that no man-servant was going. She demurred to going alone, but after much persuasion was induced to remain on board, on the express condition that she should only accompany the family to the end of the voyage, and then have

her passage paid back to Japan. She informed the Kencho officials what she had done, and they pointed out to her that the undertaking was a most hazardous one, as she had no guarantee that her passage would be paid back, and she might be left alone, moneyless and friendless, in Europe. Upon this she went to No. 76 and laid the matter before Mr. de Bavier, who stated that he would relieve her from all anxiety on that point as he was quite willing to guarantee that her passage should be paid back. On the strength of that guarantee, and the distress the doctor's family was in, she ultimately agreed to go. The destination of the vessel was San Francisco, and when it arrived there, they proceeded across the continent in the railway. During the journey she was treated with great cruelty by her master. After arriving at New York the family sailed for Hamburg, and on arriving at that port she demanded to be sent back to Japan, in accordance with the terms of her agreement, under what conditions she was perfectly careless so long as she was sent back. The doctor, in answer to her request, replied that she could not return until he bought a house. From Hamburg they proceeded to Kiel, and here plaintiff again requested to be sent to Japan, and Dr. Kauffman again refused to send her. From Kiel they proceeded to the hot springs at Wiesbaden, where the doctor hired a house by the month. Plaintiff again insisted on being sent home, but her master persistently refused to accede to her request, urging her to remain one month, then two months, and so on. A lodger in the same house showed much sympathy towards the plaintiff on witnessing her distress, but did not like to interfere in her behalf as he was on friendly terms with the doctor. One day she heard that Prince Fushimi-no-miya had arrived in the town, and her case was laid before the prince. The latter sent one of his retainers to the doctor, and requested to know why he had not fulfilled his agreement. Doctor Kauffmann replied that he was about to send her back. Still he did not fulfil his promise. She was then advised that a Japanese Legation had been established in Berlin, and the best thing she could do was to get her wages and proceed to Berlin and lay her case before the Legation. On mentioning to her master her desire to go to Berlin, he would not entertain it, stating that the understanding that had been arrived at in Yokohama was that she should be sent back to Japan when arrangements permitted or when a favourable opportunity occurred. Plaintiff again went to Prince Fushimi-no-miya's hotel and told him the state of affairs, and the result was that she was instructed to get all the wages she could and proceed to Berlin. The agreement made in Yokohama with regard to wages was that she was to receive \$12 per month for part of the time and \$8 per month for the remainder, but when it came to settling up, her master would only give her \$4.50 per month. She then proceeded to Berlin where she remained about a month. Mr. Shinagawa of the Legation said that there were no ladies for her to attend on at the Legation, and it was not right for her to remain there. But as Mr. Watanabe's wife was at Vienna she could go there, if she desired, which plan was ultimately carried out. Mr. Shinagawa sent 250 yen to Mr. Watanabe, with instructions that the plaintiff's passage money was to be paid from there to Japan. She remained in the service of Mr. Watanabe for fifteen months and he finally returned the 250 yen to Mr. Shinagawa, saying that

he would be responsible for plaintiff's passage to Japan. Mrs. Watanabe returned to Japan in October, the year before last. The amount of her wages during the time she was in the employ of Mrs. Watanabe came to 83 yen. Plaintiff accompanied Mrs. Watanabe to France from whence they set sail for Japan on or about 24th of October, 1875, and arrived in Japan during the following month. She remained in the employ of Mrs. Watanabe until January following, and then left and laid a claim against Mr. Bavier for the balance of wages out of which she said she had been defrauded and the amount of her passage money, but he always stated that he could not entertain her demand until he first communicated with Dr. Kauffman.

Court Adjourned till 2 p.m.

On the Court resuming, the plaintiff resumed her statement, the substance of which was that on returning to Japan and making her demand on Mr. de Bavier, and on his refusing to entertain it, she applied then to a fellow countryman who had been instrumental in getting her the engagement, and who informed her that the guarantee was good in any part of the world, so she then went to the Kencho and instituted the present proceedings.

In answer to the defendant the plaintiff said that she had asked Dr. Kauffman repeatedly for her travelling expenses, and his reply was that he had only promised to send her back if any person was coming to Japan, which was not part of the agreement, for there was no such stipulation made.

To the Court the plaintiff stated that she had not paid any part of her travelling expenses from her own private resources. The wages due to her amounted to about 84 yen. All she was paid by Dr. Kauffman was expended in travelling to Berlin. She further stated that her agreement with Dr. Kauffman was not in writing, neither had she any documentary evidence that the doctor had not paid her wages.

The plaintiff then called a witness who had been in the employ of the defendant. This witness stated that doctor and Mrs. Kauffman were guests at Mr. Bavier's and were greatly in need of a wet nurse. He, witness, was ultimately applied to to help them out of the difficulty, and proposed the plaintiff who was ultimately engaged, though he was not present when the stipulations were made. Beyond this the witness did not appear to know much about the case.

Another Japanese in the employ of the defendant was next examined, but at the onset acknowledged his ignorance of the transaction beyond what had been stated by the previous witness, which he could substantiate.

In answer to the defendant the witness stated that he could certify to the most of what the previous witness had stated.

Another witness was called by the plaintiff who testified that he knew nothing of the circumstances of the case personally, but he had a statement to make of what had been told him by Mr. Watanabe, in whose stead he appeared. The statement was to the effect that Mr. Shinagawa had sent a notice to Mr. Watanabe that a Japanese woman was left destitute in Berlin and that he wished Mrs. Watanabe would take her with her to Japan as she was about to return. Mrs. Watanabe's return was however delayed. The reason the witness appeared in place of Mr. Watanabe was because the latter was engaged on public business and could not attend,

His Honour said that he could not entertain the statement, and Mr. Watanabe ought to have attended the Court in accordance with the rules.

The plaintiff informed the Court that she had no more witnesses, as the affair had taken place in Europe.

Ernest de Bavier, the defendant, then made a statement, to the effect that the guarantee had been given at the request of the Kencho. He was in Europe at the time, and upon his return last January his brother told him the circumstances. The day of his brother's departure the plaintiff instituted several claims against the firm. She went personally to witness, and stated her claim and asked to have refunded her travelling expenses to the amount of \$250. Witness informed her that he had been made acquainted with the case and that according to the guarantee he could only be responsible if her passage money had not been paid to her. And that Dr. Kauffman was the person from whom she had in the first place to claim payment, and if he should refuse without good cause his firm would pay her passage. Witness told her that her word was not sufficient to warrant him taking it for granted. And as it would be difficult for her to sue Dr. Kauffman he would correspond with him. Several letters were afterwards sent by witness to Dr. Kauffman, but as he was constantly travelling about his letters did not appear to have reached him. A few months back witness received a letter from Mrs. Kauffman saying that her husband was in Manila. Upon this witness wrote to a friend in Manila but had not received any reply. In the meantime the plaintiff was continually pressing to have the case settled, until at length witness informed her that he would discontinue trying to get a settlement from Dr. Kauffman, and would allow the case to go into Court as she desired to have it settled that way.

The defendant's evidence was then read over to the plaintiff, who was recalled, and in answer to the Court stated that Mr. Watanabe had not given her any account of the expenses incurred in transmitting her from Europe to Japan; and that she had refunded him 84 yen and still owed him 150 yen. During the passage back she was not paid any wages though she acted as servant. She thought that if the case was adjourned and Mr. Watanabe summoned by the Kencho he would attend. She had applied to the Kencho before, but was informed that they could not summon such a high yakunin, so she sent Mr. Bohm. If Mr. Watanabe would not attend, witness thought that he ought to forego his claim on her for the balance of the passage money. It was in order that plaintiff might pay Mr. Watanabe that she was trying to get this money. Both Mr. and Mrs. Watanabe had informed the plaintiff that she would have to remain in their service until the money was paid, and as soon as this case was settled she was bound to return to Tokio, and if the case went against her she would have to serve a long, long, service in order to liquidate the debt she was under to Mr. Watanabe. She had not tried to get the money from Dr. Kauffman in Berlin, as she had no documentary evidence.

His Honour said that he would adjourn the case to see if Mr. Watanabe could not be compelled to attend, or whether he was beyond the reach of all law.

Adjourned till the 14th instant.

Thursday, June 14th, 1876.

The plaintiff claimed from the defendant the sum of \$250, being an amount of passage money from Hamburg to Yokohama, and balance of wages due by her former master, Dr. Kauffman.

This case was adjourned on the 6th instant, in order to obtain the evidence of Mr. Watanabe, who was present at this hearing.

Eugene Boneau stated:—I am in the employ of the Messageries Maritimes Co. The fare from Marseilles in 1875 was \$400 first class, 2nd \$330, 3rd \$199. There is no reduction for a servant travelling with a European master to Europe. I think the reduction for servants returning third class from Europe after three months' stay there is 30 per cent. The rate has not changed since 1875.

Watanabe Hiramoto stated:—I live at Atagoshita, Tokio. In May 1874 I was Secretary of Legation in Vienna, my wife being with me. She was in bad health and the climate of Vienna, not agreeing with her she went to Berlin. At Berlin I was advised to send my wife home, but on returning to Vienna I was recommended to wait a while and try hot baths. Whilst at Vienna Mr. Shinagawa, who knew of our intention of returning to Japan, wrote asking us to take charge of this woman, Waka, who had been abandoned by a Dutch doctor. I purposed sending her home at the expense of the Legation, in the first instance, advancing the money myself. My wife's return to Japan had meanwhile been indefinitely postponed, so I sent a note to Mr. Shinagawa to say so, and that another Japanese woman had turned up in Vienna. I received another letter from Shinagawa saying that this woman could work well, could sew and do a little cooking and urged upon me to engage her. I replied that in that case I would take her and in the end of June she arrived at Vienna in charge of a German. She brought \$400 from Shinagawa to pay her passage with. At this time I had three women in my employ and this made the fourth, so that there was little use for her. The exchange made the \$400 equal to a little over 300 yen. I explained to her that if she accepted this money to pay her passage home she was bound to pay it back to the Government. She replied that being poor she was unable to refund such a large sum and begged that the money might not be used but that her wages should be retained for the purpose. She turned out to be a very poor servant, could not work well and knew nothing of cooking; but after a while she learned to do a few little things. We took care that she should not have to spend any of her wages unnecessarily, and we gave her presents of clothing. In November 1875, 100 guilders was to her credit, or yen 83.15. I went to Germany on the business of the exhibition and the M. M. Co. allowed me a reduction of 30 per cent. The passage money paid for plaintiff, with this reduction, was 863 francs, or yen 172.60 from Vienna to Tokio. I was ordered to return the \$400 to the Berlin Legation. There were other miscellaneous expenses and after deducting yen 83 there is still a balance of yen 122. I advanced the passage money out of my own pocket and expected plaintiff to receive the balance due to her from Dr. Kauffman; but even if she did not obtain this I promised to overlook the obligation if she served me honestly and faithfully. As she had been a long time in Europe without having a single penny to

finger I advanced to her out of the wages retained fifteen yen for which I gave her a promissory note payable on demand and bearing three per mille per month or 36 per mille per annum.

Plaintiff continued to be in our service for some time on our return to Tokio and received her wages in the usual course; indeed, they were over paid. Plaintiff then went to Yokohama and did not return. A message then came from her demanding payment for my note for 15 yen. I gave ten out of the fifteen. As she did not return I had to employ another woman in her place, and I have neither demanded a return of the money or service due from her. I do not know anything of her relations with Dr. Kauffman beyond her own statements.

Plaintiff stated that witness had repeatedly ordered her to recover \$250 from Mr. Bavier, and she had asked how it was that when only \$180 was due a larger sum was demanded.

Mr. Watanabe said that besides passage money her incidental expenses had come to a good deal and altogether about \$300 had been spent on her.

Plaintiff remarked that she had not spoken personally about this matter with witness, but Mr. Watanabe had reminded her of the circumstances very often, almost daily, telling her that she could recover the money due from Dr. Kauffman from the German Consul if she would apply. She had gone to the Consul but as the guarantee had been under Mr. Bavier's seal he could not entertain the case.

Adjourned till 2 o'clock.

On the Court resuming in the afternoon the witness was

Cross-examined by defendant and stated: It is not true that I told plaintiff that she must serve me for 18 years in order to repay the money spent on her. I understand from Waka that her passage money was to be paid by Dr. Kauffman. She did not ask me to sue Dr. Kauffman, nor did she ask leave to come to Yokohama to press her claim. She did not show me the guarantee in Yokohama. I did not tell her she had a good claim on you on the strength of that document.

To Plaintiff:—I daresay you may have asked me to prosecute Dr. Kauffman, but I never entertained the idea. You proposed that you should work on our return to Japan to make up for the service we did you, and I agreed to it.

To Court:—I paid plaintiff's passage from Vienna to Yokohama. It cost \$172, but I deduct the \$68 of her own on my own private account. The balance due to me is \$104.62 without mentioning minor expenses. I heard from Mr. Bavier that this case was coming on. I had also a visit from Mr. Bohm, asking me to send a letter on the subject. I did not hear subsequently that this was insufficient.

Defendant said that this claim was founded upon a guarantee given by his brother. It depended upon the interpretation of the words of this document, which said that Waka's returning expenses from Europe if not paid by a third person would be made good by defendant. Now Dr. Watanabe having paid these expenses defendant's liability ceases, and plaintiff if she can sue any one should sue the principal, Dr. Kauffman, whose conduct in this matter if really such as described by plaintiff has been quite in contradiction to his character as known by him, defendant. Plaintiff, defendant con-

sidered, was a woman of unusual ability, and had taken advice from several foreigners. But he could not see by what right she sued him; and the sum demanded was far in excess of her actual disbursements. Defendant went further and at some length into the evidence and concluded by praying that if the Court thought fit to order him to pay any sum of money he might receive a guarantee warranting him to recover the money if, after inquiries of Dr. Kauffman, it came out that the passage money had been paid. Dr. Kauffman was about the Philippines.

Adjourned till 21st instant, at 10.30 a.m., when a written judgment will be given.

Thursday, June 21st, 1877.

JUDGMENT.

In this case the plaintiff sues the defendants for the sum of \$250 for her passage money from Vienna to Yokohama upon the following written guarantee being given by the defendants:

"The undersigned testify that they are responsible for the payment of the passage money from Europe to Japan of the woman Waka, engaged as ama for a journey to Europe.

"BAVIER & Co.

"Yokohama, 5th July, 1873."

It is admitted that the plaintiff was engaged by Dr. Kauffmann, a German subject, as a nurse to accompany him and his family to Europe, and that it was part of the agreement that he should provide her with a passage back to Japan or with employment with some person returning to Japan. It is admitted that the plaintiff accompanied Dr. Kauffmann and his family to Europe in pursuance of that engagement; and it is also admitted that the guarantee in question was given by the defendants at the suggestion, or by the intervention, of the Japanese local authorities, who made the giving of the guarantee a condition of the grant of a passport to the plaintiff. The defence set up by the defendants either as preliminary to the trial or by way of argument on the evidence, may be summarized as follows:—

1st.—That Dr. Kauffmann is primarily liable, and that he ought to be sued first before the defendants can be rendered liable.

2nd.—That there is no proof of Dr. Kauffmann's failure to pay the passage money.

3rd.—That the plaintiff released Dr. Kauffmann from his engagement to pay the passage money, and that the defendants as sureties are therefore no longer liable.

4th.—That the guarantee was given to the Japanese local authorities, to indemnify the Japanese Government, for any expenses which might be incurred by that Government in sending the plaintiff back to Japan, and that it was not intended to indemnify the plaintiff for any expenses which she might incur herself.

5th.—That Dr. Kauffmann was only liable to provide her with employment back to Japan, and that she actually attained that employment with Mrs. Watanabe, and that Dr. Kauffmann is consequently not liable for her passage money, and the defendants are therefore not liable.

6th.—That even if the defendants are liable the sum claimed is too much.

The defendants in this case are subject to Danish law, but they are unable to refer me to any Danish law on the subject, and it has been agreed that the case should be decided either according to English law or according to French law. Now in English law the first defence raised by the defendants is not

sustainable. The surety in the absence of any stipulation to the contrary is liable to be sued first, and he can in no way resist the claim on the ground that the principal has not yet been sued. The French law is more favourable to sureties, but the defendants under the circumstances of the present case are unable to avail themselves of its stipulations.

The provisions of the French law which apply to the case are Article 2021 and Article 2023 of the Code Civil.

A preliminary question arises upon the provision of Article 2021, whether the intention of the document signed by the defendants is that the defendants should be primarily liable or liable only as sureties. But as it has been treated on both sides as a guarantee, I shall consider it in that light. The defendants cannot comply with the conditions imposed by Article 2023. They can point out no property of the principal within the jurisdiction upon which the debt could be levied, and, failing that, the first defence falls to the ground.

As to the second defence, I find as a fact that Dr. Kauffmann did not pay the passage money. It is true there is only the direct evidence of the plaintiff herself. But there is nothing to contradict it. On the contrary, all the circumstances of the case go to confirm her evidence on the point. There is moreover the statement of Mr. Ernest Bavier that, having written to Dr. Kauffmann, he received a reply from Mrs. Kauffmann, and there is no suggestion of any allegation on her part that the passage had been paid by her husband, and, if it had been so paid, she would almost certainly have known it, and would as certainly have mentioned the fact. Such an allegation it is true could not be received in evidence on the trial, but it would have been a very material fact in support of the application for an adjournment for the purpose of procuring evidence to which I shall presently refer.

As to the third defence I find on the evidence that the plaintiff did not release Dr. Kauffmann. There is nothing to show that she did.

The reason of her not suing him is satisfactorily explained by the absence of any written agreement to support such a suit.

As to the fourth defence that the guarantee was a guarantee to indemnify the Japanese Government, and not to indemnify the plaintiff, it is to be observed that the document itself is silent upon the point. It is therefore necessary to have recourse to intrinsic evidence to explain it. The plaintiff says: "The Kendio officials represented to me that it was a very hazardous undertaking for me to go into under the circumstances: that I had no guarantee for my return passage money: that I might be abandoned and left destitute when I got to Europe, and be thrown on the world as a woman of bad character. On receiving this admonition from the Kencho I went straight to No. 76, to Mr. Bavier and reported to him. Mr. Bavier replied, 'I will give you a guarantee against all that. I will go guarantee for your passage money.' He then wrote out a guarantee and stamped it, and I took it to the Kencho."

Mr. Bavier's absence prevents the accuracy of this statement being tested by the evidence upon it. But it is confirmed incidentally by Mr. Ernest Bavier, who has stated in his defence:—"I was in Europe at that time, and upon my return last January I heard the circumstances from my brother. The only thing I know is subsequent to the departure of

"my brother in March last year, when Waka put in several petitions. She came to see me personally, stating to me the circumstances of her claim, and asking me to refund her travelling expenses to the amount of \$250. I told her that my brother had explained to me his case, and that, as according to the guarantee which she showed me he could only be held responsible if her passage money had not been paid to her, and as in the first instance Dr. Kauffmann was the person to whom she had to look for payment, she ought to see him, and that, if he should refuse without any good cause to pay her passage, we, as guarantors, would do so."

It is evident from this that when the plaintiff applied to Mr. Ernest Bavier, the statement of the case which he had heard from his brother did not suggest to him that he had the defence which is now set up, and the conclusion I come to upon the evidence of the plaintiff and Mr. Ernest Bavier, is that the document is a memorandum in writing intended to be given to the Kencho of a guarantee given by the defendants to the plaintiff. It is in this view, moreover, that it has evidently been looked upon by the Kenrei who has forwarded the document to this Court in support of the plaintiff's petition, which has also been forwarded through him. Upon this construction the defendants are liable upon this guarantee at the suit of the plaintiff.

The fifth defence it appears to me cannot be sustained. It is not supported by the evidence. There is nothing to show that Dr. Kauffmann ever offered the plaintiff the opportunity of employment with any person returning to Japan. The plaintiff herself says that he did not. She states that there was a distinct understanding before leaving Yokohama that she was only to accompany Dr. Kauffmann and family to the end of the voyage, and that at their arrival at Europe she was to be sent straight back; but that he kept putting her off from time to time so that she was kept from the month of October till the following May without any prospect of being sent home even then. It is clear also from the evidence of the plaintiff and of Mr. Watanabe that the plaintiff did not obtain employment (in the sense of working her passage) with any one returning to Japan. Whether it is true, as the plaintiff's allegations go to show, that Mr. Watanabe made a hard bargain with her is not material to the present case. Whether she rendered any services or not to Mr. Watanabe on the voyage, it was agreed that she should receive nothing whatever in consideration of them.

The sixth defence, which goes however to only part of the claim, has been made out. The expenses for which the defendants are liable do not amount to \$250, but I find on the evidence of Mr. Watanabe that they amount to 172 yen 60 sen. The plaintiff is entitled to sue for this latter sum, for she has paid 65 yen on account of it and is indebted to Mr. Watanabe for the balance. The judgment of the Court will therefore be for the plaintiff for the sum of 172 yen 60 sen.

There is no doubt that the defendants' case is a hard one. They are placed at this disadvantage that they have not received any communication from Dr. Kauffmann, and do not know what defence he might set up. It was on this account that they applied for a postponement of the trial. This application was not urged very strongly. But in any case I am of opinion that no further postponement could have been properly granted.

ed. So far back as the 20th of March last year, the defendants stated in reply to a communication from the Kenrei, forwarding the plaintiff's claim, that they required to write to Germany to Dr. Kauffmann before they could do anything in the matter. It appears from Mr. Bavier's statement that he wrote to Germany and found that Dr. Kauffmann had gone to Manila; that he wrote to him there and wrote also to a friend there to make enquiries, and that, although a sufficient time had elapsed for receiving an answer, no answer had been received. Now by the Further Rules for the proper and speedy administration of justice (Law, 16th January 1828) after providing that the grounds alleged for applications for adjournment shall be carefully tested by the Court, it is provided "that is shall likewise be very strictly observed, that it is not enough that the act, with regard to which adjournment is demanded, is in itself a proper means to further the proceedings, but it is also requisite, that the interested person has not already had sufficient time to do this same act. And a new adjournment shall therefore not be granted him to do what ought already to have been done." Now it appears that there has been sufficient time to communicate with Dr. Kauffmann and to get his answer if he had been minded to answer, and the plaintiff ought not to suffer by reason of his default.

ORDER.

That the defendants do pay to the plaintiff the sum of 172 yen 60 sen within fifteen days from this date.

IN H. B. M.'S COURT AT KANAGAWA.

Before H. S. WILKINSON, Esq., Acting
Law Secretary.

Friday, June 8th, 1877.

Peter Gerhard Hansen was brought up for trial on the charge of feloniously forging a Hongkong and Shanghai Bank note for \$500; with attempting to utter the same; and with aiding and abetting others to forge and utter a note of the same Bank.

Mr. Dickens appeared for the Bank and Mr. Ness for the prisoner.

The charge having been read over to the prisoner he, under instructions from his counsel, pleaded guilty to the third count, viz: that of aiding and abetting.

Mr. Dickens said that as the prisoner had pleaded guilty to the third count he would withdraw the others.

Mr. Ness then addressed the Court on behalf of the prisoner. From the depositions and his instructions it would appear that Hansen was a secondary in the forgery, and that Bennet was the principal and main instigator. He drew attention to the fact that the prisoner had been imprisoned from the 7th of February, which fact he trusted His Honour would take into consideration in passing sentence.

Mr. Dickens then made a few remarks, concluding by asking the Court to make an order for the prisoner to pay the costs of the proceedings. Mr. Ness thought this question might be postponed, to which Mr. Dickens agreed.

His Honour addressed the prisoner, pointing out the seriousness of the case, and then sentenced him to one year's imprisonment, dating from to-day, with hard labour.

Shipping.

ARRIVALS.

June 5, Ger. brig *Sophie*, Binge, 210, from Takao, Sugar, to Jardine, Matheson & Co.
June 6, Frch. str. *Tanais*, Reynier, 1,010, from Hongkong, Mails and General, to M. M. Co.
June 6, Jap. str. *Nagoya-Maru*, Conner, 1,914, from Shanghai and ports, Mails and General, M. B. M. S. S. Co.
June 6, Brit. str. *Elgin*, Miller, 900, from London via Hongkong, General, to Jardine, Matheson & Co.
June 7, Brit. str. *Belgie*, Metcalfe, 2,627, from San Francisco, Mails and General, to O. & O. Co.

PASSENGERS.

Per Brit. str. *Oceanic* for San Francisco.—Mr. James C. Drew, Paymaster C. P. Thompson, u.s.n., Mr. E. W. Nowis, u.s.n., Rev. C. Hartwell, wife and child, Messrs. C. N. Woodall, J. W. Gilbert, Captain Bald, L. R. Goldsmith, J. Bissett, Baron Stillfried, C. Davis Gilbert, C. Beddoes, C. J. Lambard, M. Wose, Geo. S. Maclellan, W. S. Maclellan, Wm. Jardine, J. Springer, Mr. and Mrs. Gordon and 2 children, and native servant, Paymaster Burnside, u.s.n., Doctor Turner, u.s.n.; M. Oyama, Little, A. W. Unthank and 2 Japanese in the steerage.
Per Brit. str. *Belgie* for San Francisco.—Capt. J. Harmon, Commander R. Boyd, u.s.n., Capt. M. White, Mrs. Bower and nurse, Mr. and Mrs. Allen, Messrs. F. M. Jonas, W. F. Milton, D. W. Ap. Jones, and R. Malherbe in the cabin; and Mr. M. B. Starr in the steerage.
Per British str. *Belgie* for Hongkong.—Captain Martin White.
Per Am. str. *City of Tokio* from San Francisco.—Mr. J. M. Ponce de Leon, Miss Lillie Groves, Rev. J. Hayward, u.s.n., J. F. Oeisen, G. Hamilton, J. C. Cadwallader, E. S. Morse, F. Shaw, F. R. Sears, W. H. Metcalf, H. D. McEnean, u.s.n., and Geo. R. Crary. For Hongkong: Hermann Meynau.
Per Brit. str. *Malacca* for Hongkong.—Miss Gilbert, Comm. Garbett, u.s.n., Surgeon Guppy, u.s.n., Mr. Smith, and 5 Chinese.
Per Frch. str. *Tanais* from Hiogo.—H. E. M. de Geoffroy, Mr. and Mrs. Juiry, Messrs. Dallet, M. Bair, Van Oordt, Woolf, E. C. Kirby, Okamoto, M. Geoffroy, 2 servants, and 21 Japanese.
Per Frch. str. *Tibre* from Hongkong.—Mrs. Friend, Mrs. Tossee and infant, Mrs. Stanford, Mrs. Keswick 4 children and servant, Mrs. Huskisson and child, Messrs. Karase and servant, Hasimoto, Douville, Cauchefen, Scheidt, Sinchiya, and Piercy.
Per Am. str. *City of Tokio* for Hongkong.—Mr. J. Rourdan.
Per Frch. str. *Tanais*, for Kobe.—Mons. de Geoffroy, French Minister; Mons. de Montherot, Mons. and Madame Juiry, Messrs. Bair, Dallas, J. Colomb, Duplaquet, Jacquet, Okuda, and Kisaburo; and 47 Japanese in the steerage.

REPORTS.

The British steamer *Belgie* from San Francisco reports:—On May 16th, 1877, at 0.50 p.m., left San Francisco with 11 saloon and 134 steerage passengers, \$1,949,932 in treasure and 854½ tons cargo. Same day off Bar Buoy discharged pilot at 2.15 p.m., at 4.50 p.m. South Farallows abeam. On May 20th passed a three masted schooner bound North. June 6th at 9 p.m. Cape Wosima abeam, arrived at anchorage in Yedo Bay June 7th at 6.20 a.m. Encountered on passage some moderate westerly gales and heavy head seas.
The American steamer *City of Tokio* reports:—Left San Francisco, on 29th May, 1877, with 13 Cabin, 2 European, and 168 Chinese steerage passengers; 1,314 tons Cargo; \$111,185.30 Treasure; and 19 packages U. S. Mails.

Yokohama Market Report and Prices Current.

STAPLE IMPORTS.

Stocks have been somewhat increased by late arrivals. For some days after the publication of our last Summary there was no change in the condition of this market. During the past ten days, however, more activity has prevailed; and considerable transactions have taken place in 9-lbs Grey Shirtings and in 28/32 Yarns. More has also been done in 38/42; and in each case quotations have advanced somewhat. In Woollens, Mousselines show a slight improvement, and there is some enquiry for Blankets, which, in the absence of Stock, are quoted at a small advance.

SUGAR.—This market has declined; and little is doing; for, while a few holders are willing to sell at quotations, the bulk of importers ask higher prices.

The steamer *Elgin* has arrived with general cargo from London. Transhipped cargo ex *Gange*, *Hydaepes*, and *Deccan*, from London, and *Hoogly* from Marseilles is also to hand.

ARTICLES.	PRICES.			REMARKS.

Yokohama Market Report and Prices Current.

STAPLE EXPORTS.

TEA.—Our market during the week has been extremely active at advancing rates, settlements amounting to 5,400 piculs for the period. Prices are rather irregular, but lower grades shew an advance of \$1.50 @ 2 per picul on prices ruling at the opening of the month. The condition of many parcels on offer is becoming poor and flat, and the first crop picking must be considered as nearly finished.

To-day's prices close firm.

SILK.—It is yet too early in the season to say much about this article. So far only about 160 Japan bales, 96 piculs of New Stuff, has arrived from Hachoji and Mayebashi, the quality of which averages 2½ @ 3. The first few bales were bought @ \$570; and since a small quantity has been bought @ \$500 @ \$560, or at a reduction of say \$60 @ \$70 picul, although the natives appear to believe that the production will only reach about 15,000 shipping bales foreign silk-men seem to think it too early to give any opinion. Foreigners shew no anxiety to purchase.

DESCRIPTION.	PRICES PER PICUL.	REMARKS.

DIED.

Died at Yokohama, on the 27th June, infant son of
WILLIAM J. and JESSIE R. THOMSON.

Summary.

OUR last MAIL SUMMARY was dated the 23rd ultimo, for despatch by the P. M. Str. *Alaska*, which left this port at daylight on the 27th instant for San Francisco. Since then we have received the following mails:—

Per O. & O. *Gaelic*, S. Fr'sco, 9 June, arrd. 1 July.
" M. M. *Volga*, M'selles, 20 May, " 3 July.
" P. & O. *Sunda*, L'don 24 May, " 8 July.
" P. M. *City of Peking*, S. Fr'sco, 20 June, arrd. 10 July.

And despatched the following:—

Per O. & O. *Belgie*, for San Francisco

In our last Summary we noted that, in a gale which blew in this harbor on the evening of the 11th inst., H. M. S. *Audacious* dragged her anchor, and drifted into the *Chiri Maru*, a steamer of the Mitsu Bishi Company. Some damage was sustained by the latter vessel, which, in accordance with naval custom, the Captain of the *Audacious* offered to make good. This did not satisfy the Mitsu Bishi Company, who put in a claim, not for damage merely but for demurrage. This claim was resisted, and the company took their case into Court. A full report of the proceedings will be found on the twelfth and following pages of this issue, and

our comments upon the case in two articles on pages 2 and 3, headed "The action against "H. M. S. *Audacious*," and "H. M. Ships "and Consular Jurisdiction," respectively. After a hearing which lasted six days, exclusive of those occupied by the preparatory motions, the case came to an utterly unforeseen conclusion, through the Jury, after having refused to hear further evidence, being unable to come to a unanimous verdict. They were accordingly discharged; and the case is still unconcluded. It is very doubtful whether it can be retried here for several reasons, the principal of which consists in the improbability of the *Audacious* being in Yokohama for any length of time in her present commission. It is therefore probable that the case will be carried to the Admiralty Court at home, that is if the Mitsu Bishi Company should persist in pressing the claim. An interesting and important fact was elicited, we think almost conclusively, in the examination of the plaintiff, Iwasaki Yataro. It has been currently believed that the Company was the Government, and many things went to support this view; but Mr. Iwasaki distinctly and positively stated that the vessels of the Mitsu Bishi Company belonged to him simply and solely—that he was the Company in fact; and that the vessels which formed the nucleus of his fleet, had been given to him by the Government, subject only to his holding his ships at their disposal under certain conditions.

Owing to the British Authorities here not having been officially notified of the admission of Japan into the Postal Union, a contention has arisen as to the right of the Japanese Post Office to forward mails, through the French Post Office, on board boats of the P. & O. Company. A notification which had been issued by the Acting Superintendent of Foreign Mails in the Japanese service, stating that mails would be made up in the Japanese Post Office for transmission by the French service, has been withdrawn as far as it regarded that service by the P. & O. steamers. Meanwhile, pending instructions from England or Hongkong to the British Post Office here, mails are only made up at the Japanese Post Office, for conveyance by the Suez Canal route, once a fortnight, or prior to the departure of the French mail steamers.

JAPAN will, probably, be well represented at the Paris Exhibition next year. H. E. Matsukata, Vice-Minister of Finance, has been appointed Director of the Japanese Section at that universal exposition.

THE typhoon season has commenced. The P. & O. steamer *Sunda* encountered a circular storm, the force of which compelled her to heave to, on the 23rd-24th June, on her last passage hence to Hongkong. During the return passage she encountered another storm, of apparently equal violence, but to the full force of which she was not subjected.

H. M. S. *Audacious*, the flag-ship of Vice-Admiral Ryder, has left for Hakodate, whence she proceeds to Vladivostock. She was followed by the *Vigilant* tender, and shortly afterwards by the *Modeste* and *Egeria*. H. M. gun-boat *Thistle* is the only British man-of-war now in this harbor.

News received by recent mails fully establish the connection between the tidal phenomena observed on the northern coast of Japan on the 11th May, and the terrestrial and marine disturbances which wrought, almost simultaneously, such destruction on the Peruvian coast, and were also unquestionably the cause of the tidal waves whose effects were observed in such mutually remote places as Hawaii, and the Eastern shores of the Australian continent.

INTELLIGENCE was received here on the 24th ultimo of the loss of the Messageries Maritimes Mail Steamer *Meikong* on a passage from Hongkong to Marseilles, near Cape Guardafui. The passengers were rescued by the tea-steamer *Glenarthey*. Mails and cargo appear to have been lost.

THE Fourth of July was celebrated with great rejoicings by Americans ashore and afloat. A regatta was held under the auspices of the officers and crew of the U. S. flag-ship *Tennessee*.

THE insurrectionary war still continues; but the public is kept in a state of great uncertainty as to the relative successes of either side. The thing which appears most certain in connection with the struggle, is that but little probability exists of its being brought to anything like a speedy close.

DRAFTS of men are continually being made from the tranquil provinces and despatched to the scene of strife. A memorial has been addressed to the Government by a Society of Shizoku of Tosa calling themselves the Risshi-sha, which, though it does not appear to have been officially received by any member of the Government, has found its way into publication. The *Japan Weekly Mail* has given a full translation prepared from the original document. It is a well and temperately worded petition, setting forth the evils which have arisen through the faults of the existing Government, and asking for reforms, the head and front of which should be the Establishment of a Representative Assembly "so that the Government may "become constitutional in form."

MGR. OSOUR, Catholic Bishop of Arsenoé and Apostolic Vicar for Northern Japan, has been installed with great pomp in the Catholic Church, Yokohama.

A CORONER'S inquest, resulting in a verdict of accidental death, has been held before H. M. Consul, on the body of John Paulins, a seaman of the British barque *Glamis*, who fell into the water, while painting the side of the vessel, and was drowned.

PUBLIC MEN AND THE PRESS.

LIVING in a cosmopolitan community as we do in Yokohama,—where, though each individual rejoices to preserve the characteristics of his fatherland, the line is indistinct, and national idiosyncracies are merged,—the characters of our public men are matter of public concern. From the earliest period of foreign residence in Japan, no individual foreigner of discrimination has been in a position to ignore the opinions and actions of men holding official position *vis-à-vis* the Government of this country. On the contrary, the circumstances of our position, contracted and influenced as that is by treaties made common to all by the most favored nation clause, make it a subject of very material moment that the representatives of each national section that forms a part of the unit, should be men of sound judgment and moral rectitude, upon whose decision and discretion of character full reliance can be placed. The construction, for instance, to be put upon an ambiguous wording of a phrase or provision of a Treaty by any individual Consul or Minister is of more or less vital importance to the entire community, varying only with the degree of weight to be attached to the opinion and relative position of the person whose public acts are influenced by it, and by his power of giving effect to it for good or evil. That every public functionary has it in his power, by setting his own judgment obstinately against that of his colleagues, to work an incalculable amount of injury to the public weal, is a fact that, did it need demonstration, might, to go no further back, be illustrated by recent events at Kobe. Hence the necessity that our Consular and Ministerial representatives should be men whom all can trust and respect. And their official position is such that they also, very properly and necessarily, are, in social life, accorded a *status* which cannot be lost but by their own default. We repeat, therefore, that, publicly and privately, the characters of our public men are matter of public concern. And in proportion to the importance and multifariousness of their duties, and the way in which these are performed, must our judgment of them be influenced. To enumerate the requisite acquirements necessary to enable a Consul to fulfil his functions with satisfaction to his government, his immediate superiors, his countrymen, the native authorities, and his own conscience, would be well-nigh impossible. His is a continual state of watchfulness, anxiety, and care, too often unrelieved by the rewards of sympathy or public recognition, — sometimes rendered almost insupportable by calumny and scurrilous defamation. An instance of this is familiar to most readers of newspapers in Yokohama; and though we have hitherto refrained from giving expression to our opinion upon the atrocious libels that have found their way into American papers, upon the character of one of the most respected of our public men, it is not that we do not share the general indignation felt by all who have watched the career of General VAN BUREN since his advent to Yokohama. On the contrary, our reprobation of the succession of cowardly blows which has been dealt at him in the dark is as sincere as that of any of our readers. But, even with such feelings, a sentiment that will not be understood by the conductors of the American press would have restrained us from advertising to a subject, so personal as

that under consideration, were it not that an attempt has been made in the *New York Times* of the 3rd May, by a correspondent writing under the name of JUSTITIA, to vilify the character of an excellent and very highly respected officer in the U. S. Navy, under pretence of defending that of General VAN BUREN. Those of our readers who were acquainted with Captain McCauley, of the *Lackawanna*, will be surprised to learn, on the authority of JUSTITIA, that he has been occupying his spare time at the Boston Navy Yard by traducing the U. S. Consul-General at Yokohama; because, while he was stationed at this port, he was, “for good cause, denied access to ‘circles where his country’s representative is ‘an honored guest.’” First, we have General VAN BUREN charged with immoral and scandalous practices, and general dereliction of Consular duties; and, secondly, Captain McCauley named as his accuser under the inducement of personal envy and malice, arising out of a state of things that never existed in fact. Anything further from the truth of these several charges would be difficult to conceive. Both of the officers we have been compelled to name are gentlemen: both have succeeded in gaining the personal respect and esteem of all who are acquainted with them; and neither of them is capable of a mean or dishonorable action: their names are the last that should have been made shuttlecocks of in public print. It is true that a difference of opinion arose between them on a point of public duty; and that the matter was referred by each to the proper department of his Government; but there (we write with knowledge) the matter ended; and we are in a position to affirm positively that neither of them could have, or, as a matter of fact, has, either in private, or by means of the public press, or in any other way whatsoever, sought to discredit or injure the other. Indeed we may go further, and say that, in the case of one of them, at least, an offered opportunity was rejected with indignation. And yet we see the names of two honorable men bandied about from newspaper to newspaper, without any expression of regret, nor any apparent sense of shame, and in culpable violation of that rule of chivalry which forbids gentlemen from praising their friends in public,—far more so from smiting their enemies in secret. The publication of such letters as those to which we have adverted, clearly demonstrates the thinness of the dividing line between liberty and license. So great is the power wielded by the press, of America particularly, for good or for evil, that the least that can be expected of its conductors is a commensurate exercise of circumspect discretion; instead of which we find the names of its public men persistently and perpetually held up to obloquy and derision by unscrupulous managers or editors who allow their columns to be prostituted, apparently without knowledge or enquiry, by any rogue or rascal desirous of disgoring his malice. The traducer of General VAN BUREN is known, in Yokohama, and will not soon be forgotten in Nagasaki; and though we can form no judgment as to how far any of our evil machinations, we at all events write with a full knowledge of local opinion, and assert that General VAN BUREN has proved himself to the residents of Yokohama an able, upright, and conscientious Consul, of whom his countrymen may well be proud, a just and impartial judge, and that his social qualities have raised him to a point in private estimation which no one of his countrymen has ever before aspired to or attained.

THE ACTION AGAINST H. M. S. “AUDACIOUS.”

THE action of IWASAKI YATARO *versus* Captain COLOMB, R. N., for damages direct and consequential sustained by the Mitsui Bishi Company’s steamer *Chiri Maru*, owing to her being fouled by H. B. M. S. *Audacious* during the gale on the night of the 11th June, deserves more than the attention usually bestowed upon similar matters.

The startling innovation of instituting personal proceedings in a Consular Court against the Captain of a ship of war for negligence in the public service: the curious and interesting facts revealed during the trial concerning the formation and constitution of the Mitsui Bishi Company; and the condition of the *Chiri Maru* before the collision or fouling, appear to be the remarkable features of the case, as the merits of the action and defence present nothing out of the ordinary course of similar actions.

Mr. DICKINS, Counsel for Captain COLOMB, demurred to the petition upon two grounds: 1.—That the petition did not specify any particular act or acts of negligence or mismanagement; and 2.—That the Court had no jurisdiction over the defendant in respect of the matters alleged in the petition. The first objection is of a formal character; but the second appears to us to be of the utmost importance, practically involving the subjection of HER MAJESTY’S Government to Courts established, not in a Crown Colony, but in a port where the authority of the Queen is extra-territorial, and the judges are, unless fortuitously, men without legal training. The arguments of the Counsel engaged in the suit, the gravity of the demurrer, and the weighty question at issue, seem to have influenced the learned Law Secretary who happened to preside in this instance to very serious consideration, evidenced by the length of a decision, which appears to us to have exhausted all the authorities on the subject. To a consideration of that decision we hope to be able to advert at greater length on a future occasion.

The Mitsui Bishi Company has, since its establishment as a steam carrying concern, been commonly considered a branch department of the Government: the steamers were looked upon as Government property: the proceeds or profits were supposed to revert to the public purse; while the nominal proprietors were supposed to be the mere agents and representatives of a Company carrying on business by means of Government vessels, Government funds, and Government support. How far this common and popular view is correct, or is to be trusted, depends in great measure upon the credibility to be attached to the evidence given by the chief plaintiff in cross-examination under review. The plaintiff in cross-examination stated that he was the proprietor of the “fleet” of the steamers known as the Mitsui Bishi Company’s vessels, and he added the following points in support:—there never “have been any shareholders in the Company; “the Government gave me several steamers, “and I formed the Mitsui Bishi Company. I “think the Government transferred to me “eighteen steamers. I have never paid, and “have never been asked to pay, for them. The “earnings of these steamers pass ‘into my “hand.’ On taking over these vessels I entered into an agreement with the Government to the general effect that ten or more (probably the entire number of vessels) “should be held at the disposal of the Govern-

"ment whenever their services were required for Government purposes: when so used the Government would pay me freight and I should provide for the working expenses. The purchase of the Pacific Mail Company's steamers was made by me, and their payment was provided for by a loan from the Government. They are my property, not the Government's". What construction can properly be put upon this evidence? To the foreign commercial mind the gift by Government of eighteen steam vessels, and a further loan for the purchase of others, in consideration only of the right to employ these steamers upon payment of ordinary chartered freight, whenever the needs of the State might require them, seems not only improbable, but absolutely, wildly, improbable. A Government, compelled by the exigency of their finances to use the greatest economy to support the burdens of administration, making a free gift of vessels, which must have cost them some two million dollars, to a private individual, seems on the face of it absurd. Who can contemplate the possibility of a Minister of Finance who, refusing to listen to the demands of the people for a revision of taxation, is still able to propose the alienation of a state asset which could be made available as marketable property? We confess we do not share in these impressions; we are apt to be guided by such evidence as can be obtained, and upon weighing that before us we form the following conclusion based upon the premises set forth in the evidence epitomised in the first part of this article. During the early years of Japanese intercourse with foreigners, steam vessels excited much admiration amongst the people of this country: to see a vessel driven by an unknown power acted upon the unsophisticated Japanese to so great an extent that possession was the only remedy. Many vessels were purchased, the majority being either old and inferior, or slow and expensive. When the novelty of their purchases wore off, the Government, who had succeeded to the possession of a quantity of property formerly held by several princes, found they were actually encumbered with a number of useless vessels—vessels which they could not employ in a commercial sense, because their ignorance of trade and of the management of ships prevented them—and in order to relieve themselves of a burden entailing constant expenditure to maintain, without possibility of return, it is not surprising that they should propose to an influential and enterprising countryman, to transfer to him the whole of these vessels upon the consideration that they should be maintained and kept up, and be held at the Government disposal whenever their services might be required. Extraordinary as this proposal may appear, it is reduced to common proportions when the facts are considered that the vessels were useless to the Government, in a profitable or profitable sense, and valueless as marketable property if put up for sale, or for resale to foreigners. Upon the evidence of IWABAY YATARO, and upon the further patent facts of the departures and arrivals of the steamers employed upon the chief mail service, have been made subservient to the requirements of the Government during the insurrection, combined with the absence of any credit in the national budget for either proceeds of sale of the vessels, or the returns of their working, we have no hesitation in concluding that the steamers are the property of an individual who chooses, as he has a perfect right to do, to trade under the style of the "Mitsu Bishi Steamship Company."

The *Chiri Maru* was proved to have been, before the collision took place, in such a disgracefully inefficient condition for seagoing purposes, that we think it would have been to the interests of the owner of a large fleet of merchant ships to have refrained altogether from an action which he ought to have been, and no doubt was, advised would necessitate a close examination into the seaworthiness of the damaged vessel. The recent agitation in England has been the means of creating a reform, which public opinion there is determined to carry out, regarding the practice of sending to sea old and unseaworthy vessels, and has directed public attention to an abuse which has had uncontrolled sway for many years past; and which practice, striking at the very foundation of merchant shipping and its concomitant, marine insurance, threatened to inflict irreparable injury upon the first maritime service in the world; and we are sorry to see that the first steamship company in Japan should think of sending to sea in typhoon season an unseaworthy ship. The master of the *Chiri Maru* admitted that the boilers were unfit for use: the chief engineer of the *Audacious* testified that "the boilers were totally unseaworthy, the furnaces one mass of defects, and the vessel could in no way be considered a seagoing steamer." Disabled as a steamer she still might have held her own under sail, were it not for the fact that, "the stem to which the foresail was fastened was so fractured (before the accident) that it was in a very dangerous state; and if the fastening had given way the mast would have fallen and the ship have come to grief."

The defence to the action was a plea of "inevitable accident;" and for the credit of the navy we are glad to be able to pronounce it as our opinion that the evidence completely substantiated the defence. The *Audacious*, a large and heavy ironclad vessel, was riding with one anchor about a cable and a half distant from the *Chiri Maru*: during the gale she commenced to drift towards the latter vessel, and, although a second anchor was let go almost immediately, the *Audacious* fouled the *Chiri Maru* doing the damage which gave rise to this action. For the plaintiff three masters of merchant vessels gave evidence to the effect that in their opinion the *Audacious* should have had two anchors down, but none of them hazarded an opinion on the seamanship of Captain COLOMB in riding at one anchor only. Staff Commander JOHNSTON stated the practical rule was for large vessels to lie at single anchor in a roadstead, and on this point he was corroborated by Commander PARR, Captain COLOMB, and Retired Captain PURVIS, who were unanimous on the subject. Captain COLOMB's evidence resolved itself into a lecture on seamanship, remarkable for practical knowledge and lucidity; and the testimony thus given shows beyond doubt that every precaution, prudent and necessary, was taken to prevent accident during the gale. It appears also to be proved that, if the first anchor of the *Audacious* had not been broken or injured, the ship would have drifted. It also appears that, if the *Chiri Maru* was lying at one anchor, she would have been able to veer sufficient cable to keep her clear of the *Audacious*, but that having two anchors down there was no time to veer both cables; and to slip them under such circumstances would have placed the vessel in imminent peril of loss.

Space will not permit us to enter further into the evidence given; nor indeed should we have commented upon so clear a case at all, were it not eminently desirable that there

should be a clear expression of public opinion in a case in which one of Her Majesty's ships of war is practically the defendant, and a Japanese the plaintiff. The occurrence, judged by the rule laid down by the Court of Admiralty in the case of the *Europa*, has been proved to our minds at least to have been "inevitable accident," a term thus defined:—"Inevitable accident is where one vessel doing a lawful act without any intention of harm, and using proper precautions to prevent danger, unfortunately happens to run into another vessel. But the caution which the law requires is not the utmost that can be used. It is sufficient that it be reasonable, such as is usual and ordinary in similar cases—such as has been found by long experience in the ordinary course of things to answer the end—the end being the safety of life and property."

We cannot conclude without adverting to the amount of the claim as stated by the plaintiff. Whoever may be responsible for the errors made, and subsequently partly corrected, one thing is certain, and that is that the damage done to the *Chiri Maru* has been grossly overestimated.

It will be evident from the foregoing remarks, that we have failed to appreciate the inability of the jury to arrive at a unanimous decision; and, certainly, their action in declining to listen to proffered evidence on behalf of the defendant, before their minds had been made up, is censurable in the highest degree. They clearly intimated that they had heard sufficient evidence to enable them to give a unanimous verdict; and when it came to the point they were found to be singularly and lamentably wanting in unanimity. Six full days of their own time, of the time of the Court, and of the time of the suitors have thus been simply wasted: six full days of the time of the Counsel engaged will nevertheless have to be amply rewarded;—and the result is absolutely *nil*.

H. M. SHIPS AND CONSULAR JURISDICTION.

THAT the question of Consular jurisdiction over naval officers, serving at a distance from home on board Her Majesty's Ships, for acts of omission or commission while in the performance of their duties is one of grave and serious importance, is sufficiently evidenced by the consideration and thought bestowed upon it by the ACTING LAW SECRETARY in the recent action against the Captain of the *Audacious*. The decision arrived at was that Her Majesty's Courts, in Japan have such jurisdiction; and the reasoning in support of that position is very cogent. But though cogent, the question we propose to consider is whether it is wholly satisfactory. Do we arise from a careful study of that decision convinced that it is right? Hitherto we confess we have been under the impression that Naval Officers are exempt from the jurisdiction of Consular Courts in China and Japan, unless with respect to matters arising on shore; and we believe that that has been the generally received opinion. But we are now authoritatively told that we are all wrong; and it is not unnatural that we should consider that dictum, which is thus summarized:—"I conceive that Her Majesty can by Order in Council constitute [Courts] in these countries and can give them jurisdiction over persons serving on board H. M.'s Ships lying in the harbours of these countries, and I conceive that general words giving

"jurisdiction over all Her Majesty's subjects in these countries would include Her Majesty's subjects serving on board Her Majesty's ships while so living in harbour." To the first proposition we take no exception. But as to the general rule in the Order in Council of 1865 sufficient to clothe Consular or other British Courts with the jurisdiction claimed? From the preamble of that Order it is to be gathered that its object, so far as Japan is concerned, is to make provision for the due exercise of Her Majesty's power and jurisdiction, and particularly for the regular and efficient administration of justice among Her Majesty's subjects resident in (the italics are ours) or resorting to the dominions of the sovereign of Japan. The question then arises whether a Captain of one of Her Majesty's ships, while serving in harbour on board that ship, can be said to be resident in, or resorting to, the dominions of the Mikado. It may at once be asserted that he is not a resident: but can it, with equal justice, be asserted that he is resorting to these dominions? A merchant ship clearly resorts to Japan, at the will and pleasure of her owners; and foreigners coming here for trade or pleasure may be also said to resort here. But can a Queen's Ship, despatched to this station in the service of her country, and acting under the orders of the Admiralty, be said to resort to the dominions of the Mikado? In one sense, that of repairing to a place,—yes. But is there not an element of volition, or free choice, implied by the use of the word "resort"? Can a man be said to resort to a place, who goes there at the order of another? If I send my agent to Shanghai for a particular purpose, does he resort to Shanghai? Our illustration may not be a happy one, but the distinction we are inclined to draw is this:—A Queen's vessel coming to this country on service cannot be said to resort here; neither can an officer sent ashore on duty be said to resort here; but directly an officer comes on shore for his own pleasure, then, we conceive, in the fullest sense of the word, he may be said to resort here. But, admitting that argument to be somewhat strained, the resort must be to the dominions of the Mikado; and the dominions of the Mikado may be roughly said to embrace the whole of the islands of Japan, its rivers, harbours and bays, and the waters within a marine league, or as far as cannon shot will reach from the shore. To resort, therefore, to the harbours of Yokohama, or Hakodate, or elsewhere in Japan, is, generally speaking, to resort to the dominions of the Mikado. But does this hold good in the case of a man-of-war or her Captain while on board? Were it not for the extra-territorial clauses of the Treaty, which provide for the exercise of jurisdiction over British Subjects by British Courts, the answer to this question would be a decided negative; for "long usage and universal custom entitle every public ship to be considered as a part of the state to which she belongs;" and therefore, it would seem, a British man-of-war being a portion of Great Britain, even though in the territorial waters of Japan, her officers, while on board, cannot be said to be within the dominions of the Mikado.

This brings us to the next view of the question, which is whether the creation of Consular Courts, supplanting as they do the jurisdiction of Japanese Courts, and exercising "Her Majesty's jurisdiction exercisable in Japan," has had the effect of destroying the rule of international law to which we have referred, of doing away with the immunity enjoyed by the Queen's Ships

in other foreign ports the world over, and of giving those Courts control over Her Majesty's Ships and officers serving on board, in the harbours of Japan, for acts of negligence while on the Queen's service. The grounds upon which Mr. WILKINSON justifies the exercise of that jurisdiction are that the Queen's ships are only exempted, by the law of nations, from the jurisdiction of a foreign sovereign, and that the jurisdiction of the Consular Courts in these countries is the jurisdiction of HER MAJESTY, and not that of a foreign sovereign; and that hence, on the principle *cessante ratione cessat lex*, the exemption from civil process in the ports of a foreign country ceases when that process is no longer the process of a foreign sovereign. If this reasoning is correct,—and, that it is cogent we have already admitted,—we have an anomalous state of things which we venture to think was never contemplated, and had it been contemplated would have been provided against, by the Order in Council conferring jurisdiction on Consular Courts. But why are the Queen's ships exempted from the jurisdiction of foreign tribunals? Is it because foreign tribunals are not likely to do justice? Clearly not. The reason, we take it, or at all events the principal reason, is that it would be highly prejudicial to the public service that public ships, and their officers, should be liable to be detained in foreign countries, and so prevented from performing the services for which they are commissioned. If this surmise is correct, it follows that the reason of their exemption not having ceased, the principle of law remains in full force. If our surmise is incorrect, and if general words are sufficient to do, and in the case in point, do, confer the jurisdiction claimed, then, as the powers exercisable by Consular Courts are, under the general provision in the Order in Council providing for the application of the laws of England, the same as those exercisable by Her Majesty's Courts in conquered or ceded territories, it would follow that the movements of a fleet might be impeded at the discretion of an Acting Vice-Consul, say at Niigata, by service of process upon an Admiral, and that a civil action is maintainable against Her Majesty's Minister in the Vice-Consular Court at Yedo. These are extreme cases; but it is by extremes that general principles are tested. The argument *ab inconvenienti*, as applied to the absence of jurisdiction of Consular Courts over officers of the Crown in China and Japan seems to us to be entitled to weightier consideration than that bestowed upon it in the decision under review. The exercise of the jurisdiction claimed seems to us to be accompanied by the most serious drawbacks. Morally, there is no reason why every man, in his position what it may, should not be amenable to the process of any Court of competent jurisdiction; but public officers are public servants, and though rightly held amenable to the jurisdiction of Courts of law in England, where they can be replaced at a moment's notice, the same reasoning does not appear to us to be applicable to them here. Suppose that during the recent negotiations in China Sir THOMAS WADE had been detained at Tientsin by the Vice-Consular Court there, and that the British Admiral had been compelled to remain in Shanghai, by process of the Court there, while Li HUNG CHANG was anxiously awaiting them at Chefoo! Such a state of things is certainly conceivable. There is a dictum of Sir WILLIAM SCOTT to the effect that a naval commander may be reasonably supposed to carry with him such a portion of the sovereign authority

as shall be necessary to provide for the exigencies of the service; but, in a case that came before the Privy Council some forty years ago, their Lordships said that the observation of Sir WILLIAM SCOTT was plainly applicable only to the case of a commander carrying on war in a remote quarter, and the authority necessarily incident to that situation. Whether that observation would receive the same limited construction at the present day in view of circumstances that were not in contemplation when that limited construction was placed upon it, is open to serious doubt. We are inclined to think that the principle would be held to apply to the case of a commander on the Queen's service in these remote quarters, even though he did not happen to be carrying on war.

If these considerations have any weight, the question of jurisdiction raised by Captain COLOMB's Counsel was very properly and legitimately raised; and that being so, and the question being a new one,—arising out of the application of a complex series of contradictory principles to exceptional circumstances,—and therefore by no means free from doubt according to our view, we think that the costs of the demurrer might well have been made costs in the cause. For ourselves, we wish we could say that we are convinced by the decision. We have no doubt that the jurisdiction claimed was not directly intended to be conferred upon Consular Courts in China and Japan: whether it has been indirectly conferred appears to us also not free from doubt; and, though Mr. WILKINSON's opinion and arguments are entitled to great weight, the question, as a constitutional one, and from the peculiar circumstances that surround it, is of such grave importance that, without intending the slightest discourtesy to the learned Judge who dismissed the demurrer, we cannot refrain from expressing a wish that it might be set at rest, once and for all by no less authority than the Privy Council.

THE INSURRECTION.

From the Japan Gazette, June 22nd.

The war news from the South, as contained in the native papers, amounts to the following:

The *Nichi Nichi Shinbun* states that information has been received from Osaka of a telegram received in that city on the 15th, from Yamagata Kencho, to the effect that between two hundred and three hundred of insurgents had crossed the Channel to the island of Shikoku. This is alleged to be a fact; and in consequence three battalions of infantry have been dispatched from Hiroshima to Shikoku, and have camped at Miyajima, where, it is said, high excitement prevails among the shizoku. At all events, it has been deemed necessary to send three hundred troops to reinforce the three battalions; and it is reported that a popular shizoku in Hiroshima named Funakoshi, has undertaken the shima-jima work of enlisting 600 more, who will also be sent to Shikoku. A rumour prevails among the natives of Hiroshima that if any shizoku refuse to obey a summons to join the army, their pensions will be confiscated.

According to the *Hochi Shinbun* a telegram was received from Kioto on the night of the 20th instant, announcing that about 600 insurgents and a rebel leader had surrendered to the imperial troops.

From the *Akebono Shinbun* we learn that the castle of Mihara, in Bingo

situated about 16 *ri* South-West from Hiroshima, is estimated to be in some danger; and on the 13th instant Mr. Funakoshi, Chief Secretary of the Home Department, was despatched there for the purpose of raising a sufficient force among the local shizoku to protect the castle. This same castle is strongly constructed and occupies a good position; and three hundred years ago it was the residence of General Kohayagawa.

A telegram from Kumamoto despatched at 12 a.m. the 21st, says that: At dawn on the 20th the imperial armies started for Oguchi. On coming into collision with the enemy, the imperialists were at first routed, but eventually the tide of battle turned in their favour. The victors seized the fort of Oguchi and advanced one *ri* South-West from it. Another telegram, sent by Lieutenant-General Kawaji, at 7.25 a.m. on the 21st, announces that a band of scouts had been sent to Akune the previous day and they attacked and seized the battery bearing the same name. About six or seven rebel soldiers were found dead in the fort. On the following day a battle was commenced in the town of Akune. The rebels fled in disorder and endeavored to check the advance of the victors when about one *ri* from the town. They were again dispersed by the imperialists, who seized two cannon and several rifles, and captured eight soldiers.

The *Mai Nichi Shinbun* says:—Two members of the Risshi-sha Society in the Kochiken, viz., Fujiyoshi and Muramatsu, have held communications with Kirino. This was discovered and information sent from Kioto to Tokio on the 8th inst. The two men were arrested, and sent from Shikoku to Osaka on the 17th instant, and thence to Kioto. About thirty police escorted the offenders, who are now imprisoned in jail in Kioto.

June 25th.

The *Choya Shinbun* says:—A telegram despatched by Lieutenant General Kawaji from Demidzu at 11 p.m. on the 22nd instant announces that on the 21st his troops, marching for Shibi-yama, crossed the river and attacked and stormed the castle of Miya-no-jo. The number of killed and wounded is not yet known. Another detachment, marching on the Akune road, has crossed the mountains of the same name. Four soldiers were killed and eighteen wounded.—Lieutenant General Kawaji removed his head-quarters from Demidzu to Miya-no-jo castle on the 23rd instant.—A despatch from Osaka, dated the 23rd, states that the imperialists were prepared to attack the insurgents in Higeoka (Bungo) at dawn on the 21st instant. But the rebel soldiers began to leave their camp by stealth before night. They have retreated as far as Nobeoka (Hinga) and Kumada. The imperialists entered Higeoka and occupied the mountain of Akane. When the insurgents first established their bases in Hitoyoshi, they are said to have desired to hold the imperialists in check till the June rains when they intended to dam up the large river Kumagawa; and to cut through the dam when the waters were swollen, hoping, by the inundation which would follow, to sweep away the imperial troops as far as the castle of Yajiro. But, unfortunate for the insurgents' plans, they were obliged to leave the imperialists masters of Hitoyoshi before the rainy season set in.

June 26th.

The *Hochi Shinbun* writes:—A telegram from Miya-no-jo castle, sent at 10.35 p.m. on the 24th instant, announces that on the

21st the imperial troops, commanded by Lieutenant-General Kawaji, overcame the rebels at their fort in Akune, and pursued the routed insurgents to a distance of eight *ri*. When the victors arrived on the bank of the river Sendai, they found the bridge burning, which the rebels had set on fire, in order to prevent the advance of the imperialists. The insurgents on the opposite side of the river kept up a tremendous fire, in face of which the victors could not cross. The following day, the 22nd, was spent in mutual firing across the stream. On the 23rd a band of the imperialists forded the river on foot about 8 *cho* below the bridge. They took the insurgents on the flank and put them to flight in disorder, killing a great number, and taking two mortars, three cannons, many rifles and large quantities of ammunition.—On the 20th instant, one battalion of the Osaka garrison was despatched for Iyo, Shikoku, and about 100 police were sent to the same island.—It is rumored that 800 soldiers of the Yezo garrison will shortly arrive in Tokio, and that H. E. Kuroda will again leave for the seat of war at their head.

The *Choya Shinbun* says:—A telegram sent by Murata, police inspector in Bungo, dated the 23rd instant, states that the rebels in Higeoka retreated for Ishizaka, Hinga, on the 20th instant. Now no insurgent is seen throughout the entire province of Bungo.—Another despatch, from the telegraph office in Yajiro on the 25th instant, announces that the imperial forces, commanded by Lieutenant General Kawaji, occupied Iriki and Sasanotani. Another division marched as far as the mountains of Hayeno, where they can look down on the city of Kagoshima, which is only $5\frac{1}{2}$ *ri* distant. The imperial troops in Miya-no-jo castle are troubled by the want of provisions owing to defective means of transport. They have captured about 1,800 bags of rice from the rebels.

The *Akebono Shinbun* says:—On the 5th instant an insurgent of Higo came to the imperial camp on the river Kumagawa, holding a head dripping with blood in the left hand and a sword in the other. He gave himself up. On examination he confessed as follows:—

He was a shizoku of Kumamoto. When he and three others left the insurgent camp, intending to desert, they were unfortunately discovered by a body of scouts, who fired upon them. Two were killed on the spot; and one other so badly wounded that he could not walk. He committed harakiri and the deponent cut off his head. The provisions of the insurgents are nearly exhausted and they have no more salt. They are generally much discouraged, and an opinion in favor of surrender prevails among them. But their leader Ikebo is determined to fight till the last; and the Kagoshima insurgents think with him.

The *Mai Nichi Shinbun* says that Saigo Takamori is now at a monastery, close to the castle of Miyoko, (Hinga) and that he has with him three battalions.

June 27th.

The following are extracts from a letter, dated the 13th instant, sent from Kumamoto to the *Nichi Nichi Shinbun*:—

The 3rd division of the imperial army consists of 2,000 soldiers, and the 2nd of 5,000, formed into 30 companies. Another division is commanded by Lieut.-General Miyoshi, who has established his headquarters at Yajiro, and thence despatched two battalions of troops to the province of Bungo and an-

other battalion to Hinaku. Two more battalions were sent to the latter province from Kumamoto on the 10th instant. The detachment commanded by Lieut.-General Kawaji marched on the Demidzu road, and that under Lieutenant-General Miura on the Oguchi road. Lieutenant-General Yamada has penetrated victoriously as far as Kakuto, and Lieutenant-General Nodzu has joined the imperial forces in Bungo and was expected to march for Nobeoka, Hinga.

Since the famous siege of Kumamoto castle was raised, the most severe conflict in Higo was the bombardment of Hitoyoshi, which lasted three days. About 100 imperial soldiers were killed and wounded. At 9 a.m. on the 1st June, Lieutenant-General Yamada entered the city. Two days previously the insurgents had commenced to transport their ammunition and provisions. They set the city on fire and retreated on three roads, viz., those of Yoneyoshi, Oguchi, and Kakuto. An insurgent force has erected a fort at Okabe about 2 *ri* from Hitoyoshi. Since the 2nd instant, about 600 insurgents have surrendered. Among them was a chieftain of the Hitoyoshi shizoku, who surrendered with 260 men on the 6th instant, bringing large quantities of ammunition and 10,000 yen to the imperialists. Each of the others was found on examination to have at least 40 or 50 yen in his pocket.

The insurgents seem to want a leader. Among other plunder, the imperial troops found several piles of stills for distilling spirits and various other articles, made of tin, which the rebels had collected to make into balls. When the insurgents were retreating from Hitoyoshi, several parties, consisting of the Shigakko-to, showed great courage in protecting the rear of the rebel army. Etsumi, one of Saigo's Lieutenants, is ordering all matters, and his influence is equal to that of Kirino. He is now in Oguchi. Fuchibe was wounded in the battle on the 30th May.

It is rumored that Saigo ordered all the Shinto and Buddhist priests in the provinces of Satsuma, Osumi, and Hinga to pray for victory for one week. But on the last day of the week of prayer his Head Quarters in Hitoyoshi were attacked and seized by the imperialists.

A telegram from Lieut.-General Kawaji states that, on the 25th inst., he had removed his camp to Iriki from the castle of Miya-no-jo.—About 3,000 sniders have been purchased from a German merchant, and forwarded to Imperial Head Quarters at Kumamoto.

Etsumi, the rebel leader, who was wounded in the battle at Yoshida on the 30th ulto., died in hospital on the 16th inst.—A telegram sent by a foreign merchant in Nagasaki, according to the *Hochi Shinbun*, announces that the shizoku in Tosa are much excited and that they have taken up arms.

The reports that ex-Sanji Itagaki, of Tosa, was summoned to appear before the Mikado, in Kioto, and that the bearer of the memorial from the Risshi-sha society was arrested on suspicion of having held communication with the insurgents are false. Still, the spirit of the members of the Risshi-sha society is highly excited, and their president, Itagaki, is endeavouring to preserve peace among them; but, in spite of all, their excitement is becoming more and more intense. Another society, named the Kinoto, in the same ken, consisting of 2,000 shizoku, hold meetings at Kumanohara, distant about one *ri* from the castle of Kochi. The western cape of Tosa

is distant only 18 ri from the opposite coast of Hinga, which is occupied by the insurgents.

Since the insurgents were expelled from the castle of Hitoyoshi, they have shown much discouragement, and about 2,000 men have already deserted. Notwithstanding this, Kirino is yet endeavouring to make his way once more into Bungo.

June 29th.

A successful cause needs no concealment; and one grave argument against the probability of the Government successes being as great as those in power would have foreigners and their own subjects believe, is their studious concealment of the real progress and condition of affairs at the seat of war. Everything that actually relates to the strife is kept a profound secret, as far at least as the Government can command secrecy. We have, however, been able to glean the following facts.

The *Massilia* has returned to Nagasaki. She has been employed in landing troops, in *Shikoku*, at Sinhama, East of Tsurisima Lighthouse, and at Nagahama, at the mouth of the river Hichigawa, just North of Cape Sada in Iyo. This certainly points to trouble, actual or anticipated, in that province or in Tosa, or both.

The two young Princes, sons of Arisugawa-no-miya were landed at Kumamoto.

The *Riojo*, *Kasuga*, *Tsukuba*, and *Takao Kuwan* are laying at Kagoshima, which town is yet occupied by imperial troops. Still, it is invested by the insurgents, who from time to time throw small shells into the town of Kagoshima. The vessels in harbour have changed their position, moving farther off shore than they were, probably with a view to get out of range of the insurgents' positions. We now turn to the native press for their record of operations, and find that the accounts they give are so similar in expression as to be identical in sense. They say:—

A telegram from Kagoshima announces that on the 22nd the imperial army in Kagoshima despatched a force for Isoyama through Higeoka, and attacked the rebels on Isoyama. On the 24th the insurgents in Takemura were totally routed. On the following day one battalion of police, from the command of Lieut.-General Kawaji, arrived in Kagoshima. On the 26th two battalions of police in Kagoshima marched out to meet Lieut.-General Kawaji in the castle of Miyanojo, where he had established his camp.—A telegram from Kyoto announces that information received from Kumamoto states that, on the 25th instant, Colonel Nodzu commenced to attack the rebels on the Nobeoka road in Hinga. The imperial troops marched as far as Okusu and Miyamidzu, which lay about 5 ri from Nobeoka. Owing to the late heavy rain, all the roads are very bad, and the rivers and brooks are much swollen. The rebels, who were lately said to be running short of ammunition, commenced a well-sustained fire. The imperial right flank on Umamibara marched as far as Nameka hill. A despatch from Kokura, dated the 28th, says that at dawn on the 24th the rebels appeared suddenly on two roads, those of Akamatsu and Kochimoto. The imperial troops experienced great difficulty at first in keeping their ground before them; but in the afternoon the condition of affairs changed, and the rebels were driven back by six o'clock.—A telegram, sent by Lieut.-General Kawaji at 10.55 a.m. on the 28th, announces that on the 25th the 5th battalion was despatched for Kagoshima, and the Lieutenant-General

had entered the city at the head of 800 soldiers on the following day.—Prince Arisugawa-no-miya will shortly visit Kagoshima, and his head-quarters are expected to be removed from Yajiro to Hitoyoshi.

June 30th.

In our last we pointed to the extreme probability of trouble being either in existence or impending in Shikoku. Now we read in the *Mai Nichi Shinbun* that the Karo of the ex-Daimio Yoshida, residing in the Ehime ken in the province of Iyo, was summoned with about one hundred shizoku to appear before the Kencho on the 17th of this month. The reason for this summons is vaguely stated as being connected with some purpose of suppression. Taken in connection with the fact of troops having been landed in the province, it is, to say the least, significant of something very much out of the ordinary course of events.

The same paper makes another statement which, if true, also conveys a very evident moral. The number of insurgents who have laid down their arms is placed at 800. Out of these, however, nine-tenths consist of farmers who can neither read nor write. They know nothing of the actual condition of the rebels. In one batch of 170 men who surrendered only four were found to be shizoku.

An incident of the capture of Utsukine in Bungo by the insurgents is narrated. A small band composed of local shizoku determined to fight to the last for the imperial cause. After a desperate resistance twenty-three of them were killed, thirteen wounded more or less severely, and three, finding success hopeless, committed harakiri.

July 3rd.

THE *Hochi Shinbun* writes:—A telegram despatched by Kawamura, War Inspector, announces that on the morning of the 29th ultimo, Lieut.-General Takashima commenced to march on the castle of Miyakonojo in Hiuga. Lieut.-General Soga, commanding the united forces of soldiery and police in Kagoshima, will soon proceed for Gamo and Yoshida, on the way to the same castle.—Another telegram sent by Yamagata, War Minister, on the same day, says that according to the confession of a prominent rebel, who laid down his arms on the 17th, about 200 insurgents then at Midori were expected to retreat shortly to Nobeoka. They are commanded by Taki. All the rebels at Haye, Murasho, and other places thereabouts are preparing to withdraw as far as Otomari in Sadowara. Saigo, Kirino, Kodama, Tani, and other distinguished rebel officers are now assembled in Nobeoka, where their entire power is thought to be mustered, and they seem to intend to try again to invade Bungo. Consequently a re-inforcement of the troops on the Bungo road is demanded.—A despatch from Bungo, sent by Murata, police inspector, on the 1st instant, announces that on the 25th ultimo, the imperial armies in Katsuchimura, Hinga, were routed by the rebels, and retreated to the Katsuchi hill. Meantime the insurgents appeared on their rear flank, and pursued the imperialists closely. At 8 p.m. the same day the imperial armies effected their retreat as far as Saiki in Bungo with great difficulty. About 50 soldiers were killed and wounded. On the following day the routed imperialists were joined by half a battalion from Saiki and succeeded in retaking the hill of Katsuchi.—Lieut.-General Kawaji, who entered Kagoshima on the 25th ultimo, is ill and is expected to have embarked on board the *Genkai*

Maru in Kagoshima to return to the East.—When the besiegers of Kagoshima bombarded the town in the commencement of June, they fired upon the hospital buildings. So it was necessary to remove all the patients to the island of Sakurajima. On examination no suitable houses for them were found throughout the island, except a large and beautiful building belonging to Shimadzu, who refused to lend it for the use of the poor patients. H. E. Kawamura became very angry, and summoned Shimadzu's karei, who was peremptorily ordered to give up the building to the imperialists.

One who has recently returned from Satsuma says:—The insurgents are not yet at all discouraged, nor are they short of ammunition and provisions. Besides, they have large quantities of copper, iron, and tin, of which they are founding cannon and balls. Salt is the only thing that they are in need of.

When the news that two members of the Rishshi-sha Society in Kochi-ken (Tosa) were arrested in Kioto, was received in Shikoku, the members of the society became much excited; and some of them went so far as to take up arms. Itagaki, Oye, and other influential men, endeavoured to preserve peace among them. Owing to their influence the members are now a little quieter. Hayashi, a powerful shizoku of the Kochi ken, and six others who were with him in Osaka, were arrested on the 24th ultimo, and on the 26th were escorted to Kioto for examination. All the natives of the same ken who happen to be in Kioto and Osaka are strictly watched by the police, and are arrested and examined on the slightest suspicion.

The *Chikushi Shinbun* in Hiroshima states that, on the 13th ultimo, the insurgents at Tsukezaki, two ri from Hitoyoshi, fled without making any resistance, and no rebel soldiers were to be found within 7 ri of the said place. But when the imperialists heedlessly went too far into the interior, the insurgent troops returned and drove them back as far as Hitoyoshi, which is said to have been recaptured by the rebels on the 15th ultimo.

Owing to the hot season, the imperialists in the South-West are afflicted with various diseases, and commence to be worn out. So it is said that a general attack upon the rebels was determined on, and is expected to have taken place during the three days, the 28th, 29th and 30th ult. General Yamagata, War Inspector and Minister of the War Department, is expected to have taken the field in person.—A Provost Martial's office has been established in Kumamoto. The latter place is to be connected with Kagoshima by a telegraph wire, which has already been carried as far as Yajiro.—About 360 shizoku in Fukuoka formed themselves into a corps, and joined the imperial troops in Kagoshima on the 20th ultimo.

July 5th.

A TELEGRAM from Kioto, received at 8.20 p.m. the 2nd instant, states that according to a despatch from Kumamoto, on the 27th ultimo, the imperial armies from Higo and Bungo marched on the Nobeoka road in Hiuga and attacked the insurgents on the hill at Katsuchi from three points. The imperialists on the Akamatsu road advanced victoriously as far as the hills of Eco-ono, and others on the Memegura seized Sarukeya hills; and a third party attacked the rebels on Akagi-yama. The victors are now encamped on one side of the river Abumi (Hinga) and the rebels on the other.

THE *Hochi-shinbun* writes:—Since the Kagoshima insurgents first entered Higo, half a

year has nearly elapsed, and they are not yet brought into entire subjection. We cannot estimate the war-expenses. According to the opinion of foreigners, 50,000,000 yen will be required before the disturbances are finished. In regard to estimates published in the papers 30,000,000 yen have already been paid by the Financial Department in connection with the suppression of the rebels. How will further expense be supported? But the Government authorities are free from any distress about finances, because a coal mine has been discovered on the Ishikari river in Yezo. On examination, it was found to be first class in quality and is estimated to be capable producing about 400,000,000 tons. Calculating one ton at one yen (the lowest figure) the income will be 400,000,000, yen. Besides the Public Works department has a daily income derived from railroads. The silver mine of Sekishiu produces at least about 250,000 yen yearly and several other mines in Sado, Fukuta, Innai, Kamaishi and other places produce much larger incomes.

July 6th.

The *Hochi Shinbun* says:—A telegram from Kyoto sent at 4.55 p.m. the 3rd instant, announces that, at about 1 a.m. on the 1st, the left flank of the imperial army on the Nobeoka road (Hiuga) stormed the insurgent fort on the summit of Ego-yama. The rebel troops fled in disorder, leaving gunpowder and rifles behind them. No insurgents are now to be seen in Bungo.—Another despatch from Kumamoto, the same day, says that the first division from Hitoyoshi marched on the three roads in Hiuga, namely, Kusu-hara, Nakamura, and Okusu. The imperial troops on the first mentioned road experienced a desperate resistance; but they made themselves masters of the strong position of Takachio, in Hiuga, by noon on the 2nd instant. They are now pursuing the routed insurgents on the Nobeoka road.—A telegram from Kumamoto on the 3rd instant gives the following intelligence:—An insurgent force surprised the police detachment on Minagoe, cutting them off from communication with the imperialists in Hitoyoshi. A hand to hand fight with swords followed. The imperialists were driven back as far as the village of Tsuboya. After a desperate battle they succeeded in retaking their forts on Okagi and Tsuboya. It was then evening, and they were attacked on both sides by a large number of the rebels, who passed the night in possession of the forts. The routed imperialists, soldiers and police, again retreated to Tsuboya. On the 2nd there was another brisk engagement in which the imperialists endeavored to recover the ground which they had lost.—Lieut.-General Kawaji is said to have been wounded.—500 more policemen will soon be despatched to the seat of war. A telegram from Kumamoto, announces that at 4 a.m., on the 2nd instant, the first division of the main army of the imperialists commenced an attack upon the rebel fort at Katsuharu. The left flank crossed the river bridge and carried the fort before 6 o'clock a.m. At the same day, the imperial troops totally defeated the insurgents on the Katsuhara road and effected a junction with the troops at Miyamidzu. The united forces then attacked the rebels in Nakamura, which the latter defended with desperation. But they were also routed and hotly pursued by the imperialists, as far as Shidzu-mura. It was then 6 p.m. and the victors encamped at Osaki-mura. Very few lives were lost and few men were wounded on their side. Lieut.-General Kawaji arrived in Kyoto on the 3rd instant from Kagoshima. He was honorably received by the ministers at the Shijo-railway station in Kyoto. He proceeded di-

rectly to the Anzai-sho in a carriage with Oyama (Lieut-General?) where he had an interview with H. M. the Mikado, with whom, further, he had the honour of dining.

July 9th.

The *Choya Shinbun* publishes the following telegrams from the seat of war:—

At about 3 a.m. on 3rd instant, the insurgent troops who were encamped on the Adzusa mountains, made an irresistible attack upon the imperialists. The latter were obliged to retreat as far as the Kuroto hills before the rebels, who numbered about 2,000 men and fought with desperation. The strong hill of Hirono-koshi is occupied by the imperialists, while another force is ready to make an attack on the insurgent rear. Other imperialist troops are expected to have attacked the insurgents in Saiki (Bungo)—On the 4th instant a battle was commenced at Niimachi, which the imperial army succeeded in taking after a severe battle. The victors pursued the rebels, who fled in disorder, leaving many arms behind them, as far as the river Aminose. Kirino who is in Nobeoka (Hiuga) is thought to be contemplating a march to Higeoka (Bungo) with his entire force.—Lieut.-Generals Miura and Miyoshi marched for Kajiki on the 2nd instant, intending to join the imperialists in Kagoshima. They were encountered at Shigube by the rebels, who fled without making much resistance. This part of the imperial armies is now encamped on one side of the river Tobeifu, while the opposite bank is occupied by the rebels. The insurgents in Kajiki set their camp on fire on the 3rd instant and withdrew to Kokubu before the arrival of the imperialists. Several small bands of rebels are now encamped here and there on the mountain Oda. Lieut.-General Takashima landed at Shifushi on the 3rd instant, and thence marched direct for the castle of Miyakono-jo, Hiuga.—On the same day, Lieut.-General Takashima recovered possession of the hill of Furumidori, and was joined by Lieut.-General Yamada at Jizogoshi on the following day. The rebels set their kitchens on fire and fled for Nasugi.—It is said that General Saigo, who is now in Osaka, is likely to take the field himself.

The *Hochi Shinbun* says:—A telegram from Kyoto, despatched at 10.10 a.m. on the 6th instant, announces that on the 5th the imperial troops, commanded by Lieut.-General Miura, were joined by Lieut.-General Soga's troops at Kajiki; and Lieut.-General Takashima marched for the castle of Miyakono-jo (Hiuga) from the side of Kagoshima. His march was uninterrupted as far as Shibu-ji, where 300 insurgents laid down their arms. It is expected that the rebels are making their head-quarters in the castle.—A despatch from the Owake-ken, sent by Murata of the Police Department, states that the imperial soldiers on the Adzusa hills were assailed by about 100 rebels on the 3rd instant, and that five soldiers were either killed and wounded. The insurgents in Hiuga have published the following notification, which is inscribed on a board hanging over the door of their head-quarters:—

"The thievish forces of the government have gradually penetrated into Bungo and Hiuga. As they are expected to be soon driven back, our people should not allow themselves to be alarmed; but should pursue their usual avocations."

The *Mai-nichi Shinbun* says that at 9 o'clock p.m. on the 29th ultimo, a fire broke out in a house close to the imperial headquarters in Kagoshima, and was not extinguished till 300 large houses were burned.

According to a rumor, the sister of Kirino instigated this conflagration, which was intended to destroy the imperial encampments in Kagoshima.

YOKOHAMA RACE CLUB.

The usual Spring Meeting of Members was held on the afternoon of the 28th ultimo in the Grand Hotel to consider a number of proposed amendments and additions to the rules of the Yokohama Race Club.

Present:—Messrs. J. P. Mollison, A. Evers, E. B. Watson, G. Hürlimann, Jas. Dodds, W. J. Cruickshank, A. Mitchell, W. P. Mitchell, A. Winstanley, W. M. Strachan, A. Urquhart, C. G. Dunlop, J. A. Fraser, Geo. Hamilton, C. H. Cobden, F. A. Cope, John Middleton, and F. E. Foster, Hon. Secretary.

Mr. A. Winstanley, having been voted to the Chair, read the announcement calling the meeting.

The minutes of the Annual Meeting held last December, and of the last Extraordinary Meeting held on the 18th April last to consider the proposition of the Committee of the Yokohama Racing Association, were confirmed without being read.

Mr. E. B. Watson, on behalf of the Committee, explained briefly the objects of the meeting. He referred to the course taken at the previous meeting and the resolutions passed on the proposition of the Yokohama Racing Association, and to the notice then given by the Committee as to their own proposition. He mentioned, with regret, that all negotiations for an amalgamation between the two Clubs had proved abortive; and now, taking into consideration the altered views of the community, and the general change which had come over racing matters, the Club had met to reform its old rules and to make new.

Mr. F. E. Foster, Honorary Secretary, was next called on to read the communications which had passed between the Committees of the Club and the Association in reference to the proposed amalgamation.

No. 1.

TO THE STEWARDS OF THE YOKOHAMA RACING ASSOCIATION.

GENTLEMEN,—In reply to your communication of 9th instant, we beg to state that your proposals embodied therein received our immediate and serious attention. Entertaining grave doubts upon the possibility of securing action upon them before the approaching Spring Meeting, we deemed it proper to consult the wishes of the members of the Club before disposing of the matter ourselves, and an Extraordinary Meeting was accordingly convened, and your propositions laid before the members. The meeting was held yesterday, and among others the following resolution was passed:—Resolved: "That the Committee be instructed to inform the Stewards of the Yokohama Racing Association, in reply to their proposition for an amalgamation of the two societies, that no action can be taken upon said proposition prior to the approaching Spring Meeting, or before the General Meeting of the Race Club to be held one month later; but the Committee may at the same time assure the Association of the willingness and desire of the Club to effect a coalition of the two societies upon a mutually satisfactory basis."

You will observe, therefore, that the proposed amalgamation of the Club and the Association must remain in abeyance for the present. In the meanwhile we would assure you, on our own part, of a firm desire to see the two societies we represent merged into one, and we shall not cease to labor to that end.

We are, Gentlemen,

Your obedient servants,

Yokohama, April 19, 1877.

LAW REPORTS.

IN H. I. R. M.'s CONSULAR COURT.

Before Mr. E. PELIKAN, Acting-Consul.

CHEVALIER P. CASTELLI, Italian Consul, and
Mr. BOGOMOLOFF, Assessors.

Friday, 22nd June, 1877.

Jean Pierre Edmond Heintz, aged 26, a native of Luxembourg, was charged with several frauds committed in Tokio and Yokohama in April and May last.

In answer to the Court, the prisoner stated that he was agent for Messrs. Krebs, Brothers & Co. of London, a firm of manufacturers of lithofracteur.

Mr. F. V. Dickens appeared for the prisoner.

The charge of Mr. Pissard formulated in writing having been read over to the accused, who pleaded not guilty, the first accuser

E. Pissard, of Tokio, was called and deposed.—He first became acquainted with Mr. Heintz through the latter having proposed a partnership to him. The witness could not entertain the proposition as he is employed by the Japanese Government. The acquaintance continued. The goods of the deceased were soon after sold at auction, and through the competition of Mr. Heintz for a certain box of tools he had to pay tolerably dear. The prisoner wished to have the box and offered to pay any price for it. At length the witness told him that he might have it for \$200. One evening when he was away, Heintz called at his house and left a note, saying that he had taken the box, and would bring the money, and asking witness to wait dinner for him. The box had been taken away, and the prisoner did not come back. Subsequently, receiving neither money nor box, he reported the matter to the Consul, went on board the with a policeman, found there the prisoner and recovered the box, which was hidden in the cabin occupied by the latter. The acquaintance between witness and Heintz had been superficial. Heintz had slept in the former's house two or three times.

Witness stated in cross-examination that at the auction in question, Mr. Heintz had bought goods to the extent of \$200. A partnership had been spoken of by which, if arranged, Heintz was to pay witness \$200 for the manufacture of some instruments and \$2 per day. In the course of the cross-examination, witness admitted that he had been sentenced to ten years banishment for a political offence. He had paid the prisoner \$25 for some articles bought from him.

To the Court he stated that he was in no way intimate with the prisoner.

The prisoner stated that the partnership existed, and that the \$25 needed to had been part of money that was to be paid for articles to be used in the partnership. He stated, further, that Pissard had told him to call and take the box as it had been arranged.

The witness questioned by the Court said that he had been suspicious of the prisoner: that he had been warned against him; and that he had told his servant to be careful if he called.

The letter, alluded to by this witness, from the prisoner asking him to wait for dinner, &c., was read in Court. It was without date; but the prisoner said that it was written on the 25th April. Mr. Castelli then asked,

why, if he (Heintz) writing in the morning that he intended to come to dinner that evening, should have been on board a boat leaving at 4 p.m.? The answer to this question was reserved by advice of prisoner's Counsel.

Okime, a Japanese girl, servant to Mr. Pissard, was called and examined. She stated that the prisoner came to the house of her master at about 9 a.m. and took away the box of instruments, leaving a note, and stating that he would return shortly. Before leaving the house Pissard had not said anything special about Mr. Heintz, but had told her to take care of the box. She was not afraid of Mr. Heintz; but had given him the box on his insisting.

A question was put by the Court, asking whether the girl had not said in her preliminary examination that she had told her master that she gave up the box, because there was a revolver in the room, which she feared Heintz might use?

Mr. Dickens objected to this question as suggesting the answer, and it was not pressed.

Albert Giboin, being called by the Court, asked leave to recall his charge. This request was denied, and the witness gave his deposition to the effect that he sold a horse, carriage, and harness to the prisoner, who gave a draft for \$300 upon his father, which draft was returned protested. In his complaint witness had accused the prisoner of abuse of confidence. He thought that his confidence had been abused from the manner in which Mr. Heintz had left Yokohama after having made various statements as to the money which he had here and there, and, further, that, two days after the departure of the prisoner, the draft given by him was returned protested.

In reply to Mr. Dickens, witness stated that he had no positive proof that the funds which prisoner stated were his in the hands of his father and other persons, did not exist.

To the Court.—Prisoner had offered to give witness a draft upon his father, or his banker. He preferred to take one on his father. He had confidence in the prisoner, because he said he was a Civil Engineer, representative of Messrs. Krebs & Co., and an officer in the Belgian Guides. He did not know what had become of the things bought from him by Heintz.

E. Bonnat, proprietor of the Oriental Hotel, stated that the prisoner came to his house on his arrival in Japan: that he represented himself to be a chemist, and agent for Krebs & Co., lithofracteur makers at London, from whom he had prospectuses. Prisoner had run up a bill at his house of \$385, of which he had never paid a cent; that he made all sorts of promises and representations; and that at last finding he was going a great deal faster than people generally do who have any intention of paying, he (witness) had stopped his credit, and put an embargo on his effects consisting of clothes, some books, and a case of chemicals, which were in the hotel belonging to the prisoner.

Two witnesses were called to testify to the transaction with Mr. Giboin.

John Thompson, chemist, residing at Tokio, deposed that Mr. Heintz had told him that he was Agent for Messrs. Krebs & Co., and that he had deposited £400 sterling in their hands as guarantee. He next said that he wished to make a little lithofracteur, in order to make an experiment which the Japanese authorized him to make; and witness in consequence supplied him with the necessary chemicals.

At this stage Mr. Dickens pointed out that this evidence had nothing to do with the charges under consideration, so the Court requested Mr. Thompson to state simply whether he considered that Mr. Heintz was really anxious to dispose of lithofracteur. Witness said that he was sure that he did not care about it: that he had no idea of doing business. He cited as a proof that two days before the prisoner ran away from Yokohama he called on witness and said that he had received \$2,000 from home, and that he would pay the witness' bill among others in a day or two.

To Mr. Dickens:—The prisoner had not received a single letter from Krebs, Brothers & Co. during six months he was here. The whole business of lithofracteur selling and making was a sham. He had in addition to the things supplied from the shop, lent him money, it might be \$15 it might be \$20 which he had never expected to see again. Prisoner had not conducted any experiments for him. He had made some chemical experiments on his own account. He admitted prisoner to his house and shop because he was respectable in appearance; but he would never trust him in his shop out of his sight.

Mr. Thompson said that he never knew the witness tell one word of truth but once; and that was when he came to witness and asked him for money stating that he was destitute. Prisoner had never worked for witness. Witness had written to the prisoner's father asking that money should be sent to the prisoner, who enclosed the letter himself. The letter was written in English at the prisoner's dictation to the effect that if Heintz had money he had a chance of doing good business in Japan. What kind of business was not stated. It was written by witness at the importunity of the prisoner. No mention was made of a partnership proposed between the writer and Heintz. The letter was of no importance.

Prisoner made a statement that he had prepared some chemicals for Mr. Thompson when the latter was so ill that he could not breathe the gas they threw off; and that Mr. Thompson's letter to his father was written in the view of obtaining \$3,000 which the prisoner should deposit in Thompson's business.

J. W. Sutherland deposed that he had received from Mr. Giboin a notice not to give up a carriage belonging to Mr. Heintz. He did not recognize Mr. Giboin as the owner. The trap, pony and harness was brought for \$50. At the outside the lot was not worth more than \$75 when witness bought it.

Mr. Giboin asked leave to make a statement. The trap, horse, saddle, and harness which he sold to Heintz were sold for \$130. The balance of the \$300 for which the draft was given was for furniture, money lent and other things.

Pierre Zicavo, partner in the firm of Bonnat & Co., deposed that, when he was leaving the hotel, Heintz asked permission to take his papers, which was granted. The papers were spread out on the table: there were letters and certificates apparently; but the witness could not say exactly what they were. Mr. Heintz had cartridges and specimens which might be dynamite.

The depositions of Mr. Hall of Tokio were read, stating that the prisoner had taken away from his place a musical box under pretext of repairing it, and that he left for Nagasaki, taking the box with him.

Mr. Pissard deposed to having seen the musical box on board the *Nagoya-maru* in the cabin occupied by the prisoner. He recognised the box as belonging to Mr. Hall.

P. C. Hazell stated that he went on board the *Nagoya-maru* with the Chief of Police to search for the boxes taken away by Mr. Heintz. He was present in the cabin when Mr. Pissard found the box belonging to him. He obtained permission from the Captain to take the box ashore.

Jas. Esdale, on being called, applied that his expenses for travelling twice to and from Tokio and loss of two days' work should be made good to him. His claim was admitted and he was sworn. He went once with Mr. Heintz to Mr. Hall's place in Ts'kidji. While they were there Mr. Hall wound up the musical box and set it playing. Mr. Heintz offered to take it away, clean and repair it. He took it. In the presence of the witness, and in his house, he took the instrument to pieces, and said that part of it would have to be taken to Yokohama to be cleaned. The prisoner took it away the morning of the day he went on board ship. He had frequently told witness that he intended to commence business as a dentist in Yokohama.

C. Johnson, a Dane, of No. 82, Yokohama, being sworn stated that he bought some instruments at the instance of Mr. Heintz. Further that he had advanced money to Mr. Heintz on a box of surgical instruments and utensils, part of which were represented by the prisoner to be gold, but what appeared to be gold was only brass. The case was sold for \$5.25 at auction. Witness had advanced \$10 on it. On another occasion the witness had come into his shop, and during witness' absence, and in spite of the remonstrance of a Japanese woman in charge, had taken away two instruments. These he had tried to borrow a few days previously, saying that he wanted them to finish a job for which he was to receive \$75. Johnson had refused to lend them, because Heintz had borrowed a music book before, had promised to return it the next day, and had not kept his promise. The cost price of the two things taken away was \$60. He bought them at auction in a lot for \$210. Witness refused to state what would be the price he paid, in proportion to the other things bought with them, for the two objects removed. He said it would take him "a whole day of reckoning" to calculate the value. They had been sold to Mr. Pissard for \$25.

Mr. Pissard confirmed this.

Mr. Johnson continued to Mr. Dickens:—The prisoner had paid for some things he bought in the shop, socks, a clock and other things, not more than \$20 in all.

The prisoner stated that he had gone to the last witness' shop, and purchased from him a clock and two apparatus, saying that he would call next day at eight o'clock and pay the price arranged between them, namely \$20. He went at ten o'clock, found Mr. Johnson away from home, paid the girl \$20, and took the things away.

Mr. Johnson affirmed that the two instruments were not in the bargain, and that Heintz actually stole them from his shop. He called afterwards, and, when spoken to about the things, said he would come in a day or two and pay for all the property bought at auction by the witness. The latter did not complain at once, because it was at Heintz's instigation he had bought the whole lot of the late Dr. Alexandre's things, which the prisoner always said he was going to purchase from him.

Okiudzima, the female servant of the last witness, was called. The prisoner had visited the shop and given her a note, the value of which she does not remember, and taken away a clock and other things. She did not

remember whether Heintz had been to the shop since. Johnson had scolded her for letting the things be taken away. She did not prevent Heintz from taking away the things because he promised to go back in the evening.

The prisoner here asked that an errand boy, whom he had known serving in Mr. Johnson's shop, should be sent for.

Mr. Johnson explained that the boy was away in the country. He asked permission to bring to the consideration of the Court, how it was that the prisoner should have gone to his place, in his absence, when he knew he was absent, to pay money and to take away the things. In reply to Mr. Dickens he refused to swear that the note he received through the girl from Heintz was or was not for \$20. He did not remember the amount.

Murimura Shinkio, a Japanese tailor of "Okio, was next called. He failed to understand fully the questions asked him, so Mr. Esdale who is employed as cutter in the house was asked to testify. From his evidence it appeared that Heintz owed \$22 at the shop; that he ordered three white suits, value \$15; that he paid a \$20 note when objection was made to give him further credit and that the balance, \$5, was placed to his credit.

A letter, in reply to one from the Consul, from the Mitsu Bishi Company, was read. It stated that it was impossible to say exactly at what hour the ticket taken under the name of "Schneider" (by Mr. Heintz) for Shanghai was procured; but that it was probably at about two P.M. in the afternoon.

This concluded the case, and Mr. Dickens called upon the prisoner to state his antecedents, and the circumstances of his coming to Japan.

The prisoner spoke at some length. He said that he had been a cavalry officer, that he had left the army for family reasons; and that, "in order to avoid the trouble of annexations," that he had decided upon getting naturalized in some other country. He produced a letter announcing the despatch of a quantity of *lithofacteur*, which had, he said, arrived. He went on to say that he had been completely deceived in his hopes, and explained his relations with Mr. Pissard, Mr. Thompson, and the late Dr. Alexandre. He explained his hurried departure thus: He had received a notice of the arrival of his *lithofacteur*; and at the same time found it necessary to leave for the South for reasons which he could not explain without bringing some Japanese names into question, and this he determined to avoid. He did not return the box of instruments and the musical box because of the hurry he was in. He maintained that he had entered into partnership with Pissard. As for the draft on France he had hoped and thought it would be honored. He denied having concealed himself on board the ship on the occasion of the visit of Mr. Pissard and the policeman. When he left he could have paid Mr. Pissard had he seen him. He had \$250 in his possession at the time. He denied from first to last the allegations of Mr. Johnson, and affirmed that he had arranged with him for the purchase of the apparatus. He paid \$10 for the clock, and \$10 for the other things, \$20 in all; and after the payment he had been twice or three times in the shop, where Johnson never said anything about his having illegally removed the things.

Mr. Dickens addressed the Court on behalf of the prisoner. He hinted at certain circumstances which could not be explained,

but which if explained, would show that there was nothing extraordinary in his abrupt departure. He had made arrangement to leave on the 25th April; and could not get away then, and thought that he would have to remain for ten or fourteen days, when on coming to Yokohama on the 26th he found that the departure of the vessel which should have sailed the day previously had been postponed till that afternoon, and he accordingly went. The learned counsel explained the fact of the prisoner taking his ticket under a false name. It was not to escape his creditors, but to avoid the interference of the police, who, he thought, might annoy him because of his having in his possession a quantity of explosive substances. At Kobe and at Nagasaki, he had passed under his own name. Mr. Dickens held that all the circumstances of the case went to support the presumption that Heintz intended to return to Yokohama, and that nothing had been adduced in the evidence to prove the contrary. The accusations of Mr. Pissard and the other witnesses were then considered *seriatim*. Mr. Pissard's charge was held, unsupported as it was by any other testimony, to have a value not so great as the contra-assertions of the accused. It was evident that a project of a partnership had been entertained by both persons. But the strongest proof of his client's innocence of intention of crime in taking Pissard's box was the fact of his leaving a letter stating that he had taken it. In the matter of Mr. Giboin's charge, the withdrawal of the charge entitled Heintz to an acquittal. As for the charge of Mr. Hall, he could not understand it. The music box had been given to be repaired and was repaired, and when the accused was leaving for Nagasaki, having no place in Yokohama where he could leave the box, he took it with him, not thinking that he was doing anything wrong in so doing. The learned counsel held, with regard to the charge brought by Mr. Johnson, that it fell to the ground through the fact of the prosecutor not bringing any charge for two months after the alleged illegal removal of the goods, and that those goods had been removed in accordance with agreement. A well thought out and delivered argument was concluded with an eloquent appeal to the Court to consider the position, and previous character, of the accused, and the improbability of his perpetrating with felonious intention such acts as those of which he was accused. He asked that his client should be allowed to leave the Court without a stain on his character.

The Court announced that judgment would be given to-morrow at 2 P.M.

Saturday, 23rd June, 1877.

The Court delivered judgment at this afternoon as follows:—

JUDGMENT.

In the name of His Majesty the Emperor of all the Russias;

The Russian Consular Court, in Japan, sitting at Yokohama, has given, on the 23rd June, 1877, judgment whereof the following is the tenor.

The person named Edmond Heintz, a subject of Luxembourg, being found guilty of having taken away from the house of Pissard a box of dentist's instruments, bought by the latter for the sum of \$75, by fraudulent means:

Found guilty of having illegally appropriated a musical box the property of Mr. Hall;

Rejecting as insufficiently proved the complaints of Mr. Giboin and of Johnson,

The Court, applying articles 14 and 16 of the Penal Code, and the second point of articles 174 and 177 of the Justice of the Peace Penal Code, sentences Heintz to three months' imprisonment without hard labor.

The prisoner having been informed that, if he intended to appeal against his sentence, he must do so within twenty-four hours, was removed in custody.

IN THE U. S. CONSULAR-GENERAL COURT.

Before GEN. T. B. VAN BUREN, *Consul-General*.

Messrs. N. J. STONE }
and J. S. VAN BUREN, } *Assessors.*

Wednesday, 27th June, 1877.

MESSRS. COPELAND AND WIEGAND

vs.

B. M. VARNUM.

The petition in this case set forth that the plaintiffs were American citizens doing business in Yokohama, and that the defendant did on or about the 5th of May 1876, hire from the plaintiffs 100 empty casks, and on the 16th of the same month 50 more, to be used in endeavouring to raise a sunken vessel, and they agreed to pay for the casks the sum of 30 cents each per month until the same should be returned, and claimed \$599.

The defendant in his answer to the claim denied that he owed the sum of \$599, but admitted owing \$150.

Wm. Copeland deposed that Mr. Wiegand had no interest in the case, so by consent his name was struck out of the cause. The witness then proceeded to relate the circumstances of the case. He was standing by the gate of his premises one day in the latter part of 1876, when Mr. Engert called and asked him if he had any objection to let some casks which were lying about, and witness informed him that would depend upon what they were required for. Mr. Engert said that they were required for the purpose of raising a ship and would have to be filled with salt water. Witness informed him that he had no objection to let the casks, providing they were returned to him. Mr. Engert then enquired the price, and was told 30 cents per month. In answer to a question as to what should be done should any be lost, witness replied that he should only charge \$1 each, if only one or two were lost, but he would not sell them at that or any other price. Arrangements were then made to send them to Mr. Varnum. Mr. Varnum went to the Brewery the following day and inspected the casks and said they were the very things required. Witness told him that it was only on condition that the casks should be returned that he could have them. Mr. Varnum promised that the best care should be taken of them and that they should be returned when done with, and it was agreed that he could have them on hire at the price mentioned. In consequence of a note which the witness received from the defendant 100 casks were sent to the Hatoba, (note put in and marked exhibit A) and a receipt was received for the same (produced and marked B). On the 9th or 10th of May witness received a note from Mr. Varnum, asking if he could have 50 more casks, (note produced and marked C) which were sent and for which a receipt was received, dated May 16th, (produced and marked D). In the beginning of the following October, witness

presented his bill for \$240. It was not paid. Two months after witness wrote a note to Mr. Varnum asking at what time he could have the casks, and he did not send any written reply. Witness then sent in another bill, some time in February, which also was not paid. In the latter part of the same month another bill was sent. The following day Mr. Varnum called at the Brewery, and offered \$150 for the casks, \$15 for costs, and would return what casks he could. The offer was rejected; more especially because the casks had been landed on an island near Yokoska, and left without any protection from sun or rain. A note was received from Mr. Varnum afterwards, asking where he could get a knife to enlarge the bungholes of the casks he had borrowed. Neither the casks had been returned, nor was any money received from defendant. The casks were worth \$6 each; and witness produced an invoice showing the value of casks of various sizes, purchased by him in San Francisco, and stated the casks lent to the defendant were worth more than those mentioned in the invoice; and if he had to purchase them he would have to pay from \$6.00 to \$8.00.

To defendant the witness stated that the casks were not new when the loan was effected. There was no understanding that the casks would be required for about a month. He did not say that the casks would be of no use if they were any time under water. The reason why he placed the value of \$1 on such casks as might be lost was simply to do a favour; and had he known that the casks would not be returned, witness would not have let defendant have them. He lent all the empty casks he had at the time. Sometimes he made small lager beer casks out of large ones. He did not recollect saying to Capt. Fletcher that he should not require the casks till the winter. No mention had been made to him that there was danger of the casks being lost.

Theodore Helm was called, and stated that he was salesman for Messrs. Copeland and Wiegand, and was present when Mr. Engert called on Mr. Copeland about the casks, and corroborated the statements made by the plaintiff relative to that meeting. He was not present when Mr. Varnum called, but Mr. Copeland had told him the circumstances of the case and requested him to see that the casks were ready. Witness recollected taking a bill to the defendant, who told him he would have to see Captain Fletcher: that in a short time they would have done with the casks, and then they could settle all at the same time. Witness went again, and defendant told him that he had nothing more to do with it, and he was to go to Capt. Fletcher. Seeing Captain Fletcher some time afterwards he presented the bill to him, and he wrote on the envelope "present to Captain Varnum." On being told that Mr. Varnum refused to acknowledge the bill, Captain Fletcher said, "never mind, give that to Mr. Copeland." Witness was sent to Captain Fletcher again with a note, asking for the return of the casks, and he said that it would entail much expense.

To the defendant witness stated that the casks were kept in a godown, though they were out in the open air when Mr Varnum saw them.

This concluded plaintiff's case.

John L. O. Eyton deposed that he was a Commission Agent; and for some years had been manager of a Brewery, and knew the value of beer casks. The value of secondhand beer casks at that time, for hogsheads con-

taining 56 gallons, was one dollar each, though they could not be imported for that price.

Recess to half-past one o'clock.

On the Court resuming the plaintiff was asked to specify the items of his claim. He said that he claimed a rental of 30 cents each cask per month from the date of the bargain in 1876 to the 30th May, 1877, and \$15 for coolie hire, making in all \$599.

M. Engert was then called for the defence, and stated that he was a clerk in Messrs. Walsh, Hall & Co's. He made the preliminary arrangements for the casks. In answer to a question put by the witness to Mr. Copeland the latter agreed to let him have the casks. Plaintiff was told the casks would have to be in salt water for sometime, as they were required for the purpose of raising the *Surprise*. He also said that he would charge 30 cents for the time they were required; and witness thought it was mentioned that the time would not be over a month for which the casks would be required. Any casks not returned, or returned in a damaged state, he would charge \$1 each for. Witness wrote a note to Mr. Varnum concerning the arrangements, the contents of which were that Copeland would let the casks for one month for the sum of 30 cents each, and a charge of \$1 each to be made for damage or loss. Nothing was said about selling the casks. Witness did not mention anything about the possibility of the casks being lost. Copeland thought there was a danger of the casks becoming useless through salt water.

To the plaintiff witness stated that Messrs. Walsh, Hall & Co. would charge 6 or 7 cents per gallon for casks not put together.

To defendant witness stated that the casks at Walsh, Hall & Co's were not of the same kind as Copeland's.

R. M. Varnum testified that he had contracted with the plaintiff for the casks in question, at 30 cents each for one month and \$1 each for casks lost or destroyed. Copeland stated to witness that if the casks remained under salt water for any length of time it would unfit them for his use. Witness informed him that they would be filled and pumped out again, but if the water remained in any length of time he (witness) would take them over. The plaintiff was told that the ship and casks might be all lost, but defendant would probably be able to tell him within a month. On seeing the casks the bungholes were found to be too small and on witness asking if they could be made larger, plaintiff gave a measurement, and said that if they were made any larger than that he, defendant, would have to take the casks over. And at the termination of the interview plaintiff stated that it was distinctly understood that all casks not returned would have to be taken over by the defendant. After receiving the letter from plaintiff demanding a settlement, witness went to see him, in company with Mr. McGarrow, and the latter told him on behalf of Capt. Fletcher that he was willing to pay \$1 each for the casks, and return what he could, rather than allow the case to come into Court.

To plaintiff witness stated that the reason why he sent the man with the bill to Capt. Fletcher was because the Captain had the greatest interest in the venture.

To the Court the witness said the casks were now at Powhatten Bay, and they had been under salt water for over four months. The vessel was lying there now.

C. Fletcher was sworn, and said that he had engaged Mr. Varnum to get the casks, and the latter had informed him that if the casks were destroyed or lost he (witness) would have to pay \$1 each.

JUDGMENT.

I am of the opinion from the evidence, that at the time of the hiring of the casks the expectation of both parties was that they would be used only for about one month, and that the rental would be 30 cents each per month for such month, or for such longer period as their use might be found necessary; but it was further bargained that, in case any of the said casks should be destroyed, lost, or rendered useless, they should be paid for at \$1 each instead of by rental of 30 cents each per month. I have no doubt, I repeat, that it was the belief of both parties that they would be used but for a short time, and also that the greater part of them would be returned in good condition. The contract, however, being in plain language, I feel bound by the simple construction of its terms. The judgment of the Court is, therefore, that the plaintiff Copeland do receive of the defendant the sum of one hundred and eighty-eight dollars and 65 cents, being the price of 150 casks at \$1 each, and \$15 for coolie hire and expenses, and interest at the rate of one per cent per month from the 18th of April, 1876, to this date, and costs of same.

The assessors concurred in His Honour's decision.

IN H. B. M.'S COURT AT KANAGAWA.

Before Mr. Acting Law Secretary WILKINSON.
Tuesday, June 26th, 1877.

IWASAKI YATARO vs. CAPT. COLOMB, R.N.

The plaintiff has filed a petition against the defendant, in which he claims \$1,400 damages for repairs rendered necessary to the steamer *Chiri Maru* through a collision with the *Audacious* on the night of the 11th instant. The petitioner also claims the sum of \$6,000 demurrage.

In the answer to the petition the jurisdiction of the Court to try the case was disputed, and the defendant's counsel filed a motion to that effect, which was brought under the consideration of the Court this afternoon.

Mr. Ness appeared for the plaintiff and Mr. Dickins for the defendant.

H. E. Sir Harry S. Parkes, K.C.B., and Vice-Admiral Ryder, occupied seats on the Bench.

Mr. Dickins opened his case by contesting the wording of the petition, which he stated was so vague that it was impossible to know what it defined. He objected particularly to the wording of the 4th paragraph of the petition in which the defendant was accused of negligence. It also stated there were two collisions but it was not stated for which of these collisions the defendant was responsible through negligence. In the 8th paragraph the defendant was charged with mismanagement. But it did not specify in what way there was mismanagement, and the petition did not give the defendant the definite information that was required and which he had a right to expect. Under these circumstances the learned gentleman demurred to the petition.

Mr. Dickins then passed over to the question of the jurisdiction of the Court to try the case. He contended that the Court had already overstepped its jurisdiction

in the service of the petition. The Court had no power to order a petition to be served on board one of Her Majesty's ships or to order such execution. The act or acts of negligence alleged in the petition, if any, were of such a nature as not to come under the jurisdiction of this Court. The defendant had no wish to avoid his responsibility as a private individual, but he was an officer of a British man-of-war; and he therefore felt bound to take the advantages which the law afforded him. If an act of negligence had been committed on board Her Majesty's Ship, and by International Law it was generally known that the decks of Her Majesty's vessels were considered to be British territory, and the Court had no authority to serve notice on board a British man-of-war, and the case therefore fell to the ground. He did not consider it necessary to point out the inconveniences which would arise through a Court in China or Japan having jurisdiction over the deck of any of H. M. Ships of war. A naval officer was subject to have notice served on him within the jurisdiction of the Court, but not on board his ship.

The learned Counsel quoted various authorities in support of the points raised in his argument.

Mr. Ness in addressing the Court said that, with regard to the demurrer to the efficiency of the petition, he had not received any notice of such demurrer until this morning. He contended that the petition was sufficient to sustain the action. The first question he would deal with was, the necessity for the plaintiff, in a petition such as this, to know what acts of negligence it was that caused the collision? Mr. Ness contended that it was not necessary. How was the crew of the *Chiri Maru* to see, during a heavy gale and on a dark night, what was occurring on board the *Audacious*? A vessel under weigh was bound to keep clear of a vessel at anchor: and the learned gentleman quoted cases in support of his contention. As to the insufficiency of the petition alleged by his learned friend, Mr. Ness said that full particulars of the damage sustained by the *Chiri Maru* had been given in a report of Lloyd's Surveyor attached to the petition.

The learned gentlemen then went into the question of the jurisdiction of the Court. He contended that, by clauses in the Order of Council for China and Japan, Her Majesty extended the same rights to the Courts in China and Japan as were enjoyed by the Courts of Westminster and London. The defendant claimed immunity on the ground that he was a naval officer. The suit was not against him as an officer representing the Crown, but as a private individual. Captains of Her Majesty's ships have been sued in Civil Courts and damages obtained from them. The learned gentleman cited precedents in support of his arguments. In conclusion he referred to Captain Colomb's claim to immunity as a naval officer. In the present case he was not asked to become amenable to the laws of a foreign Court, but to Courts of his own country extended to Japanese territory by an order in Council. The Captain was by means a representative of the Crown; and he failed to follow his learned friend's allegation that the defendant should make all possible objection to the jurisdiction of the Court; and finally asked the Court to dismiss the motion.

Mr. Dickins replied to the arguments of Mr. Ness and maintained that his client was perfectly justified in taking every objection to the jurisdiction of the Court; for, supposing that a verdict was given against him,

he would probably be debarred from claiming indemnity from the British Government, because he had not availed himself of the provisions allowed by the law. Mr. Dickins then pointed out the statement made by Mr. Ness about the crew of the *Chiri Maru* being unable to distinguish what was going on on board the *Audacious*, as the night was dark and a violent storm was blowing; and he asked how was it possible, if it could not be seen what was transpiring on board of the *Audacious*, that the plaintiff had any ground for making the charge of mismanagement? He maintained that because a collision had occurred it was not justifiable to suppose that that collision had occurred through mismanagement; and when such a charge was made it was necessary to show what these acts of negligence were.

His Honour announced that he would give his decision on Thursday morning at 10 o'clock, to which time the case itself would be postponed.

Thursday, June 28th, 1877.

The following is the judgment of his Honor, on the motion in the above case heard before him on Tuesday, the 26th inst., when, it will be remembered, the defendant demurred against the petition on the grounds that it did not disclose the *gravamen* in such a distinct and certain manner as to place him in a position to understand the complaint with certainty, and that this Court, in view of the position of the defendant, as an officer in Her Majesty's service and in command of H. M. S. *Audacious*, had no jurisdiction over him.

JUDGMENT.

This is a demurrer to a petition in a cause in which a Japanese subject is plaintiff and the Captain of H. M. S. *Audacious* is defendant and which has been instituted to recover damages for a collision between the plaintiff's ship the *Chiri Maru* and Her Majesty's Ship of which the defendant is commander. The grounds of demurrer assigned are two: first, that the petition does not specify any particular act or acts of negligence or mismanagement: and, second, that this Court has not jurisdiction over the defendant in respect of the matters alleged in the petition.

Two other grounds of demurrer were alleged at the hearing as being of the same nature as the first cause assigned. The first of these is that there are two collisions alleged in the petition and there is no clear statement as to which of these collisions the *Audacious* is responsible for, and the second, that there is no clear statement as to what the damage was that rendered the *Chiri Maru* unfit to proceed to sea. There was a further objection that the term *mismanagement* used in the petition did not necessarily imply any negligence or carelessness for which the defendant is responsible.

It is not necessary to consider the question raised by counsel for the plaintiff as to whether demurrer is the proper way of taking exception to vagueness in a petition, as I think the objections taken under this head, however brought, cannot be sustained. I should observe, however, that the course which prevailed in the High Court of Admiralty and followed in the case of the *West of England* (L. R., 1, Adm., 308) of bringing objections to the pleadings by way of motion is most in consonance with the rules of this Court.

First,—As to the word "*mismanagement*." I can find no case—and I should be surprised

if I did—in which the sufficiency of the word has been expressly decided. I do find a case in which it has been used and no objection has been taken to it. I am of opinion that the term is sufficient to express a breach of the duty of a commander of a ship, which if it were the cause of a collision would render the commander liable. I find in the case of the *Otter* (L. R. 4, Adm., 203) that the collision in that case was alleged to be “wholly attributable to neglect, default, or mismanagement of the *Otter* or those on board of her.” Here the words neglect, default, or mismanagement are used disjunctively, and if any one of them were insufficient to attach liability to the defendants, it might have been objected to. Then as to the sufficiency of a general allegation of mismanagement, I am of opinion that the rule laid down in the case of the *Bothnia* (1 Lushington 52) cited by the counsel for the plaintiff applies to the present case. In that case Dr. Lushington says:—“The vessel proceeding was run down when at anchor, and the rule of the Court is that that fact, if proved, puts the burden of proof on the other vessel to make out her defence.” The plaintiff, therefore, was not bound to assign any particular cause of blame to the defendant’s vessel. Counsel for the defendant referred to the case of *Marpesia* (L. R., 4, P. C., 212) as showing that the onus of proof lay on the plaintiff. But the cases are clearly distinguishable. In the case of the *Marpesia* both of the vessels which came into collision were under sail, neither of them was at anchor, and the rule as to vessels at anchor was therefore not before their Lordships. The question before them was as to a practice which prevailed in the Court of Admiralty for the defendant to begin in all cases where the defence of inevitable accident was set up, by which the onus of proof was from the first thrown upon the defendant. The Privy Council ignored such a practice and referred to the case of the *Bolina* (3 notes of cases 210) in which Dr. Lushington says:—“With regard to inevitable accident the onus lies on those who bring a complaint against a vessel and seek to be indemnified,—on them is the onus of proving that the blame does attach upon the vessel proceeded against; the onus of proving inevitable accident does not necessarily attach to that vessel; it is only necessary when you show a *prima facie* case of negligence and want of due seamanship.” There is nothing in this dictum in any way disagreeing with the dictum of the same learned judge in the case of the *Bothnia*. In the one case he says it is necessary to show a *prima facie* case of negligence, and in the other he says that in effect that if the plaintiff proves that his vessel was at anchor and that the vessel proceeded against ran into her he has shown a *prima facie* case of negligence. It is right to observe that in the case of the *Bothnia* the vessel with which she came into collision was at anchor, and that the *Bolina* was absolved from blame; and it would appear from the summary of the case in Pritchard’s Admiralty Digest that she was absolved on the ground that there was no proof that the collision occurred through want of due care. I regret that I have not the original report to refer to. But any inference which might be drawn against the correctness of the doctrine laid down in the case of the *Bothnia* is removed by the consideration that the case of the *Bothnia* is subsequent to that of the *Bolina*, and the doctrine referred to has been since repeatedly affirmed. In the case of the *Annapolis* (5 L. J., N. S., 326) Dr. Lushington says:—“In

“causes of damage, when a vessel in motion and one at anchor have been in collision, it lies upon the vessel in motion to excuse herself by showing inevitable accident or a like defence.” And in the case of the *Kepler* (L. R. 2, P. D.) which was decided subsequently to the case of the *Marpesia*, Dr. Phillimore lays down the same principle. He says:—“The only defence set up by the *Kepler* is that the collision was caused by inevitable accident. It is the duty of those who set up the defence to sustain it by adequate evidence.” The conclusion I arrive at is, to use the words of Dr. Lushington, that the plaintiff “was not bound to assign any particular cause of blame to the defendant’s vessel.” It follows from the doctrine referred to that no allegation is necessary as to which of the collisions it is sought to make the *Audacious* responsible for. For it is sufficiently alleged in the petition that the *Chiri Maru* was at anchor and the allegation in each case that the *Audacious* came into collision with her under those circumstances is a sufficient allegation of *prima facie* responsibility on the part of the *Audacious* for each of the collisions. The remaining objection to the sufficiency of the petition, namely, that there is no statement of what the damage was that rendered the *Chiri-maru* unfit to proceed to sea is scarcely intelligible. If it mean that there is no statement of the damage caused by the collision then it is only necessary to refer to the detailed particulars annexed to the petition. If it means that the petition ought to have stated how much of it could be left unrepaired and yet the ship be fit to go to sea, I have no doubt that it is not necessary that the petition should state anything of the kind.

Before leaving this part of the case, I think it right to say that I quite agree with what the counsel for the defendant has said that the petition and all the pleadings in these courts are intended fairly to disclose the case of the party pleading and that this is to be done not by the bare allegations of the old Common Law pleadings but by disclosing the facts upon which the party pleading relies. This mode of pleading is intended to simplify proceedings. But the advantages of such a system would be lost if the practice of objecting to the pleadings were to become frequent. I think the observations of Dr. Lushington on this point in the case of the *Hebe* (2 W. Rob., 147) are deserving of very great attention. He says:—“In proceeding to consider the objections which have been taken to the admission of this plea, I would in the first instance observe that, although under the authority of the decision of Lord Stowell in the case of the *Ville de Varsovie* it is clearly competent to the parties in a suit to take objections of this kind, yet these objections should not be raised without grave and substantial reasons in support of them. Cases may unquestionably occur, like the case decided by Lord Stowell, in which it may be right and proper to bring them before the Court, especially where the preliminary discussion might prevent the introduction of much irrelevant matter, which, if admitted, would lead to the accumulation of unnecessary evidence. Where, however, no such consequence is likely to result from the admission of the plea, the Court will be disposed to discontinue the discussion as tending to defeat the objects for which the summary form of proceeding was introduced into the practice of the Court, viz., expedition and avoidance of expense to the suitors.”

There remains the more important question as to whether this Court has jurisdic-

tion in the cause. I consider that this question has been decided in the case of *Hart v. Gumpach* () which I shall refer to presently, but before doing so I shall consider, as well as I have been able to apprehend them, the grounds assigned by Counsel for the defendant in support of the demurrer. In order, however, more clearly to appreciate the objections which have been taken to the jurisdiction of this Court, it appears to me desirable that I should state the view which I take of the jurisdiction of the Courts in these countries. To do so it is necessary to consider the jurisdiction of Her Majesty from whom the jurisdiction of these Courts is derived.

That jurisdiction as regards Japan is, it appears to me, exercisable only in accordance with the provisions of the Foreign Jurisdiction Acts 1843 to 1875, and as regards China, in accordance with the provisions of those Acts and of the Act 6 & 7 Vict. C. 80.

The Foreign Jurisdiction Act 1843, was passed to remove doubts as to how far the jurisdiction of Her Majesty in extraterritorial places was controlled by, and depended on, and, in removing those doubts, it expressly defines what Her Majesty’s jurisdiction shall be. It says that “it shall be lawful for Her Majesty to hold exercise and enjoy any power or jurisdiction which Her Majesty now hath or may at any time hereafter have within any country or place out of Her Majesty’s dominions, in the same and as ample a manner as if Her Majesty had acquired such power or jurisdiction by the cession or conquest of territory.” That is to say, that Her Majesty shall have so far as the treaties confer it, or the authorities of the country assent to its exercise the same power and jurisdiction over British subjects within those places, as she would have if those places were Crown Colonies.

Now, as to Crown Colonies, it is laid down in Colvin’s case (as cited in Stephen’s Blackstone’s Commentaries, 7th edition, vol. I, p. 102) “that any colony which has been acquired by conquest or cession is subject to such laws as the sovereign in Council may impose.” That there are, however, certain limits to the force of such laws has been declared by Act of Parliament. The 28 & 29 Vict., C. 63, instituted “an act to remove doubts as to the validity of Colonial laws,” which, after enacting (S. 1) that “the term ‘Colonial law’ shall include laws made for any Colony . . . by Her Majesty in Council,” goes on to provide (S. 2) that “any Colonial law which is or shall be in any respect repugnant to the provisions of any Act of Parliament extending to the Colony to which such law may relate, or repugnant to any order or regulation made under authority of such Act of Parliament, or having in the Colony the force and effect of such Act, shall be read subject to such Act, order, or regulation, and shall to the extent of such repugnancy, but not otherwise, be and remain absolutely void and inoperative. And it is declared (S. 1.) that “an Act of Parliament or any provisions thereof, shall in construing this Act be said to extend to any colony when it is made applicable to such colony by the express words or necessary intendment of any Act of Parliament.”

That it is the intention of the Foreign Jurisdiction Act that Her Majesty’s power of legislation over British subjects in extraterritorial places should be subject to the same restrictions as it is in the case of the Colonies, will be seen from the wording of the Act which it repeals, the section 6 and 7 Will. 4. C. 78. intituled an Act to enable

His Majesty to make Regulations for the better defining and establishing the Powers and Jurisdictions of His Majesty's Consuls in the Ottoman Empire.

By the last mentioned Act, His Majesty was empowered by Order in Council to make any Regulations touching the jurisdiction to be exercised over British subjects in the Ottoman Dominions and certain other places by His Majesty's Ambassadors Consuls &c. and to impose penalties forfeitures or imprisonments for the breach of any such regulations, and His Majesty's Ambassadors, Consuls &c. were required to enforce them, and they were to be binding on all British subjects within the countries named.

Here there was no limit placed by Parliament on the power of the King in Council to bind British subjects in those places, and it is clear that it was part of the object of the Foreign Jurisdiction Act, in repealing that Act, and making the provisions we have referred to, to place those limits on that power which Parliament had before omitted to lay down.

This view is confirmed by the Act 6 and 7 Vict. C. 80, above referred to, intituled an Act for the better Government of Her Majesty's subjects resorting to China.

This Act, which was passed only two days before the Foreign Jurisdiction Act 1843, also repeals the provisions of a prior Act (3 and 4 Will. IV C. 93) in which power without any limit assigned was given to the Sovereign in Council to make regulations to be exercised over British subjects, and it declares the limits within which in future that power shall be exercised. In the third Section it enacts that "it shall * * be lawful for Her Majesty by any Order or Orders made with the advice of Her Majesty's Privy Council, to ordain, for the Government of Her Majesty's subjects being within the Dominions of the Emperor of China, or being within any ship or vessel at a distance of not more than one hundred miles from the Coast of China, any Law or Ordinance which to Her Majesty in Council may seem meet, as fully and effectually as any such law or ordinance could be made by Her Majesty in Council for the Government of Her Majesty's subjects being within the said Island of Hongkong.

But while it appears to me that H. M.'s jurisdiction over H. M.'s Subjects in these places is subject to the same restrictions as in the case of Crown Colonies I am of opinion that so far as British law is concerned it is not subject to any other restriction. What jurisdiction then would Her Majesty have in a Crown Colony over persons on board H. M.'s ships in the harbour of such Colony? I know of no Act of Parliament limiting her power in this respect and in the absence of any such enactment I take it to be clear that Her Majesty could by an Order in Council constituting a Court in a Crown Colony give to such Court jurisdiction over every one on board H. M.'s Ships lying in the harbours of the Colony, and I conceive that general words conferring jurisdiction over every one within the limits of the Colony would include persons serving on board H. M.'s Ships lying in such harbours. At least no rule of construction has been brought to my notice by Counsel, and I know of none, whereby H. M.'s Officers are not included in any general provision relating to H. M.'s subjects. In like manner I conceive that Her Majesty can by Order in Council constitute in these Countries and can give them jurisdiction over persons serving on board H. M.'s Ships lying in the harbours of these Countries, and, I conceive

that general words giving jurisdiction over all Her Majesty's subjects in these Countries would include Her Majesty's subjects serving on board Her Majesty's Ships while so lying in harbour. It appears to me at any rate that it is incumbent on any British subject claiming exemption from such jurisdiction clearly to set out the grounds for such exemption.

The Counsel for the defendant has set up a ground of exemption drawn from the principle of the law in "Coriters on International Law" that all men of war coming into the ports of a foreign country are exempt from civil suits, and argued that a British man-of-war is to be considered as part of English territory and therefore although actually lying in this port is to be considered as if it were a part of England and therefore outside of this jurisdiction.

But I think this contention cannot be sustained. It is true it is laid down in Phillimore's International Law (Vol. I. CCCXL V) cited by the Counsel for the defendant that "long usage and universal custom entitle every such ship to be considered as a part of the state to which she belongs and to be exempt from any other jurisdiction." But this is a fiction which, however it may hold between authorities of a foreign country and a ship-of-war of another power in the ports of that country, cannot be sustained as between the ship and the authorities of her own country. This becomes very clear when we come to consider the reasons given for the exemption. Sir R. Phillimore in his judgment in the case of the *Charkieh* (L. R., 4. Adm. 59) says (No. 88) referring to the exemption of foreign Governors and foreign Ambassadors:—

"Upon what grounds is this exemption allowed? Not upon the possession on behalf of the Sovereign of any absolute right in virtue of his sovereignty to this exemption; such a right on his part would be incompatible with the right of the territorial sovereign and not as is sometimes carelessly said, upon the ground that he and his property are to be considered as still remaining in his own territory. This is indeed the fiction of law expressed in the term "extraterritoriality" by which the nature of the immunity is illustrated; but it is illogical and inaccurate to consider it as the ground of that immunity." I shall refer to a passage in Wheaton's International Law which follows a passage cited by counsel for the defendant. Referring to the exemption of ships-of-war Wheaton says (). The whole reasoning, upon which such exemption had been implied in the case of a sovereign or his minister, applies with full force to the exemption of ships-of-war in the case in question:—

"It is impossible to conceive, said Vattel, that a prince who sends an ambassador, or any other minister can have any intention of subjecting him to the authority of a foreign power; and this consideration furnishes an additional argument which completely establishes the independence of a public minister. If it cannot be reasonably presumed that his sovereign means to subject him to the authority of the prince to whom he is sent, the latter, in receiving the minister consents to admit him on the footing of independence; and thus there exists between the two princes a tacit convention, which gives a new force to the natural obligation.

"Equally impossible was it to conceive, that a prince who stipulates a passage for his troops, or an asylum for his ships of war in distress, should mean to subject

"his army or his navy to the jurisdiction of a foreign sovereign."

The ground of exemption is that the navy may not be subject to the jurisdiction of a foreign sovereign. But in the case of Her Majesty's courts in these countries the jurisdiction exercised is not the jurisdiction of a foreign sovereign. It is, to use the words of the order of the Queen in Council, "Her Majesty's jurisdiction exercisable in China or Japan." And on the principle, *cessante ratione cessat lex*, the exemption from civil process in the ports of a foreign country ceases when that process is no longer the process of a foreign sovereign. It is strange that this question should only now come to be mooted. This is the first time so far as I am aware of in which during all the time these courts have been established it has been sought to set up the exemption as against their jurisdiction. That jurisdiction, as the counsel for the plaintiff has pointed out, has been exercised in the case of inquests. It has been frequently exercised in other cases too. It is to be observed moreover that it was constantly exercised in the case of H. M.'s troops when stationed in his country, and they were by International Law, independently of the treaty, equally with the navy exempt from all jurisdiction of the native courts. Yet it was never sought to question the jurisdiction of this court. If it could have been questioned doubtless it would have been when the colonel of one of H. M.'s regiments on the day which his regiment was embarked stood at the bar of this court upon his deliverance upon a charge of assault on the day on which his regiment embarked. I have not heard that because he was a Queen's officer he considered it incumbent upon him to dispute the jurisdiction of H. M. Court. It has been contended that, because the plaintiff is a Japanese, therefore the Court has no jurisdiction. So far as I have been able to comprehend the argument upon which this contention is based, it is this:—The treaty was intended to abridge the rights of the Japanese. But if a Japanese plaintiff can sue the commander of Her Majesty's ship at Yokohama, he has a privilege which he would not have had if the treaty had not been made. It is therefore contrary to the spirit of the treaty to allow him to sue. But from this reasoning I most emphatically dissent. The intent of the treaty was that Her Majesty's subjects should, contrary to the rule in most European countries, remain while in this country subject to her jurisdiction, and should not become amenable to the jurisdiction of the native authorities, and no doubt this necessarily abridged the rights which the authorities of this country would otherwise have over British subjects. But it is entirely incorrect to say this abridgment of Japanese rights was the object or intent of the treaty. It became necessary, in order to secure what the true intent was, and the attainment of the object of the treaty is quite consistent with the acquisition by the Japanese of benefits which they would not have but for the treaty. It has been argued that it is against public policy that a Japanese subject should have the power indirectly to stop Her Majesty's ships by taking an action against her commander. And if I apprehend the argument aright it has been therefore inferred that Her Majesty's Court has not jurisdiction, the exercise of which might have this effect. But I think I shall best meet the argument from the supposition of inconvenient consequences, by referring to the judgment of Lord Brougham in the

judgment in the case of *Hill v. Bigge* (3 Moore's P.C., 465). He there says:—

"Suppose all these alleged consequences had been accurately stated, they could not necessarily decide the question; many cases might be put of as great inconvenience and even of as great violence done to public feeling, and as great mischief to the public service by the execution of legal process, as any in the cases that have been put. Yet in none of those circumstances can it for a moment be pretended that the law is not to take its course. The inconvenience which would result from a general officer or an ambassador being taken in execution, on the eve of his departure on service abroad, or the mischiefs that would ensue to the administration of justice from a judge being taken in execution almost at any time, are quite undeniable; but equally certain it is, that these inconveniences offer no argument whatever against the unquestionable liability of all those functionaries to undergo, like the rest of the King's subjects, the process of the law."

But the argument from inconvenience, however strong it might be, falls to the ground when it is shown that the inconvenience is not a necessary consequence of the jurisdiction objected to. The jurisdiction which these Courts have in suits on the part of foreigners against British subjects is provided for in section 117 of the Order in Council 1865, which provides: "Where a foreigner desires to institute or take any suit or proceeding of a civil nature against a British subject, the Supreme or other Court according to its jurisdiction may entertain the same, and where any suit or proceeding is entertained shall hear and determine it according to the provisions of this order and of the Rules made under it applicable to the case." Now this makes it discretionary on the part of the court to hear any suit which a foreigner may seek to bring against any British subject within its jurisdiction. Such discretionary power is exercised in certain cases by the Court of Admiralty, and in the case of *The Nina* (L. R., 2, P. C.), in which the exercise of that discretion was upheld, the principles upon which it is to be exercised are laid down. Lord Romilly says:—"By discretion is meant, to use the words of Lord Eldon in *White v. Damon*, not an arbitrary capricious discretion, but one that is regulated upon grounds that will make it judicial." And the meaning of this is illustrated by what precedes. The question was as to the exercise of jurisdiction in a cause of wages instituted by a British subject, a seaman on board a Portuguese vessel, the consul having lodged a protest on the ground that the dispute ought to be referred to him, and in this point the judge says:—"With respect to the third question their Lordships are of opinion that the protest of the foreign Consul does not *ipso facto* operate as a bar to the prosecution of the suit. The foreign Consul has not the power to put a veto on the exercise of its jurisdiction by the Court of Admiralty. It is well observed by Dr. Lushington in the case of *the Galathea*, that the jurisdiction of the Court of Admiralty cannot depend upon the will of a foreign consul; that as he cannot confer the jurisdiction so he cannot take it away. If the consul protests but advances no reason the case will proceed. If he advances reasons for staying the suit, the plaintiff must be at liberty to dispute the facts and answer the reasons put forward by the Consul, and then the judge of the Court of Admiralty is to exercise his discretion and

"determine whether having regard to those reasons with the answers thereto it is fit and proper that the suit should proceed or be stayed." Upon the same principles this court will hear any reason assigned why it should not entertain a suit brought by a foreigner against a British subject. But I ought to say that there appears nothing upon the face of this case which would lead me to refuse to entertain this suit. I am quite satisfied that the Counsel for the defendant accurately expressed the defendant's sentiments when he said the defendant did not wish to shrink from any responsibility which his act may have cast upon him. And I know no place where the claim against him can be better adjudicated upon than at the place where the act complained of is alleged to have been done. As to the tribunal he will have the benefit of a jury of his own countrymen.

The conclusion I have arrived at has not been shaken by the arguments of defendant's Counsel, but it is right that I should notice them before concluding. I have been in doubt in some cases whether I may not have misunderstood some of those arguments, as they appeared to me to be such as could scarcely be seriously advanced. I endeavoured during the argument fully to ascertain their meaning and shall state them as clearly as I can. Counsel referred to Coote's Admiralty Practice in suits against the Queen's Ships, in which it is laid down (2nd ed. p. 31) that:—"Where a Queen's vessel has inflicted damage upon a vessel belonging to a private person no warrant can be granted in a cause of damage instituted against the former. The Court of Admiralty in such a case will direct the registrar to write to the Lords of the Admiralty requesting that an appearance be given to the action. An appearance will be given on behalf of the Crown by the Admiralty proctor and the proceedings will go on as usual with the exception only that no bail is taken."

And correctly assuming that proceedings could not be taken in this Court against the ship herself, he argued that proceedings that cannot be taken against a ship cannot be served on board that ship. But this proposition, it appears to me, is contradicted by facts. There is no Court in England in which any proceedings can be taken against a Queen's ship so as to affect the ship herself. Proceedings could, with the assent of the Lords of the Admiralty, have been taken to the High Court of Admiralty, but in the Courts of Common Law no such proceedings could have been taken even nominally against the ship; but in both the Admiralty Court and the Courts of Common Law, proceedings could always have been taken against the officers of such ship in a case of collision, and I apprehend that the commander would feel bound by the instructions contained in chapter XII. (Art. 25, 26, and 27) of the Queen's Regulations and the Admiralty Instructions to allow the writ or other process of those Courts to be served on board. The proposition therefore (if I have rightly apprehended it), not being correct, the argument based on it falls to the ground.

The Counsel for the Defendant also argued from the construction of the Order in Council that jurisdiction in such a case as the present was not conferred by it. He argued that the preamble professed to make provision for the government of Her Majesty's subjects being within any ship or vessel at a distance of not more than 100 miles from the Coast of China, which he assumed would mean within 100 miles from the coast of Japan also, and that as in the Interpretation clause there was

a definition of "British vessel" as a vessel being a British ship within the meaning of the Merchant Shipping Act or any of the Acts of Parliament for the time being in force for the regulation of Merchant Shipping, the Order in Council was intended to confer jurisdiction only over merchant vessels, and that men-of-war and those on board of them were intended to be exempt from all jurisdiction of Her Majesty's Courts in these countries. And when I asked him whether he considered that by ships mentioned as being within 100 miles of the Coast of China were meant all ships in Chinese or Japanese ports he said he did. Such a view is founded on a misapprehension of the provisions as to the 100 miles. The 100 mile limit first appeared in the Act 3 and 4, Will. 4, c. 93, in the 6th section of which it is enacted that "it shall and may be lawful for His Majesty, by any such order as to His Majesty in Council shall appear expedient, to create a Court of Justice with Criminal and Admiralty jurisdiction for the trial of offences committed by H. M.'s subjects within the same dominions, and the ports and havens thereof, and on the high seas within 100 miles of the coast of China." The portion meant to be included in the 100 miles limit was here expressly stated to be on the high seas. The Act 6 and 7, Vict., c. 80, repealing that portion of the Act and providing that H. M. might make Orders in Council for the government of H. M.'s subjects being within the dominions of the Emperor of China, or being within any ship or vessel at a distance of not more than 100 miles from the coast of China, makes no alteration in this respect. For the dominions of the Emperor of China include all ports and havens in China. The 100 mile limit has moreover no reference to Japan. No act has conferred power on H. M. in Council to make special laws for British subjects being within 100 miles or any other distance outside of the territorial limits of Japan. It is to be observed moreover that the defendant of a British vessel, in the interpretation clause of the Order in Council does not necessarily extend to the Act of Parliament cited in the preamble. Whatever meaning the words "ship or vessel" may have in the Act, the meaning is not determinable by a definition in the Order in Council of the words "British vessel." There is an argument, however, which might possibly be drawn from that portion of the Order in Council which makes provision for the exercise of authority within 100 miles of the coast of China. Section 101 provides for the case of British subjects charged with having committed a crime or offence within a British vessel at a distance of not more than 100 miles from the coast of China. Here the only British ships that are contemplated are "British vessels" which, by the interpretation clause, are shown to mean only merchant vessels. It might be argued that as no jurisdiction is given over persons in ships-of-war on the high seas within 100 miles limit, it is to be inferred that it was not intended to give jurisdiction when they were in port. But it appears to me that this argument could not be sustained. It has not been raised by the counsel for the defendant, probably because he felt it cannot be sustained.

The counsel for the defendant argued that a judgment rendered by this Court against the defendant would be futile. I think it would not be futile. But I shall not proceed to consider a question founded upon an assumption that the defendant will in any way seek to evade the liability which he has declared he has no desire to evade.

The conclusion that it is not Japanese jurisdiction that I am exercising has saved me considering the point which was raised in the *Prince Frederick* and left undecided by Lord Stowell, and again in *Charkieh* and left undecided by Sir Robert Phillimore.

Having come to the conclusion that this Court has jurisdiction over British subjects on board H. M.'s ships lying within the local jurisdiction of the Court, it is unnecessary to dwell upon some of the other arguments in the case. This is a personal action against the defendant in respect of a cause of action which is transitory, and whether the ship were to be considered part of England or not, the action is triable anywhere where the defendant may happen to be. And if the petition were served upon the defendant at any rate while on shore, he would become subject to the jurisdiction of the Court in the action. The conclusion I have arrived at obviates the necessity of considering the consequences which would follow from service on shore being valid while invalid if made on board. That conclusion is borne out, it appears to me, by the judgment in the case of "*Hart v. Von Gumpach*" (C. R. 4, P. C. 439). In that case an objection to the jurisdiction by reason of the nature of the cause of action was raised, but it was held that such objection could not be sustained. The judgment also lays down that:—"By the law of England, actions for libel, and other personal wrongs arising in foreign countries may be brought in an English Court; and any special circumstances which preclude the court from entertaining them should be shewn." Afterwards it proceeds to consider the objection. It says:—"It was then insisted, that if the Queen's Courts in England might entertain the action, it would still be contrary to the treaty of Tientsin which authorised the Queen to establish Courts of justice in China, that her Court so established should take cognizance of it. Their Lordships are unable to find in the Treaty sufficient grounds for this contention."

By Article XV., "all questions with regard to rights, whether of property or persons, arising between British subjects, shall be subject to the jurisdiction of British authorities; and the effect of the Order of the Queen in Council establishing the Supreme Court, and declaring its powers and jurisdiction, is, that the law of England, as between British subjects, shall be administered in it. Their lordships, therefore, are unable to declare that the same principles of law shall not be applied to the decision of the action in the Court below, which would have governed it, if brought in the Queen's Courts in England; especially when no act of the Chinese Government is impugned, and no law or custom of China is, for anything which appears, violated."

I am of opinion that on this point the same reasoning applies to the Treaty with Japan as to the Treaty with China, and to the Provincial Courts as to the Supreme Court.

Demurrer overruled, with costs.

The Court being thus found to have jurisdiction, the case was then called, and the following gentlemen were sworn as a Jury:—

Messrs. J. J. Gray, George Butland, James Lichtenstein, Edgar Abbott, and Alexander Clarke.

Mr. G. P. Ness appeared on behalf of the plaintiff and Mr. F. V. Dickins for the defendant.

The following are the pleadings:—

The plaintiff is owner of the Japanese Str. *Chiri Maru*, and claims from the defendant, Captain Colomb of H. M. S. *Audacious*, the sum of \$1,400 compensation for damage done to the *Chiri Maru* by the *Audacious* on the night of the 11th of June, and a further sum of \$300 per day demurrage for twenty days, the time stated in the 7th article of the petition to be necessary for the execution of repairs, to the *Chiri Maru*, of the damage done by the collision, or in all \$7,400 with costs of suit.

The petition set forth that at the time of the accident the defendant was Captain of the *Audacious*. In article 2 it is stated that shortly after 8 p.m. on the 11th of June the steamship *Chiri Maru*, a vessel of about 800 tons burden, of which the plaintiff is owner, was lying at anchor, in ballast, in the harbour of Kanagawa, and article 6 says was ready to proceed to sea. Paragraph 3 says the wind at that time was about South by West, and blowing heavily; and it was both dark and gloomy; and the *Chiri Maru* was moored by means of two anchors about a quarter of a mile astern of the *Audacious*. Article 4 states that at such time the *Audacious*, which had been moored to the south of the *Chiri Maru*, was seen to be drifting down on the latter vessel, her head to the South and East with the wind at least four points on her starboard bow. As the danger of collision was immediate, the crew of the *Chiri Maru* veered out both their anchor chains; but notwithstanding that she veered 75 fathoms on the port and 45 fathoms on the starboard sides, the *Audacious* with her stern struck the *Chiri Maru* on her stem, gradually passing along her starboard bow. Subsequently the remainder of the *Chiri Maru*'s starboard chain was, with the assistance of the officers and men from the *Audacious*, veered out, when the two vessels cleared for a time; but the *Audacious* a second time drifted on to the *Chiri Maru* and struck her on the stem, dragging her on her port side; and through those collisions the *Chiri Maru* was rendered unfit to fulfil her engagement and proceed to Nagasaki. Further, article 8 contains a statement that the damage sustained by the *Chiri Maru* was occasioned by the mismanagement of the *Audacious* by the defendant.

The extent of damage done to the *Chiri Maru*, was about 3 feet of the upper part of her stem broken off with fore-stay attached. Spikelling and dead wood inside the stem, and on both sides about 30 feet more or less from the stem broken and crushed. Both cat-heads broken and displaced with all iron work attached. The iron beading round the gunwale on the port side crushed and broken for about 60 feet from stem, gunwale plate at same place more or less crushed and started, and two or three knees supporting guards started and broken. Iron beading round gunwale on starboard side more or less injured. Iron rails and stanchions on upper deck broken, twisted and started from stem to fish davits. Fish davits bent. Fore topmast broken at bounds. Supporting stanchions of hurricane deck gone and twisted for about 25 feet from stem on both sides. Fore flagstaff broken. Hand rail, stanchions and netting of hurricane deck twisted, broken and gone for about 12 feet from stem. Fish block and cat-fall on port side broken and gone. Signal lantern and halyards gone. All the carved and scroll work, name board &c. about the bows more or less damaged. About 12 feet of open work of guards on starboard side broken and more or less damage to same on port side for about 40

feet from stem. Port life boat damaged. Fore topsail split and blown away, which they had tried to set during the collision to separate the vessels. Canvas screen on port side of main rail more or less torn.

The answer to the petition ran as follows:—

1st.—The defendant demurs to the plaintiff's petitions and said that the same is bad in law on the grounds that it specifies not any particular act or acts of negligence or mismanagement and upon other grounds sufficient in law to sustain this demurrer.

2nd.—The defendant denies that this Court has jurisdiction over him in respect of the matter alleged in the petition herein.

3rd.—The defendant admits the truth of the statements contained in the 1st and 5th articles of the petition.

4th.—The vessels *Chiri Maru* and *Audacious* mentioned in the petition came into collision in the harbour of Kanagawa between 8 and 8.30 p.m. 11th June current. The wind was then South by West to South South-West. The weather was overcast, rainy and squally, with strong breeze, and before the collision said *Chiri Maru* was distant from said *Audacious* about 1½ cables, lying North North-East. The said *Audacious* lying secured and anchored properly commenced about such time to drift towards the said *Chiri Maru*, and immediately a second anchor was let go, and all proper and necessary measures taken to avoid collision, but said *Audacious* nevertheless, and by inevitable accident so far as the *Audacious* is concerned, came into collision with said *Chiri Maru*. The port quarter of the *Audacious* colliding with starboard stem and bow of said *Chiri Maru*, and afterwards the stem and starboard quarter of said *Audacious* touched stem and port bow of said *Chiri Maru*. Officers and men of said *Audacious* rendered such assistance on the occasion of the said collision taking place as is mentioned in the 4th article of the petition, but said *Chiri Maru* was not so found or furnished as to permit of such assistance being as efficient as otherwise it might have been. Save as aforesaid the defendant does not admit the truth of the statements contained in the 2nd, 3rd and 4th paragraphs of the petition.

5th.—The damage resulting from the collision did not cause loss to the plaintiff of \$1,400, but to an extent of less than \$500.

6th.—The defendant does not admit the truth of any of the statements contained in the 6th article of the petition and denies that said *Chiri Maru* was at time of said collision ready to proceed to Nagasaki as in the 6th article of the petition stated; and the defendant further denies the truth of all and every the statements and statement contained in the 7th and 8th articles of the petition.

7th.—The defendant is not responsible or liable in respect of any of the matters alleged in the petition.

Mr. Ness, in opening the case, explained that the complaint had been got up hurriedly, and in claiming \$300 per day he had made a mistake. He asked permission to amend the petition by substituting for the \$300 per day the sum of \$150; and the total amount of the claim to \$4,400, instead of \$7,400 as demanded in the petition. He had sent a letter to the defendant's counsel informing him of his wish to amend the petition.

Mr. Dickins for the defendant had no objections to offer, and His Honour consequently granted the application.

Mr. Ness then addressed the Jury and laid before them the circumstances of the case as laid down in the petition, and said the main question they would have to decide was

whether the accident was inevitable or not, and it was incumbent upon the defendant to prove that by no means in his power could the accident have been averted; and the learned gentleman asked the Jury to kindly keep this fact before their notice while listening to the evidence.

Iwasaki Yataro was then called and stated that he was the plaintiff in this action, and the owner of the *Chiri Maru*. That document (produced) is the certificate of register of that vessel which shows that the vessel belonged to the Mitsu Bishi Co. of which he was the principal. It was the intention of the Japanese Government to dispatch the *Chiri Maru* to Nagasaki and thence to the seat of war; and negotiations were commenced relative to that object in the latter part of last month, and were brought to a conclusion in the beginning of this month. The negotiations were between the witness and an official of the Post Office. Memorandums of agreement produced and certified to be genuine by the witness. One of the documents was the agreement and the other a notice from the Post Office Department stating that the terms were accepted.

Mr Ness was about to read a translation of the documents, but Mr. Dickins objected. The point, however, was settled between the two learned gentlemen on the understanding that the documents were to be put in before cross-examination commenced.

The witness then continued and said that he was to receive \$150 per day from the Post Office for the use of the steamer; and in consequence of the collision he had been deprived from receiving this, as the ship was unable to sail in consequence of the damage sustained. It had been his intention to despatch her on the fourteenth; and it was arranged that the \$150 per day was to have been paid from the day she sailed until she returned: the services of the vessel were required until the end of the war. How long that would be the witness did not know: it might be two months or two years; at all events he was of opinion that she would have been required for a very long time. No steps were taken to reduce the loss, because the witness had been unable to take any. An estimate of the damage done to the ship valued the amount at \$1,400. The witness would have been content to have the *Chiri Maru* reinstated as before, instead of receiving a certain amount of money and having to get her repaired himself; and would be content to receive the sum of \$150 per day as compensation for the detention.

Recess till 1.30 p.m.

On the Court resuming this afternoon, Mr. Ness put in the charter-party of the *Chiri Maru*, or at least a certified copy of it, and then Mr. Dickins cross-examined the plaintiff, who stated that the first commencement of the Mitsu Bishi Co. was 9 or 10 years ago, and that the Company was his from the commencement; and that there never was any other person directly connected with the Company. In answer to a question as to the law regulating the foundation of companies, the witness replied that he knew nothing of such a law. He was sole possessor of all the vessels known as the Mitsu Bishi steamers.

Mr. Dickins asked by what means the witness became sole proprietor of the vessels known as the Mitsu Bishi Steamers, but Mr. Ness objected to the question. He ultimately withdrew his objection.

The witness said that he had been engaged many years in shipping, and ultimately the Government graciously gave him some vessels they did not require, which formed the nucleus of the Mitsu Bishi Company. There was no Company constituted by shareholders. The Government gave him the vessels for nothing; and no request had been made by the Government for any payment. The Government handed over to him about 18 ships, large and small; and the last one was handed over about three years ago. The expense of keeping up the vessels was met by the earnings of the vessels; and the earnings went into his own pocket and not to the Government. The *Chiri Maru* was one of those vessels not used by the Government and handed to him. When the Government made him a present of the ship a deed of gift was handed to him, though he had not the document with him; but the general purport of it was that they gave him ten or more vessels on the understanding that the vessels were to be used for Government service whenever required, and the Government to pay a suitable amount. When chartered by the Government, navigation expenses, such as wages of seamen, coal, &c., were entirely defrayed by him; and if the *Chiri Maru* went to the seat of war he, plaintiff, would have to pay the expenses attached to taking her there. The seal to the contract was that of the Post Office Department; and the person who applied it had probable the power to affix it, but the witness could not say for certain.

Mr. Dickins asked who paid for the vessels purchased from the Pacific Mail S. S. Company:—the Government or the witness?

Mr. Ness objected to the question on the ground that those vessels had nothing whatever to do with the *Chiri Maru* and had no bearing whatever on the case; the issue of the ownership of the *Chiri Maru* was before the Court but not the ownership of the other vessels.

Mr. Dickins then put another question viz: was witness the owner of the other vessels?

The witness replied that he was and that he had paid for them.

Mr. Dickins enquired if he paid for them out of his money or by money supplied by the Government?

Mr. Ness objected to the question.

Mr. Dickins said that part of his case was that the plaintiff was not the owner of the vessels, and that he therefore had no right to bring this action.

Mr. Ness said that, so far as the vessels were connected with the case, he had no objection to questions: but he did not see that the question of how the P. M. steamers were paid for, had anything to do with the case.

Mr. Dickins did not want to enquire more particularly into the private affairs of the Company than was absolutely necessary; but he was under the belief that the vessels were the property of the Government. He would put the question in a different form. Did the witness obtain the money from the Government?

The witness replied that he borrowed the money from the Government on interest, but the vessels did not consequently belong to Government until the money was returned. He had not read the petition in the present case himself, but it had been read to him. He believed that there was nothing untrue or unjust in the petition; but though he had seen a translation of the petition he did not sufficiently understand it to say positively that everything it contained was perfectly true. The question being pressed further, the

witness said that there was no "lie" in the petition.

Mr. Ness objected to the witness being questioned on a document not in his own language.

Mr. Dickins replied that the witness had read a translation of the petition and he ought to be acquainted with its contents. What he wanted to arrive at was, how much of the petition was the witness's and how much was due to his learned friend?

The witness stated that the fact of the *Audacious* drifting was owing to the negligence of the defendant: his opinion was that the vessel drifted because the Captain did not pay proper attention, as the *Audacious* was the only ship in the harbour that drifted. His belief was founded on the reports furnished by his own Captain. He was not on board the vessel and could not say personally what took place on the *Audacious*. The report of his Captain was that the accident occurred entirely through the fault of the *Audacious*; though no special act of negligence was mentioned. The *Amakusa-maru* left Yokohama for Nagasaki on the 14th. It was intended that this latter vessel should tow the *Chiri Maru* to Nagasaki, but in consequence of the unfortunate accident she was compelled to start without her. It was important that the *Chiri Maru* should have been sent to Nagasaki with all dispatch. Witness believed that there were from 30 to 40 vessels belonging to the Company altogether; and ships were despatched without any special regularity to Nagasaki; he could not say how often, neither could he give the monthly average. The *Chiri Maru* was to be engaged until the war was at an end, whether that was for a long or short period. He had given instructions to his counsel to say that he would be content to receive \$150 per day, and have the vessel repaired by the defendant, and had never given any other instruction? A gentleman named E. B. Jones was in his employ; and he thought a person by the name of Devine was also employed. The Mitsu Bishi Ironworks in Yokohama did not belong to the Mitsu Bishi S. S. Company, though the Company had an interest in it. As a matter of fact he did not know what other persons were interested in the Iron Works besides himself. The contract engaging the *Chiri Maru* did not state the time she was to leave, because it was not known when there would be a vessel ready to tow her down: the understanding was that she was to be sent with all despatch.

To Mr. Ness the witness said that when the Government handed over the vessels to him it was understood that he was to requite the Government; and this arrangement was in writing.

Mr. Ness asked what obligations the witness came under when the ships were handed over to the plaintiff?

Mr. Dickins objected to the question.

His Honour supported Mr. Ness.

Mr. Dickins asked His Honour to take a note of his objection.

His Honour declined to do so, considering it was sufficient to be on the records that Mr. Dickins had made an objection and his objection was overruled.

The witness said that the obligation he was under to the Government was that he was to provide them with vessels when required, even to the inconvenience of private persons. The war was still going on.

Mr. Dickins objected to another question put by Mr. Ness; but His Honour declined to take the objection.

Mr. Dickins asked His Honour to take a note of his objection to his objection being refused to be taken by His Honour. His Honour informed Mr. Dickins he could take a note of the fact himself; and instructed Mr. Ness to proceed with his question.

The witness continued, and stated that an offer had been made by the Captain of the *Audacious*, but he could not say exactly what the terms of the offer were.

A juror asked the witness if the damage done to the *Chiri Maru* prevented her proceeding to sea, and he said that of himself he could not say, though Mr. Krebs had told him that the vessel could not proceed to sea in the condition she was in.

Mr. Dickins objected to this answer as evidence.

His Honour informed the Jury it could not be taken as evidence.

This concluded the evidence of the witness, and the Court adjourned until 9 o'clock to-morrow morning.

Friday, June 29th, 1877.

Hashimoto Yoshimichi, a Japanese, was the first witness examined this morning, and stated that he was a clerk of the second grade in the Post Office Department. The signatures to two documents, viz., a letter from the Mitsui Bishi Office to the Post Office, offering the steamer *Chiri Maru* at \$150 per day, and a letter from the Post Office accepting these terms, were his; and the seal to those documents was the seal of the Post Office. The documents were genuine.

To Mr. Dickins the witness stated that he had no document given him by the Government authorising him to make the contract; but he made the contract through instructions received from the principal of the Post Office.

Shikiyama Shineru, an officer of the 6th grade in the Post Office, stated that the documents put into the hands of the last witness he had seen at the time they were drawn up. He saw the seal of the Post Office attached.

To Mr. Dickins the witness said the contract was entered into between the Mitsui Bishi and the Post Office; and he could not say how many shareholders there were in the Mitsui Bishi.

—Maies, Captain of the *Chiri Maru* was next examined, and stated that he held a master's certificate from Boston Nautical College, the Japanese and the U. S. Navy. (Certificates put in). He had been master fifteen years; and had been at sea 32 years to-morrow. He was in command of the *Chiri Maru* on the night of the collision. The *Audacious* bore from the *Chiri Maru* S. by W. The *Chiri Maru* was lying over against the northern shore, and was moored with two anchors; and was about a quarter of a mile from the *Audacious*. The weather was squally, with a falling barometer. He noted his barometer at 8 in the morning and every hour during the day. The *Chiri Maru* was moored at 6.30; before that the vessel had only been secured with one anchor, and the reason he let go another anchor was because the weather was squally, and any shipmaster would have done the same if he took ordinary precautions. The *Chiri Maru* had her anchor lights out that evening. It was very dark, though the witness had seen darker nights; but the lights on the other ships in harbour were not obscured by the darkness. During dinner he left the table and ordered the second anchor to be let go. He gave instructions to his second officer

to watch that night, as he did not like to trust the Japanese. Shortly after eight o'clock the first officer reported the *Audacious* adrift. Witness said it was impossible, but a close observation showed that she really was adrift. He told the chief officer to call all hands and lay out chain. The first officer went to one controller and witness to the other and paid away chain as quickly as possible. The *Audacious* then was quite near them; and being to windward the *Chiri Maru* was becalmed and would not take any more chain, still every effort was used on board to pay out chain. The time the *Audacious* struck was between eight and nine o'clock; and at that time the *Chiri Maru* had 75 fathoms of chain out on the port anchor and 45 on the starboard. The *Audacious* struck the *Chiri Maru* on her stem with her port quarter, and then passed by on the starboard side. A number of men and officers from the *Audacious* clambered on board and assisted in hauling up the remainder of the chain and the vessels then separated about 50 feet. Shortly afterwards the *Audacious* struck the *Chiri* again on the port side; and through the *Audacious* lying on it the starboard chain parted; and the following day it was ascertained that 65 fathoms were down. Some one from the *Audacious* persuaded witness to set his foretopsail and it was blown away. Both vessels lay together for some time thumping heavily, but eventually a heavy wind separated the vessels and the *Audacious* dropped astern. Some conversation took place when the *Audacious* men went on board.

Mr. Dickins objected to this evidence.

His Honour supported Mr. Dickins, remarking that for anything the minor officers of the *Audacious* might have said, the defendant was not responsible.

Mr. Ness asked the witness again if any conversation took place between witness and any officer or man of the *Audacious* at the moment of the collision.

Mr. Dickins objected. The proceedings were not taken against the *Audacious* but against Captain Colomb.

His Honour sustained the objection.

The witness then recapitulated the damage done to the vessel as laid down in the petition, with the addition of the chains being broken.

Mr. Dickins admitted the items, with the exception of the extent of damage done to the stem as mentioned in the petition.

The witness stated that the stem of the vessel was damaged so seriously, that he could not think of going to sea with it unrepaired. There were 26 men on board, including Chinese steward and boy; and the officers were foreigners. The *Tennessee* was nearer to the *Chiri Maru* previous to the collision than the *Audacious* was. Witness received instructions on the 4th to be ready to proceed to sea, and from that day the *Chiri Maru* was ready. She was moored in a safe place. If the *Audacious* had let go a second anchor at the time she began to drift, it would have been impossible for her to collide with the *Chiri Maru*. Men with drift leads should have been at each gangway; and if the drift lines were properly attended to the vessel need not have drifted a fathom. There was another way of ascertaining when a vessel was drifting, viz., by taking bearings of the other lights. When the second anchor was taken up the wind was in the same direction, and the witness was surprised that the anchor was astern. It was impossible for the *Audacious* to have two anchors down, because

the second anchor down on the following day was astern of the *Chiri Maru*, a position it could not have got in had it been let go before the collision. The *Audacious* could not have taken less than ten minutes to drift down, and in that time four anchors could have been let go. Assistance was rendered the next day to recover the anchor and chain by men from the *Audacious*.

To Mr. Dickins, the witness stated he had never been on the *Audacious*, and had no personal knowledge of what could or could not be done. He had never served on board any modern ironclad, though he had on a monitor. On the 11th the *Chiri Maru* was riding at single anchor till 6.30 p.m. and had been so riding since the 4th. He did not think mooring was safer than lying at single anchor. The distance between the *Audacious* and *Chiri Maru* was only arrived at by guess. Witness had been about 7 years in Japanese waters, but had never experienced a typhoon in June. He knew there were 30 fathoms of chain out at 6 o'clock from personal observation. When the collision occurred witness did not look at any watch or clock. He thought there was an entry in the log as to the time when the *Audacious* drifted. Chain was veered away as quickly as possible; quicker than the vessel would take it. The chains could be let go by being unshackled; but it was impossible to unshackle the port chain with the *Audacious* resting on it, as it would have been death to any man who attempted it. When the *Audacious* was drifting down, it was impossible to unshackle because there was a quantity of chain in the locker and the end was fastened in the bottom of the vessel; it might have been unshackled with some shackles, but it was not politic to let the ship adrift. The same reason did not apply to the starboard chain, but it would have been silliness to have thrown the chain overboard. It was not necessary for the *Chiri Maru* to have a third anchor to let go. If only one anchor had been down at the time the *Audacious* was drifting, it would have been easier to let go and get away. It is always better to put down two anchors than one when it begins to blow, than to wait until one anchor drags and then drop the second. He could not refer to any text book on seamanship bearing out that view; and witness would not be surprised if there were books which would not bear out the view. It was a point of seamanship in which Captains differed. Witness did not consider his rule as binding upon other seamen. The *Audacious* stopped drifting soon after she struck the *Chiri Maru*. He did not recollect having any conversation with Captain Colomb about the length of chain that had been out. He did not know from his own personal knowledge that Captain Colomb had committed an error in seamanship. If the topmast, stem, and cat-heads had been put in repair, the *Chiri Maru* might have gone to sea.

To Mr. Ness, witness stated that the vessel had not gone to sea because the repairs had not been executed by the responsible parties. Had the *Audacious* let go another anchor in all probability the collision would not have occurred. If the second anchor was not let go before eight o'clock, it would show an act of unseamanship, in witness's opinion.

Mr. Ness asked the witness if supposing the *Audacious* had two anchors adrift, would the putting down of a third anchor have prevented the collision and he replied that in all probability it would.

Mr. Dickins at first objected but finally withdrew his objection.

Witness said that if the *Chiri Maru* had been secured with only one anchor, and that had that been let go, the vessel would have been adrift. He had never made any statement to any one as to the extent of chain veered out other than was done. He thought he did everything in his power to avert the collision. The draught of the *Chiri Maru* is between 11 and 12 feet.

To the jury the witness stated that no offer had been made by Capt. Colomb, and he did not know how the estimate of the damage was arrived at. He thought it would take 12 or 14 days to repair the vessel. If the *Audacious* had one anchor only down when she began to drift and another anchor was let go, she would still drift till the second anchor brought her up. It would have been possible for the *Audacious* to drop down to the *Chiri Maru* from the time a second anchor could have been let go. The *Chiri Maru* is a steamer and supplied with the usual sails. Witness did not think it possible for a vessel to drift a quarter of a mile after a second anchor had been let go if the chain was veered properly.

Recess till half-past one o'clock.

On the Court resuming in the afternoon William McDonald was called, and stated that he was a surveyor, and had been called to survey the *Chiri Maru* the day after the collision. The particulars annexed to the petition constitute the damages. She was not fit to proceed to sea. Supposing the stem was only patched it would take something off the value of the vessel. It might take two or three weeks to repair the damage done to the vessel. The witness thought that if a vessel was riding at single anchor when it came on to blow it would have been advisable to drop another anchor. Witness could not say that he would have taken such a precaution had he been master of a ship in the harbour at the time; he would have seen that his anchor was clear. Had a second anchor been let go from the *Audacious* the probability is that the collision would not have occurred. After ascertaining that a vessel was drifting she could be checked within half a cable's length. On the night in question there was a ground swell on. There are several ways of ascertaining when a ship is drifting.

In cross-examination the witness stated that it was some time since he followed the sea: he had never served on board a 6,000 ton vessel, nor on a man-of-war of any kind, and had no experience of manœuvres on board a vessel of that class. He had no special knowledge of iron work. He had not calculated the time it would take to repair the *Chiri Maru*; neither did he know what the cost would be. In a straight line gale the witness would prefer to have his second anchor down to having it ready for an emergency. He did not know of any text books which would bear out his opinion, but could speak from experience. It would surprise him if any text-books gave a different opinion on the subject. He had always considered the point a decided one, but declined to say that, because a Captain did not let his second anchor go, he was acting in an unseamanlike manner. It might be proper to let go a second anchor if the wind was expected to shift and heavy ships were in the neighbourhood. He did not think that Captain Colomb acted negligently or from ignorance on the night in question; and did not think that under the circumstances in which Captain Colomb found himself, his comparative ignorance

of the bay, &c., would have acted wrongly in basing his action on the supposition that the wind might change. Witness was not afloat on the evening of the eleventh. The gale on the eleventh was what is termed a "straight line" gale. Supposing the ship was riding at single anchor, and he did not consider her likely to drift, the witness thought that probably he should not let another anchor go. It was unnecessary to have drift lines on both sides of the ship. It would be much more difficult to bring a large vessel up than a small one.

To Mr. Ness witness stated that the anchor should be in proportion to the size of the vessel. After a large vessel had commenced to drift, it would be more difficult to bring her up than a small ship.

D. Scott deposed that he was a Marine Surveyor, and had been requested to survey and report on the *Chiri Maru* on the 11th of this month. A new stem was necessary to put the vessel in the same condition as she was in before the accident. Supposing the *Audacious* had been a merchant vessel, it would have been a proper precaution to have let go another anchor on that night at six o'clock.

To Mr. Dickins witness stated that he was not afloat on the night of the eleventh and did not recollect a lull about eight o'clock; there was a short one before that. He had never commanded a steamer, and the largest vessel he ever commanded was one of 700 tons. He had no personal experience of service on board a man-of-war. The handling of a man-of-war of 6,000 tons differed considerably from the handling of a vessel of 700 tons. Witness did not consider himself competent to give an opinion as to how a man-of-war should be managed. Supposing the *Audacious* was lying at single anchor on the night in question, and had another anchor ready for emergency, witness did not think it would be unseamanlike. He did not know of any text-books on the subject.

Henry Joseph Dunn, stated that he was an American citizen, and chief officer on board of the *Chiri Maru*, and had a certificate of competency. He remembered the evening of the eleventh of June, and the *Chiri Maru* was lying then in the same position as she is now. She was lying at single anchor till after six o'clock, when she was moored. During the afternoon the state of the barometer indicated a heavy blow. Witness then went on to relate what had occurred in the evening, his evidence in this respect being identical with that given by Captain Maies.

(At this stage of the proceedings Sir Harry Parkes took a seat on the Bench.)

In cross-examination witness stated there might have been 20 hands on board. He was looking towards the *Audacious* and saw her coming. She did not drift exceedingly quickly. It was a few minutes (about a quarter of an hour) after eight when he saw the *Audacious* drifting.

Louis Tryler, second officer of the *Chiri Maru* was next examined, and gave similar testimony to that of the Captain and first officer of the *Chiri Maru*; and nothing further was elicited in cross-examination.

W. Robertson, of No. 237, stated that he was one of the partners of the Mitsu Bishi Iron Works. The firm consisted of the plaintiff, witness and Mr. Brandt. He had given an estimate for repairing the *Chiri Maru*, and put it at \$1,400, which witness thought was a reasonable sum. It would take about 30 days to effect the repairs. By working day

and night the repairs might be done in less time, though the expenses would necessarily be greater.

Charles Fletcher certified that he was an American citizen and had had some seafaring experience—40 years. On a squally day or night the master of every merchant ship would let down a second anchor. Supposing there were two vessels in harbour a quarter of a mile apart and one began to drift, if a second anchor was dropped she could be brought up before she reached the other.

In cross-examination witness stated there was a text-book which bore out his view relative to the letting of two anchors go, viz., the best book in the world—a nautical man's own experience!

This concluded the plaintiff's case.

Mr. Dickins asked His Honour for a nonsuit, as there was no evidence to go to the jury. There was no evidence of negligence on the part of Captain Colomb.

Mr. Ness argued that the onus of the proof of "inevitable accident" rested with the defendant and not with the plaintiff. He submitted that there was testimony before the Court which implied negligence on the part of Captain Colomb; as several witnesses stated that ordinary precaution dictated putting down another anchor.

Mr. Dickins maintained that, in the whole of the evidence, there was nothing to show that the case ought to go to the jury, and referred to authorities to substantiate his arguments.

His Honour, having heard the arguments of both Counsel, declined to entertain Mr. Dickins' application.

Dr. Dickins then opened his case to the jury, after which the Court

Adjourned till nine o'clock to-morrow morning.

Saturday, June 30th, 1877.

George Whitfield was called by the defence this morning and stated to the Court that he was an ironfounder and had had considerable experience with regard to repairing ships. He had been asked to estimate the damage done to the *Chiri Maru*, and he considered that \$850 would repair that vessel. He was of the opinion that the vessel might go to sea without any repairs done to her, though that was a point upon which the witness thought seamen would be able to give a more explicit opinion. A portion of the stem was broken, but it did not appear to be of very great importance; it had been broken off by a rivet hole joining the plates of the ship to the stem. It would take four days only to repair the stem and cat-heads, if the easiest way was resorted to. The cat-heads could have been put in in two days by working late, though that would probably have cost \$150 or \$200 more. The stem could be secured by an eyebolt through some part of the vessel that is solid, which would have made the vessel as secure as she was before. Witness had examined the boat, and it was evident that she had been damaged before and from the position of the boat he did not think it probable that the *Audacious* had touched her; though if she had, the damage done must have been small. The damage done to the woodwork would necessitate about 30 feet being taken away from the stem on the port side; there was not so much damage done on the starboard side. All the damage done would not entail the safety of the ship. None of the beams of the hurricane deck were broken; some of the stanchions

were started, and possibly the connection with the stem was broken. The boilers were in such a condition that they would not hold water, and new boilers would be necessary before she would be fit for sea. Witness was of opinion that the owner of the ship would have been glad to take \$40,000 for her before the collision.

In cross-examination witness stated that he had read the details of the damage done as stated in the petition; and if a new stem had to be put in it would necessitate the vessel being put in dock; and a new stem would cost some thousands of dollars. Witness' estimate was for repairs he considered necessary. To complete the repairs as detailed in the petition without a new stem would necessitate an expenditure of \$250 more than his estimate. He had not included the damage done to the topsail in his estimate; nor signal lantern, halyards and blocks. The witness thought that the estimate of \$1,400 was a "little steep." The fact of the vessel having her stem patched would not lessen her merchantable value; and when the repairs were completed the vessel would be as strong as she was before. It was as safe for the vessel to go to sea as ever it was so far as her hull was concerned. Witness could put the vessel out of hands in fourteen days if a new stem was not required; and in the event of a new stem being put in it would probably take twenty days to repair her. Witness could not tell the size of a sail any more than he could of a piece of chalk. He would put his opinion against Mr. McDonald's or any one else's so far as iron work was concerned. Witness thought that if a new stem were put in it would be to the damage of the ship.

To Mr. Dickins witness said he would withdraw his statement concerning the addition of \$250 as he had thought the petition mentioned 60 feet of wood-work, but on reference he found the petition only stated 30 feet of wood-work and 30 feet of iron heading, so that \$850 would meet the whole of the expense of the repairs with the exception of sails &c.

To the Jury witness stated that he could not say whether those parts which came into collision with the *Audacious* were in good order on the day of the collision.

G. A. Nutter was the next witness, and stated that he was a carpenter on board H. M. S. *Egeria*. He had been about 15 years in the service. He had served in several ships. Before entering the service he had been engaged in the Royal Dockyard. He had made a survey on the *Chiri Maru* the day after the collision, in connection with Capt. Johnson and Mr. Turner, chief engineer. He drew up a report with Mr. Turner; and had no idea of the damage until he saw it. The Captain of the *Chiri Maru* pointed out the damage done. He did not think the hull was injured. He had had some experience in iron-work as he assisted in building the *Egeria*. The estimate arrived at was in accordance with the Red Book which is supplied to the Navy.

Mr. Ness objected to any evidence of the Red Book unless the book was produced. The book was sent for.

Witness said his estimate of the damage done to the *Chiri Maru* amounted to £59.19. The broken part of the stem could have been repaired by what is termed a couple of butt-straps, one on each side, and rivetted. Two men would have repaired the stem in two days. Four men could not work on it. The cat-heads could be put in repair in two days. It was not absolutely necessary for the cat-heads to be repaired in order for the vessel

to be in a condition to go to sea. There did not appear to be much damage done to the boat, and witness did not see how the *Audacious* could have touched it. The damage done to the wood-work was not so serious as to prevent the vessel from going to sea.

To Mr. Ness:—Witness stated that he could not give an estimate of the damage done apart from the Red Book, as he was not aware of the cost of material and labour in this part of the world. He considered a patched stem as good as a new one, though he was unable to form any opinion of the value of the *Chiri Maru*. The *Chiri Maru* was quite fit to be towed to sea.

In re-examination witness said that no vessel would be safe if she broke away from the one that was towing her.

In answer to a question put by a juror, witness stated that the stem of the *Chiri Maru* was cracked before the collision.

To His Honour witness stated that the repairs could have been done at sea. The topmast being broken was not a hindrance to the *Chiri Maru* proceeding to sea. A new topmast could be made in two days. All that was necessary to be done to put the *Chiri Maru* in as safe a condition as she was in before the collision could be made in two days. As a carpenter he would have no objection to proceed to sea in the *Chiri Maru* if she was towed.

Charles Turner, Chief Engineer of the *Audacious*, deposed:—That he had been 25 years in the service. He had surveyed the *Chiri Maru*. On the first day he went in company with the carpenter of the *Egeria*; and on a second occasion he went with the Staff Commander of the *Audacious* to ascertain how far a report made by Lloyd's surveyor agreed with the actual damage done to the vessel; and also to examine her boilers to see if she was a vessel fit to go to sea or merely a hulk which would be required to be towed. He went a third time; and the damage was estimated at home prices: £30 was allotted for labour and £28 19s. for material. This did not include the topsail stated to be blown away. The cost of repairs here would be from two to three times greater than at home prices. He had called the attention of the Captain of the *Chiri Maru* to the defective state the stem had been in for some time previous to the accident. There were about 8-10ths fractured before the collision. Three blows of a 14-lbs. sledge would have broken off the stem. No portion of the hull of the ship was worked into that part of the stem. It would not have been unsafe for the *Chiri Maru* to be towed to sea in the condition she was in. But it would have been eminently unsafe for her to proceed to sea by herself before the collision. The stem would be stronger after being repaired than it was before. The vessel would be of more value after the repairs than she was before. The engines seemed to be perfect, though witness did not examine them, as he had no authority to do so. The boilers were totally unseaworthy, the furnaces being one mass of defects, so that there could be no steam raised; and in no sense could the vessel be considered a sea-going steamer.

To Mr. Ness witness stated that if the damage was estimated by local firms and sent to him to check, he would not allow eight hundred dollars. He knew the price of labour in Yokohama, but could not speak as an expert. He expressed his opinion generally. Estimates in Yokohama differed materially, as would be seen from the fact that one party had estimated the damage at \$400 and another at \$1,400, which witness thought

was a pretty wide margin. The vessel was unfit to proceed to sea before the collision, and if his interrogator wished, witness would give in detail why she was unable to proceed to sea.

Mr. Ness declined.

To Mr. Dickins witness stated that his experience as an engineer enabled him to form an opinion as to the value of labour and material in Yokohama. The stem being fractured, if the *Chiri Maru* had proceeded to sea, would probably have caused her loss if she had broken away from the vessel towing her. The Captain did not appear to know that the stem was fractured.

William Anderson stated that he was a ship carpenter in Yokohama. He had been on board the *Chiri Maru* to make an estimate of the damage done. He had given an estimate, which was \$750. He had been sent by the Mitsu Bishi Company.

To Mr. Dickins witness said that a patched stem would not take anything off the value of a vessel. At home stems of large vessels were usually scarfed.

To a Juror witness stated that he could do the repairs in eight days. To work only nine hours a day it would probably take ten days. He was prepared to take the contract on Monday morning and complete it in eight days.

William Castle, First Lieutenant of the *Audacious*, said that he was on board between half-past 6 o'clock and eight o'clock on the night of the eleventh. He was watching attentively the relative positions of the *Audacious* and the other men-of-war; and did not notice any change in their respective positions, and was quite satisfied the *Audacious* had not altered her position. About half-past seven he noticed the gale had somewhat subsided. Shortly after eight o'clock his attention was called to an order given to let go the starboard anchor. He went on deck to his station on the fore-part of the upper deck, to attend to the anchors. Before reaching his station he became aware that a second anchor had been dropped. It was possible on board the *Audacious* to feel a sensation as of a release from a weight, which was sufficient to convince him that it was an anchor which had been dropped. As he went forward he noticed men attempting to take steps to ease out or veer the starboard cable. He also proceeded to carry out an order that had been given him, to veer the port cable and also to prepare the remaining anchors for immediate service. All these things he immediately attended to. When he got forward he observed that the starboard anchor had been let go. On the port cable being veered the *Audacious* "took" her starboard cable. The *Audacious* was lying at single anchor and the *Tennessee* was moored with an anchor towards the wind. She was only riding at single anchor. He was much struck by the zealous manner with which all hands on board the *Audacious* did their duty. There was no confusion; and the orders given were not improper.

To Mr. Ness witness said the *Audacious* was at single anchor till about 8 o'clock. He had not observed the state of the barometer during the day. The anchor by which the vessel was secured was of the first power, and the cable was the best that was on board. All the cables were equally good. He did not know that men were stationed with hand leads. It was a standing order that they should be and they ought to have been. He was not on deck at the time the *Audacious* began to drift. He could not say the time that elapsed between when the *Audacious*

began to drift and the letting go of the second anchor. The distance between the two vessels was about 350 yards, or two cables. He did not think the *Audacious* could be pulled up before reaching the *Chiri Maru* even if the second anchor had been let go on the *Audacious* first drifting. The *Tennessee* was probably from 250 to 300 yards from the *Audacious*. It was impossible for the *Audacious* to collide with the *Tennessee* from their relative positions. The *Elisabeth* was from 400 to 500 yards from the *Audacious*. He had never sent word to the *Chiri Maru* that she was in a dangerous position, as he never imagined that the *Audacious* would feel the gale, let alone drift. He had no knowledge of what precautions were taken between 8 o'clock and the time of the dropping of the second anchor. Supposing the second anchor had not been let go when the *Audacious* began to drift, every precaution could not have been taken. The other anchors were not ready for immediate service. The second anchor was ready for immediate service. Whenever an anchor was secured witness reported to Captain Colomb. The last time that particular anchor was secured was at Nagasaki; but he observed that it was clear on the morning in question. It was not customary to heave an anchor to see if it was clear. The *Audacious* had no steam up between 6 and 8 o'clock. It would not have been a proper precaution to have had steam up between 6 and 8 o'clock. He thought it would have been improper. If steam had been up it would have rendered the collision less probable. He would withdraw his previous statement about it being an improper precaution to get up steam. If a second anchor had been put down in the evening it would have rendered the collision less probable though it would have been an unnecessary precaution, as the vessel was riding easily. It was possible to ascertain by means of hand-leads when a vessel was drifting. Witness did not go on board the *Chiri Maru* when the collision took place. He did not expect any thing extraordinary in the weather on the night of the eleventh. The weight of the second anchor was something over 95 hundred weight. After the collision the *Audacious* had two anchors down.

In re-examination by Mr. Dickins, witness stated he kept no watch. As first Lieutenant it was his duty to see what the condition of things were on board, and he was constantly looking after them. It was easy to tell by inspection whether an anchor is clear. On the evening of the 11th he had noticed that the anchor in question was quite ready for letting go. Without the wind materially shifting it was a physical impossibility for the *Audacious* to drift on to the *Tennessee*. Had the wind shifted to the S. or S. E. there was a possibility of the *Audacious* colliding with the *Tennessee* if the former drifted. Supposing the *Audacious* was riding at anchor and drifted suddenly, it would take more than four or five shackles of cable of a second anchor to bring her up. Under the circumstances it was not necessary to take other precautions than were taken. Not more than two minutes elapsed between the time of the order being given for the second anchor to be let go and the time witness felt the vibration. The anchor must have reached the bottom. It is a roadstead where the *Audacious* is lying; and it was customary for vessels to lie at single anchor in a roadstead as open as this at Yokohama. The measures taken on board the *Audacious* before and after the drifting were the same

as are usually taken in the service on similar occasions.

To the Jury, witness explained that the best course to adopt was to let the ship lie at single anchor and keep a second one ready for an emergency. The reason was that as a vessel sometimes rode ahead of her anchor, if the cable parted she would come back with a sudden jerk, which would bring a heavy strain upon the cable. On the other hand where an anchor was kept in readiness and dropped on the ship first drifting, the ship could be brought up quicker.

The Court at this stage adjourned till Monday, the 2nd prox., at nine o'clock a.m.

Monday, July 2nd, 1877.

This case was resumed this morning, when Frederick Augustus Johnston said that he was serving on board the *Audacious* in the capacity of Staff Commander. He had assisted in surveying the damage done to the *Chiri Maru*. The witness then recapitulated the items, remarking that but little damage was done to the catheads, and the hull was not damaged at all. The injury sustained by the *Chiri Maru* was, he thought, not sufficient to prevent her being towed to sea. If the ship had been in his charge and was required as a hospital for sick men he could have rigged temporary catheads in one day that would have sufficed for the time being. As a naval man the witness expressed his opinion that at the outside it would have taken not more than two days to repair the damage. The *Chiri Maru* was certainly not in a fit condition to proceed to sea before the collision; and, if she had broken away from the vessel towing her, she would have been at the mercy of the waves, though her fore and aft sails might steady her so as to enable her to be recovered again by the towing steamer. The attention of witness had been specially called to the condition of the stem, the greater portion of which was fractured before, probably three-fourths. At the place fractured there was a rivet or iron pin. The stem broken off did not constitute the hull of the ship, and its being broken did not effect the hull. It would have been very unsafe for the vessel to proceed to sea with the stem broken. Two butt-straps would have secured the stem sufficiently for the purpose; and if they had been put on the vessel she would most certainly have been stronger than she was before; and her value would not have been lessened in any degree. The report of the cost to repair the damage that had been given in by the carpenter was a fair one according to the Red Book. The practice was for a vessel in a roadstead like that of Yokohama to lie at anchor. Witness had twenty-five years service, and the practice had always been for large vessels to lie at single anchor. The object of mooring was to economize space, which was sometimes necessary when there are many merchant vessels ahead. It was not the custom on a man-of-war to have two anchors ahead, as it was dangerous in certain circumstances. The witness then explained in what way it would be dangerous, and gave a practical illustration of his meaning by means of two pieces of string attached to a board. He said that having two anchors ahead if the wind veered round, it would bring the strain upon one of the anchors and there was a great possibility of the cables becoming entangled. The practice of the service when it came on to blow was to send down top-gallant masts and see the second anchor was clear ready to let go; when the wind increased greatly to

put a lead over the side. It was not the practice of the service to let go a second anchor until an emergency occurred. The *Audacious* has two bar and two sheet anchors. Witness had been three years on the *Audacious* within five days, having been appointed before the vessel was ready for sea, and his experience was that when she was riding at anchor she was particularly steady, and nothing in his past experience led him to imagine that she would have drifted on the night in question. There was nothing in the bottom of the harbour to lead to the supposition the *Audacious* would drag: quite the reverse, as he had tried the bottom and found it to consist of thick black mud, and what he considered good holding ground. In a rocky, shingly, or sandy bottom he might have been apprehensive of danger. There was nothing in the weather on the night in question between 6 and 9 o'clock to lead the witness to suppose the vessel would drift, as he was under the impression it would moderate. There was nothing in the weather before nine o'clock to make it necessary to get up steam, and so far as he was aware no vessel in the harbour got up steam before that time. He, witness, was responsible for the safety of the ship to the Captain. It was his duty to assist the Captain in every way possible, and though he did not keep watch he was liable to be on deck all night if there was any danger. Suppose through negligence or any other cause the ship ran on shore, he would be liable to be tried by Court Martial with the Captain of the ship. If it could be shown that on such an occasion he had given right orders, he should hope to be exonerated from blame. On the night in question about 6 o'clock the weather was rainy and squally. Witness was on deck watching the weather till 6.30, and then, being perfectly satisfied in his mind that the ship was in perfect safety, he went to dinner; and during dinner the wind lulled, and he was still more satisfied the ship was in no danger. About 7.30 when going on deck, he looked to see if the ship was in the same position as when he left the deck before, and being perfectly satisfied he went into the upper battery and lit his pipe and was looking out of one of the large ports. While there he thought he heard the vessel drifting, and immediately ran up the ladder and gave the order to stand by the starboard anchor. This was between 8 and 8.30. In a few minutes the anchor was let go. The vessel was drifting very rapidly, so much so that it was evident something was wrong with the anchor. In weighing the anchor it was found that it had no stock, that the stock had been broken. This stock had been furnished in Hongkong; and was in order so far as witness was aware. The *Audacious* had her proper anchor lights on the night of the 11th. The precautions mentioned by the witness before as being proper on the occasion of a blow, were taken on the night of the 11th. It could not have been three minutes at the outside from the time witness observed the drift until the collision took place. There was no reason to suppose that the anchor was foul. It had been down a long time, and about a fortnight before the accident sail-drill took place, and it was blowing fresh at that time, and this tested the anchor in such a way as to make witness believe it impossible for her to drag, as it was ascertained afterwards the anchor was embedded in mud. There was not so much danger of fouling an anchor when it had been down a long time as when first let go. Witness had had a conversation with Captain Colomb about the safety of

the ship, and both arrived at the conclusion that she was quite safe. It was not uncommon for the wind to shift from the north to the south quite suddenly.

To Mr. Ness, witness said he had thought that on the night in question there would be a change of wind. His experience led him to make this assertion, that the wind shifted frequently in the harbour. A circular wind was the wind veering from one quarter to another; and on the night of the 11th witness thought there was a possibility of its shifting to the north. The barometer went down very low and got steady about 8 o'clock. When the barometer falls suddenly it also frequently rises as suddenly, very often with a shift of wind. He looked at the barometer about 5.30 p.m. To the best of his belief the conversation between him and Capt. Colomb took place about 6.30 p.m. When a blow comes on the barometer is logged every hour, and looking at the log was as good as looking at the barometer. Supposing a second anchor had been let go between 6 and 8 o'clock, it might have rendered the collision less probable, but it would have been unseamanlike, and if any accident had happened through letting go that second anchor he would not have been so clear to-day as he was. If steam had been up the collision would have been avoided, but there was no occasion for it any more than there was to-day. If sail had been made, the *Audacious* would have been lost, as she was a steamer and would not answer to sail like a ship. The witness ascertained the ship was drifting through observing the light-house light and the lights of other vessels. He was of opinion that it did not take more than three minutes to drift to the *Chiri Maru*. He had never said anything to the effect that the ship had been adrift before he observed it. Mr. Lingham was on watch; and it would have been his duty to have ordered the anchor to be let go, if he found the vessel adrift, and then report to the Captain. Lingham said he did not think the vessel was adrift. As a matter of fact he had no positive knowledge of how long the *Audacious* was adrift before he discovered it, though he believed that he saw her commence to drift. He believed there were hand leads over the side. It would depend at what rate the vessel was drifting as to the distance in which it would take to bring her up. If the anchor was in proper order and a second anchor was let go the vessel could have been brought up. The *Audacious* had ridden in heavier weather. She would not have drifted at the rate she did if the stock had not been broken. He could not in any way account for the breaking of the stock. It was not usual to lift an anchor to see if it was clear; that was a very old practice, entirely out of date now; and, in the event of doing so, the anchor would probably become fouled. When an anchor holds well it is unseamanlike to lift the anchor to see if it is clear. It took about three minutes in which to let the anchor go. The second anchor was astern of the *Chiri Maru* the day after the collision, but the wind had shifted somewhat. There was no probability of the second anchor fouling the chain of the *Chiri Maru* from the way in which it was let go. It is possible for the starboard anchor to be let go in a minute and a half. The *Tennessee* was moored on the night of the 11th, and was probably a cable and a half distant. He did not know the merchantable value of the *Chiri Maru*.

To Mr. Dickens witness stated that he had seen operations in the dockyards at home. The *Tennessee* was moored, but was no more

secure than if she had been lying at single anchor. A party was sent on the *Chiri Maru* the morning after the collision to haul her up, and her position might have been altered, which would account for the anchor being found astern. He had no reason to suppose that the *Audacious* was drifting before the moment he observed it. He had about twenty or thirty feet to go from where he was smoking to where he had to give the order to let go. The anchor was perfectly clear at the time. It would not be proper for a man-of-war to get up steam unless there were some extraordinary circumstances to warrant it.

To the Jury witness stated that no one besides the officers and men of the *Audacious* had seen the broken anchor. Had two anchors been down and one given way, the probability was that the sudden strain brought upon the other anchor would have caused the cable to part. The *Chiri-maru* was anchored in a perfectly safe place.

Recess till two o'clock.

On the Court resuming its sitting this afternoon,

Alfred Smith, an able seaman, was called and certified that he recollected the 11th of June. He recollected seeing the starboard anchor on the evening of that day. It was ready for letting go and would not take more than two seconds to let go after an order had been given.

To Mr. Ness witness said that he knew nothing about the drifting. He was called to assist in veering the port cable and let go the starboard anchor. He did not assist in letting go the starboard anchor because it had been let go. He jumped on board the *Chiri Maru*, and did not say anything to any one on her to the effect that no one on the *Audacious* knew when she did drift.

Mr. Dickens objected to the form of Mr. Ness' questions, on the ground that whatever was said by the witness on board the *Chiri Maru* was not admissible evidence of any negligence on the part of Captain Colomb.

Mr. Ness argued that the witness was acting under the orders of his superior officers, and was an eyewitness to some extent of the collision.

His Honour sustained the objection. Mr. Ness continued his cross-examination of the witness, who stated what had led him to take notice of the second anchor. He did not know what time the starboard anchor was let go.

Alfred Arthur Chase Parr, Commander on the *Audacious*, said he had served in the Arctic expedition. He said he recollected the evening of the 11th instant, and then proceeded to relate what occurred on board. The manner in which the Captain of a man-of-war obtained information as to the condition of the ship was to give orders to subordinate officers who would see them carried out and then report. The officers of a man-of-war are appointed by the Admiralty; and the general rules of the service were observed on the *Audacious*. As Commander of the ship he kept no watch. His duties were to look after the interior of the ship and report if anything went wrong. He satisfied himself that the starboard anchor was clear. If witness had reason to believe that the anchor was not clear, it would have been his duty to report to Captain Colomb. It was not his especial duty to see that the anchor was clear but he merely

satisfied himself as a precautionary measure. If the anchor had been found not to be clear witness would not have been responsible.

His Honour thought that upon this last answer, the evidence of the witness relating to the anchor ought to be struck out.

Mr. Dickens asked that it be allowed to stand on the minutes.

Witness here stated that it would be his duty to report to Captain Colomb if the anchors or any other part of the ship were not in good condition, and having satisfied himself that the ship was safe he went below, got his pipe, then went on the upper battery to smoke. While there he heard that the ship was drifting. He immediately ran out and asked if the second anchor was let go: ran forward, and the anchor was let go just as he reached the fore-castle. He then went aft again, and saw the ship was near the *Chiri Maru*, and shortly afterwards the collision took place.

The witness was then questioned as to the custom of the service when a vessel was lying in an open roadstead, and corroborated the testimony already given in regard to it. Nothing occurred to lead the witness to suppose the anchor was fouled. When it was weighed the anchor came up minus the stock. He would prefer lying at single anchor on a windy night, as was the usual custom of the service. If the *Chiri Maru* had had one anchor down and veered 100 fathoms of chain she might have avoided the collision.

In cross-examination witness said that if two cables were straight ahead they would assist in sustaining the strain of the vessel. But if two anchors were down at different angles there would be a greater strain on each of the cables than if the vessel were lying at single anchor. Witness thought about one minute had elapsed from the time he heard the vessel was drifting until the anchor was let go. He thought it would have been difficult to bring up the *Audacious* on the night in question considering the circumstances in much less than a quarter of a mile. The *Tennessee* was moored and one anchor was lying useless. Most probably if steam had been up the collision would have been averted.

To Mr. Dickens witness said that Captain Colomb was invariably in charge of the ship when on board. It was possible for a ship on such a night to veer 100 fathoms of cable in ten minutes. If the *Chiri Maru* had had her chains clear the presence of the *Audacious* would have impeded her veering, unless she had been veering before, in which case it it would have been different. If the stock to the anchor had not broken, witness did not think it probable that the *Audacious* would have drifted. If all four anchors had been ahead of the ship it would have lessened the probability of the collision, but that was certainly not a necessary precaution to take.

To the Jury, witness said it was possible to have two anchors straight ahead. If the *Chiri Maru* had been a rock no other precautions would have been taken than were taken.

In answer to His Honour witness said that supposing two anchors were ahead at an almost equal strain, and one parted, it would throw such a strain upon the other as to cause it to break.

Captain P. H. Colomb, was next sworn; and he stated that under ordinary circumstances the starboard anchor could be let go in three or four minutes. When an emergency was anticipated the bower anchor is prepared to be let go at one or two seconds' notice. The two after anchors are called the sheet anchors

and could scarcely be got ready to let go under ten or fifteen minutes. Sheet anchors were only for letting go after the bower anchors are let go. In a gale of wind one of the sheet anchors was usually prepared in case it was required. On the night in question the *Audacious* had been riding at her port bower anchor, and the other was prepared to be let go at a moment's notice. The chains were almost as heavy as any in use. Each anchor had over 200 fathoms of cable. If a ship is lying at single anchor the ship will swing round the anchor and describe a circle. Men-of-war never have two anchors directly ahead close together. If a man-of-war intends to lie with two anchors down she must moor. He explained the process of mooring. Men-of-war never moor when they have plenty of space, except when they are in what is called tide-ways. In tide-ways or where anchors are liable to foul, it is usual to moor. Men-of-war in anchoring have to think of two things, their own safety in drifting, and the drifting of other men-of-war, so that a ship lying in the neighbourhood of another heavy ship must see that she does not in anchoring throw it out of her power to keep clear in case the other drifts. The *Chiri Maru* had taken measures to provide for her own safety from drifting but did not allow for the possibility of another ship drifting. The Captain of the *Chiri Maru* had stated that he might have got out of the way of the *Audacious* if he had only one anchor down instead of two. Though a vessel was safer to have two anchors down than one, in one respect, she was in greater danger than if she had two. It was twice as difficult to veer two cables as it was to veer one. The custom of the service was never to let go your second anchor unless there was reason to distrust the first one. There was nothing in the weather to lead him to suppose that there was any danger of the vessel drifting up till 8 p.m. He had been three years Captain of the *Audacious* and over 30 years in the service. During those thirty years, and more especially during the past three, he had been in the constant habit of riding at single anchor. On the night of the 11th there was not a heavy sea. The *Audacious* rode out the rest of the night with two anchors, the disabled anchor and the starboard anchor. When mooring, as shown in a diagram produced by the witness, he said that in the event of one anchor giving way there was a probability of the other cable snapping. Anchoring at single anchor is preferable to mooring because two anchors are parted with and one of them may be rendered useless, and then another would have to be got ready, and in the event of a ship drifting down there would be three cables to veer; and in case of having to slip the cables she would have only one anchor left to bring her up. There were no reason to suppose the anchor the *Audacious* was riding by was foul; and when the anchor was raised there were no indications that it had been fouled. The nature of the bottom was soft sticky mud, almost the best possible holding ground. On the 11th of June he was on board the *Audacious*; and during the afternoon he received constant reports of the barometer and watched very carefully the Aneroid barometer in his cabin. From these observation and reports, up to about 3.30, he drew the inference they were in for one of the ordinary blows usually experienced here. As the barometer continued to fall he thought there might be a possibility of something more. As the wind lulled he thought the blow was probably over; or if it did blow again that the wind would come from some other quarter. No

reports were made to him, but there were some conversations about the weather, the ship, and so forth. The standing rule is that whenever a breeze of wind comes on, the lead is cast over the side and a look out kept for drifting; and when the top-gallant masts are sent down, the spare anchor is usually looked to. He had been at work in his cabin during the afternoon and noticed the rising wind, and he went on deck several times to see what the situation was, and more especially to see that the anchor was clear. Witness then explained how he observed whether the riding anchor was clear or not. It was a habit of his to watch the anchor and see that it was not fouled. Every preparation was made during the afternoon for a blow. At a quarter past seven he went to dress for dinner, and he thought there was a probability of its lulling altogether. Some three quarters of an hour afterwards word was brought to him that the ship was dragging. He went out of his cabin and met several of the officers who informed him that the second anchor had been let go. Witness repeated the order to let go the starboard anchor. He ran forward to see that the men were at their stations for veering cable and called out that both presses were to be manned. He went on the highest part of the deck and from there saw the *Chiri Maru* on the port quarter about a cable or a cable and a half off. He then went aft to the bridge so as to be in his usual place for receiving reports and issuing orders. He saw that from the rate he was approaching the *Chiri Maru* the *Audacious* would very probably foul her if the latter did not bring up. He also came to the conclusion that the anchor was broken. He had never seen the stock of an anchor injured in a muddy bottom before, and shortly after the port quarter of the *Audacious* came in contact with the starboard bow of the *Chiri Maru* to the extent perhaps of 12 feet. He thought that before coming to the *Chiri Maru* he had issued orders to stop veering on both cables. He then sent some hands on board the *Chiri Maru* to try and veer her cables, but the two ships remained more or less in contact for some considerable time, first as described, and secondly with the starboard quarter of the *Audacious* in contact with the port bow of the *Chiri Maru*. He sent blacksmiths and others on board to endeavor to separate the ships. The reports were that the cables could not be got clear. If the *Chiri Maru* had veered 105 fathoms of chain when the *Audacious* was observed approaching, the collision might have been averted. If the *Audacious* had been brought up shortly after the collision, it was possible for the accident to have been averted. If the *Chiri Maru* had slipped her cable the collision could have been averted, but it would have been an unseamanlike thing for her to do, as both her anchors were down, though if she had only had one anchor down it would have been the proper thing to do. Witness here drew a diagram of the relative positions of the vessels after the collision and by it explained how it was that the port anchor of the *Audacious* had got astern of the *Chiri Maru*, which was through the fact that the latter had been shifted nearer to her anchor in order to allow the *Audacious* to get up her port anchor. Witness then explained his theory of how the anchor became broken. In letting the anchor go, he surmised that one end of the stock must have penetrated the mud, and that though the flukes were partially buried still they lay flat. A sudden jerk or strain coming upon the cable the stock broke and the

anchor then slid along the mud. He did not think that it was necessary to get up steam on the night of the 11th. The *Tennessee* was moored and riding at one anchor. The *Atalante* was riding at single anchor. Every order had been given that the occasion required. As on every well regulated man-of-war there were rules on the *Audacious*, which were carried out by the officers without any special instructions from him, witness. He explained that the Captain of a man-of-war is always in command of his vessel though not always in charge. Unless the Captain took the charge of a ship out of the hands of the officer of the watch, he, the officer of the watch, was responsible for the ship. Hence when witness went below at 7.30 he was not in charge of the ship though in command. If the officer of the watch had been to blame for the drifting he should say so in this Court and so terminate the case in his, witness' favour. But having made very minute and careful enquiries into the conduct of every person concerned under his command, he was able to say that the economy of the ship was worked with its usual clock-like regularity; and if he himself was not to blame for the collision most decidedly nobody else was. Having witnessed the damage done to the *Chiri Maru* he was of the opinion that if he had to tow the ship to sea on the fourteenth he should certainly have taken her. But unless he had good steam power and plenty of cable, he would have been sorry to have towed the *Chiri Maru* to sea even before the collision. She was only a mere hulk, and if she broke loose would be in a helpless condition. It would not have been proper for a vessel to go to sea with three-fourths of her stem broken. Some time on the following day three gentlemen, one of whom gave his name as Mr. Krebs, called upon him, representing themselves to be the agents or representatives of the Mitsu Bishi Company. He thought Mr. Jones was one of them. They said that they had come to settle the matter of damages. He was exceedingly busy at the time and very anxious for the interview to be short, and remarked that he would pay the bill. They asked if he would appoint assessors and he replied, no. They claimed demurrage, but witness stated he knew nothing about demurrage, but that if they were anxious to go to sea they should repair the vessel and send in the bill, and it would be paid, which was the usual custom. They again claimed demurrage and were referred to the Consul. And when they were going away he told them to repair the ship and send in the bill, and the only thing that should lead to litigation would be an unfair demand. They did not specify any acts of negligence on his part. The result of the interview was that the three gentlemen left. They afterwards made some communications to the Consul but none direct to witness. (Documents produced and read. One claimed \$300 per day as demurrage until the claim was satisfied.) These documents were answered, and the claim for demurrage disputed. The Mitsu Bishi Co. refused to accede to the proposal made by witness. No personal demand had been made upon him to pay the amount of damage and demurrage until the service of the petition. It was the custom of the British Government to pay for damage irrespective of liability.

Mr. Dickins asked the witness what was the daily expense of the *Audacious*.

Mr. Ness objected to the question on the

grounds that it did not touch any of the issues of the case.

Mr. Dickins contended that he had a right to introduce any evidence which would assist him in his address to the Jury.

Objection sustained.

Mr. Ness asked the witness if he thought, if the *Audacious* had been moored on the night of the 11th, that she would have retained her berth; and he replied that he could not answer. If the *Audacious* had been secured according to diagram 3, (two anchors ahead) she might have retained her position. If she had been moored as represented in diagram 4, the probability was she would not have retained her berth. Witness recollected having a conversation with Captain Johnstone, and was under the impression the subject of letting go a second anchor was introduced. The *Tennessee* was moored, and in her case a third anchor was subsequently let down. He knew the state of the barometer between six and eight o'clock—up till half-past seven, and it was falling. It was easy for a ship to drift a quarter of a mile in three minutes. He could not say, in the witness box, how long it took the *Audacious* to drift. He was not informed of the *Audacious* drifting until after she had commenced to drift. He could not say who was the first to discover the vessel drifting. He could not say how long it would take to pull up the *Audacious* after she commenced to drift. The distance of a quarter of a mile, would, if the anchor bit, be a long distance, but it would depend when the anchor did bite. Men stationed with hand leads could ascertain almost at the moment when a vessel got adrift. He did not attach negligence or mismanagement to any one on board the *Ohiri Maru*, though he thought it was imprudent anchoring outside men-of-war and in letting two anchors go. The rules of seamanship in the merchant service and navy were alike, though in other ways the navigation differed materially. He did not offer a direct sum of £100 to the Mitsu Bishi as compensation for damage done. An offer of some kind had been made by Mr. Robertson. He was not, in the technical sense, in charge of the *Audacious* between half-past seven and half-past eight. By being technically in charge he meant by naval law, which did not make him responsible when not in charge.

To Mr. Dickins witness stated that it could not have been longer than a minute and a half after the order was given till the anchor was let go, so far as he could remember.

The Court here adjourned till to-morrow morning, the 3rd instant, at ten o'clock.

TUESDAY, JULY 3RD, 1877.

This morning Mr. Dickins called

G. T. M. Purvis, who stated he was a retired Captain in H. M. Navy and had had thirty years experience in the service. He had also held the post of Harbour Master in Yokohama for three years, and had become familiar with the weather in Yokohama and Japan generally, and was acquainted with the modes of anchoring in this or any other harbour. It was quite common for the wind to shift suddenly from N. to S. or E. to W. He recollected the evening of the 11th inst., though he was not in Yokohama at the time. In the event of a high wind rising, a prudent seaman would make provision for a shift of the wind. If the barometer went down and then became more or less stationary—

Mr. Ness objected to the question put by Mr. Dickins, as it was putting the answer into

the mouth of the witness, and was a leading question; and apart from that fact the substance of the question was not in evidence.

Mr. Dickins finally agreed to have the question struck out; and put it in another form viz: in the event of the barometer falling would he expect a change of wind?

Witness replied that he would. If the barometer was rising and again fell he would also expect a shift of wind. He was in the habit of watching the barometer daily. In this or any other harbour it was always his practice. When in command of a man-of-war he should prefer lying at single anchor to mooring. It would not be right to lie with two anchors ahead.

Mr. Dickins asked the witness if in the event of a blow coming on in a harbour like this he would put down two anchors or keep one in readiness to be let go?

Mr. Ness objected, alleging that the question was a leading one.

Mr. Dickins admitted that the question was a leading one, but argued that the evidence of Captain McDonald gave sufficient ground to justify him putting the question in that form.

Mr. Ness withdrew his objection.

The witness stated that he would keep one anchor ready for an emergency and lie at the other one. If he had reason to distrust the anchor by which he was riding he would let go the second anchor. If he had no reason to distrust it he would not let the second one go.

To Mr. Ness witness said that all four anchors might possibly have to be let go and steam got up. This would depend entirely upon the strength of the wind. He could not say whether it was requisite or not to lower two anchors on the night of the eleventh. The lowering of a second anchor was of course to strengthen the position of the ship.

Mr. Ness asked whether the witness considered it more important to take steps to maintain the berth the vessel occupied or to take steps to provide for an emergency which might never occur.

Witness said he did not understand the meaning of the question. He was not lawyer enough. So far as his experience went he were always taking steps against emergencies, both on shore and afloat.

Mr. Ness: That'll do! We don't want a speech from you.

Witness thought it was of equal importance to provide for a vessel keeping her berth and to provide for drifting. He could not say whether one was more important than the other. Under some circumstances it might be ascertained that a change of wind was about to take place without looking at the glass. A resident might be able to ascertain when a change of wind was about to take place without looking at the glass. Glasses were not always infallible in Yokohama. He might "guess." at the weather on a squally day and act upon his "guess." He quite comprehended the meaning of the term "guess." A guess was a guess. He understood it to be forming your own conclusion on certain grounds. That was his idea of the meaning of "guess." He did not know what the legal meaning might be. He had never served on board an ironclad. He believed it was a prevalent custom of merchant ships to let go two anchors, but he did not consider it added to their safety in any way. In Yokohama he should certainly lie at single anchor, except he took up an inside berth or anchored among the merchant shipping, when he would probably moor. If

lying at single anchor and it came on to blow he might, when the wind had reached sufficient strength, let go a second anchor, but it would have to be blowing very hard before he would do so.

To Mr. Dickins witness said he would not let go his second anchor in an ordinary blow, and neither would he let go a second anchor while he thought he was safely riding by his single anchor. It would be a very hard blow which would induce him to let go his second anchor. He thought he was at Inushima on the night of the eleventh. What one man would think a hard blow another might not. He should consider a hard blow was the beginning of a good typhoon, and a very hard blow he should consider a typhoon. After the wind had reached a second point he should probably drop a second anchor under foot. According to the figures used in the service he might drop a second anchor when the wind reached between 10 and 12.

To the Jury, witness said that when he left Yokohama the *Audacious* was lying where she is now. He never knew a hulk to lie outside of men-of-war.

Mr. Dickins called Lieut. Lingham, but the jury arose and informed His Honor that they did not think any more evidence was necessary.

Mr. Lingham was consequently not examined.

Captain Colomb was recalled and was about to make a statement, when

Mr. Ness objected on the ground that it was rather an irregular proceeding.

The point the witness wished to state was that a great number of the ships lying in Yokohama on the night of the 11th were riding to a single anchor, although many of them were moored.

To Mr. Ness witness said that he derived this information from his own experience.

This concluded the evidence; and Mr. Dickins proceeded to address the Jury for the defence.

All the witnesses having been examined, Mr. Dickins addressed His Honour and the gentlemen of the Jury.

He said that he would make his remarks as short as possible, and expressed his regret at so much time having been taken up in producing such an amount of frivolous evidence as had been adduced, but it was absolutely necessary on his part to produce it on account of the position taken by the opposite side. He did not seek to cast more blame on the plaintiff for instituting the proceedings other than that of erroneous judgment, brought about no doubt by the counsel given by his advisers. But the circumstances of the case had to be taken into consideration. In the first place, he mentioned, four things were demanded. First a demand was made, as was shown by the letter from Mr. Jones for a sum of \$1,400 for actual damages done to the vessel, besides \$300 per day until the claim of the plaintiff was satisfied, that was until his client thought fit to accept the proposals made by the plaintiff, whether that was for months or for years. How such an unwarrantable demand had ever been made he could not say. In the petition, however, the time for which the \$300 per day was demanded had been limited to twenty days. But under no circumstances was the demand for \$300 per day justifiable. This was proved from the fact that the Counsel for the plaintiff had ascertained that the demand was exorbitant and reduced it to one half, taking the blame of making the mistake upon himself; and how, in the face of the contract entered into with the Postal Department, the plaintiff ever had the cheek

to ask \$300 per day demurrage Mr. Dickens could not understand, and he could only put it down at a base attempt at extortion. He was obliged to make these remarks, because if he did not he would not be doing justice to his client. The learned gentleman then proceeded to state that under no circumstances was Captain Colomb responsible; and the claim was brought personally against his client, thereby seeking to make him pay the amount claimed out of his own pocket. Mr. Dickens felt it imperative to show what kind of a man the plaintiff was. He, the plaintiff, represented himself as constituting the Mitsu Bishi Company, and he alone. It was well known that in almost all countries there were laws regulating the formation of companies. If there was no such law in this country there could be no companies; and if there was a law then this Mitsu Bishi Company was not established according to that law. The plaintiff had made some most extraordinary statements about the Government having made him a present of 17 or 18 ships, which were absurd, for no Government ever did make such unconditional presents. Then he had proceeded to say that he was a partner in the Mitsu Bishi Iron Works, but did not even know the name of his partner or partners. It was evident, therefore, from the evidence of the plaintiff that the Mitsu Bishi Co. was a Government concern, and that the plaintiff was a mere pasteboard partition between the Government and the people. The learned gentleman then went into the question of damages. He reminded the Jury that the defendant in any case could only be responsible to a certain extent for his own act, and if that act could have been prevented or mitigated by the complainant, and was not, a great deal of the responsibility was taken off the defendant. Then, the only thing which prevented the *Chiri Maru* from going to sea was the damage done to her catheads and stem, which damage could have been repaired in two days; this was evident from the testimony of the Captain, who said that if those repairs had been executed the vessel could have proceeded to sea, though in reality she was not, before the collision, a sea-going vessel. None of the witnesses for the plaintiff had ventured to assert that she was seaworthy, and all the testimony produced by the defence stated plainly to the contrary. Still, though not fit to proceed to sea by herself, she might have been towed, but if she had broken adrift there was no question but that she would be at the mercy of the waves. Anyhow she could have been put in such a condition in two days as to fit her for being towed. The learned Counsel then drew attention to the circumstance that the *Chiri Maru* was to have been towed by the *Amakusa Maru*, a vessel which had herself come to grief, and was forced to return to Yokohama, so that in any case the damaged vessel would have been unable to proceed to her destination; and the plaintiff ought to consider the damage done to the *Chiri Maru* an actual benefit, as she might have been lost altogether if she had been taken in tow by the *Amakusa Maru*. Mr. Dickens then read the contract to the Jury and explained its terms. He said it was not such a contract as would justify the plaintiff in making such an exorbitant claim. There was no time mentioned in the contract as to when the vessel was to start, or when her services would not be further required, the latter being merely referred to in the general term of "when the war would be at an end." It was not a charter-party, and neither was

it a contract which could justify the plaintiff in claiming consequential damages. If the contract had been a regular charter-party, then the defendant's position might have been somewhat different. However, at the most, all that could be claimed would be the actual profits arising from the engagement of the vessel at the rate of \$150 per day; and it must be remembered that the plaintiff would have to pay the cost of towing the vessel to Nagasaki as well as other expenses. Mr. Dickens then explained the distinction between an action brought against Captain Colomb and against the ship *Audacious*. In the one case the one would have to pay the damage, if a verdict was given against him, out of his own pocket; while in case of a verdict being given against the ship the British Government would have to meet it. Therefore, as the present action had been brought against Captain Colomb personally, a gross act of negligence on his part would have to be shown in order to implicate him in any way. Now no such negligence had been shown, neither against Capt. Colomb nor against any of his subordinate officers: he felt charged not only with the reputation of Captain Colomb but with the fair fame of the *Audacious*, and so took that opportunity of showing that the evidence exonerated all the officers. The defendant had not brought any charge of negligence against the Captain or officers of the *Chiri Maru*, though it was manifest that a certain amount of unreadiness and imprudence had been shown on their part.

Mr. Ness objected to these remarks but

Mr. Dickens maintained that he was justified in making them in case a verdict should be given against his client, in which case he was bound to show that there was at least imprudence on the part of the *Chiri Maru*, as that fact would necessarily mitigate the damages brought against his client.

His Honour thought Mr. Dickens' remarks justifiable.

The learned gentleman proceeded to state that the evidence showed the place where the *Chiri Maru* was anchored was outside the men-of-war, a position which it was exceedingly imprudent for her to take up three days before she anticipated going to sea; and there was no necessity for her to have moved from the position which she had previously occupied close in shore, where she was in comparative safety. In nearly all harbours there were special regulations for the guidance of vessels anchoring, but in Yokohama there were none, owing to the absence of a Harbour Master; and the present case was a good illustration of the necessity of having a Harbour Master and proper regulations. In the absence of such regulations H. M. men-of-war usually anchored as far outside as was possible; and if merchant vessels would go in close proximity to them it was like the earthen pot coming in close quarters with the iron pot. According to the evidence of Captain Maies it took fully ten minutes for the *Audacious* to drift down: therefore it was evident that a fair time had elapsed in which some steps might have been taken to get out of the way. But no steps of any importance were taken to effect this. It was true they veered out 75 fathoms of chain, but they might have veered out 105 fathoms; and only seven or eight men went on deck out of the whole crew to assist in veering the cables. Another point of the evidence showed that if the cables had been slipped or unshackled, the ship would have drifted astern, and the collision would consequently

have been avoided; while the *Chiri Maru* could have been brought up with the anchors she had on board. On the night of the eleventh nearly all the vessels in harbour were lying at single anchor and none of them drifted except the *Audacious*; and, according to the testimony of Captain Colomb and his officers, if the *Chiri Maru* had only had one anchor down instead of two the collision might have been averted, as the vessel would have taken the cable veered out or the cable could have been easily slipped. It was therefore over caution for the *Chiri Maru* to have two anchors down, and consequently imprudent. For this the plaintiff was responsible, as there was a wide difference between his servants and the officers of the *Audacious*, so far as their relative connections were concerned in relation to the plaintiff and defendant. In the one case the officers of the *Chiri Maru* were the servants of the plaintiff, while in the other case the officers of the *Audacious* were not the servants of Captain Colomb but of the Government. He did not choose them, but had to take what was given him; and consequently he was not personally liable for any negligence on their part; while on the other hand the plaintiff was personally responsible for any acts of negligence on the part of his servants. The learned gentlemen then cited some cases in support of his argument, one of which pointed out that negligence had been proved on both sides, and in consequence of this a verdict was given for the defendant. Mr. Dickens then continued his remarks alleging that the facts of the case showed clearly that the *Chiri Maru* had not taken the steps which might have been taken to render the collision less probable, but had taken precautions which were unnecessary.

Recess till two o'clock.

Mr. Dickens continued his address in the afternoon, and drew the attention of the Jury to the fact that, if they gave a verdict against his client, they could only put the amount of damage at the lowest estimate, which was \$750. He then referred to the stem having been fractured before the collision, as was proven by the evidence of the Chief Engineer of the *Audacious*, Mr. Turner, and several others; and argued that in consequence of this fracture the *Chiri Maru* was in an unfit state to proceed to sea before the accident, as the stem was a most important part of a ship. The learned gentleman then referred to the more important part of the case, namely the charge of negligence brought against his client. If any negligence had been exhibited on board the *Audacious*, which he maintained had not been the case, it certainly was not on the part of Captain Colomb; and his client was not responsible for any negligence on the part of his officers. On those grounds he claimed a verdict in favour of his client. He then proceeded to show the Jury the various ways of anchoring a ship. When a ship was lying at single anchor the ship revolved round in a circle of which the cable was the radius, and the ship was always in the best position for resisting any strain brought upon the cable. Mooring was somewhat different though it actually was riding at single anchor, and was only resorted to in order to economise space, which was an advantage in a crowded harbour. Another way of anchoring was to have two anchors ahead, but vessels never resorted to that method if they could possibly avoid it; and if they ever did do so they got out of the position as quickly as possible, a fact which could be easily explained as when a ship

revolved there was great danger of the anchors fouling; and a fouled anchor was a serious thing. Then, when a vessel had two anchors down half her holding power was gone, and the advisability of having half the anchoring power overboard was a question for seamen to settle. The learned gentlemen then illustrated the circumstances of a ship moored, and why it was that the strain on the two cables, when the vessel was at an angle of 30 degrees, was greater than when a vessel was lying so as to get a longitudinal strain upon one cable; after which he wished to refer to a book on seamanship.

Mr. Ness objected, and

His Honour sustained the objection.

Mr. Dickins continued, and stated that in the event of a storm a vessel was much safer lying at single anchor than she would if moored. If the evidence of the plaintiff's own witnesses was referred to it would be seen that it bore out the position taken by the defendant. Captain McDonald could not refer to any authority to back up his statements concerning the best method of anchoring, and simply gave his opinion against the opinion of the whole world; and had even gone so far as to state that if Captain Colomb had anticipated a change of wind, he would not have done wrong to lie at single anchor. Captain Colomb's action in this respect was borne out by good seamen and was justified by the rules of the service. If the anchor of the *Audacious* had dragged then the defendant would have been in a different position to what he was now, but as it was it did not do anything of the kind, but drifted; and the whole of the circumstances showed most clearly that it was drifting and not dragging that was the cause of the accident. There was nothing on the night in question to cause any anxiety to Captain Colomb; and it should be remembered also that nearly all the vessels in the harbour were lying at single anchor. After citing several cases in support of his contentions, Mr. Dickins alluded to the state of the weather on the night of the 11th. He asserted that it was only what was nautically termed a "strong breeze" that was blowing at the time. He then concluded his address by reiterating that every needful precaution had been taken on board the *Audacious* to prevent the vessel dragging. He contended that it was no more necessary to take precautions against drifting than it was for a man to take precautions against being struck by lightning. And, besides this, Captain Colomb was not in charge of the ship at the time she began to drift, and consequently was not liable to a suit at law. After referring to the offer made by Captain Colomb to the agents of the plaintiff, he asked the Jury to give a complete verdict in favour of his client. He also called special attention to the fact that if the Jury gave a verdict against his client, he, Captain Colomb, would have to pay the whole amount out of his own pocket, and in all probability it would never be refunded by the British Government. He did not ask for favour but for justice.

The learned Counsel for the defence having concluded his arguments,

Mr. Ness addressed His Honour and the gentlemen of the Jury.

He said he would dismiss the sentimental grievances of the defendant before proceeding to the merits of the case. Although it was true that \$300 a day was at first claimed as the loss of profit arising out of the collision, this claim was reduced before an action was even threatened, when a request was made through himself against the de-

fendant simply to reinstate the vessel and reimburse the plaintiff to the extent of his actual loss during the time the vessel was in the hands of the ship-builder. It was true the action was brought against Capt. Colomb, but this in no way indicated a desire to saddle him with the loss apart from the vessel. The law required it should be taken against the captain on duty at the time the collision occurred, and the Government in such cases was morally bound to indemnify its agent; but the right of the injured party to redress was paramount to these considerations. The third grievance that the *Audacious* had been detained was equally groundless; for no proceedings were instituted or had been thought of, nor indeed had this Court the power, to detain either the vessel or the captain. Having proved the facts that the *Chiri Maru* was run into while she was lying at anchor, that she was properly moored and carried a proper anchor light, the burden was shifted upon the defendant to explain and excuse the collision. It was not for the plaintiff to prove negligence on the defendant's part, nor indeed had such been alleged. It was for the defendant to excuse himself if possible by proving "inevitable accident." Inevitable accident was, according to the ruling of Dr. Phillimore in the *Pladda* case, "that which the party charged with the offence could not possibly prevent by the exercise of ordinary care, caution, and maritime skill. It will be no excuse to aver that he could not prevent the accident at the moment it occurred, if he could have used measures of precaution that would have rendered the accident less probable, not that would have prevented the accident occurring if it of necessity must have occurred, but that would have rendered it 'less probable.'" The Jury would apply the evidence adduced to this definition, and considering the circumstances say if that defence had been made good. It seemed to him that, considering the state of the weather, there was an absence of proper precaution in not having let go a second anchor between 6 and 8 p.m.: in the fact that those on board the *Audacious* did not know when she began to drift: in that steam was not up so as to provide against an emergency; and in the lack of expedition displayed in letting go the starboard anchor after the fact of drifting was discovered. In considering as to the propriety of having let go the second anchor between 6 and 8, the circumstances to be kept in view were, what was the state of the weather? how was the *Audacious* then anchored? and would the dropping of the second anchor have rendered the accident less probable? The weather was admittedly squally, and the glass which had been falling all day gave indications of an increase of bad weather: the *Audacious* was riding at single anchor; and it is admitted that the second anchor would have rendered the collision less probable. It is at the same time alleged by the defendant that the second anchor was unnecessary because the wind had lulled and because he expected a change of wind. This implies that in a continuation or increase of the weather, and that if no change of wind was anticipated, a second anchor would have been properly dropped. Now the evidence shows it was bad enough to warrant a consultation at 6.30 between Capt. Johnstone and the defendant about dropping the starboard anchor; but they resolved not to do so because a change of wind was anticipated, but they had no reason for arriving at the conclusion that the wind would change. In the words of Captain Johnstone he made a "guess." He did not then consult the glass; and upon

this "guess" they acted in not letting go the second anchor. The fact of the consultation at 6.30 is sufficient to show that it might have been a proper precaution then, and the continual falling of the glass, at the time unknown to them, demonstrates that it would have been an ordinary precaution. Captain Colomb in his testimony (which was given with dignity and with the greatest clearness) rendered intelligible to non-nautical people that which was doubtless present to the mind of his officers (but which they failed to express in ordinary language, even in reply to simple questions which they seemed to misunderstand because they were not addressed in the jargon of their own profession) the advantage of using two anchors in different ways. But his evidence will not satisfy you that the use of two anchors ahead, in the manner indicated in diagram 3, was not proper on the evening of 11th June. He tells us, and so does Captain Purvis, his witness, that it depends upon the state of the weather whether or not two or more should be let down. And in considering whether the state of the weather rendered this course advisable on 11th June, it should be kept in view that it is of more importance that the *Audacious* should have kept her berth, than that she should provide against an emergency which might never occur. The immediate safety—that of keeping her berth—was that which should have received primary attention, an ultimate possibility, a remote danger—that of drifting—was of secondary consideration, while in this case the order was reversed. In the face of these facts it is scarcely necessary to refer to the evidence of the four nautical witnesses, Messrs. MacDonald, Fletcher, Scott, and Maies, called for the plaintiff, all of them men acquainted with this harbour, and having a distinct recollection of the state of the weather, who state that undoubtedly a second anchor should have been dropped on the evening in question. And in this they are confirmed by the fact that the *Tennessee* did so.

Considering the state of the weather, and more especially in the face of the "guess" that the wind would shift, it would have been a proper precaution to have had up steam, the use of which it is admitted would have rendered the collision less probable. There is the strongest possible evidence that proper precautions were not taken to ascertain if and when the *Audacious* drifted. There is no evidence that men were stationed with hand leads in the usual manner, and of course had there been these men would have been called; while there is evidence to show that Captain Johnstone, not the lieutenant in charge, was the first to discover the fact of her having drifted; and he does not know how long she had been adrift before he knew it. Of course had the drifting been discovered the moment it took place, and had the second anchor been let go within the two seconds (the time within which it can be done) after the drifting, and before the *Audacious* had gained any headway, there can be no doubt that she could have been pulled up long before she reached the *Chiri Maru*. In the last place, the delay of three minutes (according to the lowest estimate taken from the defendant's evidence) in letting go an anchor which could have been let go in two to five seconds, and the non-readiness of a third anchor, indicated a lack of expedition and want of proper precaution for which no excuse has been offered. If Captain Colomb's surmise that the *Audacious* could have drifted down upon the *Chiri Maru* within three minutes be correct, it follows that the second anchor was only let go at the moment of the collision.

These facts, it seemed to him, pointed out most conspicuously not only that the defendant had failed to establish the defence of inevitable accident but showed that several precautions which would have been prudent and proper, and would have probably averted the collision were omitted. He would now address himself to the subject of damages. The plaintiff simply claimed reinstatement of his vessel and actual loss of profits during the repairs. The plaintiff was entitled to have the *Chiri Maru* repaired, even if these repairs left her of greater than her former value. The defendant had no right to repair her in a manner to reduce her former marketable value. If they thought a patched stem would not diminish that value Mr. Sander-son's or Mr. Whitfield's estimate would doubtless be adopted. If they thought a new stem necessary, then Robertson's valuation would be taken. The extent of loss of profit would depend on whether or not a new stem should be supplied. It has been proved that the vessel has been chartered at \$150 a day. This is the extent of his loss of profit, and the time during which he is entitled to this sum is the time during which she would be in the hands of the shipbuilder. In estimating that time, they would not only consider what repairs were necessary to enable her to go to sea; but some repairs being necessary for that purpose they should all be done at the same time, and the time requisite for that purpose ought to be calculated also. Besides, the hulk was to be used as an ammunition store the moment she reached her destination; and while being so used the repairs could not prudently be entered on. Mr. Ness then pointed out that his actual claim was much less than the real loss, which embraced the loss of \$150 a day from the 11th June until she reached the seat of war, which she could not now do for 14 or 20 days at least, when probably the contract would now be annulled altogether. The plaintiff's claim was conspicuously reasonable, and in no way compensated his loss. Every exertion has been used to arrange the matter amicably before coming into Court, but unhappily without success.

Wednesday, July 4th, 1877.

His Honour, on the opening of the Court this morning, read the following address:—

Gentlemen of the Jury:—

The issues before you in this case are simple enough. The plaintiff says he is owner of a vessel called the *Chiri Maru*; that that vessel was lying in this harbour with two anchors down on the evening of the 11th of June: that while so lying H. M. S. *Audacious*, of which the defendant is captain, drifted towards the *Chiri Maru*, came into collision with her, and caused damage to her. The plaintiff then claims a certain sum for the damages, and he claims a further sum for demurrage for the time, he says, it would take to get those damages repaired. The defendant does not deny that the *Audacious* so came into collision, and caused damage to the *Chiri Maru*; but he says the collision was the result of an inevitable accident. He says, moreover, that the plaintiff is not the owner of the *Chiri Maru*, and, in addition, that the *Chiri Maru* was not, on the night in question properly found.

The action, as you have been frequently reminded, is against the defendant personally, and not against Her Majesty's ship; and I shall here refer to a point which has been referred to by the Counsel on both sides, namely, the possibility or probability of the damages in this case, if given against the

defendant, being repaid by Her Majesty's Government; but I shall refer to it only to ask you to dismiss it from your mind altogether. It is a point which ought in no way to influence you in coming to a decision. You ought not to give a verdict for the plaintiff through any belief that Her Majesty's Government would pay the amount, nor ought you to refrain from giving it through any belief that the defendant would have to pay it out of his own pocket. These are considerations which ought, and I am sure will, be laid aside by you in coming to your verdict. You will also lay aside all questions as to the negotiations which preceded the bringing of the action. The only questions you have to consider are:—Whether the plaintiff or the defendant is entitled to your verdict? and, if you come to the conclusion that the plaintiff is entitled to your verdict, how much he is entitled to receive?

Now, gentlemen, the first point which the plaintiff has to establish, in order to entitle him to a verdict, is that he is the owner of the *Chiri Maru*. For, if he is not the owner, then he is not any more entitled to bring this action than you, or I, or any other stranger unconnected with the vessel, would be. On this point you have the evidence of the plaintiff himself. His evidence will be fresh in your recollection, and, although you may consider some parts of it strange, as no part of it has been contradicted, and as there is his positive statement that he and he alone is the owner of the *Chiri Maru*, it would be unsafe, gentlemen, to arrive at a conclusion at variance with that statement.

As the fact of the collision is not disputed, and the fact that the *Chiri Maru* received some damage by the collision—how much will be afterwards considered—and as it is admitted that the defendant was in charge of the *Audacious* at the time of the collision, the onus lies upon him to establish the defence of inevitable accident which he has set up. And “in order to establish a case of inevitable accident”—I quote the judgment of Privy Council [“Despatch,” 3 L. T., (N. S.) P. C., 220]—“he who alleges it must prove that “what occurred was entirely the result of “some *vis major*, and that he neither contributed to it by any previous act or omission, nor when exposed to the influence of “the force had been wanting in any effort to “counteract it.”

Now, gentlemen, it will be for you to say upon the whole evidence whether that defence has been established.

I think, gentlemen, from the uncontradicted evidence on that subject, I am not trenching on your province to suppose that you will find that the cause of the drifting was the breaking of the stock of the anchor. You have evidence before you of the fact that when the anchor was taken up the next day the stock was missing, and you have evidence that the breaking of the stock would probably cause the drifting, and you have no other cause whatever assigned for the drifting; and the drifting, it is agreed on all hands, was the cause of the collision. So far, gentlemen, you have the collision caused by an accident. The question is: Was it inevitable or could it have been avoided? The Counsel for the plaintiff after hearing the defence, suggested four points upon which he considers the defence has not been made out—or four precautions which were not taken, and which if they had been taken would have prevented the accident. These four points were stated by him generally as if against the ship, and are as follows:—

- 1.—That a second anchor was not let go between 6 and 8.
- 2.—That steam was not up in case of emergency.
- 3.—That hand-leads were not down, and that the fact of drifting was not discovered as soon as it ought to have been.
- 4.—That after it was discovered that the ship had begun to drift the second anchor was not promptly let go.

The first two of these precautions, it is admitted, were not taken, and the only questions to be considered with regard to them are: first, whether if they had been taken the collision in all probability would have been avoided, and whether they were such precautions as the defendant ought to have taken?

The rule upon this subject was laid by the Privy Council in a case which was cited by the Counsel for the defendant. It is there stated:—“the master is bound to take all reasonable precautions to prevent his ship “doing damage to others. It would be going “too far to hold his owners to be responsible “because he may have omitted some possible “precaution which the events suggest he might “have resorted to. The true rule is that he “must take all such precautions as a man of “ordinary prudence and skill, exercising “reasonable foresight, would use to avert “danger in the circumstances in which he may “happen to be placed.”

Keeping this in view, gentlemen, you have to consider the question of letting go the second anchor. I shall not trouble you with a repetition of what has been already said more than once on the general question of the respective advantages of mooring and of lying at single anchor. On the general question, Captain Colomb's evidence—given with a lucidity and terseness which leaves nothing to be desired—disagrees in no point that I have been able to discover with the evidence of any of the other witnesses. It has also the merit of disentangling the real issues on the subject from the extraneous questions which I cannot but think occupied a little too much of our time. I take it, gentlemen, that there is no evidence that (apart from the question of the particular anchor) Captain Colomb did otherwise, than as any good seaman would have done in having down one anchor and one only up to the time it came on to blow on the 11th of June, and the only point in controversy is whether it would not have been under all the circumstances a proper precaution for him to take to have let go a second anchor at some time previous to the moment the *Audacious* went adrift. Now the first and most important consideration in arriving at a conclusion as to the letting go of a second anchor is the holding power of the first anchor, and the probability of that holding power being exerted. Besides these considerations Capt. Colomb's evidence suggests two competing considerations which ought to weigh with any one who had to decide such a question. The one is:—what ought he to do to avoid the contingency of his ship drifting against another ship? and the other:—what ought he to do to provide against the contingency of another ship drifting against his ship? This would be a simple enough question, if we had the position of all the ships and were to suppose the wind would not change. If he had no other ship ahead of him and expected no ship to arrive which might anchor ahead of him and had a ship right astern of him, inasmuch as he would not be in danger of any ship drifting into him, and he might be in danger of

drifting into another ship, the most important thing to attend to would be the keeping of his ship in the berth she then occupied. If, on the other hand, he had a ship ahead of him and no ship astern of him, then, inasmuch as a ship might drift down on his ship, but his ship could not drift down on another ship, the most important thing to attend to would be the keeping of his ship ready to get out of the way. Now, gentlemen, if the only object to be gained were to keep a ship in her place, I do not think there is anything to show that two anchors would not be more efficient than one. On the other hand, if the object is to have the ship ready to get out of the way, this can be done better if she has only one anchor down than if she has two, and having got away she is better off if she has left only one of her anchors behind her than if she has left two. Up to this point I do not suppose there will be any serious difference of opinion between any of the witnesses. But the question is not so simple, there is the contingency of the wind shifting, which would reverse the position of the ship, and, with it, the relative importance of her keeping her berth and of her being ready to leave it. Now, the contingency of the wind shifting is one of a greater or less degree of probability according to circumstances, and upon the degree of the probability of that contingency happening, and upon the imminence of the contingency would depend the necessity of providing against it. To take an extreme case,—if you were certain that the wind would change at once, you would be bound to take scarcely any precaution against the danger to be apprehended in your then position. For instance, if you had a vessel astern and none ahead of you, if you were certain the wind would change at once to the opposite side of the compass, you would take only precautions against that vessel drifting against you. If it were certain it would never change, or would not change until the blow was over, then you would take precautions against the danger arising from your then position, and against that danger only: for instance, if you had a ship astern of you, you would take precaution only against drifting against that ship. The importance of making provision against such a contingency varies between these extreme points, but rarely touching either. But there is this to be borne in mind, gentlemen,—that as one never can have the same certainty of what will happen as of what exists, if anyone fails to take precautions suggested by existing circumstances because he anticipates a change of those circumstances, he ought to be able to show that his anticipation was well founded. I hope I have made myself clear upon the point. I have gone into it at some length, because of a case which has been cited by the Counsel for the defendant, in which the judgment of the Privy Council with reference to the circumstance of that particular case, said that, as it was more important that the vessel then in question should keep her berth than that she should be in a condition to provide for an emergency which might never arise, every means of holding the ground ought to have been first secured. That was a judgment, gentlemen, on the facts of that particular case. The Privy Council were considering facts as well as law. They were both judge and jury, and I am satisfied that except to the extent I have indicated they were laying down no rule of law as to the duty of shipmasters.

You have then, gentlemen, in order to determine whether the defendant ought to have let go a second anchor before the

moment of drifting, to consider the evidence as to the following points:—

1.—The holding power or efficiency of the first anchor.

2.—The probability that that holding power would continue to be exerted.

3.—The position of the *Audacious* with regard to the *Chiri Maru* and other vessels.

4.—The force of the wind up to the time of drifting.

5.—The probability of the wind changing.

Now, as to the holding power of the first anchor. The evidence against the holding power of the anchor is the fact that it did not hold. You have on the other hand, the theory of Capt. Colomb to account for it. But all this information was available only after the event, and the question, moreover, is not whether the anchor was actually defective, but whether Captain Colomb knew it was defective, or had the means of knowing and ought to have availed himself of those means, and did not do so.

Lieutenant Castle says:—"The anchor by which we were anchored up till 8 was of the 1st power. It was the best anchor we had on board. The cable was the best. Our cables were all equally good."

Captain Colomb's evidence was to the effect that the four anchors, the two bower anchors and the two sheet anchors, were of equal size, the cables of the same size, but of different length, the two bower anchors having each 200 fathoms cable, the starboard sheet anchor 100 fathoms, and the port sheet anchor 75 fathoms.

Then, as to the stock of the anchor:

Staff Commander Johnston says:—"That was a stock made at Hongkong. The whole stock was gone. It was the *Iron Duke's* spare anchor stock. This was furnished to us by the Dockyard at Hongkong. There was nothing wrong so far as I know. If there had been anything reported I should have to survey it. We survey anchors every six months."

Capt. Colomb says:—"The stock was made at Hongkong." Upon the point of the efficiency of this anchor Capt. Colomb was not cross-examined.

I may say, gentlemen, on this evidence, so far as I can see, there appears to be nothing to show that Capt. Colomb ought to have been suspicious of the efficiency of the anchor that was down, but that is a matter for you to determine.

Then, as to the probability of its holding power continuing to be exerted:

The only circumstance suggested by the evidence that I can see which would excite any suspicion of it not continuing to hold would be a suspicion that it was foul.

I shall not go into all the evidence as to the propriety of sighting an anchor occasionally to see whether it is foul or not. You have the evidence on one side that it is usual with merchant ships, and on the other side, that it is never done on board men-of-war. The evidence against the propriety of the practice goes to two points:—1st, that by sighting anchors in harbour there is a greater danger when they are again let go that they will foul than there was on the first arrival of the ship. You will remember Commander Parr's evidence on this point. 2nd, that the fact of them being foul can be sufficiently ascertained without sighting them. It will be for you, gentlemen, giving such weight as you consider justified to the evidence, to consider whether Captain Colomb ought to have suspected the anchor to be foul or was right in being satisfied that it was not foul. You will remember

ber Captain Colomb's theory of the anchor stock breaking is, that it was not foul but had in some way got embedded further in the mud than the flukes, and the lower part perhaps in stiffer mud, and offering greater resistance at last yielded to a sudden strain. But whether you accept this as the correct theory or not, the question remains the same—it is not whether the anchor was foul, but whether Captain Colomb was justified in being satisfied that it was not foul; you have Captain Colomb's statement, that he had no reason whatever to suppose that the anchor was foul, and that if it had been foul it would have turned over.

Staff Commander Johnston says:—"I had certainly no reason to believe the anchor we were lying by was foul. We had every reason to believe it was clear. We had been lying to that anchor a long time. On a Monday, a fortnight before the occurrence, the usual sails for sail evolutions were set. It was blowing a little fresh then, and I judged from the holding with the strain then put on the cable and the way the ship rode to her anchor that the anchor was perfectly clear. After an anchor has been a long time down there is less danger of its fouling in the bottom we were in, by reason of the anchor becoming embedded in the mud and the chain sweeping over it without touching it. I had consultations with the Captain that day as to the weather, and we came to the conclusion she was safe as she was. We were perfectly satisfied she was perfectly safe." And Commander Parr says:—"There was nothing on that day or previous days that excited any suspicion in my mind that the anchor was foul."

You have next to consider the position of the *Audacious* with the *Chiri Maru* and other vessels. I think, gentlemen, there is no dispute on this point, that at the time of the drifting and for some time at least before it, the *Audacious* was in the hawse of the *Chiri Maru*. There were at that time no ships in the hawse of the *Audacious*, but there were some which might be brought so as to be in the hawse of the *Audacious* if the wind shifted.

You have, now, gentlemen, to consider the question which has given rise to the greatest variety of opinion between the witnesses, the force of the wind up to the time of drifting. Gentlemen, if I have fairly appreciated the evidence, there are two points on which there is a difference of opinion: first, as to whether, independent of the necessity of providing against ulterior consequences, the wind was of such force as ought to have suggested the propriety of letting go a second anchor, and, second, whether giving due weight to the contingency of a change of wind it was a prudent thing to refrain from dropping a second anchor. On this first point, Mr. Maies, the master of the *Chiri Maru*, said that he considered it a matter of ordinary precaution, and let go his second anchor at 6.30. Mr. McDonald says:—"I think if a vessel were riding at single anchor a second would be advisable when it came on to blow hard. It was blowing hard at seven o'clock as far as I remember." Mr. Scott says:—"In the case of a merchant vessel, it would have been a proper precaution to have let go a second anchor on the night of the 11th at 6 o'clock." Mr. Fletcher said:—"On the night of the 11th the master of every merchant ship would let down a second anchor." On the other hand, Lieutenant Castle says, on cross-examination:—"I did not think the *Audacious* with such good anchors and good chains could feel the wind, much less

drift," and he repeatedly, on further cross-examination, gave it as his opinion that the dropping of a second anchor was an unnecessary precaution.

Staff-Commander Johnston said:—"There was nothing in my past experience to lead me to suppose she would drag her anchor on the night of the 11th."

Captain Purvis said:—"I might let go a second anchor between a whole gale, a storm and a hurricane." Captain Purvis could give no evidence as to what the force of wind was in Yokohama that night; but the evidence of other witnesses will enable you to come to a conclusion as to whether the wind had reached what is called a storm. On the second point, whether giving due weight to the contingency of a change of wind it was a prudent thing to refrain from letting go a second anchor, you have the evidence of Mr. McDonald, who said, on cross-examination, that "if Captain Colomb's refraining from dropping a second anchor was based on a supposition that the wind might shift, he would not consider that Captain Colomb acted wrongly." The point in this question, in which, as it appears to me, he differs from the witnesses for the defence, is that he would not from his experience have expected the wind to shift. If this view is correct, and it is for you to determine, the only point which you have left to determine is whether Captain Colomb did base his action on a probable change of wind, and how far he was justified in doing so. On the first point, you have Captain Colomb's positive statement that he thought, when it lulled, the wind was over, but that if the wind did increase it would come from another quarter. On the second point, the probability of the wind shifting, you have Mr. McDonald's opinion, and, against that, you have the opinion of Staff Commander Johnston, his general opinion derived from experience of the harbour, and his opinion that on that night he expected a change of wind, and remarked so to Captain Colomb. You have the opinion of Captain Purvis: He says:—"I held the post of Harbour Master for three years in Yokohama. During that time I became familiar with the prevailing weather both here and on the coast. I am acquainted with the usual mode of anchoring vessels in roadstead or harbour. In my experience it is very common for the wind to change, broadly speaking, from N. to S. I remember the night of the 11th June. In the event of a high wind rising a prudent seaman should make provision for a shift of wind. If the barometer went down and then became more or less stationary, it would lead me to expect a change of wind. If with a North wind the barometer falls I should certainly expect a shift of wind from the opposite quarter, and *vice versa*. If the barometer was rising and then falling I should also expect a shift of wind. I am in the habit of watching an aneroid barometer which I have at home several times a day."

I think, gentlemen, I have called your attention to all the material points for your consideration in arriving at a conclusion whether Captain Colomb, exercising ordinary prudence and skill and reasonable foresight, ought, in the circumstances under which he was placed, to have dropped the second anchor before the moment of the collision.

On the second point, namely, the propriety of having had up steam, you will say, first, whether if steam had been up the collision would probably have been averted; and, second, whether Captain Colomb, exercising ordinary prudence and skill and reasonable foresight, ought, under the circumstances

under which he was placed to have had steam up before the moment of the collision.

You will on the one hand have to bear in mind what I have said with regard to the letting go of the second anchor, that it is not enough that this is a precaution which the event suggests might have been resorted to. You are to look at the circumstances before the event. On the other hand, you are to pay no regard to any rule of the Admiralty which was hinted at rather than expressly mentioned in the evidence as to economy of fuel. If he had fuel, and it appears he had, as he got up steam afterwards, any fear of censure by the Admiralty would not exonerate him in this Court—if you come to the conclusion that otherwise he ought to have had steam up. I shall not go over the evidence of having steam up; it went principally to the point of the possibility of avoiding accident by having steam up. Nothing has, so far as I am aware, been said about other vessels having got up steam, but, as to the necessity, you have Lieut. Castle's evidence who considered it unnecessary, and Staff Commander Johnston's to the same effect. If there is any evidence that it would have been a proper thing to do under the circumstances it has escaped me, but I am sure your memory will supply any omission.

We have now to consider whether the precaution of having leads down was actually taken, and if it was not whether Captain Colomb was to blame for the omission. Now, as to the lead lines being down, you have the evidence of Staff Commander Johnston, who says on cross-examination:—"According to my experience the practice of the service 'when it comes on to blow in a roadstead like Yokohama is (1) to send down top-gallant-masts and yards; (2) to clear away the other anchor ready for letting go. Wind increasing, put lead over side. That is a precaution in case of dragging.' And, 'I was told there were men with hand-leads. I believed there were. I asked.' * * * 'The precautions I mentioned as proper precautions in the event of a blow were taken.' Captain Colomb says:—"It is a standing order when a breeze is expected that the leads 'are put over the side.' * * * 'But having made, as it is the Captain's duty to do, very minute and careful enquiry into the conduct of every person concerned under my command, I am able to say that the ship with 'the economy of the ship was worked with 'its usual clocklike regularity, and that, if 'I am not myself to blame for the collision, 'most distinctly nobody else is.' And again on cross-examination, in reply to the question:—"Do you know whether men were 'stationed with hand leads between $\frac{1}{2}$ past '6 and 8?' he said:—"Of my own knowledge or report? Of my own knowledge, 'no.' This is, I think, all the evidence on the subject.

If you should find that the leads were not down, you will consider, as in the case of the second anchor and the steam, whether if they had been down the collision would probably have been avoided, and you will consider this question in connection with the question whether the fact of drifting immediately discovered on its happening.

You will then consider whether it was a proper precaution. On this point you will have no difficulty; and then you will consider whether it was the duty of Captain Colomb to have seen the men stationed. You will remember this, that is, if you believe the evidence on the point which is uncontradicted, that Captain Colomb was not in charge for some time at least before the moment of collision.

Then comes the question:—Was the fact of drifting promptly discovered and if not was Capt Colomb to blame for its not being discovered?

On this point you have the evidence of Staff Commander Johnston, who says:—"About 'half past 7, when going on deck, I looked 'if the ship was in the same position as when 'going on deck before, and being perfectly 'satisfied went into the upper battery, port 'side, and lit my pipe, watching out of the 'port hole. Looking out, the ship appeared 'to be drifting—the position seemed to alter. 'I ran up the ladder at once, told the boat-swain's mate, 'watch, stand by the star-board anchor!' and almost immediately, 'Let go!' I think it was about 8.15. It 'was between 8 and half-past 8. The anchor 'was let go, I should think, almost immediately. I met the Captain and told him I 'had taken the responsibility of letting go 'the starboard anchor.' * * * 'Between 'the commencement of the drifting and the 'collision—I should think three minutes—from the time I saw her drift till the collision, it might have been three minutes at 'the outside.' * * * 'I can't say how long 'the ship was drifting before I saw it, but I 'think that I noticed it at the moment. I 'base that opinion on the fact that I was 'looking at the lightship and lights of vessels. I should say she went adrift at the time I noticed it. The *Audacious* drifted 'very rapidly. I cannot say the speed. I 'know it was very rapid."

We now come to the moment of the collision, and the question is, first, whether the anchor was promptly let go, for if it was neither Captain Colomb nor any one else is to blame for want of promptitude. But if you should come to the conclusion that it was not promptly let go Captain Colomb would not be liable unless there was some default on his own part.

As to the anchor being promptly let go, you have the evidence of Staff Commander Johnston, who says:—"About half-past 'seven o'clock when going on deck, I looked 'if the ship was in the same position when 'going on deck before, and being perfectly 'satisfied went into the upper battery, on 'the port side, and lit my pipe, watching 'out of the port. Looking out, the ship appeared to be drifting, the position seemed 'to alter. I ran up the ladder at once, told 'the boatswain's mate, 'Watch stand by the 'starboard anchor,' and, almost immediately, 'let go.' I think it was about 8.15. It 'was between eight and half-past eight. The 'anchor was let go, I should think almost 'immediately. I met the Captain and told 'him I had taken the responsibility of letting go the starboard anchor."

(On cross-examination):—"I can't say how 'long the ship was drifting, before I saw it, 'but I think that I noticed it at the moment. 'I base that opinion on the fact that 'I was looking at the lightship and 'lights of vessels. I should say she went 'adrift at the time I noticed it. The *Audacious* drifted very rapidly, I cannot say 'the speed. I know it was very rapid." (Referring to what he had said. Between the commencement of the drifting and the collision I should think three minutes. It might have been three minutes at the outside):—"When I said from the time I saw 'her drift until the collision might have 'been three minutes I misunderstood the 'question, I meant three minutes from the 'order being given to let go the anchor 'until it was let go. I cannot tell how long 'it was from the time she began to drift

"until I gave the order to let go. It was as quickly as possible."

"Q.—Can you tell me what time elapsed from the first commencement of the drifting until you discovered it? A.—I cannot tell beyond doubt, but my impression is I saw her the moment she commenced to drift. From the moment she drifted until the anchor was down I should say was three minutes. From the time I gave the order until the collision took place I cannot say what time elapsed." * * * Commander Parr says:—"Having satisfied myself that the ship was in safety I went down below again for a few minutes, got my pipe and came into the upper battery to smoke. There I heard that the ship was drifting. I immediately ran outside the battery, asked if the second anchor was let go, ran forward, and the anchor was let go just after I got to the fore-castle. I then came aft again, found the ship nearing the *Chiri Maru*, and very shortly afterwards the collision took place" * * * "I don't know at what hour the *Audacious* began to drift. The first I knew of the *Audacious* being adrift was I heard she was adrift. From the time I heard it until the starboard anchor was let go was, I should say, about one minute."

Alfred Smith says:—"I remember the 11th of June this year. I remember seeing the starboard bower anchor that day. I saw it at half-past six, if anything, before that. The tackles were hooked on to the levers for letting it go. I took about two seconds to let go in that condition."

(On cross-examination by Mr. Ness):—"I cannot explain three minutes having elapsed between the order to let go and the letting it go. I know nothing about the drifting of the *Audacious*—what time she drifted. When we were piped to our duty I was shifting my clothes. The duty we were called to was to veer cable and let go the starboard anchor. The first I knew of the drifting was when I saw the steamer on her port quarter. I came directly I was piped, my duty was to get up the deck stoppers—that would take three or four minutes. I did not aid in letting go the second anchor, when I came on deck. It had been let go."

Captain Colomb says:—"I came and had another final look at half-past seven. Came to dinner: it usually occupies there quarters of an hour. The midshipman of the watch came down and reported the ship dragging. I ran on deck, met the Staff Commander, the Commander, and officer of the watch, and sent the officer of the watch forward to repeat the order given by the Staff Commander to let go the starboard anchor. I ran forward myself to see that the men were at their station for veering cable, and I called out to take care that both compressors were manned, so that they might veer on both cables. I ran up again to what is called the upper battery, the highest part of the ship. From there I saw the *Chiri Maru* on our port quarter, and from a cable to a cable and a half off. That estimate is the merest guess in the world. * * * From the moment of my being informed of the fact of drifting and my giving the order to let go can only have been a few seconds; and a minute and a half from the time of my being aware of the fact of drifting until the anchor was let go." I do not think much is to be got by any minute examination of the evidence as to the time she was drifting from her anchor until she came into collision with the *Chiri Maru*: none of the witnesses look-

ed at a watch, and that is not to be wondered at, and in such circumstances as the witnesses were placed, an estimate of time must be very difficult. Then there is the fact of the anchor being found the next day: where it was found you have had Captain Colomb's experience of that, and you will say whether with that experience the finding of the anchor, when you may decide as a fact that it was found, is consistent with a prompt letting go of the anchor immediately after the commencement of the drifting. As to the damages, gentlemen, the rule is that the vessel should be reinstated to her previous condition. You will consider, gentlemen, whether a new stem is necessary for that purpose or not. As to the amount you have the evidence of Mr. Robertson, who says \$1,400; of Mr. Whitfield \$850; of Mr. Anderson \$750, of Mr. Whitfield and Mr. Turner who say that at home (exclusive of the topsail) it would cost £58.19, and that prices here are found to be three times as much. Mr. Whitfield's estimate and Mr. Anderson's estimate include a new stem; the other three are on the stem being scarfed. You will say, gentlemen, how much would be the cost of making her as good as before, and if there is any difference you will also say what the cost would be of making her of the same merchantable value as she was before the collision. Then, as to time, Mr. Robertson estimated it would take 20 days to complete the repairs, that is, including the putting in of a new stem.

Mr. Whitfield says:—"If the stem were repaired in the quickest way to make it sufficiently strong, the catheads and stem might be finished easily in four days. The catheads might be put in by working late in two days, and if the forestay could be fastened elsewhere it all could be done in two days; that would have nearly doubled the cost of that portion of the work. It might have cost \$150 or \$200 more" * * * (Cross-examined by Mr. Ness) "Repairing the stem, I would put down 14 days as necessary; with a new stem 20 days would I think not be unreasonable. Mr. Anderson says:—"My estimate for doing all the repairs is eight days. I intended to work till ten o'clock p.m. and begin early in the morning. At nine hours a day it would take ten days. It would not have increased my estimate to do it in eight days. I have nine years' experience in Yokohama. I do not think scarfing the stem has been done for some years in Yokohama, but I have seen it done at home. I think my workmen could do it in eight days. I was prepared to take the contract on Monday morning." Mr. Nucher and Mr. Turner are agreed that the ship could be fitted for sea in two days by repairing the catheads and stem in two days. They give no estimate, however, for the time which would be occupied by the whole of the repairs. You will then say how many days it would take to fit the ship for sea, and how many to execute all the repairs, and you will say what profits per day the vessel would lose by being detained."

The following are the questions put to the Jury by His Honour at the conclusion of his charge. They embody all the points and issues raised in the case.

1.—Is the plaintiff owner of the *Chiri Maru* mentioned in the pleadings?

2.—If a second anchor had been let go from the *Audacious*, between 6 and 8 o'clock, would that in all probability have prevented the collision?

3.—Ought under all the circumstances such second anchor to have been let go?

4.—If it ought so to have been let go, was the defendant in charge of the *Audacious* at the time when it ought to have been let go?

5.—If steam had been got up on the *Audacious* before she began to drift, would the collision in all probability have been avoided?

6.—Ought under all the circumstances steam to have been got up?

7.—If it ought to have been so got up, was it the duty of the defendant to give the necessary orders to have steam got up?

8.—Was there any other precaution or were there any other precautions which if taken by the defendant would in all probability have prevented the drifting of the *Audacious* on the occasion in question?

9.—Ought the defendant under all the circumstances to have taken such precaution or precautions?

10.—Was there any other precaution or were there any other precautions which if taken by the defendant would in all probability have avoided the collision?

11.—Ought the defendant under the circumstances to have taken such precaution or precautions?

12.—Was the second anchor let go as promptly as possible after the *Audacious* began to drift?

13.—Was the defendant in charge of the *Audacious* at the moment that the *Audacious* began to drift?

14.—Did the defendant give the order to let go the second anchor as soon as he was made aware of the ship drifting.

15.—What is the cost of reinstating the *Chiri Maru* in the state she was in before the collision?

16.—How long would it take to execute all the repairs at the cost named?

17.—How long would it take to execute such repairs as would have rendered the ship as fit to go to sea as she was before the collision?

18.—Was the *Chiri Maru* properly found?

19.—If she was not properly found did her being not properly found contribute to the collision in the first instance?

20.—Did it contribute to the damage after?

21.—Were the leads properly let over the side of the *Audacious* at the time of the drifting?

22.—If not would their being let over the side in all probability have averted the collision?

23.—If not was any precaution omitted by the defendant in respect thereto which under the circumstances he ought to have taken?

After the conclusion of His Honour's address the Jury retired. In about 45 minutes they returned and declared their inability to arrive at a unanimous decision. His Honour expressed regret, and finally invited the gentlemen to retire again, which they accordingly did, and after being locked up for an hour and a half returned, and informed His Honour that the only question they could agree upon was the amount of damages. The point then arose, should the verdict of the Jury be taken on the damages? which, however, was ultimately considered impossible, and His Honour then discharged the gentlemen of the Jury, at the same time expressing his regret that the labour of six days should thus be lost.

IN THE JOTO SAIBANSHO, TOKIO.

BEFORE HIS HONOUR THE CHIEF JUDGE.

Friday, June 29th, 1877.

THOS. ROSE & Co. vs. FUJIKURA ZEMPACHI.

The defendant in this case appeals against the Judgment of the Yokohama Judicial Court, rendered on the 18th of January last, when the defendant was condemned to pay the sum of \$900, with interest from the day when it fell due, and he to take delivery of certain machinery; with the option of paying an indemnity of \$200.

This was the second hearing of the appeal.

The Court opened at about 9.30 a.m. when His Honour informed the appellant and respondent that the minutes of the evidence as taken down at the previous hearing would be read over, and that each party would be permitted to correct any errors, after which each would affix his signature to the minutes.

When this was accomplished His Honour asked the appellant if he had any further evidence to offer or anything further to say.

The appellant stated that he had nothing further to say.

The same question being asked the respondent, his attorney, Mr. Goble, said that he thought one important item of the evidence given in the former hearing had been dropped out of the minutes, viz., the testimony of Mr. Rose and his servant to the fact that while he was holding the boilers and engines as bound by his contract with Fujikura Zempachi, he had an offer from another party of \$1,500 for the same articles.

Then Mr. Goble summed up the evidence. He said that Mr. Rose claimed that his contract with Zempachi was an absolute one, and that there were no conditions about the forfeiture of the bargain money and the cancelling of the agreement as was claimed by Zempachi in his petition of appeal. This position is clearly established in the evidence of Zempachi himself, for when questioned in Court about the conditions of the agreement he confessed it; and also in a letter from Zempachi to one Okawa dated October, 1877, which was handed into court he stated that he had bought a boiler and engines from Thos. Rose & Co., and that as the person to whom he was intending to sell the same had failed to take delivery he wished Okawa to sell it again for \$1,500.00.

This evidence is also corroborated and strengthened by the testimony of Thos. Rose and his servant Matsunage Yasutaro, who concur in stating that after much conversation and after several interviews on the 16th Sept. 1876, Zempachi did positively bargain to take the boiler and engines for \$1,000 within 60 days and then paid \$100 bargain money, and that on the third day after the expiration of the 60 days, Zempachi came again, begging Mr. Rose to allow him 40 days more, and offering \$100 more for the extension of time.

The combined testimony of Mr. Rose and his servant also shows that a banto of one Motokata Genzaimon came to the premises of Mr. Rose, stating that he had paid \$600 to Zempachi on account of a boiler and engines which he, Zempachi, said he had purchased at Rose & Co.'s, and that the said Banto was greatly surprised when he was told that Rose & Co. had received only \$100 on the bargain, and showed in his memorandum his account of the boiler and engine. Also Thos. Rose and his servant agree in

their testimony that there was an offer from another party of \$1,500 for the said boiler and engines, while they were waiting for Zempachi to take delivery of the same, and that Rose & Co. were compelled to decline the offer on account of the contract with Zempachi.

Then, turning to the evidence of Fujikura Zempachi, Mr. Goble said that he had several times contradicted himself, notably when he stated that he never heard of any such person as Motokata Genzaimon, and that he was not acting as agent or broker for any third party but in his own name only, and upon being asked to explain what he meant in his letter to Okawa, where he states that as the other party had failed to take delivery of the said property, therefore he begged Okawa to sell it to some one else for \$1,500.00, then Zempachi acknowledges that he had acted as broker for one Idzuka Hampei, who was the party referred to in his letter to Okawa. When the letter was produced in Court Zempachi was greatly surprised, and for some minutes could make no answer, and as his evidence had proved so unreliable, and as Thos. Rose & Co. had so thoroughly proved their case, they pray the hon. Court will reject the petition of appeal, and confirm the Judgment of the Yokohama Judicial Court, delivered on the 18th of January last; and in addition that this hon. Court will order that Zempachi be adjudged to refund to Thos. Rose & Co. all expenses and loss which they may incur on account of this appeal.

The case was then further adjourned.

IN THE ITALIAN CONSULAR COURT.

Before CHEVALIER P. CASTELLI, MESSRS.
TRIULZI AND MORF, ASSESSORS.

Thursday, July 5th, 1877.

P. BARUCCA vs. THE ESTATE OF GUERRINI
DECEASED.

The plaintiff in this case claimed the sum \$1,650, the amount of a note of hand said to have given to him by the deceased on the 19th May, 1876.

Mr. F. V. Dickens appeared for the plaintiff.

Mr. Banfe was present as the official liquidator of Guerrini's estate;

and Mr. Degron on behalf of Mr. Caillens, a creditor of the estate.

The Court assembled and proceedings commenced at 8 a.m.

Mr. Degron on the part of Mr. Caillens threw doubt upon the genuineness of the signature attached to the note: he held that the testimony of the experts who had examined the signature in question was not sufficient evidence to prove that it was the signature of deceased, and that the deponents who spoke to the giving of a note by Guerrini to plaintiff bring no moral evidence in support of the position of the latter. He protested against the admission of the note; and asked for the dismissal of the claim of Barucca, and that he should be ordered to pay the costs of the case.

Mr. Dickens, in answer to the Consul, said that the matter now brought forward had taken him by surprise, and that he was not prepared to reply, on the part of Mr.

Barucca, to the intervention of Mr. Caillens, until he had consulted the clauses of the code which provided for such case.

The Court read the article in the code bearing on the present point.

Mr. Dickens complained that Mr. Degron had not been present at the first hearing, and that his present interpellation was ill-timed.

Mr. Banfe, in reply to a question by the Consul, said that he only wished that the case of Guerrini vs. Barucca should be finished as soon as possible, and complained that the intervention of Mr. Degron had prolonged the proceedings.

After some debate, the Court retired to consider the question of Mr. Degron's intervention.

On returning, the Consul announced that the decision of the Court was that Mr. Degron, in coming into the case on the part of Caillens, must so come in, taking the case at the stage at which it has arrived.

The report of the experts appointed, on the suggestion of Counsel for the plaintiff, to pronounce upon the genuineness of the signature to the note, was then read. Its testimony was to the effect that they thought that the signature might be taken for that of Guerrini, inasmuch as he had so many ways of signing his name, that this might very well be one.

The evidence of John White and another, taken in deposition, was read. It was to the effect that these two deponents had seen Guerrini sign a paper, which was like the note in question, in favor of Barucca for a sum of money; but they could not swear that it was the same, though White thought it was the same. Mr. Beguex's deposition, also read, said that Guerrini shortly before his death had admitted to him that he owed \$1,650 to Barucca. Further, a Japanese had deposed that there had been frequent business relations between Guerrini and the plaintiff.

Mr. Dickens briefly resumed the arguments in favor of his client, and asked that the documentary and other evidence taken be received as conclusive in his favor, and that, if that evidence was not deemed sufficient by the Court, further witnesses, whom he indicated, should be summoned.

Mr. Degron replied, arguing that the evidence adduced did not at all establish Barucca's claim. The testimony of one witness in particular he stigmatised as quite untrustworthy; and that of the others he held was not definite enough to have any weight. He asked that plaintiff's claim be dismissed with costs.

Mr. Banfe required that Mr. Andriés and Mr. Biagioni, both of whom could give testimony which would throw important light on the dealings between the plaintiff and the deceased, should be summoned before the Court.

Some bills and papers, showing what payments had passed between Guerrini and Barucca, having been inspected by the parties concerned, the Court adjourned at 9.30 a.m.

After about half an hour's deliberation the Consul and assessors returned into Court, and His Honor announced that they admitted the proofs of the genuineness of the signature as a commencement of the establishment of Mr. Barucca's claim. The plaintiff would, however, have to adduce evidence of the fact of Guerrini being indebted to him at the time of his decease.

The case was then adjourned until Saturday next, the 6th instant, at 4 p.m.

Saturday, July 7th, 1877.

The case, which was adjourned on the 4th instant to afford plaintiff an opportunity of adducing evidence of the indebtedness of deceased at the time of his death, was resumed this afternoon at 3 o'clock.

Mr. F. V. Dickins appeared for the plaintiff: Mr. Banfi represented the estate; and Mr. Degron was present as the representative of Mr. Caillens, a creditor.

Mr. E. Andries was called by Mr. Banfi.

Mr. Dickins objected to the testimony of Mr. Andries being heard on the ground that he was an interested person, being a creditor of the estate of Guerrini.

Mr. Degron protested that Mr. Andries' testimony should be taken, and asked how it was that Mr. Dickins, who now objected to him as a witness on the ground of his being a creditor, had examined, for his own side, Caillens, also a creditor?

His Honour ruled that Andries' evidence was admissible.

E. Andries was accordingly sworn. He said that he was a trader. A short time, about 8 days, before the death of Mr. Guerrini, the latter had sent for the witness and asked him to get Mr. Biagioni to come with him to Guerrini, and to aid him in settling his affairs. When witness and Biagioni went, deceased spoke of a sum of \$200 which he said he owed to Mr. Barucca on account of a former silkworms' egg cards partnership. In consequence of the conversation they went to Mr. Barucca's, and there saw some letters which had been written by the deceased to him while deceased was in Europe. The result of the negotiations was that witness and Mr. Biagioni came to the conclusion that the deceased owed Mr. Barucca the sum of about \$200.

His Honor here reminded the witness that, in a conversation which had taken place between witness and himself, the former had said that Guerrini owed \$30 to Barucca.

Witness explained that the \$200 were due on silk-worms' egg transactions, and that the \$30 were on a separate account.

The Court accepted the explanation. Witness continued:—He had never heard either Guerrini or Barucca speak of the note of hand for \$1,650. (Note produced). The signature might be that of Guerrini. The body of the document did not appear to be in his handwriting. Deceased, in speaking of his creditors, never indicated any one in particular to whom he owed more money than others.

Q. What directions did you receive from deceased?

A. Deceased told me to go to the Comptoir d'Escompte and get a draft there for £200 sterling in favor of his relatives in Europe. This was about Christmas or New Year last. The people at the Bank refused to give me the draft without the order of Mr. Guerrini. I asked them to send some one to his place. They did not do so, and the money remained in the Bank till after his death.

Q. Did he ever say anything to you about the settlement of his debts?

A. Nothing.

Witness continued his statement. He said that he thought \$200 would have paid all the other debts owing by deceased. The \$200 owing to Barucca was a balance of \$1,100 for silkworms' egg cards which Guerrini had taken to Europe. He thought that sum and the balance were admitted accounts. He judged this from letters and documents which he had seen at Barucca's. The latter always said that it was money

lent, but witness gathered from those documents that Barucca was in partnership with Guerrini in the transaction in question.

To Mr. Degron:—I do not know enough of deceased's transactions to say whether he was in a position to give Barucca a note for so large an amount as the one in question.

To Mr. Dickins:—No article of partnership between Barucca and deceased existed, to my knowledge.

To the Court:—I never heard Barucca speak of a partnership with deceased.

To Mr. Dickins:—The basis upon which we came to an adjustment of the affairs between Barucca and Guerrini were some loose papers furnished by one and the other. No statement of accounts was made out. I have no opinion to offer upon the note of hand.

F. Biagioni, sworn:—Mr. Andries came to me a short time before the death of Guerrini, and asked me to go with him to the house of the latter. We went and found him in a condition of great weakness. He asked us to settle some accounts between him and Barucca. We went to the latter's place, and there Andries made a rough statement of accounts. It appeared that there had been some silkworms' egg transactions between the two, on which Barucca claimed an outstanding balance; but which Guerrini affirmed to have been entered into in partnership. Some letters written by Guerrini went to establish that fact. After giving some details confirmatory of the evidence of the last witness, Mr. Biagioni said that Guerrini never mentioned to him the note for \$1,650, and that the first he heard of it was some time before Guerrini's death in Mr. Beguex' hotel when Barucca mentioned having lost it, in the presence of witness, and Messrs. Sacconi and Andries. Witness believed that the letters from Guerrini to Barucca related only to silkworms' egg card transactions. Witness could not explain the existence of the note of hand; at the same time he could not express an opinion as to its genuineness or not. He could not remember the amount of indebtedness by Guerrini to Barucca at which Andries arrived; nor did he remember what amount deceased stated he owed to Barucca. It was something in hundreds; one, two, or more, hundred dollars. Andries made the statement, and witness could not, from his memory, supply any information more definite than what he had already given.

A Japanese formerly the manservant of Guerrini, was examined as to the circumstance of the signing of a paper by his master. He said that Mr. John White, Mr. Barucca, and his master were present. His master had a book in which he entered his transactions, and which witness described as being about the size of a sheet of foolscap, thin, and ruled in black and white. Out of a number of books which were placed on the table he failed to recognise the one in question.

The deposition of Mr. Arnoux was next read. It was generally to the effect that the deponent had been aware of certain relations between the plaintiff and Mr. Guerrini, and that the latter had admitted the existence of a debt owing by himself to Barucca, for which he had given a note of hand.

His Honor, having pointed out to the plaintiff that the objections which had been made, on the part of the estate and a creditor thereof, to the admission of the bill as a valid claim, in point of fact went to accuse plaintiff at the least of abuse of the confidence of the deceased, and of fabricating a statement of accounts which he had handed into Court, and having asked how it

was that he, the plaintiff, who was not a millionaire, and had a safe in which to keep his papers of value, should have lost this note of hand for a large amount just when it should have been forthcoming, called upon him for what he had to say in support of his claim.

Mr. Dickins briefly summarised the testimony in favor of his client, whose claim, he held, was well founded. The witnesses present accepted the genuineness of the signature, which was, indeed, fully proved, and the depositions of White and Arnoux mention that a note of hand had been given, while other witnesses show that there was at least a probability of deceased being indebted to Barucca, and indebted to a considerable amount. On the other side there was nothing to prove the contrary, nothing to attempt to prove it except the opinion of Mr. Andries, as Mr. Biagioni's testimony proved nothing. The necessity for the present action arose out of the death of Mr. Guerrini. With reference to the accusations which, by implication, were made against his client, the learned Counsel held that it was nothing extraordinary that he should have lost the note of hand at first and found it afterwards; and, if even he had made up the statement of accounts which he was accused of fabricating, after Guerrini's death, he would have done so to enlighten, not to mislead, the Court. Counsel touched upon the fact of an important account book being missing from the books of the deceased, and complained that no inventory had been taken for three or four months after the death of Guerrini: that the seals were not imposed on his effects with legal formality: that no liquidator of the estate was appointed for some time: that some creditors had been paid while Barucca's claim remained unsatisfied. The Court knew the character and antecedents of his client, no doubt, better than he did; but for himself he knew of nothing which should lead to the conclusion that Barucca should advance a claim, in such a manner, to a sum to which he was not entitled. Mr. Dickins asked that the claim of his client be admitted.

Mr. Banfi, for the estate, was content to leave the case as it stood to be decided by the wisdom of the Court.

Mr. Degron held that a note of hand for such an amount as this should be above the suspicion of forgery. He considered that the genuineness of the note was far from being established, and asked that the claim of the plaintiff be dismissed.

His Honour, at some length, referring to Mr. Dickins' speech, explained what steps had been taken by the Consulate from the time when the seals were placed upon the effects of the deceased, "when his body was hardly cold" until the present; a vindication which elicited from Mr. Dickins a disclaimer of any intention to throw aspersions upon the proceedings of the Consulate.

The Court rose at 6 p.m. declaring the case closed, and announcing that judgment would be given on Monday, 9th instant, at 3 p.m.

Monday, July 9th, 1877.

Judgment was given by His Honor this afternoon to the effect that the official liquidator should pay out of the funds of the estate the sum of \$300.26 in settlement of all accounts due to Mr. P. Barucca: further that within fifteen days from date he should hand over to the said Barucca a gold chain and a gold ring, lent by him to the deceased Nicola Guerrini, or, failing that, pay him the sum of \$29, the amount at which the articles were valued.

INQUEST.

Before RUSSELL ROBERTSON, Esq., H. B. M.'s
Consul and Coroner,

Messrs. J. R. ANGLIN, F. WALKER, and
T. ANTONY, Jurors.

Saturday, June 30th, 1877.

An inquest was held this afternoon at H. B. M. Consulate to enquire into the cause of the death of a man named Colson, a seaman belonging to the *Glamis*.

The jury having been sworn proceeded to view the body which lay at the Cemetery Lodge, and on their return the following evidence was taken.

Robert Ingram, second officer of the *Glamis*, was sworn and testified that he brought the body of the deceased to-day on shore. The deceased was painting the side of the vessel on Wednesday last, 27th inst., at about 0.30 P.M. While on the stage the givies which were fast to the stage gave way and he was flung off the stage. Witness did not see deceased fall, but was informed by one of the men that Colson was drowned. This was close upon one o'clock; and he knew nothing of the accident until all hopes of saving the man were over. There was a strong breeze blowing at the time and the tide was flat. Soon afterwards witness grappled for the body for about two hours. The Captain was sick at the time and gave no orders. This morning about ten o'clock the deceased was seen floating on the top of the water about 50 yards astern of the ship. There was another man on the stage with him at the time, and to prevent himself from falling into the water, he caught hold of the stage. It was the Captain who ordered the body to be brought on shore. The *Glamis* was lying about five miles from Shinagawa at the time of the accident, taking in rice, and is lying there still. Colson shipped in London, and was a steady man. The vessel was anchored in five fathoms of water: the nature of the bottom is muddy.

At this stage the proceedings were adjourned till Monday at 10 a.m.

Monday, July 2nd, 1877.

This inquest upon the death of John Colson, late seaman of the British barque *Glamis*, adjourned on Saturday, was resumed this morning.

Wm. Nicoll, Chief Officer of the *Glamis*, was sworn and examined. He deposed that on the 27th ultimo between 10 and 11 a.m. the deceased was, with another man, painting the side of the ship. He and the other man who was working with him were responsible for the manner in which the stage was slung. When the accident occurred, witness ordered a boat to be lowered. The boatswain had previously cast the life-buoy into the water. The body of the deceased did not rise, so witness commenced grappling, and continued through the afternoon without success. On the 30th the body came up almost exactly in the same spot as it sunk in. The stage was a sufficient stage for the work and would have borne the weight of four or five men. It was a single plank a foot broad, and two inches thick. There might have been a flaw in the plank. The accident occurred about noon. Grappling commenced at about 2 p.m.

The seaman who was at work with deceased was examined, and deposed to how the accident occurred. Deceased had made a rope fast through a hole in the end of the plank, and in trying to regain the stage his

weight came on the rope, the hole broke through, and the stage was capsized, witness and deceased falling into the water.

The master and boatswain were also examined; but their testimony was merely corroborative of what had been adduced before, and went to prove that the calamity was purely accidental.

Having heard the evidence, the Jury returned a verdict of accidental death.

MISCELLANEOUS.

THE *Mai Nichi Shinbun* publishes the following regulations, issued by the Governor of the Kanagawa-ken, to be observed by foreigners obtaining passports for the Hakone district under the newly inaugurated system.

The passports should be sent back to the Kencho within two days after the return of the holders to Yokohama:—

Regulations to be observed by foreign visitors to the hot springs at Hakone and Atami.

1.—Any foreigner, who visits the above hot springs and remains there for some weeks, must submit to the local regulations. In case of contravention, the Governor of Kanagawa-ken will report any offence to the Consul of the nation to which the offender belongs.

2.—Foreigners who may wish to pass a night at any hotel during their journey to the above hot springs, must exhibit their passport to the landlord. During their journey, should police officers, *kucho*, or *kocho* demand to examine their passports, they must at once exhibit them. If any passport holder refuses to show his passport, he will be treated in the same manner as a foreigner travelling outside treaty limits without permission.

3.—No foreigner who holds a passport for travelling to the said springs, is allowed to enter into any commercial transactions, or to make contracts of any kinds, or to hire any Japanese house, during his journey.

If he should transgress any of these regulations he will be returned by the local police officers to within treaty limits, and, in case of resistance, will be arrested.

4.—The time for which passports under these regulations hold good shall not exceed 30 days.

5.—Notwithstanding this, the period of a visit may be prolonged for an additional term of thirty days for the benefit of the health of a visitor, on his forwarding a request for extension to the Kanagawa Kencho.

6.—Each passport will only be granted for the use of the foreigner whose name will be mentioned on it. It is not transferable.

7.—In case of any violation of these articles the Kanagawa Kencho will order the departure of the offender from the springs; and the matter will be reported to the Minister of Foreign Affairs. Any person once offending will not in future be permitted to travel in the interior.

THE Admiral in command of Her Majesty's Squadron in China and Japan has issued an order that Her Majesty's ships are not in future to visit non-treaty ports in Japan, except in cases of emergency or when acting under special orders.

THE following table of exports and imports from and to Japan and Corea during the month

of May, is published in a native paper.

Exported to Corea.

Article.	Value.
Rice.....5,543 koku....Yen 28,399.10	
Barley,903 " " 2,542.29	
Ground Barley, 1,580 " " 4,891.41	
Miscellaneous " 38,004.65	

Total 8,026 Yen 73,837.45

Imported from Corea.

Miscellaneous Articles, value, yen 14,868.13.

During the same month 50 junks left Corea for Japan and 59 junks arrived there from Japan. The Total number of Japanese residents in Corea is 232.

MR. J. J. GRAY, who was badly hurt while endeavoring to rescue some of the property of Messrs. Stillfried and Andersen, from the disastrous fire which, on the 14th January, destroyed the buildings on Block No. 59, has received from the Staffordshire Fire Insurance Company an award of \$100.

THE Agency of the Comptoir d'Escompte de Paris in Yokohama will shortly close. We hear further that the Agency of the same Bank in Hongkong will also be closed within the next few months.

IF the *Osaka Nippo*, a paper usually tolerably well informed, is to be believed, Iwamura Mitsutoshi, the newly appointed Governor of Kagoshima, has invited Saigo to destroy himself, a piece of advice which the great insurgent leader is not likely to follow at present. A translation of the "instructive document" will be found in our *Nippon Notes*.

INTELLIGENCE has been received by Messrs. Walsh Hall & Co., the charterers of the British barque *Parthenia*, owned in Yokohama, which was despatched from Kobe on the 16th March last with a cargo of rice for Melbourne, that that is the vessel alluded to under the name of *Paimema* in a telegram dated 14th May from Sydney, and published in our issue of the 23rd ult. which states that the *Paimema* had put into the latter port, after having struck on Indispensable Reef.

THE Annual Communication of the District Grand Lodge of Japan was held in the Masonic Hall on Saturday afternoon (23rd ult.) when the reports for the past year were received, and the following officers for the current year were invested:

Bro. W. G. Sands, D.D.G.M.	
" A. Weiller, D.G.S.W.	
" John Marshall, D.G.J.W.	
" E. J. Geoghegan, D.G. Treasurer.	
" G. D. Hay, D.G. Regr.	
" A. Langfeldt, Pres. D.B. of G.P.	
" W. H. Stone, D.G. Secretary.	
" J. S. Cox, D.G.S.D.	
" Robt. Hughes, D.G.J.D.	
" H. St. J. Brown, D.G. Supt. of Works.	
" E. B. Jones, D.G.D. of C.	
" W. E. Clarke, D.G.S.B.	
" W. A. Crane, D.G. Organist.	
" F. C. Hayes, D.G. Pursuivant.	
" M. Kirkwood	
" T. H. R. McClatchie	} D. G. Stewards.
" M. M. Scott	
" T. J. Larkin	
" H. Moss	

After the ceremonies were concluded the brethren, to the number of about thirty-five, adjourned to the International Hotel where a dinner was provided by Brothers Smith and Henriques.

OUR attention has been drawn to the indecent public bathing of Japanese from the Bund in daylight. Another complaint is made of the bettoes who take horses into the sea at the angle formed by the Bund wall and the French Hatoba, and who are not nearly so thoroughly clad as the horses they wash. These are cases of violation of public propriety which the native police might very well stop with the smallest possible amount of trouble to themselves.

On the 23rd ultimo H. E. Kuroda left Tokio for Kioto by order of his Majesty the Mikado.

ABOUT eleven a.m. on the 26th ult. a fire broke out in the Chinese portion of the Settlement, at No. 172. With such a strong wind as was blowing at the time, it threatened to commit great devastation. It originated in a kitchen upstairs where some cooking was going on; and soon found its way through a thin wall, and was then discovered. Buckets and water were promptly obtained, and in the course of a few minutes the threatened danger was averted. In the meantime the native fire brigades were hastily turned out on the fire-bell giving an alarm; but, by the time they arrived on the spot, their services were not required.

THREE thousand men from Hiuga are said to have joined the insurgents.

PRINCE Kita Shira Kawa-no-miya, who recently returned from Germany, is to be appointed to the command of a force, newly enrolled.

By native accounts 292 piculs of new silk were brought from the interior to Yokohama between the 18th and the 26th ultimo inclusive.

THE *Meiji Maru* left this port at 8.20 A.M. on the 27th ult. with instructions to take up the Saratoga Spit buoy, bring it back to Yokohama, and then start on her usual trip of inspection Southward. It was expected that the *Meiji Maru* would return in the forenoon, but she did not get back till 6 p.m. She brought the buoy, which was found to have been badly damaged some time since, evidently in collision with some passing vessel. It is a little strange that the condition of the buoy has not been observed and reported on by one of the numerous vessels which have come into port lately. The *Meiji* finally left for her cruise at 4 A.M. next day.

THE *Hochi Shinbun* refers to the rumour of a proposed arrangement of a new loan of several million yen to the Chinese by the Japanese Government. It says that a disagreement (as to the terms of the loan, probably) has occurred, and that the Chinese are desirous of putting a stop to all further negotiations, by the payment of a forfeit of tls. 25,000 to the Japanese.

SOME of the speculations as to the aims and intentions of Saigo, indulged in by natives, are very amusing. Recently we had occasion to translate the Homeric request of Iwamura Mitsutoshi, Governor of Kagoshima, to the insurgent leader to spare the Government further trouble by putting himself out of the way. Now a writer in the Yokohama daily suggests, with the utmost gravity, that he contemplates the invasion of China, and, with a view to success, is getting quantities of Chinese clothes made, and is adapting himself

to Chinese manner and customs! It is in the character of a Chinaman that he is to invade China!

THE number of letters despatched through the Japanese Post Office by the *Belgic* was 11,735. That of newspapers, books, and samples 8,010. A large mail, truly.

HAKODATE, 20th June, 1877.—Six hundred recruits for the army leave this for Tokio today by the Japanese steamers *Zensae* and *Hakodadi*. Range of temperature for the last ten days 48° to 74°. Fine summer weather.

A RUMOUR, serious if true, is afloat in Tokio, to the effect that a body of about 3,000 insurgents have landed in Choshiu about 150 miles North-East of Shimonoseki, and have been warmly received by the inhabitants. It is also reported that Kirino is proceeding northwards by the Bungo Coast, and that Lieut.-General Kawaji is retreating from his present position.

THE lease of No. 187, Yokohama, known as the Hotel and Café de l'Univers, with the buildings on the lot, was sold recently at auction by Messrs. Bourne & Co. The whole was knocked down to Mr. Deniaud for \$1,300, a price which is a very good index of the recent deterioration in value of house property in Yokohama. The buildings alone on lot No. 187, which were constructed only four years since, cost \$14,000.

ACCORDING to advertisement, a meeting of the persons interested in the cargo and hull of the steamer *Nil* of the Messageries Maritimes Company, wrecked off Cape Idzu in 1874, was held on the afternoon of the 27th ult. in the French Consulate.

The following gentlemen were present:—Mr. E. Pierret, French Consul, Mr. Conil, representing the Messageries Maritimes Company, Mr. Wolfs, the Compagnie Lyonnaise d'Assurances Maritimes, Mr. Haenni, of Messrs. Siber and Brennwald's, the Helvetia Company, Mr. Schnell, and Mr. Galy, respectively representing Japanese Companies, Captain Carst of the Yokohama Salvage and Diving Company, and several Japanese.

Mr. Pierret opened the meeting by stating that he had, since Captain Carst had given up salvage operations, received two new propositions for the removal of the wreck. It was for those interested to consider those propositions which would be read to them.

Propositions were then read from Mr. Galy and Mr. Schnell, respectively, on the part of Japanese. They differed considerable in the amount of the estimated expenses; but in the course of a conversation which ensued, it came out that the two gentlemen had been applied to on the part of the same firms of Japanese. This fact, and that of the terms of Mr. Schnell's proposition being somewhat indefinite, caused the meeting, on the suggestion of the Consul, in order to give the proposers time to reconsider the matter of their tenders.

WE refer once more to a notice given in the *Japan Gazette* of the 20th May, of an extraordinary rise and fall of the sea at Hakodate on the 11th of that month, the reports from Peru received here on the 7th June, stating that the town of Iquique on that coast was destroyed by an earthquake on 10th May, and the good reason which exists to infer that the "bores" felt at Hakodate were caused by that convulsion.

Later on we shall come into possession of more definite information, which we shall not fail to give prominence to. In the mean time we would refer to the great Peru earthquake of 1868, the tidal effects of which, felt at so many places in the Pacific, were noted at Hakodate. The first shock of that one occurred on the coast of Peru on August 13th at 5 p.m., equivalent to Greenwich time 13d. 9h. 40m., the first bore being observed at Hakodate on the 15th, at 10.30 a.m., or Greenwich time 14d. 13h. 6m. Thus, that bore travelled a distance (of course assuming that the centre of disturbance was on or very near the coast) of ten thousand miles in twenty-seven and a half hours, being at the rate of more than three hundred and sixty nautical miles per hour, or over a mile in ten seconds on the average. Taking the speed to have been equal in the late case, and the position of the centre of disturbance the same, would give the time of the first shock at Iquique about 6 p.m. on the 9th May there, or say Greenwich astronomical time 9d. 10h. 40m. It will be interesting to compare the two cases when the materials for doing so come to hand, for one striking coincidence is already observable, namely, that, in August 1868, the time between the oscillations of the sea, both at Hakodate and the Sandwich Islands was ten minutes, while the same intervals were timed at Hakodate during the recent occurrence.

At Nagasaki an extraordinarily high tide occurred on the same day (11th May;) while we have various native reports of a *tsu-nami* in Shimosa, and other parts along the East Coast of Nippon.

THE *Weekly Mail* of the 30th ult. has the following pertinent paragraph. The "obscure but upright and incorruptible man" referred to, was William Hone, the bookseller and parodist, who was prosecuted by the Government of 1817 for the publication of seditious and blasphemous writings, and acquitted by the juries after three trials, the first before Mr. Justice Abbott and the two last before Lord Ellenborough. It was Hone himself, and not Cruikshank, who, subsequently to his trials, wrote "The House that Jack built," which was however admirably illustrated by George Cruikshank:—

Some of our readers may remember the celebrated political squib that went far to make the reputation of the then young artist, George Cruikshank;—we are speaking of between fifty and sixty years ago. It must be borne in mind that it was penned at a time when a violent effort was being made on the part of the Government to muzzle a press that was attacking and satirising its vicious courses; an effort, which thanks to the fearlessness and ability of a somewhat obscure, but upright and incorruptible man, was utterly defeated. The "Thing" referred to, which the "Public Informer" would put down, is the press. The meaning is of course greatly intensified by Mr. Cruikshank's admirable illustrations.

"These are the people all tattered and torn,
Who curse the day wherein they were born,
On account of taxation, too great to be borne,
And pray for relief from night till morn;
Who in vain petition in every form.
Who, peaceably meeting to ask for Reform,
Were sabred by Yeomanry cavalry, who,
Were thanked by the man all shaven and shorn,
All covered with orders and all forlorn—

* * * * *
Who took to his counsels in evil hour
The friends to the Reasons of Lawless power;
That back the Public Informer—Who
Would put down the Thing that, in spite of
new Acts
And attempts to restrain it by soldiers or tax,
Will poison the vermin that plunder the wealth
That lay in the House that Jack built."

Its application under the present circumstances will be plain to everyone.

THE *Tokio Times* is diligently furnishing, in its own proper columns, fresh evidence of the truth of the old saying that whom the Gods wish to destroy they first drive mad. The recent course of the Editor resembles nothing so much as that of a Malay "running a muck." The end of all "muck runners" is inevitable and invariable, and only a matter of time; and we may well leave this Malay of Eastern journalism to his fate, near or remote. We feel it a duty, however, to draw the contemptuous attention of the public to the latest cowardly blow struck, not at ourselves but at the *Japan Mail*. The *Tokio Times* of the 30th June, in an article—which it is nothing to call intemperate, for all things temperate have long been excluded from its columns—on the postal question, and characteristically headed "A Thing devised by the Enemy," says:—"It" (the *Japan Mail*) * * * "further essayed to cast discredit upon the postal announcement by suppressing notifications respecting the outgoing mail of Tuesday, which duly appeared in other papers." It is hard to suppose that the *Tokio Times* believed this statement when it was written; but we will endeavor to think that it did believe it; as the most charitable construction which can be put upon a certain class of writings, as of actions, is that they are perpetrated under the influence of some kind of hallucination. Believed in or not by its author, the simple answer to it is that it is false. We will let the *Mail* repel it in its own words:—

The alleged fact and the motive ascribed to it stand on exactly the same footing as regards credibility. They are simply and gratuitously untrue. So far from suppressing the notification referred to, it was prominently published in the usual form at the very head of the Postal notices in our *Advertiser* issue of that morning, as a reference would have shown, and also in the daily despatch slip by which we are wont to give all possible publicity to the movements of the mails.

The closing sneer, and the unworthy motive it implies, with which "it was not only expedient but under the circumstances almost a moral necessity" for the *Tokio Times* to close its article, is so base that we will not do more than allude to it. Japanese, Government or individuals, can only suffer in any cause supported by such worse than immoral advocacy as this.

MR. E. S. BENSON has ceased to serve as Municipal Director. The name of the office is, it appears, to be abolished, and its duties are to be discharged by the Kencho officials. A definite arrangement is to be made, the particulars of which we will publish when we are in possession of them. Till that time also we reserve any comments we may still have to make on the subject.

THE *Charter Oak*, which arrived on the 1st instant had upwards of 500 tons of goods returned from the American Centennial Exhibition.

A MEETING, adjourned from the 27th ult. of persons interested in the cargo and hull of the French mail steamer *Niz*, was held on the afternoon of the 2nd inst. in the French Consulate.

Present:—Messrs. Pierret, Consul; Kraetzer, Chancellor; Conil, M. M. Company; L. Wolf, Compagnie Lyonnaise d'Assurances Maritimes; Haenni, (Siber & Brennwald) Helvetia Assurance Company; Schnell; Galy; and Carst.

It was resolved unanimously:—

1st.—That the proposal of Mr. Schnell be accepted to effect the salvage within three years from date: work to be carried on dur-

ing eight months of the year, and to be suspended during four, namely, December, January, February and March.

2nd.—That, after deduction made of the expenses of salvage, the contractor shall receive forty per cent. upon the amounts realized from the salvage.

3rd.—That the expenses monthly of salvage operations shall not exceed \$850 per month, and shall be paid only during the eight working months of the year. Accounts of expenses to be subject to the approval of the Consul.

4th.—That a superintendent of salvage operations shall be appointed by the Consul, and shall be paid at the rate of \$150 per month, his salary being included in the \$850 maximum monthly expenses of salvage, during the eight working months. During the four months of winter his salary shall be \$100, to be defrayed out of what balance of salvage proceeds may be in the hands of the Consul, or to be charged to the funds to be realized by future operations.

A FINAL meeting of the creditors of the bankrupt estate of Mr. Fred. Douglass was held on the afternoon of the 5th in the Court room of the German Consulate, Mr. Zappe, Consul, presiding. Mr. Ferd. Knoblauch, the official liquidator, handed in his accounts, which were accepted and approved by the creditors present, and paid into the Consulate the sum of \$814, the balance remaining in his hands. A dividend of 2 $\frac{1}{10}$ per cent will be paid from this on the amount of their claims to approved creditors. At the close of the proceedings the bankrupt's discharge was handed to the liquidator.

THE case of *Iwasaki vs. Captain Colomb* has been brought to an unexpected termination. On the Court assembling on the morning of the 4th inst. His Honour summed up the evidence at considerable length, and at the conclusion gave the gentlemen of the Jury a number of questions to consider, and they then retired. After being locked up for three quarters of an hour the Jury returned, and informed His Honour that they could not agree upon a verdict. His Honour said that he was very sorry this should be the result of a six days' hearing, and expressed his willingness to assist in solving any difficulty the Jury might be labouring under. It seems that the stumbling block was the second question, the substance of which was: "Would the collision have been prevented had the *Audacious* had two anchors down between six and eight o'clock?" Four of the Jury were unanimous in their opinion, but one differed from them, on this point. Mr. Dickens asked His Honour to take the verdict of the majority, but this Mr. Ness most strenuously opposed. Finally, the gentlemen of the Jury retired again, though they expressed their conviction beforehand that though they should be locked up for a week there was not much probability of their agreeing. At 2.25 p.m. they again returned; and, on His Honour asking if they had agreed on their verdict, the foreman proceeded to read the conclusions they had arrived at relative to the questions submitted by His Honour, and which will be found, categorically, in their place in his summing up.

The answers were:—

1st question,	yes
2nd "	4 no, 1 yes
3rd "	unanswerable
4th "	do
5th "	1 yes, 3 no, 1 no answer.

His Honour interrupted the foreman at this stage, and informed the gentlemen of the Jury that he had no wish to hear how many agreed on

certain points, and asked if they were unanimous on any point. The foreman replied that the only point upon which they were unanimous was the question of damages. The question then arose as to whether or not the verdict of the Jury should be taken upon the damages. This was ultimately considered to be impossible; and His Honour announced that the only duty which remained for him to perform was to dismiss the Jury. Before doing so he could not help expressing his regret at the six days' trial being brought to such a termination; and, while he believed the gentlemen of the Jury had performed their duty, he at the same time censured them from preventing certain evidence being brought forward, which they ought not to have refused to hear unless they were agreed as to their verdict. The Jury were then discharged.

By the *Gaelic* nine horses, including one Clydesdale stallion, eighteen head of cattle, including one young bull, and twenty-six sheep, all consigned to the Government, and nearly all purchased in Kentucky, arrived in excellent condition. A further shipment is expected to arrive in the *Oceanic*, due towards the end of this month.

THE Fourth of July being the hundred and first anniversary of the day of the Declaration of Independence, was observed as a holiday by American residents. Stores kept by members of that nationality were closed to business, and gaily decorated: the doors of the offices of the American Consulate have resembled those of the temple of Janus in peace time: at noon the customary salutes aroused all the echoes of the neighborhood: in the afternoon a crowded reception was given by Admiral Reynolds and the officers of the *Tennessee*; and the day closed with a series of aquatic contests. Rejoicings were not ended with sundown, but in many houses were protracted till the dawn of the following day.

A MEETING of the creditors of George Nachtigal & Co., bankrupts, was held on the 4th in the German Consulate, Mr. Zappe, Consul, presiding. The following gentlemen were also present:—Mr. Andersen, the official liquidator, Messrs. J. S. Cox (Lane, Crawford & Co.), Mr. Fred. Knoblauch (Attorney for Capt. Walker), Mr. Langfeldt (Langfeldt & Mayers), Messrs. C. J. Strome, R. Clarke, A. S. Fobes (China & Japan Trading Company), and some Japanese.

Mr. Andersen read a statement of the affairs of the estate, showing that the liabilities of the bankrupts amounted to about \$40,000, and that enough had been realised on the assets to pay the approved creditors a sum of fifteen per cent on their claims. This dividend was accordingly offered to them.

Mr. Strome complained that it was unfair that he should be considered as an ordinary creditor, and contended that he had a preferential claim. He had advanced \$5,000 on a mortgage given on property of the bankrupts in Kobe, and the mortgage deed bore the stamp of the German Consulate in that port. He asked that his claim be defrayed in full.

He was informed by the Court that he could only be included in the general list of creditors, and be paid with them a dividend in proportion to his claim. If he was not satisfied appeal in the ordinary course was open to him.

Mr. Strome declined to go to law, and agreed, under protest, to receive his dividend.

Mr. Cox and Mr. Fobes advanced claims on behalf of their respective firms, in addition to those which had been already entered and ap-

proved; but their demands after some conversation were rejected as informal.

It was finally resolved by the creditors present to accept the composition of fifteen per cent offered; and the Court declared that, as seventy-five per cent of the aggregate value of the claims against the estate was represented at the meeting, the resolution of those present should be final, and have effect as regarded those creditors who were not represented.

During the meeting some of the English creditors were heard to complain that the advertisement convening those interested had only been inserted in one paper, and in that was only worded in the German language.

WHILE we are at one with the Editor of the *Mail* in his condemnation of the meanness of the *Tokio Times* in imputing the basest of motives to English officials, in the course which was simply forced upon them by circumstances and the absence of definite instructions from the Imperial Government, on the postal question lately raised, and for the present terminated, we fail to see how he strengthens his cause by making an unmerited attack upon a gentleman so well and favorably known to foreigners in Japan as is Mr. Farr, the Acting Superintendent of Foreign Mails in the Japanese Post Office. Probably the Editor of the *Mail* did not intend to include Mr. Farr in the category of the "adventurers, who started and sup-
"port" the would be rabidly spiteful little sheet whose weekly business is to buzz and bluster like a hornet without a sting; but, taken with the context, the concluding paragraph of his article might lead a reader to draw the inference that he did. Thus, we feel compelled to vindicate Mr. Farr from the possibility of such an aspersion. When he received the offer of a position in the newly formed postal service of Japan, he occupied and had held for many years a situation in the Post Office department of his own country; and if he be an adventurer there can be but few foreigners in Japanese service who have not a right to the same designation. That the Editor of the *Tokio Times* gleaned some information from Mr. Farr is more than probable, as that gentleman would be the last person to withhold from any responsible member of the press, such information as the latter had any right to ask for; but it is going too far to make him responsible for the wild statements of the *Tokio Times*; or to suppose that he has instigated or would attempt to instigate such attacks as that journal's soul delights in. In brief, the Editor of the *Mail* might have easily rebutted the charges of the *Tokio Times* without attacking Mr. Farr. He would probably have refrained from doing so had he thought for a moment how improbable it was that Mr. Farr should have issued so important a notification, as the one which has caused so much stir and discussion, without at least thinking that he had authority for it: how easily a mistake may have occurred; and how natural that the responsibility should be thrown upon the foreign servant, instead of upon the Department, or its Chief.

THE billiard match between M. Carme and a Chinaman, played on the evening of the 7th instant, in the Oriental Hotel, would have been more interesting, perhaps, had the plucky Celestial adversary of the professor had a better show. As it was, at a very early stage of the game, it was apparent that, in spite of the very large odds given him, he was still vastly over-matched.

By eight o'clock some thirty gentlemen had assembled in the billiard room to witness the

game, which was commenced with commendable punctuality, Mr. Carme winning the break which was strung for by the contestants. The professor made 20 points off the balls, and then gave way to his opponent, who made a slashing break of 29. Little was done by either player in the two next breaks, but in his fourth the professor scored 40, and was followed by the Chinese who scored but 2, and afterwards did nothing particular, making in his twelfth break 26, and in his fourteenth 35 points. Carme in his sixth break made 115, in his ninth 40, some small breaks of 15, 13, 27, and 22, until he arrived at his nineteenth break when he made 115 with a succession of careful cannons achieved generally by a judicious nursing of the object balls in a corner and under the baulk cushion. His twenty-second break credited him with 27 points, and was brought to a premature close by a foul; and in the twenty-third break he scored fifty. Here the players rested for a few moments and the game was called:—Carme, 546: Chinaman, 697.

By this time the room was nearly filled with spectators, who took a lively interest in the game. In the first eleven breaks after the resumption of their cues by the players, the Chinaman got rather the best of the scoring; but in his twelfth break Carme reeled off 119 points in fine style, and thenceforward his opponent's chance of success was of the slightest, the professor rapidly putting together such scores as 56, 45, 81, and 30, and finally going out on an unfinished break of seventeen. Mr. Carme, after the conclusion of the game, which finished at ten o'clock, tried one or two exhibition tricks with the balls, but excused himself from continuing them on the ground that, owing to the great humidity of the atmosphere, the tables were too damp to allow him to do anything effective. Throughout the play the Chinaman played a fine open game, making some brilliant all round cannons, and, to say the truth, a happy fluke or two; but from first to last he really never had a chance to win. He made in all only 387 points, his score at the close of the game standing 887.

We hear that there is a probability of a match being arranged between Mr. Carme and a Portuguese amateur, whose play is much better than the average. The professor has a wonderful command of his cue, his draw, *masse*, and following shots especially being executed with a precision which it is no exaggeration to call beautiful.

THE 5th inst. was the second day of the annual summer races at Kudan. The meeting was not so well attended as generally, many of the boxes on the stands being almost empty. This was, doubtless, not entirely owing to the preoccupation caused by the war and the absence of so many of the usual visitors, who are, at the present moment, striving with deadlier weapons than the whip and the spur, but must in part also be ascribed to the unpropitious state of the weather; for the heat was intense, and the long drought had so dried up the course that the dust lay ankle-deep, and the horses passed along enveloped in a cloud. The events themselves were perhaps better contested than usual, most of the ponies having undergone a certain course of training. It may be remarked as rather an uncommon occurrence that not one of the ponies refused the hurdles in the steeple-chasing events.

As the sun went down and the evening drew on, the crowd returned in greatly increased numbers to witness the fireworks. These latter, after a couple of warning rockets a little

earlier, commenced at 8 o'clock, and consisted of fourteen or fifteen large "pieces," the display of which was alternated with that of simple rockets in different parts of the ground. The temperature had now become cooler, and the evening air refreshing and pleasant; and the dusky throng of people slowly moving to and fro in the gloom enframed in the dim light of the line of lanterns marking the oval circuit of the course: the vast mass of upturned, gazing faces from time to time visible in the red glare cast around by the greater pieces: the vivid beauty of these as pyrotechnic displays: the joyous and prolonged shouts with which each was received, formed together a scene at once striking and delightful in the extreme, and one well worth a journey to witness. The proceedings terminated at a little past 10 o'clock.

THE prospects of the season's rice-crop have been very bad so far, judging from the reports, from the various districts, which have appeared in the native journals. The drought has been general and long continued; so the recent rains, however slight, are a veritable Godsend.

THE installation of Mgr. Osouf, Bishop of Arsenoé and Apostolic Vicar for Northern Japan, in the Catholic Church in Yokohama on Sunday, the 8th instant, was a grand and impressive ceremony. The Church itself was crowded to overflowing, all the seats being filled, and a number of the audience having to stand at the bottom of the nave and aisles, and even on the steps under the porch. At a quarter to ten a double row of sailors from the *Atalante* and *Talisman* was formed down the nave: at ten o'clock the Admiral and his staff, escorted by detachments from the two vessels, arrived and took their places near the choir; and immediately afterwards the Bishop himself arrived at the entrance to the Church, where he was received in pontifical state by his clergy, at whose head he marched in procession to the altar, where mass was at once celebrated, His Lordship himself officiating.

The celebration was a long and imposing one, lasting till twenty minutes past eleven; the splendid band of the *Atalante*, whose music sounded with glorious effect in the Church, playing at intervals. Among other pieces they gave Mozart's *Larghetto*, and a piece which we had the pleasure of hearing in the Bluff Gardens, Gounod's exquisite Serenade, which certainly did not seem out of place in the Church. At the same time it was difficult to restrain the impulse which prompted one to call for an *encore*.

Among the visitors present were H. E. the French Minister and Madame de Geofroy, H. E. the Spanish Minister, Mr. and Mrs. Pierret, Chevalier and Mrs. Castelli, Mr. and Mrs. de Ojeda, and a number of officers from the men-of-war in harbor. At the conclusion of the ceremony the sailors were marched, headed by the *Atalante's* band playing a march, to the French hatoba, where they embarked and returned to their vessels.

WE subjoin an account of a cyclone encountered by the S. S. *Sunda* on June 23rd-24th, 1877, in Lat. 29° 30' N., Long. 126° E., during her last voyage hence to Hongkong:—

June 23rd, 4 p.m., wind E.N.E., force 6°, overcast and rainy weather, rising sea, bar. 29° 86, ther. 74°. 8 p.m., wind E.N.E., force 7°, sky overcast with rain, and increasing sea, bar. 27° 72, ther. 73°. No change till 9.30 p.m., when the wind increased with strong gusts, bar. 29° 68, ther. 74°, heavy rain, increasing sea, heavy rollers coming up from

S.S.E.; all appearances now indicating a cyclone to S.S.E., probably travelling to N.W. Rounded to on starboard tack, heading N.E. by E., engines half speed. Midnight, wind E. by S., force 9° to 10°, torrents of rain, very high cross sea, bar. 29° 59, ther. 76°. From midnight the wind rapidly increased to a whole gale, with terrific squalls and very heavy confused sea with torrents of rain, till 7 a.m., when the storm was at its worst, with squalls of hurricane force and torrents of rain, the sea now running in enormous pyramidal masses; but the ship notwithstanding behaving admirably, heeling over considerably in the more furious blasts, but shipping very little heavy water though enveloped in a continuous sheet of spray. The engines, working very regularly, enabled the ship to keep well up to the sea. 11 a.m., the port life-boat, having been frequently struck by heavy seas, broke up altogether. At noon the weather commenced to improve, and moderated rapidly till 4 p.m., when the ship was enabled to proceed on her course. Subjoined are the hourly readings of the barometer with the direction and force of the wind.

Hour.	Ship's Head.	Wind.	Force.	Barometer.

Went on our course: wind and sea rapidly decreasing: barometer as rapidly rising: wind remaining at S. W. till noon next day.

THE *Sunda* does not seem likely to belie her reputation of being a thorough typhoon boat. No vessel on this coast has had so extensive an experience of storms as hers, or weathered them so well. Her former captain while in her earned the affix of "Typhoon" to his surname. Captain Reeves may do the same in time. Above we publish an account of the storm he encountered on his last voyage hence to Hongkong. The *Daily Advertiser* of the 10th inst., has the additional information that the thirteen passengers on board the steamer presented an address to Captain Reeves before they left the *Sunda*, acknowledging the skill and judgment with which, ably seconded by an excellent staff of officers and a good crew, he handled his vessel during the storm, and to which, under Providence, they attributed their escape from imminent peril. Among these passengers were Justice Snowden, Colonel Dickens, Commander Pusey, R.N., Captain Dempster, and Messrs. Donald and Gadsden, both master mariners, and this address therefore derives unusual value from the professional signatures appended to it.

The same paper publishes the following report showing that the *Sunda* narrowly escaped a similar difficulty on her trip up from Hongkong to that which she experienced on the 23rd ultimo:—"When off the North end of Formosa, July 2nd at 10 a.m., a fresh gale set in from E. N. E. with sultry and hazy weather and rapidly rising sea. At noon, with the barometer at 29.75 it blew a strong gale from the same quarter, with a high increasing easterly sea. At 11 p.m. the barometer fell to 29.70, it then blowing

a strong easterly gale with hard squalls and torrents of rain. On the 3rd at 2 a.m. the barometer registered 29.60, a strong gale blowing from E. by S., accompanied by squalls and rain increasing in violence, and heavy rollers coming up from S. S. E. At 4 a.m. the weather was becoming worse, the barometer being 29.49. At 6 a.m., with the barometer at 29.46, it was blowing a whole gale from the S. E. with furious squalls and torrents of rain, and it was necessary to bring the ship to the wind in order to take on the bow the tremendous sea which was then running. It became evident that a cyclone was passing to the southward on a westerly track towards the Coast of China. At 8 a.m. the barometer rose to 29.50 and the wind blew from S. S. E.: otherwise there was no change. At noon the barometer rose to 29.50 (? 60) and the wind from S. by E. was decreasing to a strong gale, the weather appeared to be clearing and the sea slightly improved. At 3 p.m. the barometer was 29.75, the wind S. by E. and blowing a fresh gale, the sea had decreased and was more regular, so that the ship was kept on her course, N. 60° E., under reefed trysails and staysails and full steam. At midnight the barometer was 29.85, with a moderate gale from S. by E., a high but decreasing sea, and passing clouds. At 8 a.m. on the 4th the barometer rose to 30.00 with a moderate gale, though squally, and decreasing sea, the wind S. S. E. with a force of 6 to 7. At noon the weather was fine with a strong S. S. E. breeze, and the barometer 30.07. The wind gradually fell, and on the 5th blew moderately, the weather being fine."

MR. H COOK, the enterprising shipwright of this port, returned on board the schr. *Otsego* on the 10th inst. A few months ago the *Otsego*, then a wreck on the island of Skotan, was sold by Messrs. Bourne & Co. at public auction, and knocked down to Mr. Cook for \$130. On the 1st May last the purchaser embarked on board the schooner *Beatrice*, a short time previously launched from his own yard, with one European assistant, and eleven Japanese carpenters. On the 11th of the same month he arrived at Skotan and found that the *Otsego* had been washed over a reef of about fifty small rocks, and lay, with her bottom out, about 150 feet from low water mark. He immediately set to work upon her; and in thirty-four days, in spite of almost uninterrupted bad weather—a heavy snow-storm fell on the 21st May—from the date when he commenced operations, had the *Otsego* repaired, in deep water, and ready for sea. The recovered vessel now lays safe and sound in this harbor. She is a vessel of 36 tons register, San Francisco built; and there is no doubt that Mr. Cook will make a good thing out of her. There is no doubt, either, that he deserves his success.

"One of the Minority," writing to the *Japan Mail Daily Advertiser*, on the subject of the case of "Iwazaki Yataro vs. Captain P. H. Colomb," makes one statement which so thoroughly misrepresents what we said that we take it up. He says:—

"In dealing with the first question the defence tried to show that the plaintiff was not the owner of the *Chiri Maru*. The point was a fair one to take, and the common notion, which the *Gazette* has just repeated, that the Mitsu Bishi Company is a branch, and its vessels the property, of the Japanese Government lent it some force."

We took some pains to show that in all probability the generally prevailing impression that the Mitsu Bishi Company be-

longed to the Government was an incorrect one, and that Mr. Iwazaki was, most likely, what he represented himself to be, the proprietor of the concern known as the Mitsu Bishi Company. We wrote thus:—

"* * * It is not surprising that they (the Government) should propose to an influential and enterprising countryman, to transfer to him the whole of these vessels upon the consideration that they should be maintained and kept up, and be held at the Government disposal whenever their services might be required. Extraordinary as this proposal may appear, it is reduced to common proportions when the facts are considered that the vessels were useless to the Government, in a mercantile or profitable sense, and valueless as marketable property if put up for sale, or for resale to foreigners. Upon the evidence of Iwazaki Yataro, and upon the further patent facts that the departures and arrivals of the steamers employed upon the chief mail service, have been made subservient to the requirements of the Government during the insurrection, combined with the absence of any credit in the national budget for either proceeds of sale of the vessels, or the returns of their working, we have no hesitation in concluding that the steamers are the property of an individual who chooses, as he has a perfect right to do, to trade under the style of the "Mitsu Bishi Steamship Company."

ON the axiom that lookers on are the best judges of a game, we may conclude that the *Hongkong Daily Press* has arrived at a just estimate of the "little game" in which the *Tokio Times* is rejoicing. In a short article upon the subject of the insurrection the former paper says that the *Tokio Times* "appears to be an inspired Government organ"; and, on the harmless but none the less unseemly attacks made by that "organ" upon the European press of Yokohama, the *Daily Press* has the following paragraph:—

"The *Tokio Times* manifestly intends to achieve a reputation for pugnacity. In its issue of the 16th instant it attacks all its Yokohama contemporaries in turn. It has long been at feud with the *Gazette* and *Mail*, but on this occasion it has fallen foul of the *Japan Herald* and the *Echo du Japon*. It ought to know the taste of its readers best, but we should have supposed they were sick of these petty squabbles by this time. They have been treated to them *ad nauseam*."

A FAREWELL dinner was given by some of his friends to Dr. W. Willis in the Grand Hotel on the evening of Saturday, the 11th instant.

HAKODATE, June 29th, 1877.—Heavy gale from S. and S. W. here on 26th instant: bar. 1 p.m. 29.59. Much rain on 28th. Weather now fine.

Ocean Pearl left for Yokohama to-day. S. S. *Dragon* loading for Nagasaki and Shanghai.

Ching-too loading for Yokohama. H.I.R.M.S. *Boyarin*, with admiral on board, arrived from Honolulu on 27th: coaled and proceeded for Vladivostock.

Our Nanking correspondent gives a sad account of the locust-plague. Fresh disasters are apparently in store for this suffering country, already wasted by famine, rebellion and disease. We sincerely trust that in the event of the plague becoming serious, the Government will take proper measures for the relief of the people.

LOSS OF THE M. M. STEAMER "MEIKONG."

The following telegram was received by Reuter's Agent in this port on the morning of the 23rd ult.

"Shanghai, 23rd June, 1877.

"The M. M. S. S. *Meikong* was wrecked on Ras Haffoon. (Cape Haffoon, South of Cape Guardafui—Long: 51.22 E. Lat: 10.26 N.) on the afternoon of the 17th June.—Crew and Passengers all saved.

"The M. M. S. S. *Tanais* which left Yokohama on the 16th May, connected with M. M. S. S. *Meikong* at Hongkong."

The latter vessel, consequently, had among the passengers Madame Begux and Monsieur E. Piquet, who had taken through passages for Marseilles from Yokohama; from which port forty-seven bales of silk were shipped. Mr. Plichon, formerly Acting Consul for France in Yokohama, was a passenger from Hongkong. To go ashore South of Cape Guardafui, a vessel, making for the Red Sea from Point de Galle, must be considerably out of its course; but to be out of the course is a very common occurrence on that route, owing to the set of the currents in the Arabian sea. Captain Poache, an officer well-known to travellers to and from Europe by the excellent vessels of the Messageries Maritimes, was in command of the *Meikong*.

THE Agent of the Messageries Maritimes Company in this port having telegraphed to Shanghai for further particulars of the loss of the *Meikong*, and having received a reply that nothing more than was contained in the Reuter's despatch was known at the agency at that port, sent a despatch to Marseilles, the answer to which he kindly communicated to us. It is as follows:—

"Passengers saved, except M. Arathon from Madras. Cargo and Mails lost with the exception of registered letters and diplomatic despatch-boxes."

THE *Hongkong Daily Press* has the following fuller particulars:—

The *Meikong* was a fine vessel of 500 horsepower, nominal, and a gross tonnage of 3,176 tons. The cargo consisted of 56 bales silk, 16 cases silk piece-goods, 20 chests tea, 265 boxes ditto, and 734 packages sundries for the Continent; and 143 bales silk, 33 cases silk goods, 991 bags sugar, 13,390 boxes tea, 3 cases treasure (\$27,000), 2 cases treasure (Tls. 28,000), and 274 packages sundries for London. It is to be hoped that further reports will show that some of this valuable cargo has been saved.

FOURTH OF JULY FESTIVITIES.

THE anniversary of American Independence, was a gala day afloat, the event being celebrated under the auspices of the officers and men of the *Tennessee* in a manner never before witnessed in our harbour. Her crew, with characteristic liberality, subscribed several hundreds of dollars to provide entertainment for sailors of all nationalities. The ship was most tastefully decorated: numerous invitations were issued among the shipping; and the *Tennessee* boys kept open house and free gangways from 9 A.M. far into the night. Inside the big ship there was abundance of good cheer, and outside abundance of good sport. An international Regatta was held, embracing races, free for all naval boats to contest, for cash prizes given by the American sailors. Several crews from the

Tennessee participated in the races, but, to outsiders at least, they seemed determined not to come in ahead of the visiting crews, and only succeeded in capturing a few insignificant prizes, which they afterwards transferred to the contestants in the catamaran and tub races.

After the races were over, upwards of 200 sailors, representing the British, French, Russian, Italian, and Japanese flags, dined on board the *Tennessee*, and judging from the hilarity and general good feeling displayed, the gravity of the Eastern Question did not seem to interfere with the minds or appetites of these jolly tars.

At night the ship was brilliantly illuminated from truck to waterline by thousands of Japanese lanterns, ordered for the occasion; and, witnessed from the Bund, the effect was beautiful. A line of parti-colored fire, ran from the water's edge to the end of the flying jib-boom, thence over the mastheads, down the spanker-gaff, and descended to the water's edge astern, forming a rainbow of 598 feet. The yards and masts were also outlined, and the hull was decorated with lanterns and flags of all nations. Colored lights were discharged from the yard-arms at intervals, and all the men-of-war in port responded with a display of fireworks. The American merchantmen joined in the display; and the British ship *Countess of Kintore* made a very creditable show. At 9.30 a launch from the Russian corvette *Haydamack*, brilliantly illuminated, containing four officers and a serenading party of 54 men, described several circles around the *Tennessee*. After performing selections of vocal and instrumental music they were about leaving when they were captured by the big ship's crew, taken on board, and supplied with refreshments. They executed several grotesque dances, much to the delight of their entertainers. Illuminated boats from other foreign vessels also paraded the harbour, and the festivities did not cease until at midnight the striking of eight bells announced the end of the "Glorious Fourth." Taken altogether, the celebration was truly international, the officers and men of the different crews vying with those of the *Tennessee* in rendering the affair successful. The enthusiasm was at times so general that the coxswain of one of the *Tennessee's* cutters remarked that he received "three cheers in nine different languages."

PROMENADE CONCERT.

SUCH an opportunity as was offered on the 3rd inst. to the public of Yokohama of spending a delightful evening in the open air, and listening to the music of the splendid band of the *Atalante* was not likely to be neglected. The result must have justified the most sanguine hopes of the organisers of the entertainment, who had spared no pains in their preparations for the reception of their audience. Four hundred people, at a low estimate, must have been present in the Bluff Gardens, which were carefully and tastefully lighted *al giorno*, and well provided with chairs and benches, placed here and there in sufficient quantity to afford seats for at least all the ladies present who chose to avail themselves of them. But

"Full from the fount of joy's delicious springs
Some bitter o'er the flowers its bubbling venom flings."

The bitter flung o'er the flowers, and grass, on this occasion was the dust, collected from the pathways apparently, and which by the passing to and fro of many feet was worked up with the heavy dew into a very adhesive

plaster, which went far to spoil many a summer dress.

If the *Echo* is to be believed, and some murmurs which we heard here and there, principally from French visitors, in the Gardens, are to be taken as the expression of an opinion not altogether isolated, it was thought a little strange by some people that the Amateur Dramatic Club should, after having secured the invaluable services of the French band, have charged anything for admission. We fail to find these complaints well-founded, as the entertainment naturally involved a considerable outlay for lighting and preparing the Gardens alone, an expense which had to be defrayed by somebody, and which could not with any justice be thrown upon the Amateurs themselves. If, as we heard stated, Admiral Véron was not aware that any entrance fee was to be charged, when he kindly promised the attendance of the band, we may regret that the circumstances were not more fully explained to him; but we are sure that in no case would the permission have been withheld. Certainly none who went to the concert grudged the outlay; but that those who contribute so largely to the success and enjoyment of such entertainments as last evening's as do the proprietors of men-of-war's bands, should be fully informed of the conditions and objects of the performances, is but fair; and no doubt this matter will be looked to in the arrangements made for the following concerts of the series.

Probably the band of the *Atalante* is the most perfect and best organized of any of the bands, naval or military, in the East, and the treat its public performance affords is one which would never be willingly missed by real lovers of music. The summer air, the calm, the subdued light of the lanterns, enhanced the charms of the performance. These accessories were especially an aid to the reception of Gounod's beautiful serenade, with which the first part of the performance closed, and which was loudly applauded until the performers kindly repeated it for the pleasure of their enthusiastic audience. Among the other pieces, all of which were exquisitely rendered by the band, particularly noticeable were the *Perle de Venise* polka, and Strauss' famous waltz *Le beau Danube bleu*, a piece not in the programme, but which was played in response to a general request for "one piece more."

The Amateurs worthily contributed their share towards the pleasure of the evening; and the audience, in leaving the Gardens, were unanimous in the expression of the hope that the second of the series of summer concerts would soon follow the first.

We regret to hear of an accident which occurred at Shanghai on the 28th June, to the French mail steamer *Hoogly*. It seems that early in the morning, as she was swinging to the tide, she broke loose from her moorings, and, drifting in the direction of the Chinese Navigation Company's wharf, had a narrow escape of coming into violent collision with the *Hankow*. She was saved from this by her stern suddenly sticking in, or at least striking on, the mud while still at some distance from the river-boat, thereby saving the latter from almost certain and serious damage, but being left herself in a very precarious position. She swung slowly round, her stern being then pretty hard ashore, and in that state she remained until the tug-boat *Samson* came to her rescue. She was not got off however without a good deal of bumping and scratching, while she left the pontoon of the C. N. Company in a strained and somewhat leaky state.

NIPPON NOTES.

THE *Nisshin Shinbun* of the 18th ultimo publishes a letter the substance of which is as follows, and which, it is said, has been read to shizoku at Iwate Kencho:—

"H. E. Iwakura, has issued orders to the following effect:—The imperial army in the South-West has now been under arms for a long time. As the hot season is coming on, it is thought advisable to send new detachments to relieve them. Many of my ex-retainers are in Iwate, Akita, and Awomori, and I have been requested to enrol them as soldiers, as there is a friendly feeling existing between us. It is impossible to sit quietly and look on while the existence or destruction of the Government is pending. The ex-retainers referred to will be permitted to form themselves into a distinct company. Many other companies will be formed in Sendai, Akita, Tsugaru and other places. Now we desire you to obey the summons for the sake of the Mikado as well as the nation.

NANBU TOSHIYASU."

THE ex-retainers of the ex-Daimio Kuwana (head of a branch of the Tokugawa clan) have expressed a desire to follow the imperial armies to the South-West, and that they have been busily engaged practising fencing and being drilled since March of this year. Some days ago, the ex-lord Matsudaira Haruyama issued an order that they should enrol themselves in a force and take the field with the imperialists. According to their desire, they have been allowed to form an irregular regiment without being incorporated with the imperial soldiers or police. They number 400 men in all. Last night they arrived in Kanagawa. Their ex-lord has given 10 yen to each of the volunteers. When they left their homes, their relations and the citizens in Kuwana accompanied them as far as the outskirts of the city.

THE *Mai Nichi Shinbun* says that the Mitsu Bishi Company is going to purchase more ships; and that on the suppression of the insurrection, a line of steamers belonging to the Company will run between Yokohama, Hongkong, and London.

H. E. OKUMA, Minister of the Finance Department, is not well and is unable to attend his office.

A BRANCH office of the Jijo-sha Society in the late Mito-ken was established in the city of Sumoto, Awa. A meeting will be held on the second Saturday of each month. The object of the Society is to establish a Representative Assembly. The number of members has much increased of late.

THE *Nichi Nichi Shinbun* of the 19th ultimo has the following:—

Kataoka Kenkichi, one of the members of the Risshi-sha Society in Toshiu, recently proceeded to the Imperial palace at Kyoto and laid before the authorities a memorial from his Society. Shortly afterwards, another memorial was forwarded to the same place from another influential society, known as Seiken-sha. After it became known that these documents had been forwarded to the Government, much curiosity was manifested to know their contents. Some days ago we had the opportunity of reading them, and, contrary to expectation, after a perusal of their contents we found that they were very moderately worded. The memorial from the Risshi-sha Society contained nothing relative to the Kagoshima expedition, and merely consisted of six articles, the substance of which was:—

1st.—That, though three years have elapsed since the Imperial edict was issued relative to the three legislative bodies, the conditions of that edict have not been carried into effect.

2.—That the treatment of the shizoku by the authorities is not right.

3.—That the poll taxes are not collected in the order they should be.

4.—The alteration in the land tax is not of a satisfactory character.

5.—The finances of the country are not regulated as they should be.

6.—That the revision of treaties with foreign countries; and matters in connection with Corea, Formosa and the exchange of Saghalin for the Kurile islands need consideration.

In short the Society is desirous of establishing a Representative Assembly in Japan, without which it considers the welfare of the people cannot be properly promoted.

The memorial of the Seiken-sha Society is to the following effect:

A Sovereign of a country should seek to gain popularity, otherwise ruin will soon fall upon the nation he governs; and affairs in the interior of the country should be well regulated, or else there will be no end to disturbances. Now Saigo Takamori has of course done wrong in taking up arms against the Government, but he must have a reason for revolting; and if the Government will make this reason known to the country, Saigo will soon repent and will gladly surrender to be judged by the laws of the land. But if he should afterwards continue in rebellion, the shizoku of Kochi ken will destroy his men within thirty days. If His Majesty the Mikado will not listen to the advice of the Seiken-sha we cannot say anything about the existence or destruction of our empire.

THE following is a table of the private schools, with the number of pupils, in Tokio:—

	Schools.	Pupils.
1st district	189	11,243
2nd "	143	6,777
3rd "	96	4,562
4th "	110	4,918
5th "	121	6,836
6th "	78	4,568
Total	737	38,904

THE *Hochi Shinbun* says that a telegram, received from Europe a few days ago, states that another of the three men-of-war, the *Miyie Kuwan*, which have been ordered by the Japanese Government in England, has been launched.

THE British steamer *Duna*, which arrived at Yokohama on the 21st ulto., will be bought by the Mitsu Bishi Company.

DURING the 26th and 27th ultimo, the Tokio-fu paid the balance of pensions due to the kuwazoku for the last year. The total amount was 2,019,179.50 yen, and the nobles among whom it was distributed numbered 358.

His Majesty the Mikado has paid a visit to the primary school in the 24th district of Kioto.

PRINCE Higashi-Fushimi-no-miya, Commander-in-Chief of the new division formed of the North-Eastern shizoku, left for the parade ground of Narashino-hara at 8 a.m. on the 28th ultimo.

THE *Nagoya Maru*, which arrived on the 28th ult. in Yokohama, brought back 43 wounded policemen from Midzumata, and 42 more from Bungo.

On the 28th June 150 policemen, newly enrolled in the Miye-ken, (Ise) arrived in Tokio.

ONE Shibata, an ex-retainer of the Daimio Matsumae, was ill at the time when he was ordered to join the forces enrolled in Yezo; and his regret at being unable to take the field was so great that he committed suicide, having previously urged his young son to serve the government in his poor father's place. This event has caused much excitement among the shizoku of Fukuyama, who have volunteered to serve the government.

HACHISUKA, of the *Futsu Shinbun*, was, on the 21st ultimo, condemned to two months' imprisonment and a 50 yen fine for having violated the press law. On the 23rd ultimo, Ariyoshi, of the *Osaka Nippo*, was ordered to appear before the Police Bureau, where he is yet in custody on suspicion.

THE *Hochi Shinbun* says that Prince Arisugawa-no-Miya in Kumamoto issued a notification offering amnesty to all insurgents deserting their banner. Notwithstanding this, all the rebels who have surrendered have been punished more or less severely, and imprisoned in jail. The insurgents of Fukuoka-ken, who had laid down their arms and who were afterwards obliged against their will to join the Kagoshima invaders, have also been punished. Yet more:—the imperialists have largely resorted to the use of torture in the examination of those who have surrendered, in order to extort from them confessions as to whether they had joined the rebels of their own free will, or against their will and on compulsion.

THE naval arsenal at Iso, which lies one ri North-East of the city of Kagoshima, was first founded by the Shimadzu clan, who built it regardless of expense. It was furnished with all necessary engines and machines. Both in size and style of construction it resembled the Yokoska arsenal. The building was named the "Shusei-kuwan." During the night of the 10th ultimo it was set on fire by some persons unknown. When the fire ceased, nothing of the arsenal was left standing; and a water-mill close by was also burned.

THE *Mai-nichi Shinbun* writes:—Mr. Sasaki, a member of the Gen-ro-in, was sent to Kochi, Tosa. On the 15th and 16th instant, he conferred with the members of the Risshi-sha, Seiken, and Churitsu-sha Societies, and begged them to preserve peace for the sake of the Mikado and the country. All the letters received from the Kochi-ken during the past five or six days have been opened in the Post Office.

THE two members of the Risshi-sha Society in Tosa, who were arrested on suspicion of being in communication with Kirino, were brought before the Kioto Saibansho on the 19th ultimo. H. E. Okubo, Home Minister, was present during the trial.

A GREAT reform in the administration of the Central and Provincial Governments is expected to take place.

WE extract the following from the *Akebono Shinbun* of the 23rd ultimo:—

The imperial armies on the Oguchi and Demidzu roads, in Satsuma, have marched victoriously to within a distance of 20 ri from the city of Kagoshima, where they are expected to arrive shortly. In this case the insurgents will be unable to stop in their native province, but they will most likely establish themselves in the two provinces of Hiuga and Osumi. According to information received on good authority, the number of insurgents is estimated to be about 50,000.

It is not expected by the imperialists that the rebels will run out of gunpowder and other military stores, because it is thought probable

that some arsenals are established in the city of Miyakonojo (Hiuga), where a large number of workmen are engaged in manufacturing ammunition, cannon, and rifles. The insurgents who are besieging the imperial troops in Kagoshima, were not armed with many or large cannon till recently. But on the 7th ultimo they bombarded Kagoshima, and also fired upon the men-of-war anchored in the port. This was the first severe bombardment since the imperialists have occupied the city; and a number of shot reached the headquarters of the army and Kencho, doing some injury.

If this information from Kagoshima is correct, the conjunction of the imperial army in Kagoshima with the forces, marching along the roads in Satsuma will be of no importance to the insurgents, who will establish themselves in Hiuga and Osumi. The castle-city of Miyakonojo is the most likely place for them to establish their headquarters in, it being surrounded by various strong and commanding positions, viz., Masayuki, Takagi, Oka and others. Besides, the large river Kio-gawa runs through the province, and it will afford convenience to the defenders.

THE memorial from the Risshi-sha society in the Kochi-ken (Tosa) to the Government, was first sent to the Minister of the Imperial Household, who declined to receive it, and secondly to the Prime Minister, who treated it in the same manner. The bearer of the memorial is said to have then taken it to the Home Minister.

OYAMA, ex-Governor of the Kagoshima ken, is imprisoned in the fifth jail in Nagasaki, and is guarded by two policemen.

THE *Konjo-maru*, a man-of-war, ordered by the Japanese government in England, is expected to arrive shortly in Japan.

THE two ringleaders of the Hagi insurgents (Yamaguchi ken) viz., Kotta and Tanaka, were condemned on the 22nd ultimo by the local Saibansho to decapitation.

ON the evening of the 29th ultimo the new ministers of France and Italy to Japan were entertained at a banquet given by H. E. Iwakura at his residence. The Sangi and several other officials of the Foreign Office were present.

A TEMPORARY office for the establishment of a Shizoku Bank has been opened at No. 7, Zaimokucho, Fukagawa, Tokio, where a certain number of government bond-holders are engaged in enrolling shareholders.

ON the 28th ultimo, about 500 Buddhist priests assembled in the temple of Tentokuji, Tokio. They chanted from the "Daihanja" (the six hundred sacred books of Buddhism) reading a little here and there, and praying for tranquility and good harvests.

H. E. MORI, Envoy Extraordinary and Minister Plenipotentiary for Japan in China, is expected to leave shortly for the latter country to resume the duties of his post.

WHEN the imperial armies entered Hitoyoshi, they made the following seizures:—2,000 yen in paper money, 300 cannon balls, 3 gun carriages, 300 rifles, 500 swords, a hundred bags of rice, 30 casks of gunpowder, and a quantity of tinware. Money to the extent of about 20,000 yen has been found on men who have surrendered to the imperialists.

ACCORDING to the confession of the two members of the Risshi-sha society in Tosa, who were detected in holding communication with Kirino, Kataoka, the bearer of the memorial from the society, is said to have given them 100 yen for their travelling expenses. He has also been arrested in Kioto. The

memorial of the society is bound like a European book, and contains thirty-five pages of matter printed on foreign paper. About 1,000 volumes are said to have been published.

THE younger brother of Okuma, Finance Minister, died a few days ago. H. E. Matsukata, Daiyu of the Finance Department, will act for Mr. Okuma during the period set apart for mourning.

As some artillery practice was going on in the drill ground of Echujima in Tokio on the 23rd ultimo, a shell accidentally exploded and wounded Nioshimura, Chief Secretary of the Agricultural Department and four or five other officers more or less severely.

THE insurgents have obliged men of all classes in Hiuga to enroll themselves in their armies. But their ammunition is exhausted, and all the tin utensils in Hiuga and Osumi have been seized to be melted down into rifle-balls.

(From the *Mainichi Shinbun*.)

Notification No. 67 A.

Tachigi Kaneyoshi, *Shito Hangi* and President of the Yokohama Saibansho, has been ordered to leave for Osaka on government service. During his absence Asaina Kansui will act for him. Notice is hereby given.

NOMURA YASUSHI,

Kenrei of Kanagawa.

23rd June, 1877.

H. E. TERAJIMA, Minister of Foreign Affairs, left Kioto for Tokio via the Tokaido on the 26th ult.

YAMASHITA, *Keibu* of the 2nd class, left for the Owake-ken (Bungo) at the head of 200 policemen in the *Hiroshima-maru*. Kuroda, *Sangi*, Yamanouchi, *Kuwazoku*, ex-lord of Tosa, and many high officials of the Finance Department left for Kobe, en route for Kioto, in the same vessel.

THE branch office of the Yamaguchi Kencho in Hagi, which was opened on account of the insurrection, has been closed on the re-establishment of good order in that city. The governor, Sekiguchi, has returned from Hagi to Yamaguchi.

THE *Hochi Shinbun* states that the Mitsui Bishi Company are about to purchase the British steamers *Argentino* and *Duna*, which are spoken of as being excellently constructed vessels.

E. H. MATSUKATA, Vice-Minister of Finance, has been appointed Director of the Japanese Section of the French exhibition to be held next year.

TO SILK DEALERS.

(From the *Kinji Hiron* of the 28th June.)

If we are desirous of commencing a business or any kind of work, we should first consider what profit or loss will follow it. But if any one pursues all kinds of transactions, right and left, without definite aim, committing his fortune to the will of heaven, and hoping for some lucky chance, he will never bring his work to a good end, and grievous calamities succeeding one another without intermission will fall upon him. It is sad to think that our countrymen are working for their private benefit, cheating others with hundreds of lies and deceptions, and that, after all, knowing nothing of their business, they become bankrupt, and cannot again recover themselves. Glancing back to three years ago, we find that a great blight had

then fallen upon the traders in silk-worms' egg cards. No such misfortune had occurred since the port was opened to foreign trade. It was brought about through the negligence of our merchants, who by accident had a fortunate chance in business. We are very sorry; but we still must laugh at their heedlessness. Last year our silk realized very high prices, owing to the disease which destroyed the silk-worms in Europe, and helped our traders to redeem their losses of the previous year. This year our silk dealers are very heedful, remembering their former defeats. But a victor is liable to become negligent and thoughtless. According to what we have heard, this year the crop of silk-worms exceeds by one sixth that of last year, and the season is favorable. No danger is apprehended for the silk-worms. Among others the provinces of O-u, Kai, Musashi, and Shinano seem to be prosperous. The late hails which fell in these provinces, have not much damaged the mulberry leaves. So the crop of silk should be larger than that of last year. In this case, large stocks of silk finding no purchasers, prices will soon become very low. Consider now the condition of affairs in Europe! The Russians and Turks are engaged in war; and England, France, Germany, and several other countries, are much excited watching the movements of the two hostile Governments. If any thing should happen to affect countries in Asia, a remarkable injury to trade must follow, and great misfortunes will then overtake our dealers. If they pursue their business without considering outside circumstances, wishing only to benefit themselves, they will be again unfortunate in trade. They should be very heedful in their transactions.

A SMALL iron-clad lately launched from the arsenal in Nagasaki, has been despatched for the island Sakurajima near Kagoshima.

PRINCE Kitahirakawa-no-Miya, Mr. Naito, the Japanese Consul in Hongkong, and two other gentlemen, returned by the French steamer *Volga*, which arrived in Yokohama on the 2nd instant. The Prince passed the same night in Takashima's house in Yokohama, and went to Tokio yesterday, where he was received by a large number of nobles.

THE *Heiji Shinbun* states that when Saigo-Takamori left his camp in Hitoyoshi on the 30th May, he was simply dressed in Japanese clothes and wore a sword ornamented with gold. About twenty young fellows guarded his kago. He is said to be always accompanied by four dogs.

THE Rev. G. F. Verbeck appeared before the officials of the Imperial Household Department last week, and was decorated in recognition of his good service.

MRS. SANJO (wife of the Prime Minister) will leave for Kioto in a few days.

GENERAL KURODA, *Sangi*, left Osaka for the Owake ken (Bungo) on board the *Genkai Maru* on the 27th ultimo.

SINCE the 27th ultimo, great excitement has prevailed throughout Osaka, where a strict watch is observed by the garrison and police. Any visitors or residents, who are under the slightest suspicion, are examined. The following notification, dated the 27th ultimo, has been issued by Governor Watanabe:—"All persons, except only sailors and soldiers wearing the Government uniform, are forbidden to be abroad either in the city or the neighbouring villages after 11 o'clock p.m., unless they carry a lighted lantern.

PRINCE FUSHIMI-NO-MIYA, *Nihon*, returned from the seat of war to Kioto on the 1st inst.

THE new levies which were recently despatched to the extensive drill-ground of Narashinohara in Shimosa, have been ordered to return to Tokio.

ON the 1st instant the Minister of the Foreign Affairs arrived in Tokio from Kioto.

THE Industrial Section of the Home Department is establishing a Company for the manufacture of woollen cloth in Tokio, with a capital of 84,503 yen. Mr. Inouye of that section will soon leave for Germany to purchase engines and machinery.

ON the morning of the 1st inst. a fire broke out at Shiwocho, Osaka, which was not extinguished till five houses were burned.

Notwithstanding unfavorable weather, silkworms are in very good condition in Ou.—*Sendai Shinbun*.

THE *Suimin Zasshi* (a weekly paper) in Osaka was suppressed on the 30th ultimo. On the 27th Yafuku of the *Nishin*, and Koike of the *Kofu Nichi Nichi*, were brought respectively before their local Saibansho. The former was condemned to a fine of five yen, and the latter to ten days' imprisonment with a fine of thirty yen.

A report of home and foreign market prices, published by the Mitsui Productive Company, gives the following list of the National Banks with their respective capitals:—

1st National Bank, Tokio,	... 1,500,000 yen.
2nd " " Yokohama,	... 300,000 "
3rd " " Tokio,	... 200,000 "
4th " " Niigata,	... 300,000 "
5th " " Tokio,	... 300,000 "
6th " " Fukushima,	... 100,000 "
7th " " Tanesaki,	... 100,000 "
8th " " Toyohashi,	... 100,000 "
9th " " Kumamoto,	... 100,000 "
10th " " Kobu,	... 150,000 "
11th " " Nagoya,	... 100,000 "
12th " " Kanazawa,	... 200,000 "
13th " " Osaka,	... 250,000 "
14th " " Matsumoto,	... 100,000 "
15th " " Tokio,	... 17,826,100 "
16th " " Gifu,	... 50,000 "
17th " " Hakata,	... 100,000 "
18th " " Nagasaki,	... 150,000 "
19th " " Ueda,	... 100,000 "
20th " " Tokio,	... 250,000 "

Total 22,276,100 yen.

Bank Notes to the value of 17,820,880 yen have been already issued by these banks. Of these, 550,000 yen are now current. But the entire sum will gradually become current through Japan. Besides this the Government has issued paper money amounting to 94,054,731 yen. The grand total of paper money is thus about 111,875,600 yen, or about 3.73 yen a head of the population of 30,000,000.

THE *Choya Shinbun* publishes the following letter from Uwajima, Iyo, Shikoku, dated the 25th ultimo:—

Since the police forces landed in Uwajima, high excitement has prevailed through the town; and the inhabitants are leaving their homes, taking furniture and clothing with them, in spite of orders to the contrary issued by the local officials, and all is in great disorder. The entire coast of the province of Iyo is strictly guarded by police and the garrison of Himeji. 100 men are at Kibe, 100 at Iwamatsu, 400 at the castle of Uwajima, 100 at Yawata, and 100, respectively, at Osu, and Nagahama; while three men-of-war are cruising between the coasts of Nagahama and Tosa. Government Head-Quarters have been established in the harbour of Uwajima. The imprisonment of the chief of the Seikensha Society in Tosa, who sent a memorial to the imperial palace in Kioto, has been the cause

of much discussion among the members. The police were stationed on the two roads, Matsumaru and Ono, on the 24th ultimo. All the prisoners, who were recently arrested on suspicion, have been released. The Kochi-ken is said to be tranquil.

ON the 5th instant 248 shizoku from the Niigata, 200 from the Yamata, and 17 from the Shidzuoka ken, arrived in Tokio to be enrolled in the imperial forces.

THE *Tsukushi Shinbun*, published in the Hiroshima ken, states that some of the rebel commanders have addressed a memorial to the Imperial Head Quarters, expressing their willingness to commit harakiri, on condition that all others implicated in the rebellion receive a full pardon, and that they have twenty days allowed them to collect their troops, who are scattered here and there.

THE 4th battalion of the police force, commanded by Kawabata, *Daikibu*, which was despatched to the seat of war during February, and has fought in several battles at Tawarazaka, returned in the *Genkai-maru* from the South-West on the 5th instant. Twenty-four wounded soldiers were brought back in the same vessel.

It is expected that Lieut.-General Kawaji, and Yoshikawa, Director of the Telegraph Department, will arrive in Tokio on or about the 15th instant.

H. E. Mori has entertained Prince Kitashirakawa-no-miya, H. E. Iwakura, *U-Daijin*, and the Japanese and Foreign Ministers and others, fifty in all, at the arsenal of Koishikawa, Tokio, a large building occupied by the ex-Daimio Mito.

THE annual celebration of the opening of the Sumida river in Tokio has been postponed till the 15th inst., when a grand display of fire-works will be made.

THE *Hochi Shinbun* states that at 8.30 a.m. the 19th ultimo, a fire broke out on board the *Tokio-maru*, which was then anchored in Akamagaseki, and had a certain quantity of gunpowder on board. Fortunately however, the flames were put out before much damage was done. No person on board was injured.

THE *Mai-nichi Shinbun* says that it is rumored that the *Asama-kuwan* has been wrecked off the coast of Hiuga.

THE *Nichi Nichi Shinbun* states that the sum of 700,000 yen has been paid by the Government towards the relief of the homeless sufferers by the war in the provinces.

THE patients in the Nagasaki hospitals number 3,603.

THE amount of the Government bonds for pensions of Kuwazoku and Shizoku under the jurisdiction of the Tokio-fu alone is said to amount to 29,581,995 yen for the Kuwazoku and 4,521,585 yen for the Shizoku. The bonds should be issued in August next.

(From the *Hochi Shinbun*.)

Notification No. 51.

Notification No. 47, which was issued in February of the 6th year of Meiji (1873) allowed the export of saltpetre. Now, from the 10th August next the export of that article is prohibited till further notice.

IWAKURA TOMOMI,

U-Daijin.

7th July, 1877.

5,677 people are now constantly engaged in the arsenal in Koishikawa, Tokio. Of these, 302 are women.

FURTHER publication of the weekly paper, *Minkai-sanko-ron*, in Kioto, was prohibited on the 30th ultimo.

YAMA-NO-UCHI, ex-Daimio of Tosa, and Nakamura, Chief Secretary of the Home Department, left Kioto for Tosa on the 7th inst.

A LETTER from Kagoshima, dated the 20th ultimo, says that only forty imperialists have been killed in Kagoshima. Six civil officials have been sent to the island of Oshima to transact affairs, four to Tokushima, three to Kikaiga-jima, three to Koronjima and four to Okinagara-jima. It was expected that the imperial armies in Kagoshima would commence to attack the neighboring rebels on the night of the 20th ultimo.

THE *Choya Shinbun* writes:—It is frequently observed that a routed enemy, having perceived that no harmony exists among the officers of their antagonists, seize any favourable opportunity that offers to recover their lost power, and to defeat their victorious antagonists. As soon as General Kuroda released the castle of Kumamoto, he returned to the East; and now Lieut.-General Kawaji, having joined with the imperial troops in Kagoshima, has petitioned for leave to follow the example set by Kuroda, on the plea of bad health. Many of our countrymen entertain doubts of universal harmony existing among the officers at the seat of war.

SONODA, police inspector of the third class, left for Kiushiu at the head of 600 police in the *Nagoya Maru*.

SIX shizoku of the Kochi-ken, two of them members of the Riishi-sha Society, who were discovered holding communication with the rebels in the South-West and were arrested in Osaka on the 25th ultimo, are imprisoned in the corner tower within the inner wall of Nijo castle in Kioto. Fifty police are guarding them.

OWING to dry weather, the water of the Tonegawa river has become very low, and no steamers or large junks can navigate it.

TROOPS, newly enlisted in the Northern provinces, are expected to be despatched for the South-west in a few days. Three battalions of them are now drilling in the plain of Narashino in Shimosa.

THE British Minister in Tokio visited the Daishin-in and the Joto-Saibansho on the 9th inst.

THE Mitsu-Bishi Company has purchased the British steamer *Duna* for \$130,000, and renamed the vessel the *Suminoe Maru*.

THE *Hochi Shinbun* publishes a report that the man-of-war *Asama Kuwan* grounded while cruising off the coast of Hiuga on the 3rd inst.

PRINCE Arisugawa-no-Miya in Kumamoto Castle left his camp on the 3rd instant, in order to visit the Naval Hospital and temporary Saibansho in Nagasaki.

THE amount of duties paid into the Yokohama Custom House, during the half year ending the 30th June, 1877, was 549,782 yen.

ON the 11th instant and up to the 10th September, 1877, government offices will be opened at 8 a.m. and closed at noon.

THE shizoku of Kurume, Fukuoka, and Saga are thought to be waiting for some favourable opportunity to take up arms against the authorities.

It is asserted, says the *Nichi Nichi Shinbun*, that, according to a letter from some noble in Kioto to a friend in Tokio, it is beyond doubt that His Majesty the Mikado will shortly leave for Tokio.

YOSHIKAWA, Director of the Telegraph Section, has left Tokio for Awa, in Shikoku.

(Extract from a letter, dated the 5th June, sent from Kagoshima to the *Nichi Nichi Shinbun*.)

In the *Nichi Nichi Shinbun* on the 17th May, I found great fault about the number of the imperialists in Kagoshima. The 1st division, commanded by Lieutenant-General Takashima, consists of 3,750 soldiers, the 4th division, commanded by Lieutenant-General Soga, of 3,399; and 1,200 soldiers belonging to the 3rd division in Higo are commanded by Lieutenant-Colonel Tanabe, making a total of 8,349 in all.

As expected, the lair of the insurgents, which they established at Hitoyoshi castle, in Higo, after raising the seize of Kumamoto, was destroyed by the imperial armies on the 2nd instant. We received this news in Kagoshima on the 5th instant. To the South-West of Hitoyoshi the insurgents occupy the country as far as Kagoshima; and to the North-East as far as Bungo, where they are endeavouring to extend their right and left wings. Now, their head-quarters having been attacked and seized by the imperialists, a great change in their movements is expected to take place, which will also change the seat of war. This may be considered the termination of the second campaign. Where will the rebel armies make their lairs? is now the question. Will it be in Hiuga or Satsuma, or in Bungo? In any case more important battles than have yet occurred are expected to take place in the next campaign. * * *

When Saigo found that his advice to send an expedition against Corea was not accepted by His Majesty the Mikado, he retired to his birth place. Many civil and military officers and soldiers resigned their posts, and followed the present commander of the insurgents to Satsuma, where they took an oath to follow his commands even to death. Thus the Satsuma men regarded Saigo as their father or elder brother, who loved them, in turn, as his sons or younger brothers. Since Saigo retired to Kagoshima, he refrained from visiting any other place and held no communication with any gentleman in the capital or the other provinces, except with Kirino, Shinohara, and a few others of high talent and ability. He formed a private society and, waited for a good opportunity to raise an army against the government. When Lieutenant-General Oyawa proposed going to Europe to observe the war between France and Prussia, he persuaded Saigo to go with him, hoping that he would improve his mind. Saigo promised to accompany him; but a few days before the time of starting he declined. He seemed to have a desire to visit the Western Powers, but could not bear to leave his society. This will be enough to show the affection existing between Saigo and his countrymen. When Mayebara rose last year in Choshu, Kirino and others persuaded Saigo not to miss the opportunity thus offered to take up arms against the government, and preparations were commenced with all despatch. Meanwhile the Choshu insurgents were routed by the imperialists, so Saigo ceased his operations and persuaded his men to wait for a further opportunity. But they became much excited, and with all his persuasiveness he could not calm their agitation.

The effects of the storm of the 11th inst. were most severely felt in the South. A junk of 500 koku burden was wrecked in the mouth of the Kawaguchi, Osaka, and another in Nishino-Miya. Thirteen persons

were killed or badly injured; and about 100 houses along the coast of Kiushiu were destroyed.

THE *Nichi Nichi Shinbun* states that H. E. Kuroda, President of the Agricultural Department, is expected to leave shortly for Kioto.

ACCORDING to the *Nichi Nichi Shinbun*, a shizoku of Kagoshima, who arrived in Tokio from that place a few days ago, says as follows:—The insurgents seem to find no difficulty in obtaining provisions, but they appear to have exhausted their ammunition. Saigo is not, however, discouraged. He says he can stand against the imperial troops in the three provinces of Satsuma, Hiuga, and Osumi for five years. He expects in that time to see the accomplishment of his desires; and if his hopes are not fulfilled he will then commit suicide. He is said to be employed constantly in keeping up the spirit of his men.

SINCE the Keishi Kioku (Police Bureau in Tokio) issued the order to levy new police on the 15th May, the following number arrived in Tokio up to the 17th instant:—

KEN.	
Kanagawa.....	38
Fukushima.....	685
Miyagi.....	1,319
Niigata.....	341
Ishikawa.....	249
Yamagata.....	750
Nagano.....	60
Ibaragi.....	83
Akita.....	75
Tochigi.....	146
Awomori.....	64
Gunba.....	4
Aichi.....	88
Sakitama.....	75
Iwate.....	109
Shidzuoka.....	8
Tokio.....	632

Total.....4,726

Besides these, 4,230 policemen, newly enlisted, are now in the South-West, making the grand total of new levies 8,956.

ON the 5th instant, the decoration of the First Class of the Japanese Order was conferred by His Majesty the Mikado on Prince Arisugawa-no-miya, Commander-in-Chief of the imperial armies.

IKEDA, ex-lord of Sushiu, has instructed his ex-retainers to enroll themselves as troops. About 600 of them have formed a company, and are expected to leave for the South-West.

ON the 16th instant General Saigo was summoned to appear before the Mikado on some important business.

THE RISSHI-SHA OF TOSA.

(From the *Choya Shinbun* of the 8th July.)

THE terrible flame of fire raging in the South-West is gradually being put out, and it is expected that a long time will not be needed to extinguish it altogether. Let the eyes of our countrymen change, however, the direction in which they have been gazing, and look for a moment upon the conduct of a society in the Nankai-do, formed of shizoku under the jurisdiction of the Kochi-ken (Tosa). What is it that has served to excite us to distrust their conduct? There must be some reason for the agitation manifested at their action; but, considering carefully the facts, we have found nothing worthy of distrust in them, and we have deceived ourselves by groundless reports.

What is it we mean by "a reason, for exciting our countrymen to distrust the conduct of the shizoku in Kochi ken?" We

can easily know how this distrust originated when we considering the establishment of the Rissshi-sha in the same ken. When the question of a Corean expedition was under the discussion of the ministry, and Goto, Itagaki and others resigned their posts, following the example of the present rebel commander in the South-west, was the time when it was first founded. Each of these men took, respectively, a different direction. One retired to the mountainous region: in the South-West, while the others insisted on establishing a representative assembly among their friends. But the retirement of Saigo is now discovered to have been from a desire to carry out the purpose he is now striving for. So our countrymen cannot believe that the intention of Itagaki, Goto and others has been merely to establish a representative assembly, and in consequence have become much distrustful of their conduct in forming a militia.

According to what we have heard in the streets, the famous bearer Kataoka Kenkichi, of the memorial of the Rissshi-sha Society arrived in Kioto and wished to hand it to Sanjo-Saneyoshi, *Daijo-Daijin*, in person. But he was not allowed to do so; and his attempt to give it to some *Sangi* met with the same result. At length, Osaki, Chief Secretary of the Daijo-Kuwan, received the memorial from Kataoka, who was obliged by the Secretary to take it back to his Society. We have received a copy of it.

[Here follows, in brief, the substance of the memorial, the translation of which was published in the *Japan Gazette* on the 23rd ultimo.]

No article of the memorial touches the present difficulty. But it excited us to distrust their conduct more and more. And our people have resolved to ask the members of the Society the following questions:—What is their idea of the present condition of Japan? If they desire to have a representative assembly established in Japan, will they wait till the war in the South-West is finished? Now the imperialists in the South-West have not yet returned victoriously to the East: His Majesty the Mikado is stopping in Kioto: the Government authorities are much distressed; and the people are wishing for the restoration of peace. Notwithstanding such being the condition of affairs the members of the society brought their memorial to the Mikado's palace. Why is it their intention to censure the past acts of the Government? Some of our men distrust the efforts of the members of the Rissshisha to oblige the Government to accede to their wishes by taking advantage of their troubles; and others considered their memorial as a manifesto for raising the standard of revolt against the government. In the meantime, six shizoku of the Kochi ken have been arrested in Osaka, and imprisoned in the jail at Kioto, where they have been repeatedly examined. This has served to increase the prevailing distrust of the Society. Besides, the Government has made several preparations for contingencies.

If we were only to consider the outline of the memorial, we should become much distrustful of the conduct of the Rissshi-sha Society. But this would not be right. * * *

THE *Choya Shinbun* publishes the following letter, sent by the Okura Trading Company in Fusan, Corea:—

The Japanese settlement in Fusan is not very extensive, but it is almost entirely a business settlement. The streets are divided into two, one is named Benten-dori and the other Honcho-dori. Many godowns are

it in a line on the shore side of the settlement, and shops are built behind every garden. The Kanri-kancho, or local Japanese office, is situated in Honchi-dori, which is a beautiful position, facing the harbour of San. Fine pine forests are on the left and right sides. Foreign, home, and police affairs, are all transacted at the Kanri-kancho, where, however, the officials have not any very great tax upon their time.

Last spring the river in the settlement was dredged and cleaned out, and the streets were so repaired by order of Kondo, Superintendent of the Japanese Police. A small hill is on the coast, on which he wishes to make a garden for our residents, and the work has been commenced. Omura, a large village lies at a distance of 30 Korean miles from the Japanese settlement.

During the second and tenth months of each year a large market is established, and numbers of merchants assemble there, from the eight roads which lead to it. Their merchantable articles consist of Japanese wares for the most part. A large fair is also held twice a year by the Chinese at Choki, Jeian-tai. This is the most prosperous market in Corea.

Business with the Japanese is mostly transacted by the native officials, who send their agents to negotiate with us.

Gold dust, which is one of the articles most traded in, is found in abundance in the rivers Naitan, Nainei, Naiko and other places. Several sorts of coarse cotton cloth, and round fans are manufactured plentifully in Senra-tai, where hides are also procurable. The best ginseng abounds in Kinki-tai. Coal mines have been discovered in Keisho-tai, silver mines in Senra-tai, and tiger-skins are brought from Kogen-tai.

It is very difficult to change the Korean religion. About ten years ago, a French missionary is said to have landed in Kokwa. When he commenced to preach his doctrine, the natives banded together to murder the new comer, but they were dispersed by the officials. There is a large monastery in Keisho-tai, where 3,000 bonzes dwell.

(From the *Hochi Shinbun*.)

Notification No. 52.

It is hereby notified that all merchant junks of Japanese construction must hoist the national flag when visiting foreign countries.

The smallest one of the three flags, described in the regulations for merchant vessels, issued in January of the 3rd year of Meiji (1870), must be used by the junks in question.

IWAKURA TOMOMI,
U-Daijin.

9th June, 1877.

THE Ki-ito Aratamegai-sha (Silk Company) has been abolished.

On the 8th inst., H. E. Iwakura, U-Daijin, with three Secretaries, and Lieut-General Ida, inspected the newly enlisted troops, now on the drill ground of Narashino.

It is expected that about 700 policemen will leave for Kiushiu in the *Genkai Maru*, which will be despatched from Yokohama to-morrow.

YESTERDAY the Sangi and several other high officials, and the Foreign Ministers in Tokio, visited the Nobles' School at Nishikimachi, Tokio.

LIEUT-GENERAL KAWAJI left Kioto for Tokio, yesterday morning.

CORRESPONDENCE.

We do not hold ourselves responsible for the opinions expressed by Correspondents.

CHIRI MARU vs. AUDACIOUS.

To the Editor of the *Japan Gazette*.

SIR:—As one of the jurors in the case of Iwasaki Yataro vs. Captain P. Colomb, perhaps you will allow me to say a few words on the subject. The learned Judge remarked "it was much to be regretted that the jury had refused to hear further evidence, as it was equivalent, to stating that their opinion was unanimous and the examinations of more witnesses would not alter the decision arrived at." You in your issue of last evening conclude your able leader with words of similar import. Of course neither the learned judge nor yourself could by any possibility be aware of the fact that four of us were quite agreed as to what the verdict should be, and that the evidence was stopped at the suggestion of one of our number, who by so doing led us to suppose that his opinion coincided with ours, and there would be no difficulty whatever in arriving at a fair verdict.

In justice to myself, and I think I may safely say three of my brother jurors, I must ask you to publish these simple facts, and hope this course will be the means of disabusing the minds of the public of any erroneous ideas on the matter.

Your faithfully,

JAMES J. GRAY.

Yokohama, 6th July, 1877.

HAKODATE.

JUNE, 18th, 1877.

(From our own Correspondent.)

The events of the past fortnight have not tended much to relieve the dull monotony of life at this port. The movements in shipping have been almost confined to the small steamers of the Kaitakushi, and native fore-and-aft schooners. The Swedish barque *Hedvig* left with a full cargo for Shanghai on the 14th. All passengers arriving by junks and other vessels are "interviewed" by officials of the paternal government, who keep a steam-launch for boarding purposes. Military levies are collecting for despatch to the South, but the numbers are insignificant, only about six hundred having been mustered up to the present time. The natives continue building small schooners for the coast trade. They are generally weak in construction, and indifferently fitted out, but seem to serve tolerably well the purpose of their owners, and suit the limited capital on which such persons trade. One of a better class, a schooner of about ninety tons register, was launched by Messrs. Thompson and Bewick on the 12th. She was christened the *Ottosei*, and I understand is to be placed under the British flag. Captain Will, the owner, takes command himself. She is expected to be ready for sea in a few days.

No Mitsu Bishi steamer uphas t in an appearance since the war in the South took definite form, but overland mails arrive with tolerable regularity by way of Awomori, reaching this sometimes within seven days from Tokio. The foreign agent of the M. B. M. S. S. Company was recalled to Tokio last month, much to the detriment of the spread of the

Gospel among the intelligent natives of this city, though it is reported that considerable progress is making at Satsporo, where all the foreign employes of the Kaitakushi are now located. A very fair quality of lager beer has been manufactured there, which at any rate cannot fail to have a civilizing effect.

THE INTENTIONS OF SAIGO TAKAMORI.

WHAT do our countrymen think will be the end of the machinations of Saigo Takamori? Will he resolve to sacrifice his head and order it to be sent to the imperialists? Will he commit harakiri, leaving behind him the remembrance of an honorable end? Will he surrender to the imperialists, as did Eto and Mayebara, and being condemned to decapitation leave behind him a name stained with lasting infamy? According to an opinion we have formed on these points, he will not surrender and commit himself to the mercy of the imperialists; nor will he sacrifice his head to his enemy. Judging from his usual conduct he seems to prefer the third dark ending to his career.

But Saigo, being a man of high ability and talent, may have some other scheme. According to a current rumor, he has collected a large number of women, and employs them in making Chinese garments. We express our wonder at what is said to be his plan.

When the rebel commander first raised his forces in the western corner of the empire, he must have surely believed that he would make a triumphal entry into Tokio after one campaign; but not only has he not been able to march victorious to the east, but he has been obliged to give way before the imperial troops day by day.

He will soon find no place in which to shelter his head, and (if he remains in Japan) will be obliged to give up his life. Still, he is at the head of about 10,000 resolute men. He is thought to have made up his mind to the fact that nothing, except his ruin, can result from his protracting his resistance to the imperialists till the last, and that he will endeavour to make his way to China at the head of his troops. It would be very easy for the warlike men of Kagoshima to make a successful invasion of China. * * *

Our countrymen distrust his intention in having Chinese clothing made. They do not understand his mind. Saigo having had no chance of satisfying his ambition in Japan, has been obliged to direct his projects to China. Since he has made his resolve, he would naturally wish to establish a new form of government, and he has foreseen that, to have any chance of success, it is important for him to obtain popularity with the Chinese. So, he has endeavoured to make himself as like a Chinaman as possible in his customs, manners and clothing. He is expected to attack the Chinese empire in the character of a Chinese. His ability, backed by the valor of his troops, is enough to enable him to subdue the whole country within three years (!) * * * There is no man of power and talent in the Chinese government, with the exception of Le Kosho, who is sixty years of age. This rumor may not be quite unfounded. * * *

NEWSPAPER PROGRESS.

(From the *Osaka-Nippo* of the 28th June.)

We cannot forget that the newspaper regulations and the laws against slander were issued on this day in 1875; and we notice, with fear

and trembling, that the third anniversary of the notification has arrived. Glancing back to this date last year we find that the newspaper people in Tokio closed all their printing offices, and held their famous meeting at the Asakusa temple in order to impress the date upon their recollections. We in Osaka do not know what has been done to-day by the newspaper writers in Tokio! But our sympathy should be with them, though we are in the west and they in the east. Last year we did not suspend the issue of our paper on this day, fearful for us; but we are sure that our readers will remember our article on the subject of newspaper reform, and now we, following the precedent by us established last year, are going to relate all the matters, which have occurred in regard to newspapers, during last year, or from the 28th June, 1876, to the same day in 1877.

By the enforcement of the press regulations a large number of offending contributors and editors were condemned during the first half year of 1876. Some of them transgressed the regulations intentionally, and wrote in a state of excitement which rendered them fearless of any condemnation. But during the second half year, the points of the hair pens of our disputants seem to have been much worn away, and the writers did not design intentionally to talk evil against government measures. A very few transgressors were brought to justice, and most of them were condemned for having accidentally violated the laws against slander. Since the 28th June, 1876, Umakoshi, ex-editor of the late *Somo Zasshi*, in Tokio, was condemned to three years' imprisonment for having transgressed the 13th article of the press regulations, and Nakayama and Kise of the late *Hiron Shinbun*, and Yamada, of the late *Kokai Shimpō*; and Higo, Imai, Ariyoshi, Sasajima, Kosho, Matsukawa, Okubo, Sakai, Takabane, Takahashi, of various other papers in Tokio, were either imprisoned or fined for having offended against the press regulations. Hidzuka, of the *Mainichi*, Seido, of the *Saikai*, Tzaka, of the *Futsu*, and Bandai, of the *Osaka-Nippo*, came in for their share of punishment. Besides, Ito and Nakamura of the *Nichi-nichi*, Makita and Sakuma, of the *Hochi*, Nakajima, of the *Akebono*, Ito, of the *Naniwa*, and Sudzuki, of the *Yomeuri*, and many others, were condemned to be fined for having violated the laws against slander.

On the 5th July, 1876, the government issued a notification, that when any daily and weekly papers or magazines should be deemed subversive of the peace of the country they should be interdicted and their publication suspended. We newspaper writers expressed various opinions on the subject. In a few days after this date, three papers, viz., the *Hiron*, *Kokai*, and *Somo Zasshi*, were suppressed. The last mentioned carried the matter from the local office to the Supreme Court, and claimed that the *Somo Zasshi* had afforded no reason why its publication should be stopped. But its petition was disregarded by the court. Three papers under other names, viz., *Chingai*, *Koko*, and *Moso Zasshi* took the place of the suppressed journals. During the autumn of last year, the first was suppressed; and immediately two other papers were published under other names, viz., the *Bunmei* and *Somo Jijo*. They were in their turn suppressed. Such are the alterations which have taken place in newspapers in 1876.

Since the Kagoshima insurgents rose in the South-West, the government has prohibited us publishing any idle and unfounded rumors regarding the insurrection. And the editors of the *Saikio*, *Nagasaki*, and *Jiyu Shinbun* have been fined for their heedlessness.

Owing to the progress of civilization, newspapers have greatly improved throughout Japan. We have no room to give a detailed description of their progress. In Osaka, which is next to Tokio in population and prosperity, we had only two papers, namely the *Nanima Shinbun* and *Osaka Nippo*, up to June of last year. Since that month, various papers have been started and the circulation of each of them has become very extensive. In Kioto we have also various papers, which are prospering in spite of their recent origin. According to a custom which we shall follow on every anniversary of the promulgation of the press regulation, we thus record the history of journalistic affairs during the past year.

THE OPERATIONS OF SAIGO.

How wonderful is the endurance of the Kagoshima men! and how ingenious the operations of Saigo are! He, at the head of only the samurai of one county, contrives to maintain a firm stand before the armies of the entire country, and still manifests no sign of discouragement. At one time he appears in the West and at another time he appears in the East. His prompt and ingenious movements are greatly admired. Who is it that can look upon his achievements without admiration, even though his conduct be guilty and distasteful, and though he be only a shizoku? The insurgents who rose in Fukuoka-ken and Yamaguchi-ken, took up arms in the morning and laid them down in the evening. Though their positions were certainly unfavourable from the natural character of the country, still their leaders, Ochi and Machida, did not exhibit that genius which has been so visible in Saigo's career; and, therefore, their downfall was speedily effected, and they suffered for their crimes by decapitation.

In glancing back we perceive that the first battle fought between the imperial and insurgent forces, was between the 10th and 20th of February last, and so it will be seen that five months have elapsed since that time. During this interval the imperial troops have been victorious in every battle; their movements have been ably directed; and they greatly exceed the rebels in numbers. Yet, notwithstanding this, the rebel forces do not appear to be at all discouraged. They first show themselves in one place, and the next that is heard of them is that they make their appearance somewhere else. They have apparently plenty of food, which they have obtained from the three provinces of Hiuga, Satsuma, and Osumi; and their soldiers have also been raised from the same three provinces, so that it is not difficult to form a pretty correct estimate of their strength and the condition of their commissariat. In spite of their numerous defeats the insurgents still harass the imperial forces.

At the commencement of the war the Kagoshima insurgents were entirely routed at Takase, Yamaka and at other places; but at Tawara, Tarinosu, Yoshiji, Uyeki and other places they succeeded in bravely checking the imperialists for more than fifty days; though at Kumamoto they were obliged to raise the siege and left the province entirely in the hands of the successful troops. At that time it was generally thought throughout the empire that the war was near its conclusion. But the routed insurgents re-assembled at Mihune, Kiyama, Yabe, Otsu, Sashiki and other places, fixing their head-quarters in the strong castle of Hitoyoshi. Twice were the imperialists, on attacking the insurgents in their new position,

driven back with considerable loss. It was thought that the full power of the insurgent force was concentrated at Hitoyoshi. But when a division of the imperial army was landed at Kagoshima with a view of attacking them from the rear, they found several strong parties of insurgents camped in various places. About 8,000 imperial troops attacked these several times, and some most desperate battles were fought.

A strong party of the insurgent force penetrated to Bungo, passing through Higo, and the position of the imperial troops became very serious. Thus it became known that the insurgents numbered many more than anticipated; and though they have lost Hitoyoshi they do not appear to be discouraged, and the repeated victories of the imperial army have resulted in nothing of consequence. The insurrection is not only a great trouble to the Government, but also to the nation, and we cannot tell when it is likely to terminate. *Osaka Nippo*.

A LETTER TO SAIGO.

THE *Osaka Nippo* publishes the following letter, addressed to Saigo, the rebel commander, by Iwamura Mitsutoshi, the new Governor of the Kagoshima Ken:—

SIR:—Since you first raised troops, you have repeatedly resisted the Mikado's armies in the province of Higo, and your power was at one time very threatening; but now you are much discouraged, and it is well known that you cannot recover the advantages you have lost. Notwithstanding this, you have put your hand upon arms, provoking shizoku and common people to revolt. What can you be thinking of? In these past days, I, Mitsutoshi, have been appointed Kenrei of Kagoshima. I am now stopping in the Kencho, doing my best to protect the people from injury, and to promote their welfare. Sir, you have grown up in this land. What pleasure, then, can you feel in spreading the poison of calamity through your country? Think a while, and confess your crimes before the multitude, and avoid being the cause of the death of even one more innocent man. You will make some amends for your criminal misconduct by promptly killing yourself on behalf of many others. I, Mitsutoshi, upon whom has devolved the duty of protecting the people from injury, cannot endure your conduct any longer, so I send you this letter with my instructions. I hope that you will be your own judge.

IWAMURA MITSUTOSHI,
Kenrei of Kagoshima.

To SAIGO TAKAMORI.

ABOUT THE NEWSPAPERS.

(From the New Tokio Hanjōki.)

The winter sleep of the time of rude customs having ended, the spring of civilization has arrived, brilliant literature is shedding its lustre upon society, and the newspapers are assisting to spread its agreeable influence.

Now, every newspaper has its own particular specialty: for instance the *Nishin Shimbun* (at Ginza) contains mostly official notifications and law reports; the *Nichi Nichi Shinbun* (at Kayacho, Asakusa) reports the interesting events which have happened in the capital; while the *Hochi Shinbun* gives us the provincial news. These three papers are the most noted in the capital. They contain foreign news, geological information, market prices, estimates of commercial prospects, and various

entertainments, as well as critiques upon the
city of singing girls and the behaviour of
kocho.

These papers effect great good in society,
will illustrate by one fact below.

A poor costermonger as he hears the noon-
gun, hurries to his home, which
at the extreme end of a Uradana,
sitting down instantly in his room,
sighs suddenly, and then begins to
talk to himself. "I will cease my gambling
games," says he, "and learn to read and write,
make a gentleman of myself. That I will!"
Perhaps this man has never sat down properly
in his life before, the crosslegged being his usual
pose, so he presents quite a novel appearance.

His wife, upon whom he glares fiercely, as
he says to her;—"You are always eating
fried potatoes, when you are out, and drink-
ing saké when at home. How can you be so
lazier! It is I, not you, who always have to
perform the domestic duties of drawing water
and cooking rice; but you are never able to
run a single sen, though you can drink a sho-
ake at one time. Besides, it is very
of you always to join in with that pawn-
broker's wife in abusing the mercer's mistress.
You are too talkative," continues he, "and you
are skilled in the use of all kind of abusive
language, so that, when I say one word to
you, you return ten there and then, thereby caus-
ing me to give way to passion; and the usual
quarrel ensues between ourselves, which re-
sults in the circulation of our shameful fame.
Therefore I have resolved that the relations
of husband and wife shall cease between us."

Then, taking up pen and paper, he begins
gravely to write out a divorce, when his wife,
who has remained very cool, suddenly ex-
claims:—"Hallo! what's this game? How
ridiculous!" Then she calls out loudly to her
friend next door:—"Do you hear? My old
dunce has been bewitched again by a white
fox, and is delivering a speech, as if he were
talking in his sleep. Come and hear him!"

"Hold your tongue, will you?" says the hus-
band; but, the woman's tone being raised still
higher than before, he can not endure her in-
solence any longer, and is about to beat her
on the head with his fist, when he is suddenly
struck by his recollection, and says to himself:
—"Yes, this is what it comes to! To
restrain his anger is what a gentleman
must do." So he softens his voice as he
says to his wife:—"Be quiet, and listen
while I tell you something. When I went
this morning to a certain merchant's house to
sell my vegetables, I heard a banto there read-
ing, from a newspaper, these words which I
remember well, as I listened to him with pro-
found attention.

"In a certain Uradana, there lives a vegetable
seller, an idle and ignorant creature, who has
his wife as idle as himself, and fond only of
drinking and eating. Well, this wretched cou-
ple do not seem to care whether their rice box
is full or empty; but, whenever they are
angry, the woman reproaches her husband,
and he in his turn hisses at her, and soon a lively
quarrel ensues between them, in which the man
grabs the hair of the woman's head with one
hand, and beats her on the head with the
other, while the obstinate woman is equal-
ly brutal towards her husband. Thus it
is said to be a very rare occasion, when
there is no noise in the house during
the twelve hours of the day; and they have been
reported by the neighbours to be great distur-
bers of the peace. Fortunately, the police have
recently taken notice of them, and sentenced
the man to a suitable fine in accordance with
the police laws."

"Now this is an account of what we

have done and were punished for the other
day; so while I was listening, a cold sweat
streamed down my face, and I felt sincerely
ashamed; for you must know that the whole
country will learn our bad name, when a paper
once reports it, and such a reputation as we shall
get will not vanish like smoke. Now, do you
think it is pleasant to hear such a thing? There-
fore, in order to alter my behaviour and wash
away this shame, I think it necessary that we
should separate. However, I will not
insist upon it, but will be quite willing
to remain with you, if you will resolve to
change your bad habits, and improve your-
self."

"It was my fault, it was really my
fault!" says the wife, looking downwards to
conceal her tears. "I swear I will try to be
obedient and faithful to you henceforth.
Heaven punish me, if I ever break this sacred
oath!" "There you are right!" cries the now
happy husband. "You are really a noble
woman, since you are so prompt to amend!"

THE FIRST INTRODUCTION OF FIRE- ARMS INTO JAPAN.

(From The Taiheiki.)

On the 2nd day of the 12th month of the
8th year of Temmon, (A.D. 1539) Shurino-
tayu Shimadzu Yoshihisa, the Daimio of
Satsuma, presented five fire-arms to the then
Shogun, Ashikaga Yoshiharu, through his
ambassador, who used to visit occasionally
the court of the Shogun. He said that, al-
though the empire was then in tumult
through the ambitious motives of the Sho-
gun's disloyal subjects, the gods sent him
(Shimadzu), through the hands of foreigners,
fire-arms, which he now presented to the
Shogun, in order that he should subdue his
rebellious people and stamp out the evils of
war for ever with the new weapon. The
Shogun was much pleased with the precious
present, as well as with Shimadzu's loyalty,
and promised to act according to his good
advice.

Well, fire-arms have been known in our
country since the first year of Bunki, (A.D.
1501) when a Namban (Southern barbarian)
ship arrived with them, but the people being
quite ignorant of their use, they remained
utterly unnoticed.

On the 25th of the 8th month of the same
year as that when the Daimio of Satsuma
presented the guns to the Shogun, another
Namban ship, with about a hundred mer-
chants, arrived off the bay of Koura in the
island of Tanegashima, which lies at the
south of Osumi. When the islanders boarded
the ship to ask where the strangers came from,
no single word of the others was understood by
either party. Fortunately there was a China-
man on board the ship, who could make
himself understood by means of writing, so
he landed and met with Oribenoshō Tanega-
shima Tokimasa, the son of the governor of
the island, who wrote on the sand with a
stick, "Where are you from?" to which the
Chinaman replied, also on the sand, "I am
from the great Ming empire, (China) and am
a Confucian professor, named Gohow; and
have come here in the ship, which the
Namban merchants fitted out in order to pay
their respects to the Japanese Emperor.
They are all barbarians, who do not under-
stand any ceremony, nor do they use any
chop-sticks in eating, but their own fingers."
Then Tokimasa appointed the harbour of
Akaogi, which is thirteen ri from there, as
the place of his formal interview with the

chief of the foreigners, and he and the China-
man parted company.

On the 27th the large ship entered the
harbour, where Tokimasa and his father
Tokitaka, accompanied by a learned priest of
Riugenji as interpreter, awaited the foreign-
ers' landing.

Soon the chief of the foreigners, whose
name was Murashikusa (*sic*), landed with the
Chinaman Gohow and others, and had an
interview with the governor. Then the chief
showed the governor an iron stick, about
three feet long, which vomited a lightning-
like flash, with a noise like that of violent
thunder. This astonished every body pre-
sent; so Tokitaka asked the chief through
the interpreters for an explanation of the
nature of the curious iron stick; but he would
not tell, until the governor had begged him
hard, and promised him handsome presents.
Then he said that it was the gun, which was
first invented in a country named Romania
(*sic*), one of the eight countries in Eiro
(Europe), at the time of King Yohan
(Juan) of Portugal, by a man who had
observed a lamb which was blinded by an
orange pip shot from the fingers of a girl,
who was amusing herself by pressing the
seeds between her fingers. He knew at once
that anything in rapid motion had immense
force; and, after great labour for many years,
he produced this weapon, which far exceeds
the bow and arrows in power, destroying
wicked monsters and fierce beasts. The
stranger further explained that in handling
it a man must take great care, and gave two
guns to the governor, who in turn gave him
many precious presents, as he had promised.

Soon after this the governor commenced
the practice of target shooting, and one of his
servants, named Sasagawa Koshiro Tokishige,
became so skilful that he did not miss his
aim once in a hundred times. The governor
also established on the island a forge for the
making of fire-arms, in which he succeeded
so well that he was enabled to present guns
of his making to the Daimio of Satsuma,
who again presented some of them to the
Shogun. A priest of Negoroji in Kii applied
to the governor to be admitted to the forge
to acquire a knowledge of the art of gun-
making. However, at that time, owing to
the imperfect knowledge then possessed of
screw-making, great difficulty was ex-
perienced by the smiths; but fortunately,
the following year (A.D. 1540) another for-
eign ship arrived with two skilful gunsmiths,
who imparted the important missing know-
ledge concerning screws.

Among the gunsmiths of the governor's
forge one Kimbei Kiyosada was the most
skilful, and he made many thousands of guns,
which were spread over Kiushiu. Tachi-
banaya Matasaburo, a native of Izumi, was
also an excellent smith, and introduced the
new arms to the middle states; while, in the
following year, Matsushita Gorosaburo, a
native of Tanegashima, who had been in
Ningpo, China, where he perfected his know-
ledge, imported them into the eastern states
of the empire. Thus, within three years after
their appearance, in the reign of Temmon,
fire-arms came into general use throughout
Japan.

CURE FOR SEA-SICKNESS.—The London corres-
pondent of the Liverpool Daily Post tells that the
homœopaths have discovered a certain remedy
for sea-sickness. It is apomorphia, and a very
small dose of it taken once an hour in water will
remove the qualms. They are so certain of its
success that they are going to procure a gratuitous
circulation of it amongst vessels that carry passen-
gers. It is also useful for beasts, whose sufferings
are often extreme.

NOTICE.

THE interest and responsibility of MR. CHARLES DAVIS MOSS in the co-partnership business of the "JAPAN GAZETTE" ceased by consent on the 31st December, 1876.

C. D. MOSS.

J. R. ANGLIN.

REPORTS.

The British steamer *Belgic* reports:—Left Hongkong on the 19th instant, at 5.30 p.m. On the evening of the 23rd, in Lat. 30 N., Long. 131 E. the steerage watchman saw a Chinese passenger named Lay Moy jump overboard. The engines were stopped and reversed full speed, a boat lowered and sent in charge of the 3rd officer to look for him but was recalled after an hour's unsuccessful search. The *Belgic* then steamed ahead full speed but nothing was seen of the Chinaman. The man's effects, worth about \$200, were handed over to his nephew. Arrived in port at 5 p.m., June 26th.

The British steamer *Gaelic* reports:—Left San Francisco on the 9th June, at noon. Had high variable winds to the Meridian with fine weather thence fresh breezes from S. W. and West. The last four days had fog, and unusually strong easterly current. Arrived at Yokohama on the 1st July. The Ger. schr. *Benedicta* reports a heavy typhoon on the 25th June veering from East round North to S. W.—Lowest Bar. 29.28—rest of the passage calm winds and calms.

The American steamer *City of Peking* reports:—Left San Francisco June 20th, at 12 M. (discharge Pilot at 2.30), with 10 Passengers Cabin, 5 Europeans and 180 Chinese Steerage, 489 packages valued at \$825,191.61, 26,728 packages Freight, 1,022.24 tons, 16 bags U. S. Mails, bringing for this Port 15 Passengers, 8 bags Mail, 1,180 packages Cargo,—75.24 tons. Weather Meridian of 180 and Latitude ranging to 45.1 smooth sea, and moderate winds from S. W. continued fog. Thence to port light Southerly wind and foggy, with smooth sea.

Yokohama Market Report and Prices Current.

STAPLE IMPORTS.

During the past few days some activity has been shown in imports, though no material advance in prices has been established. The market is firmer and the tone decidedly better than it has been for some time past. Stocks of yarns are low, and an advance is anticipated for 28/32's, particularly if higher rates are obtained for Silk offering than foreigners appear now willing to hazard. Particulars of the transactions in Yarn and Shirtings will be found below: 7lb. shirtings are not wanted at the moment, and the quotations are nominal.

The schooner *Juliane*, with general cargo from Hamburg, the barque *Etta Loring* and the ship *Charter Oak*, both from New York, with kerosene and general cargo, and the ship *Countess of Kintore*, with general cargo, from London have arrived. Transhipped cargo ex steamers *Deccan*, *Euphrate*, and *Pekin* from London; and *Anadyr* from Marseilles is also to hand.

ARTICLES.	PRICES.	REMARKS.
COTTON PIECE GOODS.		
G. E. Grey Shirtings—		
7 lbs., 38½ yds. 39 in. per piece.	\$1.30 to 1.75	{ Between 28th June and 9th instant, inclusive, the following actual sales of Shirting were made. 8½ lbs. 43,500 pieces \$1.50 to 2.25. 9 " 28,800 " 2.00 to 2.61.

Yokohama Market Report and Prices Current.

STAPLE EXPORTS.

SILK:—The commencement of the new Silk season has been unusually dull. The state of European politics and the absence of any encouragement from home have tended to reduce the demand to a minimum, while the comparatively low prices offered are so much under the anticipations of producers that only small quantities of silk have appeared upon the market. Transactions during the past fourteen days have been limited to about 350 shipping bales and about 100 remain unsold. There has been an advance of \$20 to 25 per picul for hanks; and present quotations are as given below.

TEA:—A moderate business at declining rates has been done since departure of last American Mail on 24th ult. Settlements for the interval amount to Picul 10,400. Prices show a drop all round of about \$2; but owing to the miserably uncertain tone of the New York market, buyers have but little heart to operate freely. Most instructions for orders sent from that centre are based on "Total Export" for current season from the country, to arrive at which at the present moment would require more prescience than men who are content to be Tea buyers in Japan possess. The S. S. *Glamis Castle* has been laid on for New York via Suez at £4. per 40 cubic feet; and the sailing craft *Etta Loring* is also on the berth for same destination at £2. 15.

DESCRIPTION.	PRICES PER PICUL.	REMARKS.

BIRTH.

On the 17th inst., at No. 6, Bund, the wife of A. PELIKAN, Esq., H. I. R. M.'s Consul, of a daughter.
At Amoy, on the 5th July, the wife of Major K. FUKUSHIMA, Imperial Japanese Consul, of a Son.

DIED.

On the 14th July, ALICE FITZ-HENRY, aged one year, at the residence of her parents, No. 88, Bluff.

Summary.

OUR last Mail Summary was dated the 11th instant, for despatch by the P. M. Str. *City of Tokio*, which left this port at daylight on the 12th for San Francisco. Since then we have received the following mails:—

Per M. M. *Tanis*, M'seilles, 3 June, arrd. 16 July.
" P. & O. *Malacca*, London, 8 June, " 21 "
" O. & O. *Oceanic*, S. Fr'esco, 3 July, " 22 "
And despatched the following:—

Per M. M. *Tibre*, for Marseilles - - - 11 July.
" P. & O. *Sunda*, for Southampton - - 18 "

VERY little intelligence has been received during the past few weeks from the districts in which the insurrectionary war is waging. A short time since so nearly complete was the state of inaction that it really appeared as if the revolt was at its last gasp. Since then, however, it has given signs of renewed vitality. Kirino has been heard of; and some actions, of trifling import-

ance, have occurred between his men and the imperial troops. Probably the heat of the weather is, more than anything else, the cause of the lull in the storm of war. Meanwhile the Government continue to send large reinforcements to the South. Fears are prevalent that the accumulation of numbers of sick and wounded men in the hospitals of Nagasaki, Osaka, and other places, may, in the present all but tropical heat of the weather, cause an epidemic of cholera. Little is just now heard of Saigo, beyond rumors, from time to time reproduced, of his having committed suicide, to which no credence is attached by anyone.

LIEUT.-GENERAL KAWAJI, who was accused by the Satsuma Gakko-to of having sent persons to Kagoshima, for the purpose of assassinating Saigo, just before the outbreak of the revolt, and who has done good service to the imperial cause during the war, returned to Tokio a few days since. He was received with very much more than sufficient pomp as a "conquering hero;" and has since resumed his duties as Head of the Police Department.

ITAGAKI, ex-Sangi, and now president of the Risshi-sha Society, to the memorial of which body to the Government we alluded in our last summary, is expected to return shortly to Tokio from Tosa, where he appears to have been employed in giving counsels of moderation to, and in trying to preserve tranquility among, the excited samurai. His presence in Tosa has been a cause of grave anxiety to some members of the Government; but the preservation of order, and the limitation of the Risshi-sha's manifestation of discontent to mere memorializing, seem to be principally due to him.

A NEW imperial palace in Tokio has been for some time projected; and an appropriation for this year's expense of the building, so far as that may be advanced, was made in the financial estimates. The work will probably be commenced on the 1st of August.

SOME fires, which as a rule are fortunately infrequent in the summer season, have occurred in Tokio, the provinces, and Yokohama. One in the last mentioned place, which is supposed to have originated in the act of an incendiary, burnt about fifteen houses to the ground.

TELEGRAPHIC communication with Europe by the southern route is partially interrupted, owing to the cable between Penang and Singapore being out of order. The damage is hourly expected to be repaired; but, meanwhile, as messages between the above named ports have to be conveyed by steamers, there is a delay of some days in their receipt.

No acknowledgement by Great Britain of the admission of Japan into the Postal Union has been received.

It appears probable that H. M. the Mikado will return from Kioto to Tokio about the end of the month. The native journals repeat the rumor from time to time, and preparations are being made for the reception of His Majesty in Yokohama. He has now been absent from the new capital for six months, a very long extension of the term for which he first intended to remain away. His projected return is looked upon by the sanguine as an augury that the insurrection is somewhere near its close.

SEVERAL earthquake shocks, of comparatively trifling intensity, have been felt in the course of the last few days. Though Japan can never be said to enjoy complete immunity from the risk of these visitations, yet at this period of the year they are held to be somewhat out of season.

THE weather during the past fortnight has been very hot. Wells are drying up, and the want of rain is universally felt.

H. E. COUNT BARBOLANI, the newly arrived Italian Minister, has been received at Kioto by H. M. the Mikado, to whom he presented his credentials. His Excellency made the passage to and from Kobe in the fine corvette of his nation, the *Cristoforo Colombo*, which returned to this port on the 23rd instant.

A PAINSTAKING and valuable report on the Trade of Kanagawa for 1876, from the pen of Mr. Consul Robertson, will be found in this summary.

THE Amateur Dramatic Corps have given three of a series of summer promenade concerts in the Bluff Gardens. These entertainments are deservedly popular and largely attended. Aquatic sports, under the auspices of the Amateur Rowing Club, have been held on two successive Saturdays.

THE attention of those who are interested in the written language of Japan is directed to a review in the following pages of Mr. Aston's admirable grammar, a second edition of which has lately been published.

MR. W. BRAMSEN has published tables of Japanese weights and lineal measures, with their equivalents in English and French standards.

SEVERAL editors of native journals have fallen under the ban of the law, and been punished with fine and imprisonment. The authorities seem in no way inclined to relax the rigor of their Press laws, or their enforcement in the case of writers who offend by telling too much truth.

THE Mitsui Bishi Company are still adding, by purchase of European vessels, to their steam fleet.

PROFESSOR CARME, a noted billiard-player, is giving a few exhibitions of his skill in this settlement.

A JAPANESE LOAN.

IN a series of articles recently published in this journal the financial embarrassment of the Japanese Government, their issue of an unlimited quantity of paper money, and their action in absorbing five-sixths of the capital of the Fifteenth National Bank by a sort of forced loan at an annual interest of five per cent. unsecured, were subjects treated at some length, and we regret the necessity which compels us again to refer to the financial condition of this Empire.

The expenses of the revolutionary war now raging in the Southern portion of Japan are variously estimated, by persons competent to form sound opinions, at from thirty to fifty million yen; this sum which, in comparison with the exceedingly limited resources of the country, is vast, is daily being increased, and it is a constant source of wonder and surprise that the Government have for so long been able to stem the tide of national embarrassment and to stave off the inevitable crisis which follows an uncontrolled issue of paper tokens in lieu of specie. The budget for the financial year ending June, 1877, admitted a liability for 94,000,000 yen in paper currency. There is apparently no disputed question as to the increase of this sum by the issue of paper to meet the home expenses of the war, and in all probability the present issue of paper money is not short of 140,000,000 yen, or in round figures £28,000,000 sterling. To this must be added the amount due for the home debt, and for the commuted pensions of the *Kura-Shizoku*. Continuing the debt to the present time the entire liability of Japan to home and foreign creditors, including the amount due for commutation of pensions, is not extravagantly stated at three hundred and thirty million yen, or sixty-six million pounds sterling, an enormous liability to a country which possesses an income of 63,000,000 yen only. We have produced these figures because a report which seems to have good foundation is current to the effect that INOUE KAWO's visit to London is for the purpose of raising a second foreign loan of large amount. The experience of English and French capitalists in foreign investments has of late been most unfavorable. The repudiation by Turkey, and the almost similar action of Egypt, of liabilities involving a direct loss of two hundred millions sterling, has tended to make investors particularly cautious as to the borrower, his security, and the purposes for which the money is required, and the uses to which it will be applied. Japan must not therefore be disappointed if her application for more money is not so graciously received as were the overtures for the first loan; nor must she be surprised or annoyed if the possible lenders make very searching inquiries into the political and financial status of the would-be borrower.

The political affairs of this country are kept carefully concealed from the minds of natives as well as foreigners. No one knows, or is at all likely ever to know, the real merits of the cause so earnestly advocated by SAIGO, a man who, having everything that tends to make life honorable,—affluence, military fame, the regard of his fellow countrymen—at stake, is content in support of the cause to unhesitatingly risk all. The Japanese Government is now carrying on a war for the expressed purpose of putting down this man and his followers, and we have no reason beyond a blind confidence in the present administration for considering the war just

or necessary, or more positively, for not looking upon the war as both oppressive and cruel. Telegrams have been industriously circulated in the chief capitals of Europe and America to the effect that the "rebellion" has been suppressed, but, although the exact relations of the contending forces are unknown to the foreign press, it is evident the struggle is still going on and the probable result may be either for or against the interests of the Government, the *personnel* of which is threatened, the members of which may, at any moment, be supplanted by men who would very unwillingly, if at all, take over a burden of foreign debt increased, not for the development of the resources or industries of the country, but for the improper purpose of aiding the Government in a war of suppression and extermination directed against a large section of the people, who may, for all we know to the contrary, be engaged in a struggle for liberty and reform.

Granting the superior force of the Government, and their ability to eventually put down the armed rising, and to reduce the rebellious districts to subjection, we have still an equally serious rock ahead: the great cost of the war to the present time, and the certainty of that cost being still largely increased, will form so huge a burden that the resources of the state may be found utterly inadequate to meet even its domestic liabilities; and the liquidation of foreign debt would then be practically impossible. Under such adverse circumstances the bondholders would be in no better position, than that held by those who have the misfortune to be creditors of Turkey and Egypt.

It is in no spirit of hostility to Japan that we call attention to the probable eventualities of a new foreign loan. We have a double duty to perform, and we must discharge it to the best of our ability. While it would be unfair and improper to comment upon the actions of the Government in this matter under ordinary circumstances, it is still absolutely necessary that the conditions under which a loan to Japan will be at risk, should be fairly set out; and while foreign capitalists will gladly advance large sums to this country for the furtherance of industry and peaceful pursuits, it is almost hopeless to assume that the same men will lend money for the prosecution of a war in which they are in no way interested; a war which, for all that is known to the contrary, may be in direct opposition to the principles which form the constitutional Governments of the world.

JAPAN AND THE POSTAL UNION.

HITHERTO we have refrained from making any extended comments upon this question, in the hope that justice would be promptly done to the Japanese Government by the graceful adjustment of a difficulty which should never have been allowed to arise; but which, having unfortunately arisen, it was the duty of the British Government, with whose neglect it appears to have originated, to remove with the least possible delay. We had thought and hoped when, on the arrival of the last English mail, we reproduced a paragraph from the *London and China Express* of the 25th May, stating that Japan would be admitted to the Postal Union from the 1st June, and giving the postal rates which under the convention should on that date come into force on the communications between the two countries:—we had then thought and hoped that Her Majesty's Re-

presentative in Japan would have received some intimation from his Government of the admission of this country into that splendidly designed and universally to be admired community known as the Postal Union of Nations. Our hope was ill-founded, however: no instructions of any kind have been sent to SIR HARRY PARKES; and we consequently see the anomaly of a country universally admitted to a union by which it is entitled to certain privileges, on the condition of simple reciprocation, debarred from the enjoyment of those privileges, at the same time as it is willing to reciprocate them to the utmost of its ability, the extent of which is no longer a matter of legitimate question.

Now, before entering at length upon our subject, we will for once allude, merely to dismiss as useless for consideration now or henceforward, the arguments which are so frequently adduced against the advisability of having admitted this country into the Postal Union at all, or at least not until after the lapse of some further period of probation. We will even go so far as to admit that the measure, or concession if that term be preferable, was premature, and that all the dangers of delay in the transmission of letters, of defective arrangements, of inefficiency in the staff of the department, of alterations which shall do much to undo the good which has already been wrought in the organization of the service, are imminent. We will allow that it is infinitely preferable to have three or four post offices belonging to different nationalities, each making up a separate mail, and each regulating its own tariff of charges on a different basis, rather than have all the work connected with the receipt, distribution, and transmission of mails performed in one office, having one tariff of charges. When we have conceded all this, we have, we think, granted as much as can reasonably be asked; but we do so willingly, the rather perhaps that the whole admission does not touch the matter one way or the other.

The original treaty concerning the formation of a General Postal Union, was signed at Berne on the 9th of October, 1874; and the parties who agreed to it were the Representatives of Germany, Austro-Hungary, Belgium, Denmark, Egypt, Spain, the United States of America, France, Great Britain, Greece, Italy, Luxembourg, Norway, the Netherlands, Portugal, Roumania, Russia, Servia, Sweden, Switzerland and Turkey. In that treaty special and comprehensive provisions were made for the admission of other countries, at any subsequent period, to the Postal Union, on certain well defined conditions, to which the Powers so admitted would have to subscribe. The country which most recently availed itself of the privilege, and subscribed to the conditions, was Japan, which is, consequently, as much a Postal Union Country as is Great Britain; and as much a part of that "single postal territory" "for the reciprocal exchange of correspondence," whereof, according to the terms of the treaty, each Postal Union Country is a constituent, as is Great Britain or any of the other parties to the original treaty. This being so, it may well be matter for astonishment, first, that a delay which appears capricious should have prevented Japan, even temporarily, from taking advantage of the stipulations, of the treaty, and, secondly, that that delay should be caused by no other Postal Union Power than Great Britain herself.

In this affair that country does not occupy a very enviable position; and her unaccountable silence has placed her own Representative in Japan, as well as the Post

Office officials of her colony of Hongkong and of the branch of the Hongkong Post Office here, in a position of uncertainty how to act, and of apparent hostility to the Japanese, which is by no means creditable, and which might have been and should have been avoided. The whole question, and all the unpleasantness which has arisen out of it, turn upon the fact that the English Government have not notified their acceptance of the admission of Japan to the Postal Union to their officials, who, willing as they would be to afford every assistance in their power to the putting in force of the provisions of the treaty, are really powerless to act one way or the other on their own responsibility. Under the circumstances Sir HARRY PARKES have done the best he could, with the view of avoiding great possible difficulties, in inducing the Japanese Postmaster General to suspend for the moment any attempt to force his mails on board the English mail boats, even under the sacred seals of the French Post Office; and Mr. MAYESHIMA, if merely to avoid dispute was his object, has also done well in giving way to his representations, though he might have done so without throwing the onus of the publication of a notification, which his Department had a perfect right to publish, upon a foreign servant. But it is only on the score of expediency that Sir HARRY PARKES' action and Mr. MAYESHIMA'S compliance can be justified. We will suppose that the one had insisted less, and that the other had been less willing to concede. Then, the arrangement entered into between the Japanese and the French Post Offices would have been carried into effect. A mail for Europe and Postal Union Countries beyond would have been made up at the Imperial Japanese Post Office on the night of the 3rd instant, forwarded to the French Post Office, put by the French Postmaster into his mail-bags, which would in the ordinary course of business have been sent under seal to the English Post Office, and thence have, also as a matter of course, been sent on board the P. & O. steamer *Malacca*. It is hard to say what action would then have been taken by the Agent of the Peninsular and Oriental Company; but it would be paying a very equivocal compliment to that gentleman to suppose that, even fortified by the thirtieth clause of his Company's contract with Her Majesty's Government for the conveyance of mails, he would have been insane enough to have violated the seals of the French mail-bags, for the purpose of seeing that those bags did not cover Japanese letters. There was some loose talk, at the time when it was uncertain whether the Japanese Postal Authorities would insist upon their rights, and avail themselves of the means of despatch for their letters placed at their disposal by the French Government, to the effect that before taking the French Mails, the P. & O. Co.'s Agent would demand an affidavit from some one that no Japanese letters were inside the bags. Had he done so he would have been as far advanced as, according to Percy, Owen Glendower was when he summoned spirits from the vasty deep. Any other course than that of forwarding the bags, under as great an amount of protest as he pleased, would have been adopted by him at his own peril, and to the great prejudice alike of his Company and the English Government. Still, there is no denying that that peril and prejudice might have been incurred; and then all the great universal blame which falls on those who violate their treaties would have been the part of the British Government, who, by their remissness, if no greater fault, have been as

it is the cause of a great deal of trouble and ill-feeling, and of placing their Representative in a painful position from which his tact has certainly extricated him for the time, but in which he should never have been placed, and which, both by what it threatened, and by the very means taken by him to avert possible consequences with the humiliation of the Japanese Postmaster-General, whose part in the business is to be pitied, if it is not pitiful, will leave a very sore feeling behind. This soreness will need some salve to remove it. If "he who gives quickly gives twice," the converse, that he who gives slowly and reluctantly only half gives, is equally true. The gift demanded by the Japanese was already theirs by right; and no injury is more keenly felt, by nations as by individuals, than a withholding of what is justly due. The injustice done to the Japanese by the British Government, through withholding all acknowledgment of rights which are as much those of Japan as of their own country, if even it arose out of mere neglect, is much to be regretted. It will beyond question be repaired in time—the sooner the better for British honor. Mr. BRYAN and the Japanese Postal Commissioners are now in Europe; and on their representations, if not before, the matter will be set right; but every Englishman would prefer to see a wrong righted by the spontaneous action of his Government, rather than after an arraignment of that Government before the representatives of the Postal Union Treaty Powers at Berne.

This article would not be complete without a reference to the generous, but after all merely just, attitude assumed by France towards Japan on this postal question, at the moment when it was generally known that Japan had entered the Union, an attitude which has since been carefully maintained, and which contrasts so favorably with the apparently churlish one taken up and so far held by England.

THE foregoing article contains an allusion to a subject which merits more than so merely passing a notice. When Japan entered the Postal Union she doubtless imagined that the foreign Post Offices in her territory would soon cease to exist, and that the entire postal business, of natives and foreign settlers alike, whether domestic mails for distribution in her own territory, or foreign mails for receipt from or transmission to other lands, would be transacted by her own Postal Department. This opinion has been also largely shared by foreigners, who look upon the abolition of the British and French Post Offices in Yokohama as a certainty, and a fact to be accomplished at no very remote date. Such an event is more than probable; but it is by no means a necessity following from this country being a subscriber to the Postal Union Treaty. Probably in time, if substantial guarantee be given by the Japanese Government for the proper fulfillment of the tremendously responsible duties of the foreign postal service, the English Government will consent to the withdrawal of the branch of the Hongkong Post Office here. We mention only the English Government, as the action of the French Government does not directly concern us or our countrymen, and further as, judging from appearances, France will be more easily satisfied than England in this matter. At the same time it were well that the fact should be realized that the admission of Japan to the Postal Union does not, of necessity, imply the abolition of foreign Post Offices in this country. That is matter for separate considera-

tion; and the English Government might possibly decide to do in Japan, as we believe they still do in Turkey, another Postal Union Country, namely, maintain their own postal establishments. That they will do so in the event of substantial guarantees being given for perfect service, and in face of the condition of admirable organization attained to by the Imperial Japanese Post Office Department is, however, unlikely; and we look upon the withdrawal of the British Postal Staff within a period of no considerable remoteness as more than probable. Some years since, when the Japanese Government opened negotiations, with a view to the end they have long had in view, for entire postal control in their own country, one at least of the Foreign Ministers made it a *sine quâ non* of the mere entertainment of the idea of the concession, that the staff of the Post Office of his nation here established, should be transferred to the Japanese postal service. No such condition would probably now be dreamt of; but, we repeat, England at least would certainly insist upon guarantees of unquestionable weight, before relinquishing all control in the very important matter of postal communication between this country and Europe.

H. M. MINISTER AND THE JAPANESE POST OFFICE.

THE blame which we consider the due of the British Imperial Government, and the grounds of which we explained at some length in our article upon "Japan and the Postal Union," is in no way lessened by a very creditable action on the part of Sir HARRY S. PARKES, of which we were unaware at the time that article was written, but which has come to our knowledge in an indirect way since that time. After the notification, since in part withdrawn, bearing the signature of the Acting Superintendent of Foreign Mails, on the subject of the transmission, in French-mail bags, of mails made up at the Japanese Post Office, by vessels of the P. & O. and M. M. Companies, had appeared in the local papers, and while the British Postmaster and the P. & O. Company's Agent here did not know clearly what course would be open to them in the event of the intention, expressed in that notification being, to its full intent, persisted in, H. M. Representative suggested a way out of the difficulty by taking all the responsibility upon himself. He caused Mr. MAYESHIMA to be informed that if, in pursuance of the notification, that official wished that mails should be forwarded as announced in the vessels of the P. & O. Company, he would be happy to anticipate the action of the British Government, and to arrange that no obstruction should be offered by either the British Postmaster or the Agent of the P. & O. Company. Sir HARRY PARKES' good offices were not accepted, however; and, as is well known, the Japanese authorities have for the present waived all right to forward their mails either directly through the British Post Office, or through the French Office for conveyance in P. & O. mail boats.

His Excellency's action was thus commendable and farsighted. It proves that he sees that the concession, on the part of his Government to that of Japan, of full participation in all the privileges and responsibilities of a Postal Union Power must be granted soon. It shows that he at least has no desire to be obstructive; but wishes, on the contrary, to afford every aid to the advancement of this country on the road of pro-

gress. It affords one more proof, however, of the inconvenience of the course of silence, adopted in this matter by the British Government, which is also shown more clearly than before to be alone responsible for the very awkward position which was created for all persons concerned, and which, but for Sir HARRY PARKES' tact and good judgment, might have produced serious complications.

We may regret, but are by no means surprised at, the rejection by Mr. MAYESIMA of His Excellency's good offices, and the withdrawal by the former of an official notification, rather than the acceptance, as a favor and a concession pending fuller instructions, of what should have been conceded long since in full and as a right. The more perfect the view of, and the fuller the light thrown upon, this matter, the less the part taken by the British Government appears worthy of the rulers of a great nation. This is one of those cases for which no excuse is available, and for which possibly none will be offered. The best course to pursue is to grant as quickly as possible those rights recognition of which has too long been unfortunately withheld; and then the less said the better. Meanwhile, H. M. Minister has done the best he could to remove both the cause of offence, and what ill-feeling it may leave behind, for the existence and possible continuance of which he is and will be in no respect responsible.

THE EXPORT OF RICE.

ABOUT one month ago we called the attention of the community to the existence of a great public abuse—the monopoly of the rice trade exercised by the Japanese Government—and we naturally expected that, having opened a path for discussion, the matter would receive the consideration its importance demanded. Two letters, which may be noticed here and dismissed in the same sentence, have, it is true, been published; but nothing has been written which does, in any way, throw suspicion upon the premises, refute the arguments, or controvert the deductions drawn from them in our former article on the Export of Rice. Other articles treating subjects of almost equal importance to that of the rice monopoly which have appeared in this paper, have been subjected to much adverse criticism, based upon a thorough misapprehension of the motives which dictated, and the spirit which animated the articles in question. With some pleasure, therefore, we observe a desire on the part of our colleague the *Japan Weekly Mail*, to enter into an examination of the merits for and against the present export of rice to European markets by and for account of the Japanese Government. Before proceeding to review the statements set forward by the *Mail*, it is necessary we should explain that the object of the article in the *Gazette* of the 18th June last, was not to invoke sympathy on behalf of the foreign merchant anxious to have the control of the export of rice; nor do we consider that the text of the article in any way shows a misapprehension of those facts which, falsified or inverted, “necessarily vitiate all reasoning founded upon them.” We stated *seriatim* five points on which the argument was founded that the present system of the export of rice was an irregularity prejudicial to merchants and to the country at large. Those points briefly stated are:—1. By treaty rice was a prohibited article. 2. Rice is now an absolute Government monopoly. 3. Instances of previous analogous transaction in silk and

rice, and the abandonment by the Japanese Government of their position, when that position had been explained to them. 4. The evasion of the notification permitting the unrestricted export of rice; and, finally, that the Government exercises a monopoly of the rice trade eminently prejudicial to the people of this country. In treating the rice in possession of the Government as *taxed* rice, or rice received from the people in lieu of money in payment of taxes, we made no error of importance, even assuming the literal truth of the correction upon which our contemporary lays so much stress; but we do not admit the correctness of the *Mail's* assertion; and, if the rather perplexing sentence in which tax collection is referred to be analysed, it will be found that the intended correction resolves itself into corroboration of our to be implied assertion that taxes are paid in produce. If in theory, taxes are paid in currency, but that currency must be obtained by a forced sale of produce to the Government collecting the taxes; payment for the rice being made by the purchaser in the same currency in which the taxes were paid; (and this statement is gravely put forward by the *Mail*) we must strip the sentence of its redundancy, and the obvious truth then appears that taxes are collected in kind and not in money. Had it been stated that the Government came forward in open market to compete with natives and foreigners for the purchase of the rice set apart for payment of taxes due, then we should have admitted the collection to be in currency, not in kind; but the real facts are as we have stated: that after the representations made by H. B. M's Minister regarding the system then in force, the surplus rice intended for export, instead of being shipped through one or more individuals on behalf of the Government, was publicly offered for sale by tender. The rice then offered belonged to the Government, and its proceeds represented the money value of the taxes for which payment had been received in produce: any sum realised above the assessed tax value of the rice was not refunded to the producer, but was retained by the Government as a fairly legitimate profit on a sort of speculation forced upon them by the exigencies of national poverty. The sales by tender went on for some few days—twelve or fourteen—and a quantity of rice was obtained by foreigners, whose tenders, free from all those charges, expenses and commissions to which non-traders are invariably subject, were higher than the Government tenders. Here was a difficulty to be overcome: if foreigners could afford to pay more than the Government for the Government's own produce, the real profit was to be realised in Europe by export there and not by sale on the spot. Influenced by these considerations, and doubtless acting under advice unsound and unwise, the Government, while nominally carrying out the conditions of sale by public tender, did, by their agents, tender at such prices as to effectually prevent competition by foreigners; and, as a necessary consequence, the whole of the rice nominally offered for public competition was monopolised by the Government, who treated the proceeds of the sales in Europe, not the amount of their tender here, as the value of the taxes collected in kind. The result of the sales of the rice so obtained was, as we have before stated, most disastrous to the Government; but nevertheless their vacillating policy has again induced them to enter into a trade, the nature of which they are, from their position, absolutely ignorant of, and from which they can expect at best, but unremunerative returns,

and, under the ordinary fluctuations of markets, excessive losses must be prepared for.

We are now told that the “revenue system” which existed years ago (providing for “the collection of taxes in kind”) is not “now in force; and that the Government “professedly buys, and in fact, to some extent does buy, in open market; a market “in which from the enormous advantages of its position, it must have “everything pretty much its own way” the rice it now exports to Europe. We confess we cannot understand this sentence. To be plain, the Government, if it does not actually buy in “open market” must, by means of “the enormous advantages of its position,” take over at its own price from the taxpayers the produce which, if sold in “open market,” would realise very much more than the Government ever pays. The unfortunate producer, “ground between the upper and “nether millstones,” is forced to sell his grain to the tax-master at whatever price he can obtain for it. It is open to him, certainly, to sell his rice on the spot at a time when from exactly similar necessity, thousands of his countrymen are trying to do the same thing; or he can send his rice to the chief seats of demand, Tokio and Osaka, where there any means of transport upon terms which, while sufficiently remunerative to the shipowner, should still leave him in a position to dispose of his produce in open market, at much better prices than can be obtained from the agents of the tax-master. The means of transport at the command of the producer are, however, of the most limited description, and wholly insufficient to meet the requirements of a coasting trade which, once organised, would grow with startling rapidity: it is the absence of wholesome competition in maritime service on the Japanese Coast which proves so eminently prejudicial to the people, who unable to transport their produce to “open” markets, are forced to dispose of it at the best terms they can make under the most disadvantageous circumstances that can possibly be conceived.

Having, as we think, sufficiently demonstrated in our articles on the Coasting Trade and Export of Rice, that the interests of foreigners are identical with the interests of the people of this country—and indeed it is a fact that requires very little demonstration—we have, by suggesting valuable reforms, offered practical sympathy to the native producer of rice, who can only look for relief from his present heavy and unjust burdens when the Japanese Government shall abandon illegitimate operations in trade, which are not merely in opposition to the spirit of the trade treaties, and injurious to foreign merchants, but are seriously, cruelly, prejudicial to five-sixths of the population of the Empire.

This being our reply to the criticisms of our contemporary, it may be useful to glance once more at the system under which the export of rice is being conducted. The produce which comes to the hands of the Government is taken from the producer in payment of taxes due to the state. Disguise the fact as you will, or clothe it in the obscurity of many words, and still the plain truth must appear, that the Government obtains annual possession of a large quantity of rice, at prices favorable to them but eminently unfavorable to the producer. The surplus stock available for export is, by these measures, brought under the immediate control of the Government, and if any foreign merchant desires to avail himself of the permission to freely export rice granted in April, 1875, he is driven, by the circumstances of the case, to

purchase from the Government agents who are, at all times, ready to outbid him in offers made directly to the producer. The Government in the meantime is steadily shipping quantities of rice to Europe, believing that by so doing they can prevent competition, and the effects of competition in prices, in European markets. The export of rice is nominally free, but actually the Government, while asserting that they do not interfere with the free export of rice, take advantage of their position; and the rate at which the rice comes into their hands, virtually prohibits the export by others if only for the simple reason that any such export by a private individual would be an inevitable loss, arising from the price he would have to pay for the rice in the first instance, and because the interests of the Government would necessitate his being driven out of the European markets. What further evidence can reasonably be required, that the Government is exercising a monopoly so complete that the notification granting free export of rice becomes a mere farce? Why dilate further upon the ruinous effect upon trade which similar governmental action in regard to silk and tea would have? Or why use further words to show that, if the Japanese Government are justified in monopolising the export of rice, as they now do beyond the slightest doubt, they are inflicting upon the mass of their countrymen a cruel injustice, and upon foreign merchants, whose presence here is, we repeat, more beneficial to the country than advantageous to themselves, a wrong which, if THEY are content to bear, we ought not to complain of; but until this wrong is remedied, or until we know that it is accepted as irremediable, we intend to keep before the public the important subject of the "Government monopoly of the Export of Rice."

MR. ASTON'S GRAMMAR OF WRITTEN JAPANESE.*

THE appearance of what is practically a new treatise on Japanese grammar from Mr. Aston's pen will be welcomed by all students of the difficult speech of this country. It is true, the author has, perhaps properly, chosen to call the book before us a second edition of his first work on the written language. But the relation of the former edition to the present is that of the seedling to the full-grown tree. In mere point of size the treatise has grown to more than double its former dimensions; and it has been so thoroughly re-written that scarcely a page, and only here and there a paragraph, remains the same in the two editions. In the method of exposition there has been no departure from the judicious arrangement and luminous conciseness of statement which enabled him in his first essay, while omitting nothing essential, to condense into less than eighty pages the substance of over a score of native grammatical works. But on all the more abstruse portions of the subject the treatment is much fuller than before; an entirely new feature has been added in the shape of an exhaustive chapter on prosody; and throughout the work the number of illustrative sentences has been copiously increased. This is precisely where the need of expansion was most felt by students of the first edition; and it is a pity that the author

has not done himself the justice to state that most of these apposite exemplifications of abstract rules have been culled, as it is evident they have been, from the best known of the native classics.

A new feature of the work, and one which can hardly fail to strike the eye at whatever page it is opened, is a change in the mode of spelling a number of Japanese words. The isolative particle *wa*, for instance, is replaced by *ha*; the verb *sôro*, to be, is at first hardly recognizable in its new guise of *sufurafu*; while somewhat the opposite effect is produced by the rehabilitation of *onna*, woman, which now appears, when restored to its rightful spelling of *womina*, to proclaim affinity with its English equivalent; a coincidence, by the way, which will be most likely seized upon by philologists of the school of Mr. EDKINS, and claimed as a case of actual etymological identity. The propriety of the change in the system of transliteration thus introduced is, in a treatise on the written as contradistinguished from the spoken language, scarcely open to doubt. The first and indispensable merit of any system of transliteration from one phonetically written language into the phonetic symbols of another, is that it should be perfectly consistent throughout. The problem of the best method of representing the spoken sounds of any given tongue by the written characters of another is not here in question. As regards colloquial Japanese, the system of romanized spelling established by Dr. HEPBURN, and adopted with slight modification by Mr. ASTON and Mr. SATOW, may be taken to be finally settled as the best attainable. But in modern Japanese, as in modern French and English, the pronunciation is not always conformable to the spelling. In all three languages, owing to the operation of the same universal linguistic law, sounds once living have become obsolete, leaving their fossil remains imbedded in literature in the shape of redundant and silent letters. To the linguistic student these discrepancies between the orthography of past ages and the orthoepy of the present, are facts of transcendent importance. To cite a well-known instance, it would be difficult to overestimate the value of the contribution made to Greek philology by the rediscovery of the digamma. And, singular to say, a phenomenon closely parallel to the disappearance from the Greek speech of the semi-labial aspiration represented by that letter, has demonstrably occurred in the course of the phonetic changes undergone by the Japanese tongue. In the pronunciation of the present day in such words as *omofu*, *omohi*, *omohé*, the breathings indicated by the *f* and *h* are altogether inaudible. Yet it is as certain as anything of the kind can be that when first reduced to phonetic symbols these sounds were distinctly given in utterance. The proofs are not far to seek. If the final syllables in such words were pronounced without the aspiration it would have been easy to write them so, for there is a separate and complete series of symbols for the unaspirated vowel sounds; and it would be absurd to suppose that the ability which was equal to the invention and tabulation of the *kana* should have proved inadequate to the simpler task of properly stringing them together. But we are not left to merely conjectural reasoning. The existence of such dialectic varieties as *samurafu* and *saburafu* side by side with *sufurafu*, place the matter beyond doubt. In the interests, therefore, both of consistent transliteration and of comparative philology, Mr. ASTON has done well in making the orthographical innovation in question; and, taking into consideration the

difference in the objects and character of his two works, there is no incongruity whatever in his spelling, in his grammar of the written language, the word *samurahi* as it is written in the native syllabary, while in his grammar of the spoken language he writes it as it is now pronounced, *samurai*.

In fact, it is only on the basis of such faithful retention of all the sounds of the oldest native forms, that any fruitful investigation in the field of Japanese etymology can proceed; and etymology is, after all, the very back-bone of linguistic science. A specimen of the crop that remains to be garnered in this field is given in the section of the first chapter on Derivations, pp. 36-38, and again in the section of Chapter IV., on Derivative Verbs, pp. 102-112. Now, as regards the purely syntactical portion of his work, our author repeatedly and amply acknowledges the extent of his indebtedness to the native writers on grammar; but of the worthlessness of these guides when they enter on the paths of etymology, of the extravagant license of their speculations in that region of enquiry, the following extracts may suffice to give an idea:—

The Japanese grammarians have supplied us with etymological appliances far more powerful than any of those described above. They inform us that not only are syllables interchangeable which begin with the same consonant, i.e., those in the same vertical columns of the Table at page 17, but that one syllable may be changed for another if they only contain the same vowel: i.e., the syllables in the horizontal columns of the Table are interchangeable. This is the old maxim that in etymology the consonants count for very little and the vowels for nothing at all, with the difference that with the Japanese etymologists the consonants count for nothing as well as the vowels. With a comprehensive system like this, the gravest difficulties are easily surmounted. Thus, if we want to show that *furuki*, 'old,' is derived from *wakaki*, 'young,' we have only to run our eye along the columns which contain *wa* and *ka* till we come to *ha* and *ra*, and then follow the vertical columns in which the latter syllables occur till we find *fu* and *ru*, and the demonstration is complete.

This rule is sufficient when the words contain the same number of syllables, but in the case of a redundancy or deficiency in their number, the native grammarians are amply provided for the emergency. By means of *jô-riaku* (aphaeresis), *chiuriaku* (elision or contraction), *geriaku* (apocope), and *jogi* (affixes), the superfluous syllables are promptly removed and additional syllables provided wherever necessary.

There is yet another system of derivation, by which words which we should be content to consider as roots are traced to fifty original elements corresponding to the fifty sounds of the Japanese syllabary. The following passage, taken from the preface of a Dictionary of Derivations compiled upon this system, will give an idea of its mode of operation.

"All Japanese words have their origin in the 'nature of the heart. For the heart has fifty 'modes of action, and consequently man naturally 'gives utterance to fifty sounds. If in his heart 'he thinks *ah!* the sound *ah!* comes spontaneously to his lips; if in his heart he grunts assent, 'he naturally utters the sound *u*; the thought *oh!* 'of alarm causes him spontaneously to exclaim *oh!* 'and so on with the rest. The combination of these 'results naturally in words. Thus the colour *aka* '(red) is so called because it is so radiant (*kaga-yaku*) as to make one feel *ah!*; *awo* (green) has 'been so termed from its being so plentiful (*ohoki*) 'as to make us feel *ah!*; *kane* (metal) is so called 'because it adheres (*nebari*) firmly (*kataku*) together."

This system is aided by a free use of *jôriaku*, *chiuriaku*, etc.

The influence of these theories is observable in the writings of even the most eminent Japanese grammarians, and it has therefore been thought desirable to warn the student against them. [pp. 38-40.]

The second chapter, on the classification of words, is substantially the same in the two editions, the arrangement of the para-

* A Grammar of the Japanese Written Language. By W. G. ASTON, M.A., Assistant Japanese Secretary, H. B. M.'s Legation, Yedo, Japan. 1877. Second Edition. London: Messrs. Trübner & Co., Ludgate Hill. Yokohama: Messrs. Lane, Crawford & Co.

graphs only being changed. Short as it is, little over a page, it is the only part of the work in which we have noticed an omission, which we think it was in the author's power to have avoided. "Japanese grammarians," he tells us, "divide words into three classes, *na*, *kotoba*, and *teniwoha*"; and these three native terms he formally adopts into his nomenclature, instead of replacing them, as we hold he ought to have done, by English equivalents. The only difficulty in doing so consists in the fact that *kotoba*, which means *verbum*, by pre-eminence *the word*, includes in Japanese the inflected adjective as well as the verb. But to a philologist of Mr. Aston's calibre the difficulty was surely not an insuperable one; and, for the rest, we fail to see that any grounds for misconception could be given by substituting "uninflected particles" suffixed to nouns for the less familiar "uninflected *teniwoha* suffixed to *na*." After all, however, this is merely a question of terminology. In point of scientific accuracy we readily admit that the classification laid down by the author is unassailable; and it is a distinct improvement upon that of the Japanese grammarians.

The constituent elements, then, of the Japanese language being nouns, predicatives, and particles, they are taken up and exhaustively treated of in that order. Of course "noun" must here be taken in a much wider signification, than that peculiar to it in Aryan grammar; it is coextensive with the term "uninflected principal words," and includes not only the pronoun and numeral adjective, but also conjunctions and one class of adverbs as well. With regard to the last named, the author himself, notwithstanding his manifest reluctance to accept the term "noun" as an adequate rendering of *na*, admits, p. 84:—

The derivation of most words of this class shows that they are really nothing more than nouns, as for example *ima*, 'now,' from *i*, root of *iru*, 'to remain,' and *ma*, 'a space'; *koko*, 'here,' from *ko*, 'this,' and *ko*, an old word meaning 'place'; *ohokuta*, 'probably,' from *ohoki*, 'great,' and *kata*, 'side,' 'part.'

One of the peculiarities which most widely distinguish Japanese grammar from that of any European language is the diversities in form and function of the adjective. That the attributive and the predicative uses of that part of speech should be marked by a difference in form is not an unusual circumstance; the German adjective to wit. But the singularity which prevents the Japanese adjective from being relegated, like that of other languages, to the category of nouns adjective, is the part played by its predicative or conclusive form. The attributive form, *takaki*, high, is an adjective pure and simple; the predicative form *takashii*, is both an adjective and a verb in one. It is this function of the Japanese adjective which brings it into the same category as the verb proper, and constitutes it a *kotoba* instead of a *na*; a true word, not merely a name. But there are other points of correspondence; and it is the clearness with which this close parallelism between the verb and adjective is kept steadily in view, and worked out in all its ramifications, that signalizes Mr. Aston's fourth chapter as a master-piece of lucid exposition.

That there are influences at work, however, tending to reduce the peculiarities of the Japanese adjective, and bring it into closer correspondence with its European counterpart, let our author testify:—

The conclusive form has almost entirely disappeared from the modern form of the spoken language, its place having been usurped by the attributive form. An exception is *nashi*, the conclusive form of the negative adjective, which is not unfrequently

used in the spoken language, although *nai* (a contraction of the attributive form *naki*), is more common. In some of the provincial dialects, the conclusive forms of adjectives are still in use. This change in the construction of Japanese is well worthy of the attention of students of language. It is as if we gave up the use of the indicative mood, and used participles instead, saying, for instance, 'he dying' or 'his dying' instead of 'he died,' 'his being killed' instead of 'he was killed.' The sensation headings of American newspapers, and the verbless sentences of telegrams and advertisements, show that English is not altogether free from the same tendency. For the manner in which this change was brought about in Japanese, see Chap. V, under the particles *no* and *ga*.—[p. 93.]

A single chapter each suffices for the discussion of nouns and predicatives, while no less than three are devoted to the particles. This fact of itself furnishes a good indication of the importance of the part played by these dependent vocables in the mechanism of Japanese speech. Indeed, one of the main functions of syntax is the elaboration of the rules by which their correct usage is secured. These rules, however, are of more interest to the student of the poetical than of the prose literature; for the composition of verses in the ancient style is still a fashionable accomplishment, whereas a writer who should publish in the present day a prose work in the diction of the classical models would stand but a poor chance of getting his composition read. The influence of Chinese literature has been fatal to the cultivation of the pure vernacular. We can imagine the feelings of regret with which our author must have penned the following paragraphs of his Introduction:—

The style most in vogue at present (and which is used in official documents, newspapers, etc.) is modelled on literal translations of Chinese books. It is charged with Chinese words, idioms and constructions to such a degree that whether read or written it is often entirely unintelligible to an unlettered Japanese, and its grammar is only a skeleton of the luxuriant system of the older language. [p. X.]

At one time a brighter prospect seemed opening on the vernacular:—

The latter half of the eighteenth century and the first half of the present witnessed a brilliant revival of the study of the old language, and it may be doubted whether Japanese has not attained a higher degree of perfection in the archaeological and philological works of Mabuchi, Hirata, and more especially Motowori, than even in the golden age of its literature. But it is to be feared that this is no more than an eddy in the main current. The old language is at present falling more and more into neglect, and the faculty of writing or even understanding it is becoming rarer every day. Its use is confined to learned treatises far removed from the daily concerns of life. [pp. IX-X.]

It would be impossible in the space at our disposal to do justice to the manifold merits of this work. It bears traces on every page of wide reading, of deep research, and of intimate familiarity with both the processes and results of philological enquiry. These qualifications were absolutely required in any writer who should undertake to facilitate for foreign students the study of the Japanese language; and how well Mr. Aston has succeeded in that undertaking he may confidently leave it to those students to judge.

THE RACE CLUB'S NEW RULES.

WITH much reluctance we once more approach the ground on which racing questions are debated, a ground as treacherous as that which thinly covers the boiling mud on the sides of Ewosama. But not merely because a subject is distasteful to ourselves, not even merely because it is of comparatively little interest to many of our readers, should

its discussion be avoided in these columns. The subject of horse-racing, as that noble sport has come to be conducted in Yokohama, with the many unpleasant issues to which its management has given rise, the scission of the racing community into two not merely opposed but actually hostile bodies, the amount of irritation which it has caused even among those members of society to whom it is a sport in which they take no part, and which they regard as an interruption to business and a fertile cause of strife, is still one which it is the irksome duty of a journal, having any claims to be a public one, to discuss.

We earnestly wished that the negotiations which were commenced long since by the Yokohama Racing Association, and apparently entertained by the Race Club, for a fusion of the two bodies into a well regulated one, might be successful; but that hope, when there seemed to be most likelihood of its fruition, was dashed to the ground; and we much regret to say that the chances of an amalgamation seem at least as remote as ever. Indeed, it appears that the strife can only cease with the extinction of one of the two societies:—we will not go so far as to say with the reduction of both of them to the state of all but complete mutual annihilation achieved by the famous cats of Kilkenny.

Agreeable as an amalgamation would be to the community generally, it must only be effected on the basis of that principle which was the original cause of the scission from the old Race Club of some of their worthiest and most prominent members: the principle on which the Association was founded, and for which it has, ever since its foundation, strenuously fought: the principle in fine on which the Race Course was first granted to the community, and which will, it is to be hoped, be carefully embodied in the Title Deed when that is issued. Conviction of the justness of that principle, the knowledge that the Race Course is the property of the foreign community at large and not of a clique, has been borne in, as it were, upon the unwilling minds of even those members of the Race Club who had come to believe that their appropriation of a common property had made it theirs. This is evident in many ways. When first the notion was broadly broached that the Race Club were filling the unenviable position of usurpers, some of the members laughed to scorn the idea of their being dispossessed. They scouted the bare notion of their proprietary right being even called in question. They denied the right of any but their own members to any participation in the course; and, as will be remembered, in one instance took a very hazardous step, which, more owing to good fortune than to the sound judgment of those who devised and countenanced it, was only not productive of very serious legal consequences. Then, the stout stand taken by those of the community who had arrayed themselves as the champions of justice, the action of the public, the support accorded to just claims by the majority of the Consuls and of the Ministers, and the very definite opinion expressed by the Japanese authorities, gradually opened the eyes of the members of the Race Club to their true position. Had they been wise, they would then have, at once and for ever, set the unpleasant question at rest, by abdicating claims to which they had been clearly proved to have no right, and by being content to share with others a possession which is as much, and no more, theirs as it is that of any other members of the foreign settlement. This, at any rate, has been clearly established:—that the most insignificant clerk or

petty trader in the place can be as fully a proprietor of the Race Course as the biggest merchant possessing the largest racing stable: that any member of the foreign community has as much a right to use the Course, should he chose, without let or hindrance, as has any gentleman-rider of the Race Club. Since this, which should never have been called in question, was decisively established, however, the conduct of the Race Club has been one persistent, and truth to say not very graceful, struggle against effect being given to the consequences. When they found that they were getting the worst of every argument, they made a great show of liberality; and, in a manner quite contrary to their traditions, and doubtless much against the grain of those of them who had a short time before preached the doctrine of "no concession," they endeavored to recruit their ranks by measures which were not far, if at all, short of actual solicitation. They next loudly proclaimed their willingness to amalgamate, their earnest, heartfelt, insatiable, devout, desire for an amalgamation. But, while opening their ranks, and advocating union, they persisted in rejecting the only terms on which union was possible. They had tethered themselves to their idea of proprietorship, and plodded round and round in a vicious circle which it is really matter of regret that they have not freed themselves from even now.

Much that is admirable, much that is a great improvement upon the old rules of the Race Club, is to be found in the amended rules, as adopted at the meeting of the Club held on the 29th ultimo. But those rules again lay down the bone of contention, across which the two racing societies have growled at each other so loudly, so long, and with the unpleasant effect of making partisans, of one side or the other, of those who ask for nothing but general good feeling among all classes of the community in their pursuits or their pleasures—who, in fact, desire but peace and a quiet life. The first rule provides "that all members of the foreign community of Yokohama are eligible to membership of the Race Club," but this right, which was, in theory, never denied, is preceded by what is tantamount to an assertion of the very premise which has all along been disputed, and with justice, by the Association, namely, the proprietorship of the Club in the Course. "The object of the Yokohama Race Club shall be to provide for the proper governance of the Race Course, and for the management of racing generally." The eleventh rule appears to have been conceived with a view to meet the requirements of the Association. It runs:—

Any member of the foreign community of Yokohama, or visitors not members of the Club, shall be permitted to ride and race at the Race Meetings of the Club under the Rules and Regulations of the Club, and under conditions to be framed by the Standing Committee.

This is exactly what the Association claim to be the right of all members of the foreign community; but the Club, in granting it, debar members of that community from membership in the Club, and consequent part proprietorship in the Race Course, except they will submit to the ordeal of ballot. So that, we regret to say, the new rules of the Race Club leave all the important question of ownership just where it was before. The Race Course belongs to the foreign community, each member of which can have, if he likes, a voice, through representatives chosen by himself, in its management. Such is the position taken by the Racing Association. The Club assume to be proprietors,

and merely by sufferance allow other members of the community to race and ride. In this assumption they are still in their old position, a position which no liberality on their part can make a just one, and which, so long as they hold to it, will render any amalgamation impossible.

THE INSURRECTION.

From the *Japan Gazette*, July 12th.

The *Akebono Shinbun* writes that the imperial armies in the South-West are composed as follows:—One part of the 1st division, commanded by Lieut.-General Takashima, consists of six battalions numbering 3,600 men; another part of the same division, commanded by Lieut.-General Nodzu, consists of 2,500; the 2nd division, commanded by Lieut.-General Yamada, 5,700; part of the 3rd, commanded by Lieut.-General Oyama, 3,300; another section, commanded by Lieut.-General Miura, 2,700. The troops commanded by Lieut.-General Miyoshi, consists of six battalions; and the forces on the Bungo road, under Colonel Nodzu, of five or six battalions. According to the confession of a rebel prisoner, Saigo was seen in Hitoyoshi till a few days before the arrival of the imperialists. He is now said to be in the castle of Miyako-no-jo with Murata. It appears, however, to be not improbable that he has committed suicide.

The *Naniwa Shinbun* says that Saigo Takamori is encamped on the hill of Tamiyoshi in the castle of Miyako-no-jo in Hiuga, and Sudzuga-mine, Ushiyama, Haraguchi, Omatsu, Takagi, Takaguma and other neighbouring places are occupied by the rebels. The castle of Miyako-no-jo is entirely surrounded by high mountains. The road thither from Kagoshima is the only one easily practicable. Saigo is expected to fight his last battle in the castle, which is occupied by only 2,000 men.

The *Nichi Nichi Shinbun* says:—A telegram from Kyoto, despatched at noon on the 8th instant, announces that, on the 7th, the 2nd division marched as far as the foot of Kirishima-yama (Hiuga) from Kagoshima and the 4th division had removed headquarters from Kagoshima to Kokubu. Large numbers of insurgents lay down their arms daily. The suppression of the insurrection will shortly be complete.—Another telegram, sent by Lieut.-General Tani in Higeoka (Bungo) says that a battle was commenced on the 4th instant, at Nagase which lies close to Higeoka. The imperial troops defeated the insurgents. On the following day the victors attacked the insurgents on the mountain Katsuchi-toge; but were obliged to retreat. A telegram from Kumamoto, dated the 9th July, states that Lieut.-General Miura entered Odori on the 7th instant, where no rebel soldiery remained. The insurgents had fled before the arrival of their foes. Half a battalion of the troops occupied Okubo, one company the building of Jinshiukan on Kirishima, and three companies attacked and seized Auraku. The Imperial troops, commanded by Lieut.-General Miyoshi, marched into Masagi, which they found deserted.

July 13th.

A telegram from Kyoto announces that on the 7th instant the imperial forces penetrated into the village of Odori-mura (Hiuga) by several roads, and attacked the insurgents at Okubo and Jin-shu-kuwan. At the former place a battle was fought in which the insurgents defended themselves with desperation. Rebel troops in large numbers had

assembled from various places where they had been severally defeated. The action lasted from noon on the 7th till 4 p.m. on the 8th. On the following morning the attack was again commenced, and the imperialists succeeded in taking the village of Okubo, and pursued the insurgents as far as I-no and Kanagoshi, where they are again making a stand. Three battalions have been sent into Bungo, one on the 2nd instant, another on the 7th, and the third on the 10th. They all landed in Saiki of the same province. A despatch sent by Sawa, *Shokei-shi* of the police, states that in the battle, which was fought during the 7th and 8th instant, about 40 imperialists were killed and wounded, and 80 or 90 rebels were taken prisoners.

A telegram from Kumamoto, sent by Lieut. Colonel Ozawa, dated the 11th instant, announces that Lieut. General Miura had marched as far as Kobayashi, and removed his head-quarters to Kokubu. Another despatch, dated the same day, says that Lieut. Generals Yamada and Miyoshi, and Lieut. Colonel Yamawara had effected a junction of their forces at I-no, where they defeated the rebels. Kirino and other rebel leaders are in Miyazaki, Hiuga, and Saigo is in Takahara in the same province. The harbour of Satsu-Minato is occupied by the insurgents.

July 18th.

A telegram, sent by Lieut.-General Tanabe at Kuniwake, to Lieut.-General Kawaji in Tokio, at 9 p.m. on the 16th instant, announces that at 2 a.m. on the 14th the 5th battalion of the imperial army, encamped on Araisu, was suddenly attacked by the insurgents; but the latter were driven back before dawn. They made another attack upon the imperial camp soon after, and were again obliged to retreat, leaving much ammunition and many dead behind them. Only four of the imperial soldiers were wounded.—A despatch from Osuake, sent by Lieut.-General Tani on the 16th instant, says that the insurgent troops attacked the imperialists at Mikawa on one side and at Usunoo on the other simultaneously. They were defeated, and retreated, setting houses on their way on fire, in order to check the pursuit of the enemy. The imperialists marched as far as Umeki and Batei.—A telegram, from Lieut.-General Miyoshi, dated the 16th instant, states that at 3 o'clock a.m. the same day, his division had commenced to march on Takabara (Hiuga) by three roads. The advance guard marched on the main road, the second division on the Hosone, and the third on the Hirohara road. The rebels were waiting to receive them on the river Tsutsuni at their forts which were cannonaded and stormed by the imperial troops. The latter were at 5 o'clock a.m. before Takahara, which they attacked, and seized after a fight of two hours. Five imperial soldiers were killed and wounded. Details will follow.—A telegram, sent by Lieut.-General Nodzu, also on the 16th instant, stated that he was ready to penetrate to Nobeoka in Hiuga. On the 8th the rebels attacked the imperialists on the Bungo road, and drove them back as far as Akamatsu. The insurgents on the same road are increasing in number and they have commenced to bombard the imperial forts. On the 14th an army of rebels appeared on the river Koshiki. It is commanded by Kirino.

July 20th.

A telegram from Higeoka (Bungo) dated the 18th instant, announces that at dawn of the 16th the imperial troops marched for the mountains of Ekono and Katsuchi. A battle

was commenced at about 3.30 a.m. at the latter place, which ended in a victory for the imperialists. Those troops who marched for Ekono were impeded in their advance upon a rebel fort by heavy rain, and obliged to retreat without fighting.

Out of one insurgent company, consisting of 80 men, 73 were killed and all of the seven who survived were wounded.—It is rumored that Kirino has been wounded.—A small island, named Okino-shima, lies about 3 *ri* South-West from Tosa. A few days ago five or six insurgents landed there and a number of police were sent to arrest them.—The insurgent army has established headquarters in the former Kencho of Miyazaki in Mimidza, Hiuga. Kirino-Toshiaki now commands in this district. It is rumored that Saigo has committed suicide in Miyakonojo castle.

The *Shinshin Shinpo* in Kioto writes:—Two shizoku of the Kochi-ken, viz., Fujiyoshi and Muramatsu, who have been arrested, confessed at their examination in Kioto, as follows:—They had intended to join the Kagoshima men a long time ago. With this aim they first arrived in Nagasaki, when the rebels seized Kumamoto castle, and came to Hiuga, after great difficulty, by passing through the imperial lines. The two men were allowed to see Kirino, who, however, distrusted them. He told them that they had lost a good chance to raise the standard of revolt in their native province, where their party numbered about 3,000. Kirino continued that, as they had missed so good an opportunity to rise in aid of the Kagoshima men, they had better cease from their enterprise. He wanted no assistance against the imperial troops, and had prepared all things so as to stand before them for seven years if necessary.

The *Nichi Nichi Shinbun* writes:—The insurgents have established their headquarters at Miyazaki. They have also arsenals at Sadowara, Takanabe, and Miyakonojo. A rebel named Shinno is acting as director of the arsenals. All ornamental hair-pins and gold and silver rings, in the possession of insurgents, have been handed into headquarters, and are being coined at a small mint in Omaki (Hiuga). Besides this, the rebels have issued paper money. They oblige all the men between 18 and 41 years of age to serve with them. All things are ordered by Kirino, who sometimes appears to direct the movements even of Saigo.

MISCELLANEOUS.

THE second Promenade Concert announced by the Amateur Dramatic Corps was, after two postponements, at length given in the Bluff Gardens on the evening of the 13th inst. The weather, which had been promising enough during the day, was in the evening almost as unfavorable as on the evenings on which the concert had been postponed. There was no rain, it is true; but the wind was violent, and the dust raised by it was most trying. Under such circumstances, the large concourse of spectators is the best proof that can be given of the popularity of these concerts, to the success of which the Band of the *Atalante* has on the two late occasions so largely contributed. Certainly, without the Band the Concert would have been the play of Hamlet with the Prince of Denmark left out, as the amateurs in their part songs could barely make themselves heard against the whistling wind at a very short distance from the pavilion. Many of the lights in the lanterns with which the gardens were

illuminated were blown out, and in some instances relighted, but only to be again, in most cases, extinguished by the wind. The courage of the performers who, in the presence of such unpleasant conditions, went through their programme, and of the audience, most of whom remained till the close, is equally commendable. We trust that the next concerts of this series will be favored with more genial weather. It is a great pity that such an evening as that of the first performance could not be ordered for the next occasion.

MR. FOOTE, of Foote's Hotel, was robbed recently of a number of articles. The thief entered his bedroom, and abstracted thence several suits of clothes and a number of other things sometime during the evening, it is supposed between 11 o'clock and midnight, while Mr. Foote was occupied in his bar-room.

THE native journals say that His Majesty the Mikado is expected to return to Tokio within this month.

THE building of the new imperial palace will be commenced on the 1st proximo.

THE great annual festival of the opening of the Sumida is still celebrated, and with notable pomp and rejoicing; but foreigners and natives who saw the ceremonies and gatherings of years ago, and have watched the subsequent festivals, are generally agreed that each succeeding year's show is less thronged and less remarkable in many ways than its immediate precursor. Like so many other things round which cling the poetry and the traditions of old Japan, this representative, this thoroughly national, gathering is losing much of its popularity, and bids fair to become, in the remorseless course of time, as much a memory of the past as are the May-day festivities in most parts of England, in which country what was once a day of universal play and joyous conviviality, has degenerated into a mere chimney-sweeps' holiday.

The 15th July brought round the anniversary long so honored by the people of the capital and its neighborhood. By half-past seven o'clock in the evening a number of boats of all kinds were assembled, close to the Riogoku Bridge, on the Sumida river, whose tributary streams, the Kanda, Kawaguchi, and Nakagawa, were dotted near their mouths with various craft. Some fifty house-boats, gaily decorated, and well-filled with pleasure-seekers, and hundreds of smaller vessels, each loaded to its full capacity, darted to and fro, or were lazily paddled here and there. The number of craft of all descriptions was, however, very much smaller than on other occasions; and, strange to say, after the heat of the day, the weather was found to be a little too cool on the water for the thinly clad crowd. Two large *chubune*, or open boats, were remarkable for their decorations. They were profusely and tastefully ornamented with flowers, flags, and Japanese lanterns, on the last mentioned the cross being painted in various colors, and the others displaying all sorts of ingenious cruciform devices. These two boats were occupied by the Abbé Brotelande, some of the other members of the Catholic Mission, and a large number of native proselytes. The decadence of the festival was most conspicuous in the utter absence of all government participation. There was not one single official party ashore or on the water; though we were informed that some officers of the government were present, but merely as private individuals. The Mitsu Bishi Company, however, in honor of the occasion, gave a grand entertainment to a number of their

servants in Nakamura's tea-house on the bank of the Sumida.

THE *Nichi Nichi Shinbun* publishes some interesting statistics of the destruction of life and property, and other matters in connection with that portion of the campaign fought at Kumamoto, which we summarize, leaving the responsibility for their accuracy with that journal. It says that a total of 14,528 houses were burned, and 1,465 otherwise damaged, in that ken. Persons rendered homeless and destitute in six out of thirteen districts reach the alarming number of 49,413, of which one district, the first, alone furnishes upwards of 40,000. Government relief, in the form of doles of rice, was distributed to the value of 16,503 yen. 76 non-combatants, and 38 horses and cattle not employed in the service of the military, are said to have been killed. The following is the list of prisoners captured, and sent from Kumamoto to Nagasaki:—

231 on the 16th May, 110 on the 1st June, 50 on the following day, 74 on the 6th June, 90 on the 17th of the same month, and 89 on the 4th instant.

SOME difficulty is experienced at the present time by natives in obtaining sufficient rice to supply their daily necessities. The storekeepers say they have not got any, and in proof of the truth of this statement show their customers a number of empty boxes; while quite a number of rice shops have closed altogether. It is generally believed that a secret meeting has been held by the dealers in this commodity, at which it was considered that, owing to the continued dry weather, there is likely to be a partial failure of the rice crop this season; and therefore they deemed it advisable to withhold from selling any for a short time, or until they see how long the dry weather will last. In the event of its lasting long enough to materially injure the crops, rice is likely to rise to a very high price. The holding of secret meetings among the rice dealers is rather a dangerous proceeding, in certain parts of the country at least; for cases have occurred of the common people, on the fact of such meetings taking wind, becoming very excited and pulling down the houses in which they have been held. Instances have occurred even of the proprietors of the houses falling victims to the fury of the mob.

AT about half-past two a.m. on the 19th inst. the firebells were rung. A fire was found to have broken out at Sanchome, Aioi-cho, running parallel to, and to the south of, Ota-machi. After the long drought the Japanese houses are as dry as tinder; and so it was soon apparent that the fire was likely to spread. Fire engines and brigades, native and foreign, were soon on the spot; but as some time elapsed before they could get water to play on the burning houses, the best work was done by those who endeavored to prevent the flames being carried to, and taking effect upon, neighboring blocks. In this they were successful, the damage being confined to one block where ten or fifteen houses were utterly destroyed, and three or four more or less damaged. The fire was extinguished in little more than one hour from its inception. The inhabitants of the neighborhood may be congratulated that the conflagration was localized.

WE hear that the steamer *Montgomeryshire* and the barque *Union* have been sold to the Mitsu Bishi Mail Steam Ship Co.

THE *Akebono Shinbun* reports that the Mitsu Bishi Company is about to establish an arsenal and dockyard at Funakoshi, between Yokoska and Kanazawa. The survey estimate puts the expense of the dockyard alone at 500,000 yen.

SOME temporary changes in the management of the Hongkong and Shanghai Banking Corporation's Branches are in course of being made. In a few weeks Mr. Walter goes to Shanghai, where he will probably remain till the end of the year, to assume control during the absence of the Manager there. Mr. Turner, who will act here for Mr. Walter, arrived in Yokohama yesterday.

A MORE thoroughly suitable summer night for open air music and amusement could not have been wished for than that of the evening of the 20th instant, when the Amateur Dramatic Club gave their third Promenade Concert. Not a breeze broke the stillness of the balmy air. The sky was clear, cloudless, and lit by a brilliant moon, before which the light of the numerous lanterns, disposed in all directions over the grounds, was pale and dim. The singers were in better voice than usual, and did not have to struggle, as on the last occasion, to make themselves heard above the whistling wind. Of the four pieces which they sung, "The Soldier's Farewell" was probably the best rendered, as it was the best received. A demand, which would not be denied, for its repetition, was made and responded to. The ous of the performance fell upon the Band of the *Tennessee*, which, for a naval band, has attained a high degree of efficiency, and, by the manifest improvement it has made of late, reflects great credit on its conductor. The performance of the *Potpourri* from Offenbach's "Grand Duchess" could hardly have been surpassed. We hope to attend a few more of these agreeable concerts before the close of the summer.

By the *Oceanic*, from San Francisco, a fresh importation of stock, consisting of bulls, cows, horses and mules, has been made by the Agricultural Department.

THE Italian corvette *Cristoforo Colombo*, arrived here at 1.30 p.m. on the 22nd instant from Kobe, having on board His Excellency the Italian Minister, who was presented to the Mikado, at Kioto, with the captain and two of the officers of the vessel, on the 20th instant.

EARTHQUAKES of some intensity have been, for this time of year, unusually prevalent lately. A short but severe shock, much more sensible on the Bluff than in the Settlement, was felt on the 19th inst. at twenty minutes to one o'clock in the afternoon. Another somewhat less violent was felt at half-past nine p.m. the same day. A smart shock was felt on the evening of the 21st, at seven minutes to five. Its duration was about thirty-five seconds. Another shock was experienced at half-past noon next day.

AQUATIC SPORTS.

On Saturday afternoon, the 14th inst., some *impromptu* swimming matches came off at the boat-house, where a large number of competitors and a few spectators assembled. All were as merry as crickets on a summer evening, each seemingly vying with the others to make the

sports as pleasant as possible; and the almost utter absence of that business-like regularity in carrying out the programme, which is an indispensable necessity at athletic sports and horse races, only rendered the affair all the more enjoyable. The weather on the occasion was delightful; the rays of the sun were genial, while the calm was only broken by an occasional fitful breeze, a mere zephyr, light and balmy.

By about half-past five o'clock the diving commenced; and the way in which some of the competitors came up, as if they had been for a long voyage, or just returned from a festive gathering among the mermaids, caused much merriment. The next event was supposed to be a two hundred yards handicap flat race, but the course must have been fully fifty yards short of that distance, and this was a material advantage to the competitor with the longest handicap, Mr. Jones, who had two minutes start of the scratch man. Mr. A. H. Dare, who of course did not stand the shadow of a chance of winning, for Jones had nearly reached the furthest stake ere Dare entered the water. The race was very well contested between Mr. Jones and Mr. Tripp the former coming in first by about two feet. Subsequently, however, Tripp was declared the winner, Jones being disqualified. Then came diving through hoops, and the way in which more than one of the competitors opened his legs as he went through, and so took the hoop out of the holder's hands, and then, turning somersaults, came down as flat on his back as a pancake into the pan after being tossed up by an expert, added to the surprised look of the performer, was ridiculously comical, and caused no end of fun. Some went clean through the hoops amongst whom were Mr. Tripp and Mr. J. J. Dare, who dive very cleverly. Some of the smallest hoops, were intentionally kept for the largest men, and no amount of protesting or coaxing could induce the master of ceremonies to exchange them for larger ones. The steeple-chase brought out five contestants. Mr. A. H. Dare struck out at a rapid pace after starting, and, reaching the first tub, clambered in and out without losing much time. Some of the others were not so fortunate, notably a tall, powerful, athlete, whose weight was considerably against him in getting into the tub, which, with provoking persistency, kept revolving like a cart wheel for some time and ultimately turned over on the swimmer. However, this was a stroke of luck, as the aspirant for aquatic fame contrived to climb on to the bottom of the craft, and remained there until the equilibrium was destroyed, when the heels of the gentleman suddenly went up in the air and he gracefully glided into the water. Dare soon established a strong lead, and had the race all to himself, as only one out of the remainder of the competitors persevered to the end. The last event was the tub race, which was as jolly as tub races generally are, and utterly defies description. By the time it was over, old Sol had hid himself below the horizon: the teeth of some of the water dogs were beginning to chatter; and it seemed to be the universal opinion that it was time to bring the sports to a close, as there was a simultaneous rush to don clothing.

THE CALITHUMPIANS.

By our Special Correspondent.

"Calithumpians to-morrow at 5 p.m."
"Drat it! What can it mean?" I tried to explain to Aunt Betsy that the word was derived from *cephalos* and *skedanomi*, and was a name given to a sect of philosophers who

determined doubtful questions of law and physic by the doctrine of chances; and I felt quite proud of my knowledge. Aunt Betsy was not quite convinced:—"But why on earth Calithumpians? You must see for yourself Trot, and tell me all about it." So I went to the meeting of this famous sect, to which all comers had been invited. On arrival I was fortunate enough to witness the initiation of a disciple of the sect: clad in white, the walking costume of the time, he stood on a narrow plank projecting over the sea waving above his head a paper-covered hoop of many colours, while two elders in the costume of the sect, stood, before, pronouncing serious words. I thought they would have crowned the disciple with the hoop, and welcomed him to their band; but at a signal, he was thrust backwards into the water, and having swallowed enough sea water was allowed to come on shore, spluttering ominous words in a strange tongue. The sect had now gathered in force and while some leapt, some raced and some paddled about in tubs, the spectators cheered and drank to the health of the victors in curious drinks. The Chief of the sect was the victor in leaping, as he kept himself straightest and longest; while a brave Teuton was declared the winner for speed in swimming.

And now appeared the competitors for the great contest of the day, "the blue ruin" of the water, clad in grotesque garments. Swarthy men with dyed faces and armed with clubs went on the stump, while one with flowing locks crowned with a pill box essayed to make a perfect cure; a strange dance of wildly swaying figures, in which citizen, negro, imperialist, and fenian joined. Every evolution was tried. Backward, forward, Manx-wise surged and fell the crowd, but always at home in water or on shore, until after a scene of indescribable frolic, the owner of an infantine garment, with any amount of anchors down to prevent him drifting was proclaimed the victor.

After rest from this orgie, there followed a race for half a mile which was won easily after a plucky race; and a good dive by the "Sprightly One" finished a pleasant afternoon. Cries for "Griffins" or "Tubs" met with no takers. Neptune himself cried "hold, enough" and blowing a whiff from his pipe disappeared.

FOOCHOW.

The gunboats *Gamma* and *Delta*, lately arrived from England for the Chinese Government, were officially transferred to their proud, but bewildered, owners on the 28th ultimo.—*Foochow Herald*.

A great amount of distress continues to prevail in the City and surrounding districts. Rice is said to be getting dearer from day to day, though the public granaries are well stocked. Should the first rice crop prove a serious failure, as now seems probable, there must follow a corresponding increase of destitution, and the province will have to look for further supplies of grain from Saigon or elsewhere.—*Idem*.

We hear of an assault by Chinese on a member of one of the Russian hongs near Kien Ning-fu. In this instance the natives seem to have received some provocation, though of course their conduct cannot be justified on legal grounds. As a general rule, except in the neighbourhood of large towns, Europeans are not molested up-country; and when they are, it may often be traced (as in the present instance) to some overbearing act on the part of the foreigner.

**BRITISH CONSULAR TRADE REPORT
FOR KANAGAWA, FOR THE YEAR
1876.**

BRITISH CONSULATE,
Kanagawa, 23rd June, 1877.

SIR.—I have the honour to enclose Returns of the Trade of this Port for the past year ended December 31st, 1876.

- Enclosure* 1.—Return of the Import Trade.
 „ 2.—Return of the Export Trade.
 „ 3.—Return of Shipping.
 „ 4.—Return of Import of Treasure
 „ 5.—A Return showing the amount of Duties collected at the Customs on Imports and Exports, together with a Return of Storage charges, also Entrance and Clearance charges in respect to Shipping.
 „ 6.—A Return showing the number of British residents and British firms, also the number of Foreign residents and Foreign firms, at this Port.

I proceed to compare the Trade of 1876 with that of 1875.

The figures for 1876 show as follows :

Imports	\$18,841,880
Exports	\$21,431,879
	\$40,273,759

Being an increase of \$5,853,120 on the trade of 1875.

The following table gives the value of the trade in Imports and Exports for the two years :—

	1876.	1875.
Imports	\$18,841,880	\$21,953,909
Exports	21,431,879	12,466,730
	\$40,273,759	\$34,420,639

Or to particularize :—

	1876.	1875.
IMPORTS.		
Cotton Manufactures	\$7,747,138	\$7,299,603
Woollen Manufactures.....	2,532,152	2,867,543
Mixed Cotton and Woollen.	593,820	1,072,292
Metals.....	626,886	655,408
Arms and Ammunition.....	51,959	42,520
Miscellaneous foreign	4,255,228	7,009,960
Miscellaneous local	3,034,497	3,006,583
	\$18,841,880	\$21,953,909
Exports.		
Silk, Raw.....	\$13,191,710	\$ 5,424,916
Silk-worms Egg Cards.....	1,902,271	474,921
Tea	3,473,178	4,813,458
Copper.....	154,003	184,710
Cocoons.....	475,296	248,416
Lacquer Ware	92,484	128,334
Tobacco	34,622	43,925
Wax, Vegetable.....	6,532	2,640
Camphor	1,789	729
Coal	11,521	23,957
Fish, Dried.....	279,495	153,414
Miscellaneous.....	1,808,980	968,039
	\$21,431,879	\$12,466,730

IN IMPORTS.

Cotton Manufactures exhibit an increase of	\$ 447,535
Woollens, a decrease of.....	335,391
Mixed Cottons and Woollens, a decrease of	478,372
Metals, a decrease of.....	28,522
Arms and Ammunition, an increase of.....	9,429
Miscellaneous, foreign, a decrease of	2,754,732
Miscellaneous local, an increase of	28,014

IN EXPORTS.

Silk shows an increase of.....	\$7,766,794
Silk-worms Egg Cards, an increase of	1,427,350

Tea, a decrease of	1,340,280
Copper, a decrease of	30,707
Cocoons, an increase of	226,880
Lacquer Ware, a decrease of	35,850
Tobacco, a decrease of	9,303
Wax, an increase of	3,890
Camphor, an increase of	1,060
Coal, a decrease of	12,436
Fish, Dried, an increase of.....	126,081
Miscellaneous, an increase of.....	835,941

NOTE.—The export of Camphor falling below one thousand dollars in value in 1875 did not figure separately in the returns of that year, but found a place under sundries and unenumerated. The export in that year was, however, as stated above, \$729.

The Import Trade of 1876 falls below that of 1875 by \$3,112,029, while the Export Trade of 1876 exceeds that of 1875 by \$8,965,149.

Of the above sum of \$3,112,029, as exhibiting the decrease in the Import Trade of 1876, only \$260,805 is the decrease in the actual trade of the place, for while in 1875 articles on Government account figured for \$3,119,535, in 1876 they only amounted to \$621,284, or a decrease under this heading of \$2,498,251.

In my last report I drew attention to the unsatisfactory nature of the trade during the period then under review, and I think the figures now brought forward clearly demonstrate that the remarks I then made were not put on record without fair grounds. Many merchants and importers have probably found that the field here, after all, is but limited, and the intense desire prevailing on all sides to enter into large operations cannot but be attended with danger in any small markets, especially in one such as this, where the capital at the command of most of the native merchants is comparatively so small.

Reviewing, however, the general result of the Import Trade for the past year, I think I am right in saying that more satisfaction in respect to trade is generally expressed, and it is admitted that not only have profits been realized on most goods, but that heavy losses on the importations of the year have been avoided. I say importations of the year, because it is impossible for me in a Report of this kind to take into consideration the stocks which remain over at the close of the year.

Merchants must necessarily be actuated by different motives in disposing of their goods, and while one is enabled to quit his consignments immediately on arrival, incurring perhaps but a small loss, another may have peremptory orders not to sell unless a profit can be realized, and in the attempt to gain this end a further loss has generally to be submitted to, for I am informed that in nine cases out of ten an offer once refused is but seldom improved upon unless from some unforeseen and unexpected circumstances.

Before proceeding to comment upon the Import figures already noted, it may be as well to examine how it is that this past year has been a satisfactory one to most Importers.

Throughout the greater part of the first six months of the year the Import trade appears to have been in a very languid and depressed state. The low prices ruling for silk in the home markets had naturally affected the export of the article from this side, and the consequence was a considerable reduction in the purchasing power of the country; in other words, that the natives having less money at their disposal were unable to purchase goods to the same extent as in former years.

The low value of silver created great apprehensions at one time, and it was feared that the rate of exchange might decline

to 3s. 6d. for six months' sight Bills or even lower, and this to a great extent prevented shipments being made to this market, for prudent men were naturally disinclined to enter into transactions when it seemed impossible to foresee at what rate their money could be returned to them. Indeed, I understand that so fearful were some of the tendency to depreciation in silver, that they would listen to no transactions unless the exchange was settled at home at the time of entering into it. The failure of the silk crop in Europe naturally re-acted upon the market, and the Banks being unprepared for the large purchases made both here and in China, the consequence was a great scarcity of money and a rise in exchange from 3s. 9½d, at which it had stood in March, to 4s. 6d. The fluctuations subsequently were considerable, and though this rate was not maintained exchange ruled much higher than what had been expected rendering the outturn of goods satisfactory in a corresponding ratio. The Japanese, too, were enabled to purchase more freely, and I am informed that at one period of the year the excitement among the Import dealers was such as had not been witnessed for many years.

The producing markets at home, after constant decline, seem to have reached their lowest point in July, and a considerable improvement took place towards the end of the year.

All these circumstances combined to render the Import trade a paying one, but, as might naturally have been expected, shipments were eventually too heavy, and the year closed with a gloomy aspect.

I have now only to make a few remarks upon the increase or decrease in the importations of various goods as exhibited in the returns.

Cotton Yarns again show a healthy increase, being 12,287 piculs in excess of 1875. Prices have remained very steady, and except at one time shipments did little more than pace with the demand.

Shirts show an increase of over 13,000,000 yards, having just recovered the position they lost last year, but I must confess, I do not consider this any sign of an increasing trade in these goods, for stocks are very much in excess of what they were at the close of 1875, and evidences are not wanting of the native merchants having bought largely in excess of their requirements. *T. Cloths* require no comment, but in *Drills* an increase in value of \$37,541 against \$12,235 last year, is due probably to the requirements of the Government owing to the disturbed state of the country.

Chintzes show a falling off of seventeen per cent., a matter which cannot create any surprise when the increased importation of the previous year is taken into consideration. The business is, I should imagine, very unsatisfactory when the risk attendant upon the introduction of new designs is taken into consideration.

Cotton Italian Cloths figure for rather less, but nevertheless prices ruling have been unsatisfactory when the risk attendant upon the introduction of new designs is taken into consideration.

Cotton Thread has been brought into the table of Cotton Manufactures. It figured in the Import Return of 1875 under Miscellaneous foreign. The Import in 1876 amounted to \$19,828 against \$8,089 in 1875.

Dyed and Twilled Shirts show a considerable decrease, the value being only \$21,107 against \$126,332 in 1875. I must confess, however, that I can hardly reconcile these figures with those published by the

Board of Trade, which I notice from home circulars show a very considerable increase in the shipments of those goods.

Taffachelass.—Three years ago I drew attention to the increasing native manufacture of those goods, and as last year I expressed surprise at the importations having kept as large as they did, I find now no cause for wonder in noting a considerable falling off, namely, to \$49,636 from \$257,915 the previous year. Prices have kept very low, and must, I imagine, show a considerable loss to importers. Of the decline expected they must, however, have had ample warning.

Woollens.—The decrease of \$335,391 in these articles is to be accounted for by the marked falling off in the importation of Mousselines de Laine.

Check Lustres, which figured in 1875 for \$112,663, do not appear at all in the Custom House returns for 1876.

Blankets also show a reduction, and *Camlets* have dwindled down to the insignificant amount of \$3,812.

On the other hand, *Cloth*, strange to say, shows an increase of nearly \$140,000; and *Lastings*, though goods of no new import, figure separately for \$18,949.

Woollen Taffachelass figures for the first time, the import amounting to \$70,741, but I am under the impression this is no new fabric, but simply Lustres or such like goods made up in patterns similar to Cotton Taffachelass.

The increase in *Cloth* noted above is probably due to the fact of the import in the year previous having been very small, and to Government requirements. I fear this trade is not an expanding one, and that the Japanese cannot afford to pay a remunerative price for a good fabric, such as would repay them for the first outlay better than by the purchase of the inferior articles brought here under the name of cloth.

Blankets show a falling off of nearly twenty-five per cent., but as much of the surplus stock has now been disposed of, the prospects appear more favourable than they did last year. Competition will, however, I presume, soon destroy all chance of profits being realized.

Mixed Cotton and Woollen Goods show a falling off of \$478,372. The cause is to be found chiefly in the decreased import of Lustres and Orleans which figure for barely a third of what they did in 1875. I am not surprised at this diminution, for I understand the increased importations of 1875 were not warranted, and it must be borne in mind that an article like Woollen Italians (Italian Cloth), which has been steadily increasing, cannot fail to interfere with Black Lustres.

As regards *Metals*, I can see but little requiring comment. There is a falling off of over 18,000 piculs in the importation of Manufactured Iron, but on the other hand Scrap Iron shows an increase of over 14,000 piculs, the bulk of the latter being, I imagine, composed of old wire roping which has been sold during the past year to a considerable extent, and when untwisted takes to a certain extent the place of nail rod iron.

Arms and Ammunition may in future be left out as a separate item, for they are only imported now under exceptional circumstances.

Miscellaneous Foreign figure for only \$4,255,228 against \$7,009,960 in 1875, but in the latter figures articles on Government account were included to the extent of \$3,119,535, which for 1876 figure only to an amount \$621,284.

Though many fluctuations from the values of 1875 are apparent in the numerous articles under this heading, there is but little for actual comment. I notice with pleasure an increase in the value of *Foreign Books*, and while on this subject I may refer to the numerous translations of foreign books into Japanese that are now to be found in all the native book shops. Original works on everyday subjects are, however, difficult to procure; as a case in point I may mention that I made enquiries some time since for any native work on agriculture or farming, but while translations of several foreign works were offered to me, I could not obtain one original work on the subject emanating from a native source.

Silk and Cotton Mixtures from \$136,295 in 1875 dwindled down to \$41,213 in 1876. The low prices ruling for Silk here in 1875 have probably enabled dealers to supply their wants from the native looms.

The increase of 60 per cent. in the importation of *Umbrella Frames*, and diminution of nearly 40 per cent. in that of *Umbrellas*, clearly testifies to the Japanese having taken to the manufacture of these now very necessary articles, a fact which were there any doubt at all about, would be quickly removed by a walk through any of the busy streets of Yedo, where umbrella manufacture appears to be one engaging much attention. The manufacture is probably stimulated by the favourable market that is offered in Hongkong, to where foreign umbrellas made up here are exported in no inconsiderable quantity.

Miscellaneous Local show a slight reduction, notably in respect to Sugar.

I proceed to review the trade in the principal articles of Export—Silk, Silk-worms Egg Cards, and Tea.

Silk.—Export for the year ended December 31st, 1876, 18,418 piculs 67 catties, valued at \$13,191,710, against 11,813 piculs 87 catties, valued at \$5,424,916 exported in 1875.

The past year will always be a memorable one to those interested in the Silk trade, remarkable as it has been beyond precedent for the violent fluctuations in prices which it has witnessed, and as a year of excitement surpassing in intensity anything hitherto witnessed.

At the commencement of 1876 prospects for Japan Silk were as gloomy as they could well be, for prices, although so low as to border on the actual cost of production, compared unfavourably with the values then current in Europe, and it was well known to shippers that even the lower cost purchases of November had arrived to an unprofitable market, stocks of manufactured goods as well as of raw silk were heavy at home, the fashion, too, averse to silk and in favour of Woollen goods, and manufacturers had complete control of the situation, obliging holders of raw silk to make continuous fresh concessions.

January opened with a slightly improved demand for Hank sorts, and prices advanced \$10 to \$15 per picul, good No. 2 Maebashi being then quoted \$450 to \$460. The enquiry came almost exclusively from the Lyons market, where an opinion was gaining ground that prices had touched the lowest point. Business fell off at the end of the month, and much uneasiness prevailed owing to the failure of a prominent Continental house engaged in the silk trade.

Prices nevertheless remained steady, the demand for native consumption being good and for which supplies were freely taken from this market, the better description of silk had, moreover, become scarce at this period.

Maebashi, Medium stood at...\$400 to \$420
Oshiu Kakeda, best at\$550 to \$570
Other best Oshiu sorts.....\$500 to \$520
Hamatsuka.....\$400 to \$420

The stock of Silk in Yokohama was one thousand one hundred bales (1,100.)

Throughout *February* holders were firmer in their demands, and succeeded in obtaining \$15 per picul advance in prices, evincing great unwillingness to sell though buyers were few and purchases on a most limited scale.

Hamatsukas and Oshius had a good share of attention towards the end of the month, buyers being especially attracted by the low cost of the former.

In *March* there was greater activity though of a purely speculative nature, for prices at home had still a downward tendency, though here a further advance of \$10 per picul took place on all classes of hanks. Such was the depression in the European markets at this time that it was scarcely possible to obtain in Lyons forty-four francs for best Japan hanks, while common qualities were more readily saleable at francs 42 to 43. In London 14s. 6d. was an extreme price for best Maebashi, and common qualities were rather preferred at 13s. 3d.

These comparisons are made to show that with manufacturers price was the main object, and yet, strange to say, consumption was not stimulated by the almost unprecedented low value of the raw material.

April and *May* were very dull months, the market being bare of good hanks, and the little business done was confined to Oshius.

Towards the end of *May* telegrams came forward reporting unfavourably as to the progress of the European silk crops, and some anxiety was shown to secure parcels, which led to fair settlements of Oshius, other sorts failing at this moment.

June.—Oshius were pushed up \$20 per picul, but transactions were unimportant.

The great feature of the month was the opening of the new silk season, which commenced on the 18th, somewhat earlier than usual, by the arrival on the market of twenty-five bales of Maebashi.

This silk was found to be of good nervous quality, rather full in size, but less mixed than first arrivals usually are. The parcel immediately found a buyer at \$455, a very moderate price at which to open the market, and worthy of note as showing that at this epoch no suspicion existed of the vast changes in value so shortly to take place. It will be seen by the foregoing that the business for the first six months of the year had been of little importance, and of a very unsatisfactory nature on the whole, though the very last shipments of old silk had the good fortune to fall in for the great advance in prices that followed in Europe.

The export for the six months ended June 30th, 1876, was 3,339 piculs and 80 catties, value \$1,525,406, as against 3,959 piculs and 23 catties, value \$1,867,330, for same period in 1875.

These figures call for little comment; the falling off in the export as compared with the corresponding half year of 1875 is to be accounted for by the large increase in the native consumption of Raw Silk, and further to the unremunerative prices ruling in Yokohama, which had the effect of keeping a good deal of Silk back in the interior. It will be seen that the average cost of shipments to the end of June, 1876, is a trifle below the average of the same period 1875.

It was known here in *May* that the French crop was almost a total failure, and that of

Italy likely to prove a short one, but so far this was regarded with indifference by manufacturers, and no material change had taken place in prices in Europe which permitted of the market being opened here at a higher figure than \$455 for Maebashi on the 18th of June.

Just about this time speculation, which had been dormant for several years past, stepped in and capitalists in London, in consequence of the abundance of money and the suspicion with which many of the ordinary channels of investment were regarded, now looked upon Silk as a fair subject for venture, a very large business ensued and manufacturers and "throwsters" were compelled to follow the market.

I will now follow the course of events succeeding the first arrival of new Silk, presenting a rise in prices quite without precedent in the annals of the trade. The next supplies that reached this market in June, consisting of seventy-five bales No. 2½ to 3 Maebashi, were taken up at an advance of \$25 per picul, namely \$480 and before the close of the month \$550 had been paid for Maebashi No. 2½, and the market was bare of stock.

July.—Buyers anxiously awaited fresh arrivals, and the Japanese strained every nerve to meet the exigency of the market, and to reap the golden harvest that was in store for them.

Advices from Europe were more and more positive as to the deficit in the European crop, which was now set down at two-thirds, and the desire to buy Silk being general, and supplies altogether inadequate to the demand, prices came up with a rush, reaching by the 18th July

\$750 for best Maebashi.

\$675 to 690 „ No 2½ „

\$650 to 670 „ inferior „

Here a pause took place, for direct communication with Europe by wire was broken off, and buyers being quite in the dark as to the course of events there, hesitated to continue with purchases at the enormous rise that had taken place, already in advance of last known quotations from home.

This check to business, coupled with heavy arrivals from the interior, brought about a fall in prices of \$50 to \$60 by the end of the month.

Arrivals up to this time exceeded, 4,000 bales, very unusual figures for this early stage of the season.

On the 29th of July, news had crept in by way of China that during the interval of the interruption of the telegraph, prices in Europe had been running up far above anything looked for, and although few shippers were yet in the secret, the whole stock was not in excess of requirements, and the next day witnessed every available bale of silk bought up at the decline previously noted, which brought prices to \$630 to \$640 for Maebashi medium, and \$680 for Shinshius.

August.—During the first week of the month, when it became generally known by the reopening of direct telegraph communication that prices were always rising in the home markets, the excitement in Yokohama was intense, and Japanese obtained for the silk then coming forward \$750 for common Maebashi, and for best \$850. In addition to the higher prices for silk the cost was further augmented by a rise in exchange of ten per cent. on the rates current during the latter half of July.

A slight reaction in consequence took place in prices, which fell \$40 to \$50, but quickly recovered \$20 of the ground lost, and upon

this basis purchases were very large. August closed with the astounding settlements of 9,668 bales since the opening of the season, and the market bare of stock.

Current quotations were:—

Hanks, best.....\$800 to \$820

„ medium 2½.....\$760 to \$780

„ No. 3.....\$720 to \$740

But this decline in prices, it must be mentioned, was simply due to the great rise in exchange, which had gone up to 4s. 7d., the highest point reached during the year.

September.—The demand continued without abatement, and every class of silk was caught up for shipment at daily advancing prices. An important decline in exchange enabled buyers to meet more readily the increasing demands of the native silk-men for more dollars, and prices went bounding upwards with the large transactions that were taking place, until the climax was reached at the end of the month, when prices ruled as follows:—

Hanks, No. 1.....\$1,200

„ Nos. 1 and 2.....\$1,140 to \$1,170

„ good No. 2.....\$1,100 to \$1,120

„ „ 2½.....\$1,060 to \$1,080

„ 3 & 4 inferior.....\$1,000 to \$1,040

Oshius, best.....\$1,100

Oshius, medium to good.....\$1,050 to \$1,080

Kakeda, good and best.....\$1,150 to \$1,200

do. medium and good.....\$1,050 to \$1,100

Hamatsuke, good and best.....\$ 860 to \$ 890

do. medium.....\$ 820 to \$ 850

Native filatures:—

1st Order, 11/13 deniers.....\$1,300

2nd „ do. do.....\$1,250

2nd „ 14/16 do. do.....\$1,200

Transactions from the 1st July had reached 14,200 bales, of which 11,400 were Hank sorts, and 2,800 bales only Oshius and other sorts.

Buyers for native consumption, which had previously been checked by the high prices paid for export, now bought largely on this market of coarse Silk, fearing no doubt that everything would be shipped off.

October.—Much uneasiness prevailed on account of the unsettled state of politics in Europe, and prices fell fully \$120 per picul.

The market was burthened with a heavy stock of 2,200 bales.

November.—Very discouraging news from home markets paralysed business, and there was little or nothing doing, though prices had fallen rapidly to

\$800 to \$840 for best Maebashi.

\$700 to \$740 „ 2½ do.

\$600 to \$640 „ inferior do.

December.—Stocks had accumulated to 3,000 bales, and with the absence of any demand \$50 to \$60 decline was established, and the year closed with the same range of prices that were current in July.

Stocks had accumulated to 3,000 bales. The Export for the six months ending December 31st was 15,078 piculs 87 catties, valued at \$11,666,304, as against 7,854 piculs 64 catties, valued at \$3,557,586, for the corresponding period in 1875.

The total export for the year, as already stated, 18,418 piculs 67 catties, valued at \$13,191,710, against 11,813 piculs 87 catties, valued at \$5,424,916, exported in 1875; an increase of 6,604 piculs 80 catties in quantity and of \$7,766,794 in value. The sudden collapse of prices in Europe, while such large quantities of dear silk were still *en route*, must have almost neutralized the brilliant profits derived from early shipments.

Of native silk dealers it may also be said that the large gains of the first three months of the new season have been to a great extent lost, for they bought with avidity up country at the highest prices ruling here in September.

To the peasants and silk reeler up country the season must have been a most prosperous one, and will probably greatly stimulate the production next year, especially of fine sized silks, which have not been subject to such violent fluctuations as common qualities and coarse sized silks.

Native filature silks have been more abundant than in former years, and the ready sale at high prices during the whole season must have been highly flattering to the proprietors.

The crop of 1876 has been a very abundant one, and will in a great measure account for the increased export; but the high prices caused much old silk to be brought forward, as well as largely curtailed native consumption, the usual supplies taken for that purpose having been diverted to the European markets.

The quality of all the past year's cocoons was excellent, the improvement, however, looked for in the silk reeling has not been fully realized. Such was the pressure to bring down the silk to market in as short a time as possible, that reeling was carried on under all circumstances, and not only by day but by night, and no further explanation is required to account for a large preponderance of undesirable silk.

Silk-worms Eggs.—The total export for 1876 reached 1,018,525 cards, valued at \$1,902,271, against 727,463 cards, valued at \$474,921, exported in 1875, representing an increase of 291,062 cards and of \$1,427,350 in the value of this article of export.

Italian buyers began to arrive in Yokohama towards the end of August, but they came with few orders in hand, and as the business they came here to transact was to a great extent of a speculative nature, a sort of understanding had been come to amongst themselves to hold off from buying until cards could be had at exceedingly low prices such as had ruled here during the past season. Several circumstances had occurred prior to their arrival which rendered this project unfeasible. Viewing the higher prices paid for cocoons in Italy, and the greatly enhanced value of silk, merchants, both European and native, had made large contracts for Silk-worm eggs in the interior, and these operations were further based to some extent on the knowledge that the whole quantity available for export was not likely to exceed 1,000,000 cards, quantity considered barely adequate to the requirements of Italy and France.

This very sensitive article being now held in strong hands instead of being brought to market by a multitude of small cultivators and proprietors, as for the previous two years, was better able to hold its own against the combination that was made for its defeat.

By the end of October arrivals had reached 950,000 cards, but no *bona fide* transactions on this market had as yet been entered upon, as there was a wide difference of opinion about prices between buyers and sellers.

It was not until early in November that Italian buyers, dreading the approach of cold weather, were forced to buy, and made considerable purchases on the basis of \$2.25 to \$3.00 for best Oshiu cards and \$2.75 to \$3.25 for best Joshiu ditto. A few parcels of superior Yanagawa sold as high as \$3.90. By the 17th November 360,000 cards had been shipped off, costing from \$2.25 to \$2.50, the average being between these figures. Prices after this gradually declined, upon which buying became more general, and the American mail of the 25th November took away 500,000 cards, costing on an average \$1.70.

By the end of November total purchases had reached 860,000 cards, leaving over 300,000, some fair, but the bulk inferior qualities, which were held at about \$1.20. 270,000 of these remaining cards were held by a Native Bank that had given advances to holders. A part of these, amounting to 140,000, were sold here at from ninety cents to one dollar forty cents, and the remainder were returned into the interior for native use.

A new feature of this season's business in Silk-worm eggs was the departure of several Japanese for Italy with cards which they expected to be able to realize there to greater advantage than by selling here. Should they meet with success it is not improbable that in future a large portion of this trade will be carried on direct with Italy by the native merchants.

Tea.—The Export for 1876 amounted to 115,994 piculs 7 catties, valued at \$3,475,178, falling considerably below the export of 1875, which was 134,415 piculs 67 catties, valued at \$4,813,458, a decrease of 18,421 piculs in quantity and of \$1,340,280 in value. The following is a brief review of the trade for the year 1876.

Prices at the commencement of the year were high considering the quality of teas on offer, good medium commanding from \$26 to \$29 per picul, and other grades in proportion.

An idea that some re-imposition of duty on tea would be made in the United States kept the market active with speculative purchases until the month of April, when the excitement entirely died away.

With the opening of May first arrivals of new crop came in, and immediately found buyers at prices ranging from \$42 to \$54 per picul.

As supplies increased rates declined, and about the middle of August good medium teas were in full supply at \$19 to \$21 per picul. This was the cheapest period of the year.

The export continued steady, and during the month of November showed fairly large figures, owing to the departure of three sailing craft for New York direct. With the close of the year the tea market might be considered as finished for the season, as settlements during the period until the arrival of the new crop teas were small and unimportant.

Japanese producers have apparently become alive to the fact that they have fallen into the error of overproducing, and also that their teas are losing their former great popularity with consumers in the United States. They are now endeavouring to correct this by paying more attention to the picking and curing of the leaf, and the present season's produce shows a marked improvement as compared with the last two seasons.

As the consumption of Japan tea is restricted to the United States, which market seems to have received last year more than it could dispose of, causing a consequent depression of prices here, it is not likely that the year 1876 has witnessed any increase in the area of the plantations. Indeed many native merchants assert that in some districts the tea plantations will in future be used for other and more profitable crops.

Some samples of Japan Black Tea prepared under Chinese supervision have been shown, no encouragement can be held out to the Japanese for producing them in quantity. The teas are handsome in leaf but entirely devoid of any character or quality in cup, resembling low grade Amoy Congous, and

worth on the London market about 10½d. to 1s., or in New York 22 to 24 cents per pound. Some shipments of Japan Teas by native merchants under Government auspices have been made to New York, but prices realized there are reported to be so unsatisfactory that it does not seem likely that the experiment will be repeated. It is asserted that the losses, taking into account the market price at which the teas could have been disposed of here to foreign buyers, exceed \$120,000.

The Californian trade is gradually changing, the somewhat gaudy lacquered tea chests and fancy packing which were marked features of this business are not now so popular, and several of the leading importers in San Francisco find it cheaper to import teas in bulk and pack them over there, having the papers necessary for such packing made up here.

The facilities afforded by the railroads make Chicago an important distributing centre, and shipments to that city direct from Japan amount to 2,500,000 lbs. or about ten per cent. of the total amount exported.
